⁹⁶⁶⁸ Exhibit P764 (Video recording of the identification procedure), at 21:19; exhibit P764.1 (Transcript of identification procedure), p. 4; T. 21 January 2016, p. 43 (closed session).

⁹⁶⁶⁹ Exhibit P764 (Video recording of the identification procedure), between 19:56:20 and 19:56:56 and between 21:03 and 21:41.

The portion in *italics* is handwritten.⁹⁶⁷⁰ The Trial Chamber decided to admit the declaration into evidence as indispensable to the identification process.⁹⁶⁷¹

5015. Defence counsel did not cross-examine the witness about the identification procedures.⁹⁶⁷²

iv. Professor Sporer's evidence

5016. Professor Siegfried Ludwig Sporer testified for the Oneissi Defence as an expert witness in eye-witness identification.⁹⁶⁷³ He was a Professor of Social Psychology at the University of Giessen, Germany between 1997 and 2015.⁹⁶⁷⁴ He occasionally appeared as an expert in trials in Germany, usually as a court-appointed expert.⁹⁶⁷⁵

5017. The professor examined the Prosecution's identification procedures, including selecting the photographs for the photo boards and administering the identification procedure.⁹⁶⁷⁶ He analysed the extent to which they followed best practises and to what extent, by not following them, they may have introduced the potential for error and bias.⁹⁶⁷⁷ Professor Sporer also analysed the factors, 'assessment variables' that, according to experimental psychological studies, may affect an identification decision and its accuracy, and therefore are relevant in assessing the

⁹⁶⁷⁰ Exhibit P765.1 (Written declaration following identification procedure), p. 3. The original printed declaration contained some parts that were crossed through by pen. The printed declaration, including the stricken parts, reads: 'After viewing the photoboard, I identify photograph number [INSERT NUMBER OF PHOTOGRAPH] as being [THE PERSON I SAW AT X-Y-Z]. [Insert any additional comments].' After one line space, the declaration reads: 'I do not identify any of the individuals shown.' After another line space, it reads: 'Attached is the actual photoboards shown to me and signed by me'.

⁹⁶⁷¹ Decision admitting two photo boards into evidence, para. 42.

⁹⁶⁷² The Trial Chamber considered this in its decision admitting the two photo boards into evidence and that Rule 150 (J) requires a cross-examining party to put to a witness the nature of a Party's case that contradicts the witness's evidence. The Trial Chamber had previously drawn this rule to the attention of Defence counsel. Decision admitting two photo boards into evidence, paras 29-30.

⁹⁶⁷³ The area of the expertise is implicit in the Trial Chamber's decision, as read together with the relevant application from the Defence, and Professor Sporer's report. Professor Sporer's expertise was unopposed. Decision on Professor Sporer's evidence; F3605, Defence for Hussein Hassan Oneissi Rule 161 (A) Disclosure Notice and Request for the Admission into Evidence of Prof Sporer's Expert Report, 21 March 2018; F3621, Prosecution's Rule 161 (B) Notice in relation to Witness DHO-001 Siegfried Ludwig Sporer and Request to Strike Portions of the Report, 6 April 2018; exhibit 4D540 (Professor Sporer's expert report).

⁹⁶⁷⁴ Siegfried Sporer, T. 14 May 2018, p. 16; exhibit 4D541 (Professor Sporer's *curriculum vitae*), p. 1.

⁹⁶⁷⁵ Siegfried Sporer, T. 16 May 2018, p. 79. His second area of expertise—which Professor Sporer describes as not relevant to his expert testimony in this case—is 'deception'. Siegfried Sporer, T. 14 May 2018, p. 21.

⁹⁶⁷⁶ Exhibit 4D540 (Professor Sporer's expert report), pp 4-5.

⁹⁶⁷⁷ Exhibit 4D540 (Professor Sporer's expert report), p. 9, *see also* pp 4-5.

evidentiary value of an identification decision.⁹⁶⁷⁸ He analysed whether and how certain factors may have affected the identification attempts in this case.

a. The construction of the photo boards

5018. Professor Sporer explained that there are two approaches to selecting foil or fillers, namely non-suspects,⁹⁶⁷⁹ when constructing photo boards. One is the ‘match-to-suspect’ strategy, while the other is the ‘match-to-description’ strategy.⁹⁶⁸⁰ According to the latter approach, a line-up should not contain faces with elements that are inconsistent with the witness’s description. According to Professor Sporer, empirical evidence shows that match-to-description has better probative value.⁹⁶⁸¹ The danger of the match-to-suspect strategy is that it creates a tendency towards the suspect. Some authors recommend a combination of both approaches.⁹⁶⁸²

5019. Professor Sporer noted that the same two photo boards were shown to multiple witnesses, including the witness, even though the witnesses gave different and contradictory descriptions,⁹⁶⁸³ for example regarding eye colour and hair colour,⁹⁶⁸⁴ and may not have been referring to the same person. If this were the case, the same identification board should not have been used with the witnesses.⁹⁶⁸⁵ Also, many of the fillers did not match the description well enough to be proper fillers, thus reducing the number of reasonable fillers who could be alternatives.⁹⁶⁸⁶ Further, the age of those in the photo boards varied widely, with differences of up to 20 years.⁹⁶⁸⁷ Professor

⁹⁶⁷⁸ Exhibit 4D540 (Professor Sporer’s expert report), pp 4-5 33, 94, figure 3.01; Siegfried Sporer, T. 16 May 2018, p. 27 (private session).

⁹⁶⁷⁹ Exhibit 4D540 (Professor Sporer’s expert report), p. 14.

⁹⁶⁸⁰ Siegfried Sporer, T. 15 May 2018, pp 40, 66-67; exhibit 4D540 (Professor Sporer’s expert report), pp 63-64.

⁹⁶⁸¹ Siegfried Sporer, T. 15 May 2018, pp 40-41.

⁹⁶⁸² Siegfried Sporer, T. 15 May 2018, p. 75.

⁹⁶⁸³ Exhibit 4D540 (Professor Sporer’s expert report), pp 26-27.

⁹⁶⁸⁴ Exhibit 4D540 (Professor Sporer’s expert report), p. 27.

⁹⁶⁸⁵ Siegfried Sporer, T. 15 May 2018, p. 42-45. *See also* exhibit 4D540 (Professor Sporer’s expert report), pp 27, 44. According to Professor Sporer, ‘It is considered standard practice in today’s guidelines that different witnesses who provided different descriptions from different observations (not observing the same encounter) should not be shown the same lineup’. Professor Sporer relied on the US Department of Justice’s Technical Working Group of Eyewitness Identification Evidence’s ‘Eyewitness Evidence: A Guide for Law Enforcement’, October 1999. *See* exhibit 4D540 (Professor Sporer’s expert report), p. 63.

⁹⁶⁸⁶ Siegfried Sporer, T. 15 May 2018, p. 47.

⁹⁶⁸⁷ Exhibit 4D540 (Professor Sporer’s expert report), pp 65-68, figure 4.01; Siegfried Sporer, T. 15 May 2018, pp 58, 67-68.

Sporer found it difficult to understand why the investigators did not use the witnesses' descriptions.⁹⁶⁸⁸

5020. Professor Sporer testified that, according to international best practices, only one suspect should be on a photo board or a line-up.⁹⁶⁸⁹ Everyone else in the line-up should be innocent fillers.⁹⁶⁹⁰ However, two photo boards, one containing Mr Oneissi's photograph and one containing Mr Sabra's, were shown together to the witness, which violated the 'single-suspect' model.⁹⁶⁹¹ Further, several relatives—as potential persons-of-interest—were included in the photo boards, substantially reducing the probative value of the whole identification procedure.⁹⁶⁹²

b. The review of the photo boards

5021. Professor Sporer noted that Mr Williams, who administered the photo boards, knew who the suspect was. However, the person administering the line-up should be blind to this. Otherwise, non-verbal communication can be unconsciously transmitted.⁹⁶⁹³ Eyewitness studies have demonstrated that this reduces errors.⁹⁶⁹⁴

5022. Further, the witness, after tapping fingers on a face, was interrupted by the investigator, who said aloud the number being pointed at.⁹⁶⁹⁵ Professor Sporer testified that, from a scientific point of view, the person administering the photo board is supposed to wait and not suggest an answer to the person or give any feedback.⁹⁶⁹⁶ He described Mr Williams's nod, after the witness tapped on the photo, as a non-verbal signal and suggestive influence.⁹⁶⁹⁷ According to Professor Sporer, Mr Williams 'actually actively influenced the witness in the sense of confirming, oh, yes, you identified'. This is post-identification feedback that should not have occurred.⁹⁶⁹⁸

⁹⁶⁸⁸ Exhibit 4D540 (Professor Sporer's expert report), p. 80.

⁹⁶⁸⁹ Professor Sporer asserted that there is unanimity among researchers, in the literature published since the 1980s, that there should be a single-suspect model. Siegfried Sporer, T. 14 May 2018, pp 40, 44.

⁹⁶⁹⁰ Siegfried Sporer, T. 14 May 2018, p. 39; exhibit 4D540 (Professor Sporer's expert report), p. 14.

⁹⁶⁹¹ Siegfried Sporer, T. 15 May 2018, p. 58.

⁹⁶⁹² Exhibit 4D540 (Professor Sporer's expert report), pp 57-58, 61.

⁹⁶⁹³ Siegfried Sporer, T. 15 May 2018, pp 58-59, 88-92. This requirement applies to medical and forensic sciences, such as fingerprint analysis, and eyewitness testimony.

⁹⁶⁹⁴ Siegfried Sporer, T. 15 May 2018, p. 89.

⁹⁶⁹⁵ Siegfried Sporer, T. 16 May 2018, pp 29, 57 (private session).

⁹⁶⁹⁶ Siegfried Sporer, T. 16 May 2018, p. 30 (private session); exhibit 4D540 (Professor Sporer's expert report), p. 88.

⁹⁶⁹⁷ Exhibit P764 (Video recording of the identification procedure), at 18:53-19:05; Siegfried Sporer, T. 16 May 2018, p. 57 (private session).

⁹⁶⁹⁸ Siegfried Sporer, T. 16 May 2018, pp 58, 65 (private session).

5023. Professor Sporer stated that the identification procedures contained the ‘appearance-change instruction’, warning witnesses that individual features such as head, facial hair and clothing are subject to change.⁹⁶⁹⁹ An empirical study shows that this instruction led to an increase in false identifications.⁹⁷⁰⁰ Professor Sporer noted positively that the witnesses were warned that the person they met may not be in the line-up, which is recommended by identification guidelines.⁹⁷⁰¹

5024. Professor Sporer concluded that the outcome of any identification process with a photo board constructed and administered as in this case has no scientific value.⁹⁷⁰²

c. Factors relevant to assessing the accuracy of an identification decision

5025. Professor Sporer noted that the factors affecting an identification decision and its accuracy can be divided into variables at the encoding or perception stage, the retention interval and the retrieval stage.⁹⁷⁰³ They include confidence and response latency—namely, the time taken to arrive at a decision.⁹⁷⁰⁴

5026. To estimate the likelihood of the accuracy of a later identification, Professor Sporer was of the view that the conditions of the original encounter must be scrutinized.⁹⁷⁰⁵ Distinctive features such a scar or a large nose can help the witness encode these.⁹⁷⁰⁶ Professor Sporer read relevant portions of the transcript of proceedings and considered that the Trial Chamber focused on Mr Oneissi’s monobrow, apparently visible in his passport photograph.⁹⁷⁰⁷ For example, during the

⁹⁶⁹⁹ Exhibit 4D540 (Professor Sporer’s expert report), p. 92.

⁹⁷⁰⁰ Exhibit 4D540 (Professor Sporer’s expert report), p. 94.

⁹⁷⁰¹ Siegfried Sporer, T. 15 May 2018, pp 58, 82.

⁹⁷⁰² Siegfried Sporer, T. 16 May 2018, pp 69-70. He emphasised that none of the investigators involved in the construction and administration of the photo boards ever referred to the literature on the psychology of eyewitness testimony and did not appear to be aware of the guidelines based on that literature. Exhibit 4D540 (Professor Sporer’s expert report), pp 52-53. The Trial Chamber acknowledges the point but is not overly concerned by this as it is aware of the difference in learning of a university professor, as a specialist in this field, and investigators. It accepts that investigators should be trained to use the relevant guidelines and additionally should be aware of the principles but without requiring a detailed knowledge of the academic literature on the subject.

⁹⁷⁰³ Exhibit 4D540 (Professor Sporer’s expert report), p. 33.

⁹⁷⁰⁴ Exhibit 4D540 (Professor Sporer’s expert report), pp 33, 94, figure 3.01.

⁹⁷⁰⁵ Exhibit 4D540 (Professor Sporer’s expert report), p. 34; Siegfried Sporer, T. 15 May 2018, pp 19-21, 26-27.

⁹⁷⁰⁶ Siegfried Sporer, T. 15 May 2018, pp 33-37. Many people rely on outer features (hair, beard) when encoding a face, and consequently recognition drops when outer features are changed. Exhibit 4D540 (Professor Sporer’s expert report), pp 41-42; Siegfried Sporer, T. 15 May 2018, pp 37-38.

⁹⁷⁰⁷ Exhibit 4D540 (Professor Sporer’s expert report), p. 42.

Oneissi Defence's cross-examination of Mr Lanzi on the selection of the fillers for the photo board, the Trial Chamber noted that a distinguishing feature of Mr Oneissi's photograph was his 'monobrow'.⁹⁷⁰⁸ Mr Lanzi agreed in response to judicial questions, that that was a distinguishing feature in Mr Oneissi's photograph, but that only one filler on Mr Oneissi's photo board had such a monobrow.⁹⁷⁰⁹ According to Professor Sporer, as a striking, potentially distinctive feature, the witness should have but did not mention the monobrow.⁹⁷¹⁰

5027. The original observation by the witness of 'Mohammed' did not involve a criminal action but a single encounter with the person.⁹⁷¹¹ Professor Sporer commented that the only reason for the witness to encode 'Mohammed's' face was his inappropriate behaviour in a place of worship. However, after 'Mohammed' did not come to an appointment two days later, the witness had no reasons to rehearse the event in his memory until early 2006, when he wrote about it.⁹⁷¹² Without rehearsal of the event, information is more likely to fade from a witness's memory and therefore more likely to be forgotten.⁹⁷¹³

5028. Professor Sporer stated that creating associations between the information perceived and the witness's personal memories can improve later recall and recognition.⁹⁷¹⁴ In 2007, the witness claimed to have memorized 'Mohammed's' face because he looked like a classmate. According to Professor Sporer, it was not clear whether this association was elicited at the original encounter—and so helped to preserve the memory—or was added later to embellish the witness's memory report.⁹⁷¹⁵

⁹⁷⁰⁸ The two eyebrows have no marked division but seem to form a single eyebrow. T. 15 July 2015, p. 43.

⁹⁷⁰⁹ Lorenzo Lanzi, T. 15 July 2015, pp 43-44 (responding to Judge Nosworthy's question).

⁹⁷¹⁰ Siegfried Sporer, T. 16 May 2018, p. 43 (private session); exhibit 4D540 (Professor Sporer's expert report), p. 25. Professor Sporer underlined that 'it seems striking that none of the witnesses seem to have noticed these features [the monobrow and the rather large ears (of Mr Oneissi)] and therefore incorporated them in their descriptions'. Exhibit 4D540 (Professor Sporer's expert report), pp 42-43.

⁹⁷¹¹ According to Professor Sporer, presumably, 'if one tried to re-enact' the relevant interaction, the whole encounter was presumably shorter than the ten minutes estimate that the witness provided for the first time in court. Exhibit 4D540 (Professor Sporer's expert report), pp 35-36, referring to T. 20 January 2016, p. 39 (closed session).

⁹⁷¹² Professor Sporer considered that, even if two months after the encounter—in watching a television program about Mr Abu Adass's disappearance—it became clear that the encounter might be important. Exhibit 4D540 (Professor Sporer's expert report), p. 40.

⁹⁷¹³ Exhibit 4D540 (Professor Sporer's expert report), p. 40.

⁹⁷¹⁴ Exhibit 4D540 (Professor Sporer's expert report), p. 40.

⁹⁷¹⁵ Exhibit 4D540 (Professor Sporer's expert report), pp 39-41; Siegfried Sporer, T. 16 May 2018, pp 47-48 (private session).

5029. Professor Sporer noted that, in the witness's testimony, the descriptions got more detailed. As memory does not get better after eight or ten years, this means that the witness tried to make an impression as a credible witness.⁹⁷¹⁶ As to the description of 'Mohammed' that the witness provided in different statements, Professor Sporer pointed to 'minor discrepancies', such as describing 'Mohammed' with dark chestnut hair versus blackish hair, or hair parted versus straight and spiky hair.⁹⁷¹⁷

5030. Professor Sporer testified that accurate choices are made faster than inaccurate choices.⁹⁷¹⁸ The witness's long decision time demonstrated a lack of confidence in the decision.⁹⁷¹⁹ Even after, the witness was still looking at the other faces. Professor Sporer had never seen an identification that took as long as in this case, neither in the literature nor the case studies.⁹⁷²⁰

5031. Further, confidence can be indicative of accuracy of the identification, but only if it is assessed immediately at the time of the decision in the line-up. Researchers seem to agree that identification with high certainty is more likely to be correct than identification with medium certainty, which in turn is more likely to be correct than one with low certainty.⁹⁷²¹

5032. 'Confidence was never explicitly stated' by the witness. The witness did say 'there is a big resemblance',⁹⁷²² but in Arabic,⁹⁷²³ so it was difficult to assess what degree of familiarity was

⁹⁷¹⁶ Siegfried Sporer, T. 16 May 2018, pp 41-42, 46 (private session).

⁹⁷¹⁷ Siegfried Sporer, T. 16 May 2018, pp 39-40 (private session).

⁹⁷¹⁸ In a study that analysed wrongful convictions, some of the witnesses who misidentified somebody were originally insecure and often it took them fairly long before deciding. Siegfried Sporer, T. 15 May 2018, pp 107-109, T. 16 May 2018, pp 7, 9, 11; exhibit 4D540 (Professor Sporer's expert report), figure 6.06 (ERN 1DT4-2381(COR2)).

⁹⁷¹⁹ Siegfried Sporer, T. 16 May 2018, p. 67 (private session); exhibit 4D540 (Professor Sporer's expert report), p. 33.

⁹⁷²⁰ Siegfried Sporer, T. 16 May 2018, pp 67-68 (private session).

⁹⁷²¹ In mistaken identification cases in the US, witnesses who were initially unsure became sure several months or years later when testifying in court: it is the post-identification feedback effect, which influences confidence but not accuracy. *See* Siegfried Sporer, T. 14 May 2018, p. 54, T. 15 May 2018, pp 102-104.

⁹⁷²² Siegfried Sporer, T. 16 May 2018, p. 65 (private session).

⁹⁷²³ In his report, Professor Sporer correctly noted that the witness pronounced this sentence in Arabic. Exhibit 4D540 (Professor Sporer's expert report), p. 18. Professor Sporer, in his testimony, mistakenly stated that the witness said this sentence in English. Professor Sporer was not 'sure whether he made an internal translation before he said this'. Siegfried Sporer, T. 16 May 2018, p. 65 (private session).

meant.⁹⁷²⁴ The witness additionally stated that ‘It was very difficult’.⁹⁷²⁵ Empirical evidence shows that people who say that the task was difficult are less confident. Professor Sporer concluded that the witness’s ‘expression’ put the confidence on the lower side.⁹⁷²⁶

(b) Submissions

5033. The Prosecution’s position shifted from definitely averring—at the outset of the trial—that Mr Oneissi and ‘Mohammed’ were one and the same, to stating, by its closing submissions, that the Trial Chamber need not make any finding on the issue.

5034. The amended consolidated indictment pleads that Mr Oneissi, calling himself ‘Mohammed’, met Mr Abu Adass—the individual selected as suitable for the video-taped false claim of responsibility—at the Arab University Mosque in either December 2004 or January 2005.⁹⁷²⁷ The Prosecution reaffirmed this in its pre-trial briefs⁹⁷²⁸ and opening statements.⁹⁷²⁹

5035. However, mid-trial and without explanation, the Prosecution’s position shifted. In an email to the Oneissi Defence, it stated that it did not regard the purported photo board identification of Mr Oneissi as ‘Mohammed’ to ‘represent a conclusive identification’ of him.⁹⁷³⁰

5036. By the close of the evidence and in its final trial brief, the Prosecution’s position had moved to merely stating that a witness⁹⁷³¹ had ‘identified’ a photograph of Mr Oneissi from a photo board when asked to identify the person calling himself ‘Mohammed’ spoken to at the mosque in January 2005. The Prosecution’s position was that it did not ‘place great weight in this identification’, but

⁹⁷²⁴ Professor Sporer explained that, when a higher degree of familiarity is required by a witness to identify someone, the reliability of the evidence is stronger, whereas when a smaller degree of familiarity is considered sufficient by a witness to identify someone, this minimizes the probative value of an identification. Exhibit 4D540 (Professor Sporer’s report) pp 17-18.

⁹⁷²⁵ Siegfried Sporer, T. 16 May 2018, p. 65 (private session). As noted above—and as correctly reported in Professor Sporer’s expert report (exhibit 4D540, p. 18), the witness actually said, ‘It was so hard to remember...But’. *See* above, at para. 5013, referring to exhibit P764, at 21:05.

⁹⁷²⁶ Siegfried Sporer, T. 16 May 2018, p. 65 (private session).

⁹⁷²⁷ Amended consolidated indictment, paras 3 (b), 23.

⁹⁷²⁸ Prosecution’s updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), para. 122; Prosecution pre-trial submissions (Merhi case), annex A, para. 113.

⁹⁷²⁹ Prosecutor’s opening statement, T. 16 January 2014, pp 14 (Mr N. Farrell), 105 (Mr G. Cameron); Prosecutor’s opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 51 (Mr G. Cameron), ‘I expect the evidence to show that the accused Oneissi was, in fact, Mohammed’.

⁹⁷³⁰ Email dated 6 February 2015 from the Prosecution Senior Trial Counsel to Counsel for Mr Oneissi, annexed to F2214, Oneissi Defence Motion Requesting Non Admission of Photo Board, 22 September 2015.

⁹⁷³¹ The witness who met a ‘Mohammed’ in the mosque.

nonetheless it remains that the witness ‘associated a person resembling’ the photograph of Mr Oneissi on the photo board with the person encountered at the mosque.⁹⁷³²

5037. Concerning ‘Mohammed’ and his association with the Accused, the Prosecution in its final trial brief stated:

In this regard, it is worth recalling that the Chamber does not need to establish the precise identity of the “Mohammed” who lured ABU ADASS away from his family. Whilst the Prosecution alleged in the Indictment that it was **ONEISSI** who acted as “Mohammed”, and has presented evidence in support of this allegation, it is unnecessary to dwell on the resolution of this issue. It is, in no way, dispositive of **ONEISSI**’s involvement in the “Mohammed” deceit, the identification of a suitable scapegoat and the preparation of the false claim plot as a whole. The evidence establishes that **ONEISSI** was intimately involved in multiple aspects of the overall plot, regardless of whether he was the person who interacted personally with ABU ADASS.⁹⁷³³

5038. The Prosecution, in its final trial arguments, neither made any submissions on the quality of the identification process nor responded to the Oneissi Defence’s arguments on this.

5039. The Trial Chamber, after examining the Parties’ and Legal Representatives of Victims’ final trial briefs, directed the Prosecution to address the following question:

The amended consolidated indictment, at paragraphs 23, 27 and 28, alleges that Mr Hussein Hassan Oneissi was ‘Mohammed’, while the Prosecution brief states, at paragraph 518, that the Trial Chamber ‘does not need to establish the precise identity’ of the ‘Mohammed’ who lured Mr Ahmed Abu Adass away from his home (see also paragraph 730 of the Prosecution brief which does not link Mr Oneissi with ‘Mohammed’).

Is the Prosecution conceding that it has not proved that Mr Oneissi was ‘Mohammed’?

And if so, what effect does this have on its case against Mr Oneissi?⁹⁷³⁴

⁹⁷³² Prosecution final trial brief, para. 517.

⁹⁷³³ Prosecution final trial brief, para. 518, with internal footnote to the amended consolidated indictment omitted.

⁹⁷³⁴ Questions for closing submissions, para. 3.

5040. In oral closing arguments, in response to the Trial Chamber's question, Prosecution counsel submitted that 'There's no concession. There is evidence that Mr Oneissi was Mohammed',⁹⁷³⁵ which has 'some evidential value' and 'there are other features that also provide some indication that Mr Oneissi was Mohammed'.⁹⁷³⁶

5041. Specifically, Witness 56's evidence reflected that 'Mohammed first appeared, new to the area, came in, and met Abu Adass, disappeared for a week, came back, disappeared for another week, and then Abu Adass went off with Mohammed'. Also, Mr Oneissi's Purple mobile usage pattern 'to a large extent, matches that'. There was 'heavy COLA cell use' on Wednesday 22 December 2004 by Mr Oneissi over a period. That occurred a week later and again on Friday 7 January 2005. Something in these patterns provides support to Mr Oneissi being 'Mohammed'.⁹⁷³⁷

5042. The Prosecution submitted that the Trial Chamber need not establish the precise identity of the 'Mohammed' who lured Mr Abu Adass away from his family. Although the amended consolidated indictment alleges that Mr Oneissi acted as 'Mohammed' and the Prosecution 'presented evidence in support of this allegation', it was unnecessary to dwell on the resolution of this issue.⁹⁷³⁸ It was a fact relating to the acts and conduct of the Accused but was not one essential to conviction. The Prosecution's oral submissions on this point are footnoted below.⁹⁷³⁹

⁹⁷³⁵ Prosecution closing submissions, T. 14 September 2018, p. 69.

⁹⁷³⁶ Prosecution closing submissions, T. 14 September 2018, p. 67.

⁹⁷³⁷ Prosecution closing submissions, T. 14 September 2018, p. 68.

⁹⁷³⁸ Prosecution closing submissions, T. 14 September 2018, p. 67; Prosecution final trial brief, para. 518. According to the Prosecution, this is not dispositive of Mr Oneissi's involvement in the 'Mohammed' deceit, the identification of a suitable scapegoat and the preparation of the false claim plot as a whole. These submissions are dealt with in this chapter, in sub-section (D) (3) 'Activity of Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018, between December 2004 and Friday 7 January 2005', and (E) 'Mr Abu Adass's disappearance and surrounding events'.

⁹⁷³⁹ Prosecution closing submissions, T. 14 September 2018, pp 69-71. In response to a question as to whether the pleading that Mr Oneissi was 'Mohammed' was a material fact:

'MR. POVOAS: It's a fact relating to the acts and conduct of the accused, but it's not essential to conviction. It's not something you need to find beyond reasonable doubt. It's not even something you need to find. What you need to find is the responsibility of Mr. Oneissi and Mr. Sabra for the overall false claim plot. An important part of that is the Mohammed deceit, and by that I mean the subplot in which someone would appear, pretend to be a Muslim orphan wanting to learn how to pray, and that that would be used to lure somebody. Eventually, ultimately, it was Abu Adass. What you need to consider is the involvement of Mr. Sabra and Mr. Oneissi in that subplot. And you don't need to find who played which role.

PRESIDING JUDGE RE: Okay. So maybe I can answer it for you. You're saying the Prosecution isn't conceding that it hasn't proved the case that Mr. Oneissi was Mohammed. That's the first part. And the second one, you would be saying this doesn't affect the case against Mr. Oneissi because we could, if we wanted to, find that he was Mohammed, or he was involved in some way in the Mohammed story as opposed to him being Mohammed. We don't need to find

5043. The Merhi Defence submits that the Prosecution is unable to determine ‘Mohammed’s’ identity with any precision.⁹⁷⁴⁰ The Prosecution inaccurately asserts that it is not important for the Trial Chamber to establish that Mr Oneissi is the ‘Mohammed’ who approached Mr Abu Adass, as alleged in the amended consolidated indictment.⁹⁷⁴¹

5044. The Oneissi Defence submits that, based on Professor Sporer’s expert evidence, the photo board interview and its outcome should be given no weight, as the board was improperly constructed and incorrectly administered.⁹⁷⁴² Further, no identification occurred during the photo board interview and nothing establishes that the witness positively identified Mr Oneissi as ‘Mohammed’.⁹⁷⁴³ The Oneissi Defence referred in detail to Professor Sporer’s specific criticisms regarding the construction and administration of the photo boards.⁹⁷⁴⁴

5045. Further, the Prosecutor’s position is unclear. He cannot state that he does not accord much value to the witness’s identification, but ‘in parallel say that he is maintaining the fact that Oneissi is possibly Mohammed, or at the end of the day it doesn’t really matter’. ‘With identification processes, either there is a positive identification or there isn’t. There is no middle ground.’⁹⁷⁴⁵ It is not possible to ‘do away with the faults of the procedure using telephone evidence’.⁹⁷⁴⁶ The

that he was Mohammed, just that his actions were temporal, coincidental with the Mohammed thing, so he was inextricably involved with Mohammed even if he wasn’t Mohammed. Yes?

MR. POVOAS: That’s it. And it’s worthwhile making this submission. You’ve heard me say that when you consider these patterns against this concrete occurrence in the plot, you obviously don’t consider it in isolation. You look at it in its totality. This pattern of behaviour cannot be coincidence. And you can be satisfied, actually, so that you’re sure that this took place. But even if you’re not sure in itself of this side of the plot, and I don’t -- I say you very much can be. But even if, you are entitled to use the patterns involved in his behaviour to reinforce and corroborate all of the other patterns, particularly the delivery of the false claim on the 14th of February. So in my submission, you don’t look at this activity in isolation and say: Am I sure? You don’t have to be sure of that. You need to be sure that these two accused, Sabra and Oneissi, are involved in shielding the perpetrators from justice with the necessary mens rea, the necessary knowledge. It’s wrong to address even this part of the plot and say: Are we sure beyond reasonable doubt? It’s really important, it’s crucial that every time you are considering subissues, bigger issues, do not consider them in isolation, because the power of this case is in the big, the full picture, and the totality of the evidence. And that’s why you can be sure, in the end, because all of these patterns, spreading right through from beginning to end and the dropping of the phones, none of this can be coincidence. There is no reasonable alternative inference that it’s anything other than explaining the guilt of the accused.’

⁹⁷⁴⁰ Merhi Defence final trial brief, para. 491.

⁹⁷⁴¹ According to the Merhi Defence, Mr Merhi ‘stands accused of having coordinated the activities of Sabra and Oneissi and not these of an unidentified individual who introduced himself as Mohammed in order to profile, identify and select Abu Adass’. This also applies to the alleged abduction of Mr Abu Adass who, the Prosecution alleges, left with the same ‘Mohammed’, Merhi Defence final trial brief, para. 488 (emphasis omitted).

⁹⁷⁴² Oneissi Defence final trial brief, paras 420, 470.

⁹⁷⁴³ Oneissi Defence final trial brief, para. 420.

⁹⁷⁴⁴ Oneissi Defence final trial brief, paras 428-510.

⁹⁷⁴⁶ Oneissi Defence closing submissions, T. 19 September 2018, p. 116.

Prosecution failed to establish any link between ‘Mohammed’ and Mr Oneissi,⁹⁷⁴⁷ thus implicitly admitting that it cannot establish that Mr Oneissi posed as ‘Mohammed’.⁹⁷⁴⁸

5046. In closing submissions, counsel for Mr Oneissi submitted that ‘for obvious reasons, the Mohammed-Oneissi allegation is the mainstay’ of the Prosecution case, and the ‘failure to prove that Mr. Oneissi is Mohammed, has, of course, a concrete effect’ on this.⁹⁷⁴⁹

5047. The Oneissi Defence also argues that the Prosecution’s submission that the ‘forensic visibility’ of Mr Oneissi’s mobile 095 “‘was extremely low” is a complete and utter contradiction with the alleged “intensity” of 095’s activations of the COLA cells around the mosque and the Prosecution’s exaggerated claims in relation to the activations of BNPI3’.⁹⁷⁵⁰ Additionally, this ‘submission is even more contradictory given the Prosecution allegation ... that, as “Mohammed”, Mr. Oneissi was undisguised when he approached’ both the witness who encountered ‘Mohammed’ and Mr Abu Adass.⁹⁷⁵¹

5048. According to the Sabra Defence, the Prosecution failed to investigate the inconsistencies in the witness’s account, including the description of ‘Mohammed’ and the subsequent identification of Mr Oneissi, despite the stark contrast in features.⁹⁷⁵² The Sabra Defence also submits that, contrary to the Prosecution’s submissions, the identity of ‘Mohammed’ is crucial to establishing the identity of the true perpetrators behind Mr Abu Adass’s disappearance and whether he was lured away or left voluntarily with an acquaintance.⁹⁷⁵³ Further, there is no allegation that Mr Sabra ever pretended to be ‘Mohammed’ or addressed or approached anyone in this capacity.⁹⁷⁵⁴

⁹⁷⁴⁷ Oneissi Defence final trial brief, para. 419 and following.

⁹⁷⁴⁸ Oneissi Defence final trial brief, para. 678. The Oneissi Defence argues that the Prosecution’s submission is a clear concession that it could not prove that Mr Oneissi was ‘Mohammed’. Oneissi Defence closing submissions, T. 20 September 2018, p. 133, T. 19 September 2018, p. 113.

(c) Findings

i. The shift in the Prosecution's case

5049. The Prosecution submits that the Trial Chamber does not need to find beyond reasonable doubt that Mr Oneissi was 'Mohammed', or that it is even something it needs to find at all.⁹⁷⁵⁵ The Trial Chamber notes with some unease the Prosecution's arguments on the standard of proof necessary to conclude whether Mr Oneissi was 'Mohammed'.

5050. To the contrary, the Trial Chamber is convinced that the fact of 'Mohammed' and Mr Oneissi sharing the same identity is a material fact that must be proved beyond reasonable doubt to the extent that a conviction of Mr Oneissi would rely on it. The Trial Chamber agrees, for the reasons set out above at paragraphs 208-209 that Mr Oneissi's identification as 'Mohammed' is a material fact that must be proved beyond reasonable doubt. It is a material fact which would underpin Mr Oneissi's criminal responsibility—and also Mr Sabra's and Mr Merhi's—by virtue of their pleaded involvement in making the false claim of responsibility.

5051. In some respects, it appeared to represent the essence of the case against Mr Oneissi. Contrary to the Prosecution's suggestion, a material fact cannot be converted into one that is non-material merely because it is obvious, at the close of the case, that the evidence is insufficient to prove that fact beyond reasonable doubt.

5052. Like all the elements of a crime, the Prosecution must prove the identification of an Accused beyond reasonable doubt.⁹⁷⁵⁶ If the Trial Chamber were not satisfied beyond reasonable doubt that Mr Oneissi was 'Mohammed',⁹⁷⁵⁷ it could still nonetheless convict him of the crimes charged if the Prosecution could prove beyond reasonable doubt other relevant material facts proving the elements of the crimes charged and supporting the charged modes of responsibility.

ii. International case law on identification evidence

5053. The Trial Chamber has examined, and accepts, the following principles of international criminal law procedural law.

5054. According to the ICTR's and ICTY's case law, a reasonable Trial Chamber must take into account the difficulties associated with identification evidence in a given case and carefully evaluate it before accepting it as the basis for a conviction.⁹⁷⁵⁸ Further, a Trial Chamber must always, in the interests of justice, proceed with extreme caution when assessing a witness's identification of the accused made under difficult circumstances.⁹⁷⁵⁹

5055. The principles also include that 'visual identification evidence is treated with very special care' as it is particularly liable to error,⁹⁷⁶⁰ and 'involves inherent uncertainties due to the vagaries of human perception and recollection'.⁹⁷⁶¹ And, 'even where a witness appears to be honest, the Trial Chamber must be convinced that his or her evidence is objectively reliable before it will be sufficient to establish a positive identification'.⁹⁷⁶²

5056. Relevant assessment factors also include the following. First, the circumstances of observing the alleged perpetrator, such as the length of the observation, the distance between the perpetrator and the witness, any obstructions of the observation and the interactions between the witness and the perpetrator. Second, the manner in which the witness describes the perpetrators; and third, the existence of irreconcilable witness testimonies.⁹⁷⁶³

5057. A trial chamber will also assess whether identification evidence includes inconsistent or inaccurate testimony about the defendant's physical characteristics at the time.⁹⁷⁶⁴ Furthermore,

⁹⁷⁶⁴ *Haradinaj and others* Appeal Judgment, para. 156.

identification evidence may be affected by the length of time between the crime and the confrontation.⁹⁷⁶⁵

5058. On photo board identification, the ICTY Trial Chamber in *Limaj and others* considered whether:

- a. the accused's photograph was clear enough and matched his description at the time of the events;
- b. the accused blended with or stood out among the foils/fillers;
- c. a long time had elapsed between the original sighting of the accused and the photo spread identification;
- d. the identification was made immediately and with confidence;
- e. the witness had opportunities to become familiar with the accused prior to his identification, in person or through the media; and
- f. the procedure in some way encouraged the witness to make a positive identification despite some uncertainty, or encouraged the witness to identify the accused rather than someone else.⁹⁷⁶⁶

5059. The Trial Chamber finds these considerations persuasive and adopts them, while noting that several coincide with those Professor Sporer describes as relevant in determining the accuracy and evidentiary value of an identification.

iii. The purported identification of 'Mohammed'

5060. On 10 July 2007, based on the witness's description, a sketch of 'Mohammed' was made. On 22 March 2010, the witness participated in the identification procedure described above, administered by the Prosecution investigators, where the witness tapped on Mr Oneissi's photograph.

⁹⁷⁶⁵ *Haradinaj and others* Appeal Judgment, para. 156, referring to *Limaj and others* Appeal Judgment, para. 30.

⁹⁷⁶⁶ *Limaj and others* Trial Judgment, para. 19.

5061. However, having assessed the evidence regarding the purported identification of ‘Mohammed’, including that of Professor Sporer, the Trial Chamber is not satisfied that the identification is reliable and therefore probative.

5062. There are two primary reasons for this. The first is the more than five-year gap in time between when the witness saw ‘Mohammed’ in the Arab University Mosque in January 2005 and the purported identification of Mr Oneissi as this ‘Mohammed’ to Prosecution investigators in March 2010. The second is the flawed manner in which the identification was attempted and about which Professor Sporer provided extensive evidence.

5063. A major difficulty in this case is the length of time between the encounter and the identification. Specifically, the witness met the person identifying as ‘Mohammed’ for around ten minutes in a mosque in January 2005. The witness thought nothing of this event until seeing the program featuring Mr Abu Adass’s sister on television, a few months later in April 2005.

5064. The first description the witness gave of this ‘Mohammed’ was sometime in 2006. The witness gave another to Lebanese investigative authorities in January 2007, and in July 2007, a Lebanese police sketch artist drew a sketch of ‘Mohammed’. The witness described ‘Mohammed’ as in his late twenties, around 175 centimetres tall, slim and bearded, with visible eyebrows and blue eyes. He had thick dark chestnut hair and spoke with an unfamiliar accent, which the witness thought was used to make it seem like ‘Mohammed’ came from a remote village. Almost three more years passed, to March 2010—making it five years after the sole ten-minute long conversation with ‘Mohammed’—before the witness participated in a purported photo board identification procedure.

5065. Of itself and without more, this chronology would normally render any resulting identification unreliable. The period between the original sighting of the person and the photo board identification is relevant to assessing the reliability of identification evidence, under both the principles of international criminal law case law and on Professor Sporer’s evidence. In short, the science and the law, and indeed common human experience, accord in that the longer the period the less reliable the ‘identification’. Memory does not improve over time.

5066. In particular, the Trial Chamber agrees with Professor Sporer’s observations that before writing exhibit P760 in 2006, two years after the brief meeting, the witness apparently had no

reason to rehearse ‘Mohammed’s’ description to memory. Without this, information is likely to fade. It also shares his concerns that no eyewitness studies have investigated retention intervals as long as those experienced in this case, namely that the sketch was created two and a half years after the original observation, and that the identification took place in 2010, more than five years after the relevant encounter.

5067. Further, the Trial Chamber accepts Professor Sporer’s evidence that the conditions of the witness’s original encounter with ‘Mohammed’ in 2005 are relevant to the accuracy of the later identification. These points include that the witness met ‘Mohammed’ only once, the original observation did not involve a criminal act, and the whole encounter was possibly shorter than the estimated ten minutes. On the other hand, the Trial Chamber also notes that the encounter in the mosque was unusual. In normal circumstances, someone would not usually remember a routine visit to a religious institution, especially if they occurred daily. This particular encounter, however, was sufficiently out of the ordinary for someone in the witness’s position to have been expected to have remembered some significant details about it.

5068. The other major problem with the witness’s purported identification is the flawed identification procedures employed here.

5069. The Trial Chamber largely accepts Professor Sporer’s mostly unchallenged evidence critiquing the reliability of these procedures. For example, he criticised a number of features. These include the failure to consider the available descriptions of several witnesses in the selection of photographs for the photo boards, and the inclusion of relatives of Mr Oneissi and Mr Sabra who might have been persons of interest.⁹⁷⁶⁷ He also criticised the administration of the identification procedure by a ‘non-blind’ administrator, who should not have interacted with the witnesses and interpreted their responses, as the investigator did with the witness.⁹⁷⁶⁸ Another was the failure to

⁹⁷⁶⁷ The Trial Chamber, in admitting the photo boards into evidence, found that ‘including photos of relatives of suspects does not, of itself, make the process unsafe’. Decision admitting two photo boards into evidence, para. 34. However, in light of Professor Sporer’s evidence on this point, the Trial Chamber finds that it would have been desirable for the Prosecution to ensure, for such an important task, that it complied with instructions not to include certain relatives of the Accused in the photo boards.

⁹⁷⁶⁸ The Trial Chamber recognises that several guidelines, including some cited by Professor Sporer, such as the ICTY guidelines or the UK Police and Criminal Evidence Act 1984 Code of Practice for the detention, treatment and questioning of persons by Police Officers, do not require the blind administration of a photo board procedure. Nevertheless, given the need not to ‘contaminate’ any possible identification by giving clues, conscious or unconscious—it would have been desirable for the Prosecution to have either adopted a blind administration or, if impracticable, that administrators had adopted ‘blind procedures’. See 2017 U.S. Department of Justice guidelines

ask the witnesses to assess or rate their confidence on their decisions, which is potentially important to evaluate their accuracy.

5070. Further, while studies show that accurate choices are made faster than inaccurate choices, the witness took more than ten minutes to inspect the photographs and to tap on one. The comment, ‘It’s too hard’, with the request for different photographs—after spending the first six minutes inspecting them—likely attests to a loss of memory as a function of the long retention interval. It also shows the witness’s apparent unpreparedness at that moment to identify ‘Mohammed’ based on the photographs on the photo boards. However, approximately two minutes and forty seconds after, the witness tapped on Mr Oneissi’s photograph. The Trial Chamber accepts Professor Sporer’s concerns in each of these areas.

5071. What the witness said when selecting Mr Oneissi’s photograph also shows a lack of confidence in the ‘identification’. At the end of the identification procedure, the witness did not state that Mr Oneissi was ‘Mohammed’. In English, the witness stated: ‘It was so hard to remember...But’, and after 14 seconds, in Arabic: ‘There is a big resemblance’.

5072. These statements are understandable in the circumstances, namely, the brevity of the witness and ‘Mohammed’s’ sole encounter, the five and a half years that passed before viewing the photo board and the obvious concern taken in attempting to assist the investigation. Nevertheless, the Trial Chamber interprets what the witness said as not expressing confidence in the decision.

5073. The Trial Chamber also notes that Mr Oneissi’s photograph differs from the witness’s own descriptions of ‘Mohammed’. ‘Mohammed’—according to the witness’s 2006 description—had a white bluish face or ashen skin, and big or wide blue eyes.⁹⁷⁶⁹

5074. While the quality and light in the photograph may not allow someone to properly appreciate Mr Oneissi’s complexion, his eyes certainly differ: they are not blue, as described, but brown. This

(US Department of Justice, Eyewitness identification procedures for conducting photo arrays, procedure 5.2) stating that, when a blind administration may be impracticable—for example if all the officers in an investigating office already know who the suspect is—‘blinded’ procedures should be adopted, where the administrator cannot see the order or arrangement of the photographs viewed by the witness or which photograph(s) the witness is viewing at any particular moment. *See also* Decision admitting two photo boards into evidence, para. 35, finding that it was ‘not ideal that Mr Williams knew Mr Sabra’s and Mr Oneissi’s identities as suspects’.

⁹⁷⁶⁹ Exhibit P760, p. 1; exhibit P762, p. 3.

lack of congruence between the photograph selected and the witness's previous description of the person is a relevant factor for assessing identification evidence, as noted both by Professor Sporer and in international criminal law case law.

5075. Further, in the Trial Chamber's subjective (internal and collective) view there is some limited resemblance between the photograph of Mr Oneissi and the sketch of 'Mohammed', drawn according to the witness's instruction. These are set side by side immediately below.

Exhibits P763 and P765 (Sketch of 'Mohammed' drawn in July 2007 and Mr Oneissi's photograph from the photo board selected in March 2010)

5076. According to Professor Sporer, a lack of resemblance between such a sketch and the person in question is 'a sign that there is something wrong in the memory'.⁹⁷⁷⁰ The Trial Chamber, as noted, can see a limited resemblance between the sketch of 'Mohammed' and Mr Oneissi's photograph. This, however, does not add to the reliability of the identification attempt.

5077. The Trial Chamber recognises that some aspects of the identification process were properly conducted. All relevant identification procedures were video recorded. This ensured a high degree

⁹⁷⁷⁰ Siegfried Sporer, T. 16 May 2018, p. 38 (private session).

of transparency and allowed the Trial Chamber to properly assess the evidence. The Trial Chamber could hear and observe the interactions between witness and investigator, including gestures.

5078. Other positive aspects of the identification procedures employed include the selection of photographs, for the photo boards, of similar size and similar background lighting or colour.⁹⁷⁷¹ Professor Sporer described, as a positive aspect, that all the witnesses were given the instruction that the person they met may not be in the line-up, which is recommended by identification guidelines. Professor Sporer also did not see anything in the video showing that Mr Williams provided any suggestion or directed the witness to any photograph.⁹⁷⁷² The Trial Chamber has carefully re-scrutinised the video and remains satisfied that there is no evidence that any external factor during the videoing influenced the selection of Mr Oneissi's photograph.

5079. Further, the Trial Chamber is of the view that the witness tried, in testifying, to remember to the witness's best ability what had occurred some eleven years earlier. In this sense, it views the testimony as credible. Witnesses typically vary their accounts with each retelling of a story; this could include describing a thing or a person. This goes to the reliability of the recollection. Here, the particular relevant issue is that the witness would have had no reason to think, in January 2005, that the event was significant enough to attempt to memorise, or, to use Professor Sporer's terminology, to 'encode'. The witness was not witnessing a crime or an event for which there may have been a contemporaneous reason to 'encode' information, such as a detailed description of someone encountered for a mere ten minutes.

5080. The Trial Chamber, however, disagreed with certain portions of Professor Sporer's evidence. In particular, it is clear that the guidelines and principles he personally favours—whether based on his own research or that of others—are not universally accepted. National and international guidelines differ, for example, about whether fillers should resemble the suspect⁹⁷⁷³

⁹⁷⁷¹ The lighting/colour of the background is substantially similar for all the photographs of each photo board.

⁹⁷⁷² Siegfried Sporer, T. 15 May 2018, pp 82-85, T. 16 May 2018, pp 83-84 (private session).

⁹⁷⁷³ The Code D - Revised Code of Practice for the identification of persons by Police Officers (PACE), used in the UK, requires that an 'identification parade' includes people who *resemble the suspect*. See Code D of the Police and Criminal Evidence Act 1984 (as revised in 2017) (PACE Code D), para. 3.7 (Professor Sporer refers to the 2011 version of Code D; but its para. 3.7 is unchanged). The ICTY guidelines on visual identification also required, for the preparation of a photo board, to 'pick photographs of people of similar appearance *to the suspect*'. See exhibit 4D289, pp 1-2 (emphasis added).

or the witness's description of the 'suspect'.⁹⁷⁷⁴ These, according to Professor Sporer, should be preferred or at least considered. National guidelines also differ as to whether more than one suspect can be included in the same photo array.⁹⁷⁷⁵ While Professor Sporer believes that using the 'appearance-change' instruction 'may not be a good idea',⁹⁷⁷⁶ the US Department of Justice guidelines on the other hand provide that such instructions should be given to the witness.⁹⁷⁷⁷ Theories, practices and ideas on this apparently diverge.

5081. Nevertheless, the Trial Chamber accepts in large part the remainder of Professor Sporer's evidence. Furthermore, the few positive aspects of the identification procedure, and the witness's earnest attempt to make an identification, are substantially outweighed by the many flaws in the identification process as noted previously, including the construction and administration of the photo board. To this must be added the significant delay between when the witness met 'Mohammed' and the selection of Mr Oneissi's photograph during the identification procedure.

5082. The Trial Chamber therefore is not convinced of the reliability of the photo board identification to establish whether Mr Oneissi was the 'Mohammed' in the mosque. Accordingly, even if the Trial Chamber had positively found that Mr Abu Adass met a 'Mohammed' in the mosque, it would have disregarded the photo board evidence in assessing whether there was any evidence capable of establishing that Mr Oneissi was that 'Mohammed'.

⁹⁷⁷⁴ According to the 'Eyewitness evidence: A guide for law enforcement', developed and approved by the Technical Working Group for Eyewitness Evidence - October 1999, section V, para. 2, the investigator should 'Select fillers who generally fit the witness's description of the perpetrator. When there is a limited/inadequate description of the perpetrator provided by the witness, or when the description of the perpetrator differs significantly from the appearance of the suspect, fillers should resemble the suspect in significant features'. The Trial Chamber notes that, on 6 January 2017, the US Department of Justice issued 'Eyewitness identification procedures for conducting photo arrays', and described the 'Eyewitness evidence: A guide for law enforcement', as its previous publication addressing procedures for photo arrays and stated that since then 'research and practice have both evolved significantly'. See Memorandum of 6 January 2017 from the Deputy Attorney General of the US Department of Justice on 'Eyewitness Identification: Procedures for Conducting Photo Arrays'. According to these more recent US Department of Justice guidelines, 'fillers should generally fit the witness's description of the perpetrator'. See US Department of Justice, Eyewitness identification procedures for conducting photo arrays, <https://www.justice.gov/file/923201/download>, procedure 3.2.

⁹⁷⁷⁵ Code D of the Police and Criminal Evidence Act 1984 (as revised in 2017), annex B, para. 9, p. 40. See Eyewitness evidence: A guide for law enforcement, developed and approved by the Technical Working Group for Eyewitness Evidence - October 1999, section V, para. 1. According to the 2017 US guidelines—as described above—only one suspect should be included in each photo array regardless of whether multiple suspects fit the same description. See US Department of Justice, Eyewitness identification procedures for conducting photo arrays, procedure 2.1.

⁹⁷⁷⁶ Exhibit 4D540 (Professor Sporer's expert report), p. 94.

⁹⁷⁷⁷ See US Department of Justice, Eyewitness identification procedures for conducting photo arrays, procedure 6.3.2.

5083. Finally, the Trial Chamber makes the following observations on the Parties' submissions regarding the identification procedures.

5084. It is not clear to the Trial Chamber whether the Prosecution, at the close of the case, was still submitting that the witness 'identified' Mr Oneissi—even if not *conclusively*⁹⁷⁷⁸—or instead acknowledges that the witness's evidence can only establish a resemblance between Mr Oneissi and the 'Mohammed' encountered at the mosque. The Trial Chamber would have appreciated greater clarity as to the Prosecution's final position on whether, and to what extent, the witness's identification evidence should be accepted. The Prosecution did not make any submissions on its reliability or how the Trial Chamber should treat the evidence.

5085. The Trial Chamber also notes the lack of submissions from the Prosecution addressing the quality of the identification process or Professor Sporer's evidence. Prosecution submissions on the methodology of the construction and administration of the photo boards would have assisted the Trial Chamber in assessing the relevant evidence. In closing arguments, the Oneissi Defence noted that the Prosecutor did not 'even mention in his closing brief or his closing arguments' Professor Sporer or his evidence. It argued that this meant that the Prosecutor agreed with, or consented, to it.⁹⁷⁷⁹ Against this, however, in oral closing arguments, Prosecution counsel explicitly submitted that 'there is some evidential value' in evidence that Mr Oneissi was 'Mohammed'.⁹⁷⁸⁰

5086. Meanwhile, the Oneissi Defence submitted in its final trial brief, relying on Professor Sporer's evidence, that Mr Williams's nod and further verbal communication affected the witness's confidence, the probability that he would sign the declaration,⁹⁷⁸¹ and could have influenced the witness's comment, 'there is a big resemblance'.⁹⁷⁸²

⁹⁷⁷⁸ According to Black's Law Dictionary, conclusive evidence means 1. Evidence so strong as to overbear any other evidence to the contrary – also termed *conclusive proof*. 2. Evidence that so preponderates as to oblige a factfinder to come to a certain conclusion.

⁹⁷⁷⁹ Oneissi Defence closing submissions, T. 19 September 2018, p. 114.

⁹⁷⁸⁰ Prosecution closing submissions, T. 14 September 2018, pp 67, 69; Prosecution final trial brief, para. 517.

⁹⁷⁸¹ Oneissi Defence final trial brief, para. 478.

⁹⁷⁸² Oneissi Defence final trial brief, para. 482.

5087. However, the Oneissi Defence elected not to pursue these issues with the only person who could testify about whether he was in fact influenced by the alleged clues—namely, the witness.⁹⁷⁸³

5088. The Trial Chamber held at the time that in these circumstances any submission by the Oneissi Defence asserting that the witness was in fact influenced by Mr Williams’s conduct in the interview would be without weight.⁹⁷⁸⁴ The Trial Chamber has therefore given no weight to the Oneissi Defence final submissions on this issue. Ultimately, however, as the Trial Chamber has decided not to credit the witness’s identification evidence, nothing now turns on the Oneissi Defence’s strategic litigation decision not to cross-examine the witness on the identification process pursuant to Rule 150 (J).⁹⁷⁸⁵

3. Activity of Mr Merhi’s Purple 231, Mr Oneissi’s Purple 095 and Mr Sabra’s attributed Purple 018, between December 2004 and Friday 7 January 2005

5089. The Prosecution’s case alleging Mr Oneissi’s and Mr Sabra’s involvement in the ‘Mohammed’ story and Mr Abu Adass’s disappearance and his subsequent appearance in the broadcast video hinges upon it proving their presence in and near the Arab University Mosque at relevant times. The allegation that Mr Oneissi befriended Mr Abu Adass, pretending to be ‘Mohammed’ and seeking assistance in learning how to pray was central to this part of the case.

5090. The evidence led to prove this is the call data records showing Mr Oneissi’s personal mobile and Mr Sabra’s shared personal mobile connecting to the Alfa network’s COLA and adjacent cells at relevant times, and Mr Oneissi’s purported identification as the ‘Mohammed’ that a witness saw in the Mosque, and therefore, as the ‘Mohammed’ that Mr Abu Adass allegedly met in the mosque. The Prosecution submitted in its final trial brief, however, that it did not place great weight on this identification but insisted that it still had some evidential value.

5091. The Trial Chamber has found above, at paragraph 4968, that a witness met someone named ‘Mohammed’ at the mosque in early January 2005. Further, that that ‘Mohammed’ asked the

⁹⁷⁸³ It did so despite the Trial Chamber previously stating that the Parties should explore the issue of Mr Williams’s allegedly ‘suggestive conduct’ in the administration of the photo boards with the witness. Decision denying Oneissi motion to exclude photo board evidence, para. 18.

⁹⁷⁸⁴ Decision admitting two photo boards into evidence, paras 29-30, 38.

⁹⁷⁸⁵ Rule 150 (J) requires a cross-examining party to put to a witness the nature of a Party’s case that contradicts that witness’s evidence.

witness to teach him how to pray, and that the witness pointed at nearby Mr Abu Adass as someone who was better suited to teach him how to pray. But this could not establish beyond reasonable doubt that Mr Abu Adass met a ‘Mohammed’ in the mosque. Nor that the ‘Mohammed’ the witness met in the mosque was the same ‘Mohammed’ who Mr Abu Adass allegedly met.

5092. Once the evidence that Mr Oneissi was positively identified as ‘Mohammed’ is excluded from consideration as lacking reliability, the call data records showing the cells to which his Purple 095 and Mr Sabra’s attributed Purple 018 connected are the only evidence of his and Mr Sabra’s pleaded presence in the relevant areas.

5093. For completeness, however, the Trial Chamber has considered and analysed the Prosecution’s pleaded case that Mr Oneissi’s Purple 095 and Mr Sabra’s pleaded Purple 018 mobile activity reflected ‘Mohammed’s’ presence at the mosque in December 2004 and January 2005. Namely, that Mr Oneissi and Mr Sabra, between **Wednesday 22 December 2004 and Monday 17 January 2005**, were ‘responsible for locating a suitable individual who would be used to make a false claim of responsibility’ for the attack.⁹⁷⁸⁶

5094. The Prosecution relied upon mobile calls on Mr Merhi’s and Mr Oneissi’s personal (Purple) mobiles, Mr Sabra’s attributed Purple mobile, and on contacts between Mr Badreddine’s Green network mobile, 023, and Mr Merhi’s attributed Green 071, and evidence from Mr Abu Adass’s family and friends.

5095. The Prosecution argues that Mr Oneissi’s and Mr Sabra’s mobile use—connecting to the COLA and adjacent cells around the mosque at that time—was unusual or exceptional, and combined with the evidence of Mr Abu Adass meeting ‘Mohammed’ in the mosque and his disappearance, proves their involvement in both, and hence making the false claim of responsibility. The Prosecution argues that the evidence of their presence around the mosque has to be taken in tandem with the evidence of their mobiles connecting to cells near the payphones used to make the calls to Reuters and Al-Jazeera and the tree, in the afternoon of Monday 14 February 2005.

⁹⁷⁸⁶ Amended consolidated indictment, para. 23.

5096. Whether it can be established that Mr Abu Adass left his home on Sunday 16 January 2005 in the company of this ‘Mohammed’—and that this ‘Mohammed’ called his family home either the day before or the day after his disappearance—is dealt with below at paragraphs 5318 to 5485. There, it is concluded that neither allegation has been proved.

(a) Evidence

5097. The Trial Chamber heard extensive evidence about the Alfa network’s COLA and adjacent cells near the mosque, and of the patterns of communication between the three Purple mobiles, 231, 095 and 018, and the two Green network mobiles, 071 and 023, during the pleaded period.

5098. The Prosecution did not ask its cell site expert Mr J. E. Philips or another cell site expert to analyse Purple 018 and Purple 095;⁹⁷⁸⁷ hence, it relied heavily upon the analysis and opinion evidence of its in-house expert witness on criminal networks, Mr Gary Platt.

i. Cells relevant to the ‘COLA phase’

5099. The Trial Chamber has carefully examined the cell site evidence to determine where Mr Oneissi and Mr Sabra—if he was using Purple 018 on the relevant days—*could have been* while making and receiving calls.⁹⁷⁸⁸ It has scrutinised whether the evidence is sufficient to prove beyond reasonable doubt their presence *at or near the mosque* at the critical moments; and further, to determine whether Mr Oneissi’s Purple 095’s and Mr Sabra’s attributed Purple 018’s connections to cells near the mosque in December 2004 and January 2005 were, as the Prosecution argues, ‘exceptional’.

5100. The Trial Chamber believes that the fairest approach to evaluating the evidence where precision is required as to where an Accused person was alleged to have been, is to examine the area of the predicted best server cell coverage, and to calculate the potential distances between this area—as activated by a mobile—and any relevant pleaded location. This is necessary to determine where an Accused could have been *vis-à-vis* the events pleaded by the Prosecutor, for example, where it is alleged that he was at the Arab University Mosque at a relevant time. Using the

⁹⁷⁸⁷ Gary Platt, T. 6 April 2017, p. 104.

⁹⁷⁸⁸ The Trial Chamber emphasises that it could not conclude beyond reasonable doubt that Mr Sabra was the single user of Purple 018. *See* chapter IX ‘Attribution of mobile telephones to the Accused and Mustafa Amine Badreddine’, (E) (4) ‘Findings’.

electronic presentation of evidence software,⁹⁷⁸⁹ the Trial Chamber has itself calculated some distances where they were otherwise not in evidence. The Trial Chamber is satisfied that the distances are accurate enough for its purposes here.

5101. A Google Earth map reproduced immediately below, exhibit 4D325, tendered as a visual aid by the Oneissi Defence, shows the Alfa cells ‘near’ the mosque (marked as ‘AUM’ in the centre) and their coverage areas. It shows that thirty cells provide potential coverage within a kilometre of the mosque, and that there is a considerable degree of potential overlapping coverage, with pockets of coverage extending into adjacent cells:⁹⁷⁹⁰

Exhibit 4D325 (Cell coverage around the Arab University Mosque), p. 2

⁹⁷⁸⁹ Exhibit P592.1.

⁹⁷⁹⁰ MAKASS1 and MAKASS2 do not appear on the diagram. No shape files for these cells were tendered into evidence, however it appears from their azimuths and the cell naming protocol that these two missing cells would cover the missing area above NASSER1 and TAHAN1. The Trial Chamber has checked this on the electronic presentation of evidence software, exhibit P592.1, and on Alfa's ArcView shape files, exhibit P1123.

5102. The Oneissi Defence also tendered the following Google Earth image of the three COLA cells showing that they had a circumference of six kilometres, a surface area of 2.88 square kilometres and a radius of 0.96 kilometres and were intersected by a busy motorway:⁹⁷⁹¹

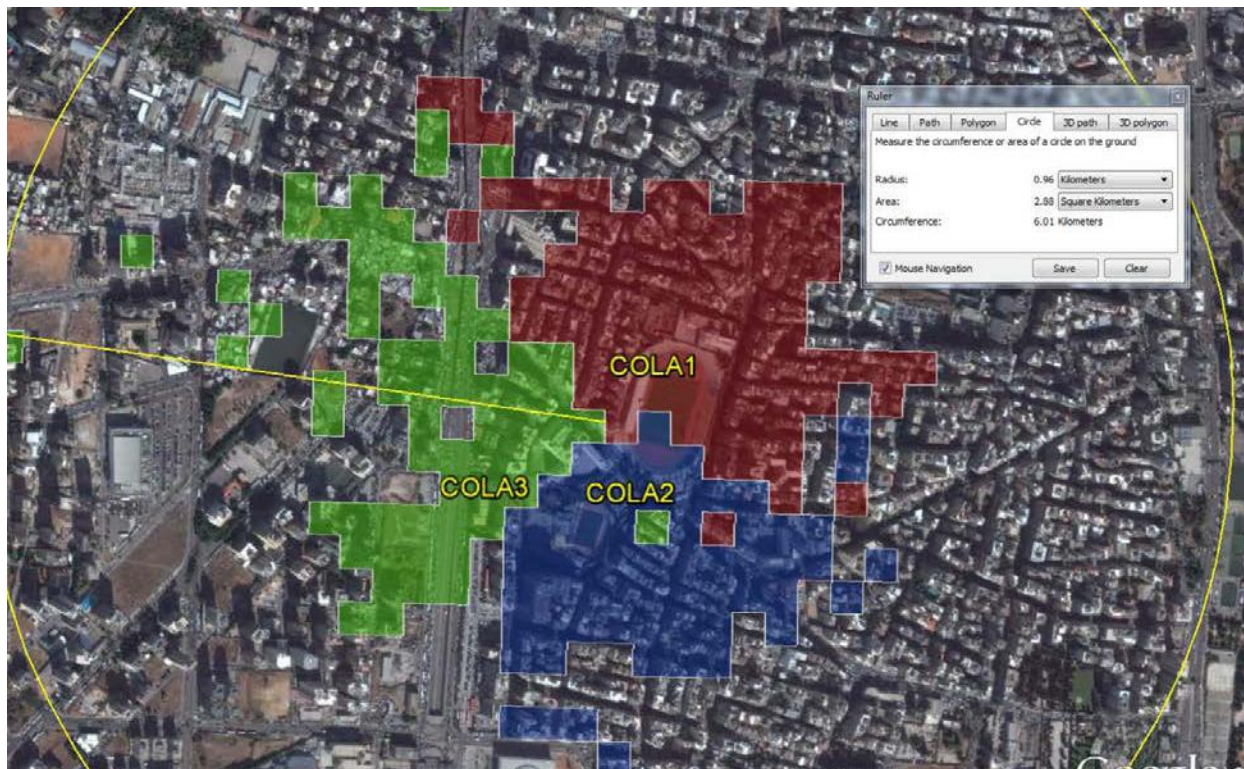

Exhibit 4D321 (COLA cells coverage and distance from COLA cell mast), p. 1

5103. Mr Platt listed the Alfa and Touch cells providing coverage to mobiles within a 500 and 1,000-metre radius of the mosque.⁹⁷⁹² A person walking at a reasonable pace could cover at least part of this distance in some minutes. Twelve Touch cells and sixteen Alfa cells were within a 500-metre radius:

⁹⁷⁹¹ Exhibit 4D321, referred to in the Oneissi Defence final trial brief at para. 187.

⁹⁷⁹² Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1273.

Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1273

5104. Of these, the COLA cells on the Alfa network provided the predicted best server coverage to the immediate area of the mosque. COLA3 provided it to the mosque itself, while COLA1 and COLA2 provided it to areas within less than 50 metres of the mosque, respectively to the north-east and south-east.⁹⁷⁹³ Effectively, given the limitations of the accuracy of predictive cell coverage maps, this means that a mobile in the mosque could potentially connect to any of the three. This is shown on the map below, extracted from the electronic presentation of evidence, where the mosque is marked as ‘AUM’.

⁹⁷⁹³ Exhibit P592.1 (Electronic Presentation of Evidence software).

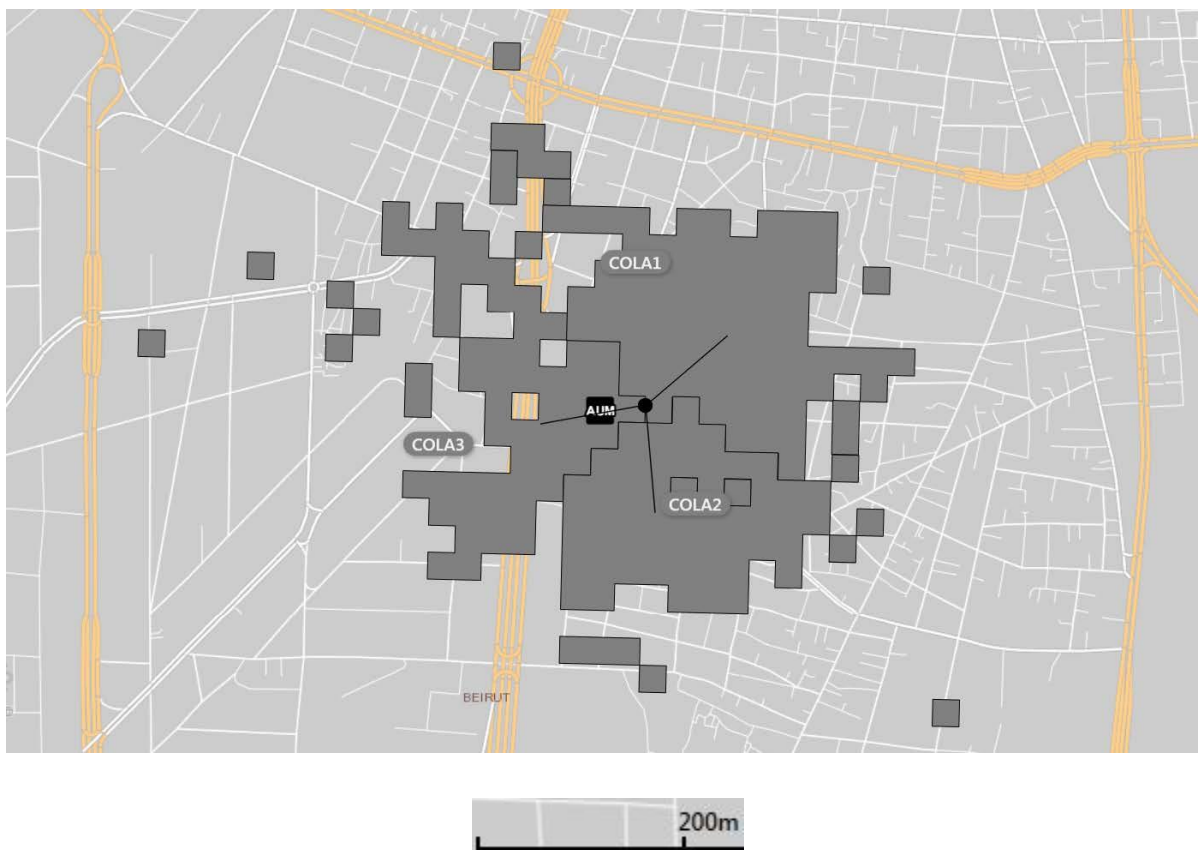

Exhibit P592.1 – the three COLA cells in the electronic presentation of evidence

5105. The Trial Chamber has prepared the three maps below—using the electronic presentation of evidence software—showing the three COLA cells separated out from each other, with the distances measured from the mosque to the outermost edges of the predicted best server coverage areas of each cell.⁹⁷⁹⁴ In doing so, it has remained cognisant of Mr Philips’s expert cell site evidence, concerning radio propagation and that these are mere approximations rather than absolutes.⁹⁷⁹⁵

⁹⁷⁹⁴ Exhibit P592.1. See also Gary Platt, T. 26 January 2017, pp 2-3; exhibit P1793 (Chronology PowerPoint presentation – 20 December 2004 to 31 December 2004), slide 101.

Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1274

5107. Using the electronic presentation of evidence software, the Trial Chamber prepared the two maps below showing the Alfa network's cells within a 500 metre radius of the mosque, and those within a kilometre:

Alfa cells providing coverage within a 500 metre radius of the Arab University Mosque

Alfa cells providing coverage within a one kilometre radius of the Arab University Mosque

5108. The starting point is to analyse the reliability of the Alfa network maps of the predicted best server coverage areas of cells in the so-called ‘COLA phase’ between **Wednesday 29 December 2004 and Friday 7 January 2005**.

5109. In doing so the Trial Chamber has considered the evidence of Alfa’s official representative, Witness 707, that the accuracy of the coverage maps the telecommunications providers used to configure their networks was between sixty and seventy per cent. Further, that cell site evidence on its own and without more cannot place *a person*—as opposed to a mobile—in a particular

location at a given time.⁹⁷⁹⁶ This is important in placing Mr Oneissi with his personal mobile and Mr Sabra's shared personal mobile Purple 018 *near* the mosque at a relevant time, although the Trial Chamber notes that the word 'near' is itself relative, as is the phrase 'in the vicinity of'. Mr Platt used both terms in his detailed expert report on the chronology of events, which is in evidence as exhibit P1783.

5110. The Trial Chamber has also factored in Mr Philips's expert evidence that while a mobile will normally connect to the cell providing the best coverage, namely the best serving cell, a network may allocate a call to a neighbouring cell, in what he described as 'exceptional circumstances'. Generally, in these circumstances the call is allocated into one of six neighbouring cells that normally surround the best serving cell. If this occurs, for example, as a result of a directed retry due to the overloading of the best serving cell, call data records do not record the cell from which the call was redirected.⁹⁷⁹⁷

5111. As the predicted best server coverage maps of Beirut show, with their numerous pockets of scattered coverage, a call could potentially redirect into one of more than six neighbouring cells. In reality, the coverage maps do not resemble the idealised cells depicted in Mr Philips's report, as shown below:⁹⁷⁹⁸

Exhibit P549 (Expert report of John Edward Philips – Cell site analysis introduction), figure 019

⁹⁷⁹⁶ See chapter VII 'Reliability of telecommunications evidence', (C) (4) 'Cell site related issues' and (G) (3) (c) 'Accuracy of maps'.

⁹⁷⁹⁷ John Edward Philips, T. 20 August 2015, pp 28, 47, 51, 53, 55-56, 58, 70, 80-82, 85-87.

⁹⁷⁹⁸ John Edward Philips, T. 20 August 2015, p. 52; exhibit P549 (Expert report of John Edward Philips – Cell site analysis introduction), p. 33.

5112. To illustrate, the Oneissi Defence exhibit 4D325 extracted above in colour at paragraph 5101 shows the extent of the pockets of scattered coverage in the predicted best server coverage maps. Pockets of coverage for COLA2 appear in the coverage maps for the adjacent CHATIL1, CHATIL3 and PINS3 cells. And pockets of coverage for COLA3, which provided the predicted best coverage for the mosque, are in the coverage maps for the adjoining RAMLET1, MAZRAA2 and COLA2 cells.

5113. Effectively, this means that a mobile situated in an adjoining cell, which could be some distance from the mosque—maybe 600 to 800 metres away—could have connected to COLA3 which covered the mosque, or COLA2 which has a predicted best server coverage area from about 40 metres from the mosque. Similarly, in a directed retry, which the call data records do not register, a call made from within a scattered pocket of these cells could have been made from any of their six (or more) neighbouring cells, which would not include those providing coverage to or very near to the mosque.

5114. A further consideration is that unlike on the afternoon of Monday 14 February 2005 after the attack on Mr Hariri, the Trial Chamber has no evidence of any specific network congestion on any of the days in the pleaded so-called ‘COLA phase’. The network congestion issue is considered in greater detail below at paragraphs 5542-5564 in relation to the afternoon after the attack.

ii. Evidence of Prosecution expert Mr Gary Platt

5115. The Prosecution relies on Mr Platt for his analytical opinion evidence in relation to the activities of the Purple mobiles. Given that he is not a cell site expert it is necessary to carefully examine his methodology.⁹⁷⁹⁹

5116. Mr Platt produced a lengthy ‘chronology’ report of events relevant to the case, listing them day by day, from Wednesday 1 September 2004 to Wednesday 16 February 2005.⁹⁸⁰⁰ Each day was structured with an overview, a description of mobile activity and the locations and routes of travel relevant to Mr Hariri, and was footnoted to witness testimony and exhibits in evidence, or

⁹⁷⁹⁹ The Trial Chamber declared Mr Gary Platt an expert in the surveillance of criminal networks and the identification and organisation of covert communication networks. His expertise extends to providing expert opinion evidence on the group of ‘purple phones’.

⁹⁸⁰⁰ Exhibit P1783 (Expert report of Gary Platt – Chronology).

documents awaiting tender or formal receipt into evidence. He also set out any assumptions for a relevant day or event.

5117. The Prosecution also tendered, as *aide-mémoires*, a chronology of relevant events and a narrative overview of the chronology.⁹⁸⁰¹ Mr Platt testified at length on these issues and the Prosecution led him through slide presentations in court.⁹⁸⁰²

5118. Mr Platt provided extensive evidence on the so-called ‘COLA phase’—namely, 29 December 2004 to 7 January 2005—and the seven preceding days. His evidence consists primarily of a detailed ‘chronology’ report of relevant events occurring between 1 September 2004 and 16 February 2005.⁹⁸⁰³

5119. His evidence was that, on each day between Wednesday 29 December 2004 and 7 January 2005—bar Sunday 2 January 2005—Mr Oneissi’s Purple 095 and or Mr Sabra’s attributed Purple 018 activated the COLA cells in the immediate vicinity of the Arab University Mosque. During this period, these two Purple mobiles were repeatedly in contact with one another and occasionally with Mr Merhi’s Purple 231.⁹⁸⁰⁴

5120. Based on the available call data records, Mr Platt concluded that Mr Oneissi’s Purple 095 and or Mr Sabra’s attributed Purple 018 were not used regularly in this area outside of the ‘COLA phase’, and that they both therefore had unique bursts of activity in this area which coincided with one another.⁹⁸⁰⁵ The exception was a further ‘burst’ of activity by Mr Oneissi’s Purple 095 in this

⁹⁸⁰¹ Exhibit P1780 (Chronology of relevant events); exhibit P1782 (Narrative overview of telephone activity and relevant events).

⁹⁸⁰² Mr Platt testified about the Purple mobiles between 25 January and 15 March 2017, and was cross-examined by counsel for Mr Merhi, Mr Sabra and Mr Oneissi between 21 March and 19 April 2017. For the PowerPoint slides regarding the Purple mobiles’ activity, *for example* exhibit P1793 (Chronology PowerPoint presentation – 20 December 2004 to 31 December 2004), slides 100-108, 156-159, 194-195, 217-218, 282-283, 302-309, 369-380, 431-448; exhibit P1807 (Chronology PowerPoint presentation – 1 January 2005 to 17 January 2005), slides 54-65, 70-73, 80-90, 110-119, 126-134, 155-160, 196-215; exhibit P1923 (Chronology PowerPoint presentation – 13 February 2005 to 16 February 2005). *See also* exhibit P1934 (Corrected chronology PowerPoint slides regarding the Purple mobiles).

⁹⁸⁰³ For the parts of Mr Platt’s report setting out Purple mobile activity between 22 December 2004 and 7 January 2005, *see* exhibit P1783 (Expert report of Gary Platt – Chronology), pp 87, 90-91, 93, 96, 98-99, 101-102, 106, 111, 115, 118-122, 127-129, 135-138, 143-152, 156-159, 161-165, 173-176.

⁹⁸⁰⁴ Gary Platt, T. 6 February 2017, p. 50; exhibit P1783 (Expert report of Gary Platt – Chronology), pp 119-122, 127-129, 135-138, 143-152, 156-159, 161-165, 173-176. *See also* exhibit P1793, slides 302-309, 369-380, 431-448; exhibit P1807, slides 54-65, 70-73, 80-90, 110-119, 126-134, 155-160, 196-215; exhibit P1780, pp 12-15; exhibit P1782, pp 146-170.

⁹⁸⁰⁵ Gary Platt, T. 6 February 2017, pp 56, 92-93, 96-97. *See also* exhibit P1793, slides 309, 378-380; exhibit P1934, slides 13-16.

area, on Monday 17 January 2005.⁹⁸⁰⁶ Moreover, the bursts of activity in this area during the ‘COLA phase’ also coincided with a peak in the frequency of contacts between these two Purple mobiles.⁹⁸⁰⁷

5121. He also stated that one week before the start of the ‘COLA phase’, on Wednesday 22 December 2004, Purple mobiles began activating the COLA cells for the first time during the indictment period.⁹⁸⁰⁸ His evidence also dealt with the calls between Mr Oneissi’s Purple 095, Mr Merhi’s Purple 231 and Mr Sabra’s shared Purple 018 during this seven-day period.⁹⁸⁰⁹

5122. Mr Platt’s chronology report, exhibit P1783, his network analysis report, exhibit P796.1, and the narrative overview of events, exhibit P1782, however, in many respects mirror the Prosecution’s pleaded case. In numerous instances, the facts relied upon for conclusions are sourced, in footnotes, to the admitted evidence contained in the statements of the three Rule 158 witnesses, Witness 56, Mr Taysir Abu Adass and Mr Ziad Ramadan, but without noting that the evidence is often hearsay. Thus, Mr Platt has relied upon facts, in the form of untested Rule 158 statements, some of which were hearsay, to reach some of his conclusions.⁹⁸¹⁰ Without these facts, his conclusions would be meaningless as they provide the necessary context for his opinions; but conversely unreliable underlying contextual facts may adversely affect the reliability of these conclusions.

5123. In the introduction to his chronology report, exhibit P1783, he set out some parameters and his methodology. These included some important qualifications, namely that:

⁹⁸⁰⁶ Gary Platt, T. 6 February 2017, pp 97-98. *See also* exhibit P1793, slide 380.

⁹⁸⁰⁷ Gary Platt, T. 7 February 2017, pp 57-59, 66-69. *See also* exhibit P1793, slides 444-448; exhibit P1934, slides 5-7, 18-19.

⁹⁸⁰⁸ Gary Platt, T. 25 January 2017, pp 101-102, T. 26 January 2017, p. 2. *See also* exhibit P1793, slides 100-108.

⁹⁸⁰⁹ Gary Platt, T. 26 January 2017, pp 3-9, 73-74, 100, 102, T. 27 January 2017, pp 35-36, 97; exhibit P1783 (Expert report of Gary Platt – Chronology), pp 87, 90-91, 96, 98-99, 101-102, 106, 115, 118. *See also* exhibit P1793, slides 102-108, 156-159, 194-195, 217-218, 282-283; exhibit P1780, pp 10-12; exhibit P1782, pp 132-146.

⁹⁸¹⁰ *For example*, exhibit P1782, para. 618 (footnotes 225-226) regarding the two pleaded calls to the Abu Adass house on Monday 17 January, ‘The first call at around 07:30 indicated that their car had broken down and that Ahmad Abu Adass was in Tripoli and would return in the afternoon. The second call, at around 21:00, stated that he was going to Iraq and would not return.’—footnoted to Mr Taysir Abu Adass’s and Mr Ramadan’s Rule 158 statements (exhibits P461 and P1775). This summary is followed by analysis, under the heading, ‘Mr. Oneissi and Mr. Sabra’s Phones Become Active Again around the Time of the First Call to Mr. Abu Adass’s Residence’, of Mr Merhi’s, Mr Oneissi’s and Mr Sabra’s mobile activity that day. *See also*, exhibit P1783 (Expert report of Gary Platt – Chronology), paras 674, 682 (fns 99-101) referring to Witness 56’s statements (exhibits P2129 and P2131).

The maps do not pinpoint the exact location of the phone user. Rather, the maps provide an indication through the predicted best server coverage provided from the CSPs [call service providers] (ALFA and MTC) the approximate area from where the call could have been made or received.

To illustrate the proximity of the relevant phones to HARIRI or places related to HARIRI, this report uses the words “area” and “vicinity”. This is only used to provide a rough location of where the phone is potentially located, for the purpose of the narrative.

When the term ‘in the vicinity of’ is used, this means that the predicted best server coverage for the cell activated offers service within 500 metres of a particular location. Therefore, any activation of these cells is consistent with being in the vicinity of that location. However, on occasions the cell may also offer coverage outside the vicinity, therefore it is viable the phone may be outside this defined vicinity range.

When the term ‘in the area of’ is used, this means that the predicted best server coverage for the cell activated offers service within 1000 metres of a particular location. Therefore, any activation of these cells is consistent with being in the area of that location. However, on occasions the cell may also offer coverage outside the area, therefore it is viable the phone may be outside this defined area range.⁹⁸¹¹

5124. Defence counsel cross-examined Mr Platt at length about his expertise, methodology and his conclusions. They also questioned the terminology used in relation to cell site matters, in particular, the terms ‘in the vicinity of’ and ‘in the area of’. He explained that, at the request of Prosecution lawyers and to aid his chronology report’s readability, he added distance ranges and these terms to enhance understanding of the relative proximity of cells to specified locations. This was to show how close a cell’s coverage was to a location, and in particular when compared to a different cell.⁹⁸¹²

5125. Mr Platt had not used these terms before, and cell site experts did not commonly use them.⁹⁸¹³ He agreed that in common English usage, ‘vicinity’ suggests something quite close.⁹⁸¹⁴ Further, while the report uses ‘vicinity’ and ‘immediate vicinity’ to mean the same thing, someone

⁹⁸¹¹ Exhibit P1783 (Expert report of Gary Platt – Chronology), paras 16, 21-23.

⁹⁸¹² Gary Platt, T. 6 April 2017, pp 19-21.

⁹⁸¹³ Gary Platt, T. 6 April 2017, p. 20.

⁹⁸¹⁴ Gary Platt, T. 6 April 2017, p. 23.

reading it would consider ‘immediate vicinity’ to suggest something much closer.⁹⁸¹⁵ Additionally, he agreed that the cells described as covering the ‘vicinity’ of the mosque, meaning within 500 metres of it, also covered areas several kilometres away.⁹⁸¹⁶ And stating that someone connecting to one of these was ‘in the vicinity’ of the mosque could be misleading because the user could have been in an area beyond the 500 metres.⁹⁸¹⁷

5126. Moreover, even when his report omitted to specify that use of these cells was *consistent with* their user being ‘in the vicinity’ of the mosque—rather than the user *being* ‘in the vicinity’ of the mosque—this caveat always applied.⁹⁸¹⁸ While using these cells was consistent with the user being ‘in the vicinity’ of the mosque, in isolation it was also ‘consistent with’ many other things.⁹⁸¹⁹

5127. In this regard, his chronology report and network analysis report, the narrative overview of events and the *aide-memoire* regarding the chronology of relevant events also use the term ‘consistent with’.⁹⁸²⁰ Mr Platt, who is British, agreed that the UK’s Forensic Science Regulator’s *Codes of Practice and Conduct* on cell site analysis is a suitable standard for assessing his work.⁹⁸²¹ According to this Code:

The word ‘consistent’ or phrase ‘consistent with’ should be avoided, and shall only be used if alternative scenarios are also considered (for example, ‘consistent with being at the scene, also consistent with being anywhere within the service area of the cell, which may mean the phone was many kilometres away’). In the appeal court in *R v. Puaca* [2005] EWCA Crim. 3001 Lord Justice Hooper commented that: “*Whereas ‘inconsistency’ is often probative, the fact of consistency is quite often of no probative value at all.*” Without clarification ‘consistent with’ can easily be misinterpreted by a lay person as meaning ‘is’, because the context or limitations of the finding are unknown. If the data would be expected in a number of considered or expected scenarios, clearly being consistent with one of them is not discriminating or useful. For example, if there is usage of a cell that serves both the

⁹⁸¹⁵ Gary Platt, T. 6 April 2017, pp 21-22.

⁹⁸¹⁶ Gary Platt, T. 6 April 2017, pp 26-27. *See also* Gary Platt, T. 23 March 2017, pp 25-26, where Mr Platt—commenting on exhibit 4D321—agrees that there is a small pocket of the predicted best coverage of COLA3 which is approximately 960 metres from the cell tower.

⁹⁸¹⁷ Gary Platt, T. 6 April 2017, p. 28.

⁹⁸¹⁸ Gary Platt, T. 6 April 2017, pp 28-39.

⁹⁸¹⁹ Gary Platt, T. 6 April 2017, p. 31.

⁹⁸²⁰ Exhibits P1783, P796.1, P1782, P1780.

⁹⁸²¹ Gary Platt, T. 6 April 2017, p. 56.

alleged and alternative locations, stating that usage is consistent with the device being at one and not mentioning the other is clearly misleading; likewise if a cell covers the alternative location, stating that this is consistent with movement toward the scene without mentioning that it is also consistent with being at the alternative location is misleading (and not impartial).⁹⁸²²

5128. Given Witness 707's evidence of the sixty to seventy per cent accuracy of the Alfa network's predicted best server coverage maps, Mr Platt agreed that the actual coverage his report refers to might differ by a hundred metres, or that pockets within that area might not be covered; meaning a potential margin of error of thirty to forty per cent. Despite this he felt that the data gave a good sense of the coverage of those cells, and placed mobile users within 'the vicinity' of certain locations.⁹⁸²³ Further, the cell activation is consistent both with the user being in the vicinity of the mosque and elsewhere within the range of those three COLA cells, parts of which would be outside the mosque's 'vicinity'.⁹⁸²⁴ He also could not be sure that the actual, as opposed to the predicted best coverage areas of the cells relevant to the 'COLA phase' did not, in 2005, extend to areas beyond those in the maps in evidence.⁹⁸²⁵

5129. Likewise, while COLA1 and COLA3 provided predicted best server coverage to parts of the nearby Salim Salam motorway into central Beirut, he could not exclude that COLA2 provided coverage to parts of it, although it was outside of the predicted best coverage area.⁹⁸²⁶ It was a busy road and, in 2005, a mobile user stuck in a traffic jam could have activated the three COLA cells.⁹⁸²⁷

5130. The Defence also questioned Mr Platt about some perceived omissions in his report. He started working as a Prosecution investigator in 2010,⁹⁸²⁸ and in 2014, had informed Prosecution lawyers that 'dozens' of calls were missing from his report. However, 'the lawyers did not want them included', instead telling him that these calls would be included in the narratives. Attempts

⁹⁸²⁸ Exhibit P794 (Mr Platt's *curriculum vitae*), p. 1.

were then made to include these calls in the slides he used in court.⁹⁸²⁹ He had also noticed errors in his report, but Prosecution lawyers did not ask him to correct them by writing a new report.⁹⁸³⁰

5131. Some conclusions in his report, specifically that Mr Abu Adass was ‘abducted’, were based on the work of other Prosecution officials; Mr Platt had neither investigated this nor questioned any witnesses.⁹⁸³¹ In this respect, he agreed that on such occasions he could be viewed as acting as ‘a spokesman’ for the Prosecution.⁹⁸³² Because he was not asked to, he did not include in an amended report, or in his court slides, evidence that Mr Oneissi’s Purple 095 activated COLA2 only hours after the witness who encountered ‘Mohammed’ was at the mosque.⁹⁸³³

5132. The Defence also attacked perceived deficiencies in how Mr Platt viewed the cell site evidence. Mr Platt himself did not verify the reliability and authenticity of the cell coverage information in his report, but instead relied on the data given to him.⁹⁸³⁴ He did not carry out any on-site cell coverage measurements,⁹⁸³⁵ but agreed that site measurements are used to verify the accuracy of predicted coverage maps, which may not match the actual ground coverage.⁹⁸³⁶ He had made such checks himself in his past professional experience as it was the most accurate way to determine coverage as close as possible to the relevant period.⁹⁸³⁷

5133. His experience of working with the British police was that on-site cell coverage checks were routine.⁹⁸³⁸ The police rarely relied on predicted best coverage maps, but rather used on-site coverage surveys by engineers; this was the best evidence.⁹⁸³⁹ These surveys were done as soon as possible, sometimes within hours of a crime report, but also up to a few months afterwards.⁹⁸⁴⁰ The telecommunications companies’ coverage maps were primarily used for intelligence or, if as evidence, the police would also conduct a cell site survey to determine which cell provided

⁹⁸⁴⁰ Gary Platt, T. 22 March 2017, pp 66-67.

coverage to a particular location, rather than verifying the accuracy of its entire predicted coverage.⁹⁸⁴¹ In his experience, a minimum check on the integrity of cell site analyses would be a survey of the scene as near to the time of the incident as possible, with various checks on the circumstances on that day regarding the network.⁹⁸⁴² He was aware of three surveys conducted in the case—one in 2007 by a prospective UK cell site expert, drive test surveys by Alfa and some 2010 surveys carried out by Prosecution officials—none were used in evidence by the Prosecution.⁹⁸⁴³

5134. Discrepancies between the predicted coverage maps and the on-site surveys, on occasion, were found. This investigation was the first time that Mr Platt had used best server coverage maps to this extent and this long after the relevant event; but he was aware that others had done so in the UK.⁹⁸⁴⁴

5135. The Defence also challenged Mr Platt's expertise in relation to cell site analysis. His chronology report and testimony provides extensive evidence and opinions of the location and movement of mobiles. Cell site analysis, he agreed, is of call data records relating to a mobile over a particular time, to determine its location and movement.⁹⁸⁴⁵ But Mr Platt is not a cell site expert; and no part of his chronology report was drafted or reviewed by a cell site expert.⁹⁸⁴⁶

5136. Moreover, opinions on likely cell coverage areas should be based on cell site experts' opinions; which would take into account radio propagation, the specifics of likely cell configuration, the geographic area and the clutter environment.⁹⁸⁴⁷ The accuracy of cell location, height, down tilt and orientation are critical to the accuracy of a cell site expert's opinion. Radio surveys may assist, but cannot substitute for an expert's knowledge and critical assessment.⁹⁸⁴⁸

⁹⁸⁴⁶ Gary Platt, T. 6 April 2017, p. 8.

⁹⁸⁴⁷ Gary Platt, T. 6 April 2017, pp 11-12. Mr Philips, for example, was able to testify about various anomalies in coverage which he had encountered in his experience; *see* John Edward Philips, T. 19 August 2015, pp 100-104.

⁹⁸⁴⁸ Gary Platt, T. 6 April 2017, pp 12-13. *See also* Mr Philips's testimony of the limited usefulness of field surveys not undertaken contemporaneously to the relevant events (or within a 'reasonable' time) or undertaken without knowing that the cell site network configuration or clutter information (existence of buildings in the area) is the same as that at the time of the relevant events. Mr Philips acknowledged that there would have been some benefit to him conducting a site visit even in 2012, to gain a feel, for example, for the topology, location of cell site buildings and

5137. Mr Platt had encountered situations where a mast's cells did not cover its foot area; but rather because of its height or high positioning, adjacent cells provided coverage.⁹⁸⁴⁹ And further, of predicted coverage plots being correct at ground level, but incorrect for upper storeys.⁹⁸⁵⁰ As Mr Philips pointed it out, a cell could provide coverage to the bottom of a building, another could give coverage to its fourth or fifth storey, while a different cell could cover the top.⁹⁸⁵¹

5138. Mr Platt was also questioned about the COLA cells and cell mast, which was in a densely populated area with high-rise buildings.⁹⁸⁵² Google Earth's elevation profile was sometimes used to assess terrain coverage, and the image below, tendered by the Sabra Defence, is an elevation profile of the COLA cells area.⁹⁸⁵³

building density, assuming that it had not changed significantly since the relevant events; John Edward Philips, T. 19 August 2015, pp 66-69, 100, 105-107. Mr Philips also summarised the four main components of a prediction package as being: the propagation model, the terrain model, the clutter model (buildings, trees, etc.) and the transmission parameters (height of the ground at the cell site, height of the building on which the cell site, type and direction of aerial, frequency, etc.); John Edward Philips, T. 19 August 2015, pp 95-97.

⁹⁸⁴⁹ Gary Platt, T. 6 April 2017, pp 116-119.

⁹⁸⁵⁰ Gary Platt, T. 6 April 2017, pp 123-124.

⁹⁸⁵¹ John Edward Philips, T. 19 August 2015, pp 100-103.

⁹⁸⁵² Gary Platt, T. 6 April 2017, p. 122.

⁹⁸⁵³ Gary Platt, T. 7 April 2017, p. 5.

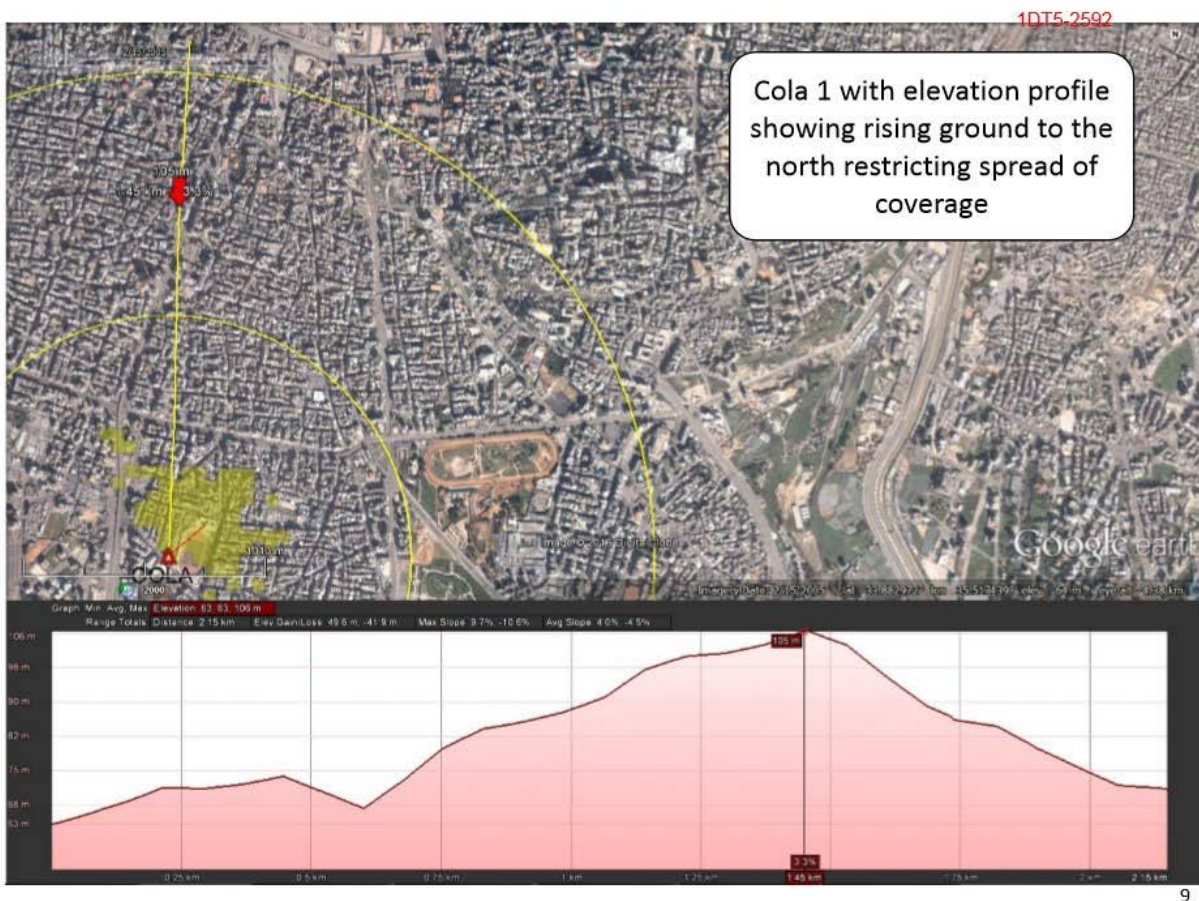

Exhibit 5D355 (PowerPoint presentation—Sabra Defence’s cell analysis of the ‘COLA-area’), slide 9

5139. Mr Platt agreed that a mobile in a tall building on the high point of the terrain—marked by the downward pointing red arrow on the upper left of the image—could connect to COLA1.⁹⁸⁵⁴ Further, COLA3’s terrain coverage falls towards the coast, to the west, as shown in Sabra Defence exhibit 5D355, slide 11.⁹⁸⁵⁵

⁹⁸⁵⁴ Gary Platt, T. 7 April 2017, p. 7.

⁹⁸⁵⁵ Gary Platt, T. 7 April 2017, p. 8.

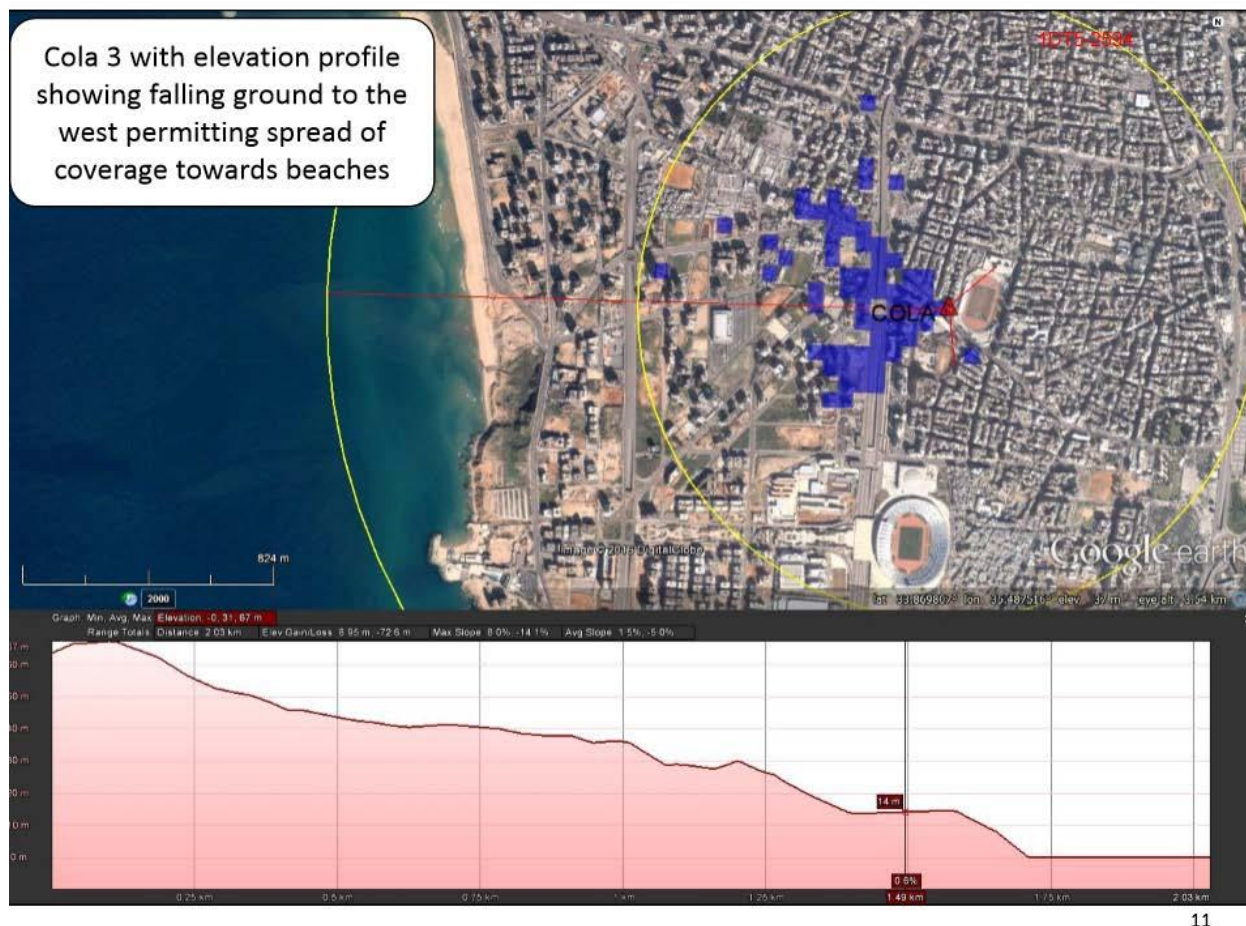

Exhibit 5D355 (PowerPoint presentation—Sabra Defence’s cell analysis of the ‘COLA-area’), slide 11

5140. Signals from a cell on a higher point could therefore propagate farther where the terrain falls away with a clear line of sight. Thus, a mobile in a high-rise building on the coast could conceivably connect to the COLA3 cell.⁹⁸⁵⁶

5141. Mr Philips’s report states that best server plots are predictions of signal level at ground level, whereas above ground level, and in buildings, there may be server coverage outside of the predicted area. The higher above ground the cell is, the more likely this is.⁹⁸⁵⁷ The accuracy of best

⁹⁸⁵⁶ Gary Platt, T. 7 April 2017, p. 9.

⁹⁸⁵⁷ Exhibit P549 (Expert report of John Edward Philips – Cell site analysis introduction), 6.5.3.1.1.4, 6.5.3.8.1.7-6.5.3.8.1.8; *see also* exhibit P550 (PowerPoint presentation, John Edward Philips), slide 110.

server coverage plots is diluted in considering factors such as building materials, windows and the floor of the building.⁹⁸⁵⁸

5142. The UK Code referred to above⁹⁸⁵⁹ states that the examination methods must be fit for purpose, may include a radio propagation survey and the methods must be validated before use in evidence. Any unvalidated aspect must be explicitly highlighted as a limitation; this allows a court to consider it in relation to its admissibility.⁹⁸⁶⁰

5143. Neither Mr Philips nor another cell site expert was asked to analyse Purple 018 and Purple 095.⁹⁸⁶¹ Mr Platt decided not to read Mr Philips's reports, but conceded, in hindsight, that it might have been helpful to consider them.⁹⁸⁶²

5144. Further, he agreed that cell site analysis can only indicate that a mobile was within the likely coverage area of a particular cell, rather than in any particular location within that area.⁹⁸⁶³ These techniques do not establish the actual cell coverage when a mobile was used, as surveys are limited to ground level coverage and are almost always not contemporaneous with relevant events.⁹⁸⁶⁴

5145. With all of this in mind, the Trial Chamber has carefully analysed the cell site evidence relating to the mobile activity of the Purple mobiles.

- iii. Before Wednesday 22 December 2004—Alfa records were incomplete before 1 October 2004

5146. In examining the call data records, the Trial Chamber has carefully considered the evidence of Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 connecting to cells 'near' the mosque before Wednesday 22 December 2004, while also bearing in mind that Alfa's call data records before 1 October 2004 are incomplete. Before 1 August 2004, the Alfa network had cell

⁹⁸⁶⁴ Gary Platt, T. 6 April 2017, p. 11. *See also* Mr Philips's general explanation of predicted cell coverage maps being computer-generated estimates of the best server coverage areas of cells, taking into account the coverage of adjacent cells; John Edward Philips, T. 19 August 2015, pp 87-89.

data records of outgoing calls, but none of incoming calls and inbound and outbound SMS messages;⁹⁸⁶⁵ and end cell data was only available from 1 October 2004.⁹⁸⁶⁶ Because he was using this incomplete data, Mr Platt was uncomfortable with saying that the two mobiles, Purple 018 and Purple 095, were not active around the COLA area from 2002 to 1 August 2004.⁹⁸⁶⁷

5147. The available call data records reveal that from 9 January 2003—the date of its attribution to Mr Oneissi as its principal user—until Wednesday 22 December 2004 his personal mobile Purple 095 activated the COLA cells only six times. These were all in 2004: on 21 January, 30 April, 29 September, 15 October and on Saturday 4 December 2004, twice.⁹⁸⁶⁸ This mobile, however, also activated other cells within a 500-metre radius of the mosque 22 times between August 2003 and 22 December 2004.⁹⁸⁶⁹

5148. Purple 018, on the other hand, connected to COLA cells for the first time in November 2004,⁹⁸⁷⁰ whereas from the day of its attribution to Mr Sabra as one of its users, 22 November 2001, it connected to other cells ‘near’ the Arab University Mosque seventeen times. This was once in 2001, three times in 2002, once in 2003 and twelve times between April and 22 December 2004.⁹⁸⁷¹

5149. From the date of its attribution to Mr Merhi as the principal user on 19 December 2002 until Wednesday 22 December 2004, his personal mobile Purple 231 activated cells within the

⁹⁸⁶⁵ Gary Platt, T. 26 January 2017, p. 80, T. 6 February 2017, pp 54-56, 94, T. 7 February 2017, pp 63-64, 68, T. 9 February 2017, pp 28-29. *See also* Prosecution final trial brief, para. 540.

⁹⁸⁶⁷ Gary Platt, T. 6 February 2017, p. 55, T. 7 February 2017, p. 64.

⁹⁸⁶⁸ Mr Oneissi’s Purple 095 activated COLA3 on 21 January 2004 at 14:36, 30 April 2004 at 12:28, 29 September 2004 at 10:52, 15 October 2004 at 13:02, and twice on 4 December 2004 at 12:47 and 12:48, exhibit P1223 (Call sequence table of Purple 095), pp 122, 159, 219, 227, 247-248. *See also* exhibit P1783 (Expert report of Gary Platt – Chronology), para. 71.

⁹⁸⁶⁹ Mr Oneissi’s Purple 095 activated BHVOUT2 on 20 December 2004; CBOURJ3 on 9 August, 10 October, 19 November, 30 December 2003, 15 March, 22 May, 20 August, 10 September, 11 November, 16 November, 14 December and 20 December 2004; CHATIL1 on 20 December 2004; MAKASS3 three times on 13 August and again on 15 October 2004; NASSER1 on 7 October and 13 December 2004; OGER2 on 12 October 2004; and OUZAI1 on 4 December 2004. Exhibit P1223, pp 73, 91, 103, 115, 142, 166, 198-199, 201, 208, 223, 225, 227, 239, 242, 247, 250-251, 253.

⁹⁸⁷⁰ Purple 018 activated COLA3 on 12 November 2004 at 23:49 and again on 15 November at 16:29; exhibit P1221 (Call sequence table of Purple 018), pp 269, 271.

⁹⁸⁷¹ Purple 018 activated CBOURJ3 on 13 February 2002, 11 September 2003, 4 April, twice on 16 June, 6 and 18 September, 10 October, 11 and 12 November and twice on 15 December 2004; OGER2 twice on 23 August 2004; OUZAI1 twice on 27 April 2002; and OUZAI4 on 10 December 2001. Exhibit P1221, pp 8, 27, 43, 157, 208, 227, 249, 253, 256, 262, 267-268, 276.

500-metre radius of the mosque eleven times between August and October 2004.⁹⁸⁷² It never connected to a COLA cell.⁹⁸⁷³

5150. In **2002**, Purple 018 and Mr Merhi's Purple 231 were in contact twice.⁹⁸⁷⁴ In **2003**, they were in contact 61 times over 44 days.⁹⁸⁷⁵ In **2004**, it was 62 times over 44 days.⁹⁸⁷⁶

5151. Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 made contact 25 times in eighteen days in **2003**,⁹⁸⁷⁷ and four times in four days in **2004**; this was on 27 January, 15 March, 23 May and 23 June.⁹⁸⁷⁸

5152. Before **September 2004**, Mr Oneissi's Purple 095 and Mr Merhi's Purple 231 were in contact 21 times over sixteen days in **2003**,⁹⁸⁷⁹ and 87 times over 46 days in **2004**. There was an increase of calls in April 2004, with 26 calls exchanged.⁹⁸⁸⁰

⁹⁸⁷² Purple 231 activated CBOURJ3 on 2 August, five times on 6 September, twice on 15 September, on 27 September, on 12 and 21 October 2004. Exhibit P527 (Call sequence table of Purple 231), pp 71, 81-82, 84, 87, 92-93.

⁹⁸⁷³ Exhibit P527.

⁹⁸⁷⁴ On 26 and 28 December 2002. Exhibit P527, p. 1.

⁹⁸⁷⁵ There were three calls in January (7, 11, 13), one call on 22 February, one on 29 April, one on 7 May, one on 6 June, six calls in July (one on 2, two on 5 and the rest on 6, 17, 23), ten in August (one on 12, two on 13, one on 14, one on 19, two on 23, one on 25, 27 and 29), twenty-two calls in September (two on 1, two on 3, two on 4, one on 8 and 20, two on 21, three on 22, six on 23, two on 24 and one on 28), four calls in October (two on 2, one on 3 and 9), four calls in November (one on 10, two on 12 and one on 15), eight calls in December (2, 4, 5, 8, 22, 23, 25, 29). Exhibit P527, pp 3-4, 7-8, 10-12, 15-19, 21-25, 28-29, 31-34.

⁹⁸⁷⁶ From January to end August 2004, there were eleven contacts in January (two on 3, one on 7, one on 9, one on 17, one on 18, three on 20, one on 26 and one on 29), four calls in February (one on 9, two on 10 and one on 11), twelve in March (four on 7, one on 10, 16, 17 and 18, two on 24 and two on 29), two calls on 9 April, four calls in May (on 8, 14, 24 and 26), twelve calls in June (one on 7, three on 12, one on 16, two on 17, one on 18, two on 22, one on 23 and 28), three calls in July (on 4, 19 and 29), fourteen in August (two on 12, four on 13, one on 14, two on 16, one on 18, 20, 23, 25 and 30). Exhibit P527, pp 34-35, 37-40, 43-48, 54-57, 59-63, 66, 69, 73-79.

⁹⁸⁷⁷ In 2003, there were two calls in January (12 and 31), 10 calls in February (five on 3, one on 4, 8, 18, 22 and 24), four in March (three on 3 and one on 21), one on 8 May, three in July (on 6, 16 and 19), one on 16 August, three in November (one on 9 and two on 10) and one on 15 December. Exhibit P1221, pp 98, 102-105, 108, 110, 113, 125, 137, 140-141, 148, 169, 180.

⁹⁸⁷⁸ Exhibit P1221, pp 190, 203, 221, 231.

⁹⁸⁷⁹ In 2003, there was one call in June (25), two calls in August (6 and 31), four calls in September (three on 8 and one on 24), two calls in October (on 8 and 9), eight calls in November (of which four on 1st, the others on 3, 4, 7 and 8), four calls in December (on 23, 25, 26, 29). Exhibit P527, pp 10, 14, 18-19, 22, 25, 27-28, 33-34.

⁹⁸⁸⁰ From January to end August 2004, there were eight calls in January (two on 6, one on 8, 14, two on 15, one on 16 and 31), nine calls in February (two on 10, two on 11, one on 12, three on 13, one on 27), seven in March (two on 12, then one on 13, 15, 16, 27 and 30), 26 calls in April (one on 3 and 13, five on 21, two on 22, four on 23, four on 24, eight on 28 and one on 30), twelve in May (one on 1, two on 5, one on 14, two on 22, one on 25, three on 28 and two on 31), ten in June (four on 4, one on 15 and 17 and four on 19), nine calls in July (16, 17, 20, 21, two on 26, two on 28 and one on 30) and six calls in August (four on 5 and one on 13 and 17). Exhibit P527, pp 34-36, 38, 40, 42, 45-47, 49-53, 56-58, 61-62, 66-69, 71, 74-75.

5153. In **September and October 2004**, when some networks allegedly involved in Mr Hariri's assassination became active,⁹⁸⁸¹ Mr Oneissi's Purple 095 was in contact with Mr Merhi's Purple 231 some 48 times over 21 days.⁹⁸⁸² Mr Sabra's attributed Purple 018 and Mr Merhi's Purple 231 were in contact 27 times in thirteen days.⁹⁸⁸³ During this period, Purple 095 and Purple 018 were in contact once, on 14 October 2004,⁹⁸⁸⁴ and Purple 018 once called a number ending in 6091, used by Mr Merhi's family.⁹⁸⁸⁵

5154. In **November 2004, and until Wednesday 22 December 2004**, Mr Oneissi's Purple 095 and Mr Merhi's Purple 231 were in contact sixteen times on thirteen days.⁹⁸⁸⁶ Purple 231 and Purple 018 were in contact 38 times in nineteen days,⁹⁸⁸⁷ and Purple 095 and 018, six times on three days.⁹⁸⁸⁸

iv. Wednesday 22 to Wednesday 29 December 2004

5155. On the evening of **Tuesday 21 December 2004**, as described above at paragraphs 648 and 4331, Mr Hariri met Hezbollah's Secretary-General, Mr Hassan Nasrallah, in Haret Hreik in Beirut. According to the Prosecution, this event marked an increase in the surveillance of Mr Hariri and in activity on the Yellow network, with several calls exchanged within that network between the evening of Tuesday 21 December and the early hours of Wednesday 22 December 2004.⁹⁸⁸⁹

⁹⁸⁸¹ From end September, some of the other networks commenced activity. *See* chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (1) 'Some networks commence activity—Friday 24 September 2004 to Saturday 9 October 2004'.

⁹⁸⁸² Purple 095 was in contact with Purple 231 on 4, 7, 8 (three times), 18, 20, 21, 22, 23 (twice), 24 (three times), 26, 27 (nine times), 28 (four times), 29 (eight times) and 30 September 2004 and 1, 4, 5 (twice), 6, 12 (four times), 13 and 21 October 2004. Exhibit P527, pp 80, 82, 84-93; exhibit P1223, pp 205, 207-208, 211-222, 224-225, 229.

⁹⁸⁸³ Purple 018 was in contact with Purple 231 on 3, 4, 6 (three times), 8, 18 (eight times), 19 (three times) and 20 September 2004 and 6 (three times), 7, 20 (twice), 21, 22 and 23 October 2004. Exhibit P527, pp 80-82, 84-85, 90-91, 93; exhibit P1221, pp 252-253, 256-257, 261, 264.

⁹⁸⁸⁴ On 14 October 2004, at 13:27, Purple 018 called Purple 095. Exhibit P1221, p. 262; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 77.

⁹⁸⁸⁵ Exhibit P1221, p. 264; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 113. *See* chapter IX 'Attribution of mobile telephones to the Accused and Mustafa Amine Badreddine', (C) (2) 'Personal mobile 6091'.

⁹⁸⁸⁶ Purple 231 and Purple 095 were in contact on 9 (twice), 11, 13 (twice), 15, 17 (twice), 23 and 26 (twice) November 2004 and on 1, 3, 9, 14 and 18 December 2004. Exhibit P527, pp 96-99-103, 105.

⁹⁸⁸⁷ Purple 018 was in contact with Purple 231 on 10 (five times), 11 (five times), 12 (five times), 13 (twice), 14, 15, 16, 24 (twice), 27, 28 and 30 November 2004) and on 1, 2 (twice), 7, 12 (four times), 15 (twice), 16, 17 and 18 December 2004. Exhibit P527, pp 96-105.

⁹⁸⁸⁸ In November 2004, Purple 018 and Purple 095 were in contact on three days: three SMS on 14, two calls on 16 and one on 17 November 2004. Exhibit P1221, pp 270-271; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 195.

⁹⁸⁸⁹ *See* paras 4331, 4338-4339.

Wednesday 22 December 2004

5156. The following day, **Wednesday 22 December 2004**,⁹⁸⁹⁰ at 14:00 and 15:09, Mr Oneissi's Purple 095 activated COLA2 and COLA3 cells, which provide coverage to the mosque area.⁹⁸⁹¹

5157. On the same day, at 15:12, Mr Oneissi's Purple 095 called Mr Merhi's Purple 231, activating OUZAI1, which is adjacent to COLA2.⁹⁸⁹² There was a seven-day gap before any of the Purple mobiles activated the COLA cells again.⁹⁸⁹³ On Wednesday 22 December, Mr Oneissi's Purple 095 did not activate the COLA cells before or after the noon or dusk prayers.⁹⁸⁹⁴ The afternoon prayer times, however, were at around 14:16.

5158. Mr Platt was not asked to align the COLA cells activations with the prayer times but he conceded that, with hindsight, it would have been sensible.⁹⁸⁹⁵

5159. Meanwhile, between **Monday 20 and Thursday 23 December 2004**, Mr Badreddine's Green 023 and Mr Ayyash's Green 300 were in contact for four days in a row, after having had no contact for forty days.⁹⁸⁹⁶

5160. The Prosecution submits that the Green network was already operational then but with only limited activity. From **Wednesday 20 December 2004**, its use accelerated reflecting the evolution in the conspiracy to assassinate Mr Hariri.⁹⁸⁹⁷ Accordingly, the sudden escalation and resumption

⁹⁸⁹⁰ On this day, Purple 095 was in contact with Associate Purple 375, and Mr Merhi's Purple 231 called Associate Purple 744, attributed to Mr Merhi's brother. Exhibit P527 (Call sequence table of Purple 231), p. 106; exhibit P1223 (Call sequence table of Purple 095), p. 253; exhibit P1339 (Call sequence table of Associate Purple 375), p. 29; exhibit P1342 (Call sequence table of Associate Purple 744), p. 58.

⁹⁸⁹⁵ Gary Platt, T. 23 March 2017, pp 74-75.

⁹⁸⁹⁶ Exhibit P1207 (Call sequence table of Green 300), p. 3; exhibit P1211 (Call sequence table of Green 023), p. 3; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 237, 243, 275, 284, 289. *See also* exhibit P1782, paras 300-301.

⁹⁸⁹⁷ The Prosecution terms the period from Monday 20 December 2004 to Sunday 2 January 2005 the 'Green initial phase' and the period from Tuesday 11 January to Monday 14 February 2005 as the 'Green primary phase'; Prosecution final trial brief, paras 700-701.

of Green network activity reflected a ‘step-change’ in both limbs of the conspiracy driven by Mr Badreddine; through Mr Ayyash by intensified surveillance and set-up of the Red network and through Mr Merhi by identifying a scapegoat for the false claim.⁹⁸⁹⁸

Thursday 23 December 2004

5161. On **Thursday 23 December 2004**, and within a short period, Mr Badreddine’s Green 023 received calls from both Mr Merhi’s attributed Green 071, which had been inactive for seven weeks, and Mr Ayyash’s Green 300.⁹⁸⁹⁹

Friday 24 December 2004

5162. On **Friday 24 December 2004**, Mr Sabra’s attributed Purple 018 received a call from Mr Oneissi’s Purple 095 at 12:52. Purple 095 connected to SFEIR3 in southern Beirut whereas Purple 018 connected to TRIPOL1 in Tripoli.⁹⁹⁰⁰

Saturday 25 December 2004

5163. The next day, **Saturday 25 December 2004**, Mr Merhi’s Purple 231 called Purple 018 twice at 18:57 and 20:46.

5164. For these calls, Mr Merhi’s Purple 231 connected to SFEIR3 and SABRA2, respectively. Mr Sabra’s attributed Purple 018 connected to KHALDE1 at the beginning of the call and CHARLI1 at the end of the call, south of the airport, and to HARA2 in southern Beirut.⁹⁹⁰¹

5165. Mr Merhi’s Purple 231, connecting to SABRA2, also called Mr Oneissi’s Purple 095 at 20:44, which connected to HAROUF2 in southern Lebanon.⁹⁹⁰²

⁹⁸⁹⁸ Prosecution final trial brief, para. 702.

⁹⁸⁹⁹ Green 071 contacted Green 023 for 36 seconds, at 14:05, followed shortly by Green 300 calling Green 023 for 21 seconds at 14:08. Exhibit P1205 (Call sequence table of Green 071), p. 8; exhibit P1207, p. 3; exhibit P1211, p. 3; Gary Platt, T. 26 January 2017, pp 26-28, T. 27 January 2017, pp 54-55; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 288-289. *See also* exhibit P1782, para. 347; exhibit P1793, slides 128-130.

⁹⁹⁰¹ Exhibit P527, p. 106; exhibit P1221, p. 278; exhibit P1123. At 17:28, Purple 231 received a 14-second call from Associate Purple 744, attributed to Mr Merhi’s brother.

⁹⁹⁰² Exhibit P527, p. 106; exhibit P1223, p. 255.

Sunday 26 December 2004

5166. On **Sunday 26 December 2004** there were five calls involving Mr Oneissi's Purple 095, four of which were with Mr Merhi's Purple 231 and one with Mr Sabra's attributed Purple 018.

5167. None of the calls made between Friday 24 and Sunday 26 December 2004 activated COLA cells. During these calls, Purple 095 connected to cells in southern Lebanon, Purple 018 connected to SFEIR2 in southern Beirut and Purple 231 connected to SFEIR3 and GALAXY1, which is also in southern Beirut.⁹⁹⁰³

Monday 27 December 2004—Green network activity

5168. The next day, **Monday 27 December 2004**, the Purple mobiles were active but did not contact each other.⁹⁹⁰⁴ The Green mobiles exchanged calls after four days of silence,⁹⁹⁰⁵ which Mr Platt testified illustrated similar organisation and structure to the calls between the three Green mobiles on 23 December 2004.⁹⁹⁰⁶ Mr Merhi's attributed Green 071 called Mr Badreddine's Green 023 at 09:56, connecting to BRAJNE2 in southern Beirut.⁹⁹⁰⁷

Tuesday 28 December 2004

5169. On **Tuesday 28 December 2004**, Mr Merhi's Purple 231 and Mr Oneissi's Purple 095 exchanged one call in the afternoon, with Purple 095 connecting to TAHAN1.⁹⁹⁰⁸ The predicted best server coverage of this cell is 500 to 1,000 metres from the mosque.⁹⁹⁰⁹ This is shown on exhibit 4D325 in paragraph 5101 above.

⁹⁹⁰³ Purple 231 called Purple 095 at 11:10, after which Purple 095 called Purple 231 at 11:23. Purple 095 connected to KFARSI3 in South Lebanon on both occasions. At 11:34 and again at 19:08, Purple 231 called Purple 095. Purple 095 remained in South Lebanon for both calls. At 12:51, Purple 018, activating SFEIR2 in south Beirut, called Purple 095, which activated KFARSI3 in South Lebanon. Exhibit P527, p. 107; exhibit P1221, p. 278; exhibit P1223, pp 254-255; Gary Platt, T. 27 January 2017, pp 35-36. *See also* exhibit P1793, slide 218; exhibit P1123.

⁹⁹⁰⁴ Purple 231 contacted Associate Purple 375 twice, at 16:48 and at 18:05. Exhibit P527, p. 107; exhibit P1221, p. 278; exhibit P1223, pp 255-256; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 362.

⁹⁹⁰⁵ Exhibit P1205, p. 8; exhibit P1207, p. 3; exhibit P1211, p. 3.

⁹⁹⁰⁶ Gary Platt, T. 27 January 2017, pp 53-57; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 347-348. *See also* exhibit P1782, paras 379-381; exhibit P1793, slides 235-237.

⁹⁹⁰⁷ At 09:56, Green 071 contacted Green 023 for less than a minute. Three minutes later Green 300 called Green 023 for 46 seconds. Following the call to Green 023, Green 071 became inactive again until 2 January 2005. Exhibit P1205, p. 8; exhibit P1207, p. 3; exhibit P1211, p. 3.

⁹⁹⁰⁸ Purple 231 called Purple 095 at 15:53. Exhibit P527, p. 107; exhibit P1223, p. 256. Purple 231 called Associate Purple 375 at 08:45.

⁹⁹⁰⁹ Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1274.

v. The so-called ‘COLA phase’—Wednesday 29 December 2004 to Friday 7 January 2005

5170. The Prosecution used the term, ‘COLA phase’, to refer to the ten-day period between **Wednesday 29 December 2004 and Friday 7 January 2005** when Mr Sabra’s attributed Purple 018 and Mr Oneissi’s Purple 095 were most active connecting to the COLA and adjacent cells near the mosque.

5171. According to the Prosecution’s final trial brief, under the heading, ‘Extraordinary Purple Phone Activity Over the Ten Days Until 7 January 2005 (the COLA Phase)’, their mobiles had ‘exceptional activity’, which was evidence of Mr Abu Adass’s identification and selection at the end of December 2004 and early January 2005.⁹⁹¹⁰ This phase also overlaps with the closure of the Yellow network, which ceased operations between 30 December 2004 and 12 January 2005, with the last Yellow-to-Yellow call occurring on 7 January 2005.⁹⁹¹¹

5172. Mr Abu Adass regularly attended the dusk prayers at the Arab University Mosque. Witnesses 56 and 87 stated that he prayed there every Friday,⁹⁹¹² and his father stated that he prayed five times a day there, including for the evening prayer.⁹⁹¹³ The witness who met ‘Mohammed’ in the mosque said that Mr Abu Adass performed the five daily prayers and was at the mosque when ‘Mohammed’ approached the witness. This would have been on either Monday 3 or Monday 10 January 2005, as is set out above at paragraph 4986.⁹⁹¹⁴

Prayer times

5173. The Trial Chamber received some evidence of the published prayer times for Beirut in December 2004 and January 2005. The Oneissi Defence tendered charts on which it had marked

⁹⁹¹⁰ Prosecution final trial brief, paras 519-525, 532-535.

⁹⁹¹¹ See paras 2362-2363.

⁹⁹¹² Exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 2; exhibit P2132 (Statement of Witness PRH056, dated 1 July 2010), para. 14; exhibit 4D212 (Statement of Witness PRH087, undated), p. 3; exhibit P596 (Statements of Witness PRH087, dated 14 January 2015 and 24 November 2006), para. 56 (p. 11); Witness PRH087, T. 29 September 2015, pp 16, 52.

⁹⁹¹³ Exhibit P461 (Witness statements of Taysir Abu Adass, dated 19 January 2005 and 28 February 2005), ERN 50003488.

⁹⁹¹⁴ Exhibit P760, pp 1-2; exhibit P762, pp 2-4; T. 20 January 2016, pp 36-38 (closed session), T. 25 January 2016, pp 63-64 (closed session), T. 26 January 2016, pp 74-75 (closed session); exhibit 4D241 (Diagram of meeting in the mosque).

⁹⁹¹⁴ T. 20 January 2016, pp 38, 40-41 (closed session).

the noon and dusk prayer times in Beirut on six days, Wednesday 22, Wednesday 29, Thursday 30, and Friday 31 December 2004, and Monday 3, and Friday 7 January 2005.⁹⁹¹⁵

5174. The Prosecution invited the Trial Chamber, if it wished, to take judicial notice of the prayer times in Beirut during those months, and the Trial Chamber noted that they were available online.⁹⁹¹⁶ No Party formally tendered a list of the prayer times on the days relevant to the amended consolidated indictment, and no Party expressed any opposition to the Trial Chamber consulting open source material listing the published prayer times. The Trial Chamber, accordingly, where there was no evidence as to a particular prayer time, has consulted open source material for this information.⁹⁹¹⁷ It has no reason to doubt its reliability and the prayer times are not in issue. The times in the Oneissi Defence exhibits and in the open source material vary slightly for some prayer times by around a minute or so, but nothing turns on this.

Wednesday 29 December 2004

5175. On **Wednesday 29 December 2004**, Mr Merhi's Purple 231 received a call from Mr Sabra's attributed Purple 018, at 15:55. Purple 231 activated SFEIR3, in southern Beirut, while Purple 018 activated both SAIDA1 and QANAYE1, which are in Sidon, in southern Lebanon.⁹⁹¹⁸

5176. On that day, Mr Oneissi's Purple 095 activated the COLA2 and COLA3 cells three times within a minute when it received two service texts at 15:26 and one call at 15:27.⁹⁹¹⁹ The noon prayer was at 11:41 and the dusk prayer at 16:38.⁹⁹²⁰

⁹⁹¹⁵ Exhibits 4D328-4D329, 4D331-4D334.

⁹⁹¹⁶ T. 23 March 2017, pp 79-80.

⁹⁹¹⁷ Prayer times for December 2004 and January 2005 are listed in for example: <https://www.islamicfinder.org/world/lebanon/276781/beirut-beyrouth-lb-prayer-times/> or <https://www.islamicfinder.org/prayer-times/printmonthlyprayer/?timeInterval=month&calendarType=Gregorian&month=11&year=2004>.

⁹⁹¹⁸ Exhibit P527 (Call sequence table of Purple 231), p. 107; exhibit P1221 (Call sequence table of Purple 018), p. 279; exhibit P1123 (ArcView shape files Alfa).

⁹⁹¹⁹ The call at 15:27 to Purple 095 was from Associate Purple 375. At 15:55, Purple 018 called Purple 231. Purple 231 received a call from Associate Purple 744, attributed to Mr Merhi's brother, at 16:29. Exhibit P1223 (Call sequence table of Purple 095), p. 256; exhibit P527 (Call sequence table of Purple 231), p. 107; exhibit P1221 (Call sequence table of Purple 018), p. 279; Gary Platt, T. 6 February 2017, pp 22, 49-50, 52-54; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 378, 381, 383. *See also* exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 401, 408-409; exhibit P1793 (Chronology PowerPoint presentation – 20 December 2004 to 31 December 2004), slides 304-305, 307.

⁹⁹²⁰ Exhibit 4D329 (Timeline of Purple 095's activity on 29 December 2004), p. 2.

5177. Mr Platt testified that this was the first day of the ten days of increased Purple mobile activation of the COLA cells and that Purple 095's activation of the COLA cell for such a short time, should be seen in that context. He conceded, however, that an alternative explanation was that Purple 095's user was passing by the COLA cells area on the way from north to southern Beirut.⁹⁹²¹

Thursday 30 December 2004

5178. On **Thursday 30 December 2004**, as on the previous day, Mr Oneissi's Purple 095 activated one of the COLA cells, COLA3, for a short period, at 18:05, 18:09 and 18:11.⁹⁹²² One call, namely at 18:11, came from Mr Sabra's attributed Purple 018, also connecting to COLA3.⁹⁹²³ The dusk prayer was at 16:39.⁹⁹²⁴

5179. Open source information on daily prayer times reveals that the evening prayer time was at 18:03, which places the two Purple mobiles connecting to cells 'near' the mosque when Mr Abu Adass was likely attending the evening prayer.

Friday 31 December 2004

5180. On **Friday 31 December 2004** a peak in activity between the Purple mobiles occurred. There were ten calls between Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018, and three calls from Purple 095 to Mr Merhi's Purple 231.⁹⁹²⁵

5181. As noted earlier, the evidence is of Mr Abu Adass praying almost every Friday at that mosque. The Oneissi Defence chart showed the noon prayer at 11:42 and dusk prayer at 16:40,⁹⁹²⁶ while the open source information gave the prayers times as 05:14, 11:41, 14:21, 16:39 and 18:03.

⁹⁹²¹ Gary Platt, T. 6 February 2017, pp 51-53.

⁹⁹²² Exhibit P1223, p. 257; Gary Platt, T. 6 February 2017, pp 90-92; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 391, 404. *See also* exhibit P1782, para. 422; exhibit P1793, slides 373-375.

⁹⁹²³ This call lasted 27 seconds. Exhibit P1221, p. 279; exhibit P1223, p. 257; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 391, 403-405. *See also* exhibit P1782, para. 422.

⁹⁹²⁴ Exhibit 4D334 (Timeline of Purple 095's activity on 30 December 2004).

⁹⁹²⁵ Exhibit P527, p. 108; exhibit P1221, pp 279-280; exhibit P1223, pp 257-258.

⁹⁹²⁶ Exhibit 4D333 (Timeline of Purple 095's activity on 31 December 2004), pp 1-2.

5182. Mr Sabra's attributed Purple 018 called Mr Oneissi's Purple 095 eight times between 12:39 and 16:30, namely at 12:39, 14:41, 14:09, 15:13, 15:39, 15:47, 15:58 and 16:30.⁹⁹²⁷

5183. During the call at 15:58, Mr Sabra's attributed Purple 018 was connecting to COLA2 and Mr Oneissi's Purple 095 activated the CHATIL1 cell at the start of the call and COLA2 at the end; the two cells are adjacent.⁹⁹²⁸ At 16:30, it connected to CBOURJ3 in southern Beirut.⁹⁹²⁹

5184. Subsequently, at 16:34, Mr Oneissi's Purple 095 connecting to CBOURJ3, called Mr Sabra's attributed Purple 018, which connected to CBOURJ2.⁹⁹³⁰ Shortly thereafter, Mr Oneissi's Purple 095 called Mr Merhi's Purple 231 at 16:55 and again at 18:18. Mr Oneissi's Purple 095 activated cells south of the airport on both occasions, whereas Mr Merhi's Purple 231 activated SFEIR3 both times.⁹⁹³¹ At 18:33, Mr Oneissi's Purple 095 called Mr Sabra's attributed Purple 018, with both activating CBOURJ3.⁹⁹³² At 18:41, Mr Oneissi's Purple 095 called again Mr Merhi's Purple 231, connecting to SFEIR2 and MIKAEL2 respectively.⁹⁹³³

5185. The only time when Mr Oneissi's Purple 095 activated a COLA cell on that day was during a call with Mr Sabra's attributed Purple 018 at 15:58.⁹⁹³⁴

5186. Before and after that call, Mr Oneissi's Purple 095 activated cells in the Dahyieh area. In Mr Platt's view, a journey from the Dahyieh area to the vicinity of the mosque and then back to Dahyieh appears to have occurred during the 45 minutes of those activations.⁹⁹³⁵

⁹⁹²⁷ Purple 095 was in south Beirut during the calls of 12:39, 12:41, 14:09, 15:13, 15:39 and 15:47. Exhibit P1223, p. 257; exhibit P1221, pp 279-280.

⁹⁹²⁸ Exhibit P1221, p. 280; exhibit P1223, p. 257; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 430. *See also* exhibit 4D325 (Cell coverage around the Arab University Mosque); exhibit P1782, para. 435.

⁹⁹³² Exhibit P1221, p. 280; exhibit P1223, p. 257.

⁹⁹³³ Exhibit P1223, p. 258.

⁹⁹³⁴ Exhibit P1223, pp 257-258.

⁹⁹³⁵ Exhibit P1223, pp 257-258; Gary Platt, T. 7 February 2017, p. 55.

5187. Mr Sabra's attributed Purple 018 activated COLA cells nine times that day. Broken down, this was at 10:39, 11:34, twice at 12:54, at 13:29, on COLA3, at 15:13 on COLA1, and at 15:57, 15:58 and 16:05 on COLA2.⁹⁹³⁶

5188. In addition, Purple 018 connected to cells within the 500-metre radius of the mosque on another six occasions. These were at 12:39, connecting to MAKASS3, at 12:41, on OUZAI4 which was adjacent to OUZAI1, at 14:09 and 14:26 activating CHATIL1 and at 15:39 and 15:47 on NASSER1.⁹⁹³⁷

5189. Mr Sabra's attributed Purple 018 connected to COLA cells near the mosque three times between noon and the 14:21 prayers, and then again between 15:13 and 16:05. Shortly before the 16:39/16:40 prayers, it had moved south of the mosque to CBOURJ2.⁹⁹³⁸

Saturday 1 January 2005

5190. On **Saturday 1 January 2005**, Mr Oneissi's Purple 095 called Mr Sabra's attributed Purple 018 three times. These were twice in the early afternoon, at 13:24 and 14:24, and once later at 16:51.⁹⁹³⁹

5191. During these calls, only Mr Sabra's attributed Purple 018 activated COLA3, at 14:24 and at 16:51.⁹⁹⁴⁰ Mr Oneissi's Purple 095 also called Mr Merhi's Purple 231 at 14:18, a few minutes before its second call to Purple 018.⁹⁹⁴¹ In the morning the same day, Purple 018 activated the COLA3 cell at 11:12 and 12:38.⁹⁹⁴²

⁹⁹³⁶ Exhibit P1221, pp 279-280; Gary Platt, T. 7 February 2017, pp 49-51, 53, 58-59; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 429. *See also* exhibit P1793, slides 432, 434-438.

⁹⁹³⁷ Exhibit P1221, pp 279-280; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1273; exhibit 4D325.

⁹⁹³⁸ Exhibit P1221, pp 279-280.

⁹⁹³⁹ Exhibit P1223, p. 258.

⁹⁹⁴⁰ For the calls at 13:24 and 14:24, Purple 095 connected to ARAMOU2 and BCHAMO2, south of the airport. During its third call to Purple 018, at 16:51, Purple 095 activated HADATH3 in south Beirut. Between 16:05 and 16:46 both Purple 095 and Purple 018 were in contact with Associate Purple 375. Exhibit P1223, p. 258; exhibit P1221, pp 280-281; exhibit P1339 (Call sequence table of Associate Purple 375), p. 32. *See also* exhibit P1123.

⁹⁹⁴¹ Purple 095 connected to ARAMOU2, south of the airport, and Purple 231 activated SFEIR3. Exhibit P1223, p. 258; exhibit P527, p. 108.

⁹⁹⁴² Exhibit P1221, p. 280; Gary Platt, T. 8 February 2017, pp 12-13; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 453-454. *See also* exhibit P1782, para. 450; exhibit P1807 (Chronology PowerPoint presentation – 1 January 2005 to 17 January 2005), slides 56-59.

5192. At 12:44 and 13:57, Purple 018 was in the predicted best server coverage area of CBJOUR3. Later the same day, after having spent some time in southern Beirut, it again connected to the COLA3, COLA2 and COLA1 cells between 14:24 and 19:06. This was sixteen times in total.⁹⁹⁴³ The last three of these calls were with Mr Merhi's Purple 231.⁹⁹⁴⁴

5193. Mr Oneissi's Purple 095 did not activate any COLA cells nor other cells providing best server coverage within a kilometre of the mosque on this day.⁹⁹⁴⁵ The daily prayers in Beirut were at 11:42, 14:22, 16:40 and 18:04. Purple 018's COLA cell activations overlapped with the afternoon, dusk and evening prayers at the mosque.

Sunday 2 January 2005

5194. On **Sunday 2 January 2005**, no Purple mobile used cells providing coverage to the (extended) mosque area.⁹⁹⁴⁶ Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 were in contact twice on this day, at 12:33 and 18:10.⁹⁹⁴⁷ Mr Merhi's Purple 231 called Mr Oneissi's Purple 095 in the afternoon, at 15:01.⁹⁹⁴⁸

5195. The same day, Mr Merhi's attributed Green 071 contacted Mr Badreddine's Green 023 for a 38-second voice call in the evening, at 19:18, and Mr Ayyash's Green 300 called Green 023 at 15:13.⁹⁹⁴⁹ After the call on 2 January, Mr Merhi's attributed Green 071 was inactive for ten

⁹⁹⁴³ Purple 018 activated the COLA cells at 14:24, 15:37, 15:52, 15:55, 16:00, 16:02 (three times), 16:05, 16:11, 16:12, 16:51, 16:54, 17:53, 18:35 and 19:06. Exhibit P1221, pp 280-281; Gary Platt, T. 8 February 2017, pp 13-15; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 440, 458-460. *See also* exhibit P1782, para. 450; exhibit P1807, slides 59-63.

⁹⁹⁴⁴ Purple 231 called Purple 018 at 17:53 and 18:35, after which it received a call from Purple 018 at 19:06. Exhibit P1221, p. 281.

⁹⁹⁴⁵ Exhibit P1223, p. 258; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1273-1274.

⁹⁹⁴⁶ Gary Platt, T. 8 February 2017, pp 22-23; exhibit P1221, p. 281; exhibit P1223, pp 258-259; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 467. *See also* exhibit P1782, para. 458.

⁹⁹⁴⁷ At 12:33, Purple 095 called Purple 018, activating GREENH2, south of the airport. At 18:10, Purple 018 called Purple 095, activating SFEIR3 and HARA2 respectively. In between these calls, at 13:42, Associate Purple 375 called Purple 018. Exhibit P1223, p. 258; exhibit P1221, p. 281; exhibit P1339, p. 32.

⁹⁹⁴⁸ Purple 231 activated BRAJNE2 and Purple 095 activated MIKAEL2 and SFEIR3. Exhibit P527, p. 108; exhibit P1223, p. 258.

⁹⁹⁴⁹ Exhibit P1205 (Call sequence table of Green 071), p. 8; exhibit P1211 (Call sequence table of Green 023), p. 3; exhibit P1207 (Call sequence table of Green 300), p. 3; Gary Platt, T. 8 February 2017, pp 22-25; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 469-470, 474. *See also* exhibit P1782, para. 455; exhibit P1807, slides 71-73.

days.⁹⁹⁵⁰ In the context of the wider pleaded network activity, there was none on the Blue network that day.⁹⁹⁵¹

5196. As there was no Purple mobile activity near the area of the mosque, and Mr Merhi's attributed Green 071 had been inactive for the previous five days, Mr Platt concluded that this call on 2 January 2005 was pre-arranged and could not have been an update call. He stated that it was consistent with the users of these Green mobiles arranging a meeting.⁹⁹⁵²

5197. Mr Platt also testified that the Green mobile calls of 2 January 2005, while not having such close correlations, had a similar pattern to those calls from Mr Ayyash's Green 300 and Mr Merhi's Green 071 to Mr Badreddine's Green 023, on 23 and 27 December 2004. In his view, those December calls were pre-arranged and coordinated between their users. Their duration was often short; thus he concluded that these were arrangement or update calls, rather than conversational ones.⁹⁹⁵³

Monday 3 January 2005

5198. The witness who met 'Mohammed' in the mosque and saw Mr Abu Adass there would have done so either on **Monday 3 January**, or **Monday 10 January 2005** during the noon prayer.⁹⁹⁵⁴ On Monday 3 January, according to Mr Platt's evidence, another peak in inter-purple activity occurred. Purple 018 and Mr Oneissi's Purple 095 were in contact ten times during the two hours between 12:22 and 14:24.⁹⁹⁵⁵

5199. Mr Sabra's attributed Purple 018 called Mr Oneissi's Purple 095 six times—at 12:22, 13:51, 13:58, 14:08, 14:12 and 14:24—while Purple 095 called Purple 018 four times, at 12:23, 12:37, 12:45 and 14:16.⁹⁹⁵⁶

⁹⁹⁵⁰ Exhibit P1205, p. 108; Gary Platt, T. 27 January 2017, pp 55-57, T. 8 February 2017, p. 24.

⁹⁹⁵¹ See para. 4399.

⁹⁹⁵² Gary Platt, T. 8 February 2017, pp 22-25. See also exhibit P1807, slide 73.

⁹⁹⁵³ At 09:56 on 27 December 2004, Green 071 contacted Green 023 for less than a minute. Three minutes later Green 300 called Green 023 for 46 seconds. Following its call to Green 023, Green 071 became inactive again until 2 January 2005. Exhibit P1205, p. 8; exhibit P1207, p. 3; exhibit P1211, p. 3; Gary Platt, T. 26 January 2017, pp 27-28, T. 27 January 2017, pp 53-57; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 284, 288-289, 339, 347-348, 464, 469-470, 474. See also exhibit P1782, paras 347, 379-381, 455.

⁹⁹⁵⁴ See above, at paras 4945-4952, 4986.

⁹⁹⁵⁵ Gary Platt, T. 8 February 2017, pp 29-32; exhibit P1221, pp 281-282; exhibit P1223, p. 259; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 479. See also exhibit P1782, para. 464.

⁹⁹⁵⁶ Exhibit P1221, pp 281-282; exhibit P1223, p. 259. Purple 095 was in south Beirut for all of these calls.

5200. Before the first call to Mr Oneissi's Purple 095, Purple 018 activated COLA3 at 11:16.⁹⁹⁵⁷ During its call with Purple 095 at 12:22 and 12:23, it activated OUZAI3 and CBOURJ3.⁹⁹⁵⁸

5201. Mr Oneissi's Purple 095 activated CHATIL1 at 14:44 and at the end of this 51-second call, it activated COLA2.⁹⁹⁵⁹

5202. According to Mr Platt, this shows that Mr Oneissi's Purple 095 may have been traveling at the time of the call. Purple 095 activated cells in southern Beirut twenty minutes before and within thirty minutes of this COLA2 activation. Mr Platt conceded, however, that this pattern was similar to that of Mr Oneissi's Purple 095 on Friday 31 December 2004, suggesting a possible journey from the Dahyieh area to the 'vicinity' of the mosque and then back to Dahyieh.⁹⁹⁶⁰

5203. Neither Mr Sabra's attributed Purple 018 nor Mr Oneissi's Purple 095 was in contact with Mr Merhi's Purple 231 on Monday 3 January 2005.⁹⁹⁶¹

5204. The prayer times on this day were 05:15, 11:43, 14:23, 16:41 and 18:05.⁹⁹⁶² There was no overlap between these and the COLA cells activations. Mr Sabra's attributed Purple 018, however, activated a COLA cell before the noon prayer, while Mr Oneissi's Purple 095 activated a COLA cell after the start of the afternoon prayer.⁹⁹⁶³

Tuesday 4 January 2005

5205. The seventh day of the so-called 'COLA phase', **Tuesday 4 January 2005**, coincided with the initialisation process of the Red mobiles in Tripoli.⁹⁹⁶⁴ On this day, there was an 81-second

⁹⁹⁵⁷ Exhibit P1221, p. 281.

⁹⁹⁵⁸ For the remainder of the calls, Purple 018 connected to cells in south Beirut. Exhibit P1221, pp 281-282.

⁹⁹⁵⁹ The call came from Associate Purple 375. Exhibit P1223, p. 259.

⁹⁹⁶⁰ Gary Platt, T. 8 February 2017, pp 32-33, T. 24 March 2017, pp 21-22. *See also* exhibit P1807, slides 87-90.

⁹⁹⁶¹ Exhibit P527, p. 108; exhibit P1221, pp 281-282; exhibit P1223, p. 259; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 485.

⁹⁹⁶² According to the Oneissi Defence chart, the noon prayer was at 11:43 and the dusk prayer at 16:42. Exhibit 4D332 (Timeline of Purple 095's activity on 3 January 2005).

⁹⁹⁶³ Exhibit P1221, p. 281; exhibit P1223, p. 259.

⁹⁹⁶⁴ On this day, eight SIM cards that were used to form the Red Network were activated in the Tripoli area. *See* paras 2253, 4401.

call from Yellow 425 to Mr Sabra's attributed Purple 018 at 12:28. Two hours later, Yellow 425 called Mr Ayyash's Yellow 294 for eight seconds.⁹⁹⁶⁵

5206. In the afternoon, Mr Oneissi's Purple 095 called Mr Sabra's attributed Purple 018 once at 15:26 and Mr Merhi's Purple 231 twice, at 15:52 and 17:33.⁹⁹⁶⁶ In the late afternoon, Mr Merhi's Purple 231 called Purple 018 at 18:11 and Purple 018 call Purple 231 back twice at 18:47 and 18:50.⁹⁹⁶⁷

5207. Between 15:08 and 18:50, Purple 018 used COLA2 and COLA3 for six sequential calls, including the one with Mr Oneissi's Purple 095 and the three with Mr Merhi's Purple 231.⁹⁹⁶⁸ These COLA activations overlapped with the dusk and evening prayers at 16:42 and 18:06.

5208. Of the call between Yellow 425 and Purple 018,⁹⁹⁶⁹ this was the only time between September 2004 and February 2005 that the Yellow and Purple mobiles were in contact.⁹⁹⁷⁰ For Mr Platt this was:

obviously a crucial period in -- in the planning, the operation, the plot, whereby the Red Phones are clearly being activated. A decision has been made for that. And, of course, we're in the middle of the -- what's been termed as the COLA phase, the activity of the Purple Phones around the Arab University Mosque. So obviously it coincides with that, where both sides of the operation, the -- what has been termed the false claim and the -- and I'm using other people's terms slightly here, the mission team are in full flow, and at a pivotal point in the operation.⁹⁹⁷¹

⁹⁹⁶⁵ Exhibit P1221, p. 282; exhibit P1242 (Call sequence table of Yellow 425), p. 29; exhibit P1240 (Call sequence table of Yellow 294), p. 52; Gary Platt, T. 8 February 2017, pp 65-66; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 508-509. *See also* exhibit P1782, para. 474; exhibit P1807, slides 111-113.

⁹⁹⁶⁶ On all of these occasions, Purple 095 connected to cells south of the airport. Exhibit P1223, pp 259-260.

⁹⁹⁶⁷ Exhibit P527, p. 108; exhibit P1221, p. 282.

⁹⁹⁶⁸ These calls took place at 15:08, 15:26, 17:09, 18:11, 18:47 and 18:50. Exhibit P1221, p. 282; Gary Platt, T. 8 February 2017, pp 66-68; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 492, 510-512. *See also* exhibit P1782, para. 475; exhibit P1807, slides 114-118.

⁹⁹⁶⁹ At 12:28, Yellow 425 activated Sfeir_B and Purple 018 activated BIRABD1. Exhibit P1242, p. 29; exhibit P1221, p. 282. *See also* Gary Platt, T. 8 February 2017, p. 65; exhibit P1782, para. 474; exhibit P1783, para. 508.

⁹⁹⁷⁰ Exhibit P1782, para. 474.

⁹⁹⁷¹ Gary Platt, T. 8 February 2017, p. 66.

Wednesday 5 January 2005

5209. It was either on **Wednesday 5 January**—or alternatively **Wednesday 12 January 2005**—that the witness who had met ‘Mohammed’ in the mosque was supposed to meet ‘Mohammed’ again to teach him how to pray.⁹⁹⁷²

5210. On 5 January 2005, there was a single call from Mr Oneissi’s Purple 095 to Mr Sabra’s attributed Purple 018 at 13:28 when the mobiles were connecting to cells in south Beirut, after which Purple 018 activated COLA3 twice between 14:34 and 14:44, shortly after the start of the afternoon prayers.⁹⁹⁷³ The afternoon prayer, according to the open source information, was at 14:25.

5211. Mr Sabra’s attributed Purple 018 and Mr Oneissi’s Purple 095 were not in contact with Mr Merhi’s Purple 231 this day.⁹⁹⁷⁴

5212. Mr Platt testified that the activation of cells in Tripoli by Yellow mobile users who were not normally in Tripoli on the same days as significant Red activity, for example on 5 January 2005, ‘established clear connectivity between the Yellow and Red phones’ which can no longer be ‘mere coincidence’.⁹⁹⁷⁵

Thursday 6 January 2005

5213. On the penultimate day of the pleaded so-called ‘COLA phase’, **Thursday 6 January 2005**, Mr Sabra’s attributed Purple 018 activated COLA3 at 11:41, just before the start of the noon prayer, and CHATIL1 in the afternoon at 15:28.⁹⁹⁷⁶

⁹⁹⁷² See above, at para. 4949. The witness was meant to meet ‘Mohammed’ before or after the noon prayer, namely, either at about 11:00 or 13:00, so that there would be fewer people around. T. 20 January 2016, pp 38-39 (closed session).

⁹⁹⁷³ At 14:44, Purple 018 sent a text message to Associate Purple 375, and at 16:28 it called that number. Exhibit P1221, p. 282; exhibit P1223, p. 260; Gary Platt, T. 8 February 2017, pp 75-77; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 516, 525-528. See also exhibit P1782, para. 480; exhibit P1807, slides 128-134.

⁹⁹⁷⁴ Purple 095 called Associate Purple 744, which the Prosecution attributed to Mr Merhi’s brother, at 11:38 and at 16:35, who also received a call from Purple 231 at 15:39. Exhibit P527, pp 108-109; exhibit P1221, p. 282; exhibit P1223, p. 260; exhibit P1342 (Call sequence table of Associate Purple 744), p. 66; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 516, 530.

⁹⁹⁷⁵ Gary Platt, T. 8 February 2017, pp 70-72. See also exhibit P1807, slides 121-123.

⁹⁹⁷⁶ Exhibit P1221, p. 283. According to the open source information the noon prayer was at 11:44.

5214. It then activated the COLA3 cell five times between 16:34 and 18:48.⁹⁹⁷⁷ The last four activations overlapped with the dusk and evening prayers, at 16:44 and 18:08.

5215. The only contact for the day between the Purple mobiles was a text message from Purple 018 sent to Mr Oneissi's Purple 095 in the afternoon, at 16:34.⁹⁹⁷⁸ Mr Merhi's Purple 231 received and made no calls on this day; it was inactive from the previous evening at 20:44, until the next day when it received a call from Mr Oneissi's Purple 095 at 11:30.⁹⁹⁷⁹

Friday 7 January 2005

5216. The last day of the so-called 'COLA phase', **Friday 7 January 2005**, is the day on which the Prosecution submits that Mr Abu Adass met 'Mohammed' at the mosque during the Friday prayer, before disappearing on the morning of Sunday 16 January.⁹⁹⁸⁰ The noon prayer was at 11:45 and the dusk prayer at 16:45.⁹⁹⁸¹

5217. The first contact between the Purple mobiles was in the morning at 09:52, when Mr Oneissi's Purple 095 called Mr Sabra's attributed Purple 018 for thirty seconds using the OUZAI1 cell.⁹⁹⁸² An hour and a half later, at 11:30, it called Mr Merhi's Purple 231 using the COLA3 cell, which was Purple 231's only call on that day.⁹⁹⁸³

5218. At 11:31, Purple 095 activated for two consecutive calls the COLA3 and COLA2 cells.⁹⁹⁸⁴ The calls were to and from a number ending in 188, attributed to Mr Oneissi's mother. At the end

⁹⁹⁷⁷ These activations occurred at 16:34 (twice), 16:36, 17:14 and 18:48. Purple 018's first call of the day came from Associate Purple 375 at 10:38. It had further two contacts with Associate Purple 375 during the day, at 16:34, when it sent an SMS to this number, and at 17:14, when it received a call from this number. Exhibit P1221, pp 282-283; Gary Platt, T. 8 February 2017, pp 86-88; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 532, 535. *See also* exhibit P1782, para. 486; exhibit P1807, slides 156, 158-159.

⁹⁹⁷⁸ Purple 095 was in south Beirut (activating SFEIR3). Exhibit P1221, p. 283; exhibit P1223, p. 260; exhibit P527, p. 109; Gary Platt, T. 8 February 2017, p. 87; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 532, 535, 538. *See also* exhibit P1782, paras 486-487.

⁹⁹⁷⁹ Exhibit P527, p. 109.

⁹⁹⁸⁰ *See above*, at paras 4929-4935, 4941-4943. The Prosecution submits that the evidence points firmly to Friday 7 January 2005 as the day of the last, if not only, meeting between 'Mohammed' and Mr Abu Adass. Prosecution final trial brief, paras 519-525.

⁹⁹⁸¹ Exhibit 4D331 (Timeline of Purple 095's activity on 7 January 2005), pp 1, 3.

⁹⁹⁸² The OUZAI1 cell is within the 500-metre radius from the mosque. Purple 018 activated SFEIR2. Exhibit P1223, p. 261; exhibit P1221, p. 283; Gary Platt, T. 9 February 2017, pp 13-14; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 541, 565, 1273. *See also* exhibit P1782, para. 497; exhibit P1807, slides 197-198.

⁹⁹⁸³ Exhibit P527, p. 109; exhibit P1223, p. 261; Gary Platt, T. 9 February 2017, pp 14-15, 17; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 566. *See also* exhibit P1782, para. 498; exhibit P1807, slides 199-201.

⁹⁹⁸⁴ Exhibit P1223, p. 261; Gary Platt, T. 9 February 2017, pp 14-15, 17; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 567. *See also* exhibit P1782, para. 497; exhibit P1807, slides 199-201.

of the second call, Purple 095 switched from COLA2 to OUZAI3.⁹⁹⁸⁵ Subsequently, at 12:36, Mr Oneissi's Purple 095 received a call while it was in SFEIR3 in southern Beirut.⁹⁹⁸⁶

5219. Mr Platt testified that this pattern of cell activation is 'consistent' with Mr Oneissi having been on his way to Dahyieh when he activated the COLA cells at 11:31, meaning he would not have been at the mosque around the noon prayer time, which on that day was 11:45.⁹⁹⁸⁷

5220. Shortly thereafter, at 12:54 and 12:59, Mr Oneissi's Purple 095 exchanged two calls with Purple 018, activating MAZRAA2 at the start and COLA3 at the end of each call, while Purple 018 activated COLA1 and COLA2 at the start and at the end of the calls.⁹⁹⁸⁸

5221. In the next twenty minutes, there were three calls between Purple 095 and Purple 018, at 13:03, 13:04 and 13:19, with both mobiles using Alfa cells providing coverage near the mosque. For these calls, Mr Oneissi's Purple 095 used OUZAI1 and COLA2, while Mr Sabra's attributed Purple 018 activated COLA2 and CHATIL3.⁹⁹⁸⁹

5222. Later in the afternoon, at 14:05, Mr Oneissi's Purple 095 activated OUZAI3 and for the following four sequential calls between 15:24 and 16:38, it returned to the COLA3 cell.⁹⁹⁹⁰ For a call at 16:41, it used MSAYTB2, and for another call at 16:47, it used COLA2.⁹⁹⁹¹ Mr Sabra's attributed Purple 018 activated COLA3 at 15:44 and COLA2 for two calls with Mr Oneissi's Purple 095 later in the afternoon.⁹⁹⁹² Mr Oneissi's Purple 095 connected to COLA cells shortly before and shortly after the dusk prayer, which on that day was at 16:45.⁹⁹⁹³ The two extracts below

⁹⁹⁸⁵ Exhibit P1223, p. 261; Gary Platt, T. 9 February 2017, pp 14-15, 17; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 566-567. The mobile ending in 188 is attributed to Mr Oneissi's mother, *see* paras 3273-3274.

⁹⁹⁹⁰ The four calls were made at 15:24, 15:31, 16:16 and 16:38. At 14:05 Purple 095 called Associate Purple 375. Exhibit P1223, p. 261; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 570.

⁹⁹⁹¹ Exhibit P1223, p. 261.

⁹⁹⁹² The two calls were at 16:38 and 16:47. Exhibit P1221, p. 283; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 570.

⁹⁹⁹³ Purple 095 activated COLA3 for a call from Purple 018 at 16:38, and COLA2 at the start of a call to Purple 018 at 16:47. Exhibit 1223, p. 261; exhibit 4D331, p. 3. Open source information gives the afternoon and evening prayers as at 14:26 and 18:08. The prayer times for Friday 7 January 2005 were: *Fajr* 05:15, *Dhuhr* 11:44, *Asr* 14:26, *Maghrib* 16:45 and *Isha* 18:08.

from Mr Platt's chronology report depict the activations of Mr Oneissi's Purple 095 and Mr Sabra's attributed mobile 018 to the COLA and adjacent cells that day:

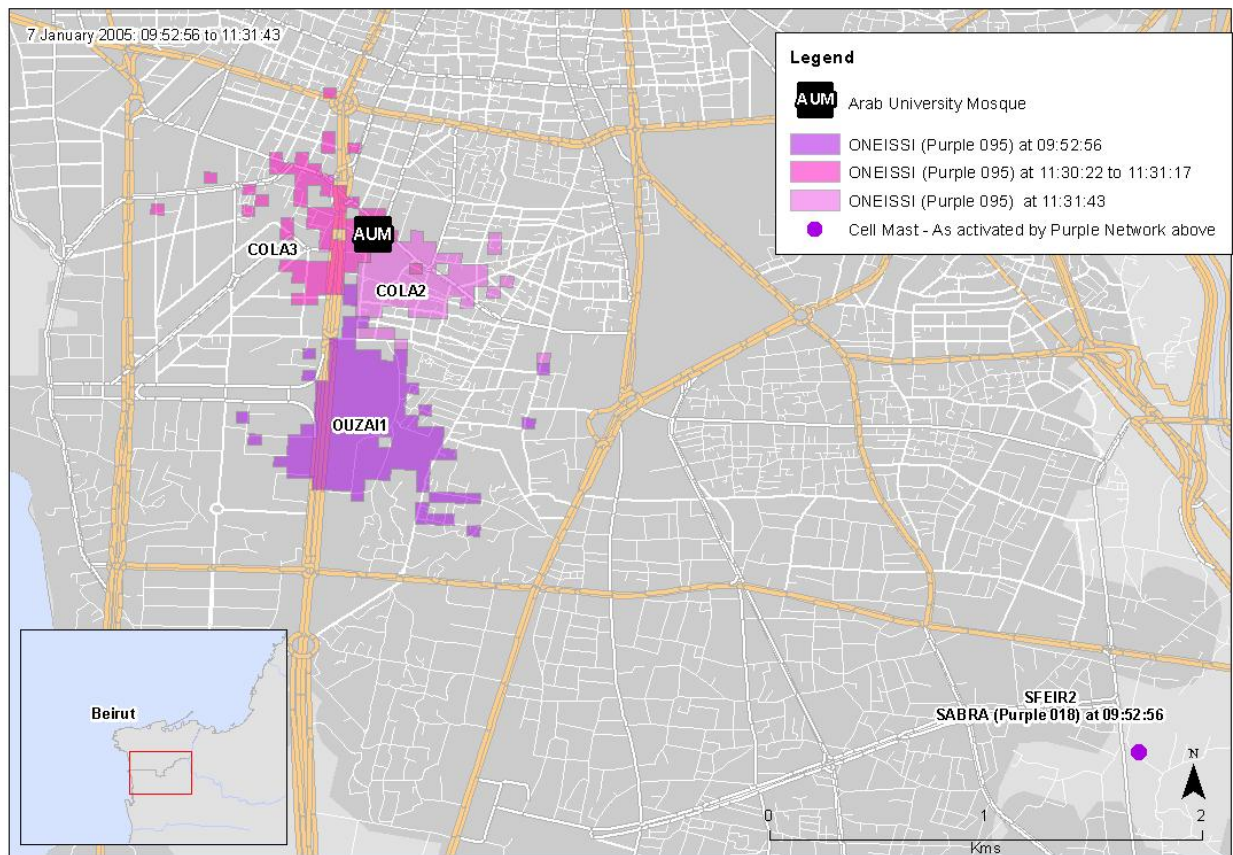

Exhibit P1783 (Expert report of Gary Platt – Chronology), Map 56

Purple 095, Mosque, 7 January 2005 (09:52 to 11:31)

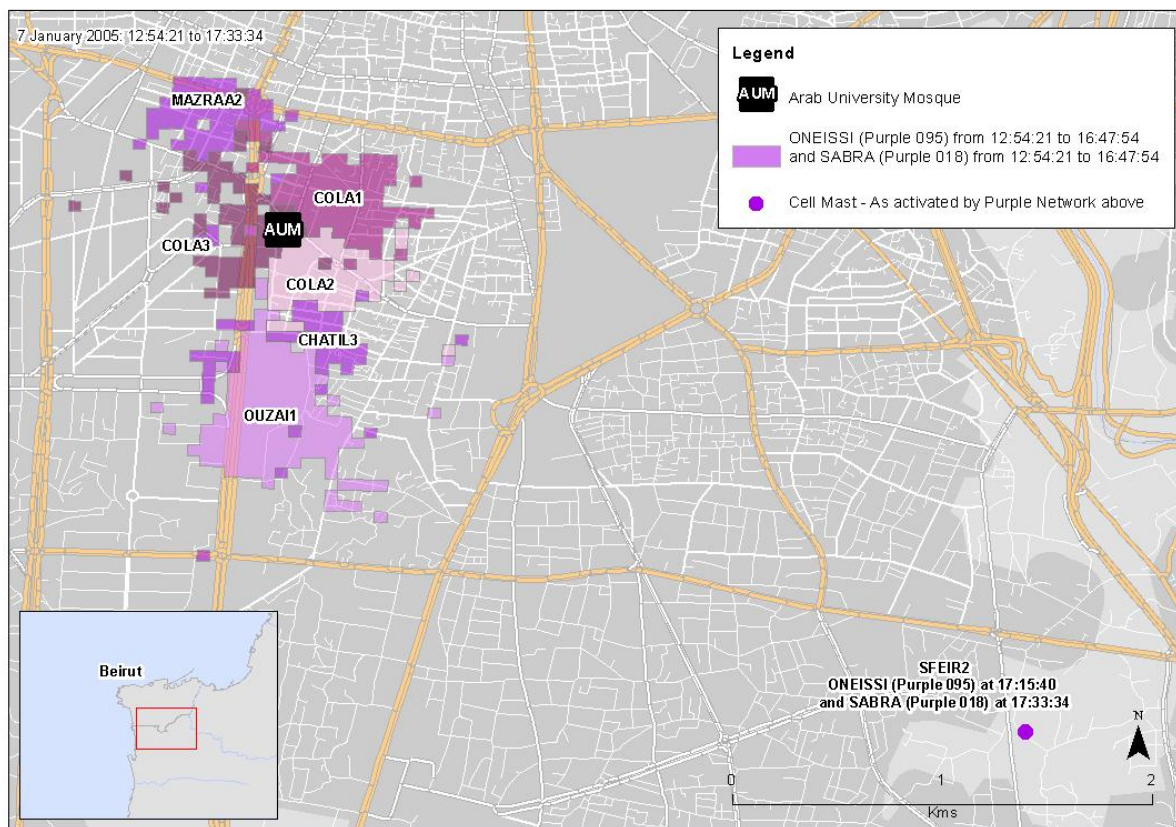

Exhibit P1783 (Expert report of Gary Platt – Chronology), Map 57

Purple 095 and Purple 018, Mosque, 7 January 2005 (12:54 to 17:33)

5223. This was the last day when Purple 018 activated any of the COLA cells.⁹⁹⁹⁴ Mr Platt concluded, as demonstrated in the graph below, that the frequency of calls between Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 increased during the 'COLA phase' and the sudden intensity of contacts coincided with their call activity around the mosque.⁹⁹⁹⁵

⁹⁹⁹⁴ Exhibit P1221, pp 283 and following; Gary Platt, T. 9 February 2017, pp 26, 29-30; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 572. *See also* exhibit P1782, para. 499.

⁹⁹⁹⁵ Gary Platt, T. 7 February 2017, pp 58-59, 66-68. *See also* exhibit P1793, slides 444-448, exhibit P1934 (Corrected Chronology PowerPoint slides regarding the Purple mobiles), slide 9.

Contact between Purple 018 (Sabra) and Purple 095 (Oneissi) Correlates with Purple 018 (Sabra) and Purple 095 (Oneissi) COLA Activations

Exhibit P1793 (Chronology PowerPoint presentation – 20 December 2004 to 31 December 2004), slide 448

5224. Mr Platt accepted that during the COLA activation periods on **Wednesday 29, Thursday 30, Friday 31 December 2004 and Monday 3 January 2005**, Mr Oneissi's Purple 095 did not activate the COLA cells immediately before or after the noon or dusk prayer.⁹⁹⁹⁶

5225. Moreover, he agreed, both in his report and in his testimony, that activation of the COLA cells does not establish precisely where the person holding the mobile was; it can only show presence in the general area of activation.⁹⁹⁹⁷ He also accepted that a gap of twenty to sixty minutes

⁹⁹⁹⁶ Gary Platt, T. 23 March 2017, pp 83-85, T. 24 March 2017, pp 9-10; exhibits 4D329, 4D332-4D334. Prayer times for December 2004 and January 2005 are listed in the open source material referred to in footnote 9917, and are set out for the relevant days in the tables prepared by the Trial Chamber at paragraphs 5285, 5287, 5289-5290 below.

⁹⁹⁹⁷ Gary Platt, T. 24 March 2017, pp 11-12, 35-36; exhibit 4D321 (COLA cells coverage and distance from COLA cell mast); exhibit 4D337 (Google Earth satellite photo with coverage of MAZRAA2, COLA3, COLA2, OUZAI1).

between calls activating the same cells would provide sufficient time for a mobile to have travelled elsewhere and returned to connect to that cell.⁹⁹⁹⁸

(b) Submissions

5226. In opening the case against the initial four Accused, Mr Ayyash, Mr Badreddine, Mr Oneissi and Mr Sabra, the Prosecution submitted that the three Purple mobiles, while not being a closed network, conformed to a calling pattern very similar to that of the Green mobiles and the three initial Blue mobiles.⁹⁹⁹⁹ It did not, however, present any evidence that the calls between the Purple mobiles followed an open triangle pattern, like that of the Green network, and did not, in its final trial brief, reiterate what was stated to this effect in opening the case.

5227. Prosecution lead counsel stated in his opening that ‘Mr Merhi would call Mr Sabra and vice versa. The same between Mr Merhi and Mr Oneissi, but virtually no calls between Mr Sabra and Mr Oneissi. Those call patterns changed significantly in late December’.¹⁰⁰⁰⁰ Later, in opening the case against Mr Merhi, he added that the call between Mr Oneissi and Mr Sabra, who was in Tripoli on 24 December 2004, represented a ‘break in their calling protocol after adherence for five weeks’, and that this ‘must have been for something of significance, i.e., for Mr. Oneissi to tell Mr. Sabra about Abu Adass’.¹⁰⁰⁰¹

5228. At the end of the case, the Prosecution submitted that the Purple mobiles used the COLA cells, which provided coverage of the Arab University Mosque area, in an extraordinary fashion over the ten-day period when ‘Mohammed’ was approaching candidates in the mosque—from Wednesday 29 December 2004 until Friday 7 January 2005.¹⁰⁰⁰² During the ten-day ‘COLA phase’ there was a ‘dramatic increase in contact’ between Purple 095 and Purple 018.¹⁰⁰⁰³ The Prosecution

⁹⁹⁹⁸ Gary Platt, T. 23 March 2017, pp 45-46.

acknowledges, however, that some caution must be exercised in relation to the call data before 1 August 2004, because cell data from then was only available for outgoing calls.¹⁰⁰⁰⁴

5229. Mr Sabra's Purple 018 and Mr Oneissi's Purple 095 connected to Alfa's COLA cells *in the immediate vicinity* of the mosque on nine days between Wednesday 29 December 2004 and Friday 7 January 2005, concurrently with 'Mohammed's' presence in the same mosque and the selection of Mr Abu Adass.¹⁰⁰⁰⁵ On each day, the mobile using the COLA cells also had contact with Mr Merhi's Purple 231 while in the mosque area, shortly before or after.¹⁰⁰⁰⁶ The Prosecution submitted that the mobile usage in this period was exceptional. First, the Purple mobiles were not usually in the COLA area. Second, Mr Sabra's Purple 018 and Mr Oneissi's Purple 095 exchanged an unusually high number of calls.¹⁰⁰⁰⁷ And third, Mr Merhi and Mr Badreddine were in contact after a hiatus.¹⁰⁰⁰⁸

5230. Relying on Mr Platt's expert report, the Prosecution explained that sixteen Alfa cells served the area around the mosque, within a 500-metre radius of it. The COLA cell was the closest, less than a hundred metres away, and COLA3's azimuth pointed directly to, and extended over, the surrounding vicinity, including the Abu Adass family home.¹⁰⁰⁰⁹

5231. The 'COLA phase' also coincided with broader developments in the conspiracy, namely the establishment of the Red network¹⁰⁰¹⁰ and the surveillance of Mr Hariri on Tuesday 21 December 2004 when he met Mr Nasrallah.¹⁰⁰¹¹

5232. The Prosecution submits that the 'COLA phase' also coincided with the shutdown of the Yellow network between Thursday 30 December 2004 and Friday 7 January 2005, 'as operational security was tightened in anticipation of an advance in preparations for the assassination'.¹⁰⁰¹² Within this context, Yellow 425 called Mr Sabra's Purple 018 on 4 January and then Mr Ayyash's

¹⁰⁰¹² Prosecution final trial brief, para. 611.

Yellow 294 the same afternoon. In the Prosecution's view, these events confirm the connection between the Purple mobiles' false claim and the conspiracy.¹⁰⁰¹³

5233. The Merhi Defence submits that no reliable inferences can be drawn from the behaviour of the Purple mobiles during the 'COLA phase', as the cell data from before 1 October 2004 is incomplete. It argues that it is therefore impossible to establish that the activity of the Purple mobiles was exceptional during a 'COLA phase' period, when the data for the remainder of their attribution period is incomplete.¹⁰⁰¹⁴

5234. It also argues that throughout the amended consolidated indictment period, neither Purple 231 nor Green 071 activated cells near the mosque and that the activity of the other two Purple mobiles around the mosque was not exceptional.¹⁰⁰¹⁵ This was also so considering that Purple 095 had activated one of the COLA cells and neighbouring cells on a few occasions in 2004, including during a call to Purple 231, and that Purple 018 also activated cells covering this area before 2004.¹⁰⁰¹⁶

5235. The Merhi Defence points to absence of contacts between Purple 231 and the other Purple mobiles during the 'COLA phase', when on the Prosecution's case 'Mohammed' met Mr Abu Adass, for example on Wednesday 5 January 2005. Similarly, there is 'weak' call data evidence in relation to Mr Merhi's alleged activity on Friday 7 January 2005, the date that the Prosecution believed the 'Mohammed' meeting occurred.¹⁰⁰¹⁷

5236. To establish that the activity of those mobiles was unique in that ten-day period, the frequency of COLA cell activations throughout the entire period that the mobiles were used should be known. Instead, for 82 per cent of Purple 095 attribution's period the data is incomplete.¹⁰⁰¹⁸ The incompleteness of the telecommunications data also means that the Prosecution cannot draw inferences about the reasons for the calls between the Purple mobiles.¹⁰⁰¹⁹ Specifically, the Merhi Defence points out that:

¹⁰⁰¹³ Prosecution final trial brief, paras 611-612.

¹⁰⁰¹⁴ Merhi Defence final trial brief, paras 494-501.

¹⁰⁰¹⁵ Merhi Defence final trial brief, paras 492, 494-497.

¹⁰⁰¹⁶ Merhi Defence final trial brief, para. 497.

¹⁰⁰¹⁷ Merhi Defence final trial brief, paras 502-503.

¹⁰⁰¹⁸ Merhi Defence final trial brief, para. 499. The attribution period was 9 January 2003 until 16 February 2005.

¹⁰⁰¹⁹ Merhi Defence final trial brief, paras 500-502.

Between 15 June 2002 and 14 February 2005, Purple 018 and Purple 231 exchanged 209 calls and seven SMSs. For almost 50% of these calls, the cell data is not available. The same is true for Purple 095, since it had 195 phone exchanges with Purple 231, including six SMSs. For 71 of those 195 exchanges, there is no cell data. It is impossible therefore to know the number of calls, apart from the one on 30 April 2004, between Purple 231 and Purple 018 and Purple 095 when the users were situated in COLA.¹⁰⁰²⁰

5237. The Oneissi and Sabra Defence also challenge Mr Platt's methodology in respect of the Alfa cells. Mr Platt, according to the Oneissi Defence, used misleadingly expansive terminology such as 'in the vicinity of', and 'consistent with' in his cell site analysis.¹⁰⁰²¹ He also expressly acknowledged that Alfa predictions were only sixty to seventy percent accurate.¹⁰⁰²² The Sabra Defence similarly points to limitations to the best coverage prediction and argues that Mr Platt is not a cell site expert.¹⁰⁰²³ Both also point to the general limitation accuracy of sixty to seventy per cent of the predicted best server coverage area.¹⁰⁰²⁴

5238. The Oneissi Defence submits that Mr Platt did not attempt to verify the reliability and authenticity of the Alfa telecommunications evidence by conducting site visits to the cell area.¹⁰⁰²⁵ Even if Mr Oneissi had been in the mosque area, this could have been for non-criminal purposes, and the Prosecution failed to conduct adequate investigations into whether Mr Oneissi had any link to the Tariq-El-Jdideh area.¹⁰⁰²⁶ Further, the Prosecution failed to prove that the presence of Purple 095 in the area was exceptional.¹⁰⁰²⁷

5239. There was also nothing exceptional about the contacts between the Purple mobiles and the so-called Purple associates.¹⁰⁰²⁸ In fact, the personal contacts between these numbers significantly predates the period of alleged criminal activity.¹⁰⁰²⁹ Additionally, Purple 095's activations of the

¹⁰⁰²⁷ Oneissi Defence final trial brief, paras 189-195.

¹⁰⁰²⁸ Oneissi Defence final trial brief, paras 196-198.

¹⁰⁰²⁹ Oneissi Defence final trial brief, para. 198.

COLA cells were generally infrequent and sporadic.¹⁰⁰³⁰ Purple 095's movements also do not corroborate the evidence of Witness 87,¹⁰⁰³¹ or the witness who met 'Mohammed' in the mosque, in terms of the timing of the meetings there.¹⁰⁰³²

5240. Purple 095 did not activate the COLA cells on the day that 'Mohammed' was supposed to be in the mosque.¹⁰⁰³³ This was during the noon prayer on a Monday of the first or second week of January 2005, namely on either 3 or 10 January 2005,¹⁰⁰³⁴ and either at 11:00 or at 13:00 on the following Wednesday 5 or 12 January when the witness made arrangements to meet 'Mohammed' at the mosque.¹⁰⁰³⁵

5241. In addition, the number of COLA activations that appear to involve private conversations with Mr Oneissi's family members is utterly inconsistent with the Prosecution allegation that he was in the midst of executing a crucial part in the assassination plot.¹⁰⁰³⁶

5242. Similarly, the Oneissi Defence argues that the cell site data is incomplete and that therefore the Prosecution's inferences that the Purple activity was exceptional are speculative.¹⁰⁰³⁷

5243. Furthermore, the 'fact that cell site analysis is not a sufficiently reliable way to determine the physical location of a mobile was plainly demonstrated' in relation to Witness 115's call data records.¹⁰⁰³⁸ As an example, the Oneissi Defence refers to the evidence showing that Witness 115 was under the tree on Monday 14 February 2005 while his mobile was connecting to an adjacent cell. It points out that on the basis of the call data records and the theoretical coverage alone, 'it would have been impossible to discern that on the two occasions that PRH115's mobile activated Bashoura_A, he was not physically located within the theoretical coverage of the cell, but roughly 300 metres away.' Moreover, the call data records 'seemed to indicate that he had moved from

¹⁰⁰³⁰ Oneissi Defence final trial brief, paras 210-234, 237. In this respect, the Oneissi Defence challenges the Prosecution's submissions about Purple 095's activations on 22, 29, 30 and 31 December 2004 and 3 and 7 January 2005.

one area to another, when in fact he was stationary'.¹⁰⁰³⁹ It also disputed the Prosecution's contention that this represented 'exceptional circumstances' pointing out that the Prosecution had provided nothing to support this.¹⁰⁰⁴⁰

5244. The Sabra Defence also argues that the COLA cells are subject to modelling issues, which were not included in the generations of the predicted coverage. These are first, that the COLA cells appear to have been situated on the top of multi-storey buildings, making it possible that someone using a mobile at the base of the COLA cell site would not activate that cell. Second, the coverage maps only reflect the ground level predictions, which may not accurately reflect usage from upper storeys. Third, due to the location of the cells, COLA1's and COLA 3's signals can propagate to locations potentially distant from the mosque.¹⁰⁰⁴¹

5245. Further, the cell site analysis underpinning the behavioural profiling of the Purple mobiles had no objective basis. The Prosecution also fails to consider reasonable alternatives for the presence of Purple mobiles in Tariq-El-Jdideh, in Beirut.¹⁰⁰⁴² For example, the Prosecution fails to take into consideration Purple 018's contacts, seven of which were unattributed, that had a history of activating COLA cells between September 2004 and March 2005, thus providing an innocent reason for Purple 018 to activate COLA cells.¹⁰⁰⁴³

5246. The Sabra Defence also presented the Trial Chamber with its analysis of the cell activation of six mobiles that in its view presented behavioural similarities with Purple 018. It argues that these, as they were termed, 'Purple-alike' mobiles' cell utilisation also 'reflects precisely the essential elements' of the identification operation,¹⁰⁰⁴⁴ which shows that the 'essential elements' identified by the Prosecution are not demonstrative of guilt.¹⁰⁰⁴⁵ Other mobiles exhibited similar behaviour to the Purple mobiles. For example, the activations of one, mobile 027, of the COLA

¹⁰⁰³⁹ Oneissi Defence final trial brief, paras 150-151, referring to exhibit 4D360 (Purple activity amongst Al Jazeera SMS exchanges re collecting the tape from the tree: 15:53-15:55).

cells peaked in December 2004 and January 2005.¹⁰⁰⁴⁶ Two graphs below—prepared for court presentation by the Sabra Defence—illustrate this:

Exhibit 5D348 (PowerPoint presentation ‘Phone numbers with cell site activities similar to Purple 018’), slide 14

¹⁰⁰⁴⁶ Exhibit 5D530 (Call sequence table of mobile 027).

027: COLA activations (1 September 2004 – 16 February 2005)

1DT5-2615(RED)

Exhibit 5D348 (PowerPoint presentation 'Phone numbers with cell site activities similar to Purple 018'), slide 15

5247. Furthermore, mobile 027 was active near a payphone on Monday 14 February 2005, connecting to TAHAN1 at 14:20, one minute after the first call to Al-Jazeera.¹⁰⁰⁴⁷ It was also inactive on Sunday 16 January 2005, just like the Purple mobiles.¹⁰⁰⁴⁸

5248. The Sabra Defence presented evidence of five other mobiles that similarly had peak COLA cell activations in December 2004 and January 2005, connected to cells near the payphones on 14 February and or were inactive on 16 January 2005.¹⁰⁰⁴⁹ The graph below provides an overview of this:

¹⁰⁰⁴⁷ Exhibit 5D530, p. 24.

Exhibit 5D348 (PowerPoint presentation ‘Phone numbers with cell site activities similar to Purple 018’), slide 88

5249. Mr Platt testified that in his understanding the Lebanese investigating authorities may have considered these six mobiles when surveying cell activations around the tree and payphones but ultimately focused on the Purple mobiles because—in contrast to these six mobiles—the Purple mobiles were in contact with one another and ceased activity by 16 February 2005.¹⁰⁰⁵⁰

5250. According to the Sabra Defence, the sudden and unusual use of the COLA cells by the Purple mobiles during the ‘COLA phase’ cannot conclusively establish that their presence in the area was directly connected with the preparation of Mr Abu Adass’s abduction.¹⁰⁰⁵¹

5251. Similarly, the Prosecution failed to consider reasonable alternatives for the elevated contact frequency between Purple 018 and Purple 095 during the ‘COLA phase’. Furthermore, there was a history of significant contact between Purple 018 and Purple 095 predating this phase; there were 36 contacts between the two mobiles between January 2003 and November 2004, meaning that the new patterns of communication were not unusual.¹⁰⁰⁵²

¹⁰⁰⁵⁰ Gary Platt, T. 6 April 2017, pp 102-103.

¹⁰⁰⁵¹ Sabra Defence final trial brief, para. 615.

¹⁰⁰⁵² Sabra Defence final trial brief, paras 616-618.

5252. The Sabra Defence also submits that the allegation that the Yellow network shut down on the grounds of tightened operational security is inconsistent with the open usage of mobiles in the ‘COLA phase’.¹⁰⁰⁵³ Similarly, the call between Yellow 425 to Purple 018, on Tuesday 4 January 2005, is anomalous and illogical ‘in the context of the alleged tightening of operational security’ and ‘following the initial phase of the conspiracy’. It is illogical that a semi-covert network which had ‘maintained strict discipline in inter-network contact throughout the operation, yet is deemed to be a security risk, would breach discipline at this supposedly critical point to contact a **Purple-Phone**’.¹⁰⁰⁵⁴

5253. The Sabra Defence argues that the incompleteness of the cell site data before 1 August 2004, substantially limits the inferences that can be drawn. In particular, by 15 August 2004, start-cell data for 4,630 mobile activities is missing, which accounts for 63 per cent ‘of concurrent activities’ meaning that the ‘Prosecution cannot therefore exclude that **Purple-018** connected to cells in that area during one of these many calls’.¹⁰⁰⁵⁵

(c) Findings

5254. The Trial Chamber, as noted, cannot find beyond reasonable doubt either that Mr Abu Adass met a person named ‘Mohammed’ in the Arab University Mosque, nor that the person who claimed to be the ‘Mohammed’ there was Mr Oneissi. The Trial Chamber is not satisfied of the reliability of the Prosecution evidence used to establish that Mr Oneissi was the ‘Mohammed’ encountered in the mosque, and most specifically its intended and pleaded identification evidence. The Trial Chamber has disregarded this in assessing whether there is any evidence capable of proving that material fact.¹⁰⁰⁵⁶ Even if proof beyond reasonable doubt for these facts, however, is not required, the intermediate and ultimate result would remain unchanged.

i. Whether the Prosecution has proved that Mr Oneissi was ‘Mohammed’

5255. To a large extent the Prosecution case theory of Mr Merhi’s, Mr Oneissi’s and Mr Sabra’s involvement in the plot to kill Mr Hariri relied upon proof that Mr Oneissi was ‘Mohammed’ as

¹⁰⁰⁵³ Sabra Defence final trial brief, paras 534-535.

¹⁰⁰⁵⁴ Sabra Defence final trial brief, paras 540-542.

¹⁰⁰⁵⁵ Sabra Defence final trial brief, paras 600-601.

¹⁰⁰⁵⁶ See para. 5082.

the lynch pin for proving his and Mr Sabra's involvement in the telephone calls to Al-Jazeera and Reuters on Monday 14 February 2005.

5256. The evidence intended to prove this, as is detailed above, was the combination of the presence of Mr Sabra's attributed personal mobile Purple 018 and Mr Oneissi's Purple 095 near the mosque in tandem with testimony from Witness 56, Witness 87, Mr Ramadan and the witness who met a 'Mohammed' in the mosque in early January 2005. The evidence identifying Mr Oneissi as 'Mohammed' was supposed to buttress these other pieces of evidence. The Prosecution's pleadings and opening statements reiterated that Mr Oneissi acted as 'Mohammed'. The Trial Chamber—for the reasons described above at paragraphs 5060 to 5082 above—has disregarded the photo board identification as reliable evidence in assessing whether Mr Oneissi was 'Mohammed'.

5257. The combination of this evidence—together with the Purple mobiles' activations on the afternoon of Monday 14 February—*might* have allowed the Trial Chamber to draw the necessary inferences that they were responsible for making the calls to the news agencies. However, without the evidence of their pleaded participation in the 'Mohammed' story—and by extension Mr Abu Adass's disappearance—their only connection to the conspiracy was Mr Oneissi's Purple 095's and Mr Sabra's attributed Purple 018's presence, at various times, at locations 'near' the payphones, and the tree, on the afternoon of 14 February 2005. And additionally, 'near' the Arab University Mosque in December 2004 and January 2005.

5258. Once the main evidence linking Mr Oneissi with 'Mohammed' is eliminated from consideration, the Prosecution's case against the three Accused considerably weakens. The obvious question follows of how this diminished evidence could be sufficient to establish proof beyond reasonable doubt that they made the calls, were present near the tree at the relevant time and, additionally, knew that they were to participate in this *before* the explosion at around 12:55 on 14 February 2005. Their pleaded criminal responsibility requires their awareness of this.

5259. The evidence shows that Mr Oneissi's Purple 095 was, to use Mr Platt's terminology, 'in the vicinity' of the mosque on Wednesday 29, Thursday 30 and Friday 31 December 2004, and on Monday 3 and Friday 7 January 2005—in the sense of connecting to nearby cells. A witness also

described meeting a ‘Mohammed’ in the mosque, either on Monday 3 or Monday 10 January 2005, around the noon prayer time.

5260. The mobile Purple 018, used by Mr Sabra and his wife, was ‘near’ the mosque on Thursday 30 and Friday 31 December 2004, and on Saturday 1, Monday 3, Tuesday 4, Wednesday 5, Thursday 6 and Friday 7 January 2005. This mobile was activating cells in this area more often than Mr Oneissi’s Purple 095 and for longer periods.

5261. In his two opening statements, the Prosecution’s lead counsel pointed to the activations by Mr Oneissi’s Purple mobile of cells in the mosque area in December 2004 and January 2005. He stated that ‘when all the evidence is considered in its totality’, it proves that Mr Oneissi was ‘Mohammed’.¹⁰⁰⁵⁷

5262. In oral closing arguments, Prosecution counsel similarly submitted that other evidence also provides ‘some indication that Mr. Oneissi was Mohammed’.¹⁰⁰⁵⁸ Counsel argued that his Purple mobile usage patterns ‘to a large extent, match’ Witness 56’s evidence on when ‘Mohammed’ appeared in the mosque area and disappeared from it twice, each time for one week, before leaving with Mr Abu Adass. The Prosecution also pointed to Purple 095’s ‘heavy COLA cell use’ on Wednesday 22 December 2004, and then ‘again a week later and again on the 7th of January’, with only a ‘two further days’ of use in between.¹⁰⁰⁵⁹

5263. As is explained above, the Trial Chamber has been unable to find that Mr Abu Adass met a person named ‘Mohammed’ in the mosque. It has only concluded that a witness met someone named ‘Mohammed’ there in early January 2005, that this person asked the witness to teach him how to pray and the witness pointed at nearby Mr Abu Adass as someone who was better suited to teach this ‘Mohammed’ how to pray.¹⁰⁰⁶⁰ According to the witness, this occurred either on Monday 3 or 10 January 2005, during the noon prayer.

5264. The Trial Chamber finds that Mr Oneissi’s Purple 095’s presence ‘in the vicinity’ of the mosque on Monday 3 January 2005—which on the evidence is one of the two possible dates for

¹⁰⁰⁵⁷ Prosecutor’s opening statement, T. 16 January 2014, pp 104-105 (Mr G. Cameron); Prosecutor’s opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 50-51 (Mr G. Cameron).

¹⁰⁰⁵⁸ Prosecution closing submissions, T. 14 September 2018, p. 67.

¹⁰⁰⁵⁹ Prosecution closing submissions, T. 14 September 2018, p. 68.

¹⁰⁰⁶⁰ See paras 4967-4990.

the encounter—after the start of the afternoon prayer, is insufficient, of itself, to establish beyond reasonable doubt that Mr Oneissi was ‘Mohammed’. This is so even when considering this piece of evidence together with the totality of the Purple mobiles’ activity during the so-called ‘COLA phase’, on the day of Mr Abu Adass’s disappearance, Sunday 16 January—or more precisely their inactivity then—or on Monday 14 February 2005. The evidence does not establish how long Mr Oneissi was there for, and moreover, 32 minutes after activating the CHATIL1/COLA2 cells, he was back in southern Beirut, in the area of SFEIR3.

5265. The Trial Chamber has also found Witness 56’s account on Mr Abu Adass’s meeting with a ‘Mohammed’, either on its own or when considered with other evidence, insufficiently reliable to be probative.

5266. In its final trial brief, the Prosecution acknowledges that Witness 56’s evidence is ‘somewhat inconsistent’ regarding when Mr Abu Adass met ‘Mohammed’. While outlining these inconsistencies, it describes them as ‘not surprising given the span over five years’ between the first and last statements.¹⁰⁰⁶¹ The Prosecution notes that in an early statement, Witness 56 described Mr Abu Adass meeting ‘Mohammed’ one week before his disappearance. The Prosecution is apparently relying on one version of this witness’s account that ‘Mohammed’ disappeared twice, each time for one week, before Mr Abu Adass left home on 16 January 2005.

5267. The Trial Chamber accepts that witness accounts often vary with retelling. But even if Witness 56 had given a consistent account, the Trial Chamber could not conclude—based only on: Mr Oneissi’s Purple 095 twice activating the COLA cells on Wednesday 22 December 2004, not activating them for a week, doing so again three times on Wednesday 29, three times on Thursday 30 December and once on Friday 31 December 2004, and then again once on Monday 3 and eleven times on Friday 7 January 2005—that Mr Oneissi was ‘Mohammed’.

5268. Further, as it is clear from its submissions, the Prosecution does not argue that, of itself, Mr Oneissi’s Purple mobile pattern of use could prove Mr Oneissi’s identification as ‘Mohammed’. It merely describes this as something providing support to Mr Oneissi being ‘Mohammed’.¹⁰⁰⁶² The Trial Chamber, however—for the reasons described above—has

¹⁰⁰⁶¹ Prosecution final trial brief, paras 522-523.

¹⁰⁰⁶² Prosecution closing submissions, T. 14 September 2018, p. 68.

disregarded the photo board identification as reliable evidence in assessing whether Mr Oneissi was ‘Mohammed’.

5269. Thus, the evidence of Mr Oneissi’s Purple mobile use during the ten-day ‘COLA phase’, including whether it had not previously frequented the mosque area, or whether the communications between Purple 018 and Purple 095 were exceptional, could not establish beyond reasonable doubt that Mr Oneissi was ‘Mohammed’. This is so even when taken with the evidence of the Purple mobiles’ call activity when Mr Abu Adass disappeared, and on the afternoon of Monday 14 February 2005, which is analysed in detail below at paragraphs 5566 to 5609.

5270. The Prosecution, at the end of the case, submitted that the Trial Chamber need not establish the precise identity of the ‘Mohammed’ who lured Mr Abu Adass away from his family, and that determining whether Mr Oneissi acted as ‘Mohammed’ ‘is not dispositive of ONEISSI’s involvement in the “Mohammed” deceit’. According to the Prosecution, however, ‘the evidence establishes that ONEISSI was intimately involved in multiple aspects of the overall plot, regardless of whether he was the person who interacted personally’ with Mr Abu Adass.¹⁰⁰⁶³

5271. As explained above,¹⁰⁰⁶⁴ the Trial Chamber has considered whether Mr Oneissi could still be convicted for the crimes charged, even where the Trial Chamber was not satisfied beyond reasonable doubt that he was ‘Mohammed’, if the Prosecution could establish beyond reasonable doubt other material facts supporting the relevant charges.

5272. With regard to its specific allegations on the selection and recruitment of Mr Abu Adass as a scapegoat, the Prosecutor has never pleaded that Mr Sabra, or someone else, pretended to be ‘Mohammed’ or approached someone in that capacity.¹⁰⁰⁶⁵ His pleading is that Mr Oneissi called himself ‘Mohammed’ to approach and interact with Mr Abu Adass.¹⁰⁰⁶⁶ This is distinct from the Prosecution’s case on the calls to Reuters and Al-Jazeera on Monday 14 February 2005, where it

¹⁰⁰⁶³ Prosecution final trial brief, para. 518.

¹⁰⁰⁶⁶ Amended consolidated indictment, para. 23; Prosecution’s updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), paras 122-124; Prosecution pre-trial submissions (Merhi case), annex A, para. 113.

is alleged that three out of the four calls on that day were made either by Mr Oneissi or Mr Sabra, and the other one by Mr Sabra.

5273. What the Prosecution has described as the “‘Mohammed’ deceit” was centred on the pleaded allegation that Mr Oneissi was ‘Mohammed’. The Prosecutor did not plead in the alternative that anyone else—either Mr Sabra or a third person—acted as ‘Mohammed’ to lure Mr Abu Adass to make the video. The Prosecution included both Mr Sabra’s and Mr Oneissi’s photographs in the photo boards used in an attempt to identify the ‘Mohammed’ seen in the mosque. No witness identified Mr Sabra.

5274. In any event, the issue of whether Mr Sabra could have been ‘Mohammed’ does not arise as the evidence is incapable of proving beyond reasonable doubt that either Mr Sabra or Mr Oneissi played the role of what the Prosecution termed the ‘Mohammed deceit’ in the mosque, or even that there was reliable evidence of the ‘Mohammed deceit’. The Trial Chamber therefore concludes that the Prosecution has not proved beyond reasonable doubt its pleaded allegation on the ‘Mohammed deceit’, namely, that Mr Oneissi acted as that ‘Mohammed’.

ii. Telecommunications evidence linking the Purple mobiles to Ahmad Abu Adass

5275. The Prosecution submits, as is noted above, that the Purple mobiles’ communications during the ‘COLA phase’ establish the involvement of the three Accused in what it calls the ‘Mohammed deceit’. This is to the extent that it coincided with the period in which Mr Abu Adass met, and later left his home with, a man calling himself ‘Mohammed’. However, once the evidence of the purported identification of Mr Oneissi as ‘Mohammed’ is taken from consideration, and the remaining evidence cannot establish that Mr Oneissi was ‘Mohammed’—or that Mr Abu Adass met a ‘Mohammed’ in the mosque—all that remains is the telecommunications evidence.

5276. The Trial Chamber therefore will consider whether, in its totality, and considering the patterns and coincidences, the telecommunications evidence is sufficient to ‘link’ Mr Oneissi and Mr Sabra with Mr Abu Adass’s presence in late December 2004 and early January 2005 in the mosque. And thus, that the users of the three Purple mobiles were involved in targeting Mr Abu Adass to use him in the video.

5277. The totality of the telecommunications evidence, purporting to show their involvement, is therefore considered in more detail below.

5278. The Trial Chamber emphasises that it has been unable to conclude that Mr Sabra was the sole user of Purple 018. However, to consider the evidence in its totality, the analysis here is proceeding on the theoretical assumption that he was using it for the calls analysed below. On ten days, namely, on Wednesday 22, Wednesday 29, Thursday 30 and Friday 31 December 2004 and Saturday 1, Monday 3, Tuesday 4, Wednesday 5, Thursday 6 and Friday 7 January 2005, Mr Oneissi's Purple 095 and Mr Sabra's attributed personal mobile Purple 018 activated cells providing a predicted best server coverage within a 500-metre radius of the mosque, either overlapping or close to prayer times.¹⁰⁰⁶⁷ The significance of this to the case is that it would have coincided with when Mr Abu Adass should have been in the mosque.

5279. Mr Platt agreed in his testimony that when activating the COLA cells, a mobile could have been physically anywhere within the 2.88 square kilometres of the area covered by those three cells.¹⁰⁰⁶⁸ This is illustrated below by exhibit 4D321, tendered by the Oneissi Defence, showing the circumference and surface area of the predicted best server coverage of the three COLA cells.

¹⁰⁰⁶⁷ Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1273, lists the cells within a 500-metre radius of the mosque; the table is extracted at paragraph 5103 above.

¹⁰⁰⁶⁸ Gary Platt, T. 24 March 2017, pp 11-12; exhibit 4D321.

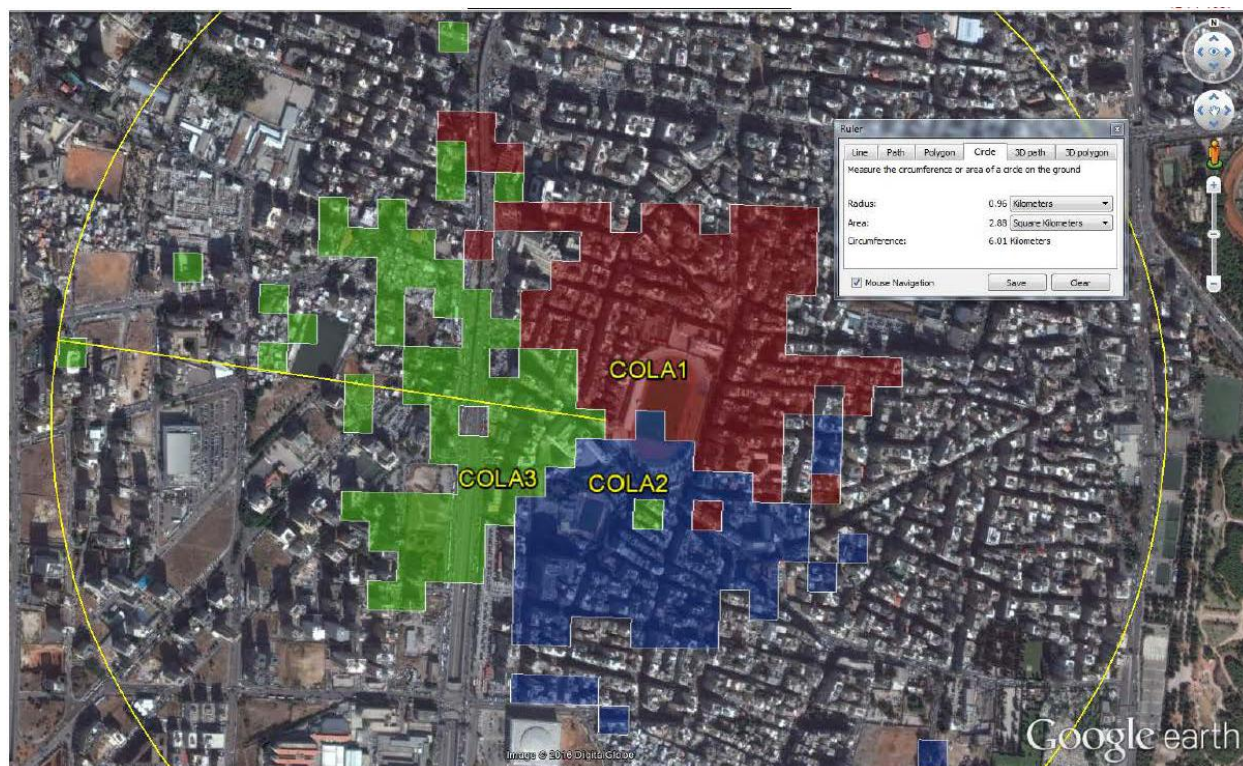

Exhibit 4D321 (COLA cells coverage and distance from COLA cell mast), p. 1

- a. Mr Oneissi's and Mr Sabra's presence 'near' the mosque around prayer times

5280. The electronic presentation of evidence software shows the approximate distances between the predicted best coverage areas of these sixteen cells and the mosque in the following table, prepared by the Trial Chamber:¹⁰⁰⁶⁹

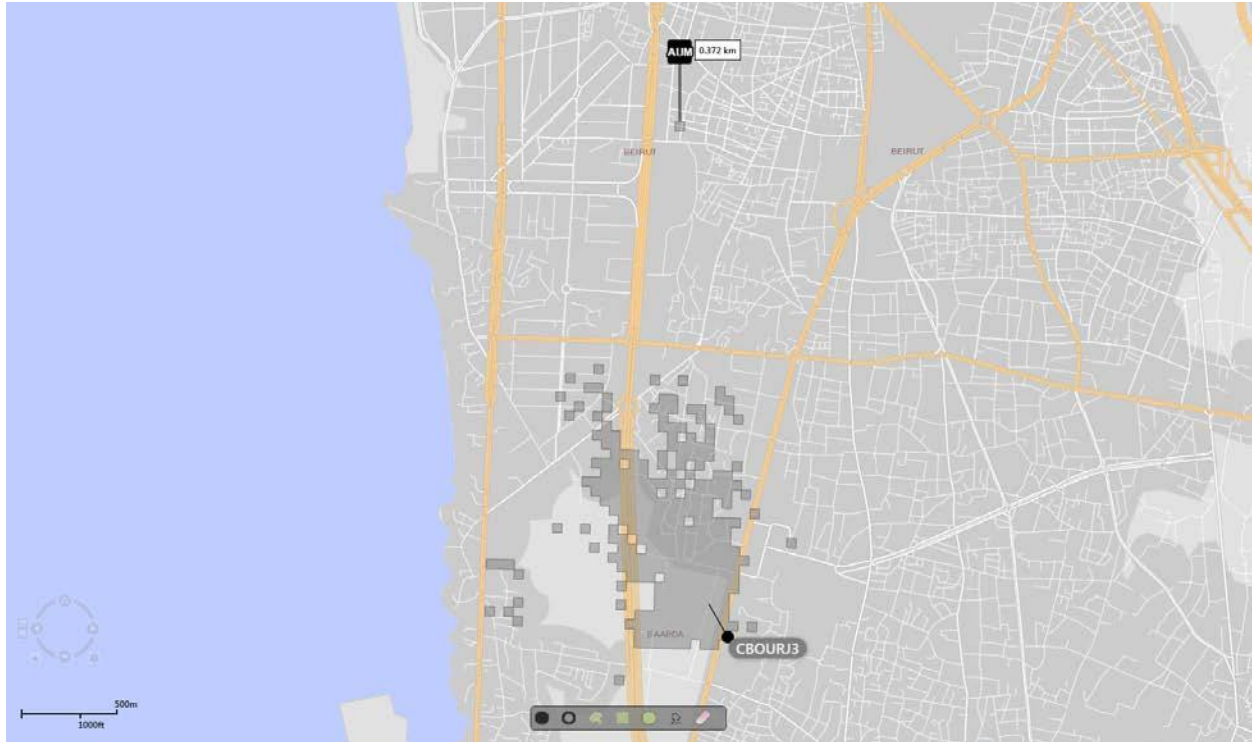

Cell	Shortest distance from Arab University Mosque (metres)	Longest distance from Arab University Mosque (metres)	Range of distances from Arab University Mosque (metres)
BHVOUT2	323	1218	895
CBOURJ3	372	3374	3002
CHATIL1	431	1183	752
CHATIL3	321	1604	1283
COLA1	45	602	557
COLA2	44	892	848
COLA3	0	873	873
MAKASS3	127	982	855

¹⁰⁰⁶⁹ Exhibit P592.1 (Electronic Presentation of Evidence software).

MAZRAA2	115	859	744
NASSER1	403	682	279
OGER2	211	1994	1783
OUZAI1	230	1442	1212
OUZAI4	185	1661	1476
PINS3	384	844	460
RAMLET1	101	1032	931
RAMLET2	214	1260	1046

5281. The predicted best server coverage area of CBOURJ3 provides the most extreme example. The extract from the electronic presentation of evidence below shows that the difference between the shortest and longest distance from the mosque varies considerably. The map shows a small pocket of predicted best server coverage around 300 metres from it. However, the cell itself is around 3.1 kilometres away and most of the predicted best coverage lies within a kilometre of the cell itself. Thus in this sense a tiny pocket of CBOURJ3's coverage is within 500 metres of the mosque, but in reality almost all of it is not. The map, created with exhibit P592.1, below, illustrates this:¹⁰⁰⁷⁰

¹⁰⁰⁷⁰ Exhibit P592.1.

Distance from the Arab University Mosque to the closest edges of CBOURJ3's predicted coverage

5282. Another extract from the electronic presentation of evidence, immediately below, shows that the distance between the mosque and the pocket of coverage the furthest away from it is 3.37 kilometres. This means that while a mobile located within around 50 metres of the mosque could theoretically connect to a pocket of CBOURJ3, so could a mobile that was around 3.3 kilometres away. Potentially this could extend further if a mobile in one of six neighbouring cells connected to CBOURJ3, rather than the best serving cell, or was redirected into one of these, or another.

Distance from the Arab University Mosque to the furthest edges of CBOURJ3’s predicted coverage

5283. The Trial Chamber notes here the issue of whether there was an overlap between the activations of the COLA cells by Mr Oneissi’s Purple 095 and Mr Sabra’s attributed Purple 018 and the prayers at the mosque. This is only to identify when the calls occurred. It does not mean that the Prosecution had to prove any such overlap to establish its case. Tables showing this are added to the text below to make it more comprehensible.

5284. On **Wednesday 22 December 2004**, Mr Oneissi’s Purple 095 was in the area of the mosque before and after the afternoon prayer at 14:16.

Prayer time	Purple 095 in area	Purple 018 in area
	14:00 COLA2	
14:16		
	15:09 COLA3	
	15:12 OUZAI1/RAMLET1	

5285. On **Wednesday 29 December 2004**, Mr Oneissi’s Purple 095 was in the area of the mosque at 15:26 and 15:27, mid-way between the afternoon and dusk prayers.

Prayer time	Purple 095 in area	Purple 018 in area
14:20		
	15:26 COLA3	
	15:27 COLA2	
16:38		

5286. On **Thursday 30 December 2004**, both Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 were in the mosque area shortly after the start of the evening prayer.

Prayer time	Purple 095 in area	Purple 018 in area
18:03		
	18:05 COLA3	
	18:09 COLA3	
	18:11 COLA3	18:11 COLA3

5287. On **Friday 31 December 2004**, Mr Sabra's attributed Purple 018 was in the mosque area before and after the noon prayer at 11:41, then at 14:09 and 14:26, while the afternoon prayer was at 14:21, and at 16:05, 34 minutes before the dusk prayer at 16:39.

		16:54 COLA3
		17:53 COLA3
18:04		
		18:35 COLA3
		19:06 COLA3

5289. On **Monday 3 January 2005**, there was no overlap, but Mr Sabra's attributed Purple 018 activated a COLA cell 27 minutes before the noon prayers and Mr Oneissi's Purple 095 did so 21 minutes after the start of the afternoon prayers at 14:23. This was on one of two possible Mondays in January 2005 when a witness encountered a 'Mohammed' in the mosque.

Prayer time	Purple 095 in area	Purple 018 in area

		12:22 OUZA13
		12:23 CBOURJ3
14:23		
	14:44 CHATIL1/COLA2	

5290. However, Mr Oneissi's Purple 095 activation of the COLA cells on **Monday 3 January** is also consistent with him driving through the area on the way home. Thirty-two minutes after the CHATIL1/COLA2 activation, Mr Oneissi was back in south Beirut, in the area of SFEIR3.

5291. On **4 Tuesday January 2005**, Mr Sabra's attributed Purple 018's activated the COLA cells in between the afternoon and dusk prayer, and five minutes after the evening prayer started at 18:06.

18:08		
		18:48 COLA3

5294. On **Friday 7 January 2005**, Mr Oneissi's Purple 095 connected to the COLA cells thirteen minutes before the noon prayer. Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 both connected to COLA cells seven minutes before the dusk prayer, which commenced at 16:45 and two minutes after, at 16:47. Both mobiles connected to relevant cells five times between 12:54 and 13:19. This was one of two possible Fridays when Witness 87 saw Mr Abu Adass in the mosque; the other was Friday 14 January, two days before Mr Abu Adass's disappearance.

	16:47 COLA2/OUZAI1	16:47 COLA2

5295. The call data records further show that, while these two Purple mobiles were in the vicinity of the mosque during the so-called 'COLA phase', they also were frequently in contact with each

other, as well as with Mr Merhi's Purple 231, which was always away from the area of the mosque, and was mostly in SFEIR3 in southern Beirut.

5296. This is the totality of the evidence 'linking' Mr Oneissi and Mr Sabra with Mr Abu Adass in the mosque, once the evidence of the purported identification of Mr Oneissi as 'Mohammed',¹⁰⁰⁷¹ is taken from consideration. Self-evidently, this evidence of itself is insufficient to show that the users of these three Purple mobiles *must have* been involved in targeting Mr Abu Adass for his role in the video. There is no probative evidence that either Accused person met him.

b. Whether the communications between the three Purple mobiles were 'exceptional'

5297. The Prosecution argues that Mr Oneissi's and Mr Sabra's presence near the mosque in December 2004 and January 2005 was 'exceptional'. The word 'exceptional'—used 74 times in the Prosecution's final trial brief, and fourteen times in relation to their presence near the mosque—is a relative term.¹⁰⁰⁷² To determine whether the presence of Mr Oneissi and the mobile used by Mr Sabra and his wife was 'exceptional', the frequency of their activations of the relevant cells before Wednesday 29 December 2004 must be compared with their connections between then and Friday 7 January 2005; namely, in the period the Prosecution has termed the 'COLA phase'.

5298. In addition, and contrary to the Prosecution's pleaded case, the Trial Chamber considers that the communication between the three mobiles was not 'exceptional' at least in the sense of their communicating with each other. The three men clearly knew each other and were in contact by mobile telephone over the years preceding the attack on Mr Hariri, that is, assuming that Mr Sabra was making these calls on the mobile that he and his wife were jointly using.

5299. In this respect, while communications between Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 had not been as frequent, the two mobiles had had contact twenty-five times over eighteen days in 2003. Their communication was certainly heightened over the period termed

¹⁰⁰⁷¹ This includes his pleaded call to Mr Abu Adass's home on Saturday 15 January 2005, which is analysed paragraphs 5359 to 5364.

¹⁰⁰⁷² Regarding their pleaded presence near the mosque, for example, *see* Prosecution final trial brief, paras 14, 76, 505-506, 535, 539-540, 543-544, 560, 731, 734, 1170, 1184.

as the ‘COLA phase’, which is indeed why the Prosecution used the terminology; and in the overall scheme of their communications, it could be viewed as ‘unusual’.

5300. The Trial Chamber has also calculated that the three mobiles had 59 connections to COLA cells and those within 500 metres of the mosque between 10 December 2001 and 22 December 2004, namely:

- **Mr Oneissi’s Purple 095**—there were 28 activations from 9 January 2003 to 22 December 2004, six times with COLA cells, and 22 times with other cells in the ‘vicinity’;
- **Mr Sabra’s attributed Purple 018**—there were 19 activations to cells in the ‘vicinity’, once in 2001, three times in 2002, once in 2003 and 12 times between April and December 2004. To COLA cells, the first time was twice in November 2004; and
- **Mr Merhi’s Purple 231**—there were eleven activations to cells in the vicinity, between August and October 2004, but never to COLA cells.

5301. The three Purple mobiles had the following 397 contacts with each other between 26 December 2002 and 22 December 2004, namely:

- 170 between **Mr Oneissi’s Purple 095 and Mr Merhi’s Purple 231**: 48 times in September and October 2004; 16 times between 1 November and 22 December 2004; 19 times in 2003 times; and 87 times in 2004 before September;
- 190 between **Mr Sabra’s attributed Purple 018 and Mr Merhi’s Purple 231**: 27 times in September and October 2004; 38 times between 1 November and 22 December 2004; twice in 2002; 61 times in 2003; and, 62 times in 2004 before September; and
- Thirty-six between **Mr Oneissi’s Purple 095 and Mr Sabra’s attributed Purple 018**: once in September and October 2004, six times between 1 November and 22 December 2004; 25 times in 2003; and, four times in 2004 before September.

5302. The Prosecution elevates the significance of the Purple mobiles’ activity in the ‘COLA phase’ by arguing that Mr Sabra using his attributed Purple 018, and Mr Oneissi using his Purple 095 were present near the mosque more frequently than usual during late December 2004 and early

January 2005. However, as the call data records are incomplete, it is difficult to ascertain how correct this is, and Mr Platt himself was cautious in this respect.

5303. Mr Platt testified that before 1 August 2004 call data records for incoming voice calls and incoming and outgoing text messages were unavailable for Alfa cells. Further, and significantly, he felt uncomfortable stating that the users were *not* near the COLA cells from 2002 until 1 August 2004. The three Purple mobiles were all on the Alfa network.¹⁰⁰⁷³ Thus, any calculation as to the frequency or infrequency of the Purple mobiles' presence *in their totality* near the mosque during the so-called 'COLA phase' is uncertain.

5304. The graph extracted from exhibit P1793, Mr Platt's chronology slides, at paragraph 5223 above, reveals a 'peak' or 'spike' in activity in contact between Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018, that coincided with their mobiles connecting to the COLA cells.

5305. Nevertheless, even assuming that Purple 018's and Mr Oneissi's Purple 095's comparative use near the mosque peaked during late December 2004 and early January 2005, such evidence would still be equivocal at best. The most it would establish—without more—is that the users of these Purple mobiles were *in the area* of the mosque far more often than usual. The incomplete call records also show that Mr Oneissi activated cells within a 500-metre radius of the mosque, including the COLA cells, 27 times between August 2003 and 22 December 2004. This effectively refutes the Prosecution's theory that Mr Oneissi and Mr Sabra conducted their activity in an area they had not previously frequented to avoid being recognised.¹⁰⁰⁷⁴

5306. The 'more' that may have established their involvement would have been Mr Oneissi's identification as 'Mohammed' and its connection with Mr Abu Adass's disappearance on Sunday 16 January 2005. However, once this is eliminated as probative evidence that can be used against him—and Mr Sabra and Mr Merhi—combined with Witness 56's evidence being admitted under Rule 158, and thus not subject to cross-examination, the Prosecution's case on what they were doing there is irretrievably weakened. The case may have been stronger had Mr Ramadan and Witness 56 testified.

¹⁰⁰⁷³ See paras 2428, 2435, 2441, 2445, 3454, 3676, 3843.

¹⁰⁰⁷⁴ Prosecution final trial brief, para. 531.

5307. Of itself and without more, there is nothing necessarily criminal about the presence of Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 in the mosque's (wider) neighbourhood. Nor about the communications between these two mobiles and with Mr Merhi's Purple 231. It is not the only reasonable inference available that Mr Oneissi's and Mr Sabra's unusual presence there, if he was using mobile 018, was linked to the targeting of Mr Abu Adass and for the purposes of the false claim of responsibility. Their presence, unusual or otherwise, may have been for other reasons relating to the mosque, the Arab University or other locations in the surrounding area.

5308. The Trial Chamber stresses that the call data records before August 2004 are incomplete, meaning that it is impossible to know how many times these mobiles connected to the COLA and adjacent cells before then. The Oneissi Defence pointed out that before 1 August 2004 'it is simply unknown which cell site was activated by 095 for 3728 out of a total of 8140 calls/SMS – i.e. no less than 46% of all of 095's' call data records.¹⁰⁰⁷⁵

5309. Significantly, the mere activation of the COLA cells cannot establish precisely whether the user of the mobile was *in* or *at* or even *outside* the mosque; it can only establish their presence in the general area of cell activation. In this respect, it is highlighted that the Oneissi Defence's calculation of an area of 2.88 square kilometres surrounding the COLA mast in which the three COLA cells offered predicted best server coverage is unchallenged.¹⁰⁰⁷⁶

5310. The call data records only reveal when a mobile connected to a particular cell. They cannot establish whether someone was in the cell sector either without their mobile or without using it. The Trial Chamber has no evidence of the frequency, or otherwise, of Mr Oneissi's and Mr Sabra's presence in the areas covered by those cells when their mobiles were not connecting to the cells. When they were there, if at all—without their mobiles connecting to cells—is simply unknowable.

5311. Further, the activation of cells in southern Beirut shortly before or after the activation of the COLA cells is consistent with Mr Oneissi driving through the area on the way to or from his home in southern Beirut. Similarly, a twenty to sixty-minute gap between calls from a mobile activating the same cells provides more than ample time for a mobile user to have left and returned

¹⁰⁰⁷⁵ Oneissi Defence final trial brief, para. 193, referring to exhibits 4D323 and 4D324.

¹⁰⁰⁷⁶ Oneissi Defence final trial brief, para. 212; *see also* exhibit 4D321, illustrating this.

to reconnect to that cell. The call data records alone cannot prove that the mobile user remained near the mosque.¹⁰⁰⁷⁷

5312. The Trial Chamber acknowledges that these (incomplete) call data records show a peak in contact between the mobiles during December 2004 and January 2005. Despite this peak, it is speculative to submit, using incomplete cell data, that Mr Oneissi's and Mr Sabra's presence, if he was using Purple 018, in the areas covered by the COLA and adjacent cells in December 2004 and January 2005 was unusual enough to be used to attribute criminal responsibility to them as part of a conspiracy. The Trial Chamber here of course recognises that this is one aspect of the Prosecution's evidence, that must be considered within the totality of the evidence led against the Accused, including what occurred on the afternoon of Monday 14 February 2005.

5313. The Prosecution also points to the calls between Mr Merhi's attributed Green 071 and Mr Badreddine's Green 023 on 6 November, 23 and 27 December 2004, and on Sunday 2, Wednesday 12, Thursday 13, Friday 14, Saturday 15, Sunday 16 January and Thursday 20 January 2005. Additionally, between 9 and 13 November 2004, Mr Merhi was in contact with Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 a number of times. On 13 November 2004, Mr Merhi called Mr Ayyash on his personal mobile 935.¹⁰⁰⁷⁸ Mr Sabra's mobile 018 contacted Mr Oneissi's mobile 095 six times on 14, 16 and 17 November 2004.¹⁰⁰⁷⁹

5314. In opening the case against Mr Merhi, the Prosecution argued that the increase in communication between Mr Sabra and Mr Oneissi and the corresponding increase in contact between Mr Merhi and Mr Sabra and Mr Oneissi is evidence that Mr Merhi 'had taken steps to assemble his team to advance the false claim of responsibility'.¹⁰⁰⁸⁰

5315. The difficulty with this, however, is that there is no evidence connecting these calls with anything related to Mr Abu Adass, the mosque, anyone called 'Mohammed', Mr Abu Adass's disappearance, the video or its making or its broadcast. And significantly, the last call between Green 071, attributed to Mr Merhi, and Mr Badreddine on Green 023 was on Monday 7 February

¹⁰⁰⁷⁷ Gary Platt, T. 23 March 2017, pp 45-46.

¹⁰⁰⁷⁸ Exhibit P527, p. 98; exhibit P1261 (Call sequence table of mobile 935), p. 77.

¹⁰⁰⁷⁹ See para. 5301.

¹⁰⁰⁸⁰ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 45-47.

2005, in circumstances which appear to be devoid of context. According to the Prosecution's opening against Mr Merhi, based on all of the evidence, at this point it can be inferred that:

there was no longer any further need for Mr Merhi and Badreddine to communicate, that the false claim of responsibility materials including the video involving Abu Adass had been prepared, and Mr Merhi and his team, including the accused Sabra and Oneissi, were ready and waiting for the moment following the assassination when they were to fulfil the final part of their role in the conspiracy.¹⁰⁰⁸¹

5316. The Trial Chamber acknowledges, as is set out below at paragraphs 5373 to 5377 and 5481 to 5483, that the most suspicious calls between the two Green mobiles occurred on the morning of Sunday 16 January 2005 around the time when Mr Abu Adass, on the Rule 158 evidence, left his home for the last time. However, without the evidence connecting Mr Oneissi and Mr Sabra to Mr Abu Adass, before or after that date—and most particularly that Mr Oneissi was 'Mohammed'—this series of calls rises to a level no higher than of coincidental suspicion.

5317. Accordingly, the Prosecution has not established beyond reasonable doubt that Mr Merhi, Mr Oneissi and Mr Sabra participated in selecting Mr Abu Adass for the video in the pleaded period of Wednesday 22 December 2004 to Friday 7 January 2005.

E. Mr Abu Adass's disappearance and surrounding events

1. Introduction—the Prosecutor's pleaded case against the three Accused

5318. Mr Merhi and Mr Oneissi are alleged, based upon the amended consolidated indictment, to have been involved in Mr Abu Adass's disappearance from his home on the morning of Sunday 16 January 2005.

5319. Regarding Mr Oneissi's role, the Prosecutor pleads that '**ONEISSI**, prior to the attack and under the coordination of **MERHI** participated in the disappearance of **ABU ADASS** for the purpose of creating a false claim of responsibility'.¹⁰⁰⁸²

5320. Of Mr Merhi's role, the Prosecutor pleaded that '**MERHI**, prior to the attack, coordinated the activities of **ONEISSI** and **SABRA** in order to identify and effect the disappearance of a

¹⁰⁰⁸¹ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 57-58.

¹⁰⁰⁸² Amended consolidated indictment, para. 3 (b).

suitable individual, **ABU ADASS**, who would be used to make a video-taped false claim of responsibility for the attack’.¹⁰⁰⁸³

5321. Mr Sabra’s role is pleaded as ‘**SABRA**, prior to the attack and under the coordination of **MERHI**, participated with **ONEISSI** in identifying a suitable individual, **ABU ADASS**, who would be used to make a video-taped false claim of responsibility to the attack’.¹⁰⁰⁸⁴

5322. The Prosecutor also alleges that Mr Abu Adass left with Mr Oneissi, posing as ‘Mohammed’, on the morning of **Sunday 16 January 2005**, pleading that ‘At about 07:00, **ABU ADASS** left his home to meet with **ONEISSI** calling himself “Mohammed”’.¹⁰⁰⁸⁵ The Prosecutor does not specifically plead that Mr Sabra was involved in Mr Abu Adass’s disappearance, which the amended consolidated indictment does not describe as an ‘abduction’; it does not allege that he was abducted.

5323. The night before the disappearance, on **Saturday 15 January 2005**, the Prosecutor pleads, ‘At about 21:00, **ONEISSI** calling himself “Mohammed” called **ABU ADASS** on his family’s landline phone at home, and the two agreed to meet early the next morning’.¹⁰⁰⁸⁶ Further, Mr Merhi coordinated Mr Oneissi’s actions, as is shown by mobile activity around the time of Mr Abu Adass’s disappearance.¹⁰⁰⁸⁷

5324. The Prosecutor’s two pre-trial briefs plead that Mr Oneissi was involved in his ‘disappearance’¹⁰⁰⁸⁸ but do not allege his abduction; rather the words ‘disappearance’ and ‘disappeared’ are used.¹⁰⁰⁸⁹ Further, Prosecution counsel, in opening the case against Mr Ayyash, Mr Badreddine, Mr Oneissi and Mr Sabra, did not allege an ‘abduction’. However, five months later in June 2014, in opening the case against Mr Merhi, whose case was joined to that of the other

¹⁰⁰⁸³ Amended consolidated indictment, para. 3 (d).

¹⁰⁰⁸⁴ Amended consolidated indictment, para. 3 (c).

¹⁰⁰⁸⁵ Amended consolidated indictment, para. 28.

¹⁰⁰⁸⁶ Amended consolidated indictment, para. 27.

¹⁰⁰⁸⁷ Amended consolidated indictment, para. 3 (d).

¹⁰⁰⁸⁸ Prosecution’s updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), paras 62, 114, 130; Prosecution pre-trial submissions (Merhi case), annex A, paras 53, 105, 121.

¹⁰⁰⁸⁹ Prosecution pre-trial submissions (Merhi case), annex A, paras 53, 105, 108, 111-112, 116, 121, 139.

four Accused in February 2014 after the trial's commencement, Prosecution lead counsel specifically and repeatedly alleged that Mr Abu Adass was 'abducted'.¹⁰⁰⁹⁰

5325. The amended consolidated indictment does not plead that Mr Sabra participated in abducting Mr Abu Adass. In relation to Mr Sabra's role, the Prosecution's lead counsel, but only in the Merhi opening statement, said 'I expect that on all the evidence it will be open to you to find that Mr. Sabra had a different role to play in arranging the abduction of Abu Adass.' Furthermore, he stated, 'I expect it will be open to you to infer on all the evidence that Mr. Oneissi and Mr. Sabra worked as a team with Mr. Merhi to arrange the abduction and later the delivery of the false claim of responsibility.'¹⁰⁰⁹¹ Some ambiguity appears to be present here as to their roles.

5326. On their respective roles, Prosecution lead counsel said that:

Mr. Oneissi's role was to befriend and gain the initial trust of Abu Adass. Mr. Sabra's role was to remain in the background and to gather information about Abu Adass and the surrounding area in preparation for his abduction on the morning of the 16th of January.¹⁰⁰⁹²

5327. The Prosecution's final trial brief, however and without the intended Prosecution evidence having changed between the opening and closing of the case,¹⁰⁰⁹³ positively asserts that Mr Abu Adass 'was abducted on 16 January 2005'.¹⁰⁰⁹⁴ In reality, though, the main difference between the opening and the final trial submissions is that the Prosecution's anticipated evidence substantially weakened at trial; Witness 56 and Mr Ramadan did not testify, and the Prosecution, at the end of the case, no longer positively asserted that a witness had identified Mr Oneissi as 'Mohammed'.

5328. Despite this, in the final trial brief, it alleges that Mr Abu Adass was abducted—using the terms 'abduction' and 'disappearance' interchangeably—but without providing facts supporting the legal elements of the crime of abduction. The words 'abducted' and 'abduction' appear over one hundred times in the brief. The final trial brief also submits that '**ONEISSI**'s use of Purple 095 and **SABRA**'s use of Purple 018 reflected their involvement in the recruitment and abduction

¹⁰⁰⁹⁰ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 39, 43-44, 50-54. (Mr G. Cameron), for example, at p. 43 referring to 'phase four' of the conspiracy, arguing that 'In this phase, Abu Adass is abducted and the video of the false claim of responsibility on all the evidence can be inferred to have been prepared.'

¹⁰⁰⁹¹ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 51-52 (Mr G. Cameron).

¹⁰⁰⁹² Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 52 (Mr G. Cameron).

¹⁰⁰⁹³ This is in the sense that the Trial Chamber received the statements of Witness 56 and Mr Ramadan under Rule 158, thereby accepting onto the trial record the evidence of the Prosecution's case in respect of what it alleged.

¹⁰⁰⁹⁴ Prosecution final trial brief, para. 778.

of ABU ADASS, under the coordination of **MERHI** using Purple 231.’¹⁰⁰⁹⁵ The Prosecution’s in-house expert on criminal networks, Mr Gary Platt, in exhibit P1782, entitled ‘Narrative overview of telephone activity and events relevant to the case for the Prosecution’, in positively asserting that Mr Abu Adass had been kidnapped used the word ‘abduct’ and ‘disappear’, respectively 27 and 13 times.¹⁰⁰⁹⁶

5329. The Prosecution, in its opening against Mr Merhi and in its final trial submissions, may have been using the term ‘abduction’ in a colloquial rather than a legal sense. Thus, the difference between ‘abduction’ and ‘disappearance’ in this respect could be terminological. The Trial Chamber also accepts that ‘effecting’ the disappearance of someone could include their abduction or kidnapping, namely, holding a person against their will.

5330. These arguments therefore probably do not relate to a material fact, proof of which is essential to a conviction, but rather to a fact in a chronology of events, namely that Mr Abu Adass left his home at the behest of the Accused. In this sense, the manner in which Mr Abu Adass left his home and came to be at the location of the filming of the video is not necessarily a material fact. The elements of the crimes with which the Accused are charged concern the taping of the claim of responsibility and its dissemination in four payphone calls on Monday 14 February 2005. How Mr Abu Adass came to the location of the video is evidence of the pleaded material facts, rather than a material fact. Conversely, the actual video-taping of the claim of responsibility could be a material fact against the Accused if they were involved in its production, or more to the point, if there was any evidence of this.

5331. The Prosecution’s final trial brief also attributes some roles and call activities—of Mr Merhi’s, Mr Oneissi’s and Mr Sabra’s mobiles—relating to Mr Abu Adass’s disappearance in early to mid-January 2005, similar to those pleaded in the amended consolidated indictment.¹⁰⁰⁹⁷

5332. On Mr Sabra’s role, the Prosecution urges the Trial Chamber to make findings on his involvement in Mr Abu Adass’s disappearance from the following categories of evidence. These are, first, Mr Sabra’s Purple mobile 018’s unusual use in the vicinity of the Arab University

¹⁰⁰⁹⁵ Prosecution final trial brief, para. 9. *See also* paras 1183, 1184.

¹⁰⁰⁹⁶ His *aide-memoire*, exhibit P1780 (Chronology of relevant events), used ‘abduction’ nine times.

¹⁰⁰⁹⁷ Prosecution final trial brief, paras 504-505 (iii)-(vii), 549-559, 593, 599, 759-760, 762-781, 1170-1172, 1777-1178, 1183-1185; Prosecution closing submissions, T. 14 September 2018, pp 18-19, 21, 24-25, 65-72.

Mosque in late December 2004 to early January 2005, before Mr Abu Adass's 'abduction'. Second, there are the Green and Purple hierarchical calls from Wednesday 12 January to Saturday 15 January 2005. And, third, there is the inactivity of the Purple mobiles, including Mr Sabra's Purple 018, on Sunday 16 January 2005, the day of Mr Abu Adass's 'abduction'.¹⁰⁰⁹⁸

5333. The Trial Chamber, however, is not prepared to make a finding that Mr Sabra was directly involved in some way in Mr Abu Adass's alleged 'abduction' on Sunday 16 January 2005 in the absence of a pleading to that effect providing notice to the Defence and positive evidence from which it could draw such a conclusion. The second of these is obvious.

2. Mr Abu Adass's disappearance on Sunday 16 January 2005

(a) Introduction

5334. The Prosecution argues that Mr Sabra, Mr Merhi and Mr Oneissi's involvement in Mr Abu Adass's 'abduction' on **Sunday 16 January 2005** was shown by the following. These are first, the Green and Purple 'hierarchical' call flows from **Wednesday 12 January to Saturday 15 January 2005**. The second is of telephone calls to the Abu Adass home on the evening of **Saturday 15 January 2005** from 'Mohammed'.

5335. The third is of the inactivity of the Purple mobiles on **Sunday 16 January 2005** when there were no calls between Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018. The fourth is the activity of the Green mobiles that day, namely, that of Mr Abu Adass's disappearance.

5336. The fifth is of telephone calls to the Abu Adass household on **Monday 17 January 2005** by 'Mohammed'. The sixth is of Purple mobile call patterns on **Monday 17 January 2005**, around when the Abu Adass household received the calls from 'Mohammed'. The seventh is of Mr Taysir Abu Adass reporting Mr Abu Adass missing on **Wednesday 19 January 2005**.

¹⁰⁰⁹⁸ Prosecution final trial brief, paras 533-537, 539, 543-551, 554, 557, 559, 578, 593, 735, 759-760, 776-777, 1184-1186, 1191; Prosecution closing submissions, T. 14 September 2018, pp 18-19, 21, 24-25.

5337. Another consideration is of Mr Khaled Taha's travel movements on Saturday 15 and Sunday 16 January 2005. The Trial Chamber has examined the evidence concerning this because the Sabra Defence ran a positive defence that he was involved in the plot to assassinate Mr Hariri.

5338. The Trial Chamber did not receive any evidence on the creation of the video and the letter, including who made them, when they were made and where they were created. Similarly, no Party presented any positive evidence of what happened to Mr Abu Adass after his disappearance and the making of the video. The Prosecution argued in its final trial that it must be assumed that Mr Abu Adass was murdered,¹⁰⁰⁹⁹ resulting in the Trial Chamber posing the following written question to the Prosecution:

Paragraph 1047 of the Prosecution brief refers to the abduction and 'presumed murder' of Mr Ahmed Abu Adass (see also the Sabra brief at paragraph 53). Is it intended to suggest that Mr Merhi, Mr Oneissi and Mr Sabra are implicated in this? And, if so, where is the supporting evidence?¹⁰¹⁰⁰

5339. In closing oral arguments, Prosecution counsel responded that no finding on this issue was necessary.¹⁰¹⁰¹

5340. The Trial Chamber received no forensic evidence relating to the video, letter and its envelope; nor evidence of the chain of custody of these items following their provision by Mr El-Sayyed to the judicial investigating judge, Judge Abou Arraj. Mr Michael Taylor, the Prosecution's former Chief of Investigations, believed that fingerprints had been requested from the Lebanese Ministry of Interior to compare against those on the tape's packaging, but there is no evidence about the outcome of any such investigations, if indeed they took place.

(b) Evidence of mobile activity

i. Purple mobile activity on Monday 10 January 2005

5341. After a period of two days without mobile activity between the Purple mobiles, on Monday 10 January 2005 they had limited contact with each other.¹⁰¹⁰² At 10:51 that day, Mr Oneissi's

¹⁰⁰⁹⁹ Prosecution final trial brief, para. 1047.

Purple 095 called Sabra's attributed Purple 018 for 16 seconds.¹⁰¹⁰³ At 11:32, Mr Merhi's Purple 231 called Mr Sabra's attributed Purple 018 for 84 seconds.¹⁰¹⁰⁴

- ii. Intensified Green mobile calls and 'hierarchical' Green-Purple call flows between Wednesday 12 January and Saturday 15 January 2005

5342. Mr Platt's evidence was that **Wednesday 12 January 2005** was the first day of a five-day period when calls between Mr Merhi's Green 071 and Mr Badreddine's Green 023 increased in number.¹⁰¹⁰⁵ Mr Platt noted that only three of the eighteen calls between Green 071 and Green 023 from 13 October 2004 onwards were initiated by Green 023, and two of these were on Wednesday 12 January 2005.¹⁰¹⁰⁶ The number of Green calls is illustrated below in a graph.

52; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 577, 584, 586-588. *See also* exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 504, 517, 524-525. Exhibit P1807 (Chronology PowerPoint presentation – 1 January 2005 to 17 January 2005), slide 270

5343. Mr Platt added that a ‘hierarchical call flow’, meaning a tight sequence of calls, between the Green and the Purple mobiles also occurred first on 12 January 2005.¹⁰¹⁰⁷ He explained that these were Green mobile calls followed immediately by calls from Mr Merhi’s Purple 231 to other Purple mobiles.¹⁰¹⁰⁸

5344. On **Wednesday 12 January 2005**, at 20:20, Mr Badreddine’s Green 023 called Mr Merhi’s attributed Green 071. The call lasted 101 seconds. Mr Badreddine’s mobile connected to CARACA2 in north-west Beirut and Mr Merhi’s mobile connected to BRAJNE2 in southern Beirut.¹⁰¹⁰⁹ At 20:22, Mr Merhi’s Purple 231 called Associate Purple 744, which Prosecution analyst Mr Andrew Donaldson linked to Mr Merhi’s brother and which, according to Mr Platt,

¹⁰¹⁰⁷ Gary Platt, T. 9 February 2017, pp 86-87; exhibit P2133 (Combined call sequence table of Green 071, Purple 231 and Grey mobile), p. 46. *See also* exhibit P1782, para. 546.

also had contact with other Purple mobiles.¹⁰¹¹⁰ Both mobiles activated cells in southern Beirut.¹⁰¹¹¹

5345. Mr Platt testified that in his opinion, the length of the Green mobile call and the fact that the two mobiles were far apart shows that Mr Merhi and Mr Badreddine had a conversation.¹⁰¹¹²

5346. On **Thursday 13 January 2005**, at 19:50, Mr Merhi's attributed Green 071 called Mr Badreddine's Green 023. The call lasted for almost twenty minutes.¹⁰¹¹³ In Mr Platt's view, a significant event or urgency meant that the users broke protocol and spoke at unusual length.¹⁰¹¹⁴

5347. On **Friday 14 January 2005**, at 19:55, Mr Merhi's attributed Green 071 made a three-minute call to Mr Badreddine's Green 023. Mr Merhi's mobile activated a cell in southern Beirut, while Mr Badreddine's mobile activated a cell near Jounieh.¹⁰¹¹⁵

5348. At 19:59, Mr Merhi's Purple 231 called Associate Purple 744, linked to Mr Merhi's brother. Both mobiles activated cells in southern Beirut.¹⁰¹¹⁶ At 20:00, Mr Merhi's Purple 231 called Mr Sabra's attributed Purple 018, both activating cells in southern Beirut.¹⁰¹¹⁷ At 20:01 and 20:04, Purple 018 called Mr Oneissi's Purple 095. Both mobiles connected to cells in southern Beirut.¹⁰¹¹⁸ Mr Platt testified that the Green mobile call was unusually long and concluded that it had triggered the calls on the Purple mobiles.¹⁰¹¹⁹ Around midday, Mr Merhi's Purple 231, his

¹⁰¹¹³ For this call Green 071 activated SFEIR3 in south Beirut, Green 023 used GHAZIR2 in Jounieh. Mr Badreddine's personal mobile 663 activated Sfeir_B in southern Beirut at 21:05. Purple 231 called Associated Purple 744, attributed to Mr Merhi's brother, at 12:35 and was inactive between a call at 14:07 and an incoming service SMS at 19:47. Exhibit P1205, p. 8; exhibit P1211, p. 4; exhibit P1310 (Call sequence table of mobile 663), p. 3163; exhibit P527, p. 110.

¹⁰¹¹⁴ Gary Platt, T. 13 February 2017, pp 28-29; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 612-614. *See also* exhibit P1782, para. 555.

¹⁰¹¹⁵ Green 071 used BRAJNE2, Green 023 activated JOUNIE3. Exhibit P1205, p. 8; exhibit P1211, p. 4.

¹⁰¹¹⁶ Mr Merhi's Purple 231 activated BRAJNE2, Associate Purple 744 activated BIRABD3. Exhibit P527, p. 110; exhibit P1342, p. 71.

¹⁰¹¹⁷ Mr Merhi's Purple 231 activated BRAJNE2, Mr Sabra's Purple 018 activated HARA2. Exhibit P527, p. 110; exhibit P1221, p. 285.

¹⁰¹¹⁸ Mr Sabra's Purple 018 connected to HARA2 for both calls; Mr Oneissi's Purple 095 used SFEIR2/BRAJNE2 (20:01) and BRAJNE2 (20:04). Exhibit P1221, p. 285; exhibit P1223, p. 264.

¹⁰¹¹⁹ Gary Platt, T. 13 February 2017, pp 90-93; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 631-633. *See also* exhibit P1782, para. 579; exhibit P1807, slides 315-321.

brother's Associate Purple 744 and the unattributed Associate Purple 375 used different cells outside Beirut along the Anjar-Beirut highway.¹⁰¹²⁰

5349. On **Saturday 15 January 2005**, Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 activated the BLISS1 and BLISS2 cells in western Beirut, in the afternoon.¹⁰¹²¹ Later in the afternoon, both mobiles were active in SFEIR3, in the southern suburbs of Beirut, around the same time, Purple 095 at 17:07 and Purple 018 at 17:18.¹⁰¹²² Mr Oneissi's Purple 095 was not in contact with the other Purple mobiles on this day.¹⁰¹²³ At 18:52, Mr Merhi's Purple 231, using SINFIL3, called Purple 018, which activated SFEIR3 again.¹⁰¹²⁴ Following this call, Mr Merhi's Purple 231 was inactive for over 48 hours.¹⁰¹²⁵

5350. The cell usage by Purple 018 and Mr Oneissi's Purple 095, as mapped in court in the snapshot from the electronic presentation of evidence below, was irregular in western Beirut.¹⁰¹²⁶ Mr Platt considered the mobiles' simultaneous inactivity, common cell usage and the absence of calls between the two as consistent with them being together in west and south Beirut that day.¹⁰¹²⁷

¹⁰¹²⁰ Gary Platt, T. 13 February 2017, p. 87; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 630; exhibit P527, p. 110; exhibit P1342, p. 70; exhibit P1339, p. 35. *See also* exhibit P1782, para. 575.

¹⁰¹²³ Exhibit P1223, p. 264.

¹⁰¹²⁴ Purple 231 made its first call on 15 January 2005 at 14:30 when it contacted Associate Purple 744 for a 16-second call, two minutes later it called Purple 018. Exhibit P527, p. 110; exhibit P1221, p. 285; Gary Platt, T. 14 February 2017, p. 23; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 646-647. *See also* exhibit P1782, paras 584-585; exhibit P1807, slide 354.

¹⁰¹²⁵ Associate Purple 375 used SFEIR3 for its last three calls of the day between 18:12 and 21:17, after which it became inactive for the following three days. Associate Purple 744 activated SFEIR1 and SFEIR3 for calls between 18:54 and 20:01, when it, too, came to be unused until 18 January 2005. Exhibit P527, p. 110; exhibit P1339, p. 35; exhibit P1342, p. 71; Gary Platt, T. 14 February 2017, pp 23, 43-44, 47, 53-54; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 648. *See also* exhibit P1782, paras 589-590; exhibit P1807, slides 355-356.

¹⁰¹²⁷ Gary Platt, T. 14 February 2017, pp 19-21. The meeting in the area of the SFEIR3 cell potentially also involved Associate Purple 744 and Associate Purple 375. Gary Platt, T. 14 February 2017, pp 21, 47. *See also* exhibit P1807, slides 355-356.

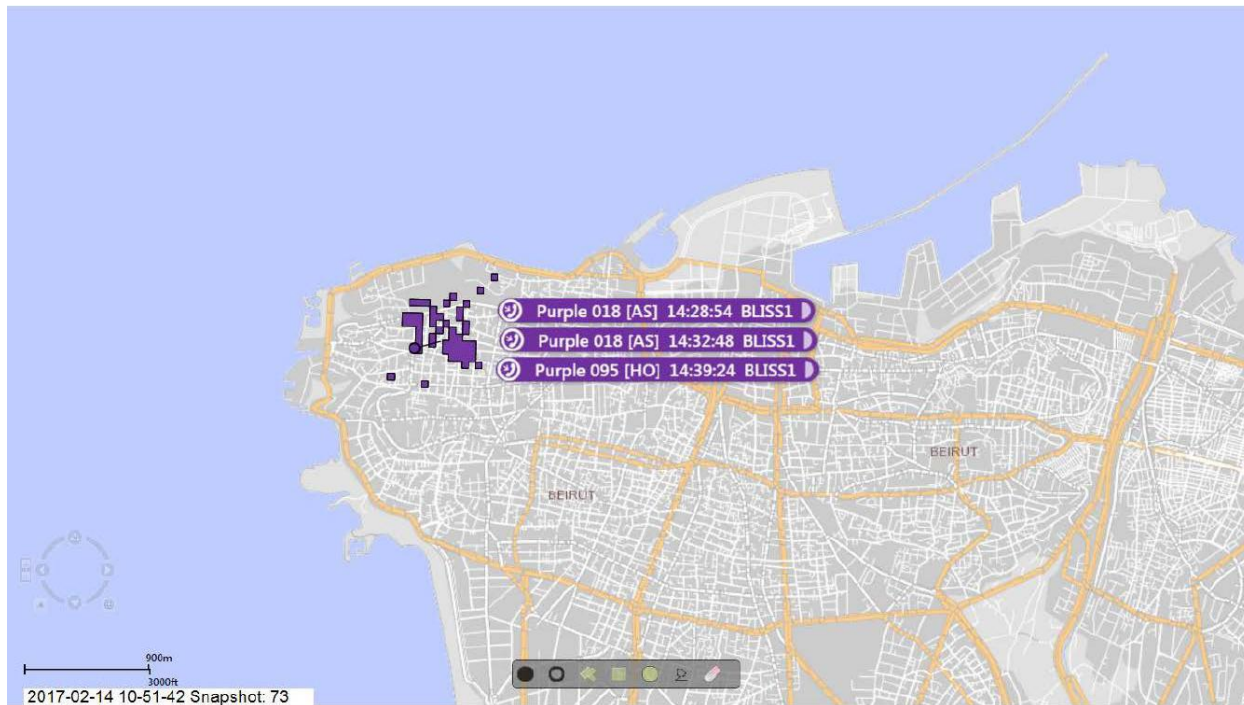

Exhibit P1814 (Electronic presentation of evidence snapshots), snapshot 73

5351. The same day, Mr Merhi's attributed Green 071 made two calls to Mr Badreddine's Green 023.¹⁰¹²⁸ One of these was a 31-second call at 18:51, when Green 071 used SIN FIL3 at the end of the call and Green 023 activated FURN3, which provided best server coverage for the Samino Jewellery store, in which Mr Badreddine had an interest under the alias of Sami Issa.¹⁰¹²⁹ The other was at 23:40 when Mr Merhi's attributed Green 071, using SFEIR3, called Mr Badreddine's Green 023, which activated OUYOUN3 in Faraya.¹⁰¹³⁰

5352. Mr Platt also noted that Mr Merhi's attributed Green 071's call to Mr Badreddine's Green 023 at 18:51 followed a short, fifteen-second call made at 18:49 from Mr Badreddine's sequential mobile 944 to the *Al-Rassoul Al-Aazam* Hospital, the 'Great Prophet Hospital'.¹⁰¹³¹ The

¹⁰¹³¹ Gary Platt, T. 14 February 2017, p. 22; exhibit P1287 (Call sequence table of mobile 944), p. 108; exhibit P1606 (Subscriber note for landline 206). *See also* exhibit P1807, slides 353-354.

hospital was a common contact of Mr Badreddine's sequential mobile 944, Mr Ayyash's personal mobiles 170 and 091 and Mr Merhi's Purple 231.¹⁰¹³²

5353. On certain dates, such as Saturday 15 January 2005, a pattern emerged, namely, of calls to the hospital from non-network mobiles followed shortly afterwards by calls between the Green mobiles.¹⁰¹³³ Mr Platt concluded that the calls to the hospital were to transmit messages between the users of the network mobile telephones, such as the Green mobiles, to another mobile.¹⁰¹³⁴ However, he acknowledged that—in the absence of evidence how the hospital communicated with the Accused—it was equally plausible that the mobile users called there for other reasons.¹⁰¹³⁵

5354. Mr Platt also drew attention to the close proximity of Mr Merhi's Green 071 and Purple 231 to Mr Badreddine's Green 023 during the calls at 18:51 and 18:52. In his view, this was consistent with the three mobiles being close to Mr Badreddine's (as Sami Issa) Samino Jewellery shop.¹⁰¹³⁶

5355. Mr Platt observed that the area that SINFIL3 covered—which is in central-eastern Beirut—was not frequented regularly by Green 071 and Mr Merhi's personal mobile Purple 231.¹⁰¹³⁷ He concluded that this was consistent with the users of Green 071/Purple 231, namely Mr Merhi, and Green 023, Mr Badreddine, arranging and meeting in the shop's vicinity.¹⁰¹³⁸

5356. Mr Platt highlighted what he viewed as a hierarchical call flow pattern between the call from Mr Merhi's Green 071 to Mr Badreddine's Green 023, followed within a minute by a call from Mr Merhi's Purple 231 to Purple 018.¹⁰¹³⁹ This was at 18:51, when Green 071 called Mr Badreddine's Green 023 for 31 seconds.¹⁰¹⁴⁰ At 18:52, Mr Merhi's Purple 231 called Mr Sabra's

attributed Purple 018.¹⁰¹⁴¹ After this call, Mr Merhi's Purple 231 was inactive for over 48 hours.¹⁰¹⁴²

5357. On Sunday 16 January 2005, the only call to or from the three Purple mobiles was a call three minutes after midnight by Mr Sabra's attributed Purple 018.¹⁰¹⁴³ Mr Platt testified that this inactivity was consistent with Mr Merhi and Mr Badreddine—during their meeting on Saturday 15 January 2005—having decided something about the abduction of Mr Abu Adass, which was to take place the following day.¹⁰¹⁴⁴

5358. In contrast to the Purple mobiles, Green 071 and Mr Merhi's Grey mobile were active on Sunday 16 January 2005. Green 071 called Mr Badreddine's Green 023 five times between 06:19 and 09:00.¹⁰¹⁴⁵ Mr Platt testified that, in his opinion, these calls related to Mr Abu Adass's abduction and some operational purpose required Mr Badreddine to return to Beirut from Faraya¹⁰¹⁴⁶ during this time, although he was not directly involved in the abduction himself.¹⁰¹⁴⁷ In the evening at 18:37, Mr Merhi's personal Grey mobile made a call after receiving two text messages, at 18:36. The mobile activated SFEIR3, in southern Beirut, near his home.¹⁰¹⁴⁸

iii. Telephone calls to the Abu Adass landline on Saturday 15 January 2005

5359. The Trial Chamber heard evidence about alleged telephone calls on **Saturday 15 January 2005**—from 'Mohammed' and Mr Khaled Taha.

5360. Witness 56 stated in five statements that Mr Abu Adass received a telephone call on the Abu Adass family landline in the evening of Saturday 15 January 2005 between 20:30 and

¹⁰¹⁴⁸ Exhibit P2144 (Call sequence table of the Grey mobile), pp 55-56.

21:00.¹⁰¹⁴⁹ In two accounts the caller is described as ‘Mohammed’.¹⁰¹⁵⁰ In another two statements, Mr Abu Adass told the witness that the caller was ‘Mohammed’,¹⁰¹⁵¹ while in the fifth, Mr Abu Adass is described as having received a telephone call on 15 January 2005, but without identification.¹⁰¹⁵²

5361. The witness believed that the call was made from a public telephone, although the reasons given differed slightly.¹⁰¹⁵³ Witness 56 consistently stated that ‘Mohammed’ had told Abu Adass that he would collect him at 07:00 the following morning.¹⁰¹⁵⁴ However, the account varied of what ‘Mohammed’ had told Mr Abu Adass about the proposed trip. In three versions, he had told Mr Abu Adass that he had an unknown surprise for him,¹⁰¹⁵⁵ while in a fourth, ‘Mohammed’ had said he wanted to show Mr Abu Adass an apartment.¹⁰¹⁵⁶ In a fifth, ‘Mohammed’ had told Mr Abu Adass he would take him out.¹⁰¹⁵⁷

5362. Mr Ramadan stated that he was informed that someone had called Mr Abu Adass, telling him that he (the caller) had found a house in the Arab University area. He was going to get married there, he wanted Mr Abu Adass to see the house or the apartment and had a surprise for him.¹⁰¹⁵⁸

¹⁰¹⁴⁹ Exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 4; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 1; exhibit P2132 (Statement of Witness PRH056, dated 1 July 2010), paras 16, 18; exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 3; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2. In another statement, Witness PRH056 stated that Mr Abu Adass told her the day before he disappeared that he would be meeting ‘Mohammed’, but did not make reference to a telephone call. Exhibit 5D475 (Statement of Witness PRH056, 15 February 2005), p. 1.

¹⁰¹⁵⁷ Exhibit 5D475 (Statement of Witness PRH056, 15 February 2005), p. 1.

¹⁰¹⁵⁸ Exhibit 5D473 (Statement of Ziad Ramadan, Syrian authorities, undated), pp 13-14.

In a television interview, Mr Abu Adass's sister stated that 'Mohammed' called the house once on the evening before Mr Abu Adass's disappearance.¹⁰¹⁵⁹

5363. In two statements, Witness 56 stated that Mr Abu Adass received an additional call on Saturday 15 January 2005, from Mr Khaled Taha.¹⁰¹⁶⁰ In another statement, the witness said that there was no telephone call after the call from 'Mohammed'.¹⁰¹⁶¹ A call sequence table of the Abu Adass family landline shows no calls to or from it on 15 January 2005.¹⁰¹⁶²

5364. A representative from Ogero, the telecommunications company providing landline services in Lebanon, Witness PRH709, stated that landline-to-landline call data records were generated and stored only from 1 January 2006. Before then, such records were incomplete and only generated if there was a test run on a specific line.¹⁰¹⁶³

iv. Mr Abu Adass's departure on Sunday 16 January 2005

5365. In the early morning of **Sunday 16 January 2005**, Mr Abu Adass attended the dawn prayers at the nearby Arab University Mosque and returned home.¹⁰¹⁶⁴ The dawn prayers that day were at 05:15.¹⁰¹⁶⁵

5366. Witness 56 stated that Mr Abu Adass then left the house at around 07:00.¹⁰¹⁶⁶ Witness 56's account of Mr Abu Adass's departure varied in some regards. In one statement, the witness said that Mr Abu Adass left with a man called 'Mohammed'.¹⁰¹⁶⁷ However, according to another statement, the witness did not think that anyone had seen the man with whom Mr Abu Adass had left.¹⁰¹⁶⁸

¹⁰¹⁵⁹ Exhibit P761.1 (Transcript of television programme regarding Mr Abu Adass), pp 1, 17.

¹⁰¹⁶⁰ Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 227 (p. 19); exhibit P2132 (Statement of Witness PRH056, dated 1 July 2010), para. 18. In the first statement, exhibit P2131, the witness stated that this additional call was received before the call from 'Mohammed', while in the latter, exhibit P2132, the witness was unsure of the order of the calls.

¹⁰¹⁶¹ Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 3.

¹⁰¹⁶² Exhibit 5D555 (Call sequence table of the Abu Adass family landline), p. 4.

¹⁰¹⁶³ Exhibit P1777 (Consolidated witness statement on behalf of Ogero with annexes 1-9), paras 14-16, 18, 21, 79; Witness PRH711, T. 10 January 2017, pp 49-52, 54-56; Witness PRH709, T. 11 January 2017, pp 33-36, 39-45; Toufic Chebaro, T. 12 January 2017, p. 16.

¹⁰¹⁶⁴ Exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 4.

¹⁰¹⁶⁵ According to the open source information referred to at footnote 9917.

¹⁰¹⁶⁶ Exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 1; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 4.

¹⁰¹⁶⁷ Exhibit 5D475 (Statement of Witness PRH056, 15 February 2005), pp 1-2.

¹⁰¹⁶⁸ Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), paras 117-118 (p. 9).

5367. Witness 56 also stated that Mr Abu Adass had said that ‘Mohammed’ would be picking him up in his car,¹⁰¹⁶⁹ but in another statement, was unsure whether ‘Mohammed’ used a car when he came on 16 January 2005.¹⁰¹⁷⁰ Witness 56 also stated that a car horn was heard before Mr Abu Adass left the house, but later that there had been no car horns before his departure.¹⁰¹⁷¹ Witness 56 stated variously that when he left the house, Mr Abu Adass was wearing brown clothing,¹⁰¹⁷² white robes¹⁰¹⁷³ and ‘regular’ clothes.¹⁰¹⁷⁴ The witness stated both that Mr Abu Adass bade farewell to his family,¹⁰¹⁷⁵ and that he left without saying goodbye.¹⁰¹⁷⁶ The witness also stated first that Mr Abu Adass took nothing at all with him;¹⁰¹⁷⁷ and then later, that he took his wallet and identification.¹⁰¹⁷⁸

5368. According to his father, Mr Abu Adass said that he was leaving with someone but did not give that person’s name.¹⁰¹⁷⁹

5369. Mr Ramadan stated that Mr Abu Adass’s family contacted him the same day Mr Abu Adass disappeared, at around 21:00, telling him that Mr Abu Adass had left the house around 07:30 with another person. The two had still not come back by the time the family called Mr Ramadan.¹⁰¹⁸⁰

5370. Witness 87 stated that Mr Taysir Abu Adass told him that Mr Abu Adass went with someone ‘on the pretext that Ahmad was looking for a house for him’, but without saying where they were going.¹⁰¹⁸¹

5371. The call sequence table for the Abu Adass family’s landline shows four calls from two different numbers on this day. The first and the last calls were from a mobile number that appears

to be a regular contact of the landline. Two calls from number 367 at 19:33 and 19:35 were the only calls from that number during the period of 1 December 2004 to 28 February 2005.¹⁰¹⁸²

v. Cessation of Purple mobile activity and increased Green mobile activity on Sunday 16 January 2005

5372. On **Sunday 16 January 2005**, the day that Mr Abu Adass left his home for the last time after attending the mosque for prayers, save for a call by Purple 018 three minutes after midnight, there were no calls on the three Purple and the two Associate Purple mobiles that day.¹⁰¹⁸³

5373. By contrast, Mr Merhi's attributed Green 071 was active. It called Mr Badreddine's Green 023 five times between 06:19 and 09:00.¹⁰¹⁸⁴ Green 023 used the OUYOUN3 cell in Faraya for the call at 06:19, GANOUM3 at 07:40,¹⁰¹⁸⁵ MIKAEL2 and HARA1 at 07:46 and ROUEIS3 in Haret Hreik at 08:25 and at 09:00.¹⁰¹⁸⁶

5374. The second and longest call, at 07:40, was just over one minute.¹⁰¹⁸⁷ After the fifth call, Green 023 was inactive for the remainder of the day, and Green 071 neither made nor received calls for another four days, until **Thursday 20 January 2005**.¹⁰¹⁸⁸

5375. Mr Philips and Mr Platt calculated that almost thirty per cent of the eighteen calls between Mr Badreddine's Green 023 and Mr Merhi's attributed Green 071 from 13 October 2004¹⁰¹⁸⁹ occurred in less than three hours on Sunday 16 January 2005.¹⁰¹⁹⁰

¹⁰¹⁹⁰ John Edward Philips, T. 6 September 2016, pp 68-71; exhibit P1116 (Expert report of J. E. Philips, 'Mission phones?' – Green mobiles, dated 3 May 2015), paras 7.5.2.5 (p. 35), 7.5.5.8 (p. 51); exhibit P1205. *See also* exhibit P1782, para. 605.

5376. For Mr Platt, the early morning calls were unusual for Green 071 and Green 023. This suggested urgency and resulted in Mr Badreddine's Green 023 travelling to Beirut that day.¹⁰¹⁹¹ He found the call pattern consistent with Mr Merhi's attributed Green 071 providing updates on the 'abduction' of Mr Abu Adass to Mr Badreddine's Green 023; it was also consistent with Mr Badreddine keeping away from this event due to his organisational position.¹⁰¹⁹² The call activity of Green 071 and Green 023 also suggested to Mr Platt that Mr Abu Adass's 'abduction' was completed by 09:00, and that the users of the two Green mobiles met at that time.¹⁰¹⁹³

5377. Mr Platt highlighted two short successive calls by Mr Badreddine on his sequential mobile 944, using the SABRA2 cell at 07:59 and 08:00, to *Al-Rasoul Al-Aazam* (Great Prophet Hospital) in between the calls from Green 071 to Green 023 at 07:46 and 08:25.¹⁰¹⁹⁴ He explained that this fitted his theory of using the hospital to leave a message to call back, which may have been necessary if Mr Merhi's Green 071 was switched off.¹⁰¹⁹⁵

5378. Mr Platt observed that this was the only day since 1 September 2004 that Mr Sabra's attributed Purple 018, Mr Oneissi's Purple 095, Mr Merhi's Purple 231, the unattributed Associate Purple 375 and Associate Purple 744—attributed to Mr Merhi's brother, Mr Abbas Habib Merhi—were simultaneously inactive for over 24 hours.¹⁰¹⁹⁶ In Mr Platt's opinion, this was consistent with an operational need for these mobiles not to be used on Sunday 16 January 2005, so that they were not traced or lost.¹⁰¹⁹⁷ Mr Merhi's Grey mobile, however, was active. Connecting to SFEIR3 in the evening, it received two text messages from a number at 18:36, after which it called the same number at 18:37.¹⁰¹⁹⁸

vi. Telephone calls to the Abu Adass home on Monday 17 January 2005

5379. The Prosecution, in its final trial brief, submits that the Abu Adass family ‘received two calls from his abductors’, on **Monday 17 January 2005**.¹⁰¹⁹⁹ At around 07:00 or 07:30 that day, namely the day following Mr Abu Adass’s disappearance, a man with a Lebanese accent called the Abu Adass’s family landline and said he was ‘the one who went with Ahmad’.¹⁰²⁰⁰

5380. The caller said that he was with Mr Abu Adass in Tripoli, and they had not returned the previous day because their car had broken down. They were waiting for a repair and would return to Beirut that afternoon.¹⁰²⁰¹ The caller said that Mr Abu Adass had not called because he was still in an apartment with no telephone, and the caller was at the car workshop.¹⁰²⁰² The caller refused an offer to have someone pick up Mr Abu Adass.¹⁰²⁰³ He also said that Mr Abu Adass had asked him to say that he would return home as he had promised.¹⁰²⁰⁴

5381. Witness 56 thought that the caller was the same person who called the Abu Adass’s family landline on Saturday 15 January 2005 as ‘Mohammed’, and that the call was made from a public telephone.¹⁰²⁰⁵

¹⁰¹⁹⁹ Prosecution final trial brief, para. 556.

¹⁰²⁰⁰ Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 2; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 4; exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), paras 141-146 (pp 10-11). *See also* exhibit P2130 (Statement of Witness PRH056, dated 5 May 2006), para. 24 (p. 3); exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 2 (in which Witness 56 mentioned the call made later that same day – as detailed below – but did not mention that another call had been received earlier that same day concerning Mr Abu Adass); exhibit 5D476 (Statement of Witness PRH056, 17 February 2005), p. 4; exhibit P461 (Witness statements of Taysir Abu Adass, dated 19 January 2005 and 28 February 2005), ERN 50003488.

¹⁰²⁰¹ Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 2; exhibit 5D476 (Statement of Witness PRH056, 17 February 2005), p. 4; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), pp 4-5; exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (pp 10-11); exhibit P461 (Witness statements of Taysir Abu Adass, dated 19 January 2005 and 28 February 2005), ERN 50003488.

¹⁰²⁰² Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 2; exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (pp 10-11).

¹⁰²⁰³ Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11).

¹⁰²⁰⁴ Exhibit 5D476 (Statement of Witness PRH056, 17 February 2005), p. 4; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), pp 5-6.

¹⁰²⁰⁵ Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11); exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 3; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2.

5382. Later the same day, at around 21:00, there was another call from a man,¹⁰²⁰⁶ saying he was the same person who called earlier.¹⁰²⁰⁷ The caller said that the car had not broken down, but that Mr Abu Adass had gone or would be going to Iraq and would not return home.¹⁰²⁰⁸ He would try to get Mr Abu Adass's telephone number so he could be called in an attempt to change his mind.¹⁰²⁰⁹ He did not mention his location or give any telephone number.¹⁰²¹⁰ When asked for his name, he ended the call.¹⁰²¹¹

5383. Witness 56 did not know whether the second caller was the same as the first.¹⁰²¹² The second call was also made from a public telephone.¹⁰²¹³

5384. Mr Abu Adass's family contacted Mr Ramadan on Monday 17 January 2005 and told him that Mr Abu Adass had been in a car that broke down on the way to Tripoli.¹⁰²¹⁴ In another statement, he said that he went to the Abu Adass house on 17 January and the family told him they had received a telephone call from a person saying that the two were together in Tripoli, their car

¹⁰²⁰⁶ Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 2; exhibit 5D476 (Statement of Witness PRH056, 17 February 2005), p. 4; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 6; exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11); exhibit P461 (Witness statements of Taysir Abu Adass, dated 19 January 2005 and 28 February 2005), ERN 50003489.

¹⁰²⁰⁹ Exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5.

¹⁰²¹⁰ Exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 14.

¹⁰²¹¹ Exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 2; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 6.

¹⁰²¹² Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11); exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 13; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2.

¹⁰²¹³ Exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 2; exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 2; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11); exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 3.

¹⁰²¹⁴ Exhibit 5D473 (Statement of Ziad Ramadan, Syrian authorities, undated), p. 14.

had broken down and was being repaired in a workshop and they would return once the repair was complete. Mr Abu Adass was also tired and sleepy.¹⁰²¹⁵

5385. The Abu Adass family called Mr Ramadan, who expressed disbelief at Mr Abu Adass going to Iraq.¹⁰²¹⁶ Mr Ramadan did not mention in his statements that he knew about the second call or that he was told that Mr Abu Adass had gone to Iraq.

5386. The call sequence table of the Abu Adass family's landline for Monday 17 January 2005 also does not display any calls from an unknown number. The calls in the morning and around 21:00 on that day come from mobile numbers that appear to have communicated with the family's landline on previous occasions.¹⁰²¹⁷

vii. Purple mobile activity on Monday 17 January 2005

5387. There were no calls between Mr Merhi's attributed Green 071 and Mr Badreddine's Green 023 on **Monday 17 January 2005**.¹⁰²¹⁸ This was the day after Mr Abu Adass left his home for the last time.

5388. The amended consolidated indictment pleads that the Abu Adass family received two calls 'on around 17 January 2005'. The first was 'from the person believed to be "Mohammed" claiming that he and ABU ADASS had broken down in a vehicle in Tripoli'. In the second, the caller claimed that 'ABU ADASS had decided to go on jihad to Iraq and would not be coming home'. In relation to the Accused, it pleads that '**ONEISSI** was in the vicinity of ABU ADASS' home and used Purple 095 to contact **MERHI** on Purple 231'.¹⁰²¹⁹

5389. On that day, in the evening, Mr Oneissi's Purple 095 activated COLA2 near the Arab University Mosque.¹⁰²²⁰ His mobile, between 07:01 and 08:14 in the morning, activated SFEIR3 in south Beirut, when it received five service text messages within less than thirty seconds.¹⁰²²¹

¹⁰²¹⁵ Exhibit 5D470 (Statement of Ziad Ramadan, Syrian authorities, 8 November 2005), p. 15.

¹⁰²¹⁶ Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), para. 144 (p. 11); exhibit P1776 (Transcript of Ziad Ramadan's interview by UNHCR, 22 May 2006), p. 24.

¹⁰²¹⁷ Exhibit 5D555 (Call sequence table of the Abu Adass family landline), pp 4-5.

¹⁰²¹⁸ Exhibit P1205 (Call sequence table of Green 071), p. 9; exhibit P1211 (Call sequence table of Green 023), p. 4.

¹⁰²¹⁹ Amended consolidated indictment, para. 29.

¹⁰²²⁰ Exhibit P1223 (Call sequence table of Purple 095), p. 265; Gary Platt, T. 9 February 2017, pp 26-27, 29-30, 53; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 672, 680. *See also* exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 499, 622-625.

¹⁰²²¹ Exhibit P1223, pp 264-265.

Similarly, Mr Merhi's Purple 231 received four service messages from Alfa in a quick succession after it became active again at 20:44.¹⁰²²² Mr Sabra's attributed Purple 018 made a call at 08:18.¹⁰²²³ The three Purple mobiles activated the SFEIR3 cell.¹⁰²²⁴

5390. Purple 095 then connected to MIKAEL2, from 20:48 to 20:49, and CHIAH2 at 20:50 and 20:51. It then activated COLA2 to receive eight service messages in six minutes from 20:55, and to send one message to Mr Merhi's Purple 231 at 21:02.¹⁰²²⁵ His Purple 231 called Mr Oneissi's Purple 095 back at 21:04 and 21:05.¹⁰²²⁶

5391. Meanwhile, Mr Sabra's attributed Purple 018 received two more calls, the last was at 10:26, all activating cells in southern Beirut, namely SFEIR3 and BRAJNE1.¹⁰²²⁷ It had no contact with the other two Purple mobiles that day.¹⁰²²⁸

5392. This day, Monday 17 January 2005, was the last time any Purple mobiles connected to the COLA cells.¹⁰²²⁹ The Purple mobiles were also inactive for much of the day.¹⁰²³⁰ Mr Merhi's Purple 231 connected exclusively to SFEIR3 that day.¹⁰²³¹ The other two Purple mobiles also activated the SFEIR3 cell.¹⁰²³²

5393. Mr Platt observed that the messages that Mr Oneissi's Purple 095 received in the morning placed its user in south Beirut and coincided with the call to the Abu Adass family landline about the car breaking down in Tripoli.¹⁰²³³ The text messages received on Mr Merhi's Purple 231 and Mr Oneissi's Purple 095 in the evening, in his assessment, showed that the two Purple mobiles

¹⁰²³² Exhibit P1221, p. 285; exhibit P1223, pp 264-265.

¹⁰²³³ Gary Platt, T. 14 February 2017, pp 100-102; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 674, referring to exhibit P2131 (Statement of Witness PRH056, dated 7-8 June 2007), paras 143-144 (pp 10-11); exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 5. *See also* exhibit P1782, para. 620.

were switched on shortly before the second call to the Abu Adass family landline at around 21:00.¹⁰²³⁴

5394. The cells activated by Mr Oneissi's Purple 095 placed it in south Beirut at 20:48 and showed its movement to the COLA2 cell in the vicinity of the Arab University Mosque, close to where Mr Abu Adass lived.¹⁰²³⁵

5395. Mr Platt testified that this was consistent with confining the mobile activity to the area of the mosque and away from the residence of Purple 095's user in south Beirut.¹⁰²³⁶ When Mr Merhi's Purple 231 and Mr Oneissi's Purple 095 contacted each other between 21:02 and 21:05, Purple 095's cell usage showed that it travelled south, away from the COLA cells area.¹⁰²³⁷ Mr Platt thought that this was consistent with reporting on what had happened in the preceding minutes in the area of the COLA2 cell.¹⁰²³⁸

5396. Associate Purple 744 and Associate Purple 375 became active only on **Tuesday 18 January 2005**. Associate Purple 744—attributed to Mr Merhi's brother, Mr Abbas Habib Merhi—received 42 text messages and used SFEIR3 for its first call after the inactive period.¹⁰²³⁹ The unattributed Associate Purple 375 activated BIRABD3.¹⁰²⁴⁰

5397. Mr Platt concluded that the series of 'pent-up' messages received by Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Merhi's brother's Associate Purple 744 suggests that the users had their mobiles turned off.¹⁰²⁴¹ He did not review the Grey mobile, but it too had no calls or messages between 15:22 on Saturday 15 January and 18:36 on Sunday 16 January 2005.¹⁰²⁴² The SMS call sequence table shows that at 21:13 on 15 January and at 13:32 on 16

January 2005 two messages were sent to Mr Merhi's Grey mobile,¹⁰²⁴³ which were received at 18:36 on Sunday 16 January.¹⁰²⁴⁴

5398. In Defence cross-examination on the general significance of a mobile receiving multiple text messages within a short time, Mr Platt agreed that mobiles may be switched off because they are not needed for a period of time.¹⁰²⁴⁵ He also agreed that some areas have no mobile coverage, and that pent-up SMS messages could be received when a mobile re-enters an area of coverage after being in a no-coverage area, rather than after being turned off and then on again.¹⁰²⁴⁶

viii. Reporting Mr Abu Adass missing, Wednesday 19 January 2005

5399. It appears that on **Wednesday 19 January 2005** Mr Taysir Abu Adass filed a complaint with the Public Prosecutor's Office at the Court of Appeal in Beirut, requesting an investigation into the disappearance of his son, Mr Ahmad Abu Adass. Later that same day he made a statement at a police station.¹⁰²⁴⁷

5400. The Public Prosecutor of Beirut issued an 'all-point bulletin' on 19 January 2005 to be distributed to all Interior Security Forces.¹⁰²⁴⁸ Mr Taysir Abu Adass initially told the Lebanese authorities that Mr Abu Adass left his home on '15/1/2005, which was last Sunday'; the date is incorrect as the previous Sunday was 16 January 2005. In two subsequent statements to the Lebanese authorities, however, he stated that his son left his home on 16 January 2005.¹⁰²⁴⁹

¹⁰²⁴³ Exhibit P2147 (SMS content for Grey mobile), p. 48 (rows 546, 548).

¹⁰²⁴⁴ Exhibit P2144, p. 55. The call sequence table with SMS content, exhibit P2147, shows that the text messages were delivered at 18:32. The Trial Chamber received evidence from the representatives of the Lebanese mobile telecommunications service providers regarding the setting of clocks at the mobiles switching centres (MSCs). *For example*, exhibit P1192.4 (Explanation on timing and clocks for call data records, Annex 9 to Witness PRH707's statement of 11 November 2015). The four-minute difference has no significance here.

ix. Mr Khaled Taha's travel on Saturday 15 and Sunday 16 January 2005

5401. Lebanese and Syrian border records show that Mr Taha entered Lebanon from Syria on **Saturday 15 January 2005**, and returned there on **Sunday 16 January 2005**.¹⁰²⁵⁰ Mr Macleod, a UNIIIC and then Prosecution investigator, and Mr Taylor, the Prosecution's former Chief of Investigations, testified that Lebanese border records revealed that Mr Taha travelled between Lebanon and Syria fifteen times between 20 May 2004 and 15 January 2005.¹⁰²⁵¹ The Trial Chamber has received no direct information about Mr Taha's whereabouts after Sunday 16 January 2005.

5402. In October 2005, the Syrian Government informed the UNIIIC that its border records did not show Mr Taha leaving Syria through official channels after 16 January 2005 and stated that it was unaware of his location.¹⁰²⁵² According to Mr Macleod, when he joined the UNIIIC in February 2006, Mr Taha's location was unknown. Mr Macleod's view was that Mr Taha had gone into hiding because he was involved in illegal activities.¹⁰²⁵³ A Lebanese Military Court indictment issued in 2007 alleged that Mr Taha had fled into the Ein-El-Hilwe camp, near Saida in Lebanon, after Mr Hariri's assassination.¹⁰²⁵⁴

5403. The Trial Chamber also received evidence about subsequent investigations—by Lebanese authorities,¹⁰²⁵⁵ the UNIIIC¹⁰²⁵⁶ and the Prosecution—into Mr Taha's possible involvement in

and 28 February 2005), ERNs 50003487, 50008343. *See also* exhibit 5D514 (Summary report of interview with Taysir Abu Adass, dated 14 February 2005), p. 3.

¹⁰²⁵⁶ Exhibit 5D490 (UNIIIC report to the United Nations Security Council, 20 October 2005), paras 182, 190.

Mr Abu Adass's disappearance. According to Mr Taylor, the Prosecution 'robustly' investigated the possibility that Mr Taha left the country with Mr Abu Adass.¹⁰²⁵⁷

5404. In 2009, Mr Taylor authored an internal strategy document that named Mr Taha as a 'person of interest'.¹⁰²⁵⁸ Between 26 May and 9 July 2010, the Prosecution sent four requests for assistance to the Lebanese authorities seeking information, mainly about the Accused but also about Mr Taha.¹⁰²⁵⁹ Mr Taylor believed that the Prosecution had sought and obtained Mr Taha's fingerprints from the Lebanese Government,¹⁰²⁶⁰ and conducted door-to-door enquiries near Mr Taha's house.¹⁰²⁶¹ Mr Taha had used two mobiles and two landlines, and the Prosecution had unsuccessfully tried to find him by tracing their use.¹⁰²⁶²

5405. In 2010, the Prosecution recontacted previously interviewed witnesses so it could question them about Mr Taha, including Witness 56¹⁰²⁶³ and a relative of that witness.¹⁰²⁶⁴ The relative's witness statement was not admitted into evidence,¹⁰²⁶⁵ but its relevant portion was read onto the record during the trial.¹⁰²⁶⁶

5406. It states that she heard from Witness 56 that Mr Abu Adass first met Mr Taha in the mosque near the Arab University. On the day that Mr Abu Adass disappeared, Mr Abu Adass said that he was with Mr Taha. Later that day, Mr Taha called the family from Tripoli. He said that Ahmad would be late because their car had broken down, but that he would come back soon because he had promised to clean some carpets.¹⁰²⁶⁷

¹⁰²⁵⁷ Michael Taylor, T. 25 June 2018, p. 17.

¹⁰²⁵⁸ Michael Taylor, T. 25 June 2018, pp 103-104, 108-109.

¹⁰²⁵⁹ Michael Taylor, T. 25 June 2018, p. 110; *for example*, exhibit 4D382 (Prosecution request for financial information).

¹⁰²⁶⁰ Michael Taylor, T. 25 June 2018, pp 21, 104.

¹⁰²⁶¹ Michael Taylor, T. 25 June 2018, pp 21-22.

¹⁰²⁶² Michael Taylor, T. 25 June 2018, pp 23, 33, 92.

¹⁰²⁶⁴ Michael Taylor, T. 25 June 2018, p. 21.

¹⁰²⁶⁵ Decision on Sabra Defence reconsideration and admission of a witness statement through Quentin Mugg, paras 24, 26. In a challenge to the Trial Chamber's decision to order Mr Michael Taylor, to testify under Rule 165, the Prosecution also argued that the relative's statement lacked reliability, being incorrect about Mr Taha's nationality, background, meeting with Mr Abu Adass, and the circumstances of Mr Abu Adass's disappearance; F3674, Corrected Version of "Prosecution Motion for Partial Reconsideration of the Decision", 1 June 2018, paras 26, 30-32.

¹⁰²⁶⁶ One of the investigators who took the statement was questioned on this issue. Quentin Mugg, T. 11 January 2018, p. 42.

¹⁰²⁶⁷ Quentin Mugg, T. 11 January 2018, p. 42.

5407. There is a potential apparent inconsistency here. Mr Taylor testified that the contradictions between the relative's statement and Witness 56's statement should have been included in the 'mission report', a document produced by the investigating team upon its return to the office from its 'mission' to Lebanon, summarising the evidence received in any interviews. In his view, the relative's statement was 'poor' and 'deficient'.¹⁰²⁶⁸ No further interviews were conducted after 30 August 2010 regarding the evidence emerging from the relative's statement.¹⁰²⁶⁹ At some point in 2013, according to Mr Taylor and Mr Macleod, senior Prosecution trial counsel decided not to pursue further inquiries into Mr Taha.¹⁰²⁷⁰

(c) Submissions

5408. The Prosecutor in the amended consolidated indictment alleges that on Saturday 15 January 2005, at about 21:00, Mr Oneissi, calling himself 'Mohammed', called Mr Abu Adass and the two agreed to meet early the next day, namely on Sunday 16 January 2005.¹⁰²⁷¹ Further, on Sunday 16 January 2005, at about 07:00 Mr Abu Adass left his home to meet with Mr Oneissi alias 'Mohammed'.¹⁰²⁷² In leaving his home, Mr Abu Adass said he would be back in a couple of hours.¹⁰²⁷³ The following day, Monday 17 January 2005, the Abu Adass family received a call from 'Mohammed' claiming that Mr Abu Adass was with him in Tripoli, where their vehicle had broken down. The amended consolidated indictment alleges that the family then received a second call, informing them that Mr Abu Adass had decided to go to jihad to Iraq and would not be coming home.¹⁰²⁷⁴ The Prosecution submitted at the close of the case that the evidence had established these pleaded facts.

5409. In relation to Mr Merhi's role, the Prosecution submits that Mr Merhi 'co-ordinated' Mr Oneissi's and Mr Sabra's actions 'as they located, identified, approached, and abducted a suitable individual to make the false claim of responsibility, which in turn required sufficient knowledge of the nature of the plot, including the means of execution'.¹⁰²⁷⁵ Regarding Mr Oneissi's and Mr

¹⁰²⁷⁵ Prosecution final trial brief, para. 1177.

Sabra's roles, the Prosecution submits that the evidence has established that each participated in the profiling, identifying, selecting and abducting of Mr Abu Adass.¹⁰²⁷⁶

5410. The Prosecution argues that there were hierarchical call patterns between the Green and Purple mobiles on Wednesday 12, Friday 14 and Saturday 15 January 2005, showing that instructions were being passed down from Mr Badreddine to Mr Merhi, and then from Mr Merhi to Mr Oneissi and Mr Sabra.¹⁰²⁷⁷ According to its final trial brief, the 'abduction of ABU ADASS was a critical task in the preparation and delivery of the false claim, thereby necessitating the higher degree of co-ordination and supervision during this period evident from these call cascades'.¹⁰²⁷⁸

5411. On Friday 14 January 2005, two days before Mr Abu Adass's disappearance on Sunday 16 January 2005, the two Associate Purple mobiles moved to Anjar, in the Bekaa valley when Mr Merhi's Purple 231 also activated cells in the area.¹⁰²⁷⁹ The Purple mobiles, as well as Purple Associate mobiles 744 and 375, entered into an exceptional period of inactivity on Sunday 16 January 2005, the day of Mr Abu Adass's abduction—showing an awareness of the forensic visibility around the most complex aspect of the false claim plot.¹⁰²⁸⁰

5412. The Prosecution also argues that the Purple mobiles' use of the SFEIR3 cells in their last contacts on Saturday 15 January 2005, and again when they resumed activity on Monday 17 January 2005, shows a centralised coordination and perhaps the mobiles being left in a single location.¹⁰²⁸¹

5413. The Purple mobiles became active again on Monday 17 January 2005. Under the heading, in the final trial brief, 'Isolated Purple Calls on 17 January 2005 Correspond with the Post-Abduction Calls to ABU ADASS' House', the Prosecution submits that the activity of the Purple mobiles that day 'was very limited and coincided with calls made to the ABU ADASS residence

¹⁰²⁸¹ Prosecution final trial brief, para. 553.

related to his disappearance'. These, according to the Prosecution, were 'two calls from his abductors'.¹⁰²⁸²

5414. The first call to the house was made at 07:30, and Mr Oneissi's Purple 095 became active half an hour before that, at 07:01, having been inactive the previous day. His mobile received texts, which is consistent with him turning it on after a prolonged period. His next activity was at 08:14, at almost the same time when Mr Sabra's attributed Purple 018 became active again. Mr Oneissi's Purple 095's became active again just before 21:00 when the second call was made to the Abu Adass house.¹⁰²⁸³ At 21:02, Mr Oneissi's Purple 095 texted Mr Merhi's Purple 231, and shortly afterwards the two exchanged calls as Mr Oneissi returned to south Beirut. This was 'consistent with reporting back that the call had been made'.¹⁰²⁸⁴

5415. This was the last time any Purple mobile connected to a COLA cell, which reflected, according to the Prosecution, that 'in much the same way as the man posing as "Mohammed", **ONEISSI** and **SABRA** retained no further interest or purpose in that area'.¹⁰²⁸⁵

5416. Mr Merhi's 'supervisory' role in the false claim plot is shown by the increase in Green 071's activity, with almost thirty per cent of calls between Mr Merhi's Green 071 and Mr Badreddine's Green 023 taking place in the morning of Sunday 16 January 2005. The Prosecution submits that these calls are consistent with Mr Merhi reporting back to Mr Badreddine. His very limited activity after this period on his Green network mobile 071, suggests that the principal purpose of using that mobile, his supervisory role, had been largely fulfilled.¹⁰²⁸⁶

5417. Mr Merhi's Purple 231 was directing operations, as is shown by texts between Mr Oneissi's Purple 095 and Mr Merhi's Purple 231 that day,¹⁰²⁸⁷ arguing that this 'was the last time any of the **Purple Phones** ever connected to a COLA cell reflecting that their unusual purpose in the area had now been fulfilled'.¹⁰²⁸⁸

¹⁰²⁸² Prosecution final trial brief, paras 555-556.

¹⁰²⁸³ Prosecution final trial brief, paras 557-558, 779-780.

¹⁰²⁸⁴ Prosecution final trial brief, paras 558, 780.

¹⁰²⁸⁵ Prosecution final trial brief, para. 780.

¹⁰²⁸⁷ Prosecution final trial brief, para. 605.

¹⁰²⁸⁸ Prosecution final trial brief, para. 559.

5418. Accordingly, ‘the only reasonable conclusion’ from the evidence ‘becomes that **MERHI**, **ONEISSI**, and **SABRA** were involved in the identification and abduction of ABU ADASS for the purpose of using him to make the false claim of responsibility’.¹⁰²⁸⁹

5419. Regarding the Defence arguments that Mr Abu Adass left his home with Mr Taha, the Prosecution argues that there is no admitted evidence demonstrating that Mr Abu Adass left with him on 16 January 2005.¹⁰²⁹⁰ While the Lebanese/Syrian border entry and exit records show that Mr Taha entered Lebanon on 15 January 2005 and left on 16 January 2005, they do not show what Mr Taha did in Lebanon.¹⁰²⁹¹ And it took steps to investigate Mr Taha’s possible involvement in Mr Abu Adass’s disappearance.¹⁰²⁹² In any event, and in the alternative, even if Mr Taha had left with Mr Abu Adass, it does not affect the Prosecution case against Mr Sabra, Mr Oneissi and Mr Merhi.¹⁰²⁹³

5420. As acknowledged by Mr Taylor, Witness 56’s relative’s statement was inconsistent, and was correctly deemed inadmissible hearsay by the Trial Chamber.¹⁰²⁹⁴ Further, the Prosecution did not fail to meet its investigative obligations. Neither the Statute nor the Rules oblige the Prosecution to further the truth, and the Trial Chamber has expressly rejected the assertion that the Prosecution should present both inculpatory and exculpatory material.¹⁰²⁹⁵ Further, and as outlined by Mr Taylor, the Prosecution did take a number of steps to investigate Mr Taha’s possible involvement in Mr Abu Adass’s disappearance.¹⁰²⁹⁶

5421. The Merhi Defence argues that the Prosecution ‘has not ruled out the reasonable possibility that Abu Adass left of his own accord’.¹⁰²⁹⁷ Given that there were only four calls between Purple 231 and Purple 018 between early January, when Mr Abu Adass was allegedly identified and Sunday 16 January 2005, the day of his alleged abduction—totalling less than four minutes—it is

¹⁰²⁹⁷ Merhi Defence final trial brief, paras 507, 511-512.

impossible to infer that a complex abduction was being coordinated.¹⁰²⁹⁸ Moreover, there was no call with Purple 095, thus:

it would be unreasonable to conclude that an operation as complex as the abduction, transportation and unlawful detention of an individual and the recording of a video can be coordinated in phone conversations lasting less than four minutes.¹⁰²⁹⁹

5422. The Merhi Defence submitted in closing submissions that ‘the Prosecution builds its case on a vacuum, on the absence of calls’.¹⁰³⁰⁰ Mr Platt inappropriately also relied on the activity of the Purple Associate mobiles to create the illusion that there was a hierarchical increase in Green to Purple network call flows from Wednesday 12 to Saturday 15 January 2005.¹⁰³⁰¹

5423. The Prosecution also failed to rule out the reasonable possibility that Mr Abu Adass left Lebanon with Mr Taha.¹⁰³⁰² Mr Taha was a friend of Mr Abu Adass,¹⁰³⁰³ entered Syria from Lebanon on 16 January 2005 and did not officially leave Syria any time afterwards.¹⁰³⁰⁴ The Prosecution failed to adequately investigate Mr Taha’s possible involvement.¹⁰³⁰⁵

5424. The Oneissi Defence argues that Mr Platt’s evidence was that no inferences can be drawn about periods of inactivity;¹⁰³⁰⁶ and that ‘pent-up’ texts did not give rise to an inference of covert activity.¹⁰³⁰⁷ Contacts between Purple 095 and other Purple mobiles, including the Purple Associates, were not exceptional, as they significantly predated the indictment period.¹⁰³⁰⁸

5425. Mr Taysir Abu Adass never mentioned the alleged departure with ‘Mohammed’ or the subsequent telephone calls in the report he gave to police, because the family were trying to cover up the possible departure of their son to Iraq.¹⁰³⁰⁹ The Oneissi Defence final trial brief states, that on the ‘eve of his departure, Abu Adass would have received calls from Bilal Zaroura, a convicted

¹⁰³⁰⁹ Oneissi Defence final trial brief, paras 283-291.

jihadist terrorist, and Khaled Taha, who was close to the ‘AQ13’ group’, meaning al-Qaeda.¹⁰³¹⁰ It submits that the evidence does not establish who, if anyone, called the Abu Adass household on Saturday 15 and Monday 17 January 2005,¹⁰³¹¹ or collected Mr Abu Adass in the morning of Sunday 16 January 2005.¹⁰³¹²

5426. The Oneissi Defence also argues that at ‘least one other member of the Abu-Adass family’ had heard that Mr Abu Adass had left with Mr Taha. This statement directly contradicts and is inconsistent with the Prosecution’s theory, and thus was ignored.¹⁰³¹³

5427. The so-called ‘Al-Qaeda 13’ were thirteen people allegedly associated with al-Qaeda, who were charged and detained in Lebanon in early 2006.¹⁰³¹⁴ The indictment against these thirteen and others—any judgement is not in evidence—alleges that al-Qaeda had decided to target Lebanon in 2004 and organised cells to do so, and it also alleges Mr Taha’s involvement in Mr Hariri’s assassination.¹⁰³¹⁵

5428. The Sabra Defence argues that the Prosecution’s assertion that ‘Mohammed’ called Mr Abu Adass on Saturday 15 January 2005 relies solely on Witness 56’s ‘inconsistent, uncorroborated and untested’ evidence.¹⁰³¹⁶ As for Mr Abu Adass’s departure on 16 January 2005, the Prosecution’s case is again based entirely on Witness 56’s hearsay evidence.¹⁰³¹⁷ Witness 56’s evidence is undermined by Mr Ramadan’s and Mr Taysir Abu Adass’s evidence,¹⁰³¹⁸ and was inconsistent as to where Mr Abu Adass had said he was going; whether he had left with ‘Mohammed; by car; the items Mr Abu Adass had taken with him; and his plans for the remainder of the day.¹⁰³¹⁹ Witness 56’s evidence on the calls of 17 January 2005 is also unreliable,¹⁰³²⁰ and

¹⁰³¹⁰ Oneissi Defence final trial brief, para. 539. No evidence, however, was tendered supporting this assertion.

¹⁰³¹⁵ Exhibit 5D502, pp 5-6.

¹⁰³¹⁶ Sabra Defence final trial brief, paras 633-636.

¹⁰³¹⁷ Sabra Defence final trial brief, paras 35, 638, 641-646.

¹⁰³¹⁸ Sabra Defence final trial brief, paras 647-650.

¹⁰³¹⁹ Sabra Defence final trial brief, paras 34, 641-646.

¹⁰³²⁰ Sabra Defence final trial brief, paras 651, 654-655.

is supported neither by telecommunications evidence—which the Prosecution failed to investigate properly—nor by the initial police complaint reporting Mr Abu Adass as missing.¹⁰³²¹

5429. The Sabra Defence also submits that:

It is absurd to suggest that the Purple-Group was not concerned with being discovered until after the completion of the FCR [false claim of responsibility], yet in the same breath extrapolate from rows of CDRs that the users in fact had a high awareness of their security, but only for the period that fits the Prosecution's case.¹⁰³²²

5430. The Sabra Defence disputes the Prosecution's interpretation of Purple mobile inactivity on Sunday 16 January 2005. This could have been coincidental,¹⁰³²³ and the Prosecution does not take account of earlier periods of inactivity.¹⁰³²⁴ The Prosecution relies on the Purple Associate mobiles to show the inactivity was unusual, without explaining their relevance.¹⁰³²⁵ Further, given the subsequent return to open-use mobiles, it is illogical to infer that the inactivity stemmed from concern about 'forensic visibility'.¹⁰³²⁶ It is also 'entirely possible that the mutual silence on 16 January was indeed coincidental' as it is not the '*only* reasonable inference' that the Purple mobiles were involved in the alleged abduction that day.¹⁰³²⁷

5431. The Sabra Defence also submits that Mr Abu Adass may have left with Mr Khaled Taha, rather than 'Mohammed'. It points to Mr Taha's border entry and exit records; his alleged call to the Abu Adass landline on 15 January 2005; the secrecy which surrounded Taha's visit to Lebanon; and his alleged links to al-Qaeda.¹⁰³²⁸

5432. It also argues that the Prosecution failed to adequately investigate Witness 56's relative's evidence that she was told that Mr Abu Adass had left with Mr Taha. The Prosecution pointed to inconsistencies in the statement, which did not form part of the Trial Chamber's decision to exclude the relative's statement, but these were insignificant.¹⁰³²⁹

¹⁰³²⁹ Sabra Defence final trial brief, paras 26-31.

5433. Only one of the four inaccuracies the Prosecution pointed to in the relative's statement was objectively incorrect, namely, that Mr Taha was Lebanese as opposed to Palestinian.¹⁰³³⁰ The statement is consistent on other points, regarding Mr Abu Adass's increased religious fervour; his job, friends and employment; and his promise to return and help clean carpets in the family home on 16 January 2005.¹⁰³³¹ Moreover, the relative's statement is no less reliable than other hearsay evidence relied upon by the Prosecution.¹⁰³³² Also, the Prosecution did not expend its best efforts to find Mr Taha.¹⁰³³³ The decision to discontinue the investigation did not involve Mr Taylor, despite his role as Chief of Investigations, and was not formally recorded in accordance with best practice.¹⁰³³⁴

(d) Findings

i. Ahmad Abu Adass's disappearance on Sunday 16 January 2005

5434. The fact of Mr Abu Adass's disappearance from his home on Sunday 16 January 2005 is uncontested. Rather, the issue among the Parties is with whom he left and in what circumstances. The Prosecution argues that Mr Abu Adass left with 'Mohammed', while the Merhi, Sabra and Oneissi Defence argue that he left with Mr Khaled Taha. The Prosecution's position at the close of the case was that 'Mohammed's' precise identity need not be established, despite having positively pleaded—and run its case on this basis—that Mr Oneissi was 'Mohammed'.

5435. The Trial Chamber has no reason to disbelieve the evidence of Mr Abu Adass's father, as contained in the official missing person's report, that this was the day of his disappearance. It therefore finds that that is when he left his home for the last time. Similarly, the uncontested evidence is that he was never seen again. The Trial Chamber, likewise, makes the finding that his family never saw Mr Abu Adass again after he left his home in Beirut on Sunday 16 January 2005.

5436. Most of the evidence on the 'Mohammed' story (again) derives from Witness 56, Mr Taysir Abu Adass and Mr Ramadan. Their out-of-court statements were admitted under Rule 158, thus depriving the Defence of the chance to question or challenge their accounts in cross-examination.

¹⁰³³⁰ Sabra Defence final trial brief, paras 29, 31. The Sabra Defence points to F3674, Corrected Version of "Prosecution Motion for Partial Reconsideration of the Decision", 1 June 2018, paras 31-32.

¹⁰³³¹ Sabra Defence final trial brief, para. 25.

¹⁰³³² Sabra Defence final trial brief, para. 32.

¹⁰³³³ Sabra Defence final trial brief, paras 37-39.

¹⁰³³⁴ Sabra Defence final trial brief, para. 41.

As the Trial Chamber previously noted, without corroboration, it will not give any weight to the contentious matters in their accounts.¹⁰³³⁵

5437. Witness 56 is the only witness who provided evidence that ‘Mohammed’ called on the evening of Saturday 15 January 2005, and that Mr Abu Adass agreed to meet him the next day. Although Mr Abu Adass’s sister said something similar in April 2005 in a television interview that the Trial Chamber received into evidence, it was not in the form of a statement, and the Prosecution did not call this witness, similarly depriving the Defence of the possibility to cross-examine her. The Trial Chamber has therefore not assessed the interview for the truth of what was said.

5438. The other witnesses who provided evidence on this issue—Mr Taysir Abu Adass, Mr Ramadan and Witness 87—only stated that he left with ‘someone’. They did not name Mr Abu Adass’s companion. Further, Witness 56’s account of the departure is not entirely internally consistent and varied on issues such as whether Mr Abu Adass left by car, what he wore and carried, and what he said upon his departure.

5439. No telecommunications evidence is available about landline calls, such as from a payphone, to the Abu Adass family’s landline on Saturday 15 and Monday 17 January 2005, which might corroborate Witness 56’s account. This is because call data records for landline-to-landline calls such as to the Abu Adass family’s were incomplete in January 2005. However, this does not assist in corroborating Witness 56 regarding the telephone calls on 15 and 17 January. It merely shows that the absence of such records does not conflict with the witness’s evidence.

5440. Even if the Trial Chamber could give credit to Witness 56’s statements regarding the telephone calls to the Abu Adass family landline and the name of the person with whom Mr Abu Adass departed—which it does not—none of the relevant witnesses actually *saw* Mr Abu Adass leave with anyone. The best evidence on this issue, from Witness 56, merely states that the witness *heard* that Mr Abu Adass had left with ‘Mohammed’.

5441. Given its equivocal and untested nature, the evidence that Mr Abu Adass left his home with ‘Mohammed’ is insufficiently reliable to make a finding that this occurred. The evidence is in this respect so lacking that the Trial Chamber could also reasonably consider that Mr Abu Adass

¹⁰³³⁵ See para. 287.

left with someone else, or that he had departed alone. In other words, while the evidence cannot establish beyond reasonable doubt that Mr Abu Adass left with ‘Mohammed’, there are alternative possibilities reasonably available from the evidence. The Trial Chamber consequently cannot find that the Prosecution has established beyond a reasonable doubt that Mr Abu Adass left with ‘Mohammed’ on Sunday 16 January 2005. Even if proof beyond reasonable doubt is not required of this fact, there is no probative evidence that this occurred.

ii. Alternative inferences—Khaled Taha and Bilal Zaaroura

5442. Given these findings, the Trial Chamber need not make further findings on the question of whether Mr Abu Adass left with Mr Taha. However, it will do so for completeness.

5443. The Trial Chamber cannot conclude that Mr Taha telephoned the Abu Adass family landline the night before Mr Abu Adass disappeared. Only Witness 56’s Rule 158 evidence states this, and the witness’s account regarding this was inconsistent. It was also not corroborated by any call data records linking Mr Taha to calls to their home.

5444. As for Mr Taha’s possible departure with Mr Abu Adass on Sunday 16 January 2005, the Trial Chamber has heard no evidence about Mr Taha’s movements, beyond that Lebanese/Syrian border records show that he entered Lebanon from Syria on 15 January 2005 and returned to Syria on 16 January 2005. Nor does it have any evidence of Mr Abu Adass’s location beyond 16 January 2005.

5445. The Lebanese/Syrian border records do not record Mr Abu Adass as leaving Lebanon with Mr Taha on that date or on any other.¹⁰³³⁶ The Trial Chamber therefore does not have sufficient evidence capable of supporting the inference urged on it by the Merhi, Oneissi and Sabra Defence.

5446. Finally, the Trial Chamber agrees with the Prosecution that the interview of Witness 56’s relative—who stated that Mr Abu Adass had left with Mr Taha—was deficient in a number of aspects. The pertinent information in the relative’s statement regarding Mr Taha was hearsay. A competent interviewer taking a witness statement should seek to identify clearly as far as possible—and in the statement, so that it is obvious to anyone reading it—the source of any hearsay assertions. Further, whoever reviewed the relative’s statement should have noticed the potential

¹⁰³³⁶ Exhibits 5D478 and 5D479.

inconsistencies regarding Mr Taha, and ensured that the relative and Witness 56 were both re-interviewed on those points.

5447. In refusing a Sabra Defence motion to reconsider its decision not to admit the relative's statement into evidence, the Trial Chamber noted of the statement that:

On its face, this statement appears to contradict portions of Witness 056's evidence. However, the statement does not describe how the witness became aware of this information; namely, when, how, from whom or in what circumstances they obtained this information. It is thus hearsay of unknown provenance.¹⁰³³⁷

5448. These omissions detracted from the statement's reliability to the point that its only evidentiary value was to show that the Prosecution was aware of a *potential* contradiction between accounts. The statement cannot be used to establish the truth of what was said.¹⁰³³⁸

5449. However, these minor deficiencies in this aspect of a very lengthy and complicated investigation by the Lebanese investigating authorities, the UNIIC and the Prosecution, do not mean that an alternative hypothesis regarding Mr Abu Adass's disappearance is reasonably available from this evidence. At its highest, the relative's statement suggests a possible investigative lead that the Prosecution could have explored. At any rate, Mr Taylor testified that the Prosecution did consider Mr Taha's possible involvement in Mr Abu Adass's disappearance. Moreover, the Special Tribunal's Rules oblige the Prosecution to disclose potentially exculpatory information, and the Prosecution appears to have honoured this in disclosing the information in the relative's statement. This allowed the Defence to do its own investigative work.

5450. Finally, regarding the Oneissi Defence's submission of a payphone call from Mr Bilal Zaaroura to the Abu Adass family landline on Sunday 16 January 2005, there is nothing in

¹⁰³³⁷ Decision on Sabra Defence reconsideration and admission of a witness statement through Quentin Mugg, para. 8.

¹⁰³³⁸ Of the methodology employed in taking the statement, the Trial Chamber held, 'Regretfully, this 2010 witness statement is deficient in that it does not explain the provenance of this apparently contradictory information. The interviewers, it appears, neglected to ask the witness about the circumstance of obtaining this hearsay evidence, namely when, how, from whom or in what circumstances the witness obtained this information. Remarkably, they apparently overlooked asking—or, alternatively, including in the statement—whether Witness 056's relative actually obtained this information from Witness 056. Without knowing this, the information relayed by Witness 056's relative is simply an unreliable piece of hearsay.' Decision on Sabra Defence reconsideration and admission of a witness statement through Quentin Mugg, para. 24.

evidence demonstrating that the payphone call in question could be attributed to Mr Zarooura.¹⁰³³⁹ Hence, the submission has no factual basis and is disregarded.

iii. Whether Mr Abu Adass was abducted

5451. The amended consolidated indictment, as noted above at paragraphs 5318 to 5325, does not specifically allege that Mr Abu Adass was ‘abducted’ from his home. The Prosecutor pleads that Mr Merhi coordinated Mr Oneissi who participated in Mr Abu Adass’s ‘disappearance’, and additionally, coordinated Mr Oneissi’s and Mr Sabra’s activities to identify and effect the disappearance of a suitable individual.¹⁰³⁴⁰

5452. Mr Abu Adass is alleged to have left his home to meet Mr Oneissi, calling himself ‘Mohammed’.¹⁰³⁴¹ The Prosecution’s final trial brief, however, positively submits that the evidence, when considered in its totality demonstrates that Mr Oneissi and Mr Sabra participated in the selection and abduction of Mr Abu Adass ‘as a suitable scapegoat for the false claim of responsibility’.

5453. The evidence supporting this is bullet-pointed as:¹⁰³⁴²

- their mobile communication with each other and Mr Merhi during the ‘COLA phase’, which coincides with when Mr Abu Adass ‘met and later left his home with a man calling himself ‘Mohammed’;
- the pattern of Purple mobile communications, including Mr Merhi’s attributed Green network communications;
- the expert evidence that the Green network operated as ‘mission phones’ in criminal activity;

¹⁰³³⁹ The Sabra Defence sought to attribute telephone number 367 to Mr Zaaroura and to admit call sequence tables on this basis. Decision on admission of documents (Abu Adass), paras 33, 126-127, 130-131, 135. The Trial Chamber rejected these arguments insofar as they alleged possible attribution of a public payphone, admitting—following partial reconsideration—the tables on the basis that they showed calls to the Abu Adass landline. Sabra Defence seventh bar table decision (Abu Adass and Mohammed), para. 74.

¹⁰³⁴⁰ Amended consolidated indictment, para. 3 (b), (d).

¹⁰³⁴¹ Amended consolidated indictment, para. 28.

¹⁰³⁴² Prosecution final trial brief, paras 1183-1184.

- evidence linking Mr Oneissi and Mr Sabra through Mr Merhi's alleged Green network communications with Mr Badreddine, and through this to Mr Ayyash and the users of the Yellow, Blue and Red networks;
- evidence of the increase in Purple mobile communications between Mr Merhi, Mr Oneissi and Mr Sabra;
- evidence that Mr Oneissi's and Mr Sabra's presence in the vicinity of the mosque during the 'COLA phase' was exceptional;
- evidence of the exceptional inactivity of the Purple mobiles around the time of Mr Abu Adass's disappearance;
- evidence of the correspondence of Purple mobile calls with calls to Mr Abu Adass's home after his disappearance;
- evidence of the Purple mobile activity linked to the delivery of the false claim of responsibility after the attack on 14 February 2005;
- evidence demonstrating that Mr Abu Adass was in the video, and that the claim was false; and
- evidence of the cessation of use of the Purple mobiles, the Green and Red network mobiles, co-ordinated with the timing of the attack.

5454. The Prosecution asks the Trial Chamber to infer from the combination of these bullet-pointed pieces of evidence that the only reasonable inference available is that Mr Oneissi and Mr Sabra, under Mr Merhi's coordination, 'abducted' Mr Abu Adass on Sunday 16 January 2005. However, no evidence was presented about Mr Abu Adass's alleged *physical* abduction; there is no evidence about how it occurred, nor where, or by whom.

5455. The Prosecution's final trial brief states—in submitting that a closed criminal network was not required to execute the false claim of responsibility—that indeed, 'the most complex aspect of the undertaking would have been the abduction of ABU ADASS'.¹⁰³⁴³ It also asserts of the Purple

¹⁰³⁴³ Prosecution final trial brief, para. 593.

inactivity that the ‘length of time was well beyond that required to abduct and incarcerate ABU ADASS. It is consistent with participation in the creation of the videotape of the false claim of responsibility’.¹⁰³⁴⁴

5456. Despite the assertion of the complexity of this task, and of Mr Abu Adass’s incarceration, there is no evidence on the record of how this abduction is supposed to have occurred, nor where and how he was supposed to have been held or imprisoned.

5457. In the Trial Chamber’s view, only the calls to the Abu Adass home on Saturday 15 and Monday 17 January 2005 could link any of the Accused to Mr Abu Adass leaving his home on Sunday 16 January, and then only if it could positively find that Mr Oneissi was ‘Mohammed’. But as is outlined above, the evidence on this is deficient and the Trial Chamber cannot find that Mr Oneissi was the ‘Mohammed’, who is said to have called the house, solely from Witness 56’s untested Rule 158 evidence.

5458. Regarding Mr Sabra’s role, the amended consolidated indictment as the pleading instrument does not allege him to have ‘abducted’ Mr Abu Adass. While noting the apparent shift in the Prosecution’s case from start to finish on this point, no evidence links him to Mr Abu Adass’s departure from his home.

5459. The Trial Chamber accordingly is unable to positively conclude from the evidence that Mr Abu Adass was ‘abducted’, either by Mr Oneissi, acting under Mr Merhi’s coordination (or supervision), or by Mr Oneissi and Mr Sabra acting together, or by anyone else.

iv. Cell site evidence relating to Mr Merhi’s, Mr Oneissi’s and Mr Sabra’s alleged involvement in Mr Abu Adass’s disappearance

5460. The Trial Chamber has examined in detail whether the cell site evidence can unequivocally establish that Mr Merhi, Mr Sabra and Mr Oneissi participated in Mr Abu Adass’s disappearance. It is only the patterns of their movements, based on the call data records of mobiles connecting to specific cells, and the call patterns between the three mobiles that could establish the inferences urged by the Prosecution.

¹⁰³⁴⁴ Prosecution final trial brief, para. 552.

5461. The Prosecution's case on the mobile evidence is first, that calls between the Green and Purple mobiles from Wednesday 12 to Saturday 15 January 2005 showed the alleged preparation of the abduction. Secondly, the activity of the Green mobiles, and the inactivity of the Purple mobiles, on Sunday 16 January 2005 showed the involvement in Mr Abu Adass's disappearance. The third is that the activity of the three Purple mobiles on Monday 17 January 2005 aligned with the telephone calls to the Abu Adass landline.

5462. The Purple-Green mobile activity between Wednesday 12 and Saturday 15 January 2005, according to Mr Platt, had a number of distinctive features, and there were an unusual number of calls between Mr Merhi's Green mobile 071 and Mr Badreddine's Green mobile 023.

5463. Mr Badreddine initiated two of these, on Wednesday 12 January; this was uncommon. There were eighteen calls between Green 071 and Green 023 between 13 October 2004 and 7 February 2005; the longest was on Thursday 13 January 2005 and lasted nineteen and a half minutes. Mr Platt said that showed that something unusual was occurring. Mr Platt also thought that Mr Badreddine and Mr Merhi met in this period. There is, however, no evidence of such a meeting, nor if it occurred, of what occurred; it is simply a hypothesis.

5464. The Trial Chamber accepts that the mobile activity may have well had some or all of the features that Mr Platt described. The evidence, however, neither provides any inference that could be the only one reasonably available from the evidence about what was being said in the calls, nor links the Accused to any activity preparatory to the claim of responsibility. Without the evidence of Mr Oneissi meeting Mr Abu Adass in the mosque as 'Mohammed', it is the only evidence against the three Accused, except for the location of their mobiles on Monday 14 February 2005. Similarly, although Mr Platt may have correctly surmised that callers used a hospital to pass messages to call each other, his hypothesis is no more than that, and he correctly conceded this in Defence questioning.

5465. Further, while he suggested that they could have been using this form of communication if, for example, Mr Merhi's attributed Green mobile was switched off, it is a little difficult to reconcile this with the calls to the hospital on the morning of Sunday 16 January 2005. One on hand, the Prosecution is relying upon the calls between Green 071 and Mr Badreddine's Green mobiles at a supposedly crucial point, namely, the 'abduction' of Mr Abu Adass. But on the other,

it is seeking to explain the calls to the hospital by suggesting that Mr Merhi may have switched off his attributed Green mobile at this obviously critical time, namely when he was supposed to have been monitoring the abduction. Switching off a network mobile at this critical moment is incongruous especially if Mr Merhi was, as the Prosecution argued, remaining in a static location in Dahyieh for operational reasons.

5466. The Trial Chamber similarly cannot draw a conclusion beyond reasonable doubt concerning the inactivity of the Purple mobiles on Sunday 16 January 2005, or the increased activity of the Green mobiles in the morning that day.

5467. The Trial Chamber can accept that it may make sense for a group of kidnappers to take the precaution of silencing their mobiles on the day of their victim's disappearance. However, it is also equally possible that the Purple mobile users decided not to activate their mobiles on 16 January 2005 for other reasons unrelated to Mr Abu Adass's departure. Moreover, Mr Merhi's Grey mobile *was* activated in the early evening of that day, when it received two messages that had been sent to it the previous night and on the afternoon of Sunday 16 January.

5468. The absence of mobile activity does not unequivocally establish any particular action by their users, and in particular, it does not demonstrate that the Accused must have 'lured' or kidnapped Mr Abu Adass from his home that day. Similarly, the increase in Green mobile activity that morning—although coinciding with Mr Abu Adass's departure from his home—does not of itself demonstrate Mr Merhi's supervisory, or pleaded coordinating, role. Here, it is again stressed that there is no evidence of the content of any of the calls, any text messages or any meetings between the alleged conspirators.

5469. The Prosecution also points to three supposedly 'hierarchical call flows' between the Purple and the Green mobiles that demonstrate how Mr Badreddine was directing and monitoring the operation and Mr Merhi's work. Mr Platt illustrated the calls in a slide:

HIERARCHICAL GREEN/ PURPLE CALLS						
CALLS RELATED BY PROXIMITY & CALL FLOW						
12 January 2005						
TIME	DIALING PHONE LABEL	DIALING CELL	DURATION	CALL TYPE	RECEIVING PHONE LABEL	RECEIVING CELL

33

Exhibit P1934 (Corrected Chronology PowerPoint slides regarding the Purple mobiles), slide 33

5470. These are critical to its case, especially in relation to the conspiracy charged, and are the following:

- On **Wednesday 12 January 2005**, at 20:20, Mr Badreddine's Green 023 called Mr Merhi's attributed Green 071 for 101 seconds. Two minutes later, Mr Merhi's Purple 231 called Associate Purple 744, which is linked to Mr Merhi's brother, and Mr Platt stated that it had contact with other Purple mobiles; and
- Two days later, on **Friday 14 January 2005**, at 19:55, Mr Merhi's attributed Green 071 made a three and a half minutes call to Mr Badreddine's Green 023. Four minutes later, Mr Merhi's Purple 231 called Associate Purple 744. A minute later, at 20:00, Mr Merhi's Purple 231 called Mr Sabra's attributed Purple 018. At 20:01 and 20:04, Mr Sabra's Purple 018 called Mr Oneissi's Purple 095; and

- The following day, **Saturday 15 January 2005**, at 18:51, Mr Merhi's attributed Green 071 called Mr Badreddine's Green 023 for 31 seconds. At 18:52, Mr Merhi's Purple 231 called Mr Sabra's Purple 018.

5471. None of these calls, however, connected to cells relevant to Mr Abu Adass's address or the mosque. The first call, on **Wednesday 12 January 2005**, in the Trial Chamber's view is not an example of a 'hierarchical' call flow.

5472. A call from Mr Badreddine to Mr Merhi's attributed Green 071, followed by Mr Merhi calling a mobile associated with his own brother does not fit within the Prosecution's pleaded case theory that Mr Badreddine was coordinating Mr Merhi's activities, who in turn was coordinating those of Mr Oneissi and Mr Sabra. Mr Merhi is not accused of co-ordinating his brother in any kind of criminal activity. Further, it is not connected to any pleaded event. It is three days after the end of the 'COLA phase' and four days before Mr Abu Adass disappeared. The Trial Chamber cannot connect it to anything concrete pleaded against the Accused or referred to in the amended consolidated indictment as to Mr Badreddine's alleged role.

5473. The calls on **Friday 14 and Saturday 15 January 2005** are likewise devoid of context. To find a connection to any material facts pleaded against the three Accused persons—and hence to be satisfied that this is the only reasonable conclusion available from the evidence—the Trial Chamber would have to speculate as to their content.

5474. The only connection with the case against the Accused is that the calls were made over the two days before Mr Abu Adass left his home. The alleged call to the Abu Adass family home, on the Prosecution's pleading occurred on Saturday 15 January at 21:00, more than two hours after Mr Merhi's attributed Green network call to Mr Badreddine and his call to Mr Sabra's attributed Purple 018. The Trial Chamber thus has no *reliable* evidence connecting these calls to Mr Abu Adass. It may have been different had Witness 56 testified, and was questioned in court, but this did not occur.

5475. In relation to the calls to the Abu Adass residence on **Monday 17 January 2005**—the evidence for which also derives from untested Rule 158 statements—the Trial Chamber likewise cannot connect them to any of the three Accused.

5476. On the evening of 17 January, at 21:02, Mr Oneissi's Purple 095 activated COLA2 to text Mr Merhi's Purple 231, and it also received text messages. Purple 231 then called Purple 095 at 21:04 and, again at 21:05. By then, Mr Oneissi's Purple 095 was connecting to another cell, GHOBAl3, which adjoins CHATIL1, which in turn is adjacent to COLA2—as is shown on the map above at paragraph 5101.

5477. Using the electronic presentation of evidence, the Trial Chamber measured the distance between the GHOBAl mast and the COLA mast as about 1.3 kilometres. The distance from the GHOBAl mast and the mosque, and the Abu Adass residence, is about 1.4 kilometres. Additionally, the furthest point from the GHOBAl3 predicted best server coverage area and the mosque is 1.6 kilometres, and it is about the same distance from the residence. This demonstrates how far away Mr Oneissi *may have been* from the Abu Adass residence and the mosque in the second call at 21:05. He may have been in a vehicle or on a motorbike.

5478. The Prosecution submitted this call was 'consistent with reporting back that the call had been made'.¹⁰³⁴⁵ That may be so, but it is also 'consistent' with other things.

5479. Prosecution counsel also told the Trial Chamber, in closing arguments, that the 'conspirators' returned to the mosque area to use a payphone to call the Abu Adass family. This was because in their eyes Mr Abu Adass needed to be seen as a Sunni extremist who had been recruited and groomed in his local mosque, so it made perfect sense to go back to the area and to make a payphone call from nearby.¹⁰³⁴⁶

5480. The 'abductors' may well have returned to the area to make the call—if indeed Mr Abu Adass had been abducted—and from an unidentified payphone, but this is only speculative. It is not the only inference reasonably available from the evidence. Moreover, someone's mere brief presence in the form of a mobile call connecting to a cell covering the mosque—and other areas—cannot prove that they were there making a call from an unidentified payphone, and for the reasons the Prosecution urged, for there are no supporting call data records.

¹⁰³⁴⁵ Prosecution final trial brief para. 558.

¹⁰³⁴⁶ Prosecution closing submissions, T. 14 September 2018, pp 25-26, in response to a question from Judge Braidly as to why the alleged abductors had to return to the area of the Abu Adass home on 17 January 2005.

5481. The Trial Chamber has also examined the Green network calls between Mr Badreddine and Mr Merhi's attributed Green 071 on the morning of Sunday 16 January 2005. These indeed coincide with the date of Mr Abu Adass's officially reported disappearance. The Prosecution's final trial brief argues that Mr Merhi, using his Green 071 mobile, 'was responsible for overseeing the abduction of ABU ADASS and the delivery and publication of the false claim'.¹⁰³⁴⁷ Further, he 'played a critical, supervisory role that ensured the realisation of the false claim component to the assassination plot. He oversaw all key aspects of this component.'¹⁰³⁴⁸

5482. However, neither Mr Oneissi's mobile nor Mr Sabra's shared mobile were active that day. If they participated in Mr Abu Adass's leaving his home that day, as is alleged, the communication of this to Mr Merhi, and presumably then in turn to Mr Badreddine as the conspiracy's pleaded coordinator is left unexplained. Nothing connects the three Accused with Mr Abu Adass leaving his home for the last time.

5483. It follows that there is no reliable evidence connecting Mr Merhi's calls on his attributed Green network mobile to Mr Badreddine that morning with the disappearance, notwithstanding their temporal coincidence with his disappearance that day. Therefore, the only conclusion reasonably available from the cell site evidence of the mobile activities is that the Trial Chamber cannot positively find that any of the three Accused were involved in Mr Abu Adass's disappearance on Sunday 16 January 2005.

5484. This conclusion must be considered in tandem with the analysis of the cell site evidence relating to the dissemination of the claim of responsibility on the afternoon of Monday 14 February 2005, below at paragraphs 5539 to 5692. However, when the two are put together, for the reasons set out below, the conclusion remains the same.

5485. The Trial Chamber is also unable to make any finding about calls to the so-called 'Associate Purple' mobiles. There is nothing in the evidence from which the Trial Chamber could draw any inferences against the Accused in relation to these calls.

¹⁰³⁴⁷ Prosecution final trial brief, para. 599.

¹⁰³⁴⁸ Prosecution final trial brief, para. 1181.

F. Preparing the claim of responsibility—Tuesday 18 January 2005 to Sunday 13 February 2005

1. Introduction

5486. The Prosecution alleges that, first, immediately after his disappearance, probably on Tuesday 18 January 2005, Mr Abu Adass made the video containing the claim of responsibility. Second, on Wednesday 9 or Thursday 10 February 2005, the telecard used to make the calls claiming responsibility on Monday 14 February 2005 was purchased. Third, the mobile activity around these events showed the involvement of Mr Sabra, Mr Oneissi and Mr Merhi in these preparatory events.

2. Preparatory events

(a) Evidence

i. Making the video claiming responsibility

5487. The evidence that Mr Abu Adass's appearance had changed in the video is outlined above at paragraphs 5705 to 5706. The Trial Chamber received no evidence of when, where or how it was made nor, it stresses, of anything either directly or indirectly connected with it.

ii. Purchase of the telecard number 6162569 on Wednesday 9 or Thursday 10 February 2005

5488. The Trial Chamber received evidence from which it can find that the telecard used to call Reuters and Al-Jazeera on Monday 14 February 2005 was purchased several days earlier.

5489. In February 2005, Mr Abdo Fayyad worked as a salesperson at a sales office of the telecommunications company, Ogero, in Nahr Beirut. He identified his name and handwriting in an entry for the sale of a telecard number 6162569 on Thursday 10 February 2005.¹⁰³⁴⁹ In a statement to the Lebanese ISF, on 16 March 2005, and a Lebanese Investigating Judge, on 16

¹⁰³⁴⁹ Exhibit P563 (Statement of Abdo Fayyad, dated 24 March 2014), ERNs 60294372, 60294394.

August 2005, he said that he had sold the telecard on 10 February 2005, as noted in the sales records.¹⁰³⁵⁰

5490. However, in October 2007, he told UNHCR investigators that he had sold the telecard on 9 February 2005 and that the ‘head of the section’ had determined this date after checking the register. When asked specifically about the date, Mr Fayyad stated that the telecard was sold between two dates but there was no documentation to confirm the exact date.¹⁰³⁵¹

5491. As Mr Fayyad sold up to 600 telecards per day, he did not remember who bought the card and the company did not record the customers’ names or the time of purchase.¹⁰³⁵² There were no CCTV cameras in operation at the shop and Mr Fayyad could not recall an unusual or notable customer from the day of the sale.¹⁰³⁵³

(b) Submissions

5492. Regarding the purchase date of the telecard, the Prosecution did not make any submissions in its final trial brief. In closing submissions, it mentioned briefly that the telecard ‘was purchased on 10th February’.¹⁰³⁵⁴ The Merhi Defence argues that the evidence relating to the telecard is contradictory on the question of the date purchased.¹⁰³⁵⁵

(c) Findings

5493. The Trial Chamber finds that an unknown person purchased a telecard with the number 6162569 on Thursday 10 February 2005 at the Ogero sales office in Nahr Beirut. Ogero’s sales records state that this telecard was sold by Mr Fayyad on that date and there is no reason to doubt their accuracy. But in any event whether it was bought on 9 or 10 February 2005 is unimportant as nothing connects any of the Accused with the purchase.

¹⁰³⁵⁰ Exhibit P563 (Statement of Abdo Fayyad, dated 16 March 2005), ERN 60294381; exhibit P563 (Statement of Abdo Fayyad, dated 16 August 2005), ERN 60294385; exhibit P563 (Statement of Abdo Fayyad, dated 31 October 2007), ERNs 60289133-60289134.

¹⁰³⁵¹ Exhibit P563 (Statement of Abdo Fayyad, dated 31 October 2007), ERN 60289134.

¹⁰³⁵² Exhibit P563 (Statement of Abdo Fayyad, dated 24 March 2014), ERN 60294372; exhibit P563 (Statement of Abdo Fayyad, dated 16 March 2005), ERN 60294381; exhibit P563 (Statement of Abdo Fayyad, dated 31 October 2007), ERN 60289133-60289134.

¹⁰³⁵³ Exhibit P563 (Statement of Abdo Fayyad, dated 31 October 2007), ERN 60289134-60289135.

¹⁰³⁵⁴ Prosecution closing submissions, T. 14 September 2018, p. 57.

¹⁰³⁵⁵ Merhi Defence final trial brief, para. 522.

5494. Mr Fayyad has no recollection of the sale and relied on the sales records for the purchase date. Evidently, he was not shown the sales records during the UNIIIC interview, which explains why he may have been uncertain about the date then.

3. Mobile activity from Tuesday 18 January to Sunday 13 February 2005

5495. The Prosecutor pleads in the amended consolidated indictment that following the disappearance of Mr Abu Adass, Mr Merhi's Purple 231 and Mr Ayyash's personal mobile 091 were in contact with each other in late January and early February 2005.¹⁰³⁵⁶ The Prosecution's final trial brief points out that Purple and Green mobiles also had limited contact with each other during this period.¹⁰³⁵⁷

(a) Evidence

i. Alleged decline in Purple mobile activity

5496. On **Tuesday 18 January 2005**, two days after Mr Abu Adass's disappearance, Mr Oneissi's Purple 095 was active, making or receiving eleven calls.¹⁰³⁵⁸ Mr Merhi's Purple 231 and Mr Sabra's attributed Purple 018 each received one call.¹⁰³⁵⁹ The Purple mobiles were then not in contact with each other again until Friday 21 January 2005.¹⁰³⁶⁰

5497. On **Friday 21 January 2005**, there was only one call between the Purple mobiles. Mr Merhi's Purple 231 made a call of 43 seconds to Mr Oneissi's Purple 095 at 16:09.¹⁰³⁶¹ The next contacts between the Purple mobiles was on **Monday 24 January**.¹⁰³⁶² The only call between

¹⁰³⁵⁶ Amended consolidated indictment, paras 31, 37.

¹⁰³⁵⁸ Exhibit P1223 (Call sequence table of Purple 095), p. 266; exhibit P1339 (Call sequence table of Associate Purple 375), p. 35.

¹⁰³⁵⁹ Exhibit P527 (Call sequence table of Purple 231), p. 111; exhibit P1221 (Call sequence table of Purple 018), p. 285.

¹⁰³⁶⁰ Exhibit P527, p. 111; exhibit P1221, pp 285-287; exhibit P1223, pp 266-267; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 690. *See also* exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 25 (p. 202), 665-666 (p. 206). The Trial Chamber notes an error in the paragraph numbering of exhibit P1782, on pages 198-202. It appears that 23 paragraphs were inserted between paras 644 and 645.

¹⁰³⁶¹ Exhibit P527, p. 111; exhibit P1223, p. 267.

¹⁰³⁶² Exhibit P527, pp 111-112; exhibit P1221, pp 286-287; exhibit P1223, p. 268; exhibit P1339, pp 36-37; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 725.

Purple mobiles that day was at 10:11 with a 43-second call from Mr Merhi's Purple 231 to Mr Oneissi's Purple 095.¹⁰³⁶³

5498. On **Tuesday 25 January 2005**, Mr Sabra's attributed Purple 018 and Mr Merhi's Purple 231 exchanged calls in the afternoon, at 14:39 and 14:43.¹⁰³⁶⁴ The first call lasted for almost three minutes.¹⁰³⁶⁵ These were their first contacts since **Saturday 15 January**.¹⁰³⁶⁶ For both calls, Purple 018 activated ETOILE1 near Parliament.¹⁰³⁶⁷ The last call between the Purple mobiles of the day occurred at 18:39 between Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095.¹⁰³⁶⁸ Purple 018's next contact with another Purple mobile occurred ten days later, on Friday 4 February 2005.¹⁰³⁶⁹

5499. Mr Platt highlighted the significance of Mr Sabra's Purple 018's calls with Mr Merhi's Purple 231 when he was connecting to the ETOILE1 cell. This cell provided coverage near the tree where the video claiming responsibility for Mr Hariri's assassination would be placed, and is the vicinity of Al-Jazeera's office.¹⁰³⁷⁰ This is shown on the map directly below taken from the electronic presentation of evidence, on which Al-Jazeera is marked 'AJ', Reuters as 'Reu' and the tree as 'T':

The Parliament and the Reuters news agency are also located in the same area.

Exhibit P1900 (Electronic presentation of evidence snapshots showing coverage of ETOILE1, location of Al-Jazeera and Reuters offices, and the tree)

5500. Mr Platt added that Purple 018 did not frequent this area of Beirut.¹⁰³⁷¹ He thought that the presence of Purple 018 in this area was consistent with the overall preparation process including the purchase of the Mitsubishi Canter on Tuesday 25 January 2005, searching for a suitable place to hide the video tape, and identifying the payphones to call the news agencies on Monday 14 February 2005.¹⁰³⁷²

5501. The last calls between Mr Merhi's Purple 231 and Mr Oneissi's Purple 095 occurred on **Wednesday 26 January 2005**.¹⁰³⁷³

5502. The Purple mobiles were active but made no contact with each other again until **Friday 4 February 2005**,¹⁰³⁷⁴ when Purple 018 contacted Mr Merhi's Purple 231.¹⁰³⁷⁵ When it called

¹⁰³⁷¹ Gary Platt, T. 21 February 2017, pp 102-103. *See also* exhibit P1782, paras 734-735.

Mr Merhi's Purple 231 at 14:53, Purple 018 activated AICHA1 in west Beirut, which is adjacent to the ETOILE1 cell that it connected to on Tuesday 25 January 2005. AICHA1's predicted best server coverage area has a predicted border that is about one kilometre from the tree where the video was placed. According to Mr Platt, this was an unusual cell activation by Purple 018.¹⁰³⁷⁶ The next time it was in this area was on Monday 14 February 2005.¹⁰³⁷⁷

5503. From **Friday 4 February to Sunday 13 February 2005**, the Purple mobiles were active but had no contact with each other.¹⁰³⁷⁸

5504. Mr Platt testified that infrequent contacts between the Purple mobiles from **Monday 17 January until Monday 14 February 2005** demonstrate that the major part of the operation, namely the 'abduction' of Mr Abu Adass, was over. However, further activities were necessary for the execution of the false claim, such as the delivery of the video tape.¹⁰³⁷⁹

ii. Patterns of Green mobile activity and inactivity

5505. Mr Merhi's attributed Green 071 became active for the penultimate time on **Thursday 20 January 2005**.¹⁰³⁸⁰ Green 071 called Mr Badreddine's Green 023 that day at 06:01, and received a call from Green 023 at 06:56. Both calls were of less than thirty seconds.¹⁰³⁸¹

5506. Mr Platt observed that the only other time when Green 071 and Green 023 were in contact with each other so early in the morning was on Sunday 16 January 2005, when Mr Abu Adass disappeared.¹⁰³⁸² Because their next and last contact followed almost three weeks later, on Monday

¹⁰³⁷⁶ Gary Platt, T. 6 March 2017, pp 29-30; exhibit P1221, p. 288; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 946. *See also* exhibit P1782, paras 734, 873-874; exhibit P1907 (Chronology PowerPoint presentation – 3 February 2005 to 7 February 2005), slide 101.

¹⁰³⁷⁷ Gary Platt, T. 6 March 2017, p. 30.

¹⁰³⁷⁸ Exhibit P527, pp 114-116; exhibit P1221, pp 288-291; exhibit P1223, pp 276-280. Associate Purple 375 was in contact with Purple 018 on 6 February (twice) and 8 February 2005. Exhibit P1339, pp 40-42. Associate Purple 744 received three calls from Purple 095 on 5 and 6 February 2005. Exhibit P1342, pp 79-82.

¹⁰³⁷⁹ Gary Platt, T. 21 February 2017, p. 46.

¹⁰³⁸⁰ Gary Platt, T. 21 February 2017, p. 6; exhibit P1205 (Call sequence table of Green 071), p. 9; exhibit P1211 (Call sequence table of Green 023), p. 4; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 712, 716. *See also* exhibit P1782 (Narrative overview of telephone activity and relevant events), para. 676. On 20 January 2005, Green 023 was also in contact with Green 300 three times after midnight and once at 10:31.

¹⁰³⁸¹ Exhibit P1205, p. 9; exhibit P1211, p. 4.

¹⁰³⁸² Gary Platt, T. 21 February 2017, pp 6-7.

7 February 2005, Mr Platt's view was that the role of Mr Merhi's Green 071 was largely but not entirely completed.¹⁰³⁸³

5507. On **Monday 7 February 2005**, at 10:45, fourteen minutes after Mr Badreddine's Green 023 received a call from Mr Ayyash's Green 300, Mr Merhi's attributed Green 071 made a 65-second call to Mr Badreddine's Green 023.¹⁰³⁸⁴ This was the last call between Green 071 and Green 023.¹⁰³⁸⁵

5508. Mr Philips compared the Green mobiles calls and the different dates when they ceased all activity, namely Monday 7 February 2005 for Green 071 and Monday 14 February 2005 for Green 023 and Green 300. From this he concluded that Green 071's cessation of use seven days earlier than the other two Green mobiles 'may well imply' that the role Green 071 played in the Green mobiles' mission was completed earlier than that of Green 023 and Green 300.¹⁰³⁸⁶

iii. Contact between Mr Merhi's Purple 231 and Mr Ayyash's personal mobile 091

5509. On **Sunday 23 January 2005**, Mr Merhi's Purple 231 received two calls from Mr Ayyash's personal mobile 091.¹⁰³⁸⁷ Apart from the rarity of the contacts between the users of these mobiles, Mr Platt emphasised that these calls fitted into a series of eleven calls between the users of the Blue network mobiles, including Mr Ayyash's personal mobile 091. And further, that both mobiles used cells in Dahyieh, in southern Beirut, that provided overlapping coverage, namely on Alfa's BRAJNE2 and Touch's Sfeir_A.¹⁰³⁸⁸ The call data records reveal eight calls

between Purple 231 and Mr Ayyash's personal mobiles 091 and 935 between 13 November 2004 and 6 February 2005.¹⁰³⁸⁹

5510. On **Saturday 5 February 2005**, at 12:17, Mr Merhi's Purple 231, in south Beirut, called Mr Ayyash's personal mobile 091, which was then in southern Lebanon, for a minute and a half.¹⁰³⁹⁰

5511. The following day, **Sunday 6 February 2005**, Mr Merhi's Purple 231 contacted Mr Ayyash's personal mobile 091 again at 16:51.¹⁰³⁹¹ This call was followed by three calls, within a minute, from Mr Merhi's Purple 231 to the Great Prophet Hospital's (*Al-Rasoul Al-Aazam*) landline.¹⁰³⁹² At 17:37, Purple 231 received a call from Mr Ayyash's personal mobile 091, and they had two more short calls, at 18:41 and 18:59.¹⁰³⁹³ The last call was of seven seconds,¹⁰³⁹⁴ and they were activating cells in south Beirut for these calls.¹⁰³⁹⁵

5512. In Mr Platt's view, these calls demonstrated contact between the two limbs of the 'plot' for which the mobile users were responsible, namely the surveillance of Mr Hariri and the preparation of the false claim of responsibility. It goes to demonstrate either that they were not aware of the other's Green mobile or that they were 'ordered not to use' those to call each other.¹⁰³⁹⁶ It also illustrated an insulation of the third Green mobile, Mr Badreddine's Green 023, from the ongoing operations.¹⁰³⁹⁷

¹⁰³⁸⁹ The first was on 13 November 2004, and there were two calls on 23 January, one on 5 February and four on 6 February. ¹⁰³⁹⁷ Gary Platt, T. 6 March 2017, pp 89-90.

(b) Submissions

5513. According to the Prosecution, the eight inter-Purple mobile calls in the month after Mr Abu Adass's abduction, from Sunday 16 January 2005—as opposed to the twelve on Monday 14 February 2005 alone—showed a 'largely but not wholly dormant period of preparation.'¹⁰³⁹⁸

5514. The calls between Mr Ayyash and Mr Merhi on Sunday 23 January 2005 also formed part of a sequence of successive Blue network calls between Mr Ayyash and Subjects 6, 7, 9 and 816.¹⁰³⁹⁹ There were, however, calls between Mr Ayyash and Mr Merhi in late January and early February 2005¹⁰⁴⁰⁰ as well as from Mr Merhi to Mr Badreddine on Monday 7 February 2005.¹⁰⁴⁰¹

5515. In relation to the making of the video, the Prosecution's final trial brief submits that:

The length of the period of Purple inactivity, save for isolated calls largely coinciding with the time of the calls to ABU ADASS' home, varied between 48 hours to 72 hours, and only ended on 18 January 2005. This length of time was well beyond that required to abduct and incarcerate ABU ADASS. It is consistent with participation in the creation of the videotape of the false claim of responsibility.¹⁰⁴⁰²

5516. In response to this submission, the Trial Chamber posed the following question to the Prosecution:

Paragraph 552 of the Prosecution brief alleges that inactivity of the purple and associated purple mobiles for a period of 48 to 72 hours before 18 January 2005 is consistent with 'participation in the creation of the videotape of the false claim of responsibility'.

Where is the evidence for this assertion? Further, it was not pleaded in the amended consolidated indictment or pre-trial brief. What legal consequences flow from this? And is this alleged to be a material fact?¹⁰⁴⁰³

¹⁰³⁹⁸ Prosecution final trial brief, para. 561.

¹⁰³⁹⁹ Prosecution final trial brief, para. 614.

¹⁰⁴⁰⁰ Amended consolidated indictment, paras 31, 37.

¹⁰⁴⁰¹ Prosecution final trial brief, para. 615.

¹⁰⁴⁰² Prosecution final trial brief, para. 552.

¹⁰⁴⁰³ Questions for closing submissions, para. 12.

5517. In answering this in oral closing arguments, Prosecution counsel said that they no longer maintained this submission.¹⁰⁴⁰⁴ The Prosecution also submitted that possible changes to Mr Abu Adass's appearance, in the video, could be explained by a styling change.¹⁰⁴⁰⁵

5518. Prosecution counsel also submitted that Mr Abu Adass's 'drawn appearance' in the video was possibly explicable because he 'had been lured and then suddenly realized that he was part of a horrible plot ... he must have been very scared'.¹⁰⁴⁰⁶ Although the Prosecution had 'no direct evidence of who created the video', it did have evidence that 'Mr. Oneissi and Mr. Sabra were involved at each step of the way through to the delivery. They were the inner core and needed to know'.¹⁰⁴⁰⁷

5519. Regarding Mr Sabra's Purple 018 connecting to ETOILE1 and calling Mr Merhi's Purple 231 on Tuesday 25 January 2005, the Prosecution's final trial brief stated that this was 'significant because this cell is directly adjacent to cells' that Mr Sabra connected to on Monday 14 February around the tree. Further, it was Mr Sabra's first contact with another Purple mobile for ten days.¹⁰⁴⁰⁸ Prosecution counsel in closing arguments described this as 'advance planning'.¹⁰⁴⁰⁹

5520. The Merhi Defence, apparently relying upon untested Rule 158 evidence, argued that the Prosecution's assertion that the video cassette was probably made on 18 January 2005¹⁰⁴¹⁰ does not tally with the testimony of Mr Abu Adass's close associates that, in the video, Mr Abu Adass had lost weight and his beard seemed thicker.¹⁰⁴¹¹

5521. It also argued that the Prosecution produced no evidence linking the activity of Purple 231 on Monday 17 and Tuesday 18 January 2005 to the recording of the video.¹⁰⁴¹² The lack of calls between Purple 231 and Purple 095 after Wednesday 26 January 2005 show that no preparation

¹⁰⁴⁰⁸ Prosecution final trial brief, para. 932. *See also* Prosecution closing submissions, T. 11 September 2018, p. 34, where it was described as 'the advanced planning for the 14th of February by the identification of the pay phones and the location to place the videotape in advance of the 14th of February'.

¹⁰⁴⁰⁹ Prosecution closing submissions, T. 11 September 2018, p. 34.

¹⁰⁴¹⁰ Merhi Defence final trial brief, para. 518.

¹⁰⁴¹¹ Merhi Defence final trial brief, para. 518, referring to the Prosecution final trial brief, para. 1106, which refers to the evidence of Mr Taysir Abu Adass, Witness 56, Witness 87, the witness who saw 'Mohammed' in the mosque and Mr Ramadan on Mr Abu Adass's appearance in the video.

¹⁰⁴¹² Merhi Defence final trial brief, para. 519.

was occurring, and Green 071 cannot have been used to coordinate the claim of responsibility, given that it was used only once on Thursday 20 January 2005, before its last use on Monday 7 February 2005.¹⁰⁴¹³ The Merhi Defence further submits that the call made on 7 February 2005 is unexplained, given the Prosecution's argument that the preparation of the false claim was completed on 27 January 2005.¹⁰⁴¹⁴

5522. The Purple mobiles did not activate cells in the area of the store that sold the telecard between Wednesday 9 and Saturday 12 February 2005, and there is no evidence that the same telecard was delivered to Mr Sabra or Mr Oneissi to make the calls claiming responsibility for the attack.¹⁰⁴¹⁵

5523. The Oneissi Defence submits that it cannot be inferred that Mr Oneissi was involved in the creation of the video merely because his mobile was inactive, regardless of how 'exceptional' the inactivity was.¹⁰⁴¹⁶

5524. The Sabra Defence argues, regarding the calls between Mr Merhi's Purple 231 and Mr Ayyash's personal mobile 091, that the Prosecution provides no plausible reason to break an established communication protocol.¹⁰⁴¹⁷ The Prosecution provided no explanation as to why the Green network did not act as the communication hub on this occasion.¹⁰⁴¹⁸

5525. The Sabra Defence also attacked paragraph 552 of the Prosecution's final trial brief, referred to above at paragraphs 5515 to 5518, stating that 'the Prosecution's improper allegation is pure supposition'. It argues that there is 'no forensic evidence from the FCR-Tape [false claim of responsibility], from the device used to record the FCR-Video or the location in which it was recorded which would establish any link to the accused'.¹⁰⁴¹⁹ The Prosecution also cannot establish when it was recorded. In arguing that it was recorded between 16 and 18 January 2005, the Prosecution 'neglects to consider its own evidence' that the video must have been recorded

¹⁰⁴¹³ Merhi Defence final trial brief, paras 530, 543-544.

¹⁰⁴¹⁴ Merhi Defence final trial brief, para. 399.

¹⁰⁴¹⁵ Merhi Defence final trial brief, para. 522.

¹⁰⁴¹⁶ Oneissi Defence final trial brief, paras 202, 546-549.

¹⁰⁴¹⁷ Sabra Defence final trial brief, paras 536-539.

¹⁰⁴¹⁸ Sabra Defence final trial brief, para. 539.

¹⁰⁴¹⁹ Sabra Defence final trial brief, para. 794.

sometime after Mr Abu Adass's 'disappearance in light of the changes in his physical appearance'.¹⁰⁴²⁰

5526. In closing submissions, counsel for Mr Sabra argued that the Prosecution's allegation in its final trial brief that the users of Purple mobiles were implicated in creating the video 'exceed the scope of the charges'. The Trial Chamber accordingly cannot make a finding on them, otherwise it 'would be a clear violation of Mr. Sabra's rights'.¹⁰⁴²¹

(c) Findings

5527. The Trial Chamber is unable to make any findings about when the video tape was made beyond the obvious that it was made after Mr Abu Adass's disappearance on Sunday 16 January, and before Mr Hariri's assassination on Monday 14 February 2005. The evidence about his beard's possible growth is unclear and the Trial Chamber can accordingly make no finding about how much it had grown between his disappearance and whenever the video was made. His Lebanese identity card, issued in April 2002, shows him with a beard, but this is inconclusive; there was no evidence about when the photograph was taken, and beard wearing can regularly change.¹⁰⁴²²

5528. The Trial Chamber received some evidence about Mr Abu Adass's allegedly changed appearance in the video tape. However, this evidence is contested and comes from witnesses whose evidence is challenged and it was admitted under Rule 158 without cross-examination, although the Merhi and Oneissi Defence and the Prosecution used it in their final trial briefs. The Trial Chamber has given this evidence no weight, but has noted that Mr Abu Adass having a possibly changed appearance may be explicable by the circumstances of what he was doing, namely, appearing in a video taking responsibility for the murder of Mr Hariri in the name of an Islamic group.

5529. The Trial Chamber also cannot accept the Prosecution's submissions that the only inference reasonably available from the evidence is that a period of 'inactivity' of contact between Mr Merhi's and Mr Oneissi's Purple mobiles and Mr Sabra's attributed Purple mobile was that they were involved in making the video.

¹⁰⁴²⁰ Sabra Defence final trial brief, para. 795.

¹⁰⁴²¹ Sabra Defence closing submissions, T. 21 September 2018, p. 10.

¹⁰⁴²² Shaving or trimming a beard, which can only take a few minutes to do, can alter a person's physical appearance.

5530. Not making calls over a short period, especially in circumstances in which they had made and not made calls to each other over the preceding three years, is probative of not very much. This is so even when the entirety of the patterns of the calls is closely analysed. The Trial Chamber cannot infer something positive, namely that they were involved in making the video, from the negative evidence, namely the lack of calls. The submission is at best speculative, and is unsupported by the evidence. The mere lack of communication is insufficient to provide evidence of positive activity on the part of the three Accused. This is even when accepting the coincidences evident here.

5531. Added to this is the lack of evidence connecting any of the Accused with the purchase of the telecard used to call Reuters and Al-Jazeera. The Trial Chamber of course accepts that it is neither alleged that they did purchase it, nor would it have been necessary for them to have done so to have participated in the conspiracy. This is something that could have been ‘outsourced’ to a trusted source.

5532. Another piece of evidence was that on Tuesday 25 January 2005, Mr Sabra’s attributed Purple 018 activated the ETOILE1 cell, in twice calling Mr Merhi’s Purple 231 in a five-minute period in the afternoon. This cell provided predicted best server coverage to the Lebanese Parliament, Al-Jazeera and Reuters, and its predicted coverage boundaries—at their closest point—are within around 70 metres of the tree where the video was placed, at some unknown date.¹⁰⁴²³ To Mr Platt this was significant. To the Prosecution in closing arguments, it represented ‘advance planning’ for the attack.

5533. However, against this is that in ETOILE1’s predicted best server coverage area, the greatest distance from the tree is significantly further away, namely around 650 metres. There are a number of scattered pockets of coverage, and the distance between the furthest coverage edge and the tree is just over 650 metres, as is shown in the diagram below prepared by the Trial Chamber, where the tree is marked as ‘T’:

¹⁰⁴²³ The Trial Chamber, using the electronic presentation of evidence software, has measured the distance between the tree and the edge of the closest pocket of ETOILE1’s predicted best server coverage as around 70 metres.

Distance from the tree to the edges of ETOILE1's predicted best coverage boundaries

5534. Mr Sabra's attributed mobile 018, it is evident from this, could have been at or 'near' the tree, and connecting to ETOILE1, or he could have been over 600 metres away from it, or possibly further away connecting to a neighbouring cell. It is impossible to know where it was, other than that it was in the 'general vicinity', in a built-up urban area, of an object that has a pleaded significance to the case. The Trial Chamber, therefore, cannot draw an inference from this cell activation alone that Mr Sabra's shared mobile was in 'the vicinity of' the tree, Al-Jazeera and Reuters for purposes connected with making the claim of responsibility for the attack that occurred almost three weeks later.

5535. In saying this, however, the Trial Chamber has also inclusively examined the entirety of the cell site evidence presented in connection with the claim of responsibility. Whichever way it is viewed, however, a connection to a cell providing predicted best server coverage 'near' the tree—but otherwise covering the Lebanese Parliament, Al-Jazeera and Reuters—on Tuesday 25 January 2005, lacks context. Further, the Trial Chamber also cannot positively find that Mr Sabra was using Purple 018 when it activated ETOILE1.

5536. Further, the Trial Chamber cannot accept that the only reasonable inference available from calls between Mr Merhi's personal mobile 231 and Mr Ayyash's personal mobile 091 on Sunday 6 February 2005 is their lack of awareness of each other's Green mobiles or that they were 'ordered not to use' them to call each other. Conceivably, both are possible inferences. Moreover, there were eight calls between their personal mobiles from 13 November 2004 to mid-February 2005.

5537. However, against this is that while their contact on their personal mobiles demonstrates that the mobile users knew each other, there is no evidence of the reason for their contact on that day on their personal mobiles. The call data records establish that they had called each other 24 times over the preceding fourteen months, from 4 December 2003.¹⁰⁴²⁴ Mr Ayyash, moreover, is not alleged to have been involved in the false claim aspect of the conspiracy. The Trial Chamber cannot find any other evidence, relating to the development of the false claim part of the conspiracy—or any other part—that it can link to these calls. They are without context.

5538. As there is no evidence about any of these matters, there is no evidence connecting any of the Accused with the making of the video nor any of the other preparatory acts to making the claim of responsibility on Monday 14 February 2005. The Trial Chamber therefore cannot conclude that the only inference reasonably available from the totality of the evidence is that any of the three Accused were involved in making the video used in the claim of responsibility for the attack.

4. Activity of Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 on the afternoon of Monday 14 February 2005

(a) Introduction

5539. The evidence implicating Mr Merhi, Mr Oneissi and Mr Sabra in participating in the activities relating to making the claim of responsibility—namely, placing the video and letter in a box in the tree, and then calling Reuters and Al-Jazeera—comes from the call data records of their personal mobiles after the attack on the afternoon of Monday 14 February 2005. On the Prosecution's case, this must be considered in combination with the evidence of their alleged

¹⁰⁴²⁴ *For example*, exhibit P1259 (Call sequence table of ten numbers—Mr Ayyash), pp 164, 174-176, 178, 187-189, 194-195, 204, 225, 243-244, 261, 268, 281.

involvement in Mr Abu Adass's disappearance in January 2005, including that of his alleged 'abduction'. The evidence in this respect is completely circumstantial.

5540. Mr Platt—the Prosecution's expert on the surveillance of criminal networks and the identification and organisation of covert communication networks—provided his opinion evidence on the movements of the three mobiles *vis-à-vis* the calls to Reuters and Al-Jazeera. He concluded that Mr Oneissi and Mr Sabra were involved in making or monitoring the calls and watching the tree to ensure that the video was collected for immediate broadcast.

5541. He analysed the call data records between 14:03 and 17:24 on Monday 14 February 2005 and noted that the Purple mobiles of Mr Merhi, Mr Oneissi and Mr Sabra called each other twelve times. This, he concluded, represented a peak in Purple mobile activity similar to that during the so-called 'COLA phase' between Wednesday 29 December 2004 and Friday 7 January 2005.¹⁰⁴²⁵

(b) Stability of the networks on Monday 14 February 2005 after the explosion

5542. Another important feature of the case is the stability of the two mobile telecommunications networks on the afternoon of Monday 14 February 2005 in Beirut after the attack on Mr Hariri, from 12:55 onwards, and especially in the area relatively near the crime scene. The Trial Chamber has carefully considered the evidence of network congestion in assessing the reliability of the cell site evidence for that afternoon.

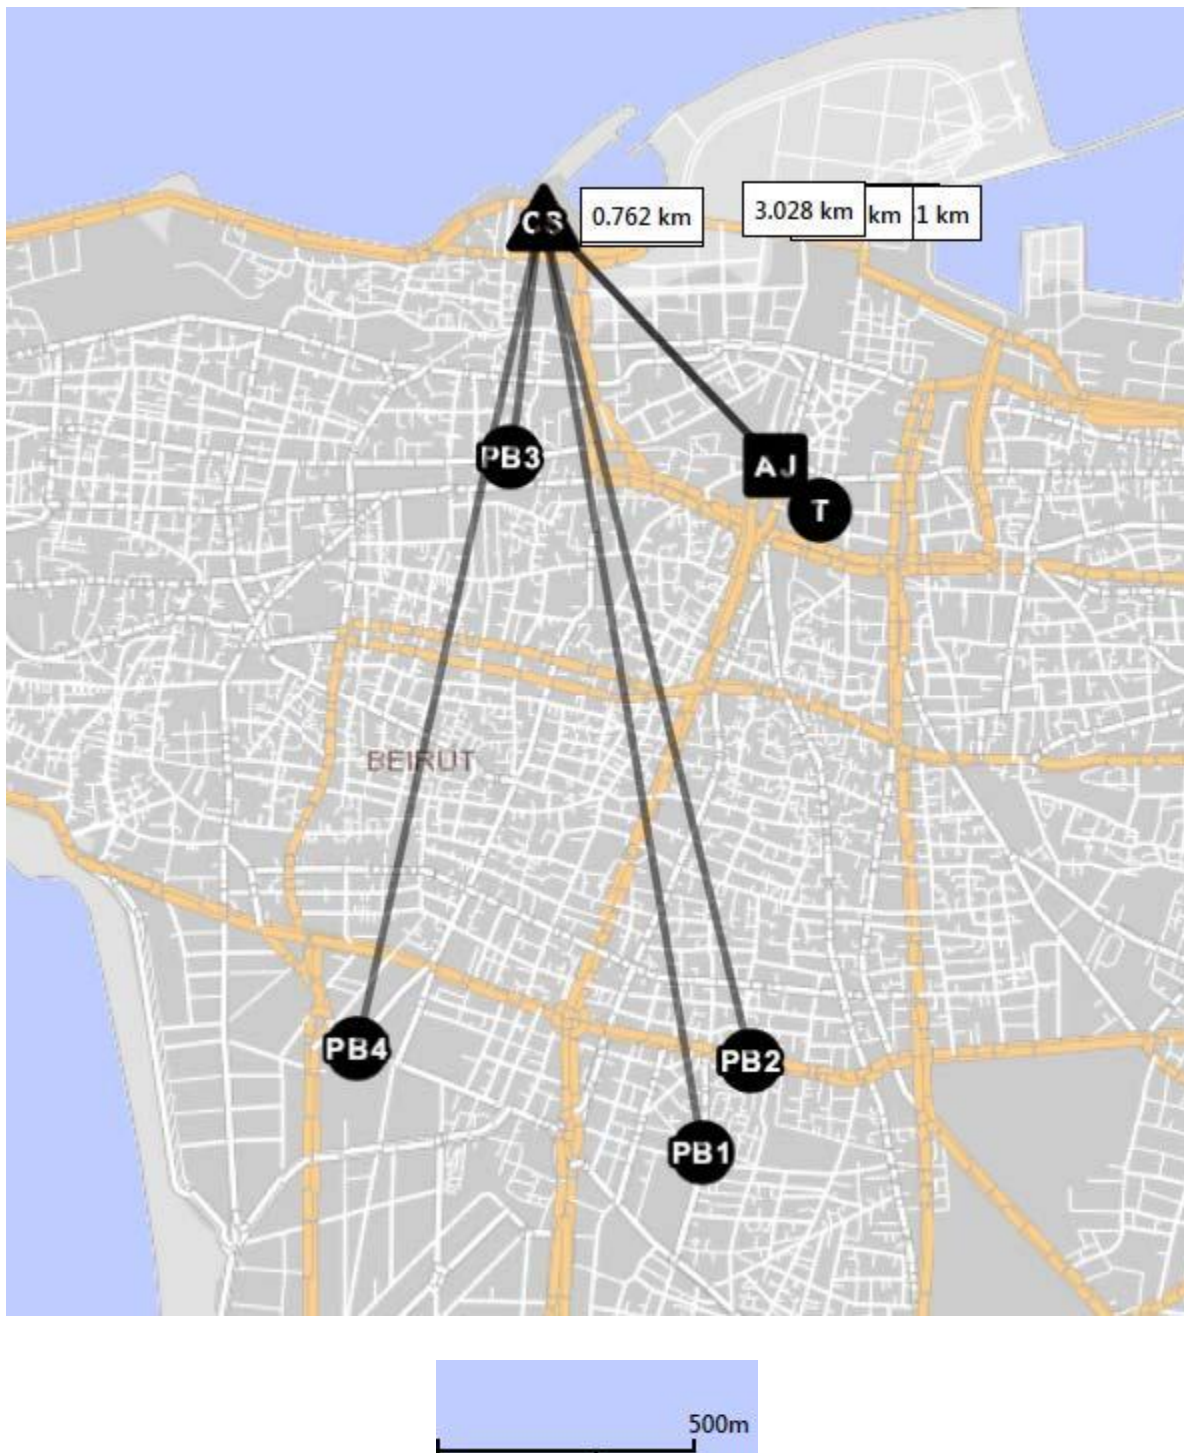

5543. The four payphones from which the calls to Reuters and Al-Jazeera were made, and the tree and the Al-Jazeera offices are all within three kilometres of the crime scene. Payphone three is only around 750 or so metres away, while the Al-Jazeera office is about one kilometre and the tree around 1,200 metres from it.¹⁰⁴²⁶

5544. The Trial Chamber has used the electronic presentation of evidence to mark the distances on a diagram, below, where the tree is marked as 'T', the Al-Jazeera office as 'AJ', the payphones as 'PB' and the crime scene as 'CS':¹⁰⁴²⁷

¹⁰⁴²⁵ Gary Platt, T. 14 March 2017, pp 73-75. *See also* exhibit P1780 (Chronology of relevant events), pp 32-33; exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 1057-1074; exhibit P1934 (Corrected Chronology PowerPoint slides regarding the Purple mobiles), slide 7.

¹⁰⁴²⁶ Payphone two is about 2.75 kilometres, payphone four about 2.7 kilometres and payphone one about three kilometres distant.

¹⁰⁴²⁷ The overlap of the distance text boxes on the map is due to an unresolvable technical issue.

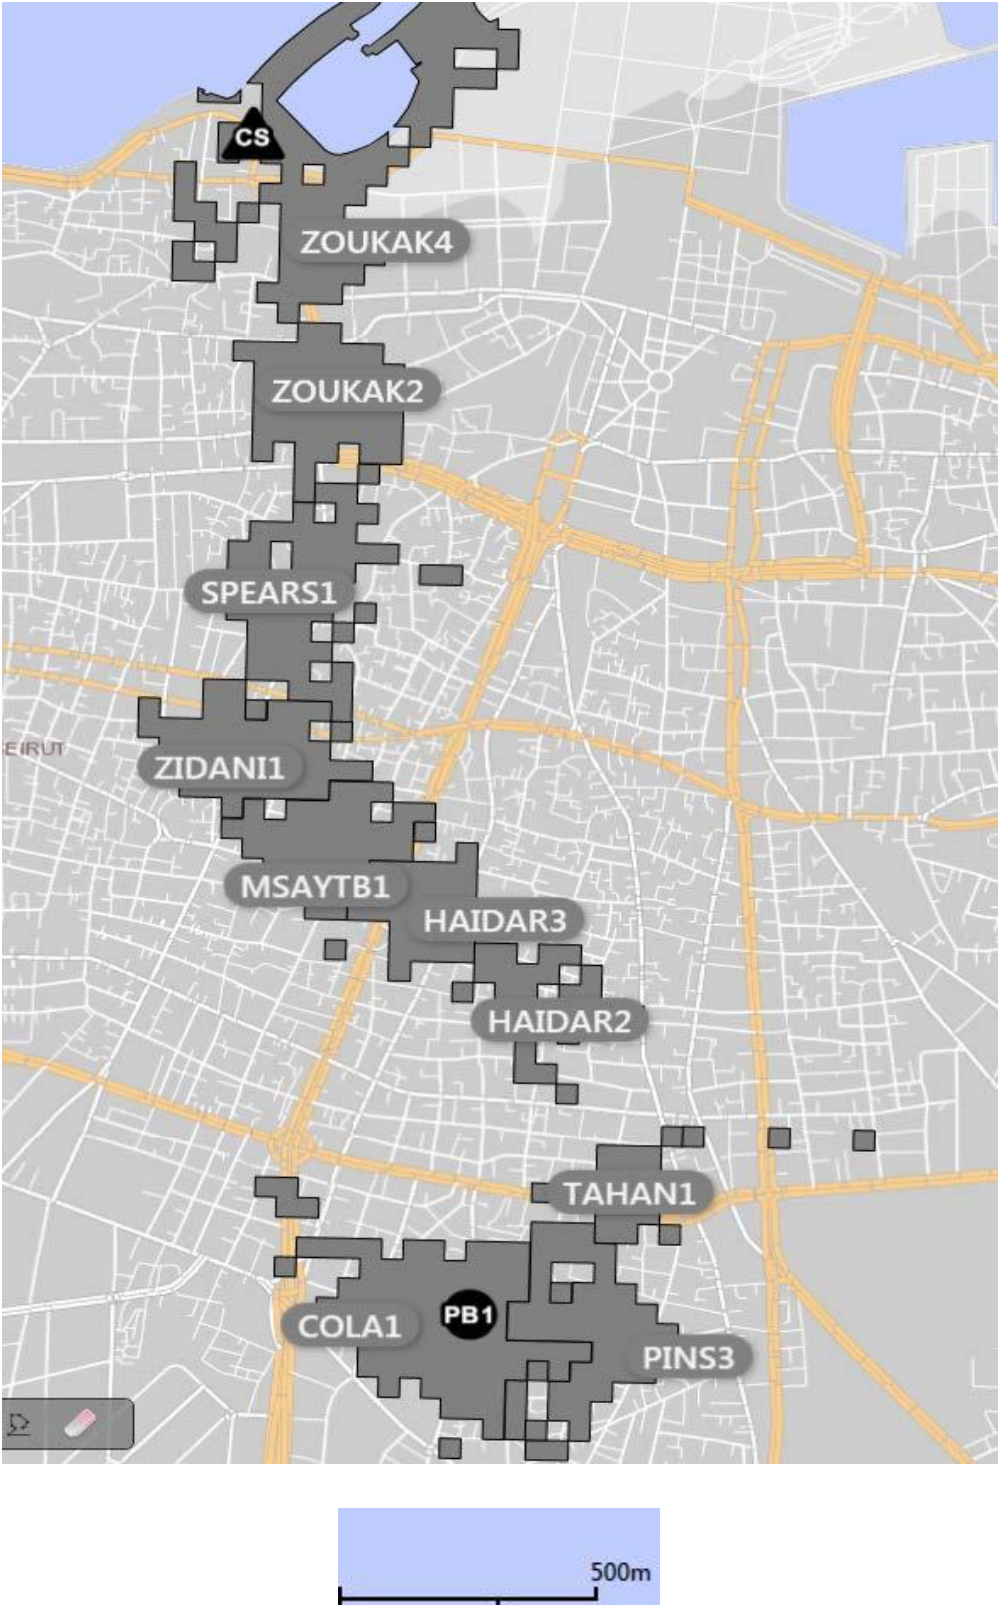

Distances from the crime scene to the four payphones, the tree and the Al-Jazeera office

5545. From payphone one, the furthest payphone from the crime scene, there were eight contiguous cells between that covering the payphone, TAHAN1, and that covering the scene of

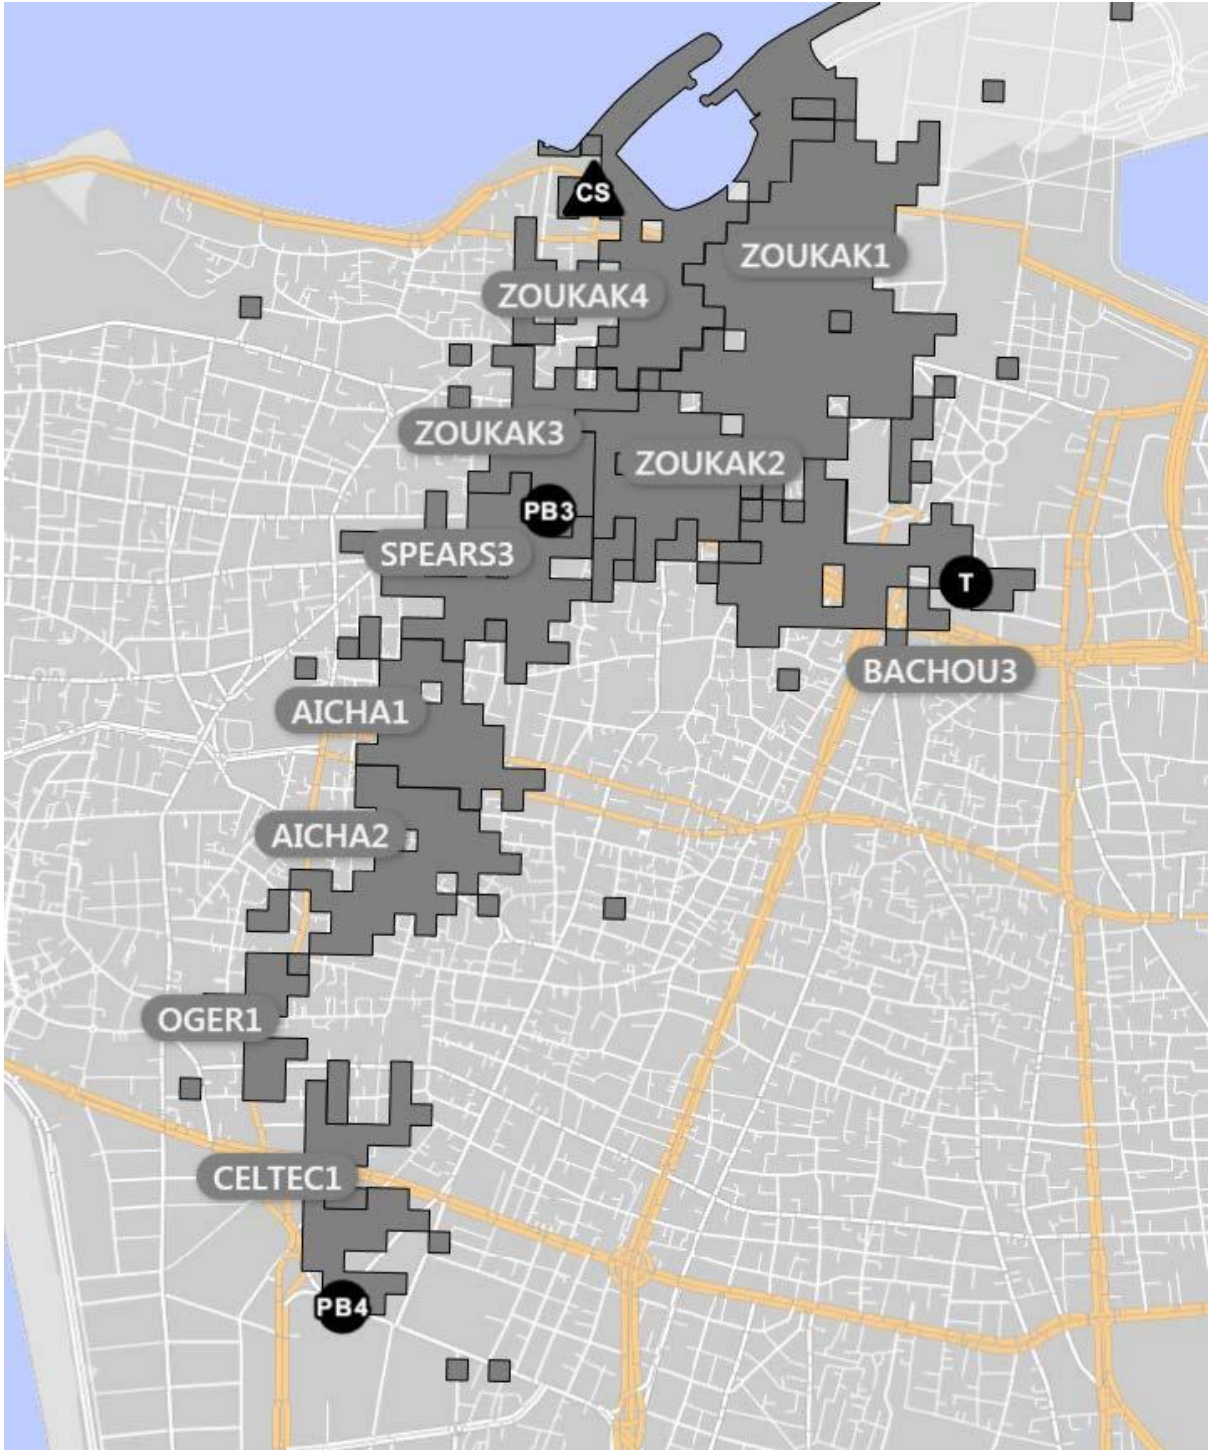

the explosion, ZOUKAK4.¹⁰⁴²⁸ By contrast, there was only one cell between payphone three and the crime scene, and one between the tree and the crime scene.¹⁰⁴²⁹ The Trial Chamber has used the electronic presentation of evidence in the map below to show the number of cells between the crime scene and the payphones and tree. This is to show their relative proximity to the crime scene, and hence, areas of network congestion after the attack.

¹⁰⁴²⁸ ZOUKAK2, SPEARS1, ZIDANI1, MSAYTB1, HAIDAR3, HAIDAR2, PINS3 and COLA1.

¹⁰⁴²⁹ Either ZOUKAK1, ZOUKAK2 or ZOUKAK3.

Cells between the crime scene and payphone one

Cells between the crime scene and payphones three, four and the tree

5546. The Trial Chamber received evidence that the networks experienced severe congestion in the aftermath of the attack.

5547. Mr Philips and Witnesses 705 and 707 gave general and specific testimony on network congestion. Witness 705, as the Touch representative, described what Touch referred to as the ‘handover’ of a call from a cell that had reached a predetermined capacity, to another.¹⁰⁴³⁰ He described this occurring during periods of congestion triggered during peak hours of cell traffic, or by particular events.¹⁰⁴³¹ The call data records do not register handovers;¹⁰⁴³² the start cell is registered and the end cell may also appear.¹⁰⁴³³

5548. Alfa used the expression ‘directed retry’ to explain the same technical procedure, which is common to telecommunication networks. Witness 707, the Alfa representative, and Mr Philips agreed that an event of this proportion—which would include people constantly trying to call their relatives in the hours after the attack and considerable media interest—would result in a high density of calls, thus causing significant network congestion.¹⁰⁴³⁴

5549. Witness 707 examined an extract from an Alfa log of incidents from across the network on the afternoon of the attack, and explained that such an explosion would cause considerable congestion on the network mobile switching centres (MSCs), which would have reached their maximum capacity to handle calls.¹⁰⁴³⁵ Alfa had six MSCs in 2004 to 2005.¹⁰⁴³⁶ The incidents in the log, exhibit 4D263, include a power failure in the COLA cell and abnormalities in the MSCs from over-congestion after the explosion. MSCs 1 to 6 all record that they experienced congestion due to the explosion.

¹⁰⁴³⁰ Witness PRH705, T. 6 May 2016, p. 10; exhibit P826 (Witness PRH705’s statement of 16 November 2015), paras 55, 57.

¹⁰⁴³⁴ John Edward Philips, T. 26 August 2015, pp 50-52; Witness PRH707, T. 22 April 2016, pp 56-57. *See also* Gary Platt, T. 6 April 2017, pp 107-108.

¹⁰⁴³⁵ Exhibit 4D263 (Extract from an Alfa business record which is a log of incidents that occurred across the Alfa network on 14 February 2005); Witness PRH707, T. 25 July 2016, pp 46-53, 55-57, 60-61, 92-93.

¹⁰⁴³⁶ Witness PRH707, T. 10 February 2016, p. 64. There is no evidence on the record about which covered the cells relevant to the case.

5550. It also shows the cells directly affected by the explosion and the effect of these on neighbouring cells and the overall coverage of the Alfa network.

5551. The expert and technical evidence was that in congestion or overloading of the best serving cell, the network allocates the call either through a directed retry into the six neighbouring cells, or sends a busy response to the caller and does not allocate the call until the best serving cell is available again.¹⁰⁴³⁷ Under normal circumstances in a directed retry, the call data records register not the best serving cell, but rather the cell to which the call is transferred. The call data records do not show if a directed retry occurred. Similarly, the handover from the best serving cell to another does not appear in the call data records; only the cell used at the beginning of the call is normally recorded.¹⁰⁴³⁸

5552. Concerning the experiences of those attempting to make calls after the explosion, the Trial Chamber received evidence from a number of victims participating in the proceedings that their calls to relatives did not go through because the mobile networks were down on the afternoon of the attack.¹⁰⁴³⁹ Mr Ben-Jeddo also testified that in the hours after the explosion, he tried to call a colleague from Al-Jazeera several times before his call went through, but then disconnected. He also saw many people who could not make calls because the networks were congested.¹⁰⁴⁴⁰

5553. Witness 256, who was in Mr Hariri's convoy on the day of the attack, in the minutes after the attack tried to call the Quraitem Palace, but there was no network coverage at the explosion site.¹⁰⁴⁴¹ Witness 115, the Al-Jazeera technician who went to collect the false claim video and the letter, observed that the mobile networks were very busy after the explosion and that the closer one was to the explosion site the more difficult it was to make calls. On the afternoon of the attack,

¹⁰⁴⁴¹ Witness PRH256, T. 22 October 2014, p. 19.

his Al-Jazeera colleagues experienced similar difficulties calling the channel headquarters in Doha, Qatar.¹⁰⁴⁴²

5554. The Parties made submissions on the congestion, and it is appropriate to deal with them here. The Prosecution's final trial brief made no specific submissions on network congestion on the afternoon of 14 February 2005. In general terms, and relying on Mr Philips's evidence, it submitted that:

even in exceptional circumstances where a mobile phone user is not within the best server coverage area of the connecting cell sector, this means the user is in a somewhat enlarged area—the best server coverage area plus—and not a completely different area.¹⁰⁴⁴³

5555. The Merhi Defence argued that because of the lack of information about the frequency of congestion in the mobile networks in Lebanon in 2005, it was impossible to determine how often a mobile activated neighbouring cells due to congestion, including by analysing the call data records, which did not register the cases of directed retry. Further, according to Mr Philips, the directed retry function can consider up to twenty usable cells before selecting the six whose signal is the strongest at the exact time of the call. Those six cells are not necessarily the closest to the 'best serving cell'.¹⁰⁴⁴⁴

5556. This is contrary to the Prosecution submission that because the best server coverage extends over smaller areas in urban environments, a mobile which connected to neighbouring cells was likely to be closer to the congested best serving cell.¹⁰⁴⁴⁵

5557. The Oneissi Defence submitted that the following three things are sufficient to infer inconsistencies in the cell site analysis relating to the afternoon of the attack.¹⁰⁴⁴⁶ These are first, Witness 707's account on the network congestion resulted from the explosion on 14 February

¹⁰⁴⁴² Witness PRH115, T. 8 July 2015, p. 67.

¹⁰⁴⁴³ Prosecution final trial brief, para. 61.

¹⁰⁴⁴⁴ Merhi Defence final trial brief, paras 127-128. The Ayyash, Oneissi and Sabra Defence similarly submitted that network congestion and directed retries at the material time negatively affect the accuracy of the cell site analysis. Ayyash Defence final trial brief, para. 199; Sabra Defence final trial brief, paras 133, 783; Oneissi Defence final trial brief, paras 143-147, 188, 568.

¹⁰⁴⁴⁶ Oneissi Defence final trial brief, paras 592-593.

2005; second, Alfa's incidents log from the same day;¹⁰⁴⁴⁷ and third, Witness 115's account of activating a cell 300 metres away from where he used his mobile.

5558. In response, in oral closing arguments, the Prosecution rejected that, in case of congestion, in an urban area where a mobile cannot connect to the best serving cell, that the mobile must be in a potentially larger area because of the number of surrounding cells.¹⁰⁴⁴⁸ This contradicts Witness 705's and Mr Philips's evidence¹⁰⁴⁴⁹ that, where the cells are next to each other, they provide coverage for smaller geographic areas.¹⁰⁴⁵⁰ The Prosecution submitted that, based on Mr Philips's evidence, this occurrence would be highly exceptional and that there is no evidence that this had occurred in any calls.¹⁰⁴⁵¹

5559. The evidence of Witnesses 705, 707¹⁰⁴⁵² and Mr Philips is uncontested that in network congestion, and regardless of whether it is an urban or a rural location, the call from the congested cell normally will be redirected, or 'handed over' into one of six, usually neighbouring, cells.

5560. From the combination of the expert and technical evidence and that from witnesses who were trying to use the networks after the attack, the Trial Chamber can safely conclude that the two networks were experiencing substantial congestion on the afternoon of Monday 14 February 2005.

5561. The Alfa records show that the mobile switching centres were experiencing congestion and overloading. The result would have been the networks attempting to route calls from the best serving cell to a neighbouring one. Irrespective of the congestion that afternoon, it is in any event impossible to determine the extent of directed retries from call data records alone. The Prosecution did not provide any relevant statistics on congestion frequency relating to Alfa or Touch.

¹⁰⁴⁴⁷ Exhibit 4D263.

¹⁰⁴⁴⁸ Prosecution closing submissions, T. 11 September 2018, pp 56-59.

¹⁰⁴⁴⁹ Witness PRH705, T. 6 May 2016, pp 6, 10; John Edward Philips, T. 20 August 2015, p. 6.

¹⁰⁴⁵⁰ Prosecution final trial brief, paras 58-59; Prosecution closing submissions, T. 11 September 2018, p. 58.

¹⁰⁴⁵¹ Prosecution closing submissions, T. 11 September 2018, pp 58-59.

¹⁰⁴⁵² Witness PRH707, T. 12 February 2016, pp 59, 62, 64; exhibit P549, p. 35.

5562. A careful review of the evidence leads to the conclusion that in congestion such as that experienced after the explosion, numerous calls would have been redirected around the network cells.¹⁰⁴⁵³

5563. This must affect the reliability of the cell site evidence for the afternoon of Monday 14 February, and specifically whether the mobiles used by Mr Oneissi and Mr Sabra were connecting to the best serving cell or to one of six neighbouring cells, or—with the scattered pockets of possible coverage—to other cells. This inevitably effects the strength of the Prosecution’s case as to where the two Accused were when their mobiles made the calls registered in the call data records. This is important because the Prosecutor has pleaded their activities that afternoon with precision. The network congestion and inevitable directed retries must therefore diminish the reliability of the cell site evidence after 12:55 on Monday 14 February 2005.

5564. With this in mind, the Trial Chamber has carefully scrutinised each call attributed to Mr Oneissi on Purple 095 and Mr Sabra on his shared Purple 018 that afternoon.

(c) Evidence

i. The morning of Monday 14 February 2005

5565. In the morning of **Monday 14 February 2005**, Mr Sabra’s attributed Purple 018 and Mr Oneissi’s Purple 095 activated cells in southern Beirut. Mr Sabra’s attributed Purple 018 received calls at 10:39, connecting to SFEIR3/MIKAEL2, and at 10:40, connecting to BACHA2/SFEIR3. Mr Oneissi’s Purple 095 made its first call of the day at 12:16 from SFEIR3. Mr Merhi’s Purple 231 did not make or receive any calls in the morning.¹⁰⁴⁵⁴

ii. Call to Reuters at 14:11—payphone 1, COLA1 cell

5566. The attack occurred at 12:55. Less than an hour and a half after the attack, at 14:11, in a call lasting 41 seconds, Reuters was contacted by someone speaking in classical Arabic, with an

¹⁰⁴⁵³ See sub-section (F) (4) (b) ‘Stability of the networks on Monday 14 February 2005 after the explosion’, above.

¹⁰⁴⁵⁴ Exhibit P527 (Call sequence table of Purple 231), p. 116; exhibit P1221 (Call sequence table of Purple 018), p. 291; exhibit P1223 (Call sequence table of Purple 095), p. 280; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1204. See also exhibit P1782 (Narrative overview of telephone activity and relevant events), paras 1053-1055; exhibit P1923 (Chronology PowerPoint presentation – 13 February 2005 to 16 February 2005), slides 149-151.

accent that sounded unnatural and unusual. Witness 12, who took the call, did not hear any background noise on the other end of the line.¹⁰⁴⁵⁵

5567. The evidence of the movements of Mr Oneissi's and Mr Sabra's mobiles in the preceding forty-five minutes is the following: forty minutes before the call to Reuters, at 13:33, Mr Sabra's attributed Purple 018 activated SFEIR3 in southern Beirut;¹⁰⁴⁵⁶ thirteen minutes later, at 13:46, Mr Oneissi's Purple 095 also activated SFEIR3.¹⁰⁴⁵⁷

5568. Thirteen minutes later, at 13:59, Mr Oneissi's Purple 095 activated CBOURJ3, which was west of SFEIR3; it ended the call on SABRA3, which bordered CBOURJ3 to the north.¹⁰⁴⁵⁸ At 14:01, Mr Sabra's attributed Purple 018 also activated SABRA3.¹⁰⁴⁵⁹ Mr Platt concluded that Mr Sabra's Purple 018 and Mr Oneissi's Purple 095 were 'travelling together in the same direction'.¹⁰⁴⁶⁰

5569. At 14:03, Mr Merhi's Purple 231, which activated SFEIR3 in southern Beirut,¹⁰⁴⁶¹ called Mr Sabra's attributed Purple 018 for 26 seconds.¹⁰⁴⁶² Purple 018 activated first GHOBAl3, north of its previous location, and then CHATIL1, which was still further north in the direction of the payphone from which the call to Reuters was made less than eight minutes later, at 14:11.¹⁰⁴⁶³

5570. No call data records evidence places either Mr Oneissi's Purple 095 or Purple 018 in the immediate vicinity of the payphone from which the call to Reuters was made at 14:11, when it was made.¹⁰⁴⁶⁴ While COLA1 provided predicted best server coverage to the payphone, its furthest

¹⁰⁴⁶³ Exhibit P1221, p. 291; Gary Platt, T. 15 March 2017, pp 30, 36-37; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1221. See also exhibit P1923, slide 156; exhibit P1780, p. 32.

¹⁰⁴⁶⁴ The public payphone was near Abou Shaker Square—El-Mazraa, Abou Shaker Street next to Mufti Hasan Khaled Organization for Education—set on a triangle shaped concrete island in a busy square. See above, at para. 4840.

predicted boundary point from the payphone is 610 metres away, and in a heavily built-up area. GHBOBAI3's closest predicted boundary to the first payphone box is 635 metres away, while its furthest is around 1.6 kilometres distant. With CHATIL1 the figures are 329 metres at its closest and about one kilometre at its furthest.

5571. The Trial Chamber, using the electronic presentation of evidence, has prepared the following map showing the three cells, with the first and second payphones marked as 'PB1' and 'PB2':

Map of COLA 1, CHATIL1 and GHOBAl3 and first and second payphones

iii. First call to Al-Jazeera, at 14:19—payphone 2, TAHAN1 cell

5572. The first call to Al-Jazeera occurred at 14:19. This was the call that Witness 6 first took and then handed to Mr Ben-Jeddo. Both witnesses stated that the caller spoke in classical Arabic,

although Witness 6 had the impression that the caller was putting on a Lebanese accent. The call lasted 61 seconds and Witness 6 could hear background noise, such as cars passing by.¹⁰⁴⁶⁵

5573. Payphone two is within TAHAN1's predicted best server coverage area. There is no evidence putting either Mr Oneissi's or Mr Sabra's mobiles in that cell. However, seventeen minutes after this call, at 14:36, Mr Merhi's Purple 231 made a call to Mr Sabra's attributed Purple 018, which activated GHOBAl3.¹⁰⁴⁶⁶

5574. Two minutes after this call, at 14:38, Mr Oneissi's Purple 095 activated GHOBAl3 and at 14:41, GHOBAl2/CBOURJ3.¹⁰⁴⁶⁷ This covers an area approximately one to one and a half kilometres south of the two payphones used to call Reuters at 14:11 and Al-Jazeera at 14:19.¹⁰⁴⁶⁸

5575. Mr Platt was of the view that Purple 018 and Purple 095 activating the same cell, GHOBAl3, within a minute of each other is consistent with Mr Oneissi and Mr Sabra travelling together.¹⁰⁴⁶⁹ Shortly afterwards, at 14:49, Mr Oneissi's Purple 095 activated SIMON1, which is north of the airport.¹⁰⁴⁷⁰

5576. The map below illustrates the Purple mobile activity before and after the call to Reuters and the first call to Al-Jazeera.¹⁰⁴⁷¹ The payphones from which these two telephone calls were made were—in a straight line—339 metres apart, on Saeb Salam Boulevard facing the Arab bank and Mazraa Corniche.¹⁰⁴⁷² The map shows the movements of Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 in respect of payphones one and two between 13:33 and 14:49:

¹⁰⁴⁶⁵ See sub-section (B) (1) (b) 'First call to Al-Jazeera at 14:19'.

¹⁰⁴⁶⁶ Exhibit P1221, p. 291; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1225. See also exhibit P1780, p. 32; exhibit P1782, para. 1063; exhibit P1923, slides 157-158. According to the evidence, at 14:26, Purple 231 made a call to an unattributed number, ending in 885, the only other call that it made all day. Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1224; exhibit P527, p. 116.

¹⁰⁴⁶⁷ Exhibit P1223, p. 280; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1226. See also exhibit P1923, slides 159-160; exhibit P1780, p. 32.

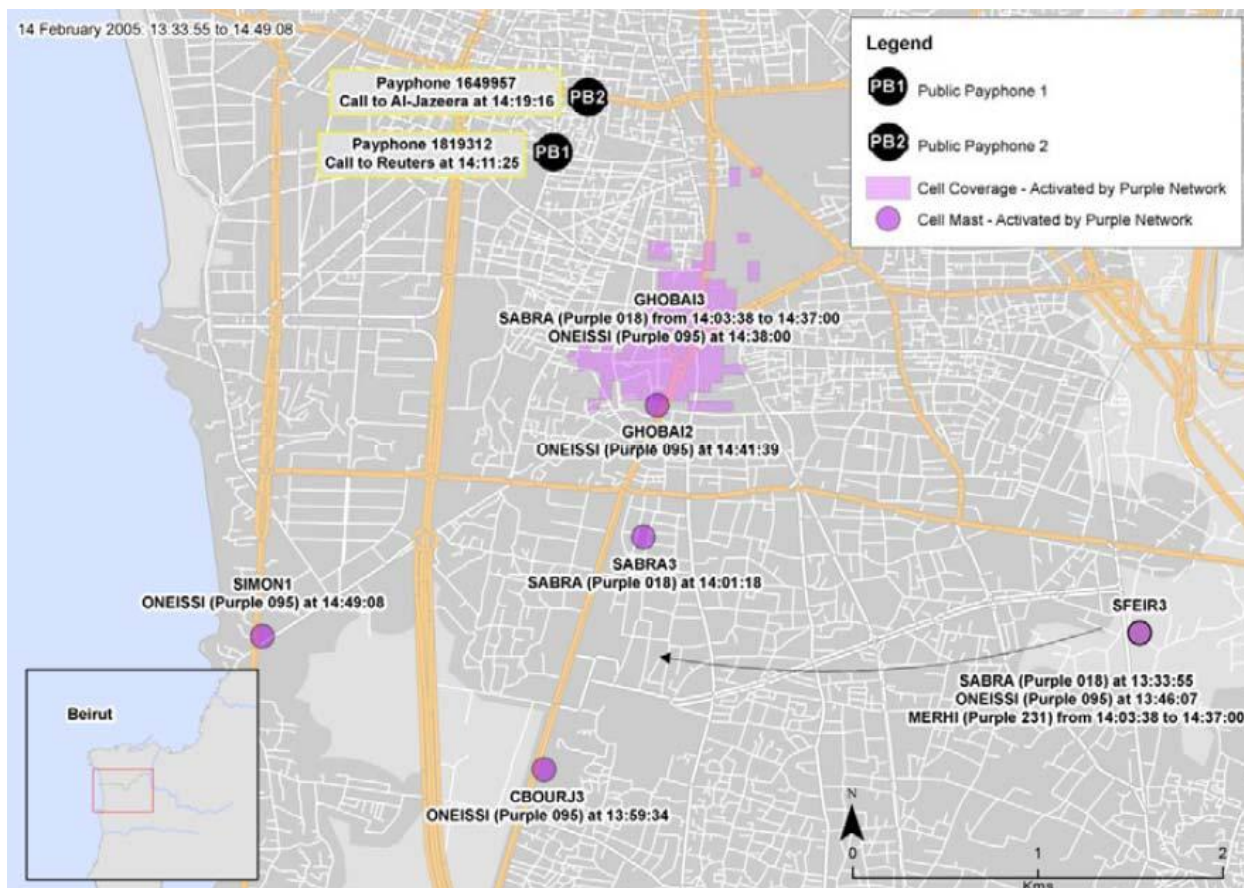

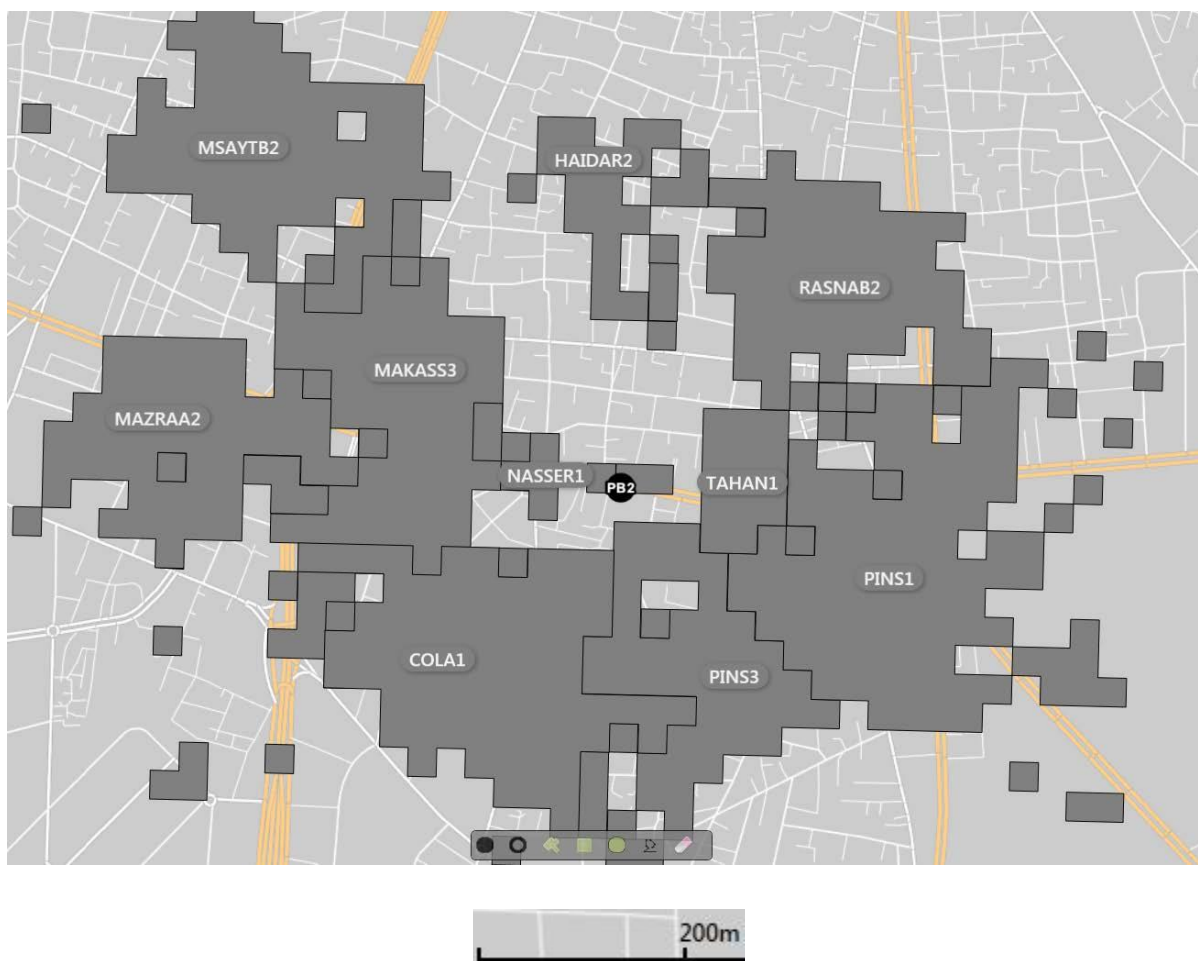

Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1227

5577. TAHAN1 provided predicted best server coverage to the second payphone. NASSER1 was adjacent and very close to the payphone. PINS3 was adjacent to TAHAN1.¹⁰⁴⁷³ The Trial Chamber's calculations, using the electronic presentation of evidence software, show that TAHAN1's furthest outer 'border' of its predicted best server coverage is around 390 metres from the payphone, while NASSER1's is around 295 metres away from it.

5578. A diagram, prepared with that software, showing the cells around the second payphone is below; it does not depict the coverage area of the MAKASS1 and 2 cells, immediately to the payphone's north, for which the Trial Chamber received no shapefiles. The second payphone is marked as 'PB2':

¹⁰⁴⁷³ Exhibit P592.1 (Electronic Presentation of Evidence software).

Cells around the second payphone

iv. Second call to Al-Jazeera at 15:27—payphone 3, BACHOU2

5579. The three Purples mobiles were then inactive for over an hour, between 14:49 and 15:53.¹⁰⁴⁷⁴

5580. The second call to Al-Jazeera occurred at 15:27, when Witness 6 received the call and passed it on to Mr Ben-Jeddo. The caller, according to Mr Ben-Jeddo, was a different person to the first caller, and this time was speaking in ‘proper Arabic’, with an accent similar to Lebanese. The line was clear, unlike in the first call, but some background noise suggested that the speaker

¹⁰⁴⁷⁴ Exhibit P527, p. 116; exhibit P1221, p. 291; exhibit P1223, pp 280-281.

was in a public area. The caller told Mr Ben-Jeddo that there was a video tape on a tree near the Al-Jazeera building that must be retrieved within fifteen minutes or it would not be found.¹⁰⁴⁷⁵

5581. The call data records reveal that the Al-Jazeera's landline office received a 54-second call at 15:27 from a public payphone in Rue Banque du Liban facing the Abou Bakr El Saddik mosque in Hamra, using the same telecard, 6162569.¹⁰⁴⁷⁶ There was no call data records evidence placing either Mr Oneissi or Mr Sabra near the payphone from which the call was made, at the time it was made.

5582. At 15:53, almost half an hour after the second call to Al-Jazeera, and after over an hour of inactivity by the Purple mobiles, Mr Merhi's Purple 231, Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 became active again.¹⁰⁴⁷⁷

5583. Between 15:53 and 16:02, the three Purple mobiles exchanged nine calls.¹⁰⁴⁷⁸ At 15:53:47, Purple 018 connected to cell SPEARS3, when it received a six-second call from Mr Merhi's Purple 231, which was still in south Beirut. SPEARS3 provided predicted best server coverage to an area very close to the payphone from which the second call to Al-Jazeera was made, at 15:27.¹⁰⁴⁷⁹

5584. Mr Platt testified that in his opinion the six-second call was consistent with the user of Mr Merhi's Purple 231 asking the user of Mr Sabra's Purple 018 for a status update.¹⁰⁴⁸⁰

5585. BACHOU2 provided the predicted best server coverage to this payphone, while SPEARS3 and ZOUKAK3 were adjacent and very close to it. BACHOU3 provided the predicted best server coverage to the tree. BNPI3 was adjacent and very close to the tree. ETOILE2 and MARTYR1 were also adjacent to BACHOU3.¹⁰⁴⁸¹

5586. The Trial Chamber has calculated that the outer 'edge' of the predicted best server coverage of BACHOU2 is approximately one kilometre away from the payphone, noting that the pocket providing predicted coverage to the payphone is scattered and well away from the main shapefile

¹⁰⁴⁷⁵ See sub-section (B) (1) (c) 'Second call to Al-Jazeera at 15:27'.

¹⁰⁴⁷⁶ See above, at para. 4855.

¹⁰⁴⁷⁷ Gary Platt, T. 15 March 2017, pp 46-47, 49-50, 52.

¹⁰⁴⁷⁸ Gary Platt, T. 15 March 2017, pp 50, 55.

¹⁰⁴⁷⁹ Exhibit P1221, p. 291; exhibit P527, p. 116; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1235. See also exhibit P1780, p. 32; exhibit P1782, para. 1066; exhibit P1923, slides 165, 167.

¹⁰⁴⁸⁰ Gary Platt, T. 15 March 2017, pp 51-52.

¹⁰⁴⁸¹ Exhibit P592.1.

of the coverage map. SPEARS3's outer 'edge' is around 570 metres from the payphone, while ZOUKAK3's is about 890 metres distant, although the map shows a single patched area far from the main shapefile.

5587. The map below, prepared by Mr Platt, illustrates the movements of Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 in relation to the Al-Jazeera office, the tree where the false claim tape was left, and the payphone from which the second call to Al-Jazeera was made:

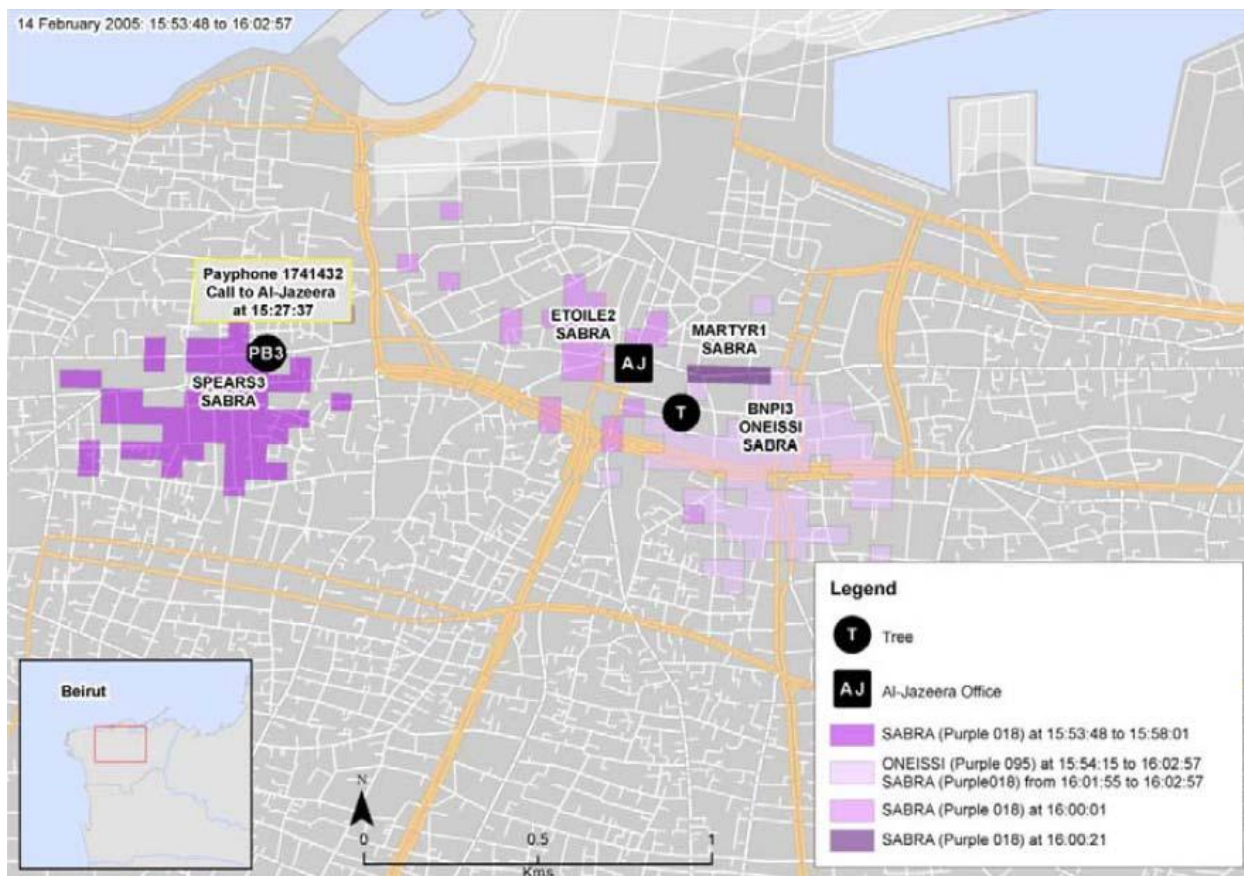

Exhibit P1783 (Expert report of Gary Platt – Chronology), p. 414

5588. The tree is within BACHOU3's predicted best server coverage area; BNPI3 is very close to it. The Trial Chamber has calculated that BACHOU3's outer edge is around 715 metres from the tree, although in a scattered patch, while BNPI3's most distant 'border' is around 655 metres away. The maps below show the predicted best server coverage of the tree and the third payphone. The tree is marked as 'T' and the payphone as 'PB3':

Exhibit P592.1 (Electronic Presentation of Evidence software)

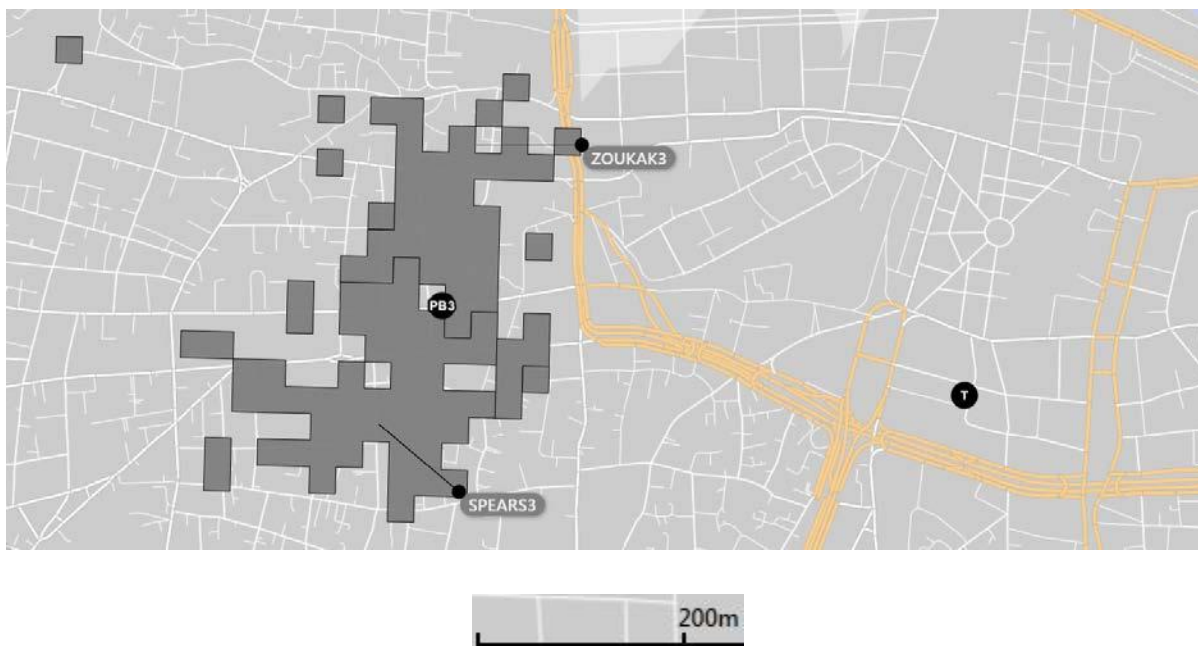

Exhibit P592.1 (Electronic Presentation of Evidence software)

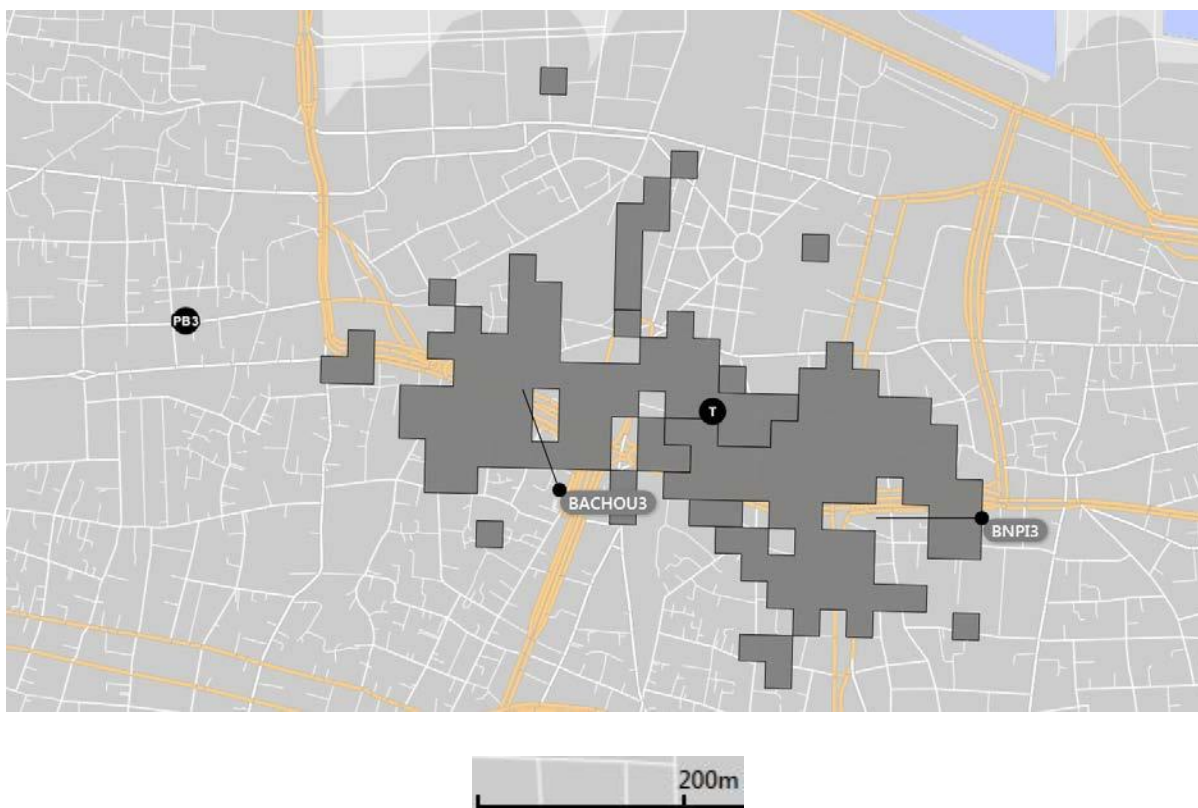

Exhibit P592.1 (Electronic Presentation of Evidence software)

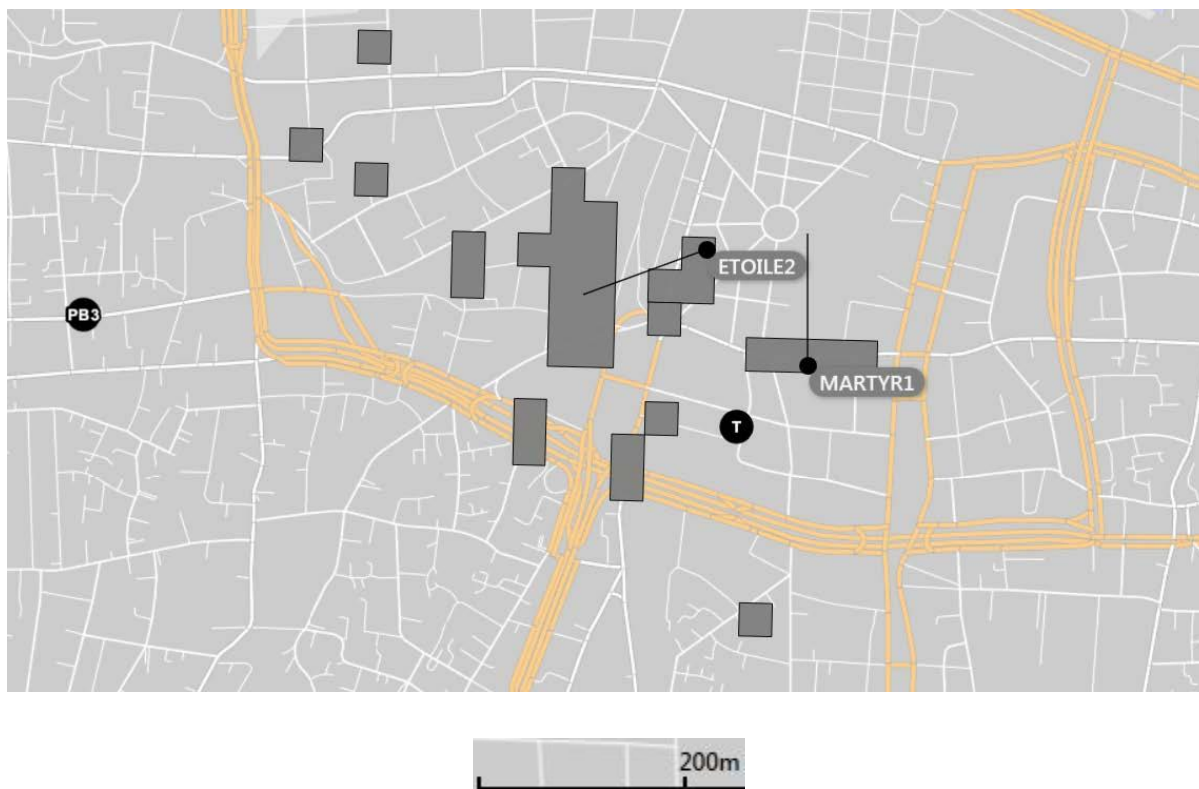

Exhibit P592.1 (Electronic Presentation of Evidence software)

v. Collection of the video and letter

5589. At 15:53, according to a text message that he sent to Witness 6, Witness 115 collected the video from the tree. The second call had been made to Al-Jazeera at 15:27 from the third payphone.¹⁰⁴⁸²

5590. Witness 115 was at the tree when he sent two texts. When he sent his first message at 15:52, his mobile activated Bashoura_A on the Touch network. This cell, according to Touch's coverage maps, did not provide the predicted best server coverage to the tree, but rather to an area around 300 metres south-west away. A minute later, at 15:53, he sent his second text message and his mobile activated Riad_El_Soloh_B, which provided the predicted best server coverage to the

¹⁰⁴⁸² See sub-section (B) (1) (d) 'Collection of the videoed claim of responsibility and the letter at 15:53'.

tree.¹⁰⁴⁸³ The witness received two text messages, at 15:54 and 15:55, again activating Riad_El_Soloh_B and then Bashoura_A.¹⁰⁴⁸⁴

5591. At 15:54, Mr Sabra's attributed Purple 018, connecting to SPEARS3, which provided coverage to the third payphone area, called Mr Oneissi's Purple 095. Purple 095 was activating BNPI3, the cell adjacent to that providing coverage to the tree, namely, BACHOU3.¹⁰⁴⁸⁵

5592. A minute later, at 15:55, Purple 018 was still near the third payphone when he called Mr Merhi's Purple 231, which remained in southern Beirut.¹⁰⁴⁸⁶

5593. According to Mr Platt, the 15:54 call was consistent both with conducting surveillance on the tree to ensure that A-Jazeera collected the video tape,¹⁰⁴⁸⁷ and with Mr Sabra on Purple 018 asking Mr Oneissi on Purple 095 for a requested status update on this.¹⁰⁴⁸⁸ The 15:55 call the following minute was consistent with Mr Sabra on Purple 018 informing Mr Merhi on Purple 231, as Mr Sabra's supervisor, of the status of the operation, namely of the collection of the video tape.¹⁰⁴⁸⁹

5594. At 15:56, Mr Oneissi's Purple 095, connecting to the cell providing coverage to the tree, received five SMS messages.¹⁰⁴⁹⁰ According to Mr Platt, receiving messages in quick succession was consistent with a mobile turning on after being switched off for a period,¹⁰⁴⁹¹ although here it would have been only for one minute and one second.¹⁰⁴⁹²

¹⁰⁴⁸³ Witness PRH115, T. 7 July 2015, pp 62-63, T. 8 July 2015, pp 45-46; exhibit P492 (Statements of Witness PRH115, dated 8 February 2007, 3 October 2008 and 13 March 2015), pp 15-16, 25 (ERNs 60305520-60305521, 60305531); exhibit 5D164 (Statement of Witness PRH115, dated 16 April 2005), pp 3, 5; exhibit 5D165 (Record of Witness PRH115's interview with UN Fact-Finding Mission), p. 1; exhibit P494.1 (Redacted call sequence table with SMS content of Witness PRH115's mobile, 14 February 2005); exhibit P494 (Call sequence table with SMS content of Witness PRH115's mobile, 14 February 2005), p. 1; exhibit P1276 (Call sequence table with SMS content of Witness PRH115's mobile, 14 February 2005) p. 2; exhibit P493 (Call sequence table of Witness PRH115's mobile, 14 February 2005); exhibit P493.1 (Redacted call sequence table of Witness PRH115's mobile, 14 February 2005); exhibit P1278 (Call sequence table of Witness PRH115's mobile, 14 February 2005).

¹⁰⁴⁹¹ Gary Platt, T. 15 March 2017, pp 52-53.

¹⁰⁴⁹² Exhibit P1223, p. 281.

5595. Two minutes later, at 15:58, Mr Oneissi's Purple 095, which was near the tree, called Mr Sabra's attributed Purple 018, whose mobile was connecting to a cell near the third payphone.¹⁰⁴⁹³

5596. Another two minutes later, at 16:00:01, Purple 018 contacted Mr Oneissi's Purple 095.¹⁰⁴⁹⁴ Mr Oneissi's Purple 095 was still connecting to the BNPI3 cell, while Mr Sabra's attributed Purple 018 had moved from SPEARS3 to ETOILE2, in the direction of Mr Oneissi's Purple 095, and the tree.¹⁰⁴⁹⁵

5597. At 16:00:20, only 19 seconds after Mr Sabra's attributed Purple 018 called Mr Oneissi's Purple 095, Mr Merhi's Purple 231 called Purple 018.¹⁰⁴⁹⁶ By then, Purple 018 had moved even closer to the tree, connecting to the MARTYR1 cell, which also partly covered the Al-Jazeera office.¹⁰⁴⁹⁷ At the end of the 34-second call, Purple 018 activated BNPI3.¹⁰⁴⁹⁸

5598. Shortly afterwards, at 16:01 and 16:02, Mr Oneissi's Purple 095 called Mr Sabra's attributed Purple 018. Both mobiles activated BNPI3.¹⁰⁴⁹⁹ Following these calls, Mr Oneissi's Purple 095 and Purple 018 were not in contact with each other again on 14 February 2005.¹⁰⁵⁰⁰ However, they both received calls as they travelled towards southern Beirut.¹⁰⁵⁰¹

5599. Mr Platt considered that the call activity between 16:00 and 16:02 was consistent with the users of Purple 095 and Purple 018 completing their work, namely ensuring that the tape had been collected, and then leaving.¹⁰⁵⁰²

¹⁰⁵⁰³ Exhibit P1923, slides 169, 172.

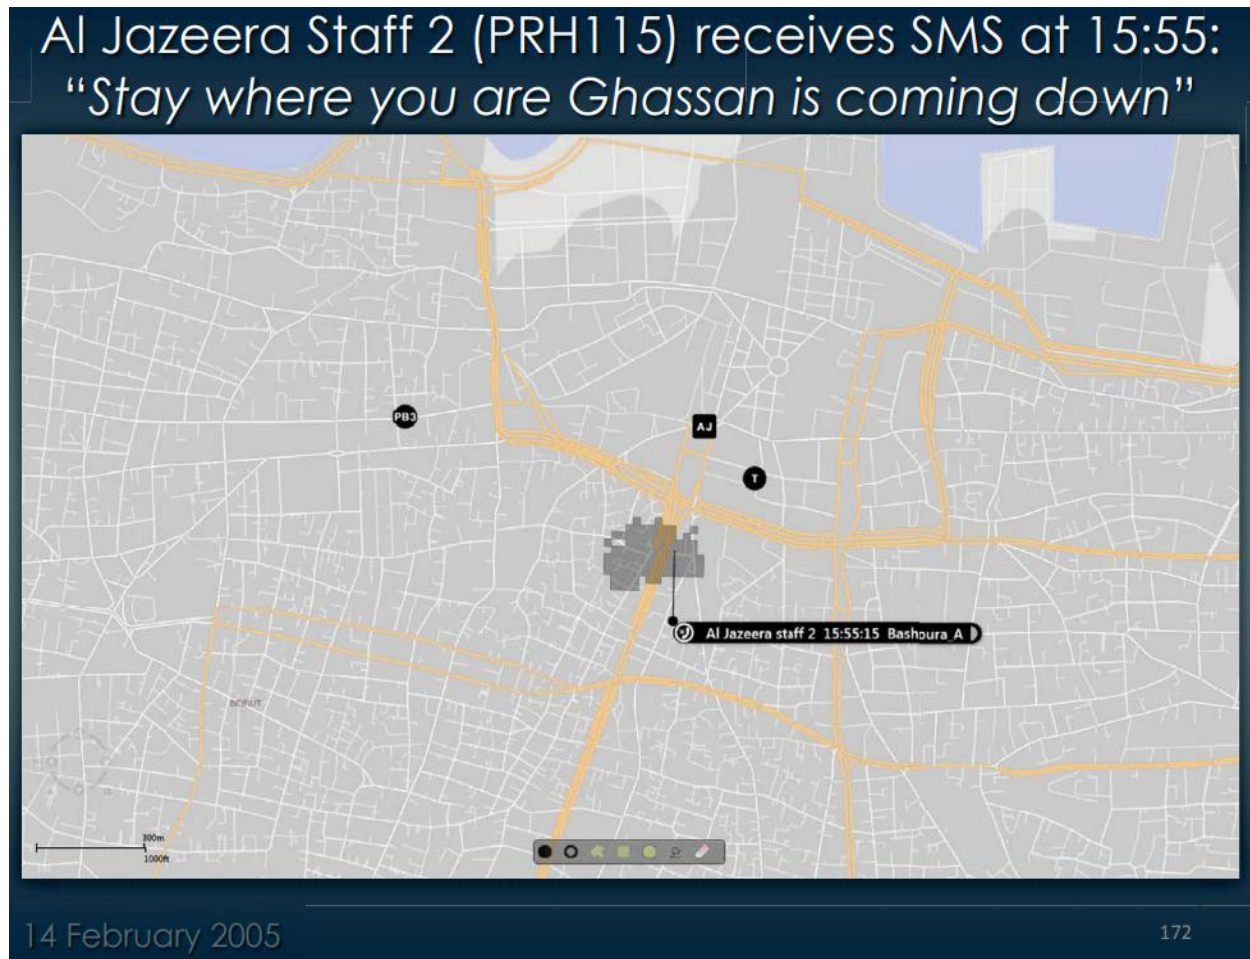

Exhibit P1923, slides 169, 172—Two electronic presentation of evidence images from Mr Platt's Chronology PowerPoint presentation (13-16 February 2005) showing the cells Witness 115's mobile activated when sending text messages at 15:52 and 15:53

vi. Third call to Al-Jazeera at 17:04—payphone 4, CELTEC1 cell

5601. The third call to Al-Jazeera occurred at 17:04 from the fourth payphone. This was the call in which Mr Ben-Jeddo's impression was of a caller having a similar accent to that of the second caller, namely a Lebanese accent or from the Levant region speaking both classical and colloquial Arabic. Mr Ben-Jeddo said of this call that there was very little to no background noise.¹⁰⁵⁰⁴

5602. In the half-hour before this third call, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 were in south-western Beirut.

¹⁰⁵⁰⁴ See sub-section (B) (1) (e) 'Third call to Al-Jazeera at 17:04'.

5603. At 16:32, Mr Oneissi's Purple 095 activated SFEIR3, and at 16:53, BRAJNE3, both of which are in south Beirut.¹⁰⁵⁰⁵ At 16:55, Mr Sabra's attributed Purple 018 activated cell CBOURJ3, north of the Beirut airport in south-west Beirut.¹⁰⁵⁰⁶

5604. At 17:15, eleven minutes after the third call to Al-Jazeera, Mr Sabra's attributed Purple 018 contacted Mr Merhi's Purple 231 from the western coastal area of Beirut, activating OGER3/CELTEC2.¹⁰⁵⁰⁷ OGER3 and CELTEC2 were adjacent to OGER2, a part of which provided predicted best server coverage to a location very close to the payphone.¹⁰⁵⁰⁸ Mr Platt's opinion was that the call at 17:15 was consistent with Mr Sabra on Purple 018 updating Mr Merhi on Purple 231 that the call to Al-Jazeera had been placed.¹⁰⁵⁰⁹

5605. At 17:24—nine minutes after Mr Sabra's attributed Purple 018 contacted Mr Merhi's Purple 231—Purple 231 made a nine-second call to Purple 018 while both users were in southern Beirut.¹⁰⁵¹⁰ Mr Platt stated that the 17:24 call was the last contact between all three Purple mobiles.¹⁰⁵¹¹ In his view, this was because the operation had concluded.¹⁰⁵¹²

5606. The extracts from exhibit P592.1, below, show that while CELTEC1 provided the predicted best server coverage from the Alfa network map, both OGER2 and RAMLET1 could also cover it; the fourth payphone is marked as 'PB4'.¹⁰⁵¹³ The Trial Chamber has calculated that the outer 'edge' of CELTEC1's predicted best server coverage is around 600 metres away. The similar furthest outer 'edge' of OGER2, which has a scattered coverage map is around 2.7 kilometres from the payphone, while the same measurement on RAMLET1's map shows a distance of around 890 metres.

18 August 2020

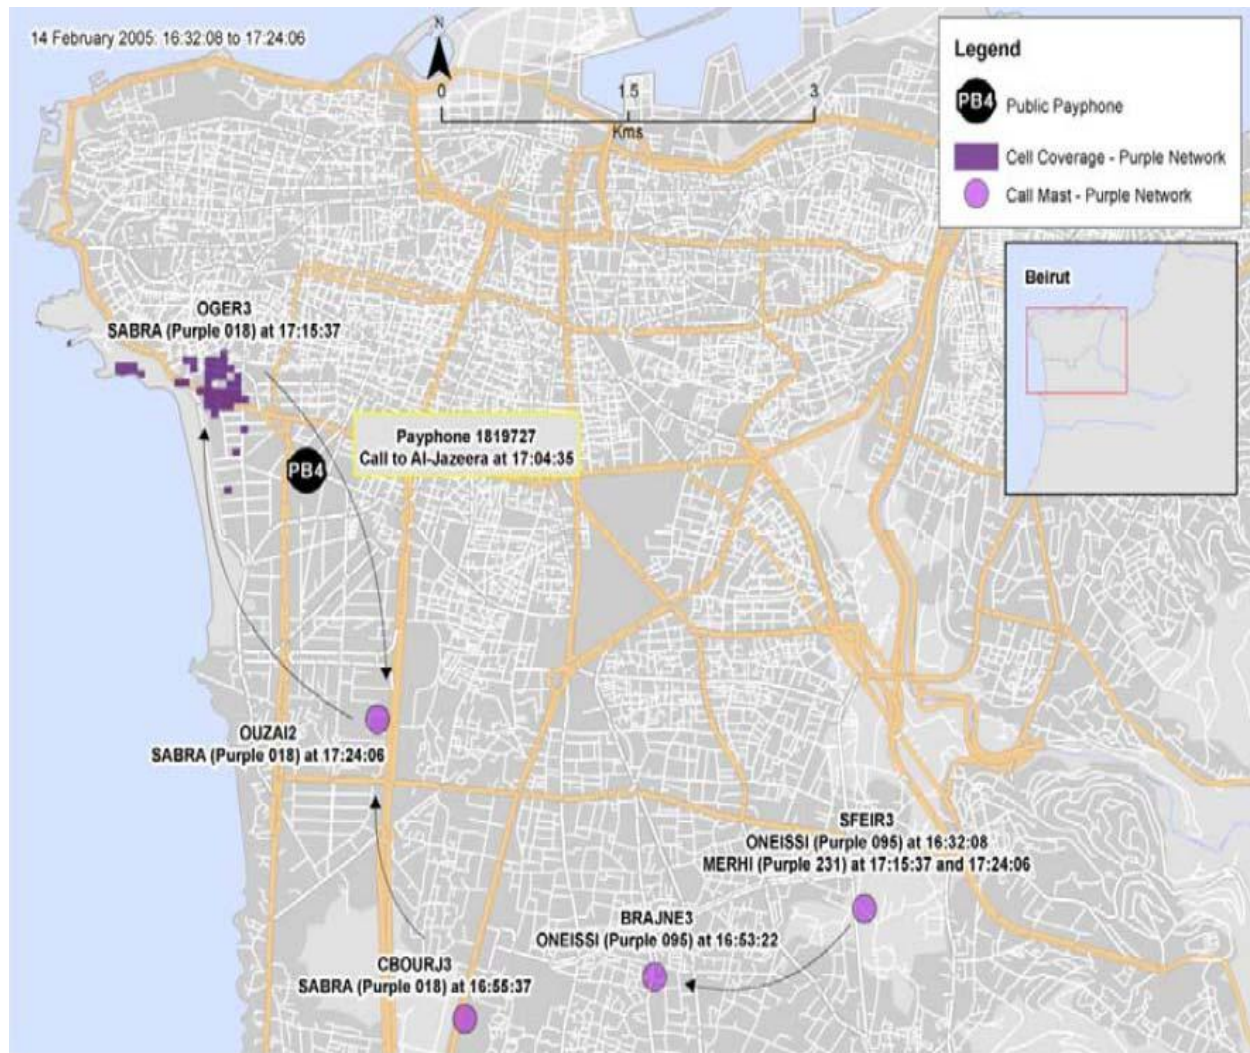

Exhibit P1783 (Expert report of Gary Platt – Chronology), p. 416

5608. Between 14:03 and 17:24, Mr Merhi's Purple 231, connecting to SFEIR3, had seven calls with Mr Sabra's attributed Purple 018.¹⁰⁵¹⁴ According to Mr Platt, the calls from Mr Merhi's Purple 231 to Mr Sabra's Purple 018 at 14:36, 15:53 and 17:24 were consistent with Mr Merhi coordinating the false claim by contacting the person responsible for making the first two false claim calls, namely Mr Sabra on Purple 018.¹⁰⁵¹⁵

¹⁰⁵¹⁴ Exhibit P527, pp 116-117.

¹⁰⁵¹⁵ Gary Platt, T. 15 March 2017, pp 42, 45-46, 59-60.

5609. Mr Platt considered that the fact that Purple 231 was static within the coverage of SFEIR3 all day was consistent with its user coordinating the false claim of responsibility.¹⁰⁵¹⁶ Mr Platt did not explain why it was necessary for a mobile user in this situation to remain ‘static’.

vii. Final Purple mobile activity

5610. On the evening of **Monday 14 February 2005**, at 19:48, Mr Merhi’s Purple 231 activated cell SFEIR3 in south Beirut when it received an incoming call from an unattributed number. This was its last call activity that day.¹⁰⁵¹⁷

5611. The final calls of Mr Sabra’s attributed Purple 018 that evening occurred at 21:01 and 21:44, when it connected to SFEIR3 and SFEIR2 in south Beirut.¹⁰⁵¹⁸ As for Mr Oneissi’s Purple 095, after activating SFEIR3 at 16:32 and BRAJNE3 at 16:53 in south Beirut, it remained inactive.¹⁰⁵¹⁹

5612. The following day, **Tuesday 15 February 2005**, Mr Oneissi’s Purple 095 activated cells in south Beirut with thirteen voice calls and three Alfa SMS service messages.¹⁰⁵²⁰ Mr Sabra’s attributed Purple 018 made one call on 15 February 2005, activating a cell in south Beirut.¹⁰⁵²¹

5613. After consistent usage since 2001 and 2002, the three Purple mobiles ceased use between 15 and 16 February 2005. Mr Platt describes them as having been ‘discarded’.¹⁰⁵²² The last activity of Mr Merhi’s Purple 231 occurred at 11:12 on Tuesday 15 February 2005, when it connected to SFEIR3 in south Beirut.¹⁰⁵²³

¹⁰⁵¹⁶ Gary Platt, T. 15 March 2017, p. 61. *See also* exhibit P1782, para. 1074.

5614. The final activity of Purple 018 was a call to an Alfa service number on **Wednesday 16 February 2005** and a call to Associate Purple 375. In both instances, it connected to HARA2 in south Beirut.¹⁰⁵²⁴

5615. The final call of Mr Oneissi's Purple 095 was in receiving a call from an unknown number on 16 February 2005 at 10:46, activating BRAJNE2.¹⁰⁵²⁵

5616. Mr Platt testified that it was common for criminals to review the crime they have committed for any errors or clues that could lead to their capture. Further, the cessation of use of the Purple mobiles one to two days after the dissemination of the false claim, and after years of use, was consistent with the users' involvement in the crime.¹⁰⁵²⁶

(d) Submissions

5617. The Prosecution submits that the totality of the Purple mobile activity shows that Mr Oneissi and Mr Sabra participated in the delivery and dissemination of the false claim of responsibility, while Mr Merhi supervised it.¹⁰⁵²⁷

5618. In the amended consolidated indictment, the Prosecutor pleads that '**ONEISSI or SABRA** made a total of four calls to the offices of the Reuters and Al-Jazeera news networks', using the same prepaid telecard, 6162569.¹⁰⁵²⁸

5619. The Prosecutor initially and unambiguously pleaded that Mr Oneissi or Mr Sabra made all of the four telephone calls to Reuters and Al-Jazeera; this was broken down into Mr Oneissi *or* Mr Sabra making the call to Reuters, and the first and third calls to Al-Jazeera, and Mr Sabra making the second call.¹⁰⁵²⁹ In relation to the fourth call, either Mr Oneissi or Mr Sabra is pleaded to have 'demanded with menace that Al-Jazeera broadcast the video'.¹⁰⁵³⁰

¹⁰⁵²⁴ Exhibit P1221, p. 292; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1260. *See also* exhibit P1782, para. 1077; exhibit P1923, slides 211-212.

¹⁰⁵²⁸ Amended consolidated indictment, para. 44.

¹⁰⁵²⁹ Amended consolidated indictment, para. 44 (a)-(b), (d), (g); Prosecution's updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra), paras 152-154, 158.

¹⁰⁵³⁰ Amended consolidated indictment, para. 44 (g).

5620. The Prosecution's final trial brief, however, is silent as to who is supposed to have made the four calls and argues its case in general terms, stating that:

the person making the call would have to be a trusted person with a clear understanding of the plot in order to be prepared to adapt as necessary in making the false claim calls such, as for example, how to respond or not to reactions or questions from the media companies as they made the false claim. This would not have been merely delegated to someone outside of the inner circles of the conspiracy given that this was the public face of the conspiracy and that its credibility was integral to the plot.¹⁰⁵³¹

5621. The Prosecution argues Mr Oneissi's and Mr Sabra's proximity to the payphones. However, the closest it comes to suggesting that either of them made the calls is in stating, of the third call to Al-Jazeera, that (*italics added*):

By 17:04, over an hour after the collection of the tape from the tree, *the conspirators* made their fourth and final call from a fourth payphone. Their impatience to await its broadcast, perhaps reflecting the same anxiety reflected by their frenzied calls after collection of the tape,

...

One of them called Al-Jazeera again, using the same telecarte as before, this time to issue threats designed to secure broadcast of the tape.¹⁰⁵³²

5622. The reference to a series of 'frenzied calls' appears to relate back to a submission that the three users of the Purple mobiles made eight calls over nine minutes from 15:53, when they 'engaged in a frenzied series of calls among themselves'.¹⁰⁵³³ Taking the two paragraphs together, the final trial brief may be suggesting that either Mr Oneissi or Mr Sabra made the final call but it does not directly do so. In oral closing submissions, however, the Prosecution submitted that Mr Sabra made the third telephone call, with lead Prosecution counsel saying:

¹⁰⁵³¹ Prosecution final trial brief, para. 1019, *see also* paras 1020-1025, 1031-1037; Prosecution closing submissions, T. 14 September 2018, pp 48-56.

¹⁰⁵³² Prosecution final trial brief, paras 573-574 (footnotes omitted).

¹⁰⁵³³ Prosecution final trial brief, para. 569.

The Prosecution case is that Mr. Sabra had made that call at sometime before to go and collect the tape from the tree, and had remained in the area in case the tape wasn't picked up and he'd have to make another call.¹⁰⁵³⁴

5623. The Trial Chamber will therefore treat the Prosecution's final trial brief, as arguing, but only when read in its totality, that Mr Sabra made the call to Al-Jazeera from the third payphone.

5624. The Prosecution submits that the evidence establishes that:

- Mr Sabra was in the vicinity of the payphone used to call Reuters, eight minutes prior to that call;¹⁰⁵³⁵
- Mr Sabra's and Mr Oneissi's mobiles co-located in a predicted coverage area of one to one-and-a-half kilometres south from the second payphone, twenty minutes after the first call to Al-Jazeera;¹⁰⁵³⁶
- Mr Sabra's mobile used a cell providing predicted best server coverage to the third payphone while Mr Oneissi's mobile was using a cell in the vicinity of the tree, at the time of the second call to Al-Jazeera;¹⁰⁵³⁷ and
- Mr Oneissi and Mr Sabra exchanged a 'flurry' of calls between themselves and Mr Merhi when the video-tape was being collected, during which Mr Sabra moved from the third payphone towards the tree.¹⁰⁵³⁸

5625. The Prosecution points out that eight of Mr Merhi's nine calls on 14 February 2005 were made between 14:03 and 17:24. Seven were with Mr Sabra, and three of these were in the minutes immediately following the collection of the video-tape from the tree.¹⁰⁵³⁹

¹⁰⁵³⁵ Prosecution final trial brief, para. 1020.

¹⁰⁵³⁶ Prosecution final trial brief, paras 1022-1023.

¹⁰⁵³⁷ Prosecution final trial brief, para. 1025.

¹⁰⁵³⁸ Prosecution final trial brief, paras 1027-1028.

¹⁰⁵³⁹ Prosecution final trial brief, para. 1014.

5626. Further, all of his calls connected to SFEIR3, which is consistent with Mr Merhi's 'direct supervision of the delivery of the false claim from his base area.'¹⁰⁵⁴⁰ Mr Sabra's mobile was also connected to a cell near the payphone from which the third call to Al-Jazeera was made.¹⁰⁵⁴¹

5627. In relation to the tree, Prosecution counsel in closing submissions stated that Mr Oneissi need not have been in the immediate vicinity of the tree to watch it, given the number of surrounding vantage points 'from which he could observe the video being collected'. Because the video was in white box it would have been visible from a further distance away.¹⁰⁵⁴²

5628. The simultaneous disposal of the three personal Purple mobiles over a period of 36 hours between Tuesday 15 and Wednesday 16 February 2005—after years of continuous use—also serves to reinforce the involvement of their users.¹⁰⁵⁴³ The Prosecution also argues that the disposal reflects the users' realisation that unanticipated and unintended forensic traces may have been left around the payphones.¹⁰⁵⁴⁴ This was also similar to the synchronised shut down of the Red and Green networks.¹⁰⁵⁴⁵

5629. In view of the circumstantial nature of the evidence and the possible flaws in the purported identification of Mr Oneissi as 'Mohammed', the Trial Chamber posed the following question to the Prosecution:

If the Trial Chamber were not satisfied beyond reasonable doubt of the guilt of Mr Oneissi and Mr Assad Hassan Sabra, what flow-on effect, if any, would there be in relation to Mr Hassan Habib Merhi's pleaded role, given that he is alleged to have coordinated their activities?¹⁰⁵⁴⁶

5630. The Prosecution responded that if reasonable doubt persists as to the *mens rea* of Mr Oneissi and Mr Sabra, or the attribution of the Purple mobiles, the Trial Chamber could still convict Mr Merhi.¹⁰⁵⁴⁷

¹⁰⁵⁴⁰ Prosecution final trial brief, para. 1015.

¹⁰⁵⁴⁵ Prosecution final trial brief, paras 583, 1040.

¹⁰⁵⁴⁶ Questions for closing submissions, para. 5.

¹⁰⁵⁴⁷ Prosecution closing submissions, T. 14 September 2018, pp 72-73.

5631. The Trial Chamber also posed a question to the Prosecution in the following terms, namely:

The amended consolidated indictment (paragraph 23) pleads that Mr Oneissi and Mr Sabra were responsible for locating an individual suitable for making the false claim of responsibility for the attack. If the Trial Chamber cannot be satisfied beyond reasonable doubt of their involvement in this, what effect would this have on their pleaded involvement (paragraphs 44, 64, 66, 68 and 70) on 14 February 2005 in relation to delivering the video and making calls to Reuters and Al-Jazeera?¹⁰⁵⁴⁸

5632. In response, Prosecution counsel contended that Mr Oneissi and Mr Sabra may still be convicted if the Trial Chamber is satisfied that they delivered the false claim, even if the allegations of selecting and kidnapping Mr Abu Adass are not proven.¹⁰⁵⁴⁹ However, Prosecution lead counsel conceded that if the Trial Chamber did not find that Mr Oneissi and Mr Sabra performed the preparatory and shielding acts alleged, this may affect any findings against Mr Merhi, stating:

The only way in which it would have an impact is if you found that all of the allegations made against Mr. Sabra and Mr. Oneissi and their *actus reus*, their acts and conduct, if you didn't find any of that took place and that the Purple Phone patterns just didn't portray the pattern we say, then obviously that's problematic. But otherwise, it has absolutely no effect.¹⁰⁵⁵⁰

5633. The Merhi Defence argues that the Prosecution produced no evidence to support the claim that Mr Merhi coordinated the activities on Monday 14 February 2005, and does not accuse him of 'any specific act' beyond relying on the resumption of the mobile activities. It submits that the calls between Purple 231 and Purple 018 that day could be explained as their users becoming anxious about one another following the explosion.¹⁰⁵⁵¹ If, as the Prosecution implies, the Purple mobiles were together in SFEIR3 before the first calls, there was no need for Purple 231 to coordinate by a call to Purple 018 thirty minutes later.¹⁰⁵⁵²

¹⁰⁵⁴⁸ Questions for closing submissions, para. 6.

¹⁰⁵⁴⁹ Prosecution closing submissions, T. 14 September 2018, p. 73.

¹⁰⁵⁵⁰ Prosecution closing submissions, T. 14 September 2018, pp 72-73 (Mr Povoas).

¹⁰⁵⁵¹ Merhi Defence final trial brief, paras 523, 540.

¹⁰⁵⁵² Merhi Defence final trial brief, para. 525.

5634. The Merhi Defence also argues that—given that the calls to Reuters and Al-Jazeera did not take place at the time alleged by the Prosecution—they could not be placed with any reliability in the timeframe of the first call from Purple 231 to Purple 018 on 14 February 2005.¹⁰⁵⁵³

5635. Further, the Prosecution's submissions about calls from Mr Merhi to Mr Sabra are illogical, given that they did not follow the alleged hierarchical lines.¹⁰⁵⁵⁴ Call records of the eight calls after the collection of the video tape are not reliable in terms of time-stamping and difficulties with the cellular network.¹⁰⁵⁵⁵ The Prosecution disregarded evidence of the fourth call to Al-Jazeera because it did not fit with the Prosecution's theory of what the Purple mobiles were doing on 14 February 2005.¹⁰⁵⁵⁶

5636. The cessation of Purple mobiles' activity after the attack did not show that the users were involved, given that publicity about the attack came later, and there was a belief that there was no need to use a covert network. The extent of the investigation became public only afterwards, contrary to Mr Platt's theory of why the mobiles were disposed.¹⁰⁵⁵⁷

5637. Further, the 'illogicality becomes even more apparent' when the two mobiles attributed to Mr Merhi are compared, arguing, 'If the user of Green 071 knows and agrees to the details of the alleged conspiracy, and is therefore aware of its scope, the naivety and mistakes made by the user of Purple 231 are inexplicable'.¹⁰⁵⁵⁸

5638. The Oneissi Defence argues that the schematic mappings used by Mr Platt meant that he was unable to take into account factors important for cell site analysis around the area of the tree.¹⁰⁵⁵⁹ Contrary to the Prosecution's submission, the discarding of Purple 095 is further evidence that Mr Oneissi was unaware of the false claim operation before it happened.¹⁰⁵⁶⁰ To the extent that the Prosecution's argument that the 'forensic visibility' of the Purple mobiles is low rests upon

¹⁰⁵⁵³ Merhi Defence final trial brief, para. 551.

¹⁰⁵⁶⁰ Oneissi Defence final trial brief, para. 175.

a belated discovery of the mobiles, Purple 095 did not activate cells providing coverage for any of the payphones at the time the false claim calls were purported to be made.¹⁰⁵⁶¹

5639. The Prosecution failed to establish that Mr Oneissi and Mr Sabra were actually travelling together simply because the two mobiles attributed to them co-located at times.¹⁰⁵⁶² The Prosecution erroneously conflates activation of the cell covering the tree, BNPI3, with surveillance of the tree despite failing to establish the coverage of that cell and without any evidence beyond call data records, which cannot establish precise locations.¹⁰⁵⁶³

5640. The Sabra Defence submits that there were reasonable alternatives for the Purple mobiles' behaviour on 14 February 2005.¹⁰⁵⁶⁴ According to the Sabra Defence, the Prosecution did not discover or consider the 'Purple-alike' mobiles, namely six mobiles that presented behavioural similarities with Purple 018. Their cell use places each of them near at least one payphone on 14 February 2005 shortly before or after the respective calls to Reuters and Al-Jazeera.¹⁰⁵⁶⁵ This shows that 'the activities portrayed by the Prosecution as "inextricably linked to the Payphones calls" are not statistical outliers' and that the involvement in the conspiracy of the Purple mobiles' users is not the only reasonable inference available on the evidence.¹⁰⁵⁶⁶ Further, the Purple mobiles were not suddenly discarded, but rather gradually ceased use over two days.¹⁰⁵⁶⁷

5641. This was particularly notable given that the Red network did cease activity immediately after the assassination, and the Green network before it.¹⁰⁵⁶⁸ The Prosecution also failed to consider the activity of the Purple associate mobiles, which continued to be used openly for approximately two months after the attack.¹⁰⁵⁶⁹

5642. In closing submissions, the Sabra Defence argued that the Trial Chamber was:

completely in the dark as to how and when this tape ever got to be in a tree located in a square in Beirut and, crucially, whether Mr. Sabra was involved, and in which case, how so. Nor are you told who drafted the accompanying letter to the video, when it was drafted, and again whether it ever came to be in the possession of Mr. Sabra.¹⁰⁵⁷⁰

(e) Findings

5643. The Trial Chamber has found that four telephone calls took place on Monday 14 February 2005.¹⁰⁵⁷¹ The first was at 14:11 to Reuters, and the remaining three were at 14:19, 15:27 and 17:04 to Al-Jazeera. Further, it is satisfied that the Al-Jazeera staff collected the video and letter from a tree near Al-Jazeera's office at around 15:53. The Trial Chamber has received no evidence about when the video and letter were placed in the tree and thus can make no findings on this. It has also been unable to make any positive findings about who made the calls; it cannot find beyond reasonable doubt, as it must as these are material facts underlying the elements of the charges, that either of Mr Oneissi or Mr Sabra made the calls.

5644. The Prosecution argues that the pattern of Purple mobile activity around these events shows that Mr Oneissi and Mr Sabra participated in the delivery and dissemination of the false claim, while Mr Merhi supervised it. The Prosecution positively submitted in its oral final trial submissions, as is alleged in the amended consolidated indictment, that Mr Sabra made the second call (from the third payphone) to Al-Jazeera at 15:27.

5645. The Trial Chamber has examined each individual piece of evidence and has carefully scrutinised it for the patterns from which the Prosecution argues it can find that the three Accused were implicated in the conspiracy as alleged. However, the Trial Chamber cannot be satisfied beyond reasonable doubt based on the location or other activity of the Purple mobiles, when taken in their overall context, that the only reasonable conclusion available from the evidence is that Mr Sabra or Mr Oneissi were involved in making the telephone calls in the manner alleged. Nor that Mr Merhi coordinated this—as is pleaded in the amended consolidated indictment—or, as is argued in the final trial brief, that he ‘supervised this integral contribution to the conspiracy’.¹⁰⁵⁷²

¹⁰⁵⁷⁰ Sabra Defence closing submissions, T. 21 September 2018, p. 42.

¹⁰⁵⁷¹ See above, at para. 4897.

¹⁰⁵⁷² Prosecution final trial brief, paras 618, 1177.

5646. Each of the four calls constitutes a material fact pleaded against the three Accused. The calls and the collection of the video from the tree for its broadcast by Al-Jazeera are the facts underlying the elements of the crimes charged, namely, making a false claim of responsibility for the attack. The Prosecutor must therefore prove beyond reasonable doubt that the Accused were responsible for the four calls and ensuring that the video was collected from the tree for broadcast. Without proving these facts, there is no case against any of the three Accused.

5647. The evidence of the call data records, combined with that of the content of the calls from the payphones, cannot of itself establish that either Mr Oneissi or Mr Sabra were present at the payphones when the calls were made. It is only the patterns of their mobile movements, when analysed in their entirety by contrasting them with calls from the payphones and the collection of the video, that could provide the necessary inferences of their involvement, assuming that Mr Sabra was using Purple 018.

5648. The Trial Chamber again stresses that it has no evidence of the content of the calls made or text messages sent nor of Mr Oneissi's and Mr Sabra's precise locations—the sole evidence against them is the pattern of the movements of Mr Oneissi's Purple 095 and Mr Sabra's shared personal Purple mobile 018 and calls made—in tandem with the payphone calls and the video collection and broadcast.

5649. Crucially, the Trial Chamber has examined in careful detail the predicted best server coverage map for the cells covering the four payphones and the tree. Given the imprecision of cell site evidence and that it cannot, of itself, place a mobile at a precise location, it is essential to examine where Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 *could have been* while connecting to the cells providing predicted coverage to the payphones and the tree.

5650. In this respect, the Trial Chamber is conscious of the agreed technical standard of the sixty to seventy percent accuracy of these maps. It is also acutely mindful of the technical and eyewitness testimony of network congestion experienced after 12:55 on the afternoon of Monday 14 February.

5651. The Alfa 'trouble data' extract in exhibit 4D263 reveals that its mobile switching centres, or MSCs, were experiencing congestion caused by the explosion, the result of which would have been numerous directed retries or alternatively a failure to connect. In practical terms, this casts

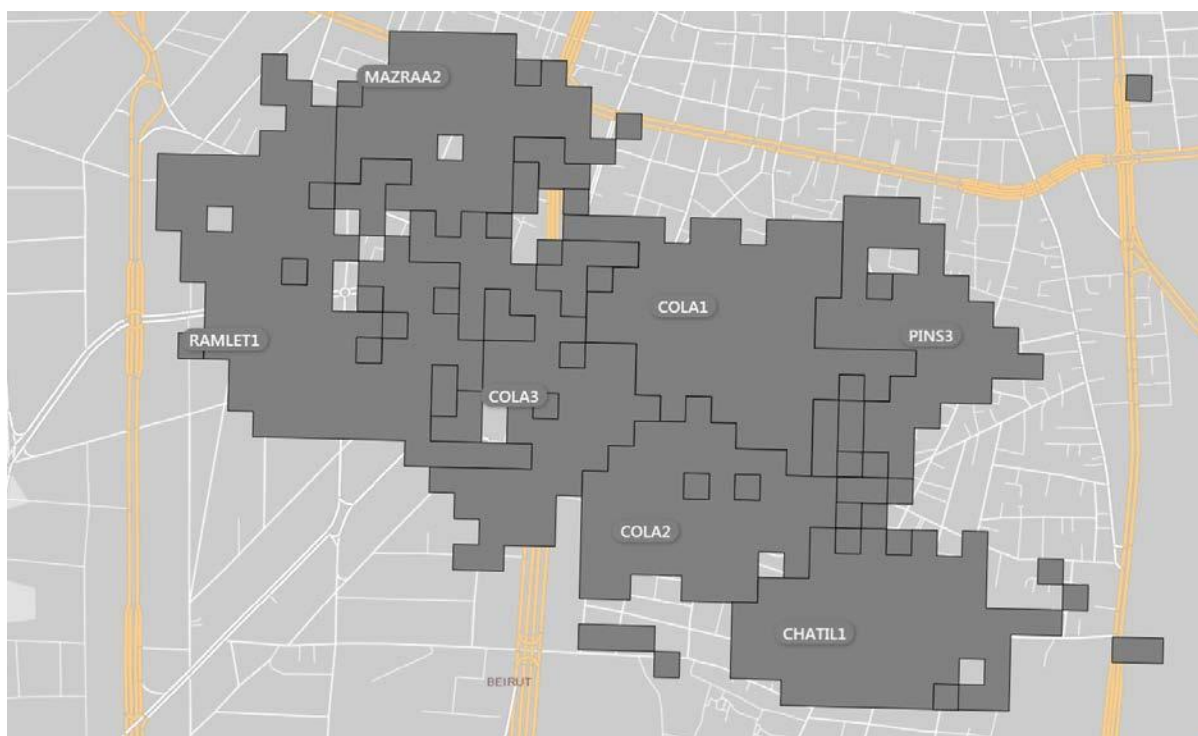

real doubt on the reliability of the cell site evidence for that afternoon. Added to this is the eyewitness testimony of network congestion at the time. Callers across the network in Beirut would have been redirected from the best serving cell to one of its six neighbours—or others—but without Alfa or Touch being able to say which.

5652. This means that Purple 018 and Mr Oneissi's Purple 095 may not have been connecting to the best serving cell for *any* of the calls they made that afternoon; theoretically they could have been in any of the six neighbouring cells—or cells adjacent to these—when they made the calls. Of course, this works both ways as it could also place them exactly where the Prosecution's case wanted them to be, namely, at the payphones or at the tree. That, however, illustrates the problem; the congestion must further detract from the existing sixty to seventy percent accuracy of the coverage maps.

5653. For example, a directed retry from a mobile having COLA1 as its best serving cell could theoretically result in it connecting to the following six cells, for which the Trial Chamber has shapefiles, namely, MAZRAA2, RAMLET1, COLA3, COLA2, CHATIL1 and PINS3. However, as the network determines the directed retry on the basis of the actual signal strengths,¹⁰⁵⁷³ and from drive tests rather than the coverage maps, in reality a mobile that did not connect to COLA1 could have been redirected to another neighbouring cell.

5654. The extracts below from exhibits P592.1 and P1123 show the neighbouring cells of the COLA1 cell:

¹⁰⁵⁷³ See for further details chapter VII 'Reliability of telecommunications evidence', (B) (2) 'Cell allocation', and (C) (4) 'Cell Site related issues', at paras 1749-1750.

5655. It is also emphasised that the Prosecutor's allegations are *precisely* pleaded, namely, that either Mr Oneissi or Mr Sabra made the first, second and fourth calls, that Mr Sabra made the third

call and that Mr Oneissi was present watching the tree. The measurements below, however, illustrate the difficulties inherent in relying solely upon cell site evidence to prove someone's location at a *precise* place. To which, it is emphasised, is added the network congestion issue.

5656. Regarding the first payphone call to Reuters: it was made at 14:11 from a payphone near Abou Shaker Square. While the first payphone is within COLA1, that cell's predicted boundaries extend for around another 610 metres in other directions. The user of mobile 018, had been 'nearby', eight minutes earlier, at 14:03. Then, Purple 018 had activated a cell with a predicted coverage several hundred metres south, when it had connected to GHOBAl3 as the start cell and CHATIL1 as the end cell. GHOBAl3's predicted best server coverage *vis-à-vis* the first payphone box is around 630 metres from it at its closest point and around 1.6 kilometres at its furthest. The corresponding figures for CHATIL1 are around 330 metres at its closest and just over one kilometre at its furthest.

5657. This illustrates graphically the difficulties in attempting to position a person solely by cell site evidence. At 14:03, Mr Sabra's attributed Purple 018 may have been 1.6 kilometres away, or even further, from the first payphone. The movement from GHOBAl3 to CHATIL1 could suggest a movement in the direction of the payphone, however, it is equally possible that the mobile was stationary and connected to these adjacent cells. Moreover, without more, where it actually was when the calls were made is unknowable.

5658. The mere near contemporaneous presence in a predicted cell coverage area, of itself, cannot establish beyond reasonable doubt that the user of Purple 018 was ever at the payphone, let alone making the call at 14:11 or even observing someone else who was doing so. The evidence of Purple 018's presence, potentially to within a few hundred metres of the payphone eight minutes earlier—or 1.6 kilometres away from it—must accordingly be placed in the context of the totality of the other calls that day.

5659. The first call to Al-Jazeera was at 14:19 from a payphone on the Saeb Salam Boulevard. Mr Sabra's attributed Purple 018 and Mr Oneissi's Purple 095 both activated cells in an area at least one kilometre from this payphone within twenty minutes of the call—at 14:36 and 14:38 respectively—seventeen and nineteen minutes after the call. In this sense their mobiles could be considered to have been 'near' or 'in the vicinity' of the payphone. But the timing and distance are

greater than for the Reuters call. Taken in isolation they cannot show that the only reasonable inference is that either Accused was involved in the first call to Al-Jazeera. But again, these pieces of evidence have to be placed within the context of the patterns of the totality of the calls on the day.

5660. Similarly to the cell coverage for the first payphone, the coverage of payphone two by TAHAN1 extends around 390 metres away from it. The neighbouring NASSER cells—to which a mobile at the payphone may have connected—extend for almost another 300 metres.

5661. The second call to Al-Jazeera occurred at 15:27 from the third payphone, on Rue Banque du Liban. Unlike with the other payphone calls, Mr Sabra's attributed Purple 018 activated a cell providing predicted coverage to it, SPEARS3. However, this activation occurred at 15:53, 26 minutes after the call. Once again, this piece of evidence on its own could merely prove Mr Sabra's presence, if he was using the Purple mobile, 'near' the payphone some time, namely 26 minutes, after the call. Further, the outer boundary of the coverage map of BACHOU2, which provided predicted coverage to this payphone, is a full kilometre from it.

5662. The payphone was also very close to SPEARS3 and ZOUKAK3, to which a mobile next to the payphone could also have conceivably connected, but which extended respectively for approximately another 570 and 890 metres on the predicted best server coverage maps. Into this must be factored, it is again emphasised, the network congestion that was then occurring.

5663. This too must be viewed in the totality of the calls made that day. On one hand, it is certainly consistent with Mr Sabra, if he was using Purple 018, being in a position to make the call, or to observe someone else making it, but on the other, it is equally consistent with him doing something else. The Trial Chamber must be convinced beyond reasonable doubt that the Prosecutor's pleading is the only inference reasonably available on the evidence.

5664. Finally, the third call to Al-Jazeera was made at 17:04 from the fourth payphone, on Rue Habib-Abou-Chahla. Eleven minutes later, at 17:15, Mr Sabra's attributed Purple 018 activated a cell at the start of the call, OGER3, which was approximately 750 metres from the payphone.¹⁰⁵⁷⁴ This too, on its own, could not prove that the user of Purple 018 placed the call. As with the second

¹⁰⁵⁷⁴ OGER3 had scattered predicted best server coverage: the closest point to the payphone was around 460 metres, and the furthest point 2,050 metres away.

call to Al-Jazeera, it is indeed consistent with Purple 018's user being able to make the call or to watch someone doing it, but is also consistent with their not doing it. It is equally consistent with the user being at least a kilometre away. It provides no direct evidence of where the user actually was at 17:04.

5665. The fourth payphone, within CELTEC1's predicted coverage, is very close to OGER2 and RAMLET1 coverage areas. Again, a mobile at the payphone could also have conceivably connected to either of these two cells, the predicted coverage maps of which extend respectively, around 2.7 kilometres and 890 metres from the payphone. CELTEC1's furthest outer edge is about 600 metres away. OGER2 has a very scattered predicted best server coverage area, divided into at least eighteen separate pockets of predicted coverage; the fourth payphone is in one of these small pockets. The Trial Chamber has also factored in Mr Philips's evidence that cells frequently have scattered or fragmented areas of coverage.

5666. Another relevant point here is that the last call to Al-Jazeera was made at 17:04 and the video was not broadcast until 17:30. Yet, at 17:24, which was nine minutes after Mr Sabra's attributed Purple 018 had contacted Mr Merhi's Purple 231, Mr Merhi's Purple 231 made a nine-second call to Purple 018. Mr Sabra's attributed mobile had then moved away from the area of the payphones, before the video's broadcast—which on the Prosecution's case marked the mission's completion—and both were in southern Beirut. This could be considered equally consistent with the Prosecution's case theory or with something else.

5667. The Trial Chamber has also carefully considered the Purple mobile activity near the tree by Al-Jazeera's office from which the video and letter were collected, at approximately 15:53.

5668. The tree, covered on predicted maps by BACHOU3 is adjacent to BNPI3; their furthest distances, of predicted best server coverage, from the tree are respectively around 715 and 655 metres away. Concerning the tree, it is evident that Mr Oneissi, while connecting to BNPI3, could have been within eyesight of the tree, or equally that he could have been 715 metres away from it, well out of view.

5669. Or he could have been even further distant, if his mobile was in a cell bordering BACHOU3 and it was redirected to one of the six adjacent cells to which a call may be redirected—or perhaps more—especially on the afternoon of the attack when the network was congested. The same

reasoning applies to the mobiles connecting to cells providing predicted best server coverage to the payphones, and the neighbouring cells of each. In short, those using the mobiles connecting to these cells may have been nowhere near either the payphones or the tree at the relevant times.

5670. The evidence of Witness 115 is crucial here. He sent a text message at 15:53 stating that he had the video tape. Mr Oneissi's Purple 095 was simultaneously connecting to a cell near the tree from at least 15:54 through 16:02, while Mr Sabra's attributed Purple 018 connected to a cell near the tree from 16:00 to 16:02.

5671. This witness collected the video from the tree. While he was at the tree he sent and received four text messages. In the first, at 15:52, his mobile activated Bashoura_A on the Touch network, but this cell according to Touch's coverage maps, did not provide the predicted best server coverage to the tree, but rather to an area about 300 metres south-west of it. His second text was at 15:53, but his mobile activated Riad_El_Soloh_B, which provided the predicted best server coverage to the tree, on Touch's network maps.

5672. The witness then received two messages, at 15:54 and 15:55, but again activating first Riad_El_Soloh_B and then Bashoura_A. Within a period of three minutes, while the witness was physically next to the tree,¹⁰⁵⁷⁵ his mobile twice activated a cell providing theoretical coverage to the tree, and one that was at least 200 metres away.

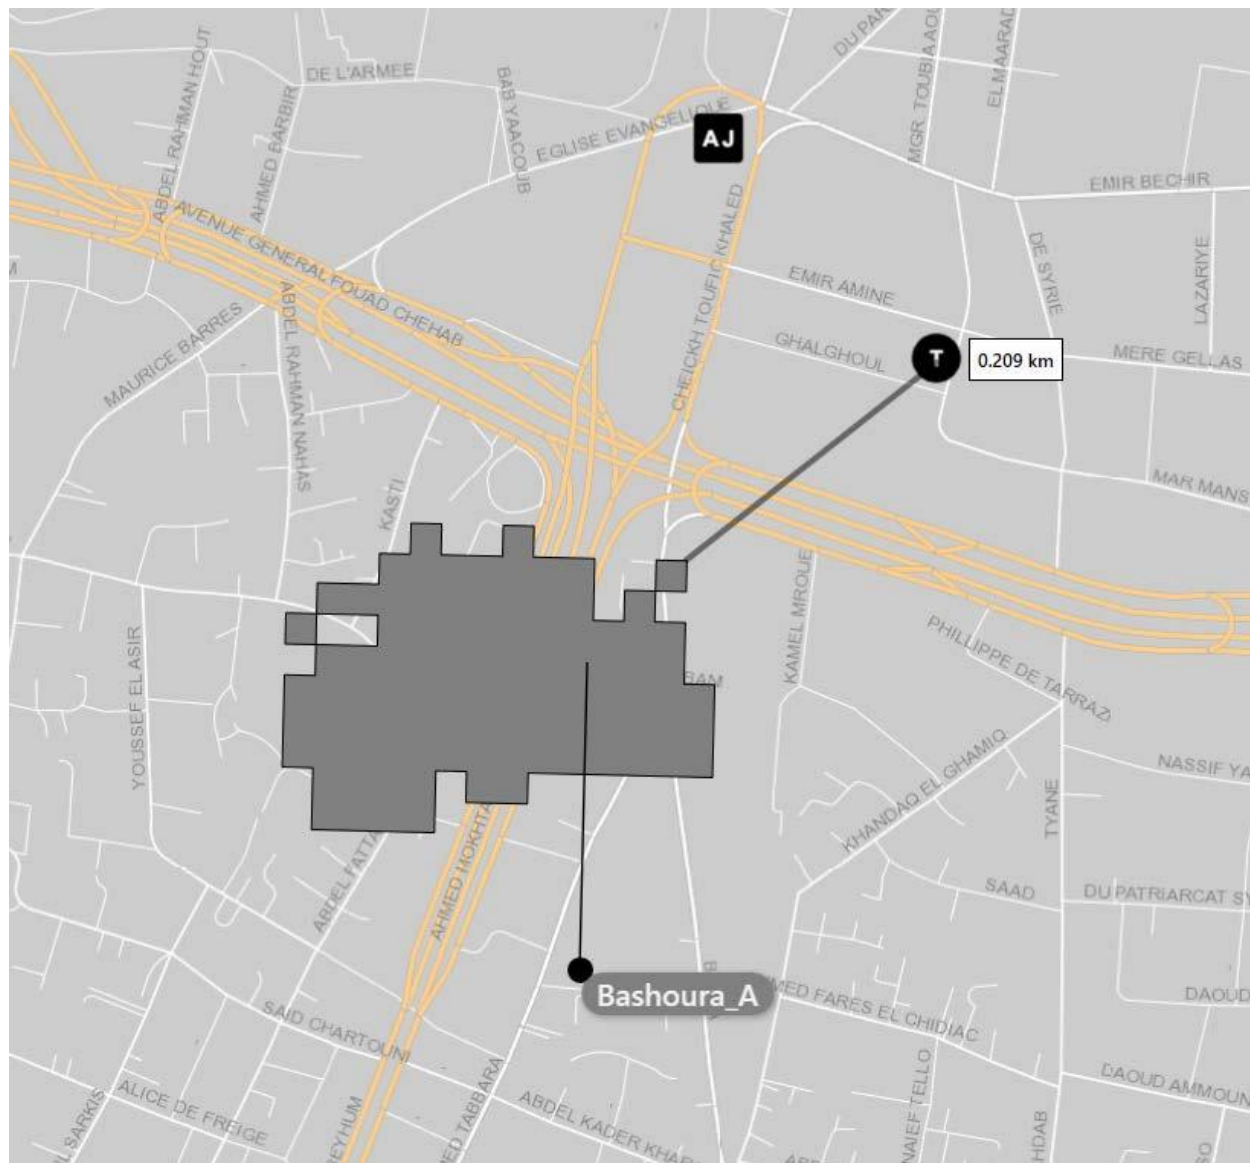

5673. This example is very important because Witness 115 provided evidence of precisely where he was when he sent and received the SMS messages; it is thus possible to compare his actual location against the accuracy of Touch's predicted best cell coverage maps on the afternoon of Monday 14 February 2005. Here, the evidence supports both the Prosecution and Defence contentions.

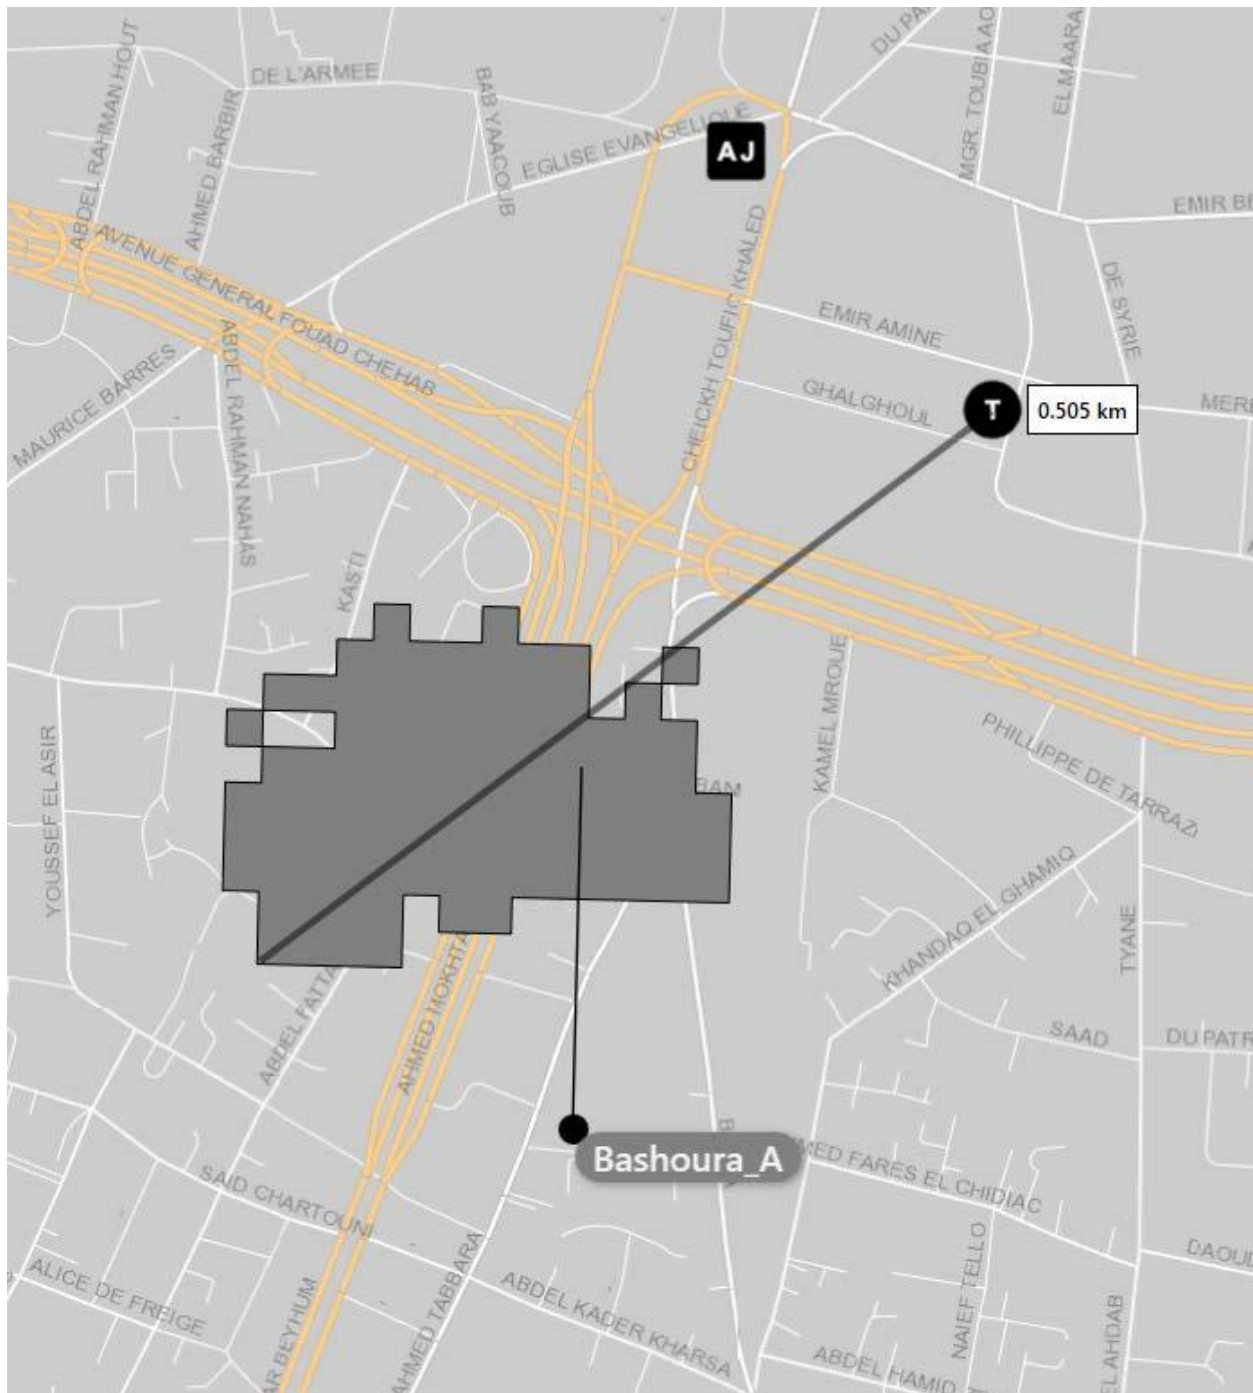

5674. It supports the Prosecution's in showing that mobiles connect either to the cell providing the theoretical best coverage, or a neighbouring cell, and that the Accused may still have been within sight of the tree, while connecting to a neighbouring cell. On the other hand, it also supports

¹⁰⁵⁷⁵ See sub-section (B) (1) (d) 'Collection of the videoed claim of responsibility and the letter at 15:53', at para. 4867.

the Defence's in casting doubt on whether the cell site evidence is sufficiently reliable to place Mr Oneissi within sight of the tree when he was allegedly watching it.

5675. The Trial Chamber, using the electronic presentation of evidence, has calculated from the two maps below that Bashoura_A's closest predicted best server coverage edge to the tree, 'T', is just over 200 metres, while its furthest is around 500 metres away. Al-Jazeera is marked as 'AJ'.

5676. The maps illustrate that while the witness was actually under the tree, the call data records show that he was connecting to a cell and, on its theoretical coverage maps, could potentially have been half a kilometre from it. This demonstrates the danger of relying only on cell site evidence to place a person at a precisely pleaded location. And despite the Prosecution's final trial submissions

that Mr Oneissi could have been watching the tree from a nearby vantage point, the Trial Chamber received no evidence of where this could have been.

5677. The overlap in time and location when Witness 115 was collecting the video, especially for Mr Oneissi's Purple 095, provides stronger evidence of Mr Oneissi's and Mr Sabra's *potential* involvement in the claim of responsibility than the telephone calls to Reuters and Al-Jazeera. This is assuming that Mr Sabra was using Purple 018. The Prosecution correctly argues that the three distinct but connected events—the call to Reuters, the calls to Al-Jazeera and the collection of the video—must be viewed together to make sense of them. Taken in isolation their mere presence—proved by the connection of their mobiles to a cell providing coverage to the tree at the relevant time—could not prove their involvement in the plot. The Trial Chamber is also conscious that it must exercise an evidentiary doubt in favour of an Accused person.

5678. The evidence shows conclusively that the users of Purple 018 and Purple 095 were somewhere 'near' the tree when Witness 115 collected the false claim video and letter, connecting to BNPI3. This is 'near' in the relative sense of connecting to a cell that could have placed them at least 700 metres away, or even in a neighbouring cell, and thus further away.

5679. It cannot, however, concretely show where in relation to the tree they were, nor whether they were actually together, nor that it was within their sight. Nor can it say anything about when the objects were placed in the tree or by whom. But it definitively proves that Witness 115 was at the tree while his mobile was connecting to a cell providing coverage to a plot at least several hundred metres away. This was on the Touch network, but the principles apply equally to Alfa cells. This evidence showing that a mobile connected, twice within three minutes, to a cell several hundred metres away, while the witness was at the tree, illustrates the inherent difficulties in relying solely on cell site evidence to situate someone at a precise location.

5680. How, when faced with this positive contemporaneous evidence that a mobile at the tree could connect to a cell at least 200 to 500 metres away, could the Trial Chamber positively find beyond reasonable doubt that Mr Oneissi was simultaneously there at the same tree, watching it? The answer is that there has to be a reasonable doubt. This is even when this specific piece of evidence is viewed within the totality of all the Purple mobile calls that afternoon.

5681. The Trial Chamber also cannot be certain from this evidence that the Purple mobile users were present ‘near’ the tree and payphones because they were active participants in the false claim plot.

5682. The Trial Chamber recognises that it is of course suspicious that the user of Purple 018, and Mr Oneissi as the user of Purple 095 or both were *relatively near* the four payphones, or the tree containing the video on Monday 14 February 2005. This is in the qualified sense of their being at least within a few kilometres of them at relative times, while recognising the possible patterns that emerge. And that this occurred within a comparatively short period around when the calls to Reuters and Al-Jazeera were made, and the video was collected. As noted above, the strongest evidence is that the users of the two Purple mobiles were connecting to a cell providing coverage to the tree when the Al-Jazeera employee collected that package, thus *potentially* allowing them to observe what was happening.

5683. The patterns of contacts between Purple 018 and Purple 095, and Purple 018 and Purple 231 also clearly attract suspicion. These mobiles were in contact with each other on Monday 14 February 2005 at times relatively close to the times of the telephone calls and the video collection. It is indeed, as Mr Platt testified, ‘consistent with’ Mr Sabra, if he used Purple 018, providing update reports to Mr Merhi about the calls and the video collection. Purple 095 and Purple 231 were not in contact that day; their last contact occurred on 26 January 2005. Mr Sabra’s shared Purple 018’s and Mr Oneissi’s Purple 095’s voyage away from the area to near their homes afterwards is likewise consistent with the completion of a mission, as Mr Platt concluded.

5684. Another important factor, however, is that Mr Ben-Jeddo stated that there were three distinct callers. He may well have been mistaken; it is of course possible that one person disguising their voice made all three calls. The caller(s) may not even have been male. And, further, he was testifying many years after the event about receiving calls from unknown callers in what would have been a fairly tense, evolving and uncertain situation. But this is the evidence on the record, and it militates against a finding that either Mr Sabra or Mr Oneissi, or both, made the calls. On Mr Ben-Jeddo’s evidence someone is missing, namely that there was a potential third caller, and the Prosecution cannot provide any explanation for this. Additionally, there is no way of determining whether the same person(s) made the initial call to Reuters.

5685. But to conclude this, the Trial Chamber has to be satisfied beyond reasonable doubt that Mr Merhi was coordinating what they were doing—or, as is submitted in the Prosecution’s final trial brief, ‘supervising’ their activities. The only evidence of this, it is emphasised, comes from analysing the call patterns between Mr Merhi’s personal mobile Purple 231 and the contacts on the Green network mobile 071, which the Prosecution attributed to him, with Mr Badreddine’s Green 023. More specifically:

- Mr Merhi’s Purple 231 called Mr Sabra’s attributed Purple 018 at 14:03, eight minutes before the call to Reuters;
- Mr Merhi’s Purple 231 called Mr Sabra’s attributed Purple 018 at 14:36, seventeen minutes after the first call to Al-Jazeera at 14:19; and
- Mr Sabra’s attributed Purple 018, Mr Oneissi’s Purple 095 and Mr Merhi’s Purple 231 exchanged nine calls from 15:53 to 16:02, some 26 minutes after the second call to Al-Jazeera at 15:27.

5686. There were also calls contemporaneous with the collection of the video from the tree. And Purple 018 called Mr Merhi’s Purple 231 at 17:15, eleven minutes after the final call to Al-Jazeera. The Trial Chamber agrees that these calls could indeed be considered, in Mr Platt’s words, as ‘consistent’ with their participation in the calls and the collection of the video from the tree. It also notes, in this regard, the caution that should be exercised in using this term in a scientific sense to draw conclusions, without also stating what else it could have been consistent with.¹⁰⁵⁷⁶

5687. The Trial Chamber further notes in this regard that Mr Sabra’s attributed Purple 018 called Mr Merhi’s Purple 231 on Tuesday 25 January and Friday 4 February 2005. On 25 January, Purple 018 activated ETOILE1, which provided coverage to the Parliament and is adjacent to BNPI3, which is very close to the tree where the video and letter were to be placed, meaning that potentially it could have connected to BNPI3.

5688. On Friday 4 February, Mr Sabra’s attributed Purple 018 connected to AICHA1, but the edge of its predicted coverage the closest to the tree is a kilometre from it. Very little therefore could be drawn from this, although, on one view, it could be construed as a preparatory act in the

¹⁰⁵⁷⁶ In this respect *see* exhibit 1D270, the UK’s Forensic Science Regulator’s *Codes of Practice and Conduct*, referred to above at paragraphs 5127, 5142.

sense of ‘scoping’ the vicinity. Yet it is equally plausible that Mr Sabra, if he was indeed using Purple 018, was nowhere near the tree on the day. Thus his possible visit to the vicinity of the tree is obviously not the only inference reasonably available from the evidence whether viewed individually or holistically; and ‘consistency’ does not equate to proof beyond reasonable doubt as it must not only be ‘consistent’ but also the only inference reasonably available on the evidence. Here, it is not, even though it is not a fact requiring proof beyond reasonable doubt.

5689. However suspicious the Purple mobiles’ movements and communications with each other on Monday 14 February 2005 and in the preceding weeks are, they are insufficient to establish the Accused’s involvement in the claim of responsibility. These suspicions do not rise to the exacting level of proof beyond a reasonable doubt that Mr Merhi, Mr Oneissi and Mr Sabra must have participated in the dissemination of a false claim of responsibility. There is too much uncertainty surrounding what they were doing. There is no evidence of the content of their calls, their texts and whether they met, or where and when and what was discussed. Nor does the evidence establish that Mr Sabra was using Purple 018 that afternoon.

5690. It must be emphasised again that once the evidence identifying Mr Oneissi as ‘Mohammed’ is eliminated from consideration, the strength of the Prosecution case significantly diminishes.

5691. The Trial Chamber therefore finds that the Purple mobile activity highlighted by the Prosecution is too remote in time and distance to demonstrate that the Accused were present at the payphones when the calls were made, were otherwise involved in the calls, or were located at the site of the video collection.

5692. The Trial Chamber, it is also stressed here, has factored in its specific concerns about the reliability of the cell site evidence on the afternoon of Monday 14 February 2005, and most particularly because of the network congestion that would have resulted in mobiles connecting to neighbouring cells as a result of directed retries.

G. Whether the claim of responsibility was false

5693. The Trial Chamber, as is detailed above, heard uncontested evidence that after the explosion, on Monday 14 February 2005, the Reuters and Al-Jazeera media outlets in Lebanon, were informed of a claim of responsibility for the assassination. The claim was made in several

telephone calls to the two broadcasters; in a video-tape featuring Mr Abu Adass reading a statement; and in a letter accompanying the video-tape that Al-Jazeera employees retrieved from a tree.

5694. The heart of the Prosecution's case against Mr Merhi, Mr Oneissi and Mr Sabra is that the claim of responsibility was false. The amended consolidated indictment avers that they participated in making a knowingly false claim of responsibility and the Prosecution's case proceeded on that basis. They are charged in count six under Article 219 (4) and (5) of the Lebanese Criminal Code as accomplices to committing a terrorist act by participating in making a false claim of responsibility. Counts six through eight also charge the three under the same Article.

5695. However, no *direct* evidence that it was a *false* claim of responsibility was produced at trial. The evidence from which the Prosecution urges the Trial Chamber to find that the claim was false falls into several distinct categories. The first is the lack of forensic evidence at the crime scene connecting Mr Abu Adass with it; in this respect the Trial Chamber has found that Mr Abu Adass's DNA was not detected there, thus eliminating him as the suicide bomber.¹⁰⁵⁷⁷ And, further, that he could not drive.

5696. The second relates to Mr Abu Adass's character and background. This evidence comes from his friends and relatives and is generally to the effect that he was a quiet and unassuming young man who was becoming more religious. On the Prosecution's case, he was more likely to have been selected as the scapegoat for the false claim; on the Sabra Defence's, as a scapegoat targeted by *al-Ahbash*.

5697. The third concerns the content of the video and accompanying letter outlining the claim of responsibility and whether it appears to have been a genuine jihadi claim of responsibility. Connected with this is general and vague evidence that the group in whose name Mr Abu Adass claimed responsibility for the attack was unknown on 14 February 2005, and was never seen again.

5698. Another consideration is whether only part of the claim of responsibility was false. In other words, whether Mr Abu Adass was the real suicide bomber yet the group *El-Nusra-wal-Jihad-fi-Bilad-El-Sham* was fictitious. Or alternatively, that the group was real and was responsible for the

¹⁰⁵⁷⁷ See chapter VI 'Explosion on 14 February 2005', (F) (3) (c) (iv) 'Findings'.

attack, but Mr Abu Adass was not the suicide bomber. The third is that pleaded by the Prosecutor, namely, that both parts of the claim were false.

5699. Finally, and most crucially, are Mr Merhi's, Mr Oneissi's and Mr Sabra's actions, including the allegation that Mr Oneissi acted as 'Mohammed' to befriend Mr Abu Adass, and their using him to create the video of the false claim. The purported identification of Mr Oneissi as 'Mohammed' aside, added to this is the telecommunications evidence concerning calls between Mr Merhi's and Mr Oneissi's mobiles and Mr Sabra's attributed mobile between Wednesday 29 December 2004 and Monday 14 February 2005. It is from the combination of this evidence that the Prosecution submits that the Trial Chamber should convict the three Accused.

1. Evidence

(a) The claim of responsibility

5700. On Monday 14 February 2005, at 14:11, as is explained above, the Beirut office of Reuters received a call and Witness 12 answered the call from someone, who read her a statement to the following effect:

We, the Nusra and Jihad group in the Greater Syria, on this day have given due punishment to the infidel Rafik Hariri, so that he may be an example to others of his sort. God is our witness, God is a witness to what we're saying.¹⁰⁵⁷⁸

5701. At around 14:19 someone then called Al-Jazeera's Beirut office. Mr Ben-Jeddo testified that the caller said something very similar to the written text containing the claim of responsibility for the assassination, which the Al-Jazeera office received later.¹⁰⁵⁷⁹

5702. The video tape contained a footage of Mr Abu Adass under a banner of *El-Nusra-wal-Jihad-fi-Bilad-El-Sham* reading out the following claim of responsibility:

In the name of Allah, Lord of the Worlds, Blessings and Peace be upon his Beloved Prophet and his family and all his companions.

¹⁰⁵⁷⁸ Witness PRH012, T. 14 July 2015, pp 17-18, 60; exhibit P509 (Report of interview with Witness PRH012), p. 1.

¹⁰⁵⁷⁹ Ghassan Ben-Jeddo, T. 8 July 2015, p. 83; Witness PRH006, T. 23 June 2015, pp 42-43.

In support of our brothers, the Mujahedeen in the Land of the Two Holy Mosques, and to avenge their innocent martyrs, who were killed by the security forces of the infidel Saudi regime in the Land of the Two Holy Mosques, we have resolved, having placed our trust in God Almighty, to inflict just punishment upon the agent of that regime and its cheap tool in Greater Syria, the sinner and holder of ill-gotten gains Rafiq Hariri, through the execution of a resounding martyrdom operation; such as to confirm our promise of Victory and 'jihad' and to herald numerous martyrdom operations against the infidels, apostates and tyrants in the Greater Syria.

"Praise be to Allah, Lord of the Worlds."¹⁰⁵⁸⁰

5703. The letter accompanying the video tape stated:

Praise be to God Lord of the Worlds, Most Gracious, Most Merciful, Master of the Day of Judgment, and Blessings and Peace be upon his Servant and Prophet and his family and all his companions.

Here is good news for all Muslims and especially the Holy Land of Palestine, Mesopotamia, the Sanctuary of the Two Holy Places, our brothers in Afghanistan, our people in Chechnya and the Blessed Land of Greater Syria; good news raising the banner of oppressed believers and supporting their struggle against arrogant despots.

Praise be to God, the banner of support and jihad was held aloft in Greater Syria and, praise be to God, due punishment was meted out to the agent of infidelity in the Land of the Two Holy Places, Rafic Hariri, through a suicide operation carried out by the Mujahid, Ahmad Abou-Adass, who raised the banner of support and jihad in Greater Syria on Monday 14 February 2005 AD, 5 Muharram 1426 AH, in Beirut.

God is Great, Praise be to God Lord of the Worlds.

Attached is a film of the martyr Ahmad Abou-Adass, who carried out the operation.

5704. The letter was signed *El-Nusra-wal-Jihad-fi-Bilad-El-Sham*, Abou Hafass El-Chami.¹⁰⁵⁸¹

¹⁰⁵⁸⁰ Exhibit P499 (The digital format of the video tape containing the claim of responsibility); exhibit P499.1 (Transcript of text read by Ahmad Abu Adass on the tape).

¹⁰⁵⁸¹ Exhibit P500 (Letter accompanying video tape) (emphasis omitted).

(b) Evidence about the contents of the claim of responsibility

5705. The Trial Chamber heard evidence about Mr Abu Adass's appearance in the video claiming responsibility, and the group in whose name responsibility was made.

5706. Five witnesses noted that Mr Abu Adass looked different from usual in the video tape.¹⁰⁵⁸² His face was pale and tired. He was dressed in an *amamah* (a turban) and dark clothing, which was different to the white or grey clothes he usually wore.¹⁰⁵⁸³ Mr Abu Adass wore a turban for the first time.¹⁰⁵⁸⁴ His expression also seemed unusual.¹⁰⁵⁸⁵ Witness 56 and Mr Taysir Abu Adass noted that his voice was low and not normal.¹⁰⁵⁸⁶

5707. Mr Ben-Jeddo appeared live for the first time after the explosion during a news bulletin on the 'top of the hour'. He hesitantly mentioned the call claiming responsibility for the assassination as he was sceptical about the veracity of the claim.¹⁰⁵⁸⁷ He announced the following:

I just want to point out that we have received a phone call here in our office in Beirut that we report to the viewers as is, but with reservation. Someone called and claimed to be talking in the name of a group called the *El-Nusra-wal-Jihad-fi-Bilad-El-Sham*. It is the first time we hear of this group. He said, "the group announces the execution... (direct quotation) the execution of the comeuppance" of whom he described as the infiltrator and infidel Rafic Hariri. The caller also described the operation as a suicide attack and the details will be revealed soon. We have never heard of this group. We think that the real perpetrators of the assassination of late Prime Minister Rafic Hariri... This was just a voice

¹⁰⁵⁸⁷ See sub-section (B) (1) (b) 'First call to Al-Jazeera at 14:19'.

speaking about this issue... But I can confirm that the man was not speaking good Arabic.¹⁰⁵⁸⁸

5708. He then continued to analyse the possible impacts of Mr Hariri's assassination on the Lebanese political scene and economy.¹⁰⁵⁸⁹ He was of the view that considering the security measures in place to protect the former prime minister, 'those who managed to hit Hariri today knew exactly what they were doing and it was definitely a very high-rank intelligence security operation', and that the group which claimed responsibility for the attack was 'just a cover'.¹⁰⁵⁹⁰ That the caller did not speak good Arabic was one reason he handled this group's claim with reservations.¹⁰⁵⁹¹

5709. Mr Ben-Jeddo had not heard of the '*El-Nusra-wal-Jihad* in Greater Syria' group before he received the call, or ever again.¹⁰⁵⁹² As a seasoned journalist relying on his experience with claims of responsibility for assassinations, including 'on the Palestinian scene', he expected more than one organisation claiming responsibility for operations with the magnitude of the attack on Mr Hariri.¹⁰⁵⁹³ The caller's poor Arabic,¹⁰⁵⁹⁴ and that the claim came from a fundamentalist religious group surprised him and made him sceptical about the veracity of the claim.¹⁰⁵⁹⁵ Only when Al-Jazeera received the video record of the claim did he take it seriously.¹⁰⁵⁹⁶

5710. He also found it unusual that a 'radical religious group' claimed responsibility for Mr Hariri's assassination, as—in his view—it would have affected the Muslim, more specifically the Sunni public opinion on Islamist movements.¹⁰⁵⁹⁷ His opinion was that it would have been 'very embarrassing' to Islamist groups had Mr Hariri been killed by members of his own religious sect, Sunni Muslims, under the banner of Islam.¹⁰⁵⁹⁸

¹⁰⁵⁹⁶ Ghassan Ben-Jeddo, T. 9 July 2015, p. 19.

¹⁰⁵⁹⁷ Ghassan Ben-Jeddo, T. 10 July 2015, p. 29.

¹⁰⁵⁹⁸ Ghassan Ben-Jeddo, T. 10 July 2015, pp 34-35.

5711. The same night, Mr Ben-Jeddo hosted talk shows with guests including Mr Assaad Harmouche, a member of *Jamaa Islamiya*'s political bureau and a Lebanese MP.¹⁰⁵⁹⁹ The witness remembered that Mr Harmouche had doubted any religious group's responsibility for the attack.¹⁰⁶⁰⁰

5712. A few weeks later, Mr Ibrahim El-Masri, then the Deputy Secretary-General of the *Jamaa Islamiya*, expressed his doubts to Mr Ben-Jeddo that Mr Abu Adass had executed the attack on Mr Hariri, and excluded the involvement of any Islamic group, including al-Qaeda.¹⁰⁶⁰¹ According to Mr Ben-Jeddo, Mr El-Masri had a distinguished status in the *Jamaa Islamiya* and 'knew a lot of things about a lot of people', including Mr Abu Adass, who attended the mosque in the centre of Tariq-El-Jdideh—a locality in southern Beirut—where the *Jamaa Islamiya* was also present.¹⁰⁶⁰² Mr El-Masri described Mr Abu Adass to Mr Ben-Jeddo as a very modest and 'somehow naive' person, and therefore considered that he may have only been a 'scapegoat'.¹⁰⁶⁰³

5713. Witness 6, Al-Jazeera's editor who answered the first call to Al-Jazeera, before giving the receiver to Mr Ben-Jeddo, testified that she had not heard of the *El-Nusra-wal-Jihad-fi-Bilad-El-Sham* group before.¹⁰⁶⁰⁴ Witness 12 testified that after the call to Reuters she had informed her supervisor that 'an unknown person' had called to claim responsibility for the explosion.¹⁰⁶⁰⁵

5714. On the Prosecution's application—opposed by the Ayyash, Badreddine, Merhi and Oneissi Defence—the Trial Chamber declared Witness PRH620,¹⁰⁶⁰⁶ who works in counter-terrorism, as an expert under Rule 161, holding that she could provide some limited expert opinion evidence. The witness had prepared a lengthy report comparing the video with that of claims of responsibility for other attacks in Iraq, Saudi Arabia, Pakistan, Jordan, the UK, Tunisia, Russia, Kenya, Turkey, Indonesia, Qatar and Morocco. She had concluded that the attack was not carried out by jihadi

¹⁰⁵⁹⁹ Ghassan Ben-Jeddo, T. 10 July 2015, pp 27-29; exhibit 5D167 (Statement of Ghassan Ben-Jeddo, dated 5 and 12 September 2007), para. 82.

¹⁰⁶⁰⁶ Ms Rita Katz.

groups and that Mr Hariri was not a target of such groups at the time of his death.¹⁰⁶⁰⁷ The Trial Chamber held that:

Although it is not the report of an academic, its author evidently has some considerable “specialized knowledge” in the area of analysing videoed jihadist claims of responsibility for attacks. The witness has carefully compared and contrasted various “genuine” jihadist video claims of responsibility with that aired on Al-Jazeera on 14 February 2005, concluding that the latter was not genuine.¹⁰⁶⁰⁸

5715. The Prosecution had intended that this witness would provide the necessary analytical opinion evidence from which the Trial Chamber could determine that the claim of responsibility was false. The witness had been listed to testify by video-conference link on a specified date.

5716. However, the witness did not testify in the case. Hence, the Prosecution did not lead its main evidence, albeit expert opinion evidence, that the claim of responsibility was false. As a consequence, and at the end of the trial, the Prosecution could only rely upon Mr Ben-Jeddo’s assertion that the group was fictitious—in combination with other circumstantial pieces of evidence—to establish that the videoed claim of responsibility was false.

(c) Mr Abu Adass’s background and associates

5717. The Trial Chamber heard evidence about Mr Abu Adass’s background, character and associates. The Prosecution and Sabra Defence argue that this shows he was a likely scapegoat, while the Oneissi and Merhi Defence submit that this made him the probable suicide bomber. Most of the evidence about Mr Abu Adass, notwithstanding that in large part it was admitted under Rule 158, appeared to be uncontested.

5718. The evidence, to recap, is that he was a Palestinian who had been born in Saudi Arabia and arrived in Lebanon, aged nine. He had no full-time job, but rather had worked in part-time positions after leaving school, in printing and in computing. The descriptions of his personality, from those

¹⁰⁶⁰⁷ Decision on expertise (Witness PRH620), para. 4.

¹⁰⁶⁰⁸ Decision on expertise (Witness PRH620), para. 13. It then authorised her to testify via video-conference link. Decision authorising video-link testimony (Witness PRH620).

who knew him, were of an isolated person with limited social contacts, introverted who could not drive and who had become increasingly religious in the period before his disappearance.¹⁰⁶⁰⁹

5719. In addition to the evidence detailed above describing who he was, the Trial Chamber received the following evidence relevant to whether he could have either been the suicide bomber or connected with the plot to kill Mr Hariri; it included some limited information about Mr Abu Adass's associates who allegedly had extremist connections.

5720. Witness 56 said that Mr Abu Adass had a friend with the given name of 'Khaled'.¹⁰⁶¹⁰ Mr Ramadan, however, never heard Mr Abu Adass talk about Mr Taha,¹⁰⁶¹¹ and did not himself know him.¹⁰⁶¹² According to an indictment issued by a Lebanese Military Court investigating judge in April 2007, Mr Taha had been allegedly involved in activities connected with al-Qaeda.¹⁰⁶¹³ The Trial Chamber notes here that it was an indictment, meaning an allegation of criminality, as opposed to a court judgement.

5721. In this respect, the Sabra Defence tendered an ISF summary report provided to the UNIIIC investigation, dated 24 September 2005 and headed 'Information about a suspect who was acquainted with Ahmad Abu Adass'. This investigatory report referred to connections between Mr Abu Adass and Mr Khaled Taha who had alleged al-Qaeda connections; the report stated that it 'is probable that the religious commitment of Abu Adas and Taha was very similar because they used to pray together which means that they both adopted the same ideology and doctrine'.¹⁰⁶¹⁴ The information, however, is in a summary report and the Trial Chamber received no evidence concerning the reliability or credibility of the information from which the summary was drawn.

¹⁰⁶⁰⁹ See sub-section (C) 'Mr Ahmad Abu Adass', above.

¹⁰⁶¹⁰ Exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), pp 3-4, 6.

¹⁰⁶¹¹ Exhibit P1776 (Transcript of Ziad Ramadan's interview by UNIIIC, 22 May 2006), p. 48 (ERN 60005321).

¹⁰⁶¹² Exhibit 5D470 (Statement of Ziad Ramadan, 8 November 2005), p. 16; exhibit P1776 (Transcript of Ziad Ramadan's interview by UNIIIC, 22 May 2006), pp 20, 48 (ERNs 60005293, 60005321).

¹⁰⁶¹³ Exhibit 5D502 (Lebanese Military Court indictment), pp 4, 8. The indictment alleges that in 2004 Mr Taha was recruited to work for al-Qaeda to establish cells in Lebanon, and was involved in preparatory acts in carrying out terrorist attacks there.

¹⁰⁶¹⁴ Exhibit 5D251 (Investigative summary report about Khaled Taha), p. 5 (ERN 308323). The Trial Chamber admitted a portion of this document, namely two paragraphs from which the above evidence is drawn. The remainder of the document was received into evidence only to provide context for the admitted portion. Decision clarifying decision on admission of documents (Abu Adass), paras 9-12.

5722. According to Mr Ramadan, Mr Abu Adass had contact with Mr Husam Mohsen, also known as ‘Sheikh Husam’.¹⁰⁶¹⁵ Mr Ramadan thought that Mr Abu Adass knew Mr Mohsen as he had applied for a job at a print shop where Mr Mohsen was working.¹⁰⁶¹⁶ Witness 56 stated that ‘Sheikh Husam’ had worked at the Abded Printing press, where Mr Abu Adass had been employed a few months before his disappearance.¹⁰⁶¹⁷ The Trial Chamber received very limited evidence as to who Mr Mohsen was; in response to a suggestion by Sabra Defence counsel, Prosecution analyst Ms Kei Kamei agreed that Mr Mohsen was Mr Abu Adass’s religious mentor who guided him through ‘the process of religious transformation’.¹⁰⁶¹⁸ This was obviously something that was not within her personal knowledge and thus can only be given very limited weight.

5723. Mr Abu Adass also apparently had connections with Sheikh Ahmad El-Saneh, who was arrested in Lebanon in September 2004, in connection with an alleged plot to bomb the Italian embassy in Beirut in 2004.¹⁰⁶¹⁹ Witness 56 stated that Mr El-Saneh had employed Mr Adass at Saadeddine Itani printing press about six months before his disappearance.¹⁰⁶²⁰

5724. Ms Kamei believed that Mr Abu Adass had been hired by Mr El-Saneh at Al-Risala, a publishing house, and that Mr El-Saneh had been arrested shortly thereafter. Mr Macleod thought that Mr El-Saneh was a ‘religious scholar who was acquainted with Ahmad Abu Adass’ and that Mr Abu Adass did not work directly with Al-Risala but for another company that was part owned by it. The evidence of both comes from their interviews with witnesses and is not direct evidence of these facts.¹⁰⁶²¹

¹⁰⁶¹⁵ Exhibit P1776 (Transcript of Ziad Ramadan’s interview by UNIIC, 22 May 2006), pp 19-21 (ERN 60005292-ERN 60005294).

¹⁰⁶¹⁸ Kei Kamei, T. 16 November 2015, p. 49.

¹⁰⁶¹⁹ Exhibit 5D491 (Response from Lebanese ISF to a UNIIC regarding the arrest of people linked to al-Qaeda in September 2004), pp 1-2. In the response, signed by Lieutenant Wissam Al-Hassan, dated 6/3/2006, Mr El-Saneh is identified as Ahmed Issam El-Saheh. In its overview, the report states that on ‘17/9/2004, and according to information made available to the Directorate General of the Internal Security Forces – Information Division, elements of a terrorist network were arrested, who were planning to bomb certain embassies and foreign interests in Lebanon by means of booby-trapped cars and planting explosives in some judicial and security centres. Investigations have been carried out with the detainees by the Information Division of the Directorate General of the Internal Security Forces.’

¹⁰⁶²⁰ Exhibit 5D477 (Statement of Witness PRH056, 1 October 2005), p. 5.

¹⁰⁶²¹ Kei Kamei, T. 16 November 2015, pp 105-106, 110; Alasdair Macleod, T. 13 July 2016, pp 48, 50.

5725. Following Mr Hariri's assassination, the Lebanese investigating authorities searched the Abu Adass family home and seized documents from the hard drive of a computer, including extracts from religious books, transcripts of religious sermons or lectures and audio files.

5726. The Trial Chamber received evidence that this was Mr Abu Adass's personal computer, although there is some inconsistency as to its provenance,¹⁰⁶²² shared only with Mr Abu Adass's younger sister who played games on it.¹⁰⁶²³ The evidence as to whether Mr Abu Adass or his family had an internet subscription—which was received under Rule 158—was conflicting, although receipts for an internet subscription in Mr Taysir Abu Adass's name were found in the family home.¹⁰⁶²⁴

5727. Some of the material from the computer contained passages referring to jihad,¹⁰⁶²⁵ while others included statements recommending practices associated with Sharia rule, such as blood money;¹⁰⁶²⁶ killing prisoners of war;¹⁰⁶²⁷ the necessity of only one true religion;¹⁰⁶²⁸ and marital violence described as 'wife-beating'.¹⁰⁶²⁹ It also included a text entitled 'Jihad: the neglected duty',

¹⁰⁶²² Mr Taysir Abu Adass stated that he had bought it for Mr Abu Adass. Exhibit 5D512 (Witness statement of Taysir Abu Adass, undated), pp 3, 5; exhibit P461 (Witness statements of Taysir Abu Adass, dated 19 January 2005 and 28 February 2005), ERN 50003488. Witness 56 said that Mr Abu Adass's paternal uncle had bought it for him. Exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), paras 31-32 (p. 3). That witness also said that Mr Abu Adass bought it himself. Exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 8. In another statement, Witness 56 was referred to a receipt for the purchase of a computer in the name of Mr Abu Adass. Exhibit P2132 (Statement of Witness PRH056, dated 1 July 2010), para. 123.

¹⁰⁶²³ Exhibit 5D510 (Statement of Witness PRH056, 15 February 2005), p. 1.

¹⁰⁶²⁴ Four receipts for payment for internet subscriptions dated between 1 January 2001 and 1 January 2005 were recovered from Mr Abu Adass's house after his disappearance, in the name of Mr Taysir Abu Adass. Exhibit P805 (List of items seized from the Abu Adass family home), p. 20; exhibit 4D563 (Internet subscription, Taysir Abu Adass, dated 1 January 2005), p. 1; exhibit 4D564 (Internet subscription, Taysir Abu Adass, dated 1 January 2001); exhibit 4D565 (Internet subscription, Taysir Abu Adass, dated 1 October 2004); exhibit 4D569 (Internet subscription, Taysir Abu Adass, dated 1 December 2004), p. 1. *But see*, exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 3; exhibit P761.1 (Transcript of television programme regarding Mr Abu Adass), p. 16; exhibit 5D512 (Witness statement of Taysir Abu Adass, undated), p. 3; exhibit P2128 (Statements of Witness PRH056, dated 13 April 2005 and 18 July 2005), p. 8; exhibit P2131 (Statement of Witness PRH056, dated 7 and 8 June 2007), paras 37-38. Mr Ziad Ramadan stated that Mr Abu Adass 'had no idea about Internet; he never told me he had access to Internet'. Exhibit P1776 (Transcript of Ziad Ramadan's interview by UNIIIC, 22 May 2006), p. 18 (ERN 60005291).

¹⁰⁶²⁵ Exhibits 5D485.24, 5D485.25, 5D485.26, 5D485.28, 5D485.29 (Extracts of books); exhibits 5D486.1, 5D486.2, 5D486.3, 5D487.3 (Transcripts of CD); exhibit 5D488 (Transcript of audio cassette). *See also* exhibit 5D485.4 (Extracts of book—'Jurisprudence of Sunnah', by Sayyid Saabiq).

¹⁰⁶²⁷ Exhibits 5D485.3, 5D485.8 (Extracts of book—'Jurisprudence of Sunnah', by Sayyid Saabiq). One extract, exhibit 5D485.31 (Al Qassam leaflet), takes a more moderate position and sets out 'human rights' in Islamic Sharia, including certain rights attributable to non-Muslims.

¹⁰⁶²⁸ Exhibits 5D485.3, 5D485.5, 5D485.7 (Extracts of book—'Jurisprudence of Sunnah', by Sayyid Saabiq); exhibits 5D486.1, 5D486.3 (Transcripts of CD).

¹⁰⁶²⁹ Exhibit 5D485.21 (Extracts of book—'Jurisprudence of Sunnah', by Sayyid Saabiq).

by Muhammed Abdulsalaam Faraj. In a filing, the Oneissi Defence described him as an ‘Egyptian radical Islamist and theorist’.¹⁰⁶³⁰ The book’s cover describes him as having had a ‘prominent role’ in the preparations for killing the Egyptian President Anwar Sadat, and for which he was executed.¹⁰⁶³¹

5728. Additionally, the Lebanese investigating authorities retrieved various issues of a publication, *Al Battar Camp*, a periodical issued by the military committee of the Mujahidin in the Arabian Peninsula,¹⁰⁶³² and a document entitled ‘The Unequivocal Evidence on the Apostasy of the Saudi State’.¹⁰⁶³³ Two exhibits referred to by the Sabra Defence, exhibits 5D483 and 5D484, are photographs of book covers; in the absence of specific submission as to the nature of these exhibits, the Trial Chamber will not consider them any further.

5729. The Trial Chamber also received a document stating that the computer contained six photographs that ‘show some buildings similar to the buildings at the site of the explosion.’¹⁰⁶³⁴ Neither the Prosecution nor the Defence, however, tendered the photographs into evidence, meaning that the Trial Chamber cannot assess the veracity of this claim.

5730. Mr Taysir Abu Adass and Witness 56 both stated that Mr Abu Adass owned the items on the computer,¹⁰⁶³⁵ although Witness 56 stated that there had been no ‘sketch of the crime scene’ on his computer.¹⁰⁶³⁶ How the witness knew this was unexplained, but in any event the evidence is contained in a Rule 158 statement and the witness was not questioned about it. The Trial Chamber, accordingly, has given it no weight.

¹⁰⁶³⁰ Exhibit 4D572; F3659, Corrected Version of the Rule 154 Motion for the Amendment of the Rule 128 Exhibit List and for the Admission of Documents related to Mr Ahmed Abu Adass filed on 11 May 2018, 29 June 2018.

¹⁰⁶³¹ Exhibit 4D572; (‘Engineer Muhammad Abdulsalaam Faraj – may God have mercy on him – had a prominent role in the preparations for the killing of the damned agent of the Zionists – Anwar “the Jew” – and God generously granted him his wish for martyrdom in His cause. He was executed for his role in the assassination of the damned Sadat, along with Khalid al-Islambouli and his noble brethren – may God have mercy upon them. We consider them to be martyrs and we bear witness to none but God’).

¹⁰⁶³² Exhibit P810 (Documents related to list of items seized from the Abu Adass family home), pp 56, 71; exhibit 4D577 (Copy of *Al-Battar* military periodical); exhibit 4D578 (Communications Security), exhibit 4D579 (Military Studies—Covert Work Group).

¹⁰⁶³⁵ Exhibit 5D512 (Witness statement of Taysir Abu Adass, undated), p. 3 (questioned as to the ownership of ‘the computer, the CDs and the religious books most of which are related to Salafi doctrines’); exhibit 5D474 (Statement of Witness PRH056, 14 February 2005), p. 4.

¹⁰⁶³⁶ Exhibit P2129 (Statement of Witness PRH056, dated 7 July 2005), p. 6.

5731. According to Witness 56, Mr Abu Adass thought that ‘whoever was involved in suicide missions was insane’,¹⁰⁶³⁷ but additionally that he had never talked about suicide bombers.¹⁰⁶³⁸ This witness also stated that Mr Abu Adass never spoke of his friends leaving the country for jihad,¹⁰⁶³⁹ and had never thought of going to Iraq.¹⁰⁶⁴⁰ However, the witness also stated that Mr Abu Adass spoke about jihad for Palestine.¹⁰⁶⁴¹

5732. His father, Mr Taysir Abu Adass, described him as ‘a person who never believed in violence.’¹⁰⁶⁴² Mr Ben-Jeddo testified that Mr El-Sayyed told him that Mr Abu Adass was generally known to have become a fundamentalist.¹⁰⁶⁴³ Later the information became publicly available in the media.¹⁰⁶⁴⁴

2. Submissions

5733. The Prosecution alleges that the claim of responsibility was false, while the Merhi and Oneissi Defence claim that it was genuine. The Sabra Defence agrees that the claim was false, but argues that another group, *al-Ahbash*, was responsible. It agrees that Mr Abu Adass was selected as a scapegoat because of his background and character, but argues that *al-Ahbash* was responsible. These submissions, and the Sabra Defence’s other arguments about *al-Ahbash*’s alleged involvement in Mr Abu Adass’s disappearance, are considered below at paragraphs 5837-5842.

5734. The Prosecution, relying on Mr Ben-Jeddo’s testimony alleges that Mr Abu Adass falsely claimed responsibility on behalf of a fictional fundamentalist group, *El-Nusra-wal-Jihad-fi-Bilad-El-Sham*, the ‘Society for Support and Jihad in Greater Syria’.¹⁰⁶⁴⁵ It further submits, referring to the evidence of Witness 6 and Witness 12, that ‘Unsurprisingly, the invisibility of this group was

¹⁰⁶⁴⁴ Ghassan Ben-Jeddo, T. 10 July 2015, pp 26-27.

¹⁰⁶⁴⁵ Prosecution final trial brief, paras 1109-1113.

confirmed by other witnesses’.¹⁰⁶⁴⁶ Witnesses who knew Mr Abu Adass provided evidence that his appearance in the video was unusual, showing signs of significant stress and coercion.¹⁰⁶⁴⁷

5735. The Prosecution also argues that Mr Abu Adass was selected as a scapegoat because his religious approach and appearance fitted the stereotype of a person who would believably harbour the motives expressed in the video. The language used in the false claim made explicit reference to Mr Hariri’s connection to the Saudi regime, meaning that a scapegoat with apparent ties to Saudi Arabia was desirable.¹⁰⁶⁴⁸ As for the items seized at the Abu Adass house—argued by the Defence to show signs of radicalism—the Defence cannot show that Mr Abu Adass accessed them, or ‘who in that household accessed these materials’, and even if Mr Abu Adass did so, what impact it had upon him.¹⁰⁶⁴⁹

5736. The success of the plot depended on the driving skill of the suicide bomber, whereas Mr Abu Adass could not drive.¹⁰⁶⁵⁰ Mr Abu Adass was making plans for his future life, which included marriage, and was introverted, apolitical and non-violent.¹⁰⁶⁵¹

5737. The Ayyash Defence observes that while the amended consolidated indictment alleges that Mr Ayyash’s culpable acts include communication with Mr Merhi in relation to the false claim of responsibility, the Prosecution’s final trial brief does not do so, and the Prosecution led no evidence upon this issue.¹⁰⁶⁵²

5738. The Merhi Defence argues that the claim was not false.¹⁰⁶⁵³ It points out that the Prosecution presented no evidence to support its theory that the video and letter ‘constituted a *false* claim of responsibility’.¹⁰⁶⁵⁴ It notes that the Prosecution failed to call an expert witness, Ms Katz (Witness PRH620) to verify the statements made in the video tape, relying instead on Mr Ben Jeddo’s ‘factual and non-expert’ evidence. His evidence has no probative value, as the Prosecution had implicitly acknowledged that Ms Katz’s ‘expertise was required so as to enable the Chamber

to arrive at its legal and factual findings on the false nature of the claim, which is an essential element of the crimes of which Merhi stands accused'.¹⁰⁶⁵⁵

5739. Further, evidence of Mr Abu Adass's background shows that the claim was not false. It was 'unusual' for a religious person to have the materials found on Mr Abu Adass's computer.¹⁰⁶⁵⁶ The statements of Abu Adass's family members and friends that he was non-violent and apolitical lack probative value in light of their interest in seeing Mr Abu Adass exonerated,¹⁰⁶⁵⁷ and the fact they were not cross-examined by the Defence.¹⁰⁶⁵⁸

5740. The Oneissi Defence submits that Mr Abu Adass's face was 'much thinner' than the last time the witness saw him, that his skin colour was 'unusual', and that his beard was visibly thicker and in a 'different style'—which shows that the videotape was filmed after 17 January 2005.¹⁰⁶⁵⁹ It also submits that Mr Abu Adass's increased religious commitment is consistent with the claim of responsibility being genuine.¹⁰⁶⁶⁰ The documents found on his computer show that he belonged to the 'extremist Wahhabi Salafi school of thought', and was interested in al-Qaeda.¹⁰⁶⁶¹ Witness 56 tried to hide Mr Abu Adass's interest in jihad and extreme religious ideology from the Lebanese investigation.¹⁰⁶⁶²

5741. The Oneissi Defence also argues that 'a number of elements support that RAMADAN was experimenting with explosives with Abu-Adass' assistance' including that Mr Abu Adass 'had been collecting information about bombs and explosives for RAMADAN'.¹⁰⁶⁶³ This submission, however, relies on documents that are not in evidence. Further, associates of Mr Abu Adass, such

¹⁰⁶⁶³ Oneissi Defence final trial brief, para. 299 (footnotes omitted). ('A number of elements support that RAMADAN was experimenting with explosives with Abu-Adass' assistance. A UNIIC witness stated that during his last visit to Abu-Adass' house, Abu-Adass had told him that RAMADAN had studied chemistry and that could make C4 explosives. It seems that Abu-Adass had been collecting information about bombs and explosives for RAMADAN and apparently intended to approach wealthy acquaintances for fund-raising to help RAMADAN's project. This same witness even affirmed that Abu-Adass was performing tests on explosives with RAMADAN. RAMADAN's knowledge about explosives is also confirmed by the "AQ13" group member Hani Al-Shanti.')

as his former employer, Sheikh Ahmad El-Saneh, one of his cousins,¹⁰⁶⁶⁴ Mr Ramadan,¹⁰⁶⁶⁵ Mr Zaaroura¹⁰⁶⁶⁶ and Mr Taha,¹⁰⁶⁶⁷ were connected to ‘violent ideologies’.¹⁰⁶⁶⁸

5742. The Sabra Defence submits that the fact that Mr Abu Adass did not personally claim responsibility in the video, but only in the accompanying letter, shows that he was tricked into making the confession.¹⁰⁶⁶⁹

3. Findings

5743. The Trial Chamber has found that there is no forensic evidence linking Mr Abu Adass to the scene of Mr Hariri’s assassination.¹⁰⁶⁷⁰ Neither his remains nor traces of his DNA were recovered from the crime scene. This means that there is no *direct* evidence linking him with the crime scene. The only evidence is his appearance on the video, which it is noted, provides no details of the nature of the attack. The Trial Chamber has also found that the explosives were detonated by an unidentified suicide bomber, driving the Canter.¹⁰⁶⁷¹

5744. The issue therefore is whether the contents of the claim of responsibility—in the letter and video—in combination with the evidence of Mr Abu Adass’s background and character, support a finding that the claim of responsibility was false. It is a material fact that must be proved beyond reasonable doubt.

5745. Mr Taysir Abu Adass, Witness 56 and Mr Ziad Ramadan each stated that in the video Mr Abu Adass had a changed appearance and a nervous demeanour.

5746. Their evidence is internally consistent on knowing Mr Abu Adass well and being aware of his appearance shortly before his disappearance. They were undoubtedly horrified when they viewed the video and, as a normal reaction to viewing it, they would have been expected to have scrutinised his comportment, including his clothing. In noting this, though, the Trial Chamber is

¹⁰⁶⁶⁴ Oneissi Defence final trial brief, para. 289.

¹⁰⁶⁷⁰ *See* chapter VI ‘Explosion on 14 February 2005’, (F) (3) (c) (iv) ‘Findings’.

¹⁰⁶⁷¹ *See* chapter VI ‘Explosion on 14 February 2005’, (F) (2) (f) (iii) ‘Findings’.

also cognisant that they may have been downplaying his potential involvement in the attack. And, as the evidence was admitted under Rule 158, is not corroborated by any witness who testified, and their evidence is generally contested, the Trial Chamber has given it very limited weight on this point.

5747. However, given the nature of what Mr Abu Adass was saying, namely that he was informing the world that a jihadist group had killed Mr Hariri, someone in those novel circumstances might have appeared nervous, and not just to those who knew him. The Trial Chamber is prepared to accept that his physical appearance between his disappearance and his appearance in the video might have changed. The Trial Chamber emphasises, however, that it has no expertise in assessing the demeanour of video-taped would-be suicide bombers, or those involved in making claims—false or otherwise—of Mr Hariri’s, or anyone else’s, assassination.

5748. Significantly, in the video Mr Abu Adass does not assert responsibility for having killed Mr Hariri himself. He does not claim to be a suicide bomber, but rather said, as if operating as a spokesperson for the group:

we have resolved, having placed our trust in God Almighty, to inflict just punishment upon the agent of that regime and its cheap tool in Greater Syria, the sinner and holder of ill-gotten gains Rafiq Hariri, through the execution of a resounding martyrdom operation.

5749. The Trial Chamber notes from its own experience that the video appears staged to appear as if Mr Abu Adass were responsible, in the manner of similar videos that have been broadcast after suicide bombing attacks. In this respect it could be viewed as ambiguous; he is not claiming to be responsible but is speaking on behalf of the group that is claiming responsibility.

5750. Mr Abu Adass, in the video, provided neither a date nor location for the attack. Nor did he describe the attack itself. He does not claim to be the suicide bomber. The accompanying letter, however, precisely referred to ‘a suicide operation carried out by the Mujahid, Ahmad Abou-Adass, who raised the banner of support and jihad in Greater Syria on Monday 14 February 2005 AD, 5 Muharram 1426 AH, in Beirut’.

5751. The only conclusion available from the combination of these two pieces of evidence, in tandem with the evidence of the date of Mr Abu Adass’s reported disappearance, is that the video

was made some time in advance of the attack. The letter, however, was prepared—on an unknown date—in anticipation of its dissemination on an identified date after the attack. The video of itself does not provide proof that, when it was made, those in the conspiracy to kill Mr Hariri had decided to kill him with suicide bomber detonating explosives concealed on a light truck.

5752. In the video, Mr Abu Adass is sitting in front of a banner displaying the name of the group, *El-Nusra-wal-Jihad-fi-Bilad-El-Sham*. Consistent with this, in both the letter accompanying the video tape and the statements read to the media outlets in the telephone calls, the group claimed responsibility for the attack.

5753. The only evidence about the existence or otherwise of this group, as noted, comes from Mr Ben-Jeddo, who testified that it had not been heard of before, or after, the claim of responsibility.¹⁰⁶⁷² Witness 6, the Al-Jazeera editor, had also never heard of it, but this was not explored with her, and her few words on this topic can thus be given very limited weight. Witness 12, who took the call at Reuters described the group as ‘unknown’. The Prosecution’s submission that ‘unsurprisingly’ these witnesses confirmed the group’s invisibility is stretching the evidence.

5754. Mr Ben-Jeddo’s evidence, therefore, it is stressed, is the only ‘direct’ proof that the group is fictitious. The Trial Chamber did not hear any evidence of Mr Ben-Jeddo’s specific expertise on this point, but is prepared to accept, based upon his lengthy experience as a journalist in the region at the time, that the group was generally unknown. It also accepts his evidence that the group was never heard of again, at least by those who were likely to have known about it if it indeed existed, such as Al-Jazeera journalists working in the region.

5755. Additionally, and the Trial Chamber notes that this is a matter of common knowledge, Mr Ben-Jeddo noted that often more than one organisation claims responsibility for the same attack. He also provided cogent reasons why in his view the group was fictional. In this respect, his evidence can be viewed as reliable.

5756. This leans towards a finding that the group was fictional. Further, the evidence of Mr Abu Adass’s character and background does not detract from this potential conclusion. It is uncontested

¹⁰⁶⁷² Ghassan Ben-Jeddo, T. 8 July 2015, pp 83-84, T. 10 July 2015, p. 93.

that Mr Abu Adass became increasingly religiously committed at least a year—although the evidence is also of the ‘years’—before the assassination, including growing a beard, wearing Islamic clothing and attending the mosque five times a day. He was also described as being ‘introverted’; however, in the Trial Chamber’s view, nothing particular turns on this. In the absence of any expert evidence on this point—such as on the psychological profiling of those claiming responsibility for similar attacks, whether by a suicide bomber or someone else—no inference can be drawn one way or another connecting someone having an introverted personality with potential jihadi or suicide bombing tendencies.

5757. Several possibilities arise. They include that Mr Abu Adass voluntarily joined a fictitious jihadi group—or perhaps thought that he had joined a real one—and freely participated in a video claiming responsibility for an attack before it had occurred. Another is that he was lured into making the video, for unknown reasons. Alternatively, he was forced to do so. The evidence is insufficient to allow the Trial Chamber to draw any positive conclusions either way.

5758. There is no evidence that he had any animosity towards Mr Hariri or Sunni Muslims or any sub-branch of this branch of Islam or any intention of committing crimes against either. But there is some evidence that he had had an interest at least in fundamentalist Islamic teachings and perhaps jihadi activities.

5759. In February 2005, the Lebanese investigating authorities seized documents and a computer from the Abu Adass household. The preponderance of evidence allows the Trial Chamber to find that the computer was used, almost exclusively, by Mr Abu Adass. Among the documents seized were materials that referred to jihad, and to more extremist ideas. As this part of the witnesses’ evidence is uncontroversial,¹⁰⁶⁷³ the Trial Chamber finds no reason to discount Mr Abu Adass’s father’s statement that Mr Ahmad Abu Adass owned the computer and Witness 56’s statement that he used it and only shared it with his younger sister, Rania, who played games on it.

5760. Witness 56 denied that Mr Abu Adass had any jihadi intentions, but also provided evidence that suggested that Mr Abu Adass was sympathetic to jihad in Palestine. The witness’s statement in this respect, however, could be viewed as self-serving and as it was untested the Trial Chamber can give it little weight. Mr Ben-Jeddo testified that Mr Abu Adass was known to have become a

¹⁰⁶⁷³ See para. 287.

fundamentalist. However, he had heard this from Mr El-Sayyed and its provenance and reliability is uncertain. And there is a difference between someone holding fundamentalist views and deciding to end their own life and that of many others in an explosion.

5761. The Trial Chamber believes, both from the evidence of what was found in the Abu Adass house and from common experience, that it is certainly possible that Mr Abu Adass—as a young Palestinian with a relatively newfound strong religious commitment—had some interest in what could be described as ‘extremist’ ideas. At least in the sense that the views were non-mainstream. However, this does not of itself support the inference that he personally wanted to commit jihad, and in particular by murdering Mr Hariri and many others.

5762. The Trial Chamber here also disregards the Oneissi Defence’s assertion at paragraph 299 of its final trial brief connecting Mr Abu-Adass and Mr Ramadan with explosives. The information supporting this submission is contained in annexes to an Oneissi Defence response to the Prosecution’s motion to admit Mr Ramadan’s statements into evidence.¹⁰⁶⁷⁴ These annexes include statements that the Trial Chamber declined to receive into evidence; these were the subject of motions by the Sabra Defence to have them admitted.¹⁰⁶⁷⁵ The submission is therefore based entirely on material not in the trial record and should not have been made.¹⁰⁶⁷⁶

¹⁰⁶⁷⁴ F2622, Defence for Hussein Hassan Oneissi Response to the “Prosecution Motion to Admit Two Statements and an Interview Transcript of PRH103”, Dated 25 May 2016, 9 June 2016, Annexes F-H.

¹⁰⁶⁷⁵ The Sabra Defence made several unsuccessful attempts to tender the statements into evidence, in filings: F3024, Motion for the Admission of Documents Relating to the Claim of Responsibility – Character, religious beliefs and associates of Ahmed Abu Adass with updated annexes, 7 March 2007, para. 2, Annex A, items 7, 64; F3057, Motion for the Admission of Documents Relating to the Claim of Responsibility – The Selection of Ahmed Abu Adass, 29 March 2017, para. 2, Annex A, items 12, 58; F3165, Motion for the Admission of Documents and Statements Relating to Ahmed Abu Adass – The Successful Recruitment of Ahmed Abu Adass, 31 May 2017, para. 2, Annex A, item 18; F3205, Motion for the Admission of Documents and Statements Relating to Ahmed Abu Adass – The Video and the Letter: The False Claim of Responsibility, 30 June 2017, para. 2, Annex A, items 1, 31; F3251, Motion for the Admission of Documents Relating to the Claim of Responsibility – The Fax, 26 July 2017, para. 2, Annex A, item 2; F3411, Sabra Defence Response to “Prosecution Renewal of Application under Rule 158 in respect of Witness PRH056”, 13 November 2017, paras 42-43; F3413, Notice of Amendment of Annex B of Defence Filing of 13 November 2017 (F3411), 16 November 2017, Annex, items 11, 81, 164. The Trial Chamber denied the admission into evidence of these statements in its decisions: Decision on admission of documents (Abu Adass), paras 83-106, disposition; Sabra Defence second bar table decision (Abu Adass selection), paras 2, 8, 17-18, 24-30, disposition; Sabra Defence fourth bar table decision (Abu Adass recruitment), paras 10, 15, disposition; Sabra Defence fourth bar table decision (The false claim of responsibility), paras 4, 15; Sabra Defence sixth bar table decision (Abu Adass fax), paras 12, 14; Summary dismissal of Sabra Defence application to admit 224 documents.

¹⁰⁶⁷⁶ Oneissi Defence final trial brief, para. 299, referring to F2622, Defence for Hussein Hassan Oneissi Response to the “Prosecution Motion to Admit Two Statements and an Interview Transcript of PRH103”, Dated 25 May 2016, 9 June 2016, para. 11, Annexes F-H.

5763. Nor does pointing to friends or acquaintances of Mr Abu Adass with allegedly radical inclinations show that Mr Abu Adass was a likely suicide-bomber. A Lebanese Military Court indictment dating from April 2007—not a judgment, it is stressed—alleges that Mr Khaled Taha was involved in activities associated with al-Qaeda.¹⁰⁶⁷⁷

5764. But, even if the allegations are correct, it does not show anything about Mr Abu Adass. Further, the Trial Chamber did not receive any reliable evidence that Mr Ahmad El-Saneh, Mr Abu Adass's apparent former employer, was involved in an alleged plot in 2004 to attack the Italian embassy in Beirut. The sole basis for this assertion by the Oneissi Defence was Witness 56's statement, which is not a reliable source for this type of information.¹⁰⁶⁷⁸

5765. The remainder of the evidence that the Oneissi Defence pointed to as supporting the alleged radical tendencies of Mr Abu Adass's associates was either not admitted into evidence¹⁰⁶⁷⁹—and thus should not have been referred to in closing submissions—or was not admitted for the truth of its contents.¹⁰⁶⁸⁰ There is thus insufficient evidence on the record from which the Trial Chamber could make these particular findings, as urged upon it by the Defence.

5766. Furthermore, other evidence about Mr Abu Adass's background supports the conclusion that he was not the suicide bomber. The evidence that Mr Abu Adass had never learned how to drive and did not have a car is consistent and not challenged.

5767. The Trial Chamber has found that the suicide bomber transported the explosives to the crime scene in a Mitsubishi Canter.¹⁰⁶⁸¹ Mr Abu Adass thus could not perform one of the key functions of the suicide bomber, namely driving a light truck, and careering it into the path of a convoy as it slowed to pass the St Georges Hotel. It is highly unlikely that he would have been entrusted with this critical task if he were a novice driver who had learnt to drive a light truck only

¹⁰⁶⁷⁷ The judgment was not tendered into evidence. Counsel wished to rely upon its content in the same manner as the judgments of international courts and tribunals would be used. Oneissi Defence closing submissions, T. 20 September 2018, pp 34-39. The Presiding Judge stated that the Trial Chamber could take judicial notice of the contents of a judgment. However, the Trial Chamber was not provided with any judgment from which such judicial notice could be taken.

¹⁰⁶⁷⁸ Oneissi Defence final trial brief, para. 289.

¹⁰⁶⁷⁹ Oneissi Defence final trial brief, para. 299.

¹⁰⁶⁸⁰ Oneissi Defence final trial brief, para. 290, referring to exhibit 5D254 (UNIIC internal memorandum on *al-Ahbash*). See also Sabra Defence second bar table decision (Abu Adass selection), para. 40 (holding that exhibit 5D254 was admitted for the limited purpose of assessing the quality of the UNIIC investigation).

¹⁰⁶⁸¹ See para. 1448.

between his disappearance on Sunday 16 January 2005 and the attack on Monday 14 February 2005.

5768. Mr Abu Adass's lifestyle at the time was also not necessarily consistent with someone planning to carry out a suicide mission soon after his departure from his home on Sunday 16 January 2005. Witness 56 and Mr Ramadan both stated that at the time he disappeared, he was considering marriage. Mr Abu Adass had also recently begun a new and well-paid work project, and seemed happy with that development. These portions of the witnesses' evidence are unchallenged. Therefore, the Trial Chamber has no reasons to discount these statements by people who knew him well, although untested in cross-examination,¹⁰⁶⁸² and considers that such planning for his future is a further but limited factor weighing against him being a suicide bomber.

5769. Finally, the Trial Chamber agrees with the Prosecution and the Sabra Defence that Mr Abu Adass was an ideal scapegoat. As well as his religious background, he was, it appears, probably an introverted young man, aged only twenty-two at the time of the assassination, who still received pocket money from his father. On this limited uncontroversial point,¹⁰⁶⁸³ the Trial Chamber sees no reason to disregard his father's statement. It would appear that he could have been susceptible to influence from strong religious outsiders.

5770. After carefully considering all the circumstances outlined above, the Trial Chamber is of the view that it can be satisfied beyond reasonable doubt that the claim of responsibility for the attack as shown in the video, letter and telephone calls to Reuters and Al-Jazeera, was a false claim. The most likely explanation is that those responsible for Mr Hariri's assassination attempted to turn attention away from themselves by diverting it to someone claiming a hatred of Mr Hariri based upon his connections with Saudi Arabia, ostensibly to avenge the deaths of those who Saudi security forces had killed.

5771. The Trial Chamber, however, cannot positively determine from the totality of the evidence whether Mr Abu Adass was forced to participate in making the video, or alternatively, whether he did so voluntarily. Either is possible. Given that Mr Abu Adass does not claim to be the suicide bomber, he could have been tricked into making the video. On the other hand, he could have agreed

¹⁰⁶⁸² See para. 287.

¹⁰⁶⁸³ See para. 287.

to do it without needing to have been duped. The content of the video does not permit the Trial Chamber to draw an inference one way or the other.

5772. The Trial Chamber also cannot make any explicit finding about Mr Abu Adass's fate; he is most likely deceased, and most probably, it would appear, from soon after his disappearance. There is no evidence on the record from which the Trial Chamber can make a definite finding about what happened to him, or when.

5773. The Trial Chamber finds that Mr Abu Adass was not the suicide bomber and his disappearance is consistent with him being used to set up a false claim of responsibility for the attack by those who perpetrated it. The evidence also suggests that the group *El-Nusra-wal-Jihad-fi-Bilad-El-Sham* was fictitious, meaning that both aspects of the false claim were indeed false.

5774. Even if the conclusion that Mr Abu Adass was not the suicide bomber is incorrect, the findings of criminal responsibility against Mr Merhi, Mr Oneissi and Mr Sabra would not change. Whether or not Mr Abu Adass was the suicide bomber, there is still insufficient evidence to prove beyond reasonable doubt their participation in the counts charged in the amended consolidated indictment.

H. The non-covert nature of the use of the Purple mobiles

5775. Another strand in the Prosecution's case is of Mr Merhi, Mr Oneissi and Mr Sabra using their personal mobiles to communicate—at least by mobile telephone—in executing the false claim of responsibility. The Purple mobiles are thus alleged neither to be 'network' mobiles nor covert in nature. This is in contrast to the closed Red, Blue and Green networks, and the 'semi-covert' Yellow network.¹⁰⁶⁸⁴

¹⁰⁶⁸⁴ Mr Platt, the Prosecution expert in the identification and organisation of covert communication network, classified the Yellow network as 'semi covert', because it was 'on the lower end of the scale' of covertness. The Trial Chamber, however, has considered that a network is or is not covert—based on Mr Philips's and Mr Platt's evidence as to the general characteristics of a mobile network—and that a label of 'semi-covert' did 'not assist the Trial Chamber in its analysis of the Yellow mobiles'. The Trial Chamber has found that, at least the four 'core' Yellow mobiles operated as a type of covert network. See the analysis in chapter VIII 'Nature and purpose of colour-coded mobile networks and Purple group of mobiles'.

1. Evidence

5776. A starting point here is how the investigation came to uncover the potential role of the Purple mobile users in the conspiracy to murder Mr Hariri. The investigations commenced on the afternoon of the attack, yet the UNIIIC did not discover the potential involvement of the Purple mobiles in the attack until November 2008.

5777. The history of the discovery of the colour-coded networks is set out in an investigators' note prepared by Mr Donaldson in 2012, and tendered into evidence by the Oneissi Defence.¹⁰⁶⁸⁵ In relation to the Purple mobiles, the note explains that when investigating mobile activities that could have been linked to the attack, the Lebanese ISF discovered that Purple 231 was last active on 14 February 2005 with only one incoming call the following day.¹⁰⁶⁸⁶

5778. The ISF discovered that its primary contact on 14 February 2005 was with Purple 018, which was 'located in the vicinity of the different phone booths' from where the calls to Reuters and Al-Jazeera were made. Purple 018 was also in contact with another mobile, Purple 095, which was 'in the vicinity of the tree in ESCWA square' from where the Al-Jazeera's staff collected the video tape. Both Purple 018 and Purple 095 were last used on 16 February 2005.¹⁰⁶⁸⁷

5779. Mr Donaldson testified that UNIIIC did not discover the Purple mobiles until it received this information from the ISF in November 2008, long after receiving the information on the network mobiles. From information obtained in June 2008 in relation to Mr Ayyash's personal mobiles, which had been in contact with Purple 231, the mobiles that were later called the Purple phones could have become possible numbers of interest to the investigation.¹⁰⁶⁸⁸ The Purple mobiles were not discovered until long after the other networks, when the UNIIIC received information from its unspecified 'partner agencies' involved in the telecommunications analysis.¹⁰⁶⁸⁹

¹⁰⁶⁸⁵ Exhibit 5D418 (Investigator notes – Finding the Communication Networks).

¹⁰⁶⁸⁶ Exhibit 5D418, para. 44 (a).

¹⁰⁶⁸⁷ Exhibit 5D418, para. 44 (b)-(c).

¹⁰⁶⁸⁸ Andrew Donaldson, T. 19 September 2017, pp 17-22; exhibit 5D418, paras 4, 44-45. Here Mr Donaldson referred to Mr Ayyash's personal mobile 170, however it was mobile 091 and mobile 935 which had contacts with Purple 231. Exhibit P1262 (Call sequence table of mobile 170); exhibit P1256 (Call sequence table of mobile 091); exhibit P1261 (Call sequence table of mobile 935).

¹⁰⁶⁸⁹ Andrew Donaldson, T. 19 September 2017, pp 17-22.

5780. Mr Donaldson was confident that the UNIIIC did not do any analysis on, for instance, Purple 095 or Purple 018, before November 2008. He did not rule out the possibility that, based on other information that the UNIIIC received in June 2008 in relation to specific private mobiles linked to Purple 231, mobiles that were later termed Purple mobiles could have become possible numbers of interest.¹⁰⁶⁹⁰

5781. The Prosecution's cell site expert, Mr Philips, argued that not all mobiles in a network are necessarily discarded upon a mission's completion. The closer a mobile is to the crime, the higher its 'forensic visibility', in other words, the risk that its call activity will be associated with the crime,¹⁰⁶⁹¹ and thus the greater the need to discard it.¹⁰⁶⁹² Conversely, in his view, a mobile with low forensic visibility might not be discarded,¹⁰⁶⁹³ for example, a mobile with a high volume of calls that was active near the crime scene would be highly visible.¹⁰⁶⁹⁴

5782. Mr Platt also provided some expert opinion evidence on this. The Trial Chamber declared him qualified to provide expert opinion on matters connected with the surveillance of criminal networks, and the identification and organisation of covert communication networks.¹⁰⁶⁹⁵ This included evidence on the group of Purple mobiles.¹⁰⁶⁹⁶

5783. In Mr Platt's opinion, at the time of their activity around the mosque—in searching for a candidate to make the false claim—no consideration was given to covertness or to the possibility of being detected by merely going there. At that time, they may have thought they could not find a suitable subject and needed to go elsewhere. Further, they did not think that the investigation would have found 'all these phone calls and put this together'.¹⁰⁶⁹⁷ It was 'a mistake by them'. 'Criminals ... don't always think of everything'.¹⁰⁶⁹⁸

5784. However, according to Mr Platt, after Monday 14 February 2005—when the mobiles attributed to Mr Sabra and Mr Oneissi were in close proximity of the tree and of payphones used

¹⁰⁶⁹⁵ Decision on expertise (Mr Platt).

¹⁰⁶⁹⁶ Decision clarifying Mr Platt's area of expertise.

¹⁰⁶⁹⁷ Gary Platt, T. 7 February 2017, pp 61-62.

¹⁰⁶⁹⁸ Gary Platt, T. 14 February 2017, p. 90.

to make the calls for the claim of responsibility—there must have been a decision-making process to get rid of those mobiles that had been used for years.¹⁰⁶⁹⁹ That could not be coincidence.¹⁰⁷⁰⁰

5785. Mr Platt stated that it is common for criminals to debrief with a risk assessment after the commission of a crime.¹⁰⁷⁰¹ It is called ‘clearing your tracks ... seeing what tracks you left and eradicating them as best as possible’.¹⁰⁷⁰² The cessation of use of the Purple mobiles on the two days immediately following the crime, and after years of use, was consistent with the users’ involvement in the crime.¹⁰⁷⁰³

5786. As to the Purple mobiles’ inactivity on Sunday 16 January 2005—the day of Mr Abu Adass’s disappearance—as noted above Mr Platt believed that it was consistent with an operational need for the mobiles not to be used that day.¹⁰⁷⁰⁴ As part of the discipline, the Purple mobiles could have been stored or located at a particular location until their users were ready to continue using them following the inactivity. Mr Platt considered that this resulted from ‘operational security’ considerations.¹⁰⁷⁰⁵

5787. In cross-examination, he accepted that the claim of responsibility for the assassination of a politician was a ‘risky phase where people taking part in it could be arrested’, that ‘the organization’ knew at the time that it was possible to retrace calls and mobiles, and that it apparently neglected to make people work with covert mobiles for that phase.¹⁰⁷⁰⁶ In his view, even considering that Mr Oneissi was originally ‘part of the conspiracy’, it was either an oversight or Mr Oneissi thought there was no risk given the level of activity to be undertaken—as compared to the network mobiles engaged in the direct surveillance of Mr Hariri—or he was not aware of the risk.¹⁰⁷⁰⁷

¹⁰⁶⁹⁹ Gary Platt, T. 7 February 2017, pp 61-62.

¹⁰⁷⁰⁰ Gary Platt, T. 9 February 2017, p. 66.

¹⁰⁷⁰² Gary Platt, T. 7 February 2017, p. 62.

¹⁰⁷⁰³ Gary Platt, T. 15 March 2017, pp 80-81. *See also* above, at paras 5610-5116.

¹⁰⁷⁰⁴ Gary Platt, T. 14 February 2017, pp 65-66.

¹⁰⁷⁰⁵ Gary Platt, T. 14 February 2017, p. 71.

¹⁰⁷⁰⁶ Gary Platt, T. 24 March 2017, pp 73-75.

¹⁰⁷⁰⁷ Gary Platt, T. 24 March 2017, pp 76-77.

5788. That Mr Oneissi did not have a covert mobile did not necessarily show that he was not part of ‘the organization’ although Mr Platt accepted that this was ‘also a possible explanation’.¹⁰⁷⁰⁸

5789. In response to a judicial question,¹⁰⁷⁰⁹ Mr Platt explained that the Purple mobiles were largely used for personal purposes and were not mission mobiles nor were they used in a covert fashion.¹⁰⁷¹⁰ They were not ‘really used for any covert work like surveillance’.¹⁰⁷¹¹ His assessment was that their activity around the Arab University Mosque was quite limited and static, coinciding with the ‘cultivation of the Subjects at the mosque’.¹⁰⁷¹² They were used there on an ‘irregular basis’.¹⁰⁷¹³ Therefore, it differed from the surveillance of Mr Hariri, which occurred in ‘unique locations, operating in close proximity ... of him and following him’.¹⁰⁷¹⁴

2. Submissions

5790. According to the Prosecution, it was not necessary nor surprising that a mobile network was not established for this part of the plot. The most complex aspect, namely, Mr Abu Adass’s abduction, revealed awareness of covertness and forensic visibility by the Purple mobiles being switched off at the time.¹⁰⁷¹⁵ This and the discarding of the Purple mobiles after the attack demonstrated an advanced level of awareness of covert practices.¹⁰⁷¹⁶ The Prosecution submitted that:

This insight was evident from the outset when, in light of the particular demands of preparing the false claim and the associated low forensic profile of the remote communication required, it was deemed unnecessary to adopt a covert mobile phone network.¹⁰⁷¹⁷

¹⁰⁷⁰⁸ Gary Platt, T. 24 March 2017, p. 77.

¹⁰⁷⁰⁹ Gary Platt, T. 7 February 2017, pp 59-60. Judge Braidy asked the witness whether he could explain why the Purple mobiles lacked the strict discipline and covertness of the network mobiles.

¹⁰⁷¹⁴ Gary Platt, T. 7 February 2017, p. 60.

¹⁰⁷¹⁵ Prosecution final trial brief, para. 593.

¹⁰⁷¹⁶ Prosecution final trial brief, para. 584.

¹⁰⁷¹⁷ Prosecution final trial brief, para. 584.

5791. According to the Prosecution, none of the steps in the false claim plot ‘inherently required the use of a mobile’.¹⁰⁷¹⁸ Were it not for ‘the frenzied nature of the Purple calls’ at the moment the tape was collected, the disposal of the Purple mobiles would have been unnecessary.¹⁰⁷¹⁹

5792. The Prosecution also relies on Mr Philips’s evidence that covertness in the use of a mobile will be proportionate to the seriousness and complexity of the crime and to the anticipated degree of risk that the mobile will be discovered, dictated by the mobile’s proximity to the crime scene.¹⁰⁷²⁰

5793. The Purple mobiles, however, were neither intended for use, nor used, in the vicinity of the crime scene.¹⁰⁷²¹ While the preparation of the false claim involved ‘no little risk’, it did not require a high degree of remote coordination or mobile activity bearing a forensic association with the criminal activity itself.¹⁰⁷²² On the day of Mr Abu Adass’s disappearance, the Purple mobiles were inactive.¹⁰⁷²³ Their use around the payphones and the tree on Monday 14 February 2005 ‘was not an inherently necessary part of the plan, and therefore, this task could not sensibly have been pre-assessed as necessitating a covert network’.¹⁰⁷²⁴

5794. Additionally, according to the Prosecution, referring to Mr Donaldson’s evidence, that the Purple mobiles were discovered only in 2008, long after the other networks, shows ‘the extremely low forensic visibility’ of their use.¹⁰⁷²⁵

5795. The Merhi Defence asks the Trial Chamber to ‘reverse’ its decision clarifying that Mr Platt’s area of expertise extends to providing expert opinion evidence on the Purple mobiles’ activities.¹⁰⁷²⁶ The Defence had lacked notice as to the Prosecution’s case regarding the Purple mobiles and the Purple associates; nevertheless, the Trial Chamber permitted Mr Platt to present ‘numerous theories, inferences and opinions’ about these mobiles.¹⁰⁷²⁷ To reinstate the fairness of

¹⁰⁷²⁷ Merhi Defence final trial brief, paras 29-34.

the proceedings, the Trial Chamber should disregard the Prosecution's allegations on the Purple and Associate Purple mobiles whenever those were based on Mr Platt's evidence.¹⁰⁷²⁸

5796. The Oneissi Defence argues that given that the Purple mobiles were not part of a covert network, Mr Oneissi's Purple 095 could not have been used for criminal activity. It is a contradiction to allege that Mr Oneissi had an advanced level of awareness of covert practices, yet chose to use his personal mobile.¹⁰⁷²⁹ The Prosecution's suggestion that the false claim did not require the use of a covert network is 'unreferenced'; as not even Mr Platt provided evidence to this effect.¹⁰⁷³⁰ Further, the Prosecution improperly attempts to link Purple 095 with the covert networks, despite the lack of any coordination or cooperation.¹⁰⁷³¹ The intensity of the alleged activations made by Purple 095 also undermines the Prosecution's assertion that the mobile had 'low forensic visibility'.¹⁰⁷³²

5797. Further, the Prosecution's suggestion that the Purple mobiles were discovered a long time after the network mobiles is misleading, as the Prosecution led no evidence on this. In 2008, the UNIIC received evidence on the Purple mobiles' attribution and, therefore, their discovery must have occurred earlier. The Trial Chamber should reject 'the Prosecution's attempt to spin the tardiness of the UNIIC investigation to its own advantage'.¹⁰⁷³³

5798. The Sabra Defence argues that given the complexity of the false claim operation, a covert network should have been required. The Prosecution has ignored certain factors in its assessment of complexity. These include: the surveillance of the Arab University Mosque area before Mr Abu Adass's selection; the intelligence-gathering in the team; visits to Tripoli to lead another false trail, or to select a different individual; the calls from the mosque area to Mr Abu Adass's landline; the scoping mission to identify appropriate payphones and hiding place for the tape; and the strict control over the operation by a supervisor in a certain location.¹⁰⁷³⁴

¹⁰⁷²⁸ Merhi Defence final trial brief, para. 35.

¹⁰⁷²⁹ Oneissi Defence final trial brief, paras 171-172.

¹⁰⁷³⁰ Oneissi Defence final trial brief, para. 177.

¹⁰⁷³³ Oneissi Defence final trial brief, para. 178.

¹⁰⁷³⁴ Sabra Defence final trial brief, paras 479, 483-493.

5799. The Prosecution also erroneously claims that the false claim plot had low forensic visibility. The area from which Mr Abu Adass disappeared, and the area in which the false claim was delivered, are also crime scenes. Mr Abu Adass himself, and the circumstances around the false claim, would have been a primary focus for investigators, especially as Mr Ben-Jeddo immediately told Al-Jazeera viewers that the false claim was unlikely to have been genuine.¹⁰⁷³⁵

5800. The Prosecution also submits, contradictorily, that the users of the Purple mobiles made a miscalculated decision not to use covert mobiles, but also displayed advanced awareness of covert practices, relying on the inactivity on the day of Mr Abu Adass's disappearance, and the discarding of the Purple mobiles between 15 and 16 February 2005.¹⁰⁷³⁶ The Sabra Defence argues that the Prosecution failed to adequately investigate the discovery of the Purple mobiles.¹⁰⁷³⁷

5801. The Sabra Defence also points to the differences in the cessation of activity of the Red and Green networks, namely immediately before the attack and an hour after the attack, respectively, and that of the Purple mobiles. The shutdown of the Green network was 'synchronised' while the Purple mobiles featured a 'gradual discontinuing', thus drawing a parallel between the two is 'wholly illusory and lacks any credibility'.¹⁰⁷³⁸

3. Findings

5802. Why alleged conspirators would chose to use their personal mobiles to communicate with each other on a necessary part of a plan to assassinate a well-guarded former prime minister, while exercising strict discipline in all other aspects of the plot, is largely unexplained. As accepted by Mr Platt, the claim of responsibility for the assassination of a politician was a risky phase where the people involved could be arrested.

5803. Mr Merhi is alleged not to be someone who is being manipulated or used by those higher up in the conspiracy, but rather as a core conspirator who was exercising strict network discipline by contacting Mr Badreddine only on their Green network mobiles. But, on the other hand, he is

¹⁰⁷³⁵ Sabra Defence final trial brief, paras 495-513.

¹⁰⁷³⁶ Sabra Defence final trial brief, para. 514.

¹⁰⁷³⁷ Sabra Defence closing submissions, T. 21 September 2018, pp 11-12.

¹⁰⁷³⁸ Sabra Defence final trial brief, para. 530.

also alleged to have been using his own personal mobile to communicate with two co-conspirators to coordinate all aspects of the false claim of responsibility.

5804. The folly of this would be illustrated by the need to discard the mobiles within two days of the attack on 14 February 2005. But why, given that Mr Abu Adass identified himself in the video, and a normal criminal investigation would therefore have led straight back to the mosque, his home, his family, friends, associates and contacts, they would have chosen to use their personal mobiles is inexplicable. In the same way that a ‘cell-dump’ would have identified the Red network as a closed user group, operating near Mr Hariri, that ceased all activity just before the attack, it could have found those who were using the Purple mobiles near the mosque and thus linked their users to Mr Abu Adass.

5805. The Prosecution explained that the Purple mobiles were discovered only in 2008 because of ‘the extremely low forensic visibility’ of their use. Mr Donaldson clarified that the UNIIC did not discover the Purple mobiles until it obtained new relevant information in November 2008, long after the networks. He added that, based on information that the UNIIC obtained in June 2008 in relation to specific private mobiles linked to Purple 231, the mobiles that later became the Purple mobiles could have become possible numbers of interest.

5806. The Trial Chamber has accepted that a mobile ‘network’ is a group of mobiles that form a communication network.¹⁰⁷³⁹ And, that a ‘mission phone’ is a special type of mobile network, that Mr Philips defined as a mobile obtained and dedicated to a specific objective or mission, which is covert and almost always ‘nefarious’. Those involved in the mission do not want to be associated with it, so anonymity in all areas is key and an essential characteristic.

5807. These mobiles differ from personal mobiles, which are non-covert mobiles used to call family and friends and are for everyday usage. The Purple mobiles were used for personal purposes such as to call family and friends and for ‘normal’ non-covert communications. They did not present the characteristics described as pertaining to mission mobiles and were not used in a covert fashion.

¹⁰⁷³⁹ See chapter VIII ‘Nature and purpose of colour-coded mobile networks and Purple group of mobiles’, (B) ‘Mobile networks in general’.

5808. However, one or two days after Mr Hariri's assassination they were all discarded. The last activity for Mr Merhi's Purple 231 occurred at 11:12 on Tuesday 15 February 2005. Mr Oneissi last used his personal mobile Purple 095 on Wednesday 16 February 2005, after having used it since January 2003. Mr Sabra gave up his shared personal mobile Purple 018 on 16 February 2005 as well, after using it since November 2001.

5809. One of the features of network mobiles is that they may cease operation at the same time after the commission of the crimes, as this lowers the likelihood that an investigation team can identify the mobile users. The simultaneous discarding of the Purple mobiles over two days after the attack presents some similarity with how expert evidence described 'the closure of a network', as connected to reasons of covertness.

5810. However, while a simultaneous cessation of activity is an organisational factor of a covert network, these personal mobiles were not otherwise used in a covert fashion. Normally, covert users do this to distance themselves from their mobiles and to prevent their identification. Mr Platt explained the discarding of the three mobiles as the result of a risk assessment after the commission of a crime.

5811. The Trial Chamber accepts that the coincidental cessation in the use of the Purple mobiles over two days, after several years of active use, may indeed suggest that a decision to this effect intervened after a certain event, due to some fear. However, such a decision, when occurring in the context of an alleged conspiracy whose participants otherwise used a covert network for its other operations, seems to be contradictory and difficult to explain.

5812. The Prosecution argues that while it was reasonable for the Accused not to use network mobiles in the false claim preparation, the traces left around the payphones and, in particular the tree, were 'unanticipated and unintended'. It argues that the 'ultimate intensity of use' in those areas 'was not an inherently necessary part of the plan'.¹⁰⁷⁴⁰ However, why this was the case is unexplained. Mr Platt provided no opinion on this.

5813. The Prosecution's argument that the 'frenzied nature' of the Purple calls at that time betrayed their 'over-anxiety' to ensure that responsibility for the attack 'was publically assigned

¹⁰⁷⁴⁰ Prosecution final trial brief, para. 597.

away from their sponsors’¹⁰⁷⁴¹ is not entirely convincing. Does this mean that more coordination was needed than expected? Or, alternatively, that of all the steps in the false claim plot, the last one was not given sufficient consideration? This is difficult to believe when the Prosecution, at the same time, describes the false claim of responsibility as ‘a sophisticated and essential component to the assassination plot’,¹⁰⁷⁴² and its last phase as one of its key components.¹⁰⁷⁴³ The use of personal mobiles to execute it is far from ‘sophisticated’.

5814. According to Mr Platt, the choice not to use network mobiles for the false claim aspect of the plot—as opposed to the others—was based on the difference between the static and irregular nature of the activity around the Arab University Mosque and the mobile nature of the surveillance of Mr Hariri. These were in unique locations and in close proximity of him, and therefore there was a difference in the related risk of detection. However, Mr Platt also acknowledged that this was an oversight, or a mistake, or that those involved were not aware of the risks. Mr Platt accepted that their non-involvement was also a possible explanation.

5815. The Trial Chamber accepts that Mr Platt’s opinion explaining why the conspirators may have used network mobiles for tracking Mr Hariri and carrying out the assassination but not for identifying and abducting Mr Abu Adass may be correct. It is, however, harder to accept his explanation for the use of non-network mobiles with regard to the activities on the afternoon of 14 February 2005, although his reasoning could be seen as valid. Namely, that network mobiles were not necessary to make the calls from public payphones, especially if the two people involved in this were together. Against this, of course, the Trial Chamber accepts that criminals make mistakes, which may lead to their apprehension, and that this could have been a mistake that was only realised after the calls on Monday 14 February 2005.

5816. However, ultimately it is not the only reasonable inference available from the evidence. Another is that they were not involved in the alleged criminal activity or that they were not previously aware of the scope and significance of their call activity. Otherwise, they would not have used their personal mobiles to carry it out.

¹⁰⁷⁴¹ Prosecution final trial brief, para. 588.

¹⁰⁷⁴² Prosecution final trial brief, para. 1194, *see also* paras 1168, 1182, 1188.

¹⁰⁷⁴³ Prosecution final trial brief, paras 604-606.

5817. This strand of evidence is being used to buttress a circumstantial case regarding mobile usage. The discarding of the mobiles is being used to help prove that the three Accused were involved in making the false claim of responsibility. Conversely, the mobile activities on Monday 14 February are being used to prove that something occurred that required the three to discard their mobiles over the next few days, namely, that they had a criminal reason to do so. In other words, the two strands of evidence can only be considered together.

5818. Hence, even if the Trial Chamber is wrong in not finding that the only inference reasonably available from the evidence is that the discarding of the mobiles soon after the attack means involvement in the attack, such a finding only has context when considered with all the other cell site evidence. But if the Trial Chamber cannot be convinced beyond reasonable doubt that the mobiles' activities on the afternoon of 14 February can only equate to participation in the false claim of responsibility, the discarding of the mobiles cannot persuade the Trial Chamber that the opposite has been proved.

5819. Finally, regarding the Merhi Defence submission asking the Trial Chamber to 'reverse' its decision clarifying Mr Platt's area of expertise, the Trial Chamber—in three interlocutory decisions—dismissed similar Defence challenges with respect to Mr Platt's evidence.¹⁰⁷⁴⁴ The last application, placed in the middle of a final trial brief, falls short of advancing specific arguments to reconsider these decisions, and the Trial Chamber did not find any apparent reasons to do so. In any event, in light of the Trial Chamber's findings regarding the role and nature of the Purple mobiles and the Purple associates, reconsideration is also unnecessary.

I. Possible involvement of *al-Ahbash* in Mr Hariri's assassination

5820. In light of these conclusions, the Trial Chamber need not necessarily address the alternative theory advanced by the Sabra Defence that Mr Abu Adass was selected to carry out a false claim

¹⁰⁷⁴⁴ Decision denying certification to appeal decision on Powerpoints (the Trial Chamber—refusing a Merhi Defence certification application—held that Prosecution allegations regarding the Purple mobiles and Purple associates were not new to the Defence); Decision denying the exclusion of Mr Platt's evidence (the Trial Chamber found that the Prosecution had provided late but adequate notice to the Defence regarding the Associate Purple mobiles, and held that any prejudice to the Defence would be cured by sufficient time to prepare for Mr Platt's cross-examination); Decision denying reconsideration of decision on Mr Platt's area of expertise (the Trial Chamber held that the Merhi Defence had not demonstrated any actual injustice that involved prejudice, nor had it cited any legal authority for the exclusion of Mr Platt's opinion evidence on the Purple mobiles' role). *See also* Clarification decision on exclusion of Mr Platt's evidence.

of responsibility not by the three Accused, but rather by the *al-Ahbash* group. However, to deliver a fully reasoned judgment, this evidence and the submissions are briefly examined.

1. Evidence

5821. The evidence on *al-Ahbash* came from material obtained from the Lebanese investigating authorities, a statement of Witness 56 and the testimony of Mr Saadeddine El-Ajouz.

5822. According to reports by the Lebanese Army Directorate of Intelligence, *al-Ahbash* is an abbreviation for the Association of Islamic Philanthropic Projects. It was an Ashari, Shafii and Sufi Sunni Muslim group, whose members were students of Sheikh Abdullah Mohammed El-Harari. He was known as *El-Habshi* (the Abyssinian), and the group was known after him as *El-Habshi yah* or *al-Ahbash*.¹⁰⁷⁴⁵

5823. The group had been reported to have had relations with the Lebanese and Syrian security institutions.¹⁰⁷⁴⁶ Beginning in the 1990s, it ‘was able to penetrate all State agencies.’¹⁰⁷⁴⁷ In one report, Lebanese authorities described how it adopted ‘an extremist religious approach’ and that it was ‘in constant dispute with other religious parties, including Wahhabis and Salafis, over doctrinal orientation and interpretation.’¹⁰⁷⁴⁸

5824. Another report described how it ‘acted as informants for the Syrian security apparatus openly, which helped them to marginalise and fight anyone who differed with them in creed or opinion by fabricating accusations against them and having them arrested.’¹⁰⁷⁴⁹ Mr Ahmed Abdel Aal was a ‘top security official’ in *al-Ahbash*.¹⁰⁷⁵⁰ The report, however, was anonymously sourced and therefore can be given very limited weight.¹⁰⁷⁵¹

¹⁰⁷⁴⁵ Exhibit 5D505 (Lebanese Army Directorate of Intelligence reports on the *al-Ahbash* group). The Sabra Defence sought admission of some documents on *al-Ahbash*. The Trial Chamber admitted most of them. It admitted exhibits 5D505 and 5D506 only insofar as they provide contextual information regarding the UNIIIC investigation and to establish the Lebanese Government’s assessment of *al-Ahbash*, and not for the truth of their contents. Sabra Defence sixth bar table decision (Abu Adass fax), paras 29, 31.

¹⁰⁷⁴⁹ Exhibit 5D506, p. 13.

¹⁰⁷⁵⁰ Exhibit 5D506, p. 17.

¹⁰⁷⁵¹ Sabra Defence sixth bar table decision (Abu Adass fax), para. 31.

5825. Witness 56 stated that *al-Ahbash* called Mr Abu Adass's family 'Al Wahhabi' because they came from Saudi Arabia.¹⁰⁷⁵² The witness explained that *al-Ahbash* members 'tried to antagonise Ahmad whenever he walked past them by calling him an infidel and a Wahhabi.' On one occasion, Mr Abu Adass resisted going to a shop to collect some textiles because its members worked next door.¹⁰⁷⁵³ According to Mr Samer Al-Ajouz, Mr Abu Adass and the group 'had completely opposite views', and 'people from Abu Adass' circle often spoke against *al-Ahbash* and vice-versa.'¹⁰⁷⁵⁴ He was unable to recall any specific incidents between *al-Ahbash* and Mr Abu Adass.¹⁰⁷⁵⁵

5826. About four to five months before he disappeared, Mr Abu Adass told Witness 56 that he believed he was under surveillance.¹⁰⁷⁵⁶ Witness 56 had heard from a relative that Mr Abu Adass had been 'watched by the police for several months'.¹⁰⁷⁵⁷

5827. Mr Saadeddine El-Ajouz, the owner and manager of the Power Group, testified that, in 2004 and 2005, he was a member of *al-Ahbash*.¹⁰⁷⁵⁸ The Power Group sold twenty SIM cards to Witness 553, the owner of a mobile shop in Tripoli, on 24 December 2004, including the SIM cards used in the eight Red mobiles.¹⁰⁷⁵⁹ Mr El-Ajouz gave evidence regarding a number of individuals allegedly implicated in Mr Hariri's assassination according to the UNIIIC investigation, such as Mr Abdel Aal¹⁰⁷⁶⁰ and Mr Fouad El-Masri, who was part of an alleged al-Qaeda cell and bought hundreds of mobile devices from Power Group.¹⁰⁷⁶¹ Mr El-Ajouz testified that he and others—including Mr Abdel Aal—did not orchestrate the delivery and the sale of the

¹⁰⁷⁵⁸ Saadeddine El-Ajouz, T. 31 August 2015, pp 78-79.

¹⁰⁷⁵⁹ See chapter VIII 'Nature and purpose of colour-coded mobile networks and Purple group of mobiles', (D) (1) 'Setting up the network'.

¹⁰⁷⁶⁰ Saadeddine El-Ajouz, T. 1 September 2015, pp 19-25, 27-28, 74-75. See also exhibit 5D507 (ISF report regarding Ahmad Abu Adass), pp 1-2. The Trial Chamber admitted the report into evidence for the limited purpose of providing contextual information of the ISF's investigation concerning Mr Abu Adass. Sabra Defence sixth bar table decision (Abu Adass fax), paras 32-35.

¹⁰⁷⁶¹ Saadeddine El-Ajouz, T. 1 September 2015, pp 76-87; exhibit 5D502 (Lebanese Military Court indictment), p. 7.

Red mobiles.¹⁰⁷⁶² His manager and other employees were subject to investigations and the Power Group was shut down for four months as a result of this.¹⁰⁷⁶³

5828. After the trial, *al-Ahbash*'s leader, Mr Abdel Aal, sent a fax sent to Lebanese officials providing information on Mr Abu Adass and his alleged associates. The Trial Chamber admitted the fax into evidence not for the truth of its contents, but to demonstrate that it had been sent.¹⁰⁷⁶⁴ It contained information about Mr Abu Adass's background, including asserting that he was 'a Devil worshiper', and about his associates, including Mr Abu Adass's cousin, Mr Bassam Ismail, who had been imprisoned for assassinating a previous *al-Ahbash* leader.¹⁰⁷⁶⁵

2. Submissions

5829. The Sabra Defence argues that *al-Ahbash* deliberately selected Mr Abu Adass for the false claim because of a history of antagonism between the group and Mr Abu Adass. *Al-Ahbash* had clashed with Mr Abu Adass due to their vehement opposition to Wahabi and Salafi ideologies.¹⁰⁷⁶⁶

5830. It points to UNHCR internal memoranda, arguing that Mr Abu Adass and *al-Ahbash* had a history of antagonism,¹⁰⁷⁶⁷ and submits that *al-Ahbash* could keep Mr Abu Adass under close surveillance, having had a 'clear and influential' presence in his neighbourhood.¹⁰⁷⁶⁸ It submits that Mr El-Ajouz, who was linked to the sale of the Red mobile SIM cards and was a member of *al-Ahbash*, was associated with another member of it, Mr El-Masri, who may have been involved in creating the video of the false claim of responsibility.¹⁰⁷⁶⁹

5831. The Sabra Defence argues that the Prosecution failed to investigate the inference that *al-Ahbash* was responsible for the production of the false claim of responsibility; previous attacks of

¹⁰⁷⁶² Saadeddine El-Ajouz, T. 3 September 2015, pp 7, 19-20, 41, 55-57, 71, 73, 77-78. See exhibit 5D203 ('Alfa Active' identification statement). The same document—without the highlights—was admitted under exhibit P484 (ERNs 60138425-60138426).

¹⁰⁷⁶⁴ T. 19 July 2016, pp 68-70. See also Sabra Defence sixth bar table decision (Abu Adass fax), paras 32-35, admitting the Arabic version of this exhibit into evidence.

¹⁰⁷⁶⁵ Exhibit 5D259 (Fax sent by Mr Abdel Aal to the Lebanese authorities on 14 February 2005), p. 1.

¹⁰⁷⁶⁶ Sabra Defence final trial brief, para. 574.

¹⁰⁷⁶⁷ Sabra Defence final trial brief, para. 576, referring to exhibit 5D254 (UNHCR internal memorandum on *al-Ahbash*). The Sabra Defence points specifically to evidence that two of Mr Abu Adass's cousins, Mr Bassam Ismail and Mr Tarek Ismail, were involved in the assassination of a previous president of *al-Ahbash*, Sheikh Nizar al-Halabi, on 31 August 1995.

¹⁰⁷⁶⁸ Sabra Defence final trial brief, para. 579.

¹⁰⁷⁶⁹ Sabra Defence final trial brief, paras 555-556.

a similar nature to the attack on Mr Hariri; Mr Abu Adass's close associates who had been omitted from the fax sent to the Lebanese authorities after the assassination; its targeting of the Abu Adass family; and the links to Syrian Military Intelligence within Tariq-El-Jdideh.¹⁰⁷⁷⁰

5832. The fax—which was sent by Mr Ahmed Abdel Aal, *al-Ahbash*'s head of security—showed that *al-Ahbash* sought to steer investigations after the claim of responsibility.¹⁰⁷⁷¹ The speed with which the information in the fax was disseminated after the video shows prior preparation, and was designed to point responsibility away from *al-Ahbash* toward their enemies.¹⁰⁷⁷² It asserted that Mr Abu Adass had been seen with the deputy leader of *Asbat al Ansar*, a group with an extremist ideology and a history of antagonism with *al-Ahbash*.¹⁰⁷⁷³ The fax 'tellingly' does not point to actual associates who might have been involved in his disappearance, like Mr Khaled Taha, Mr Ramadan, Mr Mohsen and Mr Zaaroura.¹⁰⁷⁷⁴

5833. The Prosecution failed to adequately investigate the link between *al-Ahbash* and the targeting of the Abu Adass family.¹⁰⁷⁷⁵ It failed to explain the purpose of the fax.¹⁰⁷⁷⁶ Additionally, UNIIIC identified Mr Abdel Aal as a 'significant' figure by virtue of his involvement in the Hariri investigation, and suggested that Mr Abdel Aal might attempt to hide information from the investigation.¹⁰⁷⁷⁷

5834. The Sabra Defence also argues that Mr Abu Adass's appearance in the false claim video shows that he was tricked into claiming responsibility by *al-Ahbash*.¹⁰⁷⁷⁸ The turban Mr Abu Adass was wearing in the video was associated with attendees of the Imam Ali Mosque, which was also mentioned in the fax.¹⁰⁷⁷⁹

5835. The Sabra Defence argues too that while the Prosecution did not offer evidence linking the Accused to the production of the video, the Lebanese and UNIIIC investigations linked the *al-*

¹⁰⁷⁷⁹ Sabra Defence final trial brief, para. 553.

Ahbash member Mr El-Masri—who was connected with the sale of the Red SIM cards—to the video’s creation.¹⁰⁷⁸⁰

5836. Further, the Prosecution failed to consider the ‘stark similarities’ between this case, and the Future TV attack in 2003 and a foiled attack on the Italian Embassy in 2004.¹⁰⁷⁸¹ Both involved consideration of Mr Hariri’s convoy, a large explosive device and a vehicle as a means for delivery—both also were linked to Mr Abu Adass.¹⁰⁷⁸²

3. Findings

5837. The Prosecution made no submissions in its final trial brief on this aspect of the Sabra Defence case.

5838. The Sabra Defence has no burden of proof and need not prove anything. The evidence it points to, however, does not raise an alternative reasonable inference from the admitted evidence that *al-Ahbash* targeted Mr Abu Adass. Many of the Sabra Defence’s arguments rest on evidence that was not admitted for the truth of its contents, as opposed to the fact that someone said something to an investigator.

5839. This includes the following. First, that *al-Ahbash* clashed with Mr Abu Adass because of his ideology. Second, that two of Mr Abu Adass’s cousins were involved in the assassination of a previous president of *al-Ahbash*. Third, that Mr Abdel Aal, *al-Ahbash*’s head of security, sent a fax to Lebanese officials and made assertions about Mr Abu Adass after the attack to steer the investigations. And, fourth, that UNIIIC officials suggested that Mr Abdel Aal might attempt to hide information from the investigation.¹⁰⁷⁸³ The Trial Chamber therefore disregards these arguments.

5840. The Trial Chamber received some evidence deriving from the Lebanese investigating authorities regarding the *al-Ahbash* group generally. This includes that it engaged in religious disputes with other groups and may have acted as informants for the Syrian state security. The

¹⁰⁷⁸⁰ Sabra Defence final trial brief, paras 554-556.

¹⁰⁷⁸¹ Sabra Defence final trial brief, paras 564-572.

¹⁰⁷⁸² Sabra Defence final trial brief, paras 571-572.

¹⁰⁷⁸³ Sabra Defence final trial brief, paras 557-563, 574, 576-577 (citing exhibits 5D254, 5D504, 5D259, 5D490 and 5D507). *See also* Sabra Defence second bar table decision (Abu Adass selection), paras 16, 40, 43; T. 19 July 2016, p. 69; T. 14 December 2017, pp 35-38, 62-63.

Trial Chamber, however, admitted the investigative reports of the Lebanese Army Directorate of Intelligence and the ISF General Directorate concerning *al-Ahbash*¹⁰⁷⁸⁴ into evidence for the limited purpose of providing contextual information regarding the UNIIIC investigation and the Lebanese Government's assessment of *al-Ahbash*, and not for the truth of their content. Additionally, these reports have very limited weight due to their anonymous sources.¹⁰⁷⁸⁵

5841. The evidence from Mr Abu Adass's family and friends was of some antagonism between Mr Abu Adass and the group, including name-calling and avoiding each other. This is consistent with the willingness of *al-Ahbash*'s leader to attempt to direct the investigation towards Mr Abu Adass, as is shown by the fax sent shortly after the assassination.

5842. At its highest, however, this demonstrates only some low-level hostility between Mr Abu Adass and the group. It would be a leap of faith to find, based on this, that *al-Ahbash* targeted Mr Abu Adass and used him to make a video-recorded false claim of responsibility for the attack on Mr Hariri. These arguments are therefore dismissed.

J. Conclusion

5843. The Prosecution, in its final trial brief, when summarising all the factors leading to the conclusion that the three Accused participated in making a false claim of responsibility, submitted that:

Each one of these features, exceptional in themselves, might be argued to be coincidental. However, when assessed holistically, the relationship of these patterns to each and every component of the false claim plot are so exceptional as to be inexplicable on the basis of chance.¹⁰⁷⁸⁶

5844. The Trial Chamber agrees, and most certainly in a circumstantial case such as this, that the patterns have to be 'assessed holistically', meaning in their totality. And, further, that they would have to be 'so exceptional as to be inexplicable on the basis of chance' for it to be satisfied beyond reasonable doubt of the guilt of any of the three Accused. Consistent with assessing the totality of the evidence, the Trial Chamber has carefully reviewed the Purple and Green mobiles' activities,

¹⁰⁷⁸⁴ Exhibits 5D505 and 5D506.

¹⁰⁷⁸⁵ Sabra Defence sixth bar table decision (Abu Adass fax), paras 29, 31.

¹⁰⁷⁸⁶ Prosecution final trial brief, para. 506.

notwithstanding that it could not conclude that Mr Merhi was using Green 071, and Mr Sabra was the principal user of Purple 018.

5845. Had the Prosecution proved its pleaded allegation that Mr Oneissi was ‘Mohammed’, and had Witness 56 testified and provided reliable evidence of ‘Mohammed’ calling the Abu Adass home before and after Mr Abu Adass disappeared, the Prosecution case against the three Accused would have been much stronger. It would have remained circumstantial but there would have been at least a strong piece of direct evidence against one of the Accused that could have been used to strengthen the cell site evidence. The Prosecution, however, did not come up to proof on either point. That has been fatal to its case against the three.

5846. Without evidence that Mr Oneissi was ‘Mohammed’ the only evidence against the three Accused is the cell site evidence of Mr Merhi’s Purple 231, Mr Oneissi’s Purple 095 and Mr Sabra’s shared personal mobile, Purple 018. To this is added calls between Mr Merhi’s attributed Green network mobile, 071, and Mr Badreddine’s Green mobile, 023.

5847. The patterns that the Prosecution reasons must lead to the conclusion of guilt beyond reasonable doubt are as follows. They are Mr Oneissi’s and Mr Sabra’s ‘unusual’ mobile usage around the Arab University Mosque in late December 2004 and early January 2005, coinciding with Mr Abu Adass’s recruitment and disappearance (or ‘abduction’). Their mobile usage on the afternoon of Monday 14 February 2005 at locations ‘near’ payphones used to call Reuters and Al-Jazeera, and the tree. Their mobile contact with Mr Merhi during these two periods, including Mr Sabra’s on the afternoon of 14 February. Their discarding of their mobiles in the two days after the attack is added to this. And there is Mr Merhi’s mobile contact with Mr Badreddine, who was separately in contact with Mr Ayyash, on the three-mobile closed Green network.

5848. Without the direct evidence of Mr Oneissi’s pleaded identification as ‘Mohammed’, however, insufficient evidence exists to find that these patterns are ‘so exceptional as to be inexplicable on the basis of chance’.

5849. The absence of this evidence is further compounded by the loss of the following two pleaded facts. The first is that Mr Oneissi, calling himself ‘Mohammed’, called Mr Abu Adass’s home at 21:00 on Saturday 15 January 2005 and the two agreed to meet early the next morning. The second is that Mr Abu Adass left his home on Sunday 16 January 2005 to meet Mr Oneissi

who was calling himself ‘Mohammed’.¹⁰⁷⁸⁷ There is simply no reliable evidence from which the Trial Chamber could conclude that Mr Oneissi was ‘Mohammed’; that he called Mr Abu Adass on Saturday 15 January; nor that Mr Abu Adass left his home the next morning to meet Mr Oneissi.

5850. The Trial Chamber has carefully examined whether these two pleaded facts could be considered to be ‘material’, thus requiring proof beyond reasonable doubt. It is of the view that the facts are pleaded evidence of the material facts underlying the elements of the crimes charged, namely, making the false claim of responsibility. Meaning, the manner of proving how the claim was made, rather than the acts constituting the false claim, namely, the video and the calls to the media outlets. However, even if the Trial Chamber is legally incorrect on this, the ultimate result would remain unchanged. The lack of reliable evidence, rather than the legal classification of the pleading, is determinative here.

5851. There is no evidence connecting Mr Oneissi with Mr Abu Adass in the mosque, in his disappearance or in his subsequent appearance on the video. The only evidence is that Mr Oneissi’s mobile was connecting to cells near the mosque on eleven days in December 2004 and January 2005,¹⁰⁷⁸⁸ and that this coincided with the Rule 158 evidence that Mr Abu Adass had met someone called ‘Mohammed’ in the mosque at around that time. No reliable evidence connects Mr Oneissi with that ‘Mohammed’, and hence Mr Abu Adass’s recruitment, disappearance and appearance in the video. This link in the circumstantial chain of evidence is missing.

5852. Once the evidence supporting these pleaded material facts is taken from consideration, the only patterns remaining are of the mobile use in December 2004 and January 2005 near the mosque, and those on the afternoon of Monday 14 February. Without more, this cannot prove guilt beyond reasonable doubt; this is notwithstanding the Prosecution’s submissions to the contrary.

5853. The amended consolidated indictment pleads that Mr Oneissi *or* Mr Sabra ‘made a total of four calls to the offices of the Reuters and Al-Jazeera news networks in Beirut’.¹⁰⁷⁸⁹ This was broken down into either one or the other making the first call, to Reuters, and the first and third

¹⁰⁷⁸⁷ Amended consolidated indictment, para. 28.

¹⁰⁷⁸⁸ Namely, 4, 13, 14, 22, 29, 30 and 31 December 2004, and 3, 7, 12 and 17 January 2005. His mobile connected to COLA cells on 29, 30 and 31 December 2004, and 3 and 7 January 2005.

¹⁰⁷⁸⁹ Amended consolidated indictment, para. 44.

calls to Al-Jazeera, while Mr Sabra is pleaded to have made the second call to Al-Jazeera. The evidence from Al-Jazeera, however, is of three different callers.

5854. The Trial Chamber accepts that the combination of the calls between the three Purple mobiles on the afternoon of Monday 14 February 2005, in tandem with calls to Reuters and Al-Jazeera and the collection of the video from the tree, attracts heavy suspicion. And particularly when the evidence of the discarding of the three Purple mobiles within two days of this is factored in.

5855. Once the purported identification of Mr Oneissi as ‘Mohammed’ is discarded, however, the only evidence remaining against the three Accused is of the mobile telephone usage, including that on the Green network. Even when the Trial Chamber examines the broader pattern of mobile activity on 14 February 2005, it cannot be satisfied beyond a reasonable doubt that the Accused helped to disseminate the false claim of responsibility.

5856. The Trial Chamber has considered the role of the Green network mobiles too, even though the evidence was insufficient to establish that Mr Merhi was Green 071’s user. It consists of eighteen calls between Mr Badreddine’s Green 023 and Mr Merhi’s attributed Green 071 between 6 November 2004 and Monday 7 February 2005, and especially five calls on the morning of Sunday 16 January 2005. The two provable facts placed together are thus, first, Mr Merhi’s attributed Green 071 called Mr Badreddine five times on the morning of Sunday 16 January 2005 between 06:19 and 09:00, and second, that Mr Abu Adass most probably left his home between 07:00 and 07:30 that morning.

5857. However, when the link to Mr Oneissi through his alleged involvement in Mr Abu Adass’s disappearance on 16 January 2005 fails, those five calls lose their pleaded context through having a provable connection to Mr Oneissi. The alleged ‘hierarchical’ call flows also lack context because they do not connect to anything for which there is evidence relating to Mr Oneissi’s and Mr Sabra’s actions, if he was using Purple 018 for those calls. They thus cannot be used to prove that Mr Badreddine and Mr Merhi were coordinating and monitoring or supervising what the two were doing. The last call between Mr Merhi’s attributed Green 071 and Mr Badreddine’s Green 023 occurred on Monday 7 February 2005 and the Trial Chamber cannot link it to anything related to the false claim of responsibility or the pleaded conspiracy generally.

5858. The Trial Chamber is not satisfied beyond reasonable doubt that the combination of coincidences and patterns is so compelling that the participation of the three Accused in the false claim of responsibility is the only inference reasonably available on the evidence. The Trial Chamber does not consider that the cell site evidence is sufficiently reliable on its own to place the three Accused where they needed to be for it to find that their guilt is the only conclusion reasonably available from the evidence.

5859. This is especially so when factoring in network congestion on the afternoon of Monday 14 February 2005, after the explosion. Directed retries mean that a mobile could connect to any of six neighbouring cells—or possibly more—rather than that providing predicted best coverage. There was no evidence of network congestion before the explosion nor on any of the other days relevant to events pleaded in the amended consolidated indictment. The combination of the congestion and the uncertainty normally inherent in the sixty to seventy per cent accuracy of the network coverage maps, in determining where the two Accused actually were when making the calls has fatally undermined the reliability of the cell site evidence for the afternoon of 14 February.

5860. In summary, the Trial Chamber has found that:

- Mr Abu Adass was not the suicide bomber;
- The claim of responsibility for the attack was false;
- Contact occurred on Wednesday 22, Tuesday 28 and Friday 31 December 2004 and Friday 7 January 2005—the period in which Mr Abu Adass was allegedly being identified—between Mr Oneissi on Purple 095 and Mr Merhi on Purple 231. These were calls around the time when Mr Oneissi’s mobile was connecting to cells covering an area near the Arab University Mosque in Beirut, where Mr Abu Adass prayed;
- Similarly, on two out of eight days when Mr Sabra’s attributed mobile was also connecting to the cell covering the mosque, namely Saturday 1 and Tuesday 4 January 2005, Mr Sabra’s attributed Purple 018 was in contact with Mr Merhi on Purple 231;
- Mr Merhi’s attributed Green 071 contacted Mr Badreddine on Green 023, on Thursday 23 and Monday 27 December 2004, and Sunday 2 January 2005;

- There were also calls between Mr Badreddine's Green 023 and Mr Merhi's attributed Green 071 between Wednesday 12 and Sunday 16 January 2005, and most particularly five times on the morning of 16 January 2005—the day of Mr Abu Adass's disappearance;
- On Friday 14 and Saturday 15 January 2005, Mr Merhi on Purple 231 called Mr Sabra's attributed Purple 018 three times;
- Mr Abu Adass left his home on Sunday 16 January 2005 and never returned and is most likely deceased;
- On Monday 17 January 2005, Mr Oneissi on Purple 095 called Mr Merhi on Purple 231;
- At an unknown date between Monday 17 January 2005 and Monday 14 February 2005, a video tape was made in which Mr Abu Adass falsely claimed responsibility for the attack;
- Four telephone calls were made on Monday 14 February 2005, to Reuters and Al-Jazeera from those involved in making the false claim, ensuring that the false claim was received and then disseminated to the public;
- A video tape and accompanying letter had been placed in a tree near the Al-Jazeera office at some point before it was collected at 15:53 on Monday 14 February 2005; and
- There were a series of calls between Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 on the afternoon of 14 February 2005 from locations near the four payphones and the tree.

5861. The Trial Chamber has been unable, however, to find that:

- Mr Abu Adass met a person named 'Mohammed' in the Arab University Mosque in late December or early January 2005;
- Mr Oneissi posed as 'Mohammed';
- The activity of Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018 showed that they were involved in the 'Mohammed deceit' around the Arab University Mosque in late December 2004 or early January 2005;

- Mr Oneissi called the Abu Adass family home on Saturday 15 January 2005;
- Mr Abu Adass left with ‘Mohammed’ on Sunday 16 January 2005;
- Mr Oneissi called the Abu Adass family home on Monday 17 January 2005;
- The activity of Mr Merhi’s Purple 231, Mr Oneissi’s Purple 095 and Mr Sabra’s attributed Purple 018 showed their participation in the disappearance of Mr Abu Adass;
- The video tape claiming responsibility was placed in the tree *before* the assassination;
- Either Mr Oneissi or Mr Sabra made the telephone calls to Reuters or Al-Jazeera;
- The Purple mobiles’ activity otherwise connected Mr Oneissi, Mr Sabra or Mr Merhi to the attack on 14 February 2005; and
- The cell site evidence, especially given the state of network congestion after the attack on 14 February 2005, was sufficiently reliable to make findings as to precise locations of mobile users as pleaded.

5862. The Prosecution has therefore not proved its case beyond reasonable doubt of Mr Merhi’s, Mr Oneissi’s and Mr Sabra’s participation in the false claim of responsibility for the attack on Mr Hariri.

XIII. APPLICABLE LAW

A. General legal framework

1. Introduction

5863. As a hybrid international criminal tribunal with the presence of international and Lebanese judges, created pursuant to a resolution of the UN Security Council¹⁰⁷⁹⁰ following a request from the Lebanese Government,¹⁰⁷⁹¹ the Special Tribunal applies mixed sources of law.

5864. For what may be termed substantive crimes, namely those charged in an indictment against Accused persons—and except for offences of contempt and obstruction of justice created by the Rules and listed in Rule 60 *bis*—the Special Tribunal applies the Lebanese Criminal Code. Its Rules, on the other hand, derive from international criminal law procedural rules developed since the establishment of the ICTY in 1993 and indeed before that from the proceedings of the International Military Tribunals in the 1940s. In essence, they combine most of the ICTY’s Rules of Procedure and Evidence with some aspects of the ICC’s statutory framework.

5865. The Special Tribunal’s Statute to a large degree contains provisions identical or similar to those in the ICTY Statute—and the Statutes of the ICTR and SCSL, both of which have a statutory framework deriving from the ICTY’s—and the IRMCT and RSCSL as their successor mechanisms. But it blends other legal sources that include the London Charter of 1945 establishing the International Military Tribunal in Nuremberg, the Lebanese Criminal Code of 1943, as amended, the 1997 *International Convention for the Suppression of Terrorist Bombings*¹⁰⁷⁹² and the 1998 Rome Statute of the ICC.

5866. The Special Tribunal differs from the other international criminal courts and tribunals in several respects. Its jurisdiction is limited ‘solely over persons responsible for the attack of 14 February 2005 or connected attacks’, and it applies a national criminal code to substantive crimes tried before it, including the modes of liability.¹⁰⁷⁹³ Another unique feature is the pre-trial

¹⁰⁷⁹⁰ Security Council resolution 1757.

¹⁰⁷⁹¹ Letter from Lebanese Government dated 13 December 2005.

¹⁰⁷⁹² Adopted 15 December 1997.

¹⁰⁷⁹³ This is common to courts with hybrid characteristics like the presence of international personnel such as judges and prosecutors; for example, the ECCC has jurisdiction over homicide, torture and religious persecution contrary to the Cambodian Penal Code (in addition to jurisdiction over the international crimes of war crimes, crimes against

judge's function which combines aspects of that of the ICC's pre-trial division and the ICTY's confirming judge. An additional one is permitting trials in the absence of an Accused person. Like the ICC, but unlike most of the other courts and tribunals, it permits victims to participate in the proceedings.¹⁰⁷⁹⁴ Having a dedicated Defence Office as an independent organ of the court, which acts to 'protect the rights of the defence',¹⁰⁷⁹⁵ is another structural difference.¹⁰⁷⁹⁶

5867. As the Statute contains a blend of national and international legal sources, interpreting it presents a chamber with some unique challenges. While some notions are legally uncontroversial and appear to be settled law, others appear to be less certain. For example, some difficulties of interpretation arise in relation to the interplay between Articles 2 and 3 of the Statute and in the boundaries of the modes of liability specified in Article 3. Moreover, the Appeals Chamber, in February 2011—and before the confirmation of any indictments—delivered an interlocutory decision on the applicable law ostensibly intended to settle this broad issue *before* the Pre-Trial Judge confirmed any indictments.¹⁰⁷⁹⁷

5868. However, in respect of accessorial liability and the Lebanese law of conspiracy, the Appeals Chamber stopped short of an in-depth examination. The Trial Chamber must thus examine whether the Appeals Chamber's decision coincides with the Trial Chamber's own understanding of the state of the applicable law existing when the crime was committed, when the case was indicted and when the judgment is issued.

humanity and genocide). ECCC Law, Art. 3. The UN special panels in East Timor had jurisdiction over common murder and sexual offences contrary to the East Timor Penal Code. UNTAET Regulation 2000/15, sections 8 and 9. The SCSL, in addition to having jurisdiction to try crimes against humanity, violations of Common Article 3 of the Geneva Conventions and their Additional Protocol II, and other serious violations of international humanitarian law, had jurisdiction over crimes under Sierra Leonean law over sexual abuse of girls contrary to the Prevention of Cruelty to Children Act, 1926, and the wanton destruction of property contrary to the Malicious Damage Act, 1861. SCSL Statute, Art. 5.

¹⁰⁷⁹⁴ Art. 17 of the Statute 'Rights of Victims' is virtually identical to Art. 68 (3) of the Rome Statute 'Protection of the victims and witnesses and their participation in the proceedings'.

¹⁰⁷⁹⁵ Art. 13 (2) of the Statute.

¹⁰⁷⁹⁶ In practice, however, the Defence Office's functions do not differ greatly from those performed by the relevant Registry divisions of the other international courts and tribunals insofar as they concern matters typically performed by an international legal aid 'office', such as appointing and paying defence counsel, monitoring their performance and aiding international requests for assistance. The ICC, for example, has an independent Office of Public Counsel of Defence within the Registry. Art. 13 of the Statute is actually in similar terms to Regulation 77 'Office of Public Counsel for the Defence', ICC Regulations of the Court.

¹⁰⁷⁹⁷ First interlocutory decision on applicable law.

5869. Article 1 of the Statute of the Special Tribunal which gives the Special Tribunal jurisdiction over persons responsible for the attack of 14 February 2005 that resulted in Mr Hariri's death, and in the death and injury of others.¹⁰⁷⁹⁸

5870. Article 2 specifies that the applicable law for crimes falling within its jurisdiction is the Lebanese Criminal Code and the Lebanese law of 11 January 1958 on 'Increasing the penalties for sedition, civil war and interfaith struggle'. The relevant provisions of the Lebanese Criminal Code are those:

relating to the prosecution and punishment of acts of terrorism, crimes and offences against life and personal integrity, illicit associations and failure to report crimes and offences, including the rules regarding the material elements of a crime, criminal participation and conspiracy.

5871. Article 6 of the 1958 law provides the death penalty for some acts of terrorism while Article 7 specifies a maximum penalty of hard labour for life¹⁰⁷⁹⁹ for conspiracy to commit an act of terrorism. However, given that Article 24 of the Statute specifies a different maximum penalty, of life imprisonment, for any offence within the Special Tribunal's jurisdiction, the relevance of the 1958 law to crimes falling within the Special Tribunal's jurisdiction is unclear.

5872. This analysis of the applicable law is divided below into three sections. The first is of the general legal framework for interpreting the law applicable to the crimes charged in this case, including the modes of liability employed, that is, how the crimes were committed. This includes analysing various principles of international human rights law and, in relation to modes of liability, Article 3 (1) (a) of the Statute. The second examines and defines the two relevant modes of liability, namely committing a crime and participating as an accomplice in committing one. The third section examines and defines the relevant crimes.

¹⁰⁷⁹⁸ And additionally, in specified circumstances, other connected attacks, namely any occurring 'in Lebanon between 1 October 2004 and 12 December 2005, or any later date decided by the Parties and with the consent of the Security Council' that 'are connected in accordance with the principles of criminal justice and are of a nature and gravity similar to the attack of 14 February 2005'. (The 'Parties' are the Lebanese Republic and the UN.)

¹⁰⁷⁹⁹ In its First interlocutory decision on applicable law, the Appeals Chamber, at paragraphs 48 and 190, misquotes Article 7 as imposing the death penalty. This does not reflect the content of that Article either at the time of that decision, or subsequently.

5873. As a source of guidance in interpreting the relevant Lebanese law, the Trial Chamber has examined numerous Lebanese judicial decisions. The Appeals Chamber's first interlocutory decision on the applicable law, issued in February 2011, and its second such decision, of October 2017, are also closely examined.

2. The charges against the four Accused

5874. The Prosecutor, in the operative indictment, the amended consolidated indictment filed mid-trial, on 12 July 2016, charges the four Accused, in count 1, with conspiracy aimed at committing a terrorist act.¹⁰⁸⁰⁰ Mr Ayyash is also charged, in count 2, with committing a terrorist act by means of an explosive device, resulting in deaths and the partial destruction of buildings; in count 3 with the premeditated intentional homicide—by using explosive materials—of Mr Rafik Hariri and in count 4, of 21 other people; and with the attempted premeditated intentional homicide—by using explosive materials—of 226 people in count 5.¹⁰⁸⁰¹

5875. Mr Merhi, Mr Oneissi and Mr Sabra are charged as accomplices to: the commission of a terrorist act by means of an explosive device in count 6, the premeditated intentional homicide of Mr Hariri, in count 7 and in count 8 of 21 other persons and, in count 9, the premeditated attempted intentional homicide of 226 persons by using explosive materials.¹⁰⁸⁰²

5876. In the amended consolidated indictment, the Prosecutor has charged the four Accused with committing crimes pursuant to a range of provisions in the Statute and the Lebanese Criminal Code. These are in the list below; it is a blend of provisions relating to jurisdiction, substantive crimes, the modes of liability, and penalties:

- Articles 2 and 3 (1) (a) of the Statute—all counts;¹⁰⁸⁰³
- Article 188 of the Lebanese Criminal Code—all counts;¹⁰⁸⁰⁴
- Article 189 of the Lebanese Criminal Code—counts 4, 5, 8 and 9;¹⁰⁸⁰⁵
- Articles 200 and 201 of the Lebanese Criminal Code—counts 5 and 9;¹⁰⁸⁰⁶

¹⁰⁸⁰⁰ Amended consolidated indictment, paras 53-54.

¹⁰⁸⁰¹ Amended consolidated indictment, paras 55-62.

¹⁰⁸⁰² Amended consolidated indictment, paras 63-70.

¹⁰⁸⁰³ Amended consolidated indictment, paras 1, 53 (c), 55 (c), 57 (b), 59 (b), 61 (b), 63 (c), 65 (c), 67 (b), 69 (b).

¹⁰⁸⁰⁴ Amended consolidated indictment, paras 53 (a), 55 (a), 57 (a), 59 (a), 61 (a), 63 (a), 65 (a), 67 (a), 69 (a).

¹⁰⁸⁰⁵ Amended consolidated indictment, paras 59 (a), 61 (a), 67 (a), 69 (a).

¹⁰⁸⁰⁶ Amended consolidated indictment, paras 61 (a), 69 (a).

- Articles 212 and 213 of the Lebanese Criminal Code—counts 1-5;¹⁰⁸⁰⁷
- Article 219 (4) and (5) of the Lebanese Criminal Code—counts 6-9;¹⁰⁸⁰⁸
- Article 270 of the Lebanese Criminal Code—count 1;¹⁰⁸⁰⁹
- Article 314 of the Lebanese Criminal Code—counts 1, 2 and 6;¹⁰⁸¹⁰
- Articles 547 and 549 (1) and (7) of the Lebanese Criminal Code—counts 3-5 and 7-9;¹⁰⁸¹¹
- Article 6 of the Lebanese law of 1958—counts 1, 2 and 6;¹⁰⁸¹² and
- Article 7 of the Lebanese law of 1958—count 1.¹⁰⁸¹³

5877. These and other relevant articles in the Code are examined in detail below.

3. The Articles of the Lebanese Criminal Code relevant to the charges against the Accused

5878. The following Articles of the Lebanese Criminal Code are relevant to the charges against the Accused. Sub-chapter II of Book I, Chapter III, containing Articles 188 to 199, is headed ‘Mental elements of offences’.¹⁰⁸¹⁴ Articles 188 to 191 refer to intent, with Article 188 defining this mental element as ‘the will to commit an offence as defined by law’.

5879. Articles 189, 190 and 191 state:

Article 189: An offence shall be deemed to be intentional, even if the criminal consequence of the act or omission exceeds the intent of the perpetrator, if he had foreseen its occurrence and thus accepted the risk.

Article 190: Fault exists where a harmful act results from negligence, recklessness or failure to comply with laws and regulations.

¹⁰⁸⁰⁷ Amended consolidated indictment, paras 53 (a), 55 (a), 57 (a), 59 (a), 61 (a).

¹⁰⁸⁰⁸ Amended consolidated indictment, paras 63 (a), 65 (a), 67 (a), 69 (a).

¹⁰⁸⁰⁹ Amended consolidated indictment, para. 53 (a).

¹⁰⁸¹⁰ Amended consolidated indictment, paras 53 (a), 55 (a), 63 (a).

¹⁰⁸¹¹ Amended consolidated indictment, paras 57 (a), 59 (a), 61 (a), 65 (a), 67 (a), 69 (a).

¹⁰⁸¹² Amended consolidated indictment, paras 53 (b), 55 (b), 63 (a).

¹⁰⁸¹³ Amended consolidated indictment, para. 53 (b).

¹⁰⁸¹⁴ The Appeals Chamber explained that Article 2 of the Statute ‘implicitly refers to the subjective elements as well’ as the objective elements of the crimes under Lebanese law. First interlocutory decision on applicable law, fn. 66.

Article 191: An offence is unintentional if the perpetrator did not foresee the consequences of his wrongful act or omission although he could or should have foreseen it, or if he foresaw it and believed that he could prevent it.

5880. Article 192 provides the following definition of motive:

Motive is the reason prompting the perpetrator to act, or his ultimate goal.

It shall not constitute an element of an offence except in cases specified by law.

5881. None of the offences in the amended consolidated indictment, pleaded as having been committed contrary to the Lebanese Criminal Code, requires the Prosecution to prove that the Accused had a motive to commit the crime charged.¹⁰⁸¹⁵

5882. Section III, Articles 200 to 203, is entitled ‘Material elements of offences’.¹⁰⁸¹⁶ Articles 200 and 201¹⁰⁸¹⁷ concern attempted felonies, with Article 200 specifying that:

Any attempt to commit a felony that began with acts aimed directly at its commission shall be deemed to constitute the felony itself if its completion was prevented solely by circumstances beyond the control of the perpetrator.

...

Any person who begins to commit an act and then voluntarily desists shall be punished only for acts that he committed which constituted offences *per se*.

5883. Article 201 provides for the commutation of penalties:

If all acts aimed at the commission of a felony were completed but produced no effect owing to circumstances beyond the control of the perpetrator.

¹⁰⁸¹⁵ This is relevant because the Sabra Defence made submissions, in the alternative, in its final trial brief (paras 427-428) and closing submissions (T. 21 September 2018, pp 14-21, 56-57), arguing that if the crime of terrorism under the Lebanese Criminal Code is interpreted in light of customary international law, the Prosecution must prove an Accused person’s motive as a mental element of the crime. In 2012, the Sabra Defence also challenged the Appeals Chamber’s definition of the *mens rea* required to commit a terrorist act in its unsuccessful attempt to have the Appeals Chamber reconsider its First interlocutory decision on applicable law; Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, para. 50, as argued in F0293, Sabra Motion for Reconsideration of Rule 176 *bis* Decision—“International Terrorism”, 13 June 2012, para. 4.

¹⁰⁸¹⁶ Article 202 in that section concerns misdemeanours only, so is not relevant in this case.

¹⁰⁸¹⁷ These two provisions also contain penalties for attempted crimes, which are not relevant to the Special Tribunal’s jurisdiction.

5884. Article 203 states:

An attempt shall be punished, even if its aim was unattainable owing to a factual circumstance unknown to the perpetrator. The perpetrator shall not be punished, however, if his act stemmed from a lack of understanding.

Furthermore, a person who commits an act in the mistaken belief that it constitutes an offence shall not be punished.

5885. Sub-section 2 of section III, entitled ‘Plurality of causes’, has a sole provision in Article 204 which provides:

A causal link between an act and omission on the one hand, and the criminal consequence on the other, shall not be precluded by the concurrent existence of other previous, simultaneous or subsequent causes, even if they were unknown to the perpetrator or independent of his act.

If, however, the subsequent cause is independent and sufficient in itself to bring about the criminal consequence, the perpetrator shall incur the penalty only for the act that he committed.

5886. Article 210 of the Lebanese Criminal Code, in a section entitled ‘The perpetrator of the offence’, relevantly provides that ‘No one shall be sentenced to a penalty unless he consciously and willingly committed the act.’

5887. Articles 212, 213 and 219 of the Lebanese Criminal Code concern modes of criminal liability under Lebanese law—with the parts of Article 219 charged in the amended consolidated indictment highlighted in bold—and relevantly provides:

Article 212: The perpetrator of an offence is anyone who brings into being the constituent elements of an offence or who participates directly in its commission.

Article 213: Each of the co-perpetrators of an offence shall be liable to the penalty prescribed by law for the offence.

A heavier penalty ... shall be applicable to anyone who organises the participation in the offence or directs the action of the persons taking part in it.

Article 219: The following shall be deemed to be accomplices to a felony or misdemeanour:

- (1) Anyone who issues instructions for its commission, even if such instructions did not facilitate the act;
- (2) Anyone who hardens the perpetrator's resolve by any means;
- (3) Anyone who, for material or moral gain, accepts the perpetrator's proposal to commit the offence;
- (4) **Anyone who aids or abets the perpetrator in acts that are preparatory to the offence;**
- (5) **Anyone who, having so agreed with the perpetrator or an accomplice before commission of the offence, helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice;**
- (6) Anyone who, having knowledge of the criminal conduct of offenders responsible for highway robbery or acts of violence against state security, public safety, persons or property, provides them with food, shelter, a refuge or a meeting place.

5888. Since all complicity charges in the amended consolidated indictment are under Articles 219 (4) and (5), only those articles are relevant to those charges. Another provision, Article 222, deals with assisting a person to evade justice in circumstances not covered by Article 219 (5). It relevantly provides:

Anyone who, other than in the cases provided for in Article 219, paragraphs 5 and 6, conceals a person who he knows has committed a felony or who helps such a person to evade justice shall be punishable by a term of imprisonment of three months to two years.

However, the Prosecutor has brought no charges under that Article. An amendment to the amended consolidated indictment expressly charging it in the alternative—as a matter of procedural fairness to the four Accused and hence their right to a fair trial—would have been required before the Trial Chamber could have considered it.

5889. The other provisions of the Lebanese Criminal Code charged in the amended consolidated indictment—Articles 270, 314, 547 and 549 (1) and (7)—concern particular crimes, namely, conspiracy, terrorist act and intentional homicide:

Article 270: Any agreement concluded between two or more persons to commit a felony by specific means shall be qualified as a conspiracy.

Article 314: Terrorist acts are all acts intended to cause a state of terror and committed by means liable to create a public danger such as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents.

Article 547: Anyone who intentionally kills another person shall be punishable by hard labour for a term of between 15 and 20 years.

Article 549: Intentional homicide shall entail the death penalty if it was committed in the following circumstances:

(1) With premeditation;

...

(7) Using explosive materials.

4. Articles 6 and 7 of the Lebanese law of 1958

5890. Article 6 of the Lebanese law of 1958¹⁰⁸¹⁸ prescribes the penalties for terrorist acts in the Lebanese legal system. Under Article 6, while these acts are generally non-capital offences they become capital offences if they cause death or certain other results. Article 6 provides:

Any act of terrorism shall be punishable by hard labour for life. Where the act results in the death of one or more individuals, the total or partial destruction of a building having one or more individuals inside it, the total or partial destruction of a public building, an industrial plant, a ship or other facilities, or disrupts the functioning of telecommunication or transport services, it shall be punishable by death.

¹⁰⁸¹⁸ This superseded the second, third and fourth sentences of Article 315 of the Lebanese Criminal Code. Lebanese law of 1958, Art. 1.

5891. In the amended consolidated indictment, the Prosecutor alleges specifically that the terrorist act in this case resulted in both the deaths of 22 persons and the partial destruction of a hotel ‘and nearby buildings’.¹⁰⁸¹⁹

5892. However, consistent with the international practice that no international criminal court or tribunal has the death penalty, Article 24 of the Statute displaces Article 6 of the 1958 law in the Special Tribunal’s proceedings in relation to the death penalty. It provides a maximum penalty of life imprisonment.¹⁰⁸²⁰

5893. Article 7 of the Lebanese law of 1958¹⁰⁸²¹ prescribes the penalty for conspiracy under Lebanese law, stating that:

Any person who enters into a conspiracy with a view to the commission of any of the offences set out in the preceding articles shall be punishable by hard labour for life.

5894. Because the Prosecutor has charged the Accused with participating in a conspiracy aimed at committing a terrorist act the relevant ‘preceding articles’ are Article 314 of the Lebanese Criminal Code and Article 6 of the Lebanese law of 1958, which is applicable to sentencing only. It is thus subject to Article 24 of the Statute.

5895. Articles 6 and 7 of the 1958 law exclusively concern sentencing and in any event appear to be irrelevant to the Special Tribunal’s jurisdiction. The Trial Chamber has therefore mentioned them only where it is necessary either to quote or summarise judicial decisions that refer to them, or to address, but briefly, the aggravating circumstances charged in this case.¹⁰⁸²²

¹⁰⁸¹⁹ Amended consolidated indictment, para. 56 (g).

¹⁰⁸²⁰ Article 24 provides:

1. The Trial Chamber shall impose upon a convicted person imprisonment for life or for a specified number of years. In determining the terms of imprisonment for the crimes provided for in this Statute, the Trial Chamber shall, as appropriate, have recourse to international practice regarding prison sentences and to the practice of the national courts of Lebanon.
2. In imposing sentence, the Trial Chamber should take into account such factors as the gravity of the offence and the individual circumstances of the convicted person.

¹⁰⁸²¹ This superseded the first sentence of Article 315 of the Lebanese Criminal Code. Lebanese law of 1958, Art. 1.

¹⁰⁸²² Rule 171 (A) provides that the Trial Chamber determines any sentence separately from and after delivering judgment.

5. Articles 2 and 3 of the Statute

5896. Article 2 of the Statute is entitled ‘Applicable criminal law’. It provides:

The following shall be applicable to the prosecution and punishment of the crimes referred to in article 1, subject to the provisions of this Statute:

- (a) the provisions of the Lebanese Criminal Code relating to the prosecution and punishment of acts of terrorism, crimes and offences against life and personal integrity, illicit associations and failure to report crimes and offences, including the rules regarding the material elements of a crime, criminal participation and conspiracy; and
- (b) Articles 6 and 7 of the Lebanese law of 11 January 1958 on “Increasing the penalties for sedition, civil war and interfaith struggle”.

5897. Thus Article 2 of the Statute specifies, in general terms, the Lebanese criminal law that the Special Tribunal must apply. While it expressly provides that the Special Tribunal must apply the Lebanese Criminal Code in prosecuting and punishing offences, it nevertheless then states that this is ‘subject to the provisions of this Statute’, but without setting any parameters.

5898. The article following, Article 3 ‘Individual criminal responsibility’, provides:

1. A person shall be individually responsible for crimes within the jurisdiction of the Special Tribunal if that person:

- (a) Committed, participated as accomplice, organized or directed others to commit the crime set forth in article 2 of this Statute; or
- (b) Contributed in any other way to the commission of the crime set forth in article 2 of this Statute by a group of persons acting with a common purpose, where such contribution is intentional and is either made with the aim of furthering the general criminal activity or purpose of the group or in the knowledge of the intention of the group to commit the crime.

2. With respect to superior and subordinate relationships, a superior shall be criminally responsible for any of the crimes set forth in article 2 of this Statute

committed by subordinates under his or her effective authority and control, as a result of his or her failure to exercise control properly over such subordinates, where:

- (a) The superior either knew, or consciously disregarded information that clearly indicated that the subordinates were committing or about to commit such crimes;
- (b) The crimes concerned activities that were within the effective responsibility and control of the superior; and
- (c) The superior failed to take all necessary and reasonable measures within his or her power to prevent or repress their commission or to submit the matter to the competent authorities for investigation and prosecution.

3. The fact that the person acted pursuant to an order of a superior shall not relieve him or her of criminal responsibility, but may be considered in mitigation of punishment if the Special Tribunal determines that justice so requires.

5899. Article 3 sets out the modes of liability for crimes within the Special Tribunal's jurisdiction, in other words how someone commits a crime. This is notwithstanding that Article 2 (a) had *already* applied the relevant Lebanese provisions to 'individual criminal responsibility', or the manner in which a crime is committed, by providing that provisions of the Lebanese Criminal Code including the 'rules regarding ... criminal participation' are applicable. The Lebanese code—like any other similar national code—specifies how crimes are committed. It defines the mental elements of offences,¹⁰⁸²³ when motive is applicable,¹⁰⁸²⁴ the material elements of offences such as attempt¹⁰⁸²⁵ and criminal responsibility such as perpetration¹⁰⁸²⁶ and accomplice and concealment offences.¹⁰⁸²⁷

5900. The issue of statutory interpretation here is the meaning of the words 'subject to the provisions of this Statute' in Article 2 in relation to the modes of liability under which an accused

¹⁰⁸²³ Arts 188-199.

¹⁰⁸²⁴ Art. 192.

¹⁰⁸²⁵ Arts 200-203.

¹⁰⁸²⁶ Arts 210, 212, among others.

¹⁰⁸²⁷ Arts 219-222.

person charged before the Special Tribunal may have committed an offence. The Statute, unfortunately, is unclear and provides no guidance as to its interpretation.¹⁰⁸²⁸

5901. Relevantly to the charges in the amended consolidated indictment, Article 3 (1) (a) states that a person is responsible for crimes within the Special Tribunal's jurisdiction if the person 'Committed, participated as accomplice, organized or directed others to commit the crime' referred to in Article 2.

5902. The genesis of Article 3 (1) (a) and (b)¹⁰⁸²⁹ is in Article 2 (3) of the 1997 *International Convention for the Suppression of Terrorist Bombings*.¹⁰⁸³⁰ The following is clear:

- Article 3 (1) (a) of the Statute mirrors Article 2 (3) (a) and (b) of the 1997 convention;

¹⁰⁸²⁸ The Secretary-General's report refers to the *Lebanese Criminal Code* and 'general criminal law principles'—which normally means general principles of criminal law common to domestic legal systems.

¹⁰⁸²⁹ The Secretary-General's report, at para. 26, states:

Under Article 3, paragraph 1, of the statute, all those who committed, participated as accomplice, organised or directed others to commit the crime, or otherwise contributed to the commission of the crime, shall be individually responsible. This is a reflection of the Lebanese Criminal Code and general criminal law principles, evidenced, inter alia, by Article 2, paragraph 3, of the International Convention for the Suppression of Terrorist Bombings of 1997 (General Assembly resolution 52/164, annex). Article 3, paragraph 2, reflects the principle of command responsibility both under international law and national criminal and military codes as more fully articulated in Article 28, subparagraph (b), of the Statute of the International Criminal Court. Under Article 3, paragraph 3, obedience to superior order is no defence, but may be considered in mitigation of punishment.

¹⁰⁸³⁰ As of the date of this judgment this convention had 170 State parties. Lebanon is not one and has not signed the treaty. Article 2 provides (emphasis added):

1. Any person commits an offence within the meaning of this Convention if that person unlawfully and intentionally delivers, places, discharges or detonates an explosive or other lethal device in, into or against a place of public use, a State or government facility, a public transportation system or an infrastructure facility:
 - (a) With the intent to cause death or serious bodily injury; or
 - (b) With the intent to cause extensive destruction of such a place, facility or system, where such destruction results in or is likely to result in major economic loss.
2. Any person also commits an offence if that person attempts to commit an offence as set forth in paragraph 1 of the present article.
3. Any person also commits an offence if that person:
 - (a) **Participates as an accomplice** in an offence as set forth in paragraph 1 or 2 of the present article; or
 - (b) **Organizes or directs others to commit an offence as set forth in paragraph 1 or 2** of the present article; or
 - (c) In any other way contributes to the commission of one or more offences as set forth in paragraph 1 or 2 of the present article by a group of persons acting with a common purpose; such contribution shall be intentional and either be made with the aim of furthering the general criminal activity or purpose of the group or be made in the knowledge of the intention of the group to commit the offence or offences concerned.

- Article 3 (1) (b) of the Statute comes directly from Article 2 (3) (c) of the 1997 convention;
- Article 3 (1) (b) of the Statute is almost identical to Article 25 (3) (d) of the 1998 Rome Statute of the ICC,¹⁰⁸³¹ which, in turn, comes from Article 2 (3) (c) of the 1997 convention.

5903. The Statute's Article 3 (1) (b) provides for individual criminal responsibility for a person who has:

Contributed in any other way to the commission of the crimes set forth in article 2 of the Statute by a group of persons acting with a common purpose, where such contribution is intentional and is either made with the aim of furthering the general criminal activity or purpose of the group or in the knowledge of the intention of the group to commit the crime.

5904. The wording of Article 3 (1) (a) and (b) of the Statute may represent a general principle of law, given that this derives from a convention that has 170 State ratifications, and, additionally, the Rome Statute, with its 123 State Parties. This provides evidence of *opinio juris*, but finding consistent State practice is more challenging and beyond the scope of this judgment.

5905. However, the *International Convention for the Suppression of Terrorist Bombings* does not define the elements of the modes of liability as set out in its Article 2 (3). Thus, even if it does represent a general principle of law, these elements can be found only by examining the case law of the international criminal courts and tribunals, and if relevant, national legislation and case law.

5906. Only Article 3 (1) (a) of the Statute is charged in the amended consolidated indictment. But as it and Article 3 (1) (b) come directly—and together—from the 1997 convention, Article 3 (1) (b) is also relevant for determining which modes of liability apply to cases before the Special Tribunal.

5907. The Lebanese Criminal Code does not contain a mode of criminal liability expressed precisely as set out in Article 3 (1) (b) of the Statute. However, it is evident that Article 3 (1) (b) also contains elements from three provisions of the Lebanese Criminal Code, namely the mental

¹⁰⁸³¹ Adopted on 17 July 1998. It entered into force on 1 July 2002. Article 25 (3) (d) provides for individual criminal responsibility for a person who, 'In any other way contributes to the commission or attempted commission of such a crime by a group of persons acting with a common purpose. Such contribution shall be intentional and shall either: (i) Be made with the aim of furthering the criminal activity or criminal purpose of the group, where such activity or purpose involves the commission of a crime within the jurisdiction of the Court; or (ii) Be made in the knowledge of the intention of the group to commit the crime'. Lebanon is neither a signatory nor State Party to the Rome Statute.

element or *mens rea* set out in Articles 188 and 189 (intent) and the substantive offence in Article 335, ‘Criminal associations’, which requires that two or more people enter into an agreement to commit a felony.

5908. Article 3 (1) (a) also overlaps in part with some provisions in Chapter IV of the Lebanese Criminal Code, under the heading ‘Responsibility’.¹⁰⁸³² Specifically, Article 210 provides that a person may only be sentenced to a penalty if they ‘consciously and willingly committed the act’ and Article 212 defines ‘the perpetrator of an offence’. Article 217—which is not charged in this case—defines ‘instigator’. Finally, under sub-section 3 ‘Accomplices and concealers’, Articles 219 and 220 define these modes of liability.

5909. Article 3 (2) and (3) of the Statute provide for individual criminal responsibility of those in superior and subordinate relationships. These principles derive from convention and customary international law. International criminal courts and tribunals have found that the individual criminal responsibility of military and other superiors for the conduct of their subordinates forms part of customary international law.¹⁰⁸³³ The original modern statutory source of Article 3 (3)—referring to a person acting pursuant to superior orders—is in the 1945 London Charter establishing the International Military Tribunal, which sat in Nuremberg in 1945 and 1946.¹⁰⁸³⁴ The liability in Article 3 (2) mirrors that in Article 28 (b) of the Rome Statute—which provides

¹⁰⁸³² This chapter is divided into three parts, namely, Part I ‘Responsible persons’ (Articles 210-222), Part II ‘Impediments to prosecution’ (Articles 223-248) and Part III ‘Grounds for exemption from penalty or for mitigation or aggravation of penalty’ (Articles 249-269), and each part is further sub-divided.

¹⁰⁸³³ For example, *Delalić and others (Čelebići)* Trial Judgment, paras 333-343; *Delalić and others (Čelebići)* Appeal Judgment, para. 195; *Fofana and Kondewa* Trial Judgment, para. 233; and the sources referred to by the ICTY and SCSL. See also First interlocutory decision on applicable law, paras 43, 204-207, 210.

¹⁰⁸³⁴ 1945 London Charter for the International Military Tribunal, Article 7, ‘The official position of defendants, whether as Heads of State or responsible officials in Government Departments, shall not be considered as freeing them from responsibility or mitigating punishment’ and Article 8, ‘The fact that the Defendant acted pursuant to order of his Government or of a superior shall not free him from responsibility, but may be considered in mitigation of punishment if the Tribunal determines that justice so requires’. Article 6, ‘Responsibility of Accused’ of the 1946 Tokyo Charter for the Far East International Military Tribunal is in similar terms.

liability for non-military superiors¹⁰⁸³⁵—which in turn comes from the London Charter, and the ICTY and ICTR Statutes.¹⁰⁸³⁶

5910. The liability expressed in Article 3 (3)—stating that acting pursuant to an order does not relieve a person of criminal responsibility but may be considered in mitigation of punishment—comes directly from the wording of Article 7 (4) of the ICTY Statute and Articles 6 (4) of the ICTR and SCSL Statutes and originally from Article 8 of the London Charter. This mode of liability, for superior-subordinate relationships in respect of non-military superiors, does not appear in the Lebanese Criminal Code. It is not charged and therefore is not relevant to the amended consolidated indictment. The Lebanese Military Code also contains no equivalent for military commanders. The wording of Article 3 (2) suggests that it encompasses superior responsibility for both military and non-military superiors, unlike in the Rome Statute where the responsibility is separated in two sub-sections.

5911. In summary, the modes of liability set out in Articles 3 (1) (a) and (b), (2) and (3) are evidently concepts of criminal liability taken from international criminal law, customary law and treaty law.

5912. Why Article 3 of the Statute includes modes of liability that are not in the Lebanese Criminal Code is unclear and unexplained: the Secretary-General's report provides no elucidation. The most likely explanation in relation to Articles 3 (2) and (3) is that these modes were added to allow the Special Tribunal's Prosecutor to file an indictment alleging superior responsibility against senior military or civilian officials where there was evidence that crimes within the Special

¹⁰⁸³⁵ Which provides:

With respect to superior and subordinate relationships not described in paragraph (a), a superior shall be criminally responsible for crimes within the jurisdiction of the Court committed by subordinates under his or her effective authority and control, as a result of his or her failure to exercise control properly over such subordinates, where:

- (i) The superior either knew, or consciously disregarded information which clearly indicated, that the subordinates were committing or about to commit such crimes;
- (ii) The crimes concerned activities that were within the effective responsibility and control of the superior; and
- (iii) The superior failed to take all necessary and reasonable measures within his or her power to prevent or repress their commission or to submit the matter to the competent authorities for investigation and prosecution.

Article 28 (a) provides for the responsibility of military commanders.

¹⁰⁸³⁶ ICTY Statute, Art. 7 (2)-(4); ICTR Statute, Art. 6 (2)-(4). *See also* SCSL Statute, Art. 6 (2)-(4). Articles 86-87, Additional Protocol I to the Geneva Conventions contain similar provisions with respect to military commanders.

Tribunal's jurisdiction had been committed by their subordinate(s), and that they had a legal duty to prevent or punish those crimes. This would have been pursuant to customary law.

5913. And as for Article 3 (1) (a) and (b)? Maybe it was an intended association between the attack on Mr Hariri—as a presumed terrorist attack caused by a large explosion—and the *International Convention for the Suppression of Terrorist Bombings*. But, again this is unexplained. Although the Secretary-General's report notes the convention, it does not illuminate its relevance to the Lebanese Criminal Code, which itself criminalises terrorist acts and how they can be committed.

5914. The modes of liability specified in Article 3 that do not appear in the Lebanese Criminal Code clearly were intended to still apply to cases tried before the Special Tribunal. This is because Article 2 of the Statute is expressed to be subject to the provisions of the Statute, which must logically include Article 3. So to this extent Article 2 is subject to at least some parts of Article 3.

5915. But for the following reasons, this must be subject to overriding principles of international human rights law and of criminal law, the most notable here being that of legality.

5916. Article 2 of the Statute, as noted, provides that the Special Tribunal is to apply the Lebanese Criminal Code for the prosecution and punishment of the listed offences but 'subject to the provisions of this Statute'. The Articles of the Statute falling within the phrase 'subject to the provisions of this Statute' would appear to be Article 3 'Individual criminal responsibility', Article 4 'Concurrent jurisdiction', Article 5 '*Non bis in idem*', Article 6 'Amnesty', Article 16 'Rights of the accused' and Article 24 'Penalties'. The Statute's remaining Articles concern either procedural law or the operation of the Special Tribunal. The prosecution and punishment of offences specified in Article 2—by reference to the Lebanese Criminal Code—therefore could not be 'subject to' any of these remaining Articles.

5917. The only Articles within the phrase 'subject to the provisions of this Statute' relevant to determining whether the Accused have participated in any offence charged in the amended consolidated indictment are Article 3, 'Individual criminal responsibility', and Article 16, 'Rights of the accused'.

5918. Article 16 shows that the Statute’s drafters intended international human rights standards to apply in the Special Tribunal. It explicitly imports a number of these standards into the Special Tribunal’s procedures. Article 16 (2) guarantees an accused person the right to a fair trial, providing ‘The accused shall be entitled to a fair and public hearing, subject to measures ordered by the Special Tribunal for the protection of victims and witnesses.’ Some specific guarantees are then listed in Article 16 (3) and (4). But other relevant principles and their interpretation are found in international human rights instruments and the decisions and comments of their courts and committees, as well as those of international criminal courts and tribunals.

5919. The core feature of the principle of legality is that a person cannot be found guilty of a crime if their conduct was not a crime under national or international law, in terms that were foreseeable and accessible, at the time when the acts that could constitute the crime occurred.¹⁰⁸³⁷ This is otherwise known as *nullum crimen sine lege* (no crime without law) or, in relation to punishment, *nullum poena sine lege* (no punishment without law). The principle is expressly stated in human rights treaties¹⁰⁸³⁸—including the ICCPR, to which Lebanon has been a party since 1972—and in Articles 1 and 6 of the Lebanese Criminal Code.¹⁰⁸³⁹ In addition, the Preamble to Lebanon’s Constitution provides that Lebanon abides by, and that its Government ‘shall embody’ ‘without exception’, the principles of, both the 1948 Universal Declaration of Human Rights and the covenants of the UN generally.¹⁰⁸⁴⁰ The ICCPR is one such covenant.

¹⁰⁸³⁷ *Milutinović and others* Appeal decision on challenging jurisdiction, paras 37-40; *Del Rio Prada* Judgment, paras 91-93; *Scoppola* Judgment, para. 99; *Sunday Times* Judgment, p. 24.

¹⁰⁸³⁸ For example, ICCPR, Art. 15; European Convention on Human Rights, Art. 7; American Convention on Human Rights, Art. 9. See also the (non-binding) Universal Declaration of Human Rights, Art. 11 (2).

¹⁰⁸³⁹ Articles 1 and 6 relevantly state:

No penalty may be imposed and no preventive or corrective measure may be taken in respect of an offence that was not defined by statute at the time of its commission. An accused person shall not be charged for acts constituting an offence or for acts of principal or accessory participation, committed before the offence in question has been defined by statute.

No penalty may be imposed that was not prescribed by statute at the time of commission of the offence.

Various other Articles in the same sub-chapter of the Lebanese Criminal Code, entitled ‘Temporal scope of application of criminal law’, limit retrospective application of law to changes favourable to the accused, for example, Articles 4 and 10. Article 4 relevantly states ‘Any statute that amends the right to prosecute shall be applicable to offences committed previously if it is more favourable to the accused.’ Article 10 relevantly states ‘Any new statute that amends the enforcement of a penalty by changing its nature shall not be applicable to acts committed before its entry into force unless it is more favourable to the accused or convicted person.’

¹⁰⁸⁴⁰ Lebanon, Constitution, Preamble, para. (B), which relevantly states that Lebanon is ‘a founding and active member of the United Nations Organization and abides by its covenants and by the Universal Declaration of Human Rights. The Government shall embody these principles in all fields and areas without exception’.

5920. The principle of legality applies to both the elements of crimes and the modes of liability.¹⁰⁸⁴¹ Aiding and abetting is a mode of liability. As an example, the ICTY Appeals Chamber, in *Milutinović* held that:

This Tribunal must therefore be satisfied that the crime or the form of liability with which an accused is charged was sufficiently foreseeable and that the law providing for such liability must be sufficiently accessible at the relevant time, taking into account the specificity of international law when making that assessment.¹⁰⁸⁴²

And further, in referring specifically to joint criminal enterprise as a mode of liability:

In order to come within the Tribunal's jurisdiction *ratione personae*, any form of liability must satisfy three pre-conditions: (i) it must be provided for in the Statute, explicitly or implicitly; (ii) it must have existed under customary international law at the relevant time; (iii) the law providing for that form of liability must have been sufficiently accessible at the relevant time to anyone who acted in such a way; and (iv) such person must have been able to foresee that he could be held criminally liable for his actions if apprehended.¹⁰⁸⁴³

5921. Retroactively criminalising a mode of liability, such as for example, that of a superior with respect to the criminal actions of a subordinate—as set out in Article 3 (2) of the Statute—would obviously infringe the principle of legality.

5922. The principle of *in dubio pro reo* is a long established general principle of law, including of international human rights law, and derives from the presumption of innocence.¹⁰⁸⁴⁴ The ICTY Appeals Chamber, for example in *Galić*, defined it in the following manner:

¹⁰⁸⁴¹ *Milutinović and others* Appeal decision on challenging jurisdiction, para. 38, and paras 37-40; *Nuon Chea and Khieu Samphan* Case 002/01 Appeal Judgment, para. 761. There, the Cambodian Supreme Court noted that it had held in the *Duch* Appeal Judgment at para. 96 that ‘that fairness and due process concerns underlying the international principle of legality require that charged offences or modes of responsibility be “sufficiently foreseeable and [...] sufficiently accessible [to the accused] at the relevant time”’. The Appeals Chamber reached the same conclusion but without citing any authority nor providing any reasoning: First interlocutory decision on applicable law, para. 210, stating only that, ‘Third, the principle of *nullum crimen* (in particular, its non-retroactive requirement) applies not only to substantive crimes, but also to modes of criminal responsibility’.

¹⁰⁸⁴² *Milutinović and others* Appeal decision on challenging jurisdiction, para. 38.

¹⁰⁸⁴³ *Milutinović and others* Appeal decision on challenging jurisdiction, para. 21. There are actually four rather than three pre-conditions here.

¹⁰⁸⁴⁴ It is incorporated in the Statute and numerous treaties including the ICCPR, Article 14 (2). This is binding upon Lebanon and recognised through the Preamble to its Constitution. *Al Jadeed and Al Khayat* Appeal Judgment, para. 169; *Limaj and others* Appeal Judgment, para. 21; *Renzaho* Appeal Judgment, para. 474; *Galić* Appeal Judgment, para. 77; see also *Barberà and others* Judgment, para. 77; *Tsalkitzis* Judgment, para. 60; *Delić* Trial Judgment, paras

The principle of *in dubio pro reo* dictates that any doubt should be resolved in favour of the accused and encompasses doubts as to whether an offence has been proved at the conclusion of a case.¹⁰⁸⁴⁵

5923. There is no doubt that it is an evidentiary principle requiring a court to exercise any evidentiary doubt in favour of the Accused. This includes on findings required for a conviction, such as the elements required to prove an offence.¹⁰⁸⁴⁶ The ICC Appeals Chamber has interpreted the principle to extend more generally to interpreting the definition of a crime, holding that:

The Appeals Chamber notes that the principle *in dubio pro reo* is encapsulated in article 22 (2) of the Statute as a general principle of criminal law to be employed, where ambiguity arises, in the interpretation of the definition of a crime.¹⁰⁸⁴⁷

Article 22 (2) of the Rome Statute, under the general heading of ‘*Nullum crimen sine lege*’, provides:

The definition of a crime shall be strictly construed and shall not be extended by analogy. In case of ambiguity, the definition shall be interpreted in favour of the person being investigated, prosecuted or convicted.

5924. The ICC Trial Chamber in *Katanga* and the ECCC Supreme Court Chamber have also stated that it extends to interpreting the law after other methods of interpretation have not resolved doubts.¹⁰⁸⁴⁸ One ICTY Trial Chamber, without using the term *in dubio pro reo*, held that an

23-24; *Tendam* Judgment, para. 37; *Cleve* Judgment, para. 52; Human Rights Committee General Comment No. 32, para. 30, in particular the statement that ‘The presumption of innocence, which is fundamental to the protection of human rights ... ensures that the accused has the benefit of doubt’. For an example of the application of *in dubio pro reo* in Lebanese courts, see *Journalist Kamel Mroue* Judgment, pp 1-2.

¹⁰⁸⁴⁵ *Galić* Appeal Judgment, para. 77, referring to *Tadić* appeal decision on additional evidence, para. 73, holding that any doubt should be resolved in favour of the Appellant in accordance with the principle *in dubio pro reo*; and *Delalić and others (Čelebići)* Trial Judgment, para. 601, which states that at the ‘conclusion of the case the accused is entitled to the benefit of the doubt as to whether the offence has been proved’.

¹⁰⁸⁴⁶ *Limaj and others* Appeal Judgment, para. 21; *Delalić and others (Čelebići)* Trial Judgment, para. 601; *Naletilić and Martinović* Appeal Judgment, para. 120, stating that ‘the existence of an armed conflict or its character has to be regarded, in accordance with the principle of *in dubio pro reo*, as ordinary elements of a crime under customary international law when applying Articles 2 and 3 of the Statute to the conduct at issue in this case’. See also para. 204.

¹⁰⁸⁴⁷ *Gbagbo and Blé Goudé* Appeal Judgment on prior recorded testimony, para. 83.

¹⁰⁸⁴⁸ *Katanga* Trial Judgment, para. 53 held, that ‘this principle only entails that, where doubt cast by an equivocal term or phrase as to the exact meaning of a provision cannot be dispelled by the General Rule or supplementary means of interpretation, it must be resolved in favour of the subject, in this case the Accused, and not in favour of the drafter, who was unclear’. The Cambodian Supreme Court, in the *Khieu Samphan* appeal decision on release, at para. 31, noted that ‘In so far as *in dubio pro reo* is applicable to dilemmas about the meaning of law, it must be limited to doubts that remain after interpretation’. In the *Im Chaem* closing order, para. 26 the Co-Investigating Judges, held that

ambiguity of interpretation of a criminal statute must be exercised in the Accused person's favour.¹⁰⁸⁴⁹

5925. ICTR chambers have resolved statutory ambiguity in an Accused person's favour but without specifically further defining the governing legal principle, other than as a general principle of law.¹⁰⁸⁵⁰ Three Trial Chamber judgments decided, in the Accused's favour, the difference in the French and English versions of Article 2 (2) (a) of the ICTR Statute. In French it was '*meurtre*' (murder) which legally requires an intention to kill, while in English it was 'killing' which includes both intentional and unintentional homicides.¹⁰⁸⁵¹

5926. The Appeals Chamber in its first interlocutory decision referred to a principle it termed *favor rei*, or 'in favour of the accused', that requires that where a legal definition or rule is ambiguous, the definition or rule must be interpreted in favour of the accused.¹⁰⁸⁵² The Trial

'*in dubio pro reo* has a residual role in the interpretation of legal provisions and its application is limited to doubts that remain after the application of the standard rules of interpretation'. In *Limaj and others* Appeal Judgment, Declaration of Judge Shahabuddeen, at para. 3, referred to US Supreme Court case law and noted, 'Also, one recalls the observation of the United States Supreme Court that there is a "familiar rule that, "where there is ambiguity in a criminal statute, doubts are resolved in favor of the defendant". Other judicial statements to that effect are legion. I believe that the principle on which they rely is subsumed by the principle of *in dubio pro reo*. Such statements apply that principle both to questions of fact and to questions of law.' (Footnotes omitted). Judge Shahabuddeen, however, did not note any of these 'legion' of judicial statements.

¹⁰⁸⁴⁹ *Delalić and others (Čelebići)* Trial Judgment, para. 413. 'The effect of strict construction of the provisions of a criminal statute is that where an equivocal word or ambiguous sentence leaves a reasonable doubt of its meaning which the canons of construction fail to solve, the benefit of the doubt should be given to the subject and against the legislature which has failed to explain itself. This is why ambiguous criminal statutes are to be construed *contra proferentem*.'

Its footnoted source is an English case, *R. v. Wimbledon JJ, ex p. Derwent* [1953] 1 QB 380, that neither mentions *contra proferentem* nor the principle relied upon. That case simply decided as a jurisdictional matter that the offence of overcharging rent was completed as of the date of signing a lease, and it was not a continuing daily offence. Thus, the prosecution must bring the charge within a six month limitation period, namely from the date of signing the lease. Further, *contra proferentem* is a civil law concept that according to *Black's Law Dictionary* is 'Used in connection with the construction of written documents to the effect that an ambiguous provision is construed most strongly against the person who selected the language'. Why *Delalić* used it in this manner is unclear.

¹⁰⁸⁵⁰ *Akayesu* Trial Judgment, para. 501; *Kayishema and Ruzindana* Trial Judgment, para. 103; *Musema* Trial Judgment, para. 155.

¹⁰⁸⁵¹ Although *Kayishema and Ruzindana* Trial Judgment found that there was 'virtually no difference between the two' for the crime of genocide 'as the term "killing" is linked to the intent to destroy in whole or in part', para. 103.

¹⁰⁸⁵² First interlocutory decision on applicable law, para. 32. It footnoted to six cases, namely *Akayesu* Trial Judgment, paras 500-501; *Krstić* Trial Judgment, para. 502; *Galić* Appeal Judgment, paras 76-78; *Limaj and others* Appeal Judgment, paras 21-22; *DRC* Victims application decision, para. 23; and *Bemba* confirmation decision, para. 31.

However, none of these cases mention the term *favor rei*. *Akayesu* held that given 'the presumption of innocence of the accused, and pursuant to the general principles of criminal law, the Chamber holds that the version more favourable to the accused should be upheld', para. 501. *Krstić*, at para. 502, applied 'the principle that where there is a plausible difference of interpretation or application, the position which most favours the accused should be adopted'. Both *Galić* and *Limaj* applied the *evidentiary* principle of *in dubio pro reo*. In the first ICC case, the *DRC* Victims application decision, a single judge noted that *in dubio pro reo* did not apply to victim's participation applications, while in the

Chamber, however, could not find the term used in any other international criminal law decisions or judgments.¹⁰⁸⁵³

5927. The Trial Chamber has observed a clear trend in international criminal law in the years since the Appeals Chamber's decision to extend the traditional definition of *in dubio pro reo* from one applying only to evidence, to one encompassing legal statutory interpretation after other means of interpretation have resulted in ambiguity.¹⁰⁸⁵⁴ The Trial Chamber will therefore avoid the uncertainty of the lesser known term of *favor rei*.

5928. The Trial Chamber accepts the extended definition of *in dubio pro reo* as both a general principle and, as referred to in Rule 3 (A), a general principle of international criminal law and procedure, as extending to interpreting legal ambiguity in an Accused person's favour, after first exploring other means of statutory interpretation.

5929. Rule 3 (A) specifies that in interpreting the Rules, the Chambers apply, 'in order of precedence', the codified principles of interpretation set out in Articles 31-33 of the 1969 *Vienna Convention on the Law of Treaties*,¹⁰⁸⁵⁵ 'international standards on human rights', 'the general principles of international criminal law and procedure' and 'as appropriate' the Lebanese Code of Criminal Procedure, to the proceedings.

5930. Under Rule 3 (B), any remaining ambiguity must be resolved by an interpretation considered the most favourable to a suspect or accused person. However, there is no provision equivalent to Rule 3, in either the Rules or the Statute, listing and specifying the order of precedence between the principles the Chambers must apply in interpreting the Statute or the applicable or relevant Lebanese legislation.

second, the *Bemba* Pre-Trial Chamber simply confirmed that the principle applies at all stages of the judicial proceedings, including the confirmation stage. Some footnoted cases do not support the proposition in the text.

¹⁰⁸⁵³ Each of the Prosecution, Oneissi Defence and Sabra Defence used the term *favor rei* for this principle. Prosecution closing submissions, T. 13 September 2018, pp 69-71, 73, 75-76; Oneissi Defence final trial brief, para. 646; Sabra Defence final trial brief, para. 801. The Ayyash and Merhi Defence refer only to the evidentiary form of the principle, adopting the term '*in dubio pro reo*', see Ayyash Defence final trial brief, paras 9, 11; Merhi Defence final trial brief, para. 82.

¹⁰⁸⁵⁴ One ICTY Trial Chamber, the *Stakić* Trial Judgment, rejected this approach as only applying to the establishment of facts, para. 416; as did that chamber's presiding judge in *Limaj and others* Appeal Judgment, Partially Dissenting and Separate Opinion and Declaration of Judge Schomburg, paras 15-20.

¹⁰⁸⁵⁵ Adopted 23 May 1969.

5931. So how should a provision as fundamental to the Special Tribunal's existence and operation as Article 3 (1) (a) be interpreted? Does it mean that the Special Tribunal *may* apply *either* international *or* Lebanese modes of individual criminal liability to the prosecution of offences, *or both*? And which prevails—or is to be preferred—in the event of an overlap? Obviously the Trial Chamber must interpret it in light of the general principles of criminal law and international human rights law mandated in Article 16 (2)—both those specified in the Article and any others which are necessary to ensure that accused persons receive a fair trial.

5932. But what would apply if, say, the elements of aiding and abetting an offence accepted in international criminal law were more favourable to an accused person than those specified in the Lebanese Criminal Code, yet the crime charged and its mode of commission were clearly part of Lebanese law in 2004 and 2005? Meaning that no issue of legality could arise.

5933. To answer these questions, the Trial Chamber must examine the relevant parts of the Lebanese Criminal Code and if necessary international criminal law, but within the framework of the Statute and applicable general principles of international human rights law and of criminal law.

5934. And to understand how the relevant provisions of the Code—those that define both the modes of criminal liability and the substantive crimes with which the Accused are charged—are usually interpreted, the Trial Chamber has also surveyed the decisions of Lebanese courts on those provisions.

5935. The Trial Chamber is not obliged to follow any Lebanese judicial interpretation of the applicable Lebanese Criminal Code provisions. The Special Tribunal's Statute does not mandate this. Further, the Lebanese legal system contains no formal doctrine of *stare decisis*, or binding precedent, under which courts should adopt interpretations of the law consistent with their previous decisions, and in which the decisions of 'superior' courts bind courts that are lower in the judicial hierarchy. Lebanese judicial decisions, however, provide some guidance as to the interpretation of the applicable provisions of the Code. Therefore, in general, the Trial Chamber has sought to interpret and apply those provisions consistently with those decisions.

5936. As an interpretative aid, the Trial Chamber has also examined the two interlocutory decisions of the Appeals Chamber on the applicable law.

6. The Appeals Chamber's interlocutory decisions on the applicable law

5937. The Appeals Chamber has issued two interlocutory decisions in relation to the law applicable to the Special Tribunal. Both interpret the applicable law.

(a) Background to the decisions

5938. The Prosecutor submitted an initial indictment, but only against Mr Ayyash, to the Pre-Trial Judge on 17 January 2011. Four days later, on 21 January 2011, using Rules 68 (G) and 176 *bis* to obtain guidance 'that he deems necessary in order to examine and rule on the indictment',¹⁰⁸⁵⁶ the Pre-Trial Judge submitted 15 questions on the interpretation of Articles 2 and 3 of the Statute to the Appeals Chamber.¹⁰⁸⁵⁷ No indictments had then been confirmed against any accused and, consequently, no accused persons were represented or made submissions to the Appeals Chamber.

5939. The Appeals Chamber rapidly dealt with the matter, receiving submissions from the Prosecutor and Head of Defence Office on 31 January and 4 February 2011, holding an oral hearing on 7 February 2011 and receiving two *amicus curiae* filings on 11 February 2011. Five days later, on 16 February 2011, it issued its 153-page, 452-footnote 'Interlocutory Decision on the Applicable Law: Terrorism, Conspiracy, Homicide, Perpetration, Cumulative Charging'.¹⁰⁸⁵⁸

5940. In its decision and to define particular offences and modes of liability applicable to the Special Tribunal's proceedings, the Appeals Chamber surveyed the Lebanese case law and some pertinent sources of international law. On 18 October 2017, the Appeals Chamber issued a second similar interlocutory decision,¹⁰⁸⁵⁹ in response to questions the Pre-Trial Judge had submitted to examine and rule on an indictment in a connected case.

5941. In the first decision, the Appeals Chamber adopted several 'general principles of interpretation',¹⁰⁸⁶⁰ which it affirmed in its second decision.¹⁰⁸⁶¹

¹⁰⁸⁵⁶ Rule 68 (G).

¹⁰⁸⁵⁷ Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber.

¹⁰⁸⁵⁸ First interlocutory decision on applicable law.

¹⁰⁸⁵⁹ Second interlocutory decision on applicable law.

¹⁰⁸⁶⁰ First interlocutory decision on applicable law, paras 6, 17-41.

¹⁰⁸⁶¹ Second interlocutory decision on applicable law, paras 15-24.

5942. In essence, these combine international law principles concerning the construction of treaties, principles concerning criminal law and processes that are enshrined in international human rights law, such as legality, and principles derived or adapted from other sources, both international and domestic. The Appeals Chamber proposed that these be used to resolve overlaps or tensions between Lebanese law on the one hand and international law, including the Statute, on the other. These principles are examined in more detail below.

(b) Are these decisions binding on the Trial Chamber?

5943. A preliminary issue—arising from closing submissions in the case—is whether these two decisions, issued in the absence of reasoned arguments from counsel for any Accused persons, or the Legal Representatives of Victims, are binding on the Trial Chamber. The short answer is that they are not.

5944. The Trial Chamber first briefly addressed this issue in its decision under Rule 167 delivered in court on 7 March 2018, finding that Mr Oneissi had a case to answer at the close of the Prosecution case.¹⁰⁸⁶² It found that the first interlocutory decision was not necessarily legally binding and effectively is an advisory opinion, stating:

The Trial Chamber does not consider itself necessarily bound by this interlocutory Appeals Chamber decision. The decision was made before an indictment was confirmed and before Defence counsel had been assigned to act for the indicted accused persons. And, additionally, the Appeals Chamber was issuing what is effectively an advisory opinion to assist the Pre-Trial Judge in deciding whether to confirm the indictment against the suspects and on what charges.¹⁰⁸⁶³

The Trial Chamber did not refer to the second interlocutory decision in its decision under Rule 167.

¹⁰⁸⁶² Rule 167 provides:

(A) At the close of the Prosecutor's case, the Trial Chamber shall, by oral or written decision and after hearing submissions of the Parties, enter a judgement of acquittal on any count if there is no evidence capable of supporting a conviction on that count.

(B) The Prosecutor may appeal any judgment of acquittal under this Rule. Rule 177 (A) (i) and (B) and Rules 182 and 186 shall apply *mutatis mutandis* to such an appeal.

For the procedural history of this application, *see* Annex A 'Procedural history', (13) (e) 'Rule 167 motion for acquittal at the end of the Prosecution case'.

¹⁰⁸⁶³ Rule 167 decision, p. 42.

5945. Counsel for Mr Oneissi submitted in their closing submissions that the Trial Chamber was legally bound to follow the Appeals Chamber's first interlocutory decision.¹⁰⁸⁶⁴ They had not argued this in their Rule 167 submissions. The Ayyash Defence may have implicitly adopted this submission, by stating that regarding counts 6 to 9 of the amended consolidated indictment, containing the complicity charges against the three Accused other than Mr Ayyash, it 'defers to the arguments of counsel for Mr Merhi, Mr Sabra and Mr Oneissi in their respective closing submissions'.¹⁰⁸⁶⁵ The Merhi Defence assumed that the first interlocutory decision was binding on the Trial Chamber,¹⁰⁸⁶⁶ as did the Sabra Defence in parts of its final trial brief.¹⁰⁸⁶⁷

5946. The Prosecution took no position on this issue. Prosecution counsel confirmed this during closing submissions, stating regarding the Appeals Chamber's first interlocutory decision, 'we have not taken position on the binding nature or not of that decision.'¹⁰⁸⁶⁸ The Prosecutor, Mr Farrell, subsequently submitted orally:

in terms of your last question, implied or otherwise, whether or not you were bound by the Appeals Chamber decision. I would submit that the wording of the Appeals Chamber decision is fairly strongly worded that this Court and the Pre-Trial Judge are to follow the Appeals Chamber's decision. Now, recognizing –

PRESIDING JUDGE RE: On a case-by-case basis I think were the words they used and we might have to interpret it.

MR. FARRELL: Yes, I accept that. And I also recognize that there has been no ruling, similar to -- if I may look to the ICTY, to the *Aleksovski* Appeals Chamber decision on *stare decisis*, though the language seems to be quite clear from the Appeals Chamber. But

¹⁰⁸⁶⁴ Oneissi Defence final trial brief, para. 647; Oneissi Defence closing submissions, T. 20 September 2018, pp 101, 103-120.

¹⁰⁸⁶⁵ Ayyash Defence final trial brief, para. 712; F3318, Joint Defence Submissions on Lebanese Law, 8 September 2017, paras 13, 15 (where the Defence stated, in summary, that given the absence of significant updates or changes to Lebanese law, the First interlocutory decision on applicable law 'continues to apply as the controlling law' on both the elements of the offences and the modes of liability).

¹⁰⁸⁶⁶ Merhi Defence final trial brief, paras 403, 412, 481.

¹⁰⁸⁶⁷ Sabra Defence final trial brief, paras 802, 804, 811, 817, 819, 823, 825-826, 833. Note however Sabra Defence final trial brief, para. 810, referring to the situation if the Trial Chamber 'should be minded' to apply the First interlocutory decision on applicable law.

¹⁰⁸⁶⁸ Prosecution closing submissions (counsel Mr D. Kinnecome), T. 11 September 2018, p. 112.

if on a case-by-case basis, including based on this area that you've identified that this Court must address, then it may be open to you to do so.¹⁰⁸⁶⁹

The Trial Chamber interprets this submission from the Prosecutor as suggesting, at most, that the Appeals Chamber considers that the first interlocutory decision on applicable law legally binds the Pre-Trial Judge and Trial Chamber—not as an acceptance that that view is correct.

5947. For the following reasons, the Trial Chamber maintains the view it expressed in the Rule 167 decision that these decisions are not binding although it considers, as a matter of policy, that it should *generally* follow them. It is emphasised that the Appeals Chamber, in issuing its two interlocutory decisions, was not exercising its statutory appellate function as set out in Article 25 of the Statute.

5948. In the ordinary course of legal proceedings, Rules 68 (G) and 176 *bis* aside, the Trial Chamber is responsible for making both legal and factual findings at first instance regarding all matters arising in the case, other than those for which the Pre-Trial Judge is responsible. The Appeals Chamber, on the other hand, has appellate jurisdiction over specific alleged errors in those findings, as raised by the Parties or participants in an appeal. Therefore, ordinarily the Trial Chamber is the first chamber to make the legal findings necessary to adjudicating a case, while the Appeals Chamber is the second. The Appeals Chamber does so within the framework created by the Trial Chamber's existing decision, the alleged errors raised by the appellant(s), the applicable standard of appellate review and, where applicable, the questions certified for appeal by the Trial Chamber or, where applicable, the Pre-Trial Judge.

5949. The Special Tribunal's legal framework provides for this ordinary distribution of roles between the Trial and Appeals Chambers. The Rules empower and oblige the Trial Chamber to make numerous fundamental legal determinations even during the pre-trial stage, before the case has been formally assigned to it. For example, Rule 90 (A) (i)-(iii) makes the Trial Chamber responsible for determining preliminary motions on challenges to jurisdiction, alleged defects in the indictment or requests for severance of counts or trials. In addition, under Rule 89 (E), the Pre-Trial Judge may 'refer any matter to the Trial Chamber for adjudication'. The Appeals Chamber itself has confirmed that referrals under Rule 89 (E) could include issues as fundamental as

¹⁰⁸⁶⁹ Prosecution closing submissions, T. 13 September 2018, p. 79.

challenges to the legality of the Special Tribunal.¹⁰⁸⁷⁰ Moreover, after assignment of the case to the Trial Chamber, Rule 126 (B) allows it to adjudicate any matter brought before it by a Party's interlocutory motion. Only after the Trial Chamber has made findings on such a matter can they be challenged on interlocutory appeal before the Appeals Chamber.¹⁰⁸⁷¹ This same distribution of roles, in two layers of decision making regarding both legal and factual issues, also exists when adjudicating the Accused's alleged guilt.¹⁰⁸⁷²

5950. It is therefore highly exceptional that Rules 68 (G) and 176 *bis* empower the Appeals Chamber, on the Pre-Trial Judge's request, to be the first judicial entity to make certain legal findings in a case, rather than reviewing the correctness of legal findings already made by another judge or chamber. That is, these Rules exceptionally give the Appeals Chamber a function that is neither appellate nor review. Moreover, if—contrary to the view expressed here—the Appeals Chamber's Rule 68 (G) legal findings were binding on the Trial Chamber, the Appeals Chamber would not only be the first entity to make these findings but indeed the *only* one to do so. Only the Appeals Chamber itself is explicitly empowered to reconsider those findings, upon a Party's application,¹⁰⁸⁷³ and it may refuse to do so as it did in this case. This raises the question of whether this is incompatible with the right to appeal mandated in various international human rights law instruments.

5951. The standard of review, as set out in the Special Tribunal's Statute and Rules and as confirmed by the Appeals Chamber in interlocutory appeals with reference to the case law of other international criminal courts and tribunals, is also instructive with regard to the respective roles of the Trial Chamber and the Appeals Chamber.¹⁰⁸⁷⁴ The Appeals Chamber may review alleged errors of law invalidating a decision and alleged errors of fact that have occasioned a miscarriage of justice, as raised by an appellant, and, where applicable, as certified by the Trial Chamber.¹⁰⁸⁷⁵ An appeal is not a *de novo* review and, therefore, the Appeals Chamber would not ordinarily entertain

¹⁰⁸⁷⁰ Decision on the Defence Appeals against the Trial Chamber jurisdiction, para. 20.

¹⁰⁸⁷¹ Rules 90 (B), 126 (C); Decision on the Defence Appeals against the Trial Chamber jurisdiction, para. 20.

¹⁰⁸⁷² Rule 176 (A); Statute, Art. 26 (A).

¹⁰⁸⁷³ Under Rule 176 *bis* (C).

¹⁰⁸⁷⁴ Rule 176 (A); Statute, Art. 26 (A); *for example*, Decision on the Defence Appeals against the Trial Chamber jurisdiction, paras 9-10; Appeal decision on legality of transfer of call data records, paras 21-22; Interlocutory appeal decision on the death of Mr Badreddine and termination of proceedings, paras 26-27; *see also Al Jadeed and Al Khayat* Appeal Judgment, paras 12-16.

¹⁰⁸⁷⁵ Rules 90 (B), 126 (C), 176 (A); Statute, Art. 26 (A).

arguments which simply put forward a different interpretation of the applicable law to that adopted by the Trial Chamber. Rather, it is necessary to show that the Trial Chamber erred in making the contested legal finding.¹⁰⁸⁷⁶

5952. Nothing in the Special Tribunal's Statute, Rules of Procedure and Evidence or other relevant instruments such as Security Council resolution 1757¹⁰⁸⁷⁷ provides that an interlocutory decision made under Rule 68 (G) and Rule 176 *bis* would bind the Trial Chamber. Likewise, neither the Statute nor the Rules provide that Appeals Chamber decisions bind the Pre-Trial Judge and Trial Chamber in matters not the subject of a direct appeal. And, it is stressed, the decision was not an appellate one.

5953. As no other international criminal courts and tribunals have a process equivalent to that in Rules 68 (G) and 176 *bis* there is no international case law on the legal status of such interlocutory decisions. The Appeals Chamber recognised this, noting in its first interlocutory decision, 'This procedure, sometimes encountered in civil proceedings of some countries, is less common in the context of criminal proceedings'¹⁰⁸⁷⁸ and further, in July 2012, in dismissing a Defence application for reconsideration, after the assignment of counsel to represent the four Accused:

We have taken note of the argument that neither Lebanese law *nor that of* other domestic or *international jurisdictions* provides a similar procedure to the one provided under Rules 68 (G) and 176 *bis*. Contrary to the argument of counsel for Mr Badreddine, however, the Tribunal is not "bound" by the practice of these jurisdictions ... The Tribunal ... is unique in the sense that it is a court of an international nature that is applying Lebanese domestic law. Accordingly, the Tribunal must be able to adapt its unique framework to the specific challenges it faces.¹⁰⁸⁷⁹

5954. And, significantly, unlike at other international criminal courts and tribunals there are no Special Tribunal appellate decisions holding that *all* Appeals Chamber decisions are binding on the Pre-Trial Judge and the Trial Chamber—and by extension, Contempt Judges or Contempt

¹⁰⁸⁷⁶ For example, *Prlić and others* Appeal decision on document presentation in cross-examination, para. 16 and case law cited in fns 60-62; *Rutaganda* Appeal Judgment, para. 505 (*see also* paras 18-19); *Akayesu* Appeal Judgment, para. 177.

¹⁰⁸⁷⁷ Which annexes the Agreement on the establishment of the Special Tribunal for Lebanon.

¹⁰⁸⁷⁸ First interlocutory decision on the applicable law, para. 8.

¹⁰⁸⁷⁹ Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, para. 36 (emphasis added).

Appellate Panels—in matters not the subject of a direct appeal.¹⁰⁸⁸⁰ No other Special Tribunal decision or governing statutory instrument imposes the doctrine of *stare decisis*, or binding precedent, on these other chambers in such matters, either.

5955. Rules 68 (G) and 176 *bis* by their nature plainly establish a preliminary rather than a final process—including obliging the Appeals Chamber to issue its decision ‘without prejudging the rights of any accused.’¹⁰⁸⁸¹

5956. Moreover, the two Appeals Chamber decisions bear the title ‘Interlocutory Decision’. An *interlocutory* decision—as opposed to an appeal from an interlocutory decision—is by its nature necessarily not a *final* decision on the merits of an issue. To hold otherwise would mean that the issue was *res judicata* between the parties.¹⁰⁸⁸² But there were no ‘parties’ to the decision. The only ‘Party’ to those proceedings within the meaning of Rule 2 was the Prosecutor.

¹⁰⁸⁸⁰ The ‘*Aleksovski* Appeals Chamber decision on *stare decisis*’ to which the Prosecutor referred in his closing submissions (T. 13 September 2018, p. 79) was part of an ICTY Appeals Chamber judgment and addressed only the question of whether the previous decisions of the ICTY Appeals Chamber are binding on an ICTY Trial Chamber or the ICTY Appeals Chamber itself. *Aleksovski* Appeal Judgment, para. 113, where the Appeals Chamber found that the *ratio decidendi* of its decisions binds ICTY Trial Chambers due to the Appeals Chamber’s jurisdiction to hear appeals from Trial Chamber decisions, as set out in the ICTY Statute, and the importance of having certainty and predictability in the law’s application and the accused’s right to have like cases treated alike. *See also Aleksovski* Appeal Judgment, para. 107, where the Appeals Chamber found that, ‘in the interests of certainty and predictability, [it] should follow its previous decisions, but should be free to depart from them for cogent reasons in the interests of justice’. *See further Aleksovski* Appeal Judgment, paras 92-111. Similarly, the IRMCT Appeals Chamber has stated that it considers itself ‘bound to interpret the Statute and the Rules in a manner consistent with the jurisprudence of the ICTR and the ICTY. Consequently, while not bound by the jurisprudence of the ICTR or the ICTY, the Appeals Chamber is guided by the principle that, in the interests of legal certainty and predictability, it should follow previous decisions of the ICTR or the ICTY Appeals Chambers and depart from them only for cogent reasons in the interests of justice’, *Semanza* decision on access and review, para. 15 (internal footnotes omitted). The position in the ICC is different. The Rome Statute, Article 21 (2), relevantly provides that ‘The Court *may* apply principles and rules of law as interpreted in its previous decisions’ (emphasis added). The word ‘may’ in Article 21 (2), rather than ‘shall’ which is used in Article 21 (1), suggests that the ICC is not bound by its previous decisions. This is how ICC chambers to date have interpreted Article 21 (2). *For example, Gbagbo and Blé Goudé* decision of 31 July 2015, para. 14, stating (internal footnotes omitted): ‘Article 21 (2) of the Statute provides that “[t]he Court may apply principles and rules of law as interpreted in its previous decisions”. Thus, the Appeals Chamber is not obliged to follow its previous interpretations of principles and rules of law through binding *stare decisis*; rather it is vested with discretion as to whether to do so. In this respect, the Appeals Chamber has previously stated that absent “convincing reasons” it will not depart from its previous decisions. Thus, in principle, while the Appeals Chamber has discretion to depart from its previous jurisprudence, it will not readily do so, given the need to ensure predictability of the law and the fairness of adjudication to foster public reliance on its decisions’.

¹⁰⁸⁸¹ Rule 176 *bis* (A).

¹⁰⁸⁸² ‘A thing adjudicated’, Black’s Law Dictionary, explaining that ‘The three essential elements are (1) an earlier decision on the issue, (2) a final judgment on the merits and (3) the involvement of the same parties, or parties in privity with the original parties’.

5957. The Head of Defence Office ‘appeared’ and made submissions, but did not, and could not, represent any ‘Party’. The general protection of ‘the rights of the defence’—the Head of Defence Office’s function, as specified in Article 13 (2) of the Statute—does not necessarily coincide with the interests of the Defence of an individual accused person. The defence of the various Accused persons may differ—and sometimes strongly, and even for strategic litigation reasons—on the law and its interpretation. The views of the Head of Defence Office in filing submissions under Rule 176 *bis* cannot be seen as representing those of the defence of an individual accused person. Neither can those of *amicus curiae* briefs filed under the auspices of the Head of Defence Office.

5958. The Appeals Chamber also emphasised that it issued its first interlocutory decision without having seen the indictment.¹⁰⁸⁸³ And it further acknowledged that it was making its legal findings in the abstract, ‘without any reference to facts’.¹⁰⁸⁸⁴ Moreover, it issued the first interlocutory decision without having the benefit of submissions from all Parties or the Legal Representatives of Victims—in fact, before Defence counsel had even been appointed and before any victims were participating in the case.¹⁰⁸⁸⁵ In effect, the Appeals Chamber was making a purely abstract legal ruling without the benefit of pleaded material facts which could have focused its attention more pointedly onto the relevant issues. And at that stage of the proceedings, the Prosecutor had submitted an indictment only against Mr Ayyash.

5959. In 2012, after Defence counsel were appointed to represent the then four Accused, they sought reconsideration of that interlocutory decision.¹⁰⁸⁸⁶ The Appeals Chamber refused the applications, holding:

¹⁰⁸⁸³ First interlocutory decision on applicable law, para. 8; Appeals Chamber decision refusing request to submit preliminary questions on applicable law after confirmation of indictment, para. 29.

¹⁰⁸⁸⁴ Second interlocutory decision on applicable law, para. 11, citing First interlocutory decision on applicable law, paras 8, 10. *See also* the paragraphs of the Appeals Chamber decision refusing request to submit preliminary questions on applicable law after confirmation of indictment and Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law referred to in second interlocutory decision on applicable law, fn. 11.

¹⁰⁸⁸⁵ As summarised in Decision denying Head of Defence Office certification to appeal (Lebanese criminal law), paras 1-2, 4; Rule 167 decision, p. 42; Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law, para. 38 (as to fact that decisions under Rule 176 *bis* are issued in absence of Defence counsel).

¹⁰⁸⁸⁶ F0293, Sabra Motion for Reconsideration of Rule 176 *bis* Decision—“International Terrorism”, 13 June 2012; F0294, Request for Reconsideration of the Interlocutory Decision on the Applicable Law Rendered by the Appeals Chamber on 16 February 2011, 13 June 2012; F0295, Defence for Salim Jamil Ayyash’s Joinder in the Defence for Mustafa Amine Badreddine’s “*Requête en réexamen de la décision préjudicielle sur le droit applicable rendue par la Chambre d’appel le 16 février 2011*”, 13 June 2012; F0296/COR, Corrected Version of the “Request by the Oneissi

It will still be for the Trial Chamber to *apply and shape* the relevant legal principles in the light of the charges contained in the indictment and the evidence adduced by the parties. This judgment will be subject to an appeal and the Appeals Chamber will revisit any legal issue that might be raised by such an appeal under Article 26 of the Statute.¹⁰⁸⁸⁷

There, the Appeals Chamber also stated, ‘the Trial Chamber’s task of trying the facts on the case and applying the underlying legal principles in light of the evidence is not impacted by the holdings of the Interlocutory Decision’¹⁰⁸⁸⁸ and ‘we reject the arguments that “the Appeals Chamber deprives the Trial Chamber of the power to develop its own interpretation of the law”’.¹⁰⁸⁸⁹

5960. This second statement on its face appears to defeat the apparent policy purpose of the Rule 68 (G)/176 *bis* procedure, namely, to settle the law *before* the pre-trial or trial phases of the proceedings. However, another interpretation is that of the Appeals Chamber implicitly recognising the limitation of attempting to settle such fundamental legal issues to finality in the absence of an indictment, facts, accused persons or Parties as contradictors, and hence its obvious non-binding nature.

5961. Moreover, and most significantly, without an indictment and hence the pleading of material facts setting out the case against an accused, delineating in the abstract the extent of an accused person’s legal liability is difficult. A pertinent example in this instance is the degree of knowledge that an accused person must have of an intended crime before they can be held legally liable as an accomplice under Articles 219 (4) and (5) of the Lebanese Criminal Code. The Appeals Chamber did not address this fundamental issue in either interlocutory decision.

5962. The Appeals Chamber has not ruled on the legal status of its decisions under Rule 176 *bis*. Instead, it has described their purpose as providing guidance and clarification¹⁰⁸⁹⁰—both of which

Defence for Reconsideration of the Interlocutory Decision on the Applicable Law of 16 February 2011” dated 13 June 2012, 21 June 2012.

¹⁰⁸⁸⁷ Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law, para. 37 (footnotes omitted, emphasis added).

¹⁰⁸⁸⁸ Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law, para. 43.

¹⁰⁸⁸⁹ Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law, fn. 85.

¹⁰⁸⁹⁰ *For example*, First interlocutory decision on applicable law, paras 7, 11 (specifically the statement, ‘It is the responsibility of the Appeals Chamber to accomplish this task by stating the applicable law in the clearest and most coherent way possible’), 297; Second interlocutory decision on applicable law, paras 10, 82-83, 93; Appeals Chamber decision refusing request to submit preliminary questions on applicable law after confirmation of indictment, para. 27.

are typical functions of an advisory opinion, although the Appeals Chamber does not use that term.¹⁰⁸⁹¹ The Appeals Chamber has also stated that these decisions serve to avoid the risk of the Pre-Trial Judge or Trial Chamber adopting an interpretation of the law contrary to the Appeals Chamber's, with consequent prejudice to the Parties and unreasonable delay in the proceedings.¹⁰⁸⁹² However, the consequent prejudice could actually flow in the other direction; an Accused, who was not a party to the Rule 176 *bis* proceedings, could be prejudiced by an abstract ruling on a fundamental legal issue on which they had no chance to be heard.

5963. The Trial Chamber therefore maintains as a matter of policy, meaning effective judicial management which is consistent with the rights of the Accused to a fair trial and the Prosecution's interest in the process and that of the participating victims, that although not legally bound to do so, it should generally follow the interpretation of the law of the first interlocutory decision unless cogent reasons exist not to. The Trial Chamber may depart from that interpretation if required in the interests of justice to ensure a fair trial,¹⁰⁸⁹³ for example if the Appeals Chamber patently or manifestly erred in law. This would constitute persuasive reasons, or to use another term, cogent reasons in the interests of justice,¹⁰⁸⁹⁴ for the Trial Chamber not to follow the Appeals Chamber's legal findings.

5964. In the circumstances—most especially the lapse of time between the Appeals Chamber's first decision, issued three years before the trial began, and almost seven and a half years before it

¹⁰⁸⁹¹ See further the characterisation of decisions issued under Rule 176 *bis* in 'Appeals and Enforcement' in Cassese's International Criminal Law, p. 394 (describing them as an 'innovative form of appellate advisory opinion'); Webb 2014, p. 90, fn. 8; Michel 2014, p. 29. Compare, Gillet and Schuster 2011, pp 991-997. The Sabra Defence cited this in its submissions on terrorism, referred to later. The authors describe the First interlocutory decision on applicable law as 'more akin to an advisory opinion than to a regular interlocutory decision' and the Rule 176 *bis* procedure as an 'advisory procedure', but also state the decision has 'final effect'. They are very critical of both the Rule 176 *bis* procedure and the content of the decision.

¹⁰⁸⁹² Second interlocutory decision on applicable law, para. 11; see also the similar comment in the First interlocutory decision on applicable law, para. 9. On the need for expedition in the Special Tribunal's proceedings, see Statute, Arts 16 (4) (c), 18 (2), 21 (1) and 28 (2).

¹⁰⁸⁹³ For example, Arts 16 (2), 17, 21 (2), 21 (4) and 28 (2) of the Statute. See also Decision on the Legal Representatives' application to call evidence, para. 18 and accompanying footnote. Regarding the concept of the interests of justice specifically, see footnote 24 of that decision.

¹⁰⁸⁹⁴ *Aleksovski* Appeal Judgment, paras 107-111, considering *stare decisis*. See also *Semanza* decision on access and review, para. 15.

closed—the Trial Chamber is of the view that the interests of justice required it to examine for itself the Lebanese case law cited by the Appeals Chamber.¹⁰⁸⁹⁵

5965. Due to the passage of time since the Appeals Chamber issued its first interlocutory decision and as a matter of fairness to the Parties and the participating victims,¹⁰⁸⁹⁶ the Trial Chamber, on 27 July 2017, sought written submissions from the Parties and the Legal Representatives of Victims concerning the Lebanese law applicable in the proceedings, in anticipation of the close of the Prosecution’s case.¹⁰⁸⁹⁷ The Parties provided their submissions in September 2017, with the Prosecution and the Defence of the four Accused jointly submitting that the applicable law was that set out in the Appeals Chamber’s first interlocutory decision on the applicable law. The Legal Representatives of Victims made no express submissions on this point.¹⁰⁸⁹⁸

5966. The Trial Chamber has conducted its own research to identify and examine relevant Lebanese decisions issued after February 2011—particularly decisions on accomplice liability, as examined below—but has found no relevant change, favouring the Accused, to Lebanese law.¹⁰⁸⁹⁹ This research has also enhanced the Trial Chamber’s own understanding of how Lebanese courts interpret the applicable law.

¹⁰⁸⁹⁵ The apparent haste in the Appeals Chamber issuing its first decision 12 days after receiving the Prosecution’s and Defence Office’s written submissions is another reason to review the underlying source material. Additionally, some critical academic opinion that examined that source material and found some errors was another reason for the Trial Chamber to review it for itself. See Saul LJIL 2011; Saul *amicus curiae* brief 2011; Saul 2013; Gillet and Schuster 2011, *for example*, pp 1011-1014, 1018; Cryer and others 2014, p. 341.

¹⁰⁸⁹⁶ Given the absence of the Accused and participating victims when the First interlocutory decision on applicable law was issued.

¹⁰⁸⁹⁷ Order to file submissions and observations on Lebanese law. See also Decision denying Head of Defence Office certification to appeal (Lebanese criminal law), paras 3-4.

¹⁰⁸⁹⁸ All Parties submitted in effect that the Trial Chamber could continue to rely on the interpretation of Lebanese law set out in the First interlocutory decision on the applicable law. F3317, Prosecution Submissions pursuant to the Trial Chamber’s Order of 27 July 2017, 8 September 2017; F3329, Prosecution Response to the ‘*Observations proprio motu du Chef du Bureau de la Défense suite à l’Ordonnance de la Chambre de Première Instance du 27 juillet 2017 relative au droit applicable*’, 18 September 2017 (see especially para. 7); F3318, Joint Defence Submissions on Lebanese Law, 8 September 2017 (see especially paras 13, 15). The Legal Representatives of Victims made no express submissions about the appropriateness of reliance on the First interlocutory decision on applicable law but cited that decision, apparently with approval, in their submissions on terrorism specifically. Legal Representatives of Victims final trial brief, paras 59-61, 63-64.

¹⁰⁸⁹⁹ In fact, no Party identified any significant change in Lebanese law after the First interlocutory decision on applicable law was issued. F3329, Prosecution Response to the ‘*Observations proprio motu du Chef du Bureau de la Défense suite à l’Ordonnance de la Chambre de Première Instance du 27 juillet 2017 relative au droit applicable*’, 18 September 2017, para. 7; F3318, Joint Defence Submissions on Lebanese Law, 8 September 2017, paras 13, 15.

(c) The Appeals Chamber's reasoning in interpreting the Special Tribunal's applicable law

i. Interpretative principles

5967. The Appeals Chamber in its 2011 interlocutory decision was faced with reconciling an apparent conflict between Article 2 in the Statute, which explicitly provides that the Special Tribunal must apply the Lebanese Criminal Code but 'subject to the provisions of this Statute' and Article 3. This was because Article 3 introduces modes of liability for committing offences that were directly specified not in the Lebanese Criminal Code but rather in Articles 25 and 28 of the Rome Statute—as referred to in Article 3 (1) (b), (2) and (3). But, as noted above, this was not the case for Article 3 (1) (a) which reflected the Lebanese law.

5968. The Appeals Chamber adopted several different approaches to resolve this issue of interpretation. Ultimately, it held that any conflict between international and Lebanese provisions on the liability of an accomplice should be resolved in favour of the Accused. Along the way, it held that consonant with international law on the interpretation of treaties, the Special Tribunal's Statute should be interpreted in good faith in accordance with the ordinary meaning to be given to its words in their context, in light of its object and purpose and in such a manner as to render them effective and operational.¹⁰⁹⁰⁰

5969. The Special Tribunal's Statute is not a treaty but an annex to a Security Council resolution adopted pursuant to Chapter VII of the Charter of the United Nations. However, the Appeals Chamber decided to apply international law on the interpretation of treaties to the Statute, unless the applicable Lebanese law clearly provided otherwise.¹⁰⁹⁰¹

5970. The Appeals Chamber appeared to favour a two-step approach, holding:

With regard to the Tribunal's Statute, the principles of teleological interpretation just referred to require an interpretation that best enables the Tribunal to achieve its goal to administer justice in a fair and efficient manner. If, however, this yardstick does not prove helpful, one should choose that interpretation which is more favourable to the rights of the

¹⁰⁹⁰⁰ First interlocutory decision on applicable law, paras 28-32; second interlocutory decision on applicable law, para. 21. *See also* second interlocutory decision on applicable law, para. 16.

¹⁰⁹⁰¹ First interlocutory decision on applicable law, para. 26; Second interlocutory decision on applicable law, para. 21. *See also* First interlocutory decision on applicable law, paras 17-25, 27.

suspect or the accused. And further, the principles of teleological interpretation require an interpretation that best enables the Tribunal to achieve its goal to administer justice in a fair and efficient manner. If, however, this yardstick does not prove helpful, one should choose that interpretation which is more favourable to the rights of the suspect or the accused.¹⁰⁹⁰²

5971. Later in the same paragraph, the Appeals Chamber referred to ‘the general principle of criminal law of *favor rei* (in favour of the accused)’ and ‘the principle of legality (*nullum crimen sine lege*)’, then stated:

These principles, *favor rei* and *nullum crimen sine lege*, are general principles of law applicable in both the domestic and the international legal contexts. The Appeals Chamber is therefore authorised to resort to these principles as a standard of construction when the Statute or the Lebanese Criminal Code is unclear and when other rules of interpretation have not yielded satisfactory results.¹⁰⁹⁰³

5972. In addition, the Appeals Chamber noted that judges could not invoke the *non liquet* principle, declaring it impossible to reach a decision because a matter was unclear.¹⁰⁹⁰⁴ It held that where the provisions of an instrument or instruments are inconsistent with one another, the dominant provision must be identified.¹⁰⁹⁰⁵ The Appeals Chamber also concluded that it should interpret the Lebanese law referred to in Article 2 in light of any international law that binds Lebanon.¹⁰⁹⁰⁶

5973. The Appeals Chamber stated in paragraph 39 of its first interlocutory decision that the Special Tribunal, ‘As an international court’:

may depart from the application and interpretation of national law by national courts under certain conditions: when such interpretation or application appears to be *unreasonable*, or may result in a *manifest injustice*, or is not consonant with international principles and rules

¹⁰⁹⁰² First interlocutory decision on applicable law, para. 32.

binding upon Lebanon. That is indeed what other international tribunals have effectively held.¹⁰⁹⁰⁷

5974. The Appeals Chamber also held, in paragraph 40 of its first interlocutory decision, that if Lebanese judicial decisions are inconsistent, such as if ‘Lebanese courts take different or conflicting views of the relevant legislation’,¹⁰⁹⁰⁸ the Special Tribunal will interpret the Lebanese law in a manner it deems ‘more appropriate and consistent with international legal standards’.¹⁰⁹⁰⁹ The decision, however, neither specified what these standards might be nor how a chamber should determine what they were. It footnoted this to the 1929 PCIJ *Brazilian Loans* case.¹⁰⁹¹⁰ This case concerned whether a party to an international contract—here for the payment to the French bond-holders of Brazilian Government bonds in gold franc—may rely on French municipal law to pay bond-holders in paper franc to defeat its apparent international contractual obligations to pay them in gold franc.¹⁰⁹¹¹

5975. In examining any conflict between the French municipal law and the terms of the international bond contract, the PCIJ held:

Of course, the Court will endeavour to make a just appreciation of the jurisprudence of municipal courts. If this is uncertain or divided, it will rest with the Court to select the interpretation which it considers most in conformity with the law. But to compel the Court to disregard that jurisprudence would not be in conformity with its function when applying municipal law. As the Court has already observed in the judgment in the case of the Serbian loans, it would be a most delicate matter to do so, in a case concerning public policy—a conception the definition of which in any particular country is largely dependent on the opinion prevailing at any given time in such country itself—and in a case where no relevant provisions directly relate to the question at issue. Such are the reasons according to which the Court considers that it must construe Article VI of the Special Agreement to mean that, which the Court is authorized to depart from the jurisprudence of the municipal courts, it

¹⁰⁹⁰⁷ First interlocutory decision on applicable law, para. 39 (original emphasis, footnotes omitted). *See also* Second interlocutory decision on applicable law, para. 22.

¹⁰⁹⁰⁸ First interlocutory decision on applicable law, para. 40.

¹⁰⁹⁰⁹ First interlocutory decision on applicable law, para. 40; Second interlocutory decision on applicable law, para. 23.

¹⁰⁹¹⁰ *Brazilian Loans* Judgment.

¹⁰⁹¹¹ Namely, that under French law ‘whilst a gold clause in respect of a domestic transaction is null and void, this is not the case as regards international contracts, even when payment is to be effected in France’, at p. 123.

remains entirely free to decide that there is no ground for attributing to the municipal law a meaning other than that attributed to it by that jurisprudence.¹⁰⁹¹²

5976. The Trial Chamber is therefore not convinced that strong support for this proposition is found in the PCIJ case referenced. Nor is it sure of the intended meaning of the phrase ‘international legal standards’ in this context. The Appeals Chamber’s use of just ‘international legal standards’ in paragraph 40 of its first interlocutory decision, as distinct from the phrase ‘international legal standards binding upon the State’ or ‘on Lebanon’ which it has used elsewhere,¹⁰⁹¹³ suggests it may have intended the former to include standards other than just those binding on Lebanon.

5977. Standards set out in a treaty to which Lebanon is not party, that do not constitute customary international law or ‘general principles of law’ within the meaning of Article 38 (1) (c) of the Statute of the International Court of Justice, would fall into this category. However, in light of the Appeals Chamber’s other conclusions, the Trial Chamber considers it more likely that in paragraph 40 of its decision the Appeals Chamber was referring only to international legal standards binding upon Lebanon. The Trial Chamber will, therefore, adopt this interpretation.

5978. The Appeals Chamber concluded in its first interlocutory decision that in fact, there was ‘no need to depart from Lebanese law for any of’ the reasons it had described in paragraphs 39 and 40 of that decision.¹⁰⁹¹⁴ This statement suggests that the Appeals Chamber considered that Lebanese courts’ decisions did not conflict with one another—the reason for departure from Lebanese law described in paragraph 40—and that their application and interpretation of relevant Lebanese law was reasonable, would not result in a manifest injustice and was ‘consonant with international principles and rules binding on Lebanon’—the reasons described in paragraph 39.

5979. But concerning the crime of terrorism, the Appeals Chamber in effect departed from the interpretation of the Lebanese Criminal Code in some Lebanese judicial decisions partly because that interpretation was not consonant with principles of customary international law binding on Lebanon. The Appeals Chamber described this course of action as interpreting ‘provisions of the Lebanese Criminal Code as they would be interpreted by Lebanese courts’, consistent with ‘the

¹⁰⁹¹² *Brazilian Loans* Judgment, pp 124-125.

¹⁰⁹¹³ First interlocutory decision on applicable law, paras 41, 124.

¹⁰⁹¹⁴ First interlocutory decision on applicable law, para. 41.

general principle of interpretation common to most States of the world: the principle that one should construe the national legislation of a State in such a manner as to align it as much as possible to international legal standards binding upon the State.’¹⁰⁹¹⁵ The resulting interpretation was less favourable to the Accused than the interpretation in the Lebanese case law.¹⁰⁹¹⁶

5980. Finally, relevant to the interpretation of the words ‘subject to the provisions of this Statute’ in Article 2, in paragraph 211 of its first interlocutory decision the Appeals Chamber held of Lebanese modes of criminal liability¹⁰⁹¹⁷ and the international criminal law modes of liability referred to in Article 3,¹⁰⁹¹⁸ ‘generally speaking’¹⁰⁹¹⁹ and taking into account the circumstances of the case,¹⁰⁹²⁰ it will be appropriate for the Special Tribunal to:

- first evaluate on a case-by-case basis whether there is any conflict between them;
- where no conflict exists, apply the Lebanese mode of liability; and
- where a conflict exists, apply the law that would lead to a more favourable outcome for the Accused.¹⁰⁹²¹

5981. The Appeals Chamber then applied this approach by comparing Lebanese and international law on several different modes of liability, including the two charged in this case.¹⁰⁹²²

5982. In short, regarding committing a crime, the Appeals Chamber found that there was no conflict between the two bodies of law concerning ‘perpetration and the core concept of co-perpetration’, hence Lebanese law should be applied.¹⁰⁹²³ It also found the law applicable to the ‘more complicated instances’ of co-perpetration should be determined ‘on a case-by-case basis’ based on which one proves to be more favourable to the Accused, and ‘in particular, an individual

¹⁰⁹¹⁵ First interlocutory decision on applicable law, para. 41 (footnotes omitted). *See also* First interlocutory decision on applicable law, paras 45-46, 62, 71-82, 114-124, 147 and Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, paras 6, 48.

¹⁰⁹¹⁶ Some Lebanese judicial decisions have interpreted Article 314 restrictively in one way or another, for example by finding that only acts using one of the means specified in the Article can be terrorist.

¹⁰⁹¹⁷ First interlocutory decision on applicable law, para. 205.

¹⁰⁹¹⁸ First interlocutory decision on applicable law, para. 206.

¹⁰⁹¹⁹ First interlocutory decision on applicable law, para. 211.

¹⁰⁹²⁰ First interlocutory decision on applicable law, disposition, 13.

¹⁰⁹²¹ First interlocutory decision on applicable law, para. 211. *See also* First interlocutory decision on applicable law, disposition, 13.

¹⁰⁹²² *See* First interlocutory decision on applicable law, paras 213-264.

¹⁰⁹²³ First interlocutory decision on applicable law, para. 217.

should not be charged as a co-perpetrator for an act of terrorism if he did not have the special intent to commit the act of terrorism.’¹⁰⁹²⁴

5983. Regarding participation as an accomplice, the Appeals Chamber identified some differences between Lebanese and international law and determined that the Lebanese was more favourable to the Accused, and hence it should be applied in the proceedings.¹⁰⁹²⁵

ii. The Trial Chamber’s observations

5984. The Trial Chamber makes the following observations regarding Appeals Chamber’s findings referred to directly above.

5985. Instead of examining Article 3 to determine whether it was necessary to scrutinise international legal concepts, the Appeals Chamber seems to have assumed the existence of a tension that could only be resolved by recourse to those concepts. The Appeals Chamber cited¹⁰⁹²⁶ case law from the ICTR, ICTY and ICC for the proposition that where a conflict exists, chambers of the Special Tribunal should apply the law that would lead to a more favourable outcome for the accused—the basis upon which it ultimately resolved the issue of the law applicable to accomplice liability. This proposition would appear to be generally consistent with applying international human rights law and general principles of law to interpreting Article 2. But only if indeed that approach was necessary.

5986. If Article 3 (1) (a) contains no express or implicit suggestion that it was intending to impose international law onto the interpretation of the Lebanese Criminal Code—and in circumstances where the Lebanese law was clear—the Trial Chamber does not believe that scrutinising international law will assist.

5987. But if on the other hand the alternative route of reasoning is taken, namely to examine the two bodies of law, it appears to the Trial Chamber that a much neater route of statutory interpretation would be simply to read the words ‘subject to the provisions of this Statute’ to refer to the mandatory imposition in Article 16 (2) of the principles of international human rights law on Articles 2 and 3. Hence, while Article 2 is to an extent subject to Article 3, both are subject to

¹⁰⁹²⁴ First interlocutory decision on applicable law, para. 264.

¹⁰⁹²⁵ First interlocutory decision on applicable law, paras 228, 264.

¹⁰⁹²⁶ In its First interlocutory decision on applicable law, para. 32, fn. 49.

Article 16 (2), meaning that Articles 2 and 3 must be read together and subordinate to the right to a fair trial mandated in Article 16 (2).

5988. The Lebanese legal system, as noted, contains no formal doctrine of precedent and the Trial Chamber is not legally bound to follow Lebanese judicial decisions. In its first interlocutory decision, the Appeals Chamber recognised that Lebanese courts are entitled to depart from their prior interpretations of a legal provision and that ‘This is something to be taken into account by the Tribunal when interpreting the Lebanese Criminal Code.’¹⁰⁹²⁷ But generally, as also recognised by the Appeals Chamber,¹⁰⁹²⁸ the Trial Chamber should interpret and apply these provisions consistently with those decisions.

5989. According to the Appeals Chamber, the Trial Chamber need not do so where a Lebanese judicial interpretation or application of these provisions: appears unreasonable, may result in a manifest injustice, or is inconsistent with international law that is binding on Lebanon.¹⁰⁹²⁹ The Trial Chamber generally agrees with this. The Trial Chamber may depart from a Lebanese judicial interpretation that was clearly untenable in law or might result in unfairness if applied. But the Trial Chamber has difficulty in understanding the relevance of the application of non-binding international law principles to the circumstances of the *Ayyash and others* case. This is because the only charges on the amended consolidated indictment are under Article 3 (1) (a) of the Statute which does not require interpretation in light of Lebanon’s international legal obligations.

5990. However, an issue arose at the conclusion of the trial in which the Prosecution urged the Trial Chamber to adopt an international criminal law definition of aiding and abetting, despite it being less favourable to the Accused. This argument was advanced in the alternative; the Prosecution and the Defence of all four Accused primarily submit that Lebanese law governs this issue. Despite this, the Sabra Defence also referred to international criminal law on aiding and abetting, submitting that it could and should inform the Trial Chamber’s interpretation of Lebanese law.

¹⁰⁹²⁷ First interlocutory decision on applicable law, para. 142.

¹⁰⁹²⁸ First interlocutory decision on applicable law, para. 35; Second interlocutory decision on applicable law, para. 22.

¹⁰⁹²⁹ First interlocutory decision on applicable law, para. 39; Second interlocutory decision on applicable law, para. 22. *See also* First interlocutory decision on applicable law, paras 40-41.

5991. The Trial Chamber uses the term ‘aiding *and* abetting’ here in collectively referring to the relevant international criminal law and the Lebanese mode of liability. It also does so to refer to that mode of liability under international criminal law only.¹⁰⁹³⁰ When examining the equivalent mode of liability under Lebanese law, ‘aiding *or* abetting’ is used to conform with the wording of Article 219 (4) of the Lebanese Criminal Code.

5992. The Prosecution and Defence submissions are examined below. Whichever route is taken—either applying the body of law most favourable to the Accused, namely the Lebanese law, or alternatively holding that there is no need to even examine the international provisions—the Trial Chamber arrives at the same result, namely that it should apply the relevant Lebanese law to interpreting the elements of accomplice liability, as opposed to those of international criminal law.

5993. All Parties submitted, and the Trial Chamber also concludes, that it should apply Lebanese law to the substantive crimes charged in this case.

iii. Submissions on the interpretation of Articles 2 and 3

5994. All Parties except the Ayyash Defence made submissions relevant to applying ‘international legal standards’¹⁰⁹³¹ in the event of conflicting or differing Lebanese interpretations of the applicable law.

5995. In the Prosecution’s submission the term encompasses the standards on modes of liability reflected in Article 3.¹⁰⁹³² The Sabra Defence similarly appeared to accept that ‘international legal standards’ encompassed international criminal law reflected in Article 3.¹⁰⁹³³ No other Party dealt specifically with the issue of the scope of that term.

¹⁰⁹³⁰ This approach is consistent with the wording of most of the relevant international criminal law instruments, and the approach that international criminal courts and tribunals have adopted in their judgments. This includes the ICC, even though the Rome Statute uses the formulation ‘aids, abets or otherwise assists’ rather than ‘aided and abetted’ as is used in the statutes of the ICTY, ICTR and SCSL and ECCC. The ICC Appeals Chamber has confirmed that ‘aiding, abetting or otherwise assisting’ should be understood as a single mode of liability in ICC proceedings, *see Bemba and others* Appeal Judgment, paras 1324-1325.

¹⁰⁹³³ *For example*, Sabra Defence final trial brief, para. 823. *Compare*, references to customary international law as such in paras 800-801, 803, 810.

5996. Furthermore, the Prosecution in effect submitted that if Lebanese case law does not clearly or precisely delineate the relevant legal requirement, the Trial Chamber, when faced with competing interpretations, should adopt the interpretation more consistent with international legal standards.¹⁰⁹³⁴ It made this submission specifically in relation to the knowledge requirement for accomplice liability, and only in the alternative. The Prosecution emphasised that it did not accept that Lebanese judicial decisions were actually unclear or inconsistent with one another in this respect.¹⁰⁹³⁵ Nor did it accept that the provisions of the Lebanese Criminal Code on accomplice liability were unclear.¹⁰⁹³⁶

5997. Moreover, the Prosecution argues, there is actually no difference between the relevant international mode of liability, namely, aiding and abetting, and the relevant Lebanese mode, of complicity (or accomplice liability). In its submission, ‘the elements of aiding and abetting under international criminal law’, ‘reflected in Article 3 of the Statute, are consistent with Lebanese law.’¹⁰⁹³⁷ In the alternative—applying the approach it proposed if, contrary to the Prosecution’s position, the Trial Chamber were to find that there were competing interpretations in the Lebanese case law—the Trial Chamber should apply those Lebanese judicial decisions that are ‘most consistent with’ the international mode.¹⁰⁹³⁸

5998. When questioned about this issue in its oral closing submissions, Prosecution counsel responded that the principle of ‘reliance on *favor rei*’¹⁰⁹³⁹ set out by the Appeals Chamber in paragraph 32 of its first interlocutory decision applies in interpreting ‘the statute’, in the sense of both the Tribunal’s Statute and Lebanese criminal statutes, but not in determining which Lebanese judicial decisions to rely on if Lebanese case law is inconsistent.¹⁰⁹⁴⁰ Prosecution counsel argued

¹⁰⁹³⁴ Prosecution final trial brief, para. 1150, citing in support the First interlocutory decision on applicable law, para. 40. The Prosecution’s exact words were: ‘If the Chamber maintains the Lebanese jurisprudence does not “delineate with any clarity or precision the knowledge requirement for accomplice liability under Article 219 of the Lebanese criminal code”, the Chamber should adopt “the interpretation which it deems to be more appropriate and consistent with international legal standards”’. The first quotation is from the Trial Chamber’s Rule 167 decision, p. 46, the second from the First interlocutory decision on applicable law, para. 40. The Prosecution made substantially the same argument in its closing submissions, at T. 11 September 2018, pp 109-110.

¹⁰⁹³⁵ Prosecution closing submissions, T. 11 September 2018, pp 109-121, T. 13 September 2018, pp 72-75, 77. See also Prosecution final trial brief, paras 1147-1149.

¹⁰⁹³⁸ Prosecution final trial brief, para. 1154. See also the Prosecution’s similar oral arguments during its closing submissions, at T. 11 September 2018, pp 109-11, T. 13 September 2018, pp 70, 78-79.

¹⁰⁹³⁹ Prosecution closing submissions, T. 13 September 2018, p. 73.

¹⁰⁹⁴⁰ Prosecution closing submissions, T. 13 September 2018, pp 69-70, 73, 75-76.

that, ‘if you were to apply that principle to decide whether a lower court was correct, the higher court would always be bound by whatever decision the lower court made which was more favourable to the accused.’¹⁰⁹⁴¹

5999. The Prosecutor himself argued that the differences the Appeals Chamber had identified between Lebanese and international criminal law concerning accomplice liability, which had led it to conclude that the Lebanese mode of liability was more favourable to an accused person, did not concern the precise level of knowledge required of an accomplice. In fact the Appeals Chamber did not address that issue at all.¹⁰⁹⁴² The Trial Chamber could therefore ‘rely on international criminal law standards on this particular issue’.¹⁰⁹⁴³

6000. The Oneissi Defence opposed this, arguing that the Trial Chamber ‘cannot apply’¹⁰⁹⁴⁴ and ‘should reject the application of’¹⁰⁹⁴⁵ the international mode of liability. It argued that the Appeals Chamber had conducted a ‘detailed comparative analysis’¹⁰⁹⁴⁶ comparing aiding and abetting under international criminal law with the Lebanese mode of accomplice liability and identifying a conflict between the two, which gives precedence to the law more favourable to the accused. This ‘is consistent with the principle of *favour rei* which requires that, where the law is ambiguous, the Chamber choose an interpretation which is more favourable to the rights of Mr Oneissi.’¹⁰⁹⁴⁷ Consistent with its position that the Appeals Chamber’s first interlocutory decision is binding, the Oneissi Defence accepted the Appeals Chamber’s conclusion that Lebanese and international law differ and that the former is more favourable to an accused person.¹⁰⁹⁴⁸

6001. The Merhi Defence also rejected ‘the Prosecution’s suggestion that Lebanese law might be considered less favourable to the accused than international law, resulting in recourse to the latter in the interpretation of Article 219’ of the Lebanese Criminal Code.¹⁰⁹⁴⁹ To the contrary, according to the Merhi Defence, the *mens rea* of complicity under Lebanese law is stricter and therefore more favourable to an accused person than the *mens rea* of the relevant mode of liability under

international criminal law.¹⁰⁹⁵⁰ The Merhi Defence did not otherwise comment on the applicable interpretative principles. Instead, in support of its argument that Lebanese, not international law, on complicity should be applied, the Merhi Defence challenged the Prosecution's interpretation of particular Lebanese judicial decisions.

6002. The Sabra Defence took a more complex position on these issues, submitting in relation to Article 2 generally:

Pursuant to Article 2, Lebanese criminal law explicitly and exclusively applies. No reference is made to customary international law as a body of law relevant to the exercise of the Tribunal's jurisdiction *ratione materiae* within the Statute. This is consistent with the intention of the [UN Security Council] and [Lebanon] to exclude resort to international law in relation to Article 2 crimes.¹⁰⁹⁵¹

In the alternative, the Sabra Defence argued:

Even in the event that international customary law may be applicable in interpreting Article 2 crimes, it must only be considered within the general principle of *favor rei*. Any departure from the application and interpretation of national law is permitted within strict conditions when such interpretation or application: (i) appear to be unreasonable; (ii) may result in a manifest injustice; (iii) is not consonant with international principles and rules which are *binding* upon Lebanon. In this regard, in accordance with the principle of legality, the applicable international law must have existed at the relevant time and have been applicable to the accused. Where there is doubt, then the provision should not be applied.¹⁰⁹⁵²

6003. However, in its submissions on the content of some specific substantive crimes—intentional homicide, attempted intentional homicide and conspiracy—the Sabra Defence implied that it considered that a *lack of clarity* of Lebanese law is an additional basis permitting recourse to international law.¹⁰⁹⁵³ The Trial Chamber interprets this as a submission in the alternative that

¹⁰⁹⁵⁰ Merhi Defence closing submissions, T. 18 September 2018, pp 103-104.

¹⁰⁹⁵¹ Sabra Defence final trial brief, para. 800 (footnotes omitted).

¹⁰⁹⁵² Sabra Defence final trial brief, para. 801 (original emphasis, footnotes omitted).

¹⁰⁹⁵³ Sabra Defence final trial brief, paras 803-804, relevantly stating regarding intentional homicide and attempted intentional homicide, '*As both offences are clearly defined and applied within Lebanese law, recourse to customary international law is unwarranted*' and regarding conspiracy, '*Given the clarity of the elements, and in the absence of any equivalent crime in customary international law, no deviation from the application of conspiracy as strictly applied within the Lebanese courts is justified*' (emphasis added).

is consistent with the Sabra Defence's position regarding recourse to international law in interpreting Article 2. On terrorism specifically, the Sabra Defence also made submissions expressed in the alternative on the international standards that the Trial Chamber should apply, if applicable.

6004. Regarding the modes of liability, the Sabra Defence argued that the Appeals Chamber's proposed approach in its first interlocutory decision did not permit international law and Lebanese law modes of liability to be applied either simultaneously¹⁰⁹⁵⁴ or as alternatives to one another. Rather, 'the law of co-perpetration and complicity at this Tribunal must be understood and applied in a uniformly coherent way.'¹⁰⁹⁵⁵ In closing arguments, counsel for Mr Sabra argued that 'Lebanese law exclusively applies to crimes *and modes of liability*'.¹⁰⁹⁵⁶ Yet, they also claimed generally that the charges against Mr Sabra under Article 3 (1) (a) 'are interpreted through Lebanese law *and other legal precedents the Chamber finds of assistance*'¹⁰⁹⁵⁷ and, regarding complicity (accomplice liability) specifically, that "'international legal standards" can assist in *interpreting* the principle of complicity under Lebanese law.'¹⁰⁹⁵⁸

7. Conclusion: the Trial Chamber's approach to interpreting the modes of liability and crimes charged

6005. The Trial Chamber has reached the following conclusions about how, generally, it should determine and interpret the modes of liability and crimes charged in the case.

6006. The Appeals Chamber, at paragraph 40 of the first interlocutory decision, proposed that the Special Tribunal adopt 'the interpretation which it deems to be more appropriate and consistent with international legal standards'¹⁰⁹⁵⁹ if Lebanese *case law* varies, and hence is unclear. But at paragraph 32, as the Prosecution submitted, it invoked *favor rei* to interpret an unclear *statute*. The two are not necessarily consistent.

The Sabra Defence also made detailed submissions regarding international criminal law case law on aiding and abetting.

¹⁰⁹⁵⁹ First interlocutory decision on applicable law, para. 40.

6007. To a degree, the Trial Chamber accepts the Prosecution's submission concerning the implications of employing what the Appeals Chamber (uniquely) described as *favor rei* in relation to an inconsistency in national case law. In legal systems featuring a formal doctrine of binding precedent—either common law, or depending upon the higher court's position in the judicial hierarchy, some civil law jurisdictions—obliging courts to always resolve such inconsistencies by making decisions that are more favourable to the accused may appear at odds with the superior courts' adjudicatory powers.

6008. But the Special Tribunal is substantially different to such a national court. To the extent that its chambers must put themselves in the place of a national court, they do so in relation to a national legal system with no formal doctrine of binding precedent.

6009. Additionally, even in a legal system featuring that doctrine, if a lower court adopted a particular interpretation of the law so as not to infringe the rights of the accused under international human rights law standards binding their country, a superior court would be obliged to adopt the same approach in order to comply with those standards. In that sense it could be seen to be 'bound' by the lower court's decision, although this is an artificial construct. A simple example of this would be a lower court of a State party to the ICCPR upholding the right, set out in Article 14 (3) (g) of that covenant, not to compel an accused person to testify against themselves. The superior court's obligation to do the same would arise from the binding nature of the covenant itself as well as, potentially, other sources including that country's legislation implementing that covenant, and further, the 'general principle of interpretation common to most States' that the Appeals Chamber mentioned, of construing such legislation in line with the country's international legal commitments.¹⁰⁹⁶⁰

6010. The Special Tribunal must directly apply some principles of international law, notably the guarantees set out in Article 16 of the Statute, even though Article 2 otherwise designates Lebanese law as the applicable law. The hypothetical scenario mentioned above of a domestic court upholding a specific treaty obligation, also illustrates how international law may remain relevant when interpreting domestic criminal law.

¹⁰⁹⁶⁰ First interlocutory decision on applicable law, para. 41 and fn. 63.

6011. However, taking into account applicable and fundamental principles of international human rights law—or indeed general (domestic) criminal law—is different to applying modes of liability that specifically apply in international criminal courts and tribunals to crimes committed in Lebanon in 2004 and 2005. This would also include using foreign and international practice in, for example, the field of counter-terrorism, to define the modes of liability and substantive crimes charged in a case before the Special Tribunal. That, however, is effectively what the Appeals Chamber proposed in its first decision on the applicable law. And, it is emphasised, that this is even in circumstances where the Lebanese Criminal Code recognises those crimes and modes of liability charged, Lebanese law is not unclear, and the Lebanese courts neither inconsistently nor unreasonably interpret it.

6012. No issue appears to have arisen in relation to the concept of committing a crime contrary to Article 3 (1) (a) of the Statute. That is, each Party accepted that the Lebanese law referred to in Article 2 defines that mode of liability.¹⁰⁹⁶¹ Therefore, the only contested issue regarding Article 3 (1) (a) is whether the Trial Chamber should apply the definition of aiding and abetting in Article 219 (4) and of the other, discrete forms of assistance in Article 219 (5) of the Lebanese Criminal Code, or rather a definition used in international criminal law proceedings. And if so, which one, as they differ between international courts and tribunals.

6013. The Appeals Chamber resolved this issue in its first interlocutory decision by examining these two bodies of law, Lebanese and international. It then determined that the Lebanese was more favourable to the accused and hence it should be applied in the proceedings. The Trial Chamber agrees with *this result*, namely that the Lebanese Criminal Code should be applied. For completeness, in light of the disagreement between the Parties regarding this issue, the Trial Chamber will briefly compare the two bodies of law, in relation to accessorial liability.

6014. However, the Trial Chamber again emphasises that nothing in the wording of Article 3 (1) (a) suggests, much less mandates, that a chamber should look to international criminal law case law to determine the meaning of any of the ordinary criminal law concepts already

¹⁰⁹⁶¹ The Sabra Defence made an alternative submission that the Lebanese Criminal Code's definition of a terrorist act should be interpreted in light of international law. Both the Sabra Defence and some other Parties also invoked international law in relation to discrete aspects of the crimes charged in this case. None of these submissions amounted to a challenge to the application of Lebanese law, overall, on either the mode of liability of committing a crime, or the definition of the crimes themselves.

recognised in Lebanese law, of ‘committed, participated as accomplice, organized or directed others to commit the crime’. Doing so may be necessary if a mode of liability that does not appear to form part of Lebanese law, such as that relating to a superior-subordinate relationship referred to in Article 3 (2) were charged. But it has not been. And if the Statute were indeed imposing a novel mode of liability for crimes committed in Lebanon in 2004 and 2005 that did not form part of Lebanese law at the time, the issue of legality would probably arise.

6015. As for the substantive crimes charged in this case, Article 2 of the Statute could hardly express more clearly that the Special Tribunal must apply the Lebanese Criminal Code relating to ‘the prosecution and punishment of acts of terrorism’ and the other crimes specified. Nowhere does it state, imply or even suggest either that a chamber should look outside Lebanon for the elements of the crimes within the Special Tribunal’s jurisdiction, or attempt to apply them to such crimes. In this respect the Statute neither contemplates nor authorises a chamber to examine the law of other states to ascertain the elements of crimes proscribed in Lebanon in 2004 and 2005 and noted in the Statute.

6016. So whether, for example, in those particular years a customary international law definition of the crime of terrorism existed is irrelevant to the Special Tribunal’s function in relation to the ‘prosecution and punishment of acts of terrorism’ as specified in the Lebanese Criminal Code. The Lebanese Criminal Code itself defines the elements of each crime specified in Article 2—as proscribed under that code—namely, terrorism, crimes and offences against life and personal integrity, illicit association and the failure to report crimes. And the Lebanese courts, in the normal exercise of their judicial function, have interpreted and applied them. It may of course have been relevant if there was some clear evidence that such a definition existed in 2004 and 2005 and that States were bound to apply it. But this is not the case.

6017. Hence attempting—by recourse to the laws of other nations and State practice—to divine a definition of an international crime of terrorism, and then potentially apply it to something as basic as the criminal law of a sovereign State, cannot be relevant to the Special Tribunal’s function to try the crimes specified in Article 2.

6018. To determine the elements of the crimes charged in the case, the Trial Chamber accordingly will not look beyond the code itself and any Lebanese judicial decisions defining the crimes,

although these decisions neither bind other Lebanese courts nor the Special Tribunal. Where ordinary methods of interpretation, including recourse to Lebanese case law, fail to resolve any ambiguities in the code, the Trial Chamber will interpret the relevant provisions strictly, in favour of the Accused—and in accordance with the principles of international human rights law—and thus avoid any expansive definition of substantive criminal law provisions.¹⁰⁹⁶²

6019. As this principle is clear, the Trial Chamber sees no need to examine the law or practice of other States or international institutions in defining the elements of the crimes charged or the modes of liability.

B. Modes of liability

6020. Article 3 (1) (a)¹⁰⁹⁶³ is the only part of Article 3, headed ‘Individual criminal responsibility’, that is relevant to the charges in the amended consolidated indictment. The two relevant modes of liability are ‘committing’ and ‘participating as accomplice to commit’ a crime listed in Article 2. Articles 212 and 213, on perpetrators and co-perpetrators, and Article 219 (4) and (5) on accomplices are the relevant provisions of the Lebanese Criminal Code defining those modes of liability.

6021. The Trial Chamber has examined Lebanese judicial interpretations of the modes of committing a crime and participating as an accomplice, in Articles 212, 213 and 219 (4) and (5) of the code. It has also carefully considered the submissions of the Parties and the Appeals Chamber’s analysis in its two interlocutory decisions of the Lebanese case law interpreting these provisions.

6022. The Parties do not differ in their interpretation of the Lebanese case law on Articles 212 and 213,¹⁰⁹⁶⁴ except in relation to conspiracy. The Prosecution prefers a broad interpretation of how a conspiracy is committed, while the Sabra Defence proposes a narrower interpretation. By

¹⁰⁹⁶² The Appeals Chamber termed this principle *favor rei*, while the Trial Chamber has preferred to follow the international case law and to refer to it as a form of *in dubio pro reo*.

¹⁰⁹⁶³ Namely, ‘Committed, participated as accomplice, organized or directed others to commit the crime set forth in article 2 of this Statute’.

¹⁰⁹⁶⁴ Prosecution final trial brief, paras 1141-1142, 1164-1165; Sabra Defence final trial brief, paras 813, 815. No other Party made submissions specifically concerning Lebanese law applicable to commission of crimes under Articles 212 and 213 of the Lebanese Criminal Code.

contrast, the Parties differ significantly in interpreting the Lebanese case law concerning Article 219.

6023. The Parties essentially accept, and in the absence of any reason to find otherwise, the Trial Chamber agrees that Lebanese law governs the modes of liability. It would normally therefore be unnecessary to consider international criminal law principles on this issue. However, as some submissions were made on the intersection of Lebanese and international criminal law principles, the Trial Chamber has also briefly examined international principles.

1. Committing an offence – Articles 212 and 213

Article 212: The perpetrator of an offence is anyone who brings into being the constituent elements of an offence or who participates directly in its commission.

Article 213: Each of the co-perpetrators of an offence shall be liable to the penalty prescribed by law for the offence.

6024. The Lebanese courts recognise that a crime can be committed either by one person or by multiple people acting as ‘co-perpetrators’—a fact that is also evident from the reference to co-perpetrators in Article 213 of the Lebanese Criminal Code.

6025. Of those two forms of commission, sole and co-perpetration, only co-perpetration is charged in this case. Specifically, the four Accused are charged as co-perpetrators in a conspiracy aimed at committing a terrorist act, or in other words as co-conspirators.¹⁰⁹⁶⁵ Mr Ayyash is additionally charged as a co-perpetrator of each of the other crimes alleged: terrorism, intentional homicide and attempted intentional homicide.¹⁰⁹⁶⁶

6026. The Trial Chamber has not identified any Lebanese judicial decision that clearly defines the words in Article 212 of the Lebanese Criminal Code, ‘brings into being the constituent elements of an offence’.¹⁰⁹⁶⁷ In the decisions the Trial Chamber has examined, convictions for co-

¹⁰⁹⁶⁵ Under count 1, amended consolidated indictment, para. 54 (b). The Prosecutor could not have alleged sole perpetration of conspiracy because, by definition, this crime requires at least two perpetrators.

¹⁰⁹⁶⁶ Under counts 2 to 5, amended consolidated indictment, paras 56 (c), 58 (c), 60 (d). In counts 6 to 9, the Prosecutor alleges the other three Accused were accomplices to rather than perpetrators of those other crimes.

¹⁰⁹⁶⁷ The Appeals Chamber’s analysis of Article 212 in its First interlocutory decision on applicable law, paras 213-215 and (regarding perpetration of intentional homicide specifically) para. 157, does not assist in this respect, since it does not examine the meaning of those words. Nor do any of the Lebanese cases cited in that analysis. The Appeals

perpetration appear to have been based on the second part of the definition of ‘the perpetrator’ in Article 212, namely a person who participated directly in an offence’s commission. Some decisions do not clearly distinguish between that part and the first part, namely, ‘anyone who brings into being the constituent elements of an offence’. Instead, they combine the words of both to describe the role of particular co-perpetrators.¹⁰⁹⁶⁸

6027. Others suggest that the phrase ‘who participates directly in its commission’ defines co-perpetrators only, whereas ‘bringing into being the constituent elements of an offence’ is something that only ‘perpetrators’ do.¹⁰⁹⁶⁹

6028. The Lebanese courts clearly accept that a person may be a co-perpetrator of a crime if they had the *mens rea* to commit that particular crime and performed acts sufficient to fulfil the entire *actus reus*, or the material element, of the crime.¹⁰⁹⁷⁰ That is, that person’s own acts would suffice to complete the crime, as for example where two or more people armed with guns attack another and each has the requisite *mens rea* for intentional homicide, but only one fires the fatal shot.¹⁰⁹⁷¹

Chamber did not examine the definition of perpetration in its second interlocutory decision on the applicable law. Several recent Lebanese decisions, from the same judge, seem to suggest the words ‘brings into being the constituent elements of an offence’ mean ‘committing the material element’ of a crime while having the *mens rea* of that crime. The Trial Chamber is unsure whether this is intended to mean simply committing all acts required to fulfil the *actus reus* and *mens rea*, or something else. Single judge decision 179/2015 and—repeating the relevant analysis *verbatim*—Single judge decision 420/2015, Single judge decision 37/2016, Single judge decision 202/2016, Single judge decision 55/2017, Single judge decision 67/2017, none of which concerned any crime charged in these proceedings.

¹⁰⁹⁶⁸ For example, *Murr* Judgment, pp 54-55, in which the court stated it convicted four co-perpetrators of various crimes under Article 213 but described each co-perpetrator as having ‘participated in bringing about elements of the crimes’—words from both parts of the definition in Article 212—and *Karami* Judgment, p. 131, in which the same court relevantly found the accused Mr Ghassan Touma and Mr Ghassan Menassa contributed directly to the crimes of intentional homicide and attempted intentional homicide and thereby brought into being the constituent elements of those crimes as set out in Article 212.

¹⁰⁹⁶⁹ For example, Indictment Chamber decision 37/1994; *Dany Chamoun* Judgment, p. 71; Cassation decision 155/2007. See also the reference to Cassation decision 155/2007 in Prosecution final trial brief, fn. 2436.

¹⁰⁹⁷⁰ Compare First interlocutory decision on applicable law, paras 213-214, finding that under Lebanese law ‘the perpetrator’ ‘must have accomplished the objective and subjective elements of the crime’ and a “core” co-perpetrator ‘executes the same action as the perpetrator’. See also First interlocutory decision on applicable law, para. 217, describing ‘the core concept of co-perpetration’ as being ‘where all actors engage in the objective and subjective elements of the crime’.

¹⁰⁹⁷¹ *Al-Halabi* Judgment, p. 51, finding two of the 20 accused, Mounir Aboud and Ahmad al-Kasm, to be ‘perpetrators within the meaning of Article 212’ of intentional homicide for together firing the gunshots that killed Sheikh al-Halabi; Indictment Chamber decision 37/1994, an interlocutory decision finding that the accused Mr Fadi Maalouf’s fatal shooting of victim Ms Diana Haddad, when he and several other people had gone to her home to rob it, met the requirements of intentional homicide for the purpose of indicting Mr Maalouf. *Al-Rifai and others* Judgment also dealt with a version of this scenario, at pp 1-2, but in a case that concerned only attempted, not realised, intentional homicide. See also First interlocutory decision on applicable law, para. 214. The Appeals Chamber there cited Cassation decision 170/2000, stating, ‘according to the Lebanese Court of cassation, the second defendant who, sharing the same *mens rea*, had fired on the victim who had remained alive after being shot at by the first defendant must be considered as

6029. Lebanese courts also accept other ways of participating directly in the commission of a crime within Article 212. They appear to consider that a co-perpetrator may have the *mens rea* of the crime and have either done a physical act necessary to commit the crime, or have made some other direct contribution to the crime's execution. For example, the Lebanese Judicial Council—a court comprising experienced judges that is specifically mandated to determine to finality cases of serious, security-related crimes¹⁰⁹⁷²—has stated that Article 212 covers:

anyone who commits material acts that *contribute towards creating* the material element of the crime where criminal intent exists, and also anyone who takes positive action which does not contribute to the creation of its basic material element *but leads directly to the commission of the crime by laying the basis for its execution*.¹⁰⁹⁷³

6030. The second type of co-perpetration is only possible if another co-perpetrator, or co-perpetrators, play(s) a different role in executing the crime.¹⁰⁹⁷⁴ For example, in a case of intentional homicide at least one co-perpetrator must do something to cause the victim's death—such as firing the fatal shot—or omit to do something with the same result.¹⁰⁹⁷⁵

6031. A wide variety of conduct can constitute the co-perpetration of terrorist acts, intentional homicides and attempted intentional homicides. The Lebanese courts have found that accused who planned and supervised the acts of other accused were themselves co-perpetrators of those crimes, even when that planner and supervisor neither performed nor was present during the physical

co-perpetrator.' The Trial Chamber agrees with that description but notes the Lebanese court in that decision, at p. 1, found that it was not possible to identify which of the two accused fired the lethal shot.

¹⁰⁹⁷² Lebanese Code of Criminal Procedure, Chapter V, comprising Articles 355-367. The Lebanese Judicial Council is also known as the Court of Justice. Its judgments are not subject to appeal or review. Article 366 of the Lebanese Code of Criminal Procedure, third sentence, refers to this fact, providing, 'The judgments of the Court of Justice are not open to any kind of review of an ordinary or extraordinary nature'.

¹⁰⁹⁷³ *Dany Chamoun* Judgment, p. 71 (emphasis added).

¹⁰⁹⁷⁴ For example, Indictment Chamber decision 37/1994; *Al-Halabi* Judgment, particularly the findings regarding the accused Mr Khaled Hamid at p. 51; the analysis of co-perpetration and comparison of this mode of liability with complicity under Article 219 of the Lebanese Criminal Code in the *Karami*, pp 126-128, 130-132; *Al-Halabi (Saoud)* Judgment. In the latter judgment, at pp 2-3, the court found the accused Mr Yasser Saoud, who had stored weapons at his house and hosted the other co-perpetrators there on one of the days on which they attempted to murder their victim, 'directly participated in the execution of the attempted homicide of Sheikh Nizar al-Halabi, even if he did not bring about himself the elements of the crime. Therefore he is a co-perpetrator in this act as described in Articles 212 and 213 of the Criminal Code and not an accomplice'. See also the Appeals Chamber's statement that Lebanese law provides for 'co-perpetration of collective crimes where each member of a group plays a *different role* in the commission of the crime' in its First interlocutory decision on applicable law, para. 230 (original emphasis).

¹⁰⁹⁷⁵ The causal connection required between the perpetrator's conduct and the victim's death, to fulfil the *actus reus* of intentional homicide under Lebanese law is examined below under the heading of 'Intentional homicide: *actus reus*'.

action that completed the crimes,¹⁰⁹⁷⁶ such as firing the fatal shot or pressing the button on a detonator.¹⁰⁹⁷⁷ However, Lebanese courts consider that to qualify as co-perpetration of a terrorist act, intentional homicide or attempted intentional homicide, contributions must go beyond mere preparations to commit the crime. As one Lebanese Judicial Council judgment found, a co-perpetrator:¹⁰⁹⁷⁸

is a person who commits part of the material element of the offence, performs any of its executive acts *or plays a primary role therein*.

The “primary role” that a co-perpetrator plays in an offence does not concern its material element as defined by the law; it is the role on which all the other acts effectively completing the material element directly depend. The act of a co-perpetrator is aimed directly at committing the offence, thereby transcending the scope of mere preparatory acts. This is corroborated by article 212 of the Criminal Code, which defines the perpetrator of an offence as anyone who brings into being its constituent elements or contributes directly to its commission. The latter direct contribution describes the act of a co-perpetrator who, under article 213 of the Criminal Code, is liable to the penalty prescribed by law for the perpetrator of the offence.

*The criterion used to determine whether an act is directly aimed at committing the offence, in order to establish the status of co-perpetrator, is the same as that used for criminal attempt, i.e. in the normal course of events the act would lead to achievement of the result even if it does not constitute one of its material elements.*¹⁰⁹⁷⁹

6032. The Appeals Chamber noted this Lebanese expansive approach to co-perpetration, stating in its first interlocutory decision that Lebanese law ‘recognises cases where the co-perpetrator

¹⁰⁹⁷⁶ *Murr* Judgment. The court convicted two of the accused, Mr Ghassan Touma and Mr Antonios Elias, as co-perpetrators of intentional homicide, attempted intentional homicide and terrorism on that basis: *see, especially, Murr* Judgment, pp 46-47, 54. *See further* the discussion of this decision below and in the First interlocutory decision on applicable law, para. 215. Other examples of conduct found to constitute co-perpetration of these crimes is examined below.

¹⁰⁹⁷⁷ As the Lebanese Judicial Council found the accused Mr Rushdi Raad had done in *Murr*. *Murr* Judgment, pp 48-49, 55.

¹⁰⁹⁷⁸ Lebanese courts use a range of synonyms for co-perpetration; the court in this decision apparently used the Arabic term for ‘accomplice’ to describe the mode of liability described in Articles 212 and 213 of the Lebanese Criminal Code. To avoid confusion with the mode of liability described in Article 219 of the Lebanese Criminal Code, in the quoted passage the Trial Chamber has substituted the court’s term ‘accomplice’ for ‘co-perpetrator’ wherever appearing.

¹⁰⁹⁷⁹ *Karami* Judgment, p. 126 (emphasis added).

might commit some but not all of the objective elements of the crime, or even provide a supporting or instigative role in the crime without himself committing it'.¹⁰⁹⁸⁰ It also concluded that Lebanese law on this mode of liability should apply in the Special Tribunal's proceedings, provided—relevantly—that this did not lead to treating an accused as a co-perpetrator of terrorism if they lacked the special intent to commit that crime.

6033. In the Trial Chamber's view, the Lebanese judicial interpretation of co-perpetration with respect to terrorism, intentional homicide and attempted intentional homicide appears reasonable and legally sustainable in light of the wording of Articles 212 and 213.

6034. Article 212 contemplates co-perpetrators participating in the commission of an offence in a variety of ways provided that that participation is 'direct'. Lebanese courts appear to consider that every co-perpetrator—whatever their role in committing the offence—must meet the same *mens rea* standard.

6035. But as the *mens rea* of terrorism under Lebanese law includes a special intent, the hypothetical problem the Appeals Chamber raised regarding terrorism does not arise. No Party challenged the Lebanese courts' general approach to co-perpetration in relation to terrorism, intentional homicide and attempted intentional homicide. The Trial Chamber has carefully examined the Lebanese case law and will follow the Lebanese approach to each of those crimes, although it reiterates that it is not bound by any particular Lebanese judicial decision.

6036. The Trial Chamber has been unable to find any Lebanese judicial decisions specifically determining whether all aspects of the concept of 'participating directly in its commission', apply to conspiracy as defined in Article 270 of the Lebanese Criminal Code. This may be because that crime is relatively rarely charged. Conspiracy is also quite different in nature to the other crimes charged in this case, as it essentially consists of concluding an agreement.

6037. The Sabra Defence submits that to be liable, every person accused of co-perpetrating conspiracy must 'personally meet all the objective and subjective elements of the offence'.¹⁰⁹⁸¹

¹⁰⁹⁸⁰ First interlocutory decision on applicable law, paras 215, 230.

¹⁰⁹⁸¹ Sabra Defence final trial brief, para. 817, *see also* paras 814-816.

Although it cited no legal authority for this view, some Lebanese law textbooks, at least, endorse this position.¹⁰⁹⁸² Neither the Appeals Chamber¹⁰⁹⁸³ nor the Prosecution addressed this issue.

6038. The Prosecution noted the Appeals Chamber's definition of co-perpetration generally and stated:

The Appeals Chamber also highlighted that, under Lebanese law, a participant to a crime that requires multiple actors and actions would be guilty as a co-perpetrator of this if he played a principal and direct role in its commission, even if his role did not fulfil all the objective elements.¹⁰⁹⁸⁴

6039. This submission could imply that a co-perpetrator of conspiracy may either bring into being the constituent elements of the crime or otherwise participate directly in the crime's commission. The Trial Chamber, however, disagrees. Given the nature of conspiracy—as an agreement to commit a crime—all five elements of this crime, logically, must be present in relation to every alleged co-perpetrator. The Trial Chamber therefore accepts the Sabra Defence's submission on this issue, emphasising however that this finding concerns only the minimum requirement to establish that an accused person has committed conspiracy.

6040. Lebanese courts accept that conspirators may play different roles in the overall plot—as the judicial decisions on this crime, surveyed below, show—and the Trial Chamber considers this to be a reasonable and legally sustainable interpretation of the Lebanese Criminal Code.

6041. More detailed findings regarding the scope of the crimes charged and thus what can qualify as co-perpetration in respect of each are made below.

¹⁰⁹⁸² For example, El-Zoghbi 1995, Volume 9, Conspiracy, Chapter 2 'Elements of the Conspiracy'.

¹⁰⁹⁸³ Compare the Pre-Trial Judge's interpretation of how the Appeals Chamber's definition of co-perpetration applies to conspiracy in Pre-Trial Judge decision on 5 June 2013 indictment, para. 73. The Pre-Trial Judge stated, referring to the First interlocutory decision on applicable law, paras 213-217, that 'According to the Appeals Chamber, a co-perpetrator must contribute to bringing into being the objective and subjective constituent elements of the crime of conspiracy aimed at committing a terrorist act.' 'Bringing into being the objective and subjective constituent elements of the crime' would appear to refer to the first part of the definition of a perpetrator in Article 212—'anyone who brings into being the constituent elements of an offence'—while the phrase '*contribute to* bringing into being' those elements closely resembles the Lebanese Judicial Council's description of this kind of perpetration in its *Dany Chamoun* Judgment.

¹⁰⁹⁸⁴ Prosecution final trial brief, paras 1141-1142.

2. Accomplice liability

(a) Lebanese law on accomplice liability—Article 219

Article 219: The following shall be deemed to be accomplices to a felony or misdemeanour:

- (1) Anyone who issues instructions for its commission, even if such instructions did not facilitate the act;**
- (2) Anyone who hardens the perpetrator's resolve by any means;**
- (3) Anyone who, for material or moral gain, accepts the perpetrator's proposal to commit the offence;**
- (4) Anyone who aids or abets the perpetrator in acts that are preparatory to the offence;**
- (5) Anyone who, having so agreed with the perpetrator or an accomplice before commission of the offence, helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice;**
- (6) Anyone who, having knowledge of the criminal conduct of offenders responsible for highway robbery or acts of violence against state security, public safety, persons or property, provides them with food, shelter, a refuge or a meeting place.**

i. Introduction: the Lebanese case law

6042. As Mr Merhi, Mr Oneissi and Mr Sabra are charged as accomplices under Articles 219 (4) and (5) of the Lebanese Criminal Code, the Trial Chamber has focused on identifying and examining Lebanese judicial decisions on those Articles; those cited by the Parties or the Appeals Chamber and others that its own research has uncovered.

6043. To some extent, the Parties argued that Lebanese judicial decisions set out principles that apply to Article 219 generally. So did the Appeals Chamber in its first interlocutory decision of 16 February 2011.¹⁰⁹⁸⁵

6044. Several general principles recur in the Lebanese case law. However, from surveying decisions cited by the Parties and Appeals Chamber, the Trial Chamber has concluded that some do not apply to the whole of Article 219, or even to both Articles 219 (4) and (5). Where the decision interprets Articles 219 (4) or (5) only, the Trial Chamber has considered it only in relation to that particular provision.

ii. Article 219 generally

a. *Actus reus* and complicity in attempts

6045. Lebanese courts have stated that the list in Article 219 (1) to (6) is exhaustive and that a person cannot be an accomplice under Lebanese law unless their conduct falls into one of those six categories.¹⁰⁹⁸⁶ Given that its clear wording provides a closed list rather than examples, this is a logical and legally sustainable result.

6046. By definition, to fall under Article 219, a person's conduct cannot amount to either 'bringing into being the constituent elements of an offence or ... [participating] directly in its commission',¹⁰⁹⁸⁷ as this would make the accused a co-perpetrator instead of an accomplice.¹⁰⁹⁸⁸

¹⁰⁹⁸⁵ First interlocutory decision on applicable law, paras 219-223, 228.

¹⁰⁹⁸⁶ *For example*, Indictment Chamber decision 304/1993, pp 3-4; Cassation decision 278/2011; Single judge decision 202/2016; Cassation decision 161/2013, p. 1141, cited in the previous decision; Single judge decision 37/2016; Single judge decision 55/2017; Single judge decision 67/2017. *Compare* Cassation decision 8/2000, finding at pp 1, 5 that Articles 219 and 220 specify exhaustively the acts that will give rise to accomplice liability. Article 220 prescribes different penalties for 'An accomplice without whose assistance the offence would not have been committed' and 'Other accomplices'. The Trial Chamber disregards this finding because Article 220 appears to concern sentencing only and all other Lebanese decisions examined interpret it in that way. Regarding Cassation decision 8/2000's interpretation of the *mens rea* under Article 219. *Compare*, First interlocutory decision on applicable para. 219, fn 329-330, relying on this decision, along with Beirut Court of Appeal decision 277/2007, Cassation decision 112/1974 and a secondary source. *See also* Cassation decision 242/2011, stating that in cases of complicity, a court looks for conditions of complicity the law has provided for, not the elements of the crime in which there was an act of complicity.

¹⁰⁹⁸⁷ Lebanese Criminal Code, Art. 212.

¹⁰⁹⁸⁸ As the Lebanese Judicial Council also stated in the *Karami* Judgment, p. 126. For a more recent application of that principle, *see* Cassation decision 39/2014, p. 1.

Article 219 also applies to attempts to commit crimes,¹⁰⁹⁸⁹ as defined in Articles 200 to 203 of the Lebanese Criminal Code.

6047. The Sabra Defence submits, relying on ‘Lebanese commentary’¹⁰⁹⁹⁰—which is a secondary source—that ‘it must be established that if not for the accomplice’s assistance, the perpetrator would not have been able to execute his crime and according to the manner in which he intended to commit it’.¹⁰⁹⁹¹ However, this interpretation of Article 219 would be inconsistent with both the Lebanese Criminal Code and Lebanese case law if it meant that the crime depends upon the accomplice’s assistance.

6048. Lebanese courts have noted¹⁰⁹⁹² that Article 220 of the code—on the sentencing of accomplices—shows that accomplices are both those ‘without whose assistance the offence would not have been committed’ and ‘other accomplices’.¹⁰⁹⁹³ The former may attract a heavier penalty; for example, they may be sentenced to death if the perpetrator receives a death sentence, whereas other accomplices will be sentenced at most to hard labour for life.¹⁰⁹⁹⁴

6049. In a judgment concerning the 1987 murder of the former Lebanese prime minister, Mr Rachid Karami, the Lebanese Judicial Council stated, regarding Article 219 (4) specifically:

whereas, in contrast to paragraph 1 of article 219, for all the elements of complicity as an accessory to be constituted in the manner set out in paragraph 4 of that article there must be a causal relation between the act performed by the accessory and the act performed by the principal which produced the criminal result, and such a relation requires proof that the

¹⁰⁹⁸⁹ *Al-Halabi* Judgment, p. 53; *Al-Tal Bombing* Judgment, pp 4, 71, 75-76, 81; Single judge decision 202/2016, pp 22-23. See also First interlocutory decision on applicable law, para. 223.

¹⁰⁹⁹⁰ Sabra Defence final trial brief, para. 822.

¹⁰⁹⁹¹ Sabra Defence final trial brief, para. 822, citing Aliya 2002, STL unrevised English translation in annex D to Sabra Defence final trial brief, p. 78. This appears to correspond to p. 337 of the original Arabic text. Counsel for Mr Sabra confirmed in closing submissions that the Sabra Defence was unable to find any further support for this proposition in Lebanese legislation or case law. Sabra Defence closing submissions, T. 21 September 2018, pp 48-49.

¹⁰⁹⁹² Cassation decision 161/2013, cited in Single judge decision 202/2016, p. 20.

¹⁰⁹⁹³ Emphasis added. The relevant part of Article 220 provides, ‘An accomplice without whose assistance the offence would not have been committed shall be punished as if he himself were the perpetrator. Other accomplices shall be punishable by hard labour for life or by fixed-term hard labour for 10 to 20 years if the perpetrator is sentenced to death.’ The *Murr* Judgment (rulings V and VI on p. 63), is an example of a Lebanese judgment explicitly convicting accused of one of the forms of complicity set out in Article 219—specifically, Article 219 (4)—based on the second sentence of Article 220.

¹⁰⁹⁹⁴ This is not relevant to sentencing proceedings before the Special Tribunal.

principal would not have been able to commit the offence *in the way that he did* without the act performed by the accessory.¹⁰⁹⁹⁵

6050. In light of the highlighted words and other relevant Lebanese case law, the Trial Chamber interprets this as stating that the accomplice's conduct must assist in some way, that is, have an (assisting) effect.¹⁰⁹⁹⁶ It does not appear to mean that the crime must always depend upon the accomplice's assistance.

b. Agreement with perpetrator and *mens rea* generally

6051. Some Lebanese judicial decisions suggest that an accomplice must have reached an agreement with the perpetrator before the perpetrator commits the crime. Article 219 (3) and (5) refers to an agreement, Article 219 (3) implicitly and Article 219 (5) explicitly.

6052. The wording of Article 219 (3) suggests the accomplice must enter into an agreement with the perpetrator, stating, 'Anyone who, for material or moral gain, accepts the perpetrator's proposal to commit the offence.'

6053. Article 219 (5) requires the accomplice to enter into an agreement with the perpetrator or another accomplice before the commission of the offence. It states that 'Anyone who, *having so agreed with the perpetrator or an accomplice before commission of the offence*, helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice' will be deemed to be an accomplice.¹⁰⁹⁹⁷

¹⁰⁹⁹⁵ *Karami* Judgment, pp 128-129 (emphasis added).

¹⁰⁹⁹⁶ On the relationship between aiding or abetting under Article 219 (4) and 'assistance'.

¹⁰⁹⁹⁷ Emphasis added.

6054. Some Lebanese judicial decisions implicitly state that an agreement with the perpetrator is necessary for all six categories of accomplice liability listed in Article 219,¹⁰⁹⁹⁸ while a few state this outright.¹⁰⁹⁹⁹ The Trial Chamber noted this in its decision under Rule 167.¹¹⁰⁰⁰

6055. Article 219 (5) requires a prior agreement with the perpetrator *or another accomplice*. Thus, any decision holding that an accomplice must have positively decided in advance with *the perpetrator*—as opposed to a perpetrator *or* another accomplice—on what either of them would do to further a plan for a crime, is inconsistent with that Article.

6056. It would also be difficult to reconcile such a decision with the Lebanese case law on accomplice liability by omission. Lebanese courts have accepted that a person can be an accomplice under Article 219 by failing to take steps to prevent the perpetrator's crime.¹¹⁰⁰¹ Moreover, agreeing with the perpetrator by jointly deciding on a plan is closer to conspiracy under Lebanese law than merely being an accomplice.

6057. The Trial Chamber's conclusion of the prevailing view of the Lebanese case law is that to be an accomplice of any of the six kinds listed, a person need only have a certain level of knowledge of what the perpetrator intends to do, and the consequences of that conduct and their own act or omission, and nonetheless intentionally proceed to carry out that act or omission. They thus 'agree' to their role in the sense that they are aware of and accept those matters. But it is not necessary, for instance, that they explicitly inform the perpetrator of this 'agreement' or that there is any direct evidence of it. The agreement may be inferred from the circumstances.¹¹⁰⁰²

¹⁰⁹⁹⁸ *Zouk Mikayel Church* Judgment, p. 102; Cassation decision 186/2018, p. 1; Cassation decision 38/1999, pp 1-3, 6.

¹⁰⁹⁹⁹ Single judge decision 202/2016, pp 11, 22; Cassation decision 457/2002, cited in First interlocutory decision on applicable law, fn. 328; Cassation decision 458/2002, p. 3, describing the agreement required as 'agreement in intent and intention'. *Compare* Cassation decision 8/2000 finding at p. 5 that an accomplice must 'have known the nature of the means' by which the perpetrator would commit the crime or 'facilitated such means based on a prior agreement' with the principal perpetrator or other accomplices. Both the Merhi Defence and Oneissi Defence cited this aspect of Cassation decision 8/2000. *See also* the Trial Chamber's summary of Cassation decision 8/2000 in its Rule 167 decision, pp 44-45.

¹¹⁰⁰⁰ Rule 167 decision, pp 44-46.

¹¹⁰⁰¹ Cassation decision 64/2013 and Indictment Chamber decision 304/1993. As explained below, the Trial Chamber will not follow Indictment Chamber decision 304/1993 in relation to Article 219 (4). *Compare* the discussion of that decision and other Lebanese case law on omissions in First interlocutory decision on applicable law, para. 223, fn. 336.

¹¹⁰⁰² *Dany Chamoun* Judgment, most notably the findings on pp 72-73 regarding the accused Mr Camille Karam, Mr Jean Chahine and Mr Rafik Saadeh; *Zouk Mikayel Church* Judgment, findings regarding the accused Mr Girgis el-Khoury and Mr Fouad Malek, pp 98-102, 107-109; *Murr* Judgment, findings regarding the accused Mr Naja Kaddoum, Mr Elias Awad and Mr Raji Abdou, pp 56-57; Cassation decision 38/1999, pp 1-3, 5-6; *Al-Tal Bombing*

6058. Lebanese courts also accept that the necessary knowledge and acceptance need not arise or occur long before the crime is completed; some have found it may be either before the perpetrator begins to commit the crime or *during* the crime's commission.¹¹⁰⁰³ Furthermore, if the perpetrator ultimately commits a more serious crime than the perpetrator intended—for example, killing rather than robbing their victim—an accused will still be liable as an accomplice to the more serious crime, provided that they foresaw and accepted the risk that the perpetrator would commit it.¹¹⁰⁰⁴ This is an interpretation of *dolus eventualis* as set out in Article 189 of the code.

6059. In its first interlocutory decision on the applicable law, the Appeals Chamber addressed the concept of an agreement between accomplice and perpetrator, describing it as an 'understanding'

Judgment, findings regarding an unnamed accused minor, p. 81; *Mohammed Chamas and others* Judgment, findings regarding the accused Mr Wissam Ghazi Araabi, Mr Mustafa Omar El-Saiidi, Mr Ayman Fouad Safwan and Mr Saeb Ibrahim El-Daoudouqi, pp 3-5; Cassation decision 106/2017; Assize Court decision 205/2017. In all nine decisions, the Lebanese court found an accused did or did not have the *mens rea* of an accomplice under Article 219 based on whether that accused knew the perpetrator's intentions. *See also* the descriptions of four of these decisions: *Dany Chamoun* Judgment, *Murr* Judgment, *Mohammed Chamas and others* Judgment and Cassation decision 106/2017, in the Oneissi Defence final trial brief, paras 655-657 and Merhi Defence final trial brief, paras 80, 583, 585-586. The Trial Chamber notes however that the Oneissi Defence's description of the *Dany Chamoun* Judgment in para. 657 of its final trial brief appears to concern only the findings regarding the accused Mr Rafik Saadeh, at p. 73 of the judgment, and that both its and the Merhi Defence's references to the *Murr* Judgment in their final trial briefs focus on the findings regarding the accused Manuel Younes—not the findings regarding Mr Naja Kaddoum, Mr Elias Awad and Mr Raji Abdou. *See also* Indictment Chamber decision 304/1993, p. 4, stating that for an omission to constitute complicity under Article 219 (2), 'The accessory must have a criminal intent, i.e. he must be aware of his act, its consequences, the criminal intent of the perpetrator, and accepts that and commits the crime', and Cassation decision 457/2002, stating regarding Article 219 generally, 'the element of complicity to the offence requires prior agreement in intent between the perpetrator and the accomplice ... This has not been proven in the current case.' The Trial Chamber noted these definitions in its Rule 167 decision, pp 45-46, although the record of that decision misquotes the phrase from Cassation decision 457/2002, 'prior agreement in intent', as 'prior agreement or intent'. *Compare*, the reference to an 'understanding' with the perpetrator in the First interlocutory decision on applicable law, paras 219, 228. However, the Trial Chamber notes that its interpretation of Lebanese case law on this issue, referred to above, is similar to the Pre-Trial Judge's summary of paras 221-228 of that decision: 'According to the Appeals Chamber, an accomplice is anyone who must have acted in a form specified by Article 219 of the Lebanese Criminal Code and be motivated by the knowledge of the intent of the primary perpetrators to commit a crime and the intention to assist those perpetrators in carrying out the crime', Pre-Trial Judge decision on 5 June 2013 indictment, para. 56 (footnotes omitted), citing First interlocutory decision on the applicable law, paras 218-228.

¹¹⁰⁰³ Cassation decision 68/2015 regarding Article 219 (5) (emphasis added): 'where the perpetrator agrees with any of the co-perpetrators or accomplices in the crime, before its commission *or during its execution*, on concealing or disposing of items resulting therefrom, shielding one or more of the participants from justice, and eliminating its traces, this constitutes complicity in the crime pursuant to Article 219, paragraph 5 of the Criminal Code.' Similarly, the same chamber in Cassation decision 152/2018, at p. 2, stated of the alleged accomplice and perpetrators that there was no proof of 'a prior agreement between them on any of these crimes, *or at least contemporary with them*, whereby the moral element of collusion is fulfilled in the manner it is provided for in Article 219, paragraph 5, of the Penal Code' (emphasis added). Regarding Article 219 (4), *see also* the examples below of conduct Lebanese courts have found to constitute complicity under that Article.

¹¹⁰⁰⁴ Cassation decision 84/2000, pp 3-4; *Al-Halabi* Judgment, p. 53; *Dany Chamoun* Judgment, p. 74, finding nine of those accused were neither accomplices to nor instigators of the intentional homicide of certain victims because they did not foresee the perpetrators would kill them. *See also* First interlocutory decision on applicable law, paras 221, 233, 260.

and classifying it as one of the ‘objective’ elements of accomplice liability under Lebanese law.¹¹⁰⁰⁵ Meaning the *actus reus* of the offence, or how it is committed—the Appeals Chamber used the terms ‘objective element(s)’, ‘material element(s)’ and *actus reus* interchangeably in its decision.¹¹⁰⁰⁶

6060. The Trial Chamber, however, is not convinced that this is correct. It considers that this element is better characterised as a subjective aspect of this mode of liability, or in other words, an aspect of the *mens rea* needed to be an accomplice. The prevailing interpretation of this element in Lebanese judicial decisions concerns only the accomplice’s state of mind—specifically, their awareness and mental acceptance of certain matters—rather than their actual conduct.

6061. Apart from this difference in characterisation, the Trial Chamber’s interpretation of Lebanese case law on this issue is substantially the same as the Appeals Chamber’s, particularly that in paragraph 220 of its first interlocutory decision. There, regarding complicity under Article 219 generally, it stated, ‘The *subjective* elements are: (i) *knowledge* of the intent of the perpetrator to commit a crime; and (ii) *intent* to assist the perpetrator in his commission of the crime’.¹¹⁰⁰⁷ In paragraph 228 under the heading, ‘Comparison between Lebanese and International Criminal Law’, and following a summary of international criminal law principles, it stated:

¹¹⁰⁰⁵ First interlocutory decision on applicable law, paras 219, 228. The Appeals Chamber cited three Lebanese judicial decisions in support of this conclusion: Cassation decision 457/2002, Cassation decision 30/2003 and Cassation decision 171/2003. However, in written submissions responding to the Oneissi Defence’s application under Rule 167 to enter a judgment of acquittal, the Prosecution argued that two of those decisions—Cassation decision 30/2003 and Cassation decision 171/2003—‘were expressly limited to Article 219 (5)’. F3587/COR, Corrected Version of Prosecution Further Submissions in Response to Oneissi Defence Application for Acquittal Under Rule 167, 1 March 2018, fn. 3. The Trial Chamber was able to obtain only an extract from Cassation decision 30/2003 and Cassation decision 171/2003. Judging by those extracts, the relevant statements of principle in those two decisions concerned Article 219 (5) only, as the Prosecution submitted. The Trial Chamber will therefore take Cassation decision 30/2003 and Cassation decision 171/2003 into account only in relation to Article 219 (5).

¹¹⁰⁰⁶ At para. 89 of the First interlocutory decision on applicable law, it defined *actus reus* as ‘the material element of a crime’ but in other paragraphs it used the term ‘objective element(s)’. See also paras 152-153 and accompanying heading.

¹¹⁰⁰⁷ First interlocutory decision on applicable law, para. 220 (original emphasis), citing in support—in fn. 331—Cassation decision 8/2000, Cassation decision 457/2002 and Cassation decision 171/2003 (misdescribing the year as 2008), and ‘Beirut Criminal court, decision no. 29, 18 December 2007, in *Al-Adel* [Journal of the Beirut Bar], 2008, at 886’. The Trial Chamber has been unable to locate a decision numbered 29 dated 18 December 2007 and, given the similarity of the citation with that of the Appeals Chamber provided in fn. 329 of its decision for Beirut Court of Appeal decision 277/2007, it seems likely the Appeals Chamber intended to refer in its fn. 331 to Beirut Court of Appeal decision 277/2007. However, it is not possible to confirm this from the summary of that decision the Trial Chamber has obtained.

Lebanese law generally requires an accomplice to *know* of the crime to be committed, to join with the perpetrator in an *understanding*, whether immediate or long-standing, to commit the crime, and to share in the intent to further that particular crime.¹¹⁰⁰⁸

This appears to be a brief statement of its conclusions regarding its comparison of ‘the Lebanese notion of complicity’ and ‘the international notion of aiding and abetting’.¹¹⁰⁰⁹ The Appeals Chamber does not, however, cite any legal authority for this passage.

6062. Concerning an accomplice’s intention, the Merhi and Oneissi Defence submit that an accomplice must share the perpetrator’s intent to commit the crime.¹¹⁰¹⁰ This reflects accurately the French translation of paragraph 228 of the Appeals Chamber’s first interlocutory decision, which renders the words ‘*to further that particular crime*’ as ‘*de commettre*’ (literally meaning ‘to commit’). Indeed, counsel for Mr Oneissi quoted that translation in his submissions.¹¹⁰¹¹ However, requiring that the accomplice intends *to commit the crime* is in principle a more onerous standard than that in Lebanese case law and that the Appeals Chamber described in paragraph 220 of its decision, as well as in paragraph 228 of the English original decision, which is authoritative.¹¹⁰¹² The Trial Chamber therefore does not accept this standard and finds instead that under Lebanese law, an intention *to assist in committing* the crime is sufficient.

c. The degree of knowledge of the crime required of an aider and abettor

6063. The Lebanese courts, as is shown above, consider that to satisfy the *mens rea* of Article 219 (4) an accomplice must have some knowledge of the intended crime. But precisely what level of knowledge is necessary requires further analysis. To that end, when determining the

¹¹⁰⁰⁹ First interlocutory decision on applicable law, para. 228.

¹¹⁰¹⁰ Merhi Defence closing submissions, T. 18 September 2018, p. 103 (counsel for Mr Merhi stating, ‘Lebanese law stipulates in general that ... especially the accomplice must share the intent of the perpetrator to commit that same and exact crime’); Oneissi Defence closing submissions, T. 20 September 2018, pp 101-103.

¹¹⁰¹¹ Oneissi Defence closing submissions, T. 20 September 2018 (French), p. 103, lines 12-13 (quoting summary published with French version of the First interlocutory decision on applicable law), lines 17-20 (quoting French version of the First interlocutory decision on applicable law, para. 228).

¹¹⁰¹² First interlocutory decision on applicable law, p. 153, which states, ‘Done in English, Arabic and French, the English version being authoritative.’

Oneissi Defence's application under Rule 167 to enter a judgment of acquittal, the Trial Chamber has examined Lebanese judicial decisions.¹¹⁰¹³

6064. In the amended consolidated indictment, the Prosecutor has pleaded that Mr Merhi, Mr Oneissi and Mr Sabra knew that the co-perpetrators intended to commit the precise crimes alleged. Specifically, the Prosecutor alleges:

- regarding terrorism, that each of the three knew 'that others as co-perpetrators intended to, and on the 14th day of February 2005 then did, commit a terrorist act intended to cause a state of terror by a means liable to create a public danger, namely by means of a large explosive device in a public place';¹¹⁰¹⁴ and
- regarding the intentional homicide of Mr Hariri and 21 other people and attempted intentional homicide of a further 226 people, that:
 - each of the three knew 'that others as co-perpetrators intended to, and on the 14th day of February 2005 then did, commit with premeditation by using explosive materials the intentional homicide of ... Rafik HARIRI',¹¹⁰¹⁵ 'as shown by the large quantity of explosive materials used', each also 'intended, or foresaw and accepted the risk,' that this act would kill¹¹⁰¹⁶ and attempt to kill¹¹⁰¹⁷ others in the vicinity of the explosion, and each of them knew 'the intent of the co-perpetrators to attempt to kill others in addition to killing Rafik HARIRI'.¹¹⁰¹⁸

6065. The Prosecutor also pleads, concerning each count of accomplice liability, that 'together with *shared intent*',¹¹⁰¹⁹ Mr Merhi, Mr Oneissi and Mr Sabra *agreed with the co-perpetrators to*

¹¹⁰¹³ Comprising some Lebanese judicial decisions the Appeals Chamber had cited in its First interlocutory decision on applicable law and some additional decisions the Parties had identified. In several instances, at the time, the Trial Chamber was able to obtain only an extract of the decision, and or a version of it that was not translated into English. This was the case with Cassation decision 135/1995 (extract only, no English translation), Cassation decision 457/2002 (extract only), Cassation decision 171/2003 (extract only) and Cassation decision 30/2003 (extract only), and Cassation 8/2000 (extract only), as noted in the Trial Chamber's Rule 167 decision.

¹¹⁰¹⁴ Amended consolidated indictment, paras 64 (b)-(d).

¹¹⁰¹⁵ Amended consolidated indictment, paras 66 (b)-(d), 68 (b)-(c), 70 (b)-(c).

¹¹⁰¹⁶ Amended consolidated indictment, para. 68 (d).

¹¹⁰¹⁷ Amended consolidated indictment, para. 70 (d).

¹¹⁰¹⁸ Amended consolidated indictment, para. 70 (f).

¹¹⁰¹⁹ Amended consolidated indictment, paras 64 (e), 66 (e), 68 (g), 70 (g) (emphasis added).

perform, and then performed, certain acts preparatory to the offence and acts to shield the co-perpetrators and themselves from justice.¹¹⁰²⁰

6066. However, the Prosecution's submissions responding to the Oneissi Defence's application under Rule 167 argued that—as a matter of law—to establish the liability of Mr Merhi, Mr Oneissi and Mr Sabra as accomplices, it need not be proven that they knew all of these pleaded details.¹¹⁰²¹ This is notwithstanding that the amended consolidated indictment pleads that they knew each of these things. The pleaded list is expressed as a cumulative one.

6067. The Trial Chamber's Rule 167 decision noted that:

The Prosecution ... submitted, orally in court on 21 February 2018 and in its written submission (F3587, dated 27 February 2018, paragraphs 3 to 6), that the knowledge required of an accomplice is only that he or she knew that a crime was to be committed.

That is, an accomplice is not required to have full knowledge of the specific factual details of the crime to be committed. Rather, an accomplice would need to know only the nature of the crime to be committed, for example, knowledge that the perpetrator intended to commit homicide.

According to the Prosecution, the Lebanese case law cited by the Appeals Chamber establishes that an accomplice is required to know how he or she will assist the crime. The Appeals Chamber's reference to knowledge of 'the crime to be committed' in paragraph 228 of its decision should not be read as to heighten the requirement for knowledge, as

- (i) it does not expressly state that an accomplice must know the specific factual details of the crime;
- (ii) the fact that the *mens rea* (the accomplice's intention) of complicity is compatible with the legal requirements for *dolus eventualis* (namely, foreseeing a risk and taking it) which makes clear that the accomplice need not know the exact factual details of the intended crime; and

¹¹⁰²⁰ Amended consolidated indictment, paras 64 (f), 66 (f), 68 (h), 70 (h) (emphasis added).

¹¹⁰²¹ Prosecution submissions, T. 21 February 2018, pp 83-90, 95-96, 100-103; F3587/COR, Corrected Version of Prosecution Further Submissions in Response to Oneissi Defence Application for Acquittal Under Rule 167, 1 March 2018, paras 3-6.

- (iii) the Appeals Chamber's reference to knowledge of 'the crime' merely summarizes its earlier assessment of Lebanese law and should not prevail.¹¹⁰²²

6068. The 'earlier assessment' in (iii) was the Appeals Chamber's description of the subjective elements of complicity in paragraph 220 of the first interlocutory decision on applicable law. This refers to knowledge of the perpetrator's intent to commit '*a crime*', and intent to assist the perpetrator in committing '*the crime*'.

6069. In its oral and written submissions in support of its application under Rule 167, the Oneissi Defence argued that under Lebanese law, an accomplice must know that the perpetrator intends to commit a particular crime.¹¹⁰²³ It relied primarily on paragraph 228 of the first interlocutory decision on applicable law, specifically the statement that 'Lebanese law generally requires an accomplice to know of the crime to be committed, to join with the perpetrator in an understanding, whether immediate or long-standing, to commit the crime, and to share in the intent to further that particular crime.'¹¹⁰²⁴ The Oneissi Defence appeared to interpret this to mean that the accomplice must have a full and precise knowledge of the specific crime to be committed.¹¹⁰²⁵

6070. The Oneissi Defence further submitted, in summary, that in this case Mr Oneissi must have known that an act of terrorism was to be committed,¹¹⁰²⁶ the means that was to be used to perform it¹¹⁰²⁷ and that Mr Hariri was the main target of that act.¹¹⁰²⁸ The Trial Chamber understood this to

¹¹⁰²⁷ Oneissi Defence submissions, T. 21 February 2018, p. 98. *See also* F3586/COR/PRV, Public Redacted Version of "Corrected Version of the Additional Submissions from the Oneissi Defence pursuant to Rule 167 and to the Oral Order of the Trial Chamber dated 22 February 2018 filed on 27 February 2018", 7 March 2018, para. 40.

¹¹⁰²⁸ Oneissi Defence submissions, T. 20 February 2018, pp 71, 81, T. 21 February 2018, p. 100.

mean that the accomplice must have known that Mr Hariri was to be killed in a vehicular bombing.¹¹⁰²⁹ The Oneissi Defence also submitted that it was necessary that Mr Oneissi ‘at least’ knew ‘that the main perpetrator aims at killing, in addition to the main target, everybody else around’.¹¹⁰³⁰

6071. The Trial Chamber’s Rule 167 decision found that the Lebanese case law did not seem to delineate with any clarity or precision the knowledge required for accomplice liability under Article 219 of the Lebanese Criminal Code.¹¹⁰³¹ Further, while the Appeals Chamber’s first interlocutory decision appeared to have concluded that an accomplice must have known that a perpetrator intended to commit a particular crime,¹¹⁰³² it did not examine whether an accomplice must have known the precise factual details of the crime or its minutiae, or the degree of knowledge required to make them criminally liable.¹¹⁰³³ Finally, the Trial Chamber found for the purpose of that decision, regarding each charge of accomplice liability in the case,¹¹⁰³⁴ that:

- it was sufficient for Mr Oneissi, Mr Merhi and Mr Sabra as charged accomplices to have known they were acting pursuant to a plan to commit a terrorist act, namely, to assassinate Mr Hariri by means of a large explosive device in a public place, therefore causing terror, and further that in so doing they were aware that others would die and be injured; and
- they did not need to know details such as where the explosive device would be detonated, the precise location or time or the manner of detonating it, such as on a moving or parked vehicle.¹¹⁰³⁵

6072. Thus the Trial Chamber followed the Appeals Chamber’s apparent interpretation of Lebanese law on this question.¹¹⁰³⁶ The Trial Chamber expressly did so on the basis that that interpretation is reasonable and in the absence of more precise guidance from Lebanese case law.¹¹⁰³⁷ As it has stated subsequently, by doing so, the Trial Chamber also ‘in essence, did not

¹¹⁰²⁹ As the Trial Chamber stated in its Rule 167 decision, p. 41.

¹¹⁰³³ Rule 167 decision, p. 44.

¹¹⁰³⁴ The Trial Chamber found that for the purpose of its Rule 167 decision, the knowledge required for the purpose of the conspiracy charge was identical to that required for the purpose of the complicity charges.

¹¹⁰³⁵ Rule 167 decision, pp 47-50.

¹¹⁰³⁶ Rule 167 decision, p. 47.

¹¹⁰³⁷ As it stated in its Rule 167 decision, pp 46-47.

disagree with the Oneissi Defence submissions on the ambit of Article 219, and adopted a more restrictive interpretation than that argued by the Prosecution'.¹¹⁰³⁸

6073. The Trial Chamber received additional submissions from the Parties on the knowledge required of an accomplice under Lebanese law, in their final trial briefs and oral closing submissions. The Trial Chamber also examined as many additional Lebanese judicial decisions on Article 219 as it could find. Because of their volume, the Trial Chamber will not address each individual submission but instead summarises the Parties' submissions on how to interpret the Lebanese case law.¹¹⁰³⁹

6074. The Prosecution submits that an accomplice to a terrorist act needs to know only that the perpetrators intend to commit an act 'through means that are liable to create a public danger and with the intent to cause a state of terror'.¹¹⁰⁴⁰ An accomplice to intentional homicide or attempted intentional homicide need know only that the perpetrators intend to commit an act aimed at impairing the life of a person¹¹⁰⁴¹—not the actual means to be used to do that.¹¹⁰⁴² In neither case does the accomplice need to know the identity of the targeted victim(s) or the place or time at which the crime is intended to be committed.¹¹⁰⁴³ It characterised Lebanese judgments finding accomplices in fact had detailed knowledge of the intended crime as 'cases where that knowledge was found to be sufficient but not necessary to obtain a conviction'.¹¹⁰⁴⁴

6075. In the Prosecution's submission, therefore, the difference between Lebanese judgments on this issue consists of 'different factual findings',¹¹⁰⁴⁵ not any 'inconsistency',¹¹⁰⁴⁶

¹¹⁰³⁸ Decision denying Oneissi Defence certification to appeal (non-acquittal under Rule 167), para. 16.

¹¹⁰³⁹ The Merhi and Oneissi Defence relied only on this case law, and the First interlocutory decision on applicable law, to interpret Article 219, whereas both the Prosecution and Sabra Defence also referred to international criminal law case law.

‘discrepancies’¹¹⁰⁴⁷ or ‘difference in Lebanese law as to the legal requirement’.¹¹⁰⁴⁸ The Prosecutor further explained, ‘There is no particular pronouncement that is contradicted by other pronouncements of the law, as I understand it.’¹¹⁰⁴⁹

6076. Both the Merhi¹¹⁰⁵⁰ and Sabra Defence¹¹⁰⁵¹ argue that in this case, to be an accomplice, an accused must have known the perpetrators of the alleged terrorist act, intentional homicide and attempted intentional homicide intended to use explosive materials, specifically, to commit those crimes. The Merhi Defence also submits that the alleged accomplices must have known ‘the quantity of explosives’ intended to be used.¹¹⁰⁵² The Merhi Defence does not specify how precise the knowledge of the quantity must be, such as to the kilogram. The Oneissi Defence submits that accomplices to a crime must either know of the means to be used to commit it or—presumably referring to complicity under Article 219 (5)—have facilitated such means on the basis of a prior agreement with the perpetrator of the crime or with the other accomplices.¹¹⁰⁵³ Counsel for each submit that accomplices to the crimes charged legally must have known the identity of the target of the alleged operation, namely Mr Hariri.¹¹⁰⁵⁴

6077. The Oneissi Defence also submits, more generally, that:

- complicity under both Article 219 (4) and (5) ‘requires prior knowledge of the criminal activity of the perpetrator of the crime’;¹¹⁰⁵⁵

¹¹⁰⁵⁵ Oneissi Defence final trial brief, para. 649, citing First interlocutory decision on applicable law, para. 219 (emphasis omitted).

- an accomplice must have ‘a detailed knowledge of the perpetrator’s intent’,¹¹⁰⁵⁶ and
- ‘under the Lebanese law on complicity, it must ... be proven that the accomplice knew of the crime to be committed, of the means to be used to this end, and of the perpetrator’s intent to commit that particular crime’.¹¹⁰⁵⁷

6078. The Merhi and Oneissi Defence further submit that the accused must know the important and main details of the intended crime (Merhi Defence)¹¹⁰⁵⁸ and all the ‘specifics and details’ of the particular crime intended (Oneissi Defence).¹¹⁰⁵⁹

6079. However, lead counsel for Mr Merhi confirmed in oral closing submissions that the Merhi Defence does not argue that the law requires the accomplice to know ‘the small details’.¹¹⁰⁶⁰ He also conceded specifically that an accomplice alleged to be involved in a conspiracy, as in this case, need not know the identities of all of the co-conspirators.¹¹⁰⁶¹ As for the Oneissi Defence, based on its written submissions,¹¹⁰⁶² the Trial Chamber understands its position to be, more specifically, that Mr Oneissi must have at least known in advance that the perpetrators were going to detonate a large quantity of explosives in a public place and that their intention in doing so was to kill Mr Hariri and to create a state of terror.

6080. The Sabra Defence submits that, at a minimum, in addition to knowing the perpetrators intended to use explosive materials and to kill Mr Hariri, the accused must know they were acting pursuant to a plan to do so in a public place, thereby causing terror, and that others would die and be injured. In other words, the minimum knowledge required to convict the Accused as accomplices to the crimes alleged was that which the Trial Chamber found in its Rule 167 decision.¹¹⁰⁶³

¹¹⁰⁶¹ Merhi Defence closing submissions, T. 18 September 2018, p. 107.

¹¹⁰⁶² Particularly Oneissi Defence final trial brief, para. 661, entitled ‘Conclusion’.

¹¹⁰⁶³ Sabra Defence final trial brief, paras 827-828.

6081. As part of its submissions on the Prosecution's alleged failure to prove Mr Sabra's liability—separate to the submissions on the law on accomplice liability—the Sabra Defence argues:

If it is now the Prosecution's case that SABRA is alleged to have produced the FCR-Tape, *this would still not fulfil the requisite knowledge requirement given that there is no indication from the text of the FCR-Tape of either the means to be used for the terrorist attack, or the date on which it would be undertaken – both of which are considered by the Chamber to be necessary elements to establish knowledge.*¹¹⁰⁶⁴

6082. No legal authority was cited in support of this. It is unclear what the highlighted words refer to; as stated earlier the Trial Chamber did not find in its Rule 167 decision that an accomplice must know the date of the intended attack to be liable. Moreover, as noted, the Trial Chamber does not now accept that knowledge of this detail is required with respect to either the complicity or the conspiracy charges.

6083. The Oneissi Defence also submits that to satisfy Article 219 (5) specifically, an accused accomplice must know concerning the intended crime: 'its means, the timing, materiality, content and level of details of these instructions'.¹¹⁰⁶⁵ In this case, Mr Oneissi must have agreed before the attack to materially assist in the preparation and dissemination of a 'false claim' of responsibility for it, 'knowing that it would shield the perpetrators'.¹¹⁰⁶⁶

6084. None of these additional submissions, nor any of the additional judicial decisions cited, have altered the Trial Chamber's conclusion that Lebanese case law offers limited guidance on this issue. The Trial Chamber is still unaware of any Lebanese court clearly and precisely stating what, at a minimum, an accused person must know about the perpetrators' intended crime before it is committed, to be an accomplice under Article 219 (4) or (5). Lebanese case law accordingly is of limited assistance in defining this element of accomplice liability under those Articles. The Trial Chamber therefore also agrees with the Prosecution's submission that there is no 'difference'

¹¹⁰⁶⁴ Sabra Defence final trial brief, para. 865 (emphasis added), with 'FCR' meaning 'false claim of responsibility'.

¹¹⁰⁶⁵ Oneissi Defence final trial brief, para. 699.

¹¹⁰⁶⁶ Oneissi Defence final trial brief, para. 662.

in Lebanese judgments on accomplice liability, to the extent that there are no explicit pronouncements on the law, in those judgments, that contradict one another.

6085. At most, the case law on Article 219 (4) and (5) suggests certain features in addition to those already identified, about the knowledge required specifically of a person who aids or abets in acts preparatory to the relevant crimes, or by prior agreement helps to eliminate their traces, conceal or dispose of items resulting from them or shield their participants from justice.

iii. Article 219 (4) specifically

6086. The Trial Chamber has found extensive Lebanese case law on Article 219 (4), ‘**Anyone who aids or abets the perpetrator in acts that are preparatory to the offence**’. There are numerous decisions on complicity in terrorism, intentional homicide and or attempted intentional homicide cases.

6087. Lebanese courts interpret the *actus reus* of Article 219 (4) broadly. Their decisions consistently interpret ‘aiding or abetting’ as being synonymous with assisting,¹¹⁰⁶⁷ helping¹¹⁰⁶⁸ or facilitating.¹¹⁰⁶⁹ However they adopt diverse approaches in interpreting ‘acts preparatory to the offence’ and the relationship between this and ‘aiding or abetting’.

6088. None of the decisions of which the Trial Chamber is aware clearly defines what an ‘act preparatory to the offence’ is. Some paraphrase those words as, simply, preparing for the offence;¹¹⁰⁷⁰ others suggest the term includes acts that facilitate the commission of the offence.¹¹⁰⁷¹

¹¹⁰⁶⁷ *Dany Chamoun* Judgment, pp 71-72; *Zouk Mikayel Church* Judgment, p. 108; Cassation decision 38/1999, p. 6; Cassation decision 457/2011, p. 10.

¹¹⁰⁶⁸ *Zouk Mikayel Church* Judgment, p. 101; Cassation decision 38/1999, p. 6; Cassation decision 457/2011, p. 10; Cassation decision 64/2013, p. 1; Cassation decision 39/2014, p. 1; Cassation decision 113/2014, pp 1-2.

¹¹⁰⁶⁹ *Dany Chamoun* Judgment, pp 71-72; Cassation decision 38/1999, p. 6; *Murr* Judgment, p. 56; *Karami* Judgment, p. 128.

¹¹⁰⁷⁰ Indictment Chamber decision 304/1993, p. 3.

¹¹⁰⁷¹ Cassation decision 224/2011, p. 1, and Cassation decision 342/2012, in each of which the chamber stated the accused assisted the perpetrator by acts that aided and abetted the relevant crime; *Al-Halabi* Judgment, p. 52, describing the accused Mr Rabih Nabah’s and Mr Wasim Abd al-Mo’ti’s role as aiding the acts that paved the way for and facilitated the perpetration of the relevant crime. *See also Karami* Judgment, pp 128-129. The Lebanese Judicial Council there described Mr Aziz Saleh’s and Mr Joseph Sukkar’s filming of certain events as ‘material acts facilitating the commission of the assassination with its ensuing consequences and forming part of the material elements of complicity as an accessory as defined in paragraph 4 of Article 219 of the Criminal Code’ (emphasis added), but determined those two accused were not accomplices because their acts had not ‘played any role in enabling the principals to perpetrate and complete their offence’.

Others yet suggest a preparatory act is distinct from one that facilitates a crime, but that to fulfil the *actus reus* of Article 219 (4) it is sufficient to aid or abet either kind of act.¹¹⁰⁷²

6089. The specific conduct that Lebanese courts have found fulfils the *actus reus* of complicity in committing terrorist acts, intentional homicides and attempted intentional homicides, under Article 219 (4), ranges from discrete acts clearly performed at the planning stage, to more significant participation and acts contemporaneous with committing the crimes. Examples include:

- planning specifically how those crimes would be committed, giving instructions to perpetrators and other accomplices about that and supervising their training in the use of weapons for that purpose. In a judgment concerning the 1990 assassination of Mr Dany Chamoun, the National Liberal Party leader, the Lebanese Judicial Council found the accused, Mr Tony Obeid, had done all of these things before the assassination. The Council convicted him of complicity in Mr Chamoun's intentional homicide on the basis of both this conduct and some other acts, described later in this paragraph;¹¹⁰⁷³
- collecting information about the location of the intended terrorist act or homicide or its intended victim(s)—for example by conducting surveillance¹¹⁰⁷⁴—and or providing that information to the perpetrators;¹¹⁰⁷⁵

¹¹⁰⁷² Cassation decision 38/1999, pp 2-3, 6; Cassation decision 113/2014, pp 1-2; Cassation decision 92/2016, p. 1; Cassation decision 186/2018, p. 1. *Compare* Cassation decision 237/2013, pp 2-3 and Cassation decision 106/2017, pp 2-3, in each of which the Chamber found the accused's conduct both contributed to the preparations for the relevant crimes and aided and abetted in their commission.

¹¹⁰⁷³ *Dany Chamoun* Judgment, pp 28-30, 72. The same court also convicted four accused for participating in both planning specifically how an intentional homicide, attempted intentional homicides and terrorism would be committed, and information-gathering for those crimes, in its *Karami* Judgment, p. 132.

¹¹⁰⁷⁴ *Murr* Judgment, pp 49-50, 56, regarding complicity in intentional homicide and attempted intentional homicide of two of the 12 accused, Mr Elias Awad and Mr Naja Kaddoum). *See also* Cassation decision 209/2013, p. 1321, cited in Single judge decision 202/2016, p. 21, in which the Chamber found 'monitoring' to constitute complicity under Article 219 (4).

¹¹⁰⁷⁵ *Dany Chamoun* Judgment, pp 28-30, 72 (complicity in intentional homicide of one of the 13 accused, Mr Tony Obeid, for this among other conduct); *Zouk Mikayel Church* Judgment, pp 100-101 (complicity in terrorism and intentional homicide of one of the seven accused, Mr el-Khoury, for this conduct, in combination with attending meetings held to plan the operation and helping to assemble one of the explosive devices used in it); *Karami* Judgment, pp 132, 142 (complicity in intentional homicide, attempted intentional homicide and terrorism of four of the 17 accused, Mr Antonio Elias Elias (alias Tony Obeid), Mr Assaad Kassab, Mr Elias Kassab and Mr Gaby Touma, for this conduct in combination with helping to formulate the plan for committing those crimes, and of two others, Mr Mikhael Saneh and Mr Georges Zoghby, for this conduct alone). *See also* *Karami* Judgment, pp 128-129, finding regarding two additional accused, Mr Aziz Saleh and Mr Joseph Sukkar, that either engaging in such conduct or

- obtaining for the perpetrators, and or providing to them, materials either needed to commit the crime or to make it easier to do so, such as weapons,¹¹⁰⁷⁶ ammunition,¹¹⁰⁷⁷ components of explosive devices¹¹⁰⁷⁸ or disguises;¹¹⁰⁷⁹
- storing/hiding such materials for the perpetrators;¹¹⁰⁸⁰
- meeting the ‘everyday needs’ of several members of the *Al-Qaeda* organisation in the period before they murdered and attempted to murder a number of Lebanese soldiers and civilians, ‘by opening fire against them using weapons and hand grenades’, after the soldiers found and surrounded the flat in Lebanon where those *Al-Qaeda* members were hiding;¹¹⁰⁸¹
- helping a perpetrator—the accomplice’s brother—to disguise himself by shaving his beard and putting on a Lebanese army uniform, shortly before he took a suitcase containing explosives to the *Al-Tal* district in Tripoli, ‘where Lebanese Army soldiers were gathered to head to their respective posts’, then detonated it remotely,¹¹⁰⁸² killing 13 people and injuring 46 more;¹¹⁰⁸³

guarding the person who did so would have fulfilled the *actus reus* of complicity, if those acts had facilitated commission of the crimes. *See also* First interlocutory decision on applicable law, para. 224.

¹¹⁰⁹⁰ *Dany Chamoun* Judgment, pp 28-30, 71-72 (complicity in intentional homicide of five of the 13 accused, namely Mr Elie Akiki, Mr Georges Feghali, Mr Camille Karam, Mr Jean Samia and Mr Farid Saadeh, for such conduct); *Al-Halabi* Judgment, pp 52-54 (complicity in intentional homicide and attempted intentional homicide of two of the 20 accused, Mr Rabih Nabah and Mr Wasim Abd al-Mo’ti, for such conduct in combination with having ‘acted as a motorcycle escort to the car carrying the perpetrators’ to the scene of the crime).

6090. The Merhi Defence cited some of these examples¹¹⁰⁹¹ and submits that they show that only positive, concrete action can be ‘aiding or abetting’.¹¹⁰⁹² If this submission is intended to mean one could never be an accomplice under Article 219 (4) on the basis of an omission, the Trial Chamber rejects it.

6091. In the vast majority of the Lebanese decisions on Article 219 (4) the Trial Chamber has examined, the conduct constituting aiding or abetting was a positive action rather than an omission. However, none of the Lebanese judicial decisions the Merhi Defence cited states that positive action is legally required to satisfy Article 219 (4). Moreover, the Trial Chamber is aware of only one Lebanese judicial decision explicitly stating that such a requirement exists. It is a 1993 decision of a Lebanese indictment chamber that considered whether an accused person, whom the chamber found was ‘passively present’ when her brother shot her husband, was complicit in her husband’s attempted murder for failing to take steps to prevent it.

6092. The indictment chamber briefly discussed each of the six forms of complicity set out in Article 219 and found that none applied in this case. Its entire analysis of Article 219 (4) was:

Whereas by virtue of paragraph (4) of Article 219 of the Criminal Code, aiding and abetting the perpetrator in acts that are preparatory to the crime, supposes that the accessory carry out a positive act that may aid or abet the perpetrator in preparing the crime; and whereas the investigations did not prove that the Defendant wife carried out such a positive act.¹¹⁰⁹³

The chamber did not cite any legal authority for this statement.

6093. The Appeals Chamber in its first interlocutory decision on applicable law did not address the issue of whether Article 219 (4), specifically, extends to omissions. Instead, it stated generally:

Lebanese case law has specified that ... complicity may consist of an omission, in which case the accomplice is punished if he was duty bound to prevent commission of the crime

¹¹⁰⁹¹ Providing materials—specifically ammunition, weapons, money or explosives—to, or obtaining or hiding them for the perpetrators, and accompanying the perpetrators to a shop where they killed their victims and helping them to gain entry to that shop. Merhi Defence final trial brief, para. 483. The Merhi Defence also referred to transporting certain materials for the perpetrators, and cited an example of conduct constituting complicity in a crime not charged in this case, namely ‘driving the vehicle during the robbery, waiting while the robbery takes place’, referring to Cassation decision 92/2016.

¹¹⁰⁹² Merhi Defence final trial brief, paras 483-484.

¹¹⁰⁹³ Indictment Chamber decision 304/1993, p. 4 (emphasis omitted).

and has refrained from accomplishing his duty (this for instance applies to police officers), or where the passive conduct of the accomplice amounts to strengthening the resolve of the perpetrator to commit a crime.¹¹⁰⁹⁴

6094. The only examples and authorities the Appeals Chamber cited in support of this statement appear to relate to the second scenario—strengthening the perpetrator’s resolve—which is the subject of Article 219 (2) of the Lebanese Criminal Code, and is not charged in this case.¹¹⁰⁹⁵ The 1993 indictment chamber decision described above was one of the authorities the Appeals Chamber cited in this connection,¹¹⁰⁹⁶ but it does not deal with a duty to prevent the commission of a crime. The indictment chamber’s description of ‘passive’ conduct capable of constituting complicity is explicitly confined to Article 219 (2).¹¹⁰⁹⁷

6095. The view that positive action is always necessary is contrary to some other Lebanese case law on Article 219 (4). Specifically, a 2013 Lebanese decision that the Trial Chamber has found from its own searches determined that an accused who failed to help a person who was being strangled aided and abetted in acts preparatory to intentional homicide, under that Article.¹¹⁰⁹⁸

6096. Finally, and most decisively, an alleged accomplice’s omission could conceivably assist the preparation for a crime. For instance, a security guard’s failure to report an intruder’s presence, thereby facilitating the theft of materials required to make an explosive device to use in a terrorist act, or their surveillance of the intended location of the explosion. The wording of ‘aids or abets’ in Article 219 (4) supports this interpretation. Thus, the Trial Chamber adopts it.

6097. The Trial Chamber further concludes, regarding the *actus reus* of Article 219 (4), that the Lebanese case law is inconsistent on whether the conduct of the accused accomplice must occur at a preparatory stage. However, the dominant approach in the Lebanese case law is not to differentiate strictly between preparatory and commission stages, but instead to find that the *actus reus* exists if the accused’s conduct facilitated either or both stages.

¹¹⁰⁹⁴ First interlocutory decision on applicable law, para. 223 (footnotes omitted).

¹¹⁰⁹⁵ First interlocutory decision on applicable law, fn. 336.

¹¹⁰⁹⁶ First interlocutory decision on applicable law, fn. 336, misdescribing the judgment date as 21 October 1995.

¹¹⁰⁹⁷ Indictment Chamber decision 304/1993, p. 4.

¹¹⁰⁹⁸ Cassation decision 64/2013, p. 1. The published extract of this decision does not provide any additional information about the circumstances of the victim’s killing, other than that the perpetrator and the accomplice had planned to steal from the victim and did in fact steal from him after his death.

6098. In its first interlocutory decision on applicable law, the Appeals Chamber seemed to accept that an accomplice under Article 219 (4) may facilitate the commission of, rather than the preparation for, an offence. It stated, regarding the *actus reus* of Article 219, ‘the assistance can be provided (i) before the crime, such as in the examples mentioned under subparagraphs 1, 2 and 3, (ii) *during the perpetration of the crime, amounting to the sole example under subparagraph 4*, or (iii) thereafter, as in subparagraphs 5 and 6’.¹¹⁰⁹ But the Appeals Chamber did not cite any legal authority for that statement.

6099. The Merhi Defence submits:

the Prosecution has failed to prove that Merhi ... had the intention of aiding the perpetrators *in committing* the crime using an explosive device. That interpretation is also confirmed by the Judgement of the Judicial Council in the case relating to the attack against Minister Michel Murr.¹¹¹⁰

In support, the Merhi Defence cites a second Lebanese Judicial Council judgment, the *Dany Chamoun* case.¹¹¹⁰¹ However, these two judgments do not appear to the Trial Chamber to suggest that an accomplice under Article 219 (4) must aid in the commission of the relevant crime rather than its preparation—if that is indeed what the Merhi Defence meant, which is unclear. Instead, both judgments are somewhat ambiguous on this issue, seeming to characterise the same conduct as both assistance in preparing for crimes and assistance in committing them.

6100. The *Murr* Judgment, delivered by the Lebanese Judicial Council in 1997, concerns the attempted assassination of the Lebanese Minister of Defence, Mr Michel Murr.¹¹¹⁰² The facts in *Murr* have some similarities to those alleged in the *Ayyash and others* case. These involved an explosion in Beirut in 1991, on a weekday morning, of a car booby-trapped with explosives, on

¹¹⁰⁹ First interlocutory decision on applicable law, para. 219 (emphasis added).

¹¹¹⁰ Merhi Defence final trial brief, para. 583 (emphasis added), citing *Murr* Judgment, pp 38-39 (which, as earlier stated, contain the findings regarding the accused Mr Manuel Younes) and *Dany Chamoun* Judgment, pp 75-78.

¹¹¹⁰¹ Merhi Defence final trial brief, fn. 1102, citing *Dany Chamoun* Judgment, pp 75-78.

¹¹¹⁰² The Trial Chamber referred to this judgment in its Rule 167 decision, pp 41, 46, stating that the judgment did not assist in determining the required level of knowledge for accomplice liability because it involved a situation in which an alleged accomplice had no knowledge of the perpetrator’s criminal intent. These references related specifically to one of the 12 accused, Mr Manuel Younes, and the Lebanese Judicial Council’s finding that there was insufficient evidence to prove he knew any details of the perpetrators’ plan. *See also Murr* Judgment, pp 20-21, 37-39, 62. The Merhi and Oneissi Defence referred to the findings regarding that accused in their final submissions. Merhi Defence final trial brief, paras 80, 583; Oneissi Defence final trial brief, para. 656.

the route along which Mr Murr's vehicle convoy was passing. Mr Murr survived but seven others were killed and about 25 others were injured. Nine days later, a second booby-trapped car exploded, killing and injuring several more people. The Lebanese Judicial Council found this second explosion was deliberately triggered to eliminate the traces of the attempted assassination operation.¹¹¹⁰³

6101. In *Murr*, the Lebanese Judicial Council considered the criminal responsibility of 12 people accused of participating, in various ways, in that operation. It found that two of those accused, Mr Elias Awad and Mr Naja Kaddoum, had been assigned to investigate and monitor Mr Murr's movements.¹¹¹⁰⁴ In convicting Mr Awad and Mr Kaddoum as accomplices in intentional homicide and attempted intentional homicide, under Article 219 (4), the Council concluded they had '*participated in the preparation of the crimes of homicide and attempted homicide committed by the other accused through their surveillance of the movements of Minister Michel Murr's escort, which made it possible to execute the plan to assassinate him*'. But the Council also found that those two accused were '*fully aware that the purpose of their acts was to facilitate the assassination operation*'.¹¹¹⁰⁵

6102. The passage most relevant in the *Dany Chamoun* judgment to the question of whether an accomplice under Article 219 (4) may assist in commission, preparation or both, concerns a different accused, Mr Jean Chahine. It describes him as having known that uniforms he provided would '*facilitate the commission of the crime*', but then states that he was complicit in that crime '*through the provision of assistance for the acts that were being prepared*'.¹¹¹⁰⁶

6103. The interpretation that a person can be an accomplice under Article 219 (4) for aiding or abetting *in the commission of the offence*, rather than in its preparation, also diverges from the wording of the Lebanese Criminal Code.

6104. The code distinguishes on the one hand between the commission of a crime—also known as its execution—and on the other, acts preparatory to that crime. Article 219 itself does so, by

¹¹¹⁰³ *Murr* Judgment, pp 4, 16, 51.

¹¹¹⁰⁴ *Murr* Judgment, pp 19-20.

¹¹¹⁰⁵ *Murr* Judgment, p. 56 (emphasis added).

¹¹¹⁰⁶ *Dany Chamoun* Judgment, p. 72.

using ‘commit/commission’ of ‘the offence’ in several sub-paragraphs—(1), (3) and (5)—in contrast to ‘acts that are preparatory to the offence’ in (4).

6105. Other provisions of the code, on which the Prosecutor does not rely, also point to the existence of a legal distinction between the two. Article 272, for example, states that ‘Anyone who takes part in a conspiracy against state security and who reports it to the authorities before the commencement of any *act preparatory to its execution* shall be exempt from punishment’ while Article 549 (2) provides that ‘Intentional homicide shall entail the death penalty if it was committed ... to *prepare for, facilitate or execute* a felony’.¹¹¹⁰⁷ In addition, as explained below, Lebanese courts clearly interpret preparatory acts as distinct from the start of ‘commission’ of a crime for the purpose of the law on criminal attempts.

6106. Moreover, the Trial Chamber has concluded that Lebanese judicial decisions vary on whether the same conduct will amount to complicity—that is, being an accomplice to the crime, only—or commission of a crime. These include decisions of the Lebanese Judicial Council. That court has found that some of the acts described above were not ‘preparatory’, but instead acts directly contributing to committing a terrorist act, an intentional homicide and attempted intentional homicides—making those who performed those acts co-perpetrators, not accomplices.

6107. For example, the Lebanese Judicial Council in its 1999 judgment concerning the 1987 murder of former Lebanese prime minister, Mr Rachid Karami, made that finding against two accused charged as accomplices. Mr Karami was killed, and several others were injured, by an explosion in their helicopter. The Lebanese Judicial Council seems to have convicted Mr Afif Khoury and Mr Khalil Matar as co-perpetrators of terrorism, intentional homicide and attempted intentional homicide in relation to that explosion because, in addition to having the *mens rea* for each crime, Mr Khoury participated in reconnaissance operations before the day of the explosion

¹¹¹⁰⁷ Emphasis added. The Appeals Chamber both acknowledged that Lebanese law distinguishes between preparatory acts and commission of a crime, and interpreted one further provision of the Lebanese Criminal Code not charged in this case—Article 335—as describing the former. Article 335 concerns ‘two or more persons establishing an association or entering into a written or oral agreement with a view to commit felonies against persons or property, or to undermine the authority of the State, its prestige or its civil, military, financial or economic institutions’. The Appeals Chamber relevantly stated, ‘Article 335 aims at preventing serious offences by criminalizing preparatory steps to commit offences of a particular gravity that would otherwise not be punishable in the absence of implementing acts’ and, in a footnote, elaborated: ‘For instance, purchasing a gun to commit murder is a preparatory act and not the beginning of the execution of the crime. As such, it cannot be punished unless it constitutes a crime in itself, such as a violation of a prohibition to carry weapons.’ Second interlocutory decision on applicable law, para. 58, fn. 66.

then, on that day, drove a boat from which the explosive charge was detonated remotely, while Mr Matar tracked the target helicopter from that boat using a transceiver and alerted another co-perpetrator as soon as it reached a particular location, enabling that co-perpetrator to detonate the charge at the appropriate moment.¹¹¹⁰⁸

6108. This however appears to depart from the strict wording of Article 219 (4), which states, ‘Anyone who aids or abets the perpetrator in acts that are preparatory to the offence’. The Trial Chamber interprets it to mean that the conduct of the accused accomplice must aid or abet the perpetrator’s or co-perpetrators’ *preparation for* the crime.

6109. From the Lebanese case law surveyed, to aid or abet that preparation, the accused’s conduct must somehow facilitate it. The facilitation, however, need not reach the level of ‘assistance without which the offence would not have been committed’.¹¹¹⁰⁹ The Trial Chamber accepts, in addition, that diverse acts may qualify and that whether they will make the accused an accomplice, a perpetrator or not criminally liable at all may depend significantly on the factual circumstances of the case—including, of course, precisely what that person intended and knew.

6110. Regarding the knowledge required of an accomplice under Article 219, and particularly one who aids or abets in acts preparatory to the crimes charged in this case, the Trial Chamber has identified the following four relevant features in Lebanese case law.

6111. The first, included in some Lebanese case law on Article 219 (4) and terrorism, specifically, suggests that an aider or abettor to acts preparatory to a terrorist act must know the specific means used to commit the act. A notable example is the *Murr* Judgment. The Oneissi Defence relied on a short extract from the judgment in its Rule 167 submissions. The Trial Chamber, however, found that it did not assist in determining the required level of knowledge for accomplice liability, because it involved a situation in which an alleged accomplice had no knowledge of the perpetrator’s criminal intent.¹¹¹¹⁰ However, the extract referred to related specifically to one of the

¹¹¹⁰⁸ *Karami* Judgment, pp 126-128, 131-132, 139, 141.

¹¹¹⁰⁹ Paraphrasing the Lebanese Criminal Code, Art. 220.

¹¹¹¹⁰ Rule 167 decision, pp 41, 46.

12 accused, Mr Manuel Younes, and the Lebanese Judicial Council's finding that there was insufficient evidence to prove that he knew any details of the perpetrators' plan.¹¹¹¹¹

6112. In *Murr*, the Lebanese Judicial Council relevantly found a different accused person, Mr Raji Abdou, to be an accomplice to terrorism, and to intentional homicide and attempted intentional homicide. Mr Abdou was the head of the Military Security Unit of the Lebanese Forces, a militia led by Mr Samir Geagea, who, according to the Council, instigated the relevant crimes.¹¹¹¹² Mr Geagea briefed Mr Abdou and another accused, Mr Ghassan Touma, 'on the motives underlying the plan' and instructed them to organise the assassination operation. To carry out these instructions, along with seeking someone to monitor Mr Murr's movements¹¹¹¹³ and generally 'keeping track of' the operation,¹¹¹¹⁴ Mr Abdou arranged for the delivery of detonators and explosives to the Lebanese Forces' Security Unit.¹¹¹¹⁵ The Council concluded:

Whereas it has been ascertained that Raji Abdou was aware that the operation in which he was involved would be executed by means of explosives, which would create panic, cause deaths and injuries, and destroy residential and commercial buildings, it follows that he was an accomplice to the terrorist acts.¹¹¹¹⁶

6113. Conversely, the Lebanese Judicial Council found regarding Mr Kaddoum and Mr Awad, the two accused who had been assigned to monitor Mr Murr's movements:

Whereas there is no evidence that the accused Naja Kaddoum and Elias Awad were aware of the fact that the assassination operation was to be executed by means of explosives, so that they cannot be charged with involvement in the terrorist act defined and punishable

¹¹¹¹¹ *Murr* Judgment, pp 20-21, 37-39, 62; Oneissi Defence submissions, T. 20 February 2018, pp 36-37, T. 21 February 2018, pp 27-31; Prosecution submissions, T. 21 February 2018, pp 83-84; F3586/COR/PRV, Public Redacted Version of "Corrected Version of the Additional Submissions from the Oneissi Defence pursuant to Rule 167 and to the Oral Order of the Trial Chamber dated 22 February 2018 filed on 27 February 2018", 7 March 2018, para. 24. The Merhi and Oneissi Defence referred to the findings regarding that accused in their final trial briefs, Merhi Defence final trial brief, paras 80, 583; Oneissi Defence final trial brief, para. 656.

¹¹¹¹² *Murr* Judgment, pp 16-17, 19, 53.

¹¹¹¹³ *Murr* Judgment, p. 19.

¹¹¹¹⁴ *Murr* Judgment, pp 43-44.

¹¹¹¹⁵ *Murr* Judgment, p. 43.

¹¹¹¹⁶ *Murr* Judgment, p. 57.

under article 6 of the Law of 11 January 1958, it follows that they must be declared innocent of that charge.¹¹¹¹⁷

but their knowledge of the operation *was* enough to convict them as accomplices under Article 219 (4) in intentional homicide¹¹¹¹⁸ and attempted intentional homicide:¹¹¹¹⁹

Whereas it has been ascertained that the accused Elias Awad and Naja Kaddoum participated in the preparation of the crimes of homicide and attempted homicide committed by the other accused through their surveillance of the movements of Minister Michel Murr's escort, which made it possible to execute the plan to assassinate him, it follows that they are accomplices to the crimes of homicide and attempted homicide resulting from the explosion that occurred on 20 March 1991, *and that they were fully aware that the purpose of their acts was to facilitate the assassination operation.*¹¹¹²⁰

6114. In the second, Lebanese courts in cases on terrorism, intentional homicide, or both, have often explicitly found that accused convicted under Article 219 (4) had full knowledge of the perpetrator's, or perpetrators', plan or intentions. Examples include the Lebanese Judicial Council's statements that the accused Mr Girgis el-Khoury acted 'in full awareness of the perpetrators' intent', in a judgment on the bombing of a church at Zouk Mikayel¹¹¹²¹, and, in *Dany Chamoun*, that the accused Mr Karam 'was fully aware of the mission entrusted to the group, including him', that drove to Mr Chamoun's residence on the day of his murder.¹¹¹²²

6115. The Trial Chamber has not found any judicial decision where a Lebanese court patently concluded that an accomplice charged under Article 219 (4) had a more limited knowledge of the intended crime than the perpetrator(s). But this does not mean that Lebanese courts consider that it is a legal requirement, in all cases of complicity under that Article, for the accused to know in

¹¹¹¹⁷ *Murr Judgment*, p. 56. *See also* the reference to this page of the *Murr Judgment* in the Sabra Defence final trial brief, fn. 1546.

¹¹¹¹⁸ As defined in Articles 549 (1) and (7) of the Lebanese Criminal Code; *Murr Judgment*, p. 56.

¹¹¹¹⁹ As defined in Articles 201 and 549 (1) and (7) of the Lebanese Criminal Code; *Murr Judgment*, p. 56.

¹¹¹²⁰ *Murr Judgment*, p. 56 (emphasis added).

¹¹¹²¹ *Zouk Mikayel Church Judgment*, p. 101. *See also* Rule 167 decision, p. 46.

¹¹¹²² *Dany Chamoun Judgment*, p. 72. *See also, for example*, Cassation decision 38/1999, pp 1-3, 5-6, finding the perpetrator and accomplice planned together how the perpetrator would kill the victim and what role each of them would play in the plan. *Compare*, the Lebanese Judicial Council's statement in the *Murr Judgment*, p. 56, regarding Mr Naja Kaddoum and Mr Elias Awad.

advance *all* of the details of the intended crime. It may just be that in each of these cases, coincidentally, the accused knew these details.

6116. Third, when Lebanese courts have found accused to be accomplices under Article 219 (4) to intentional homicide (either realised or attempted) by terrorist or non-terrorist means, even in cases of complex operations with numerous participants, they have consistently found that all accomplices knew the identity of the person who was the primary or sole target. The Lebanese Judicial Council made this finding in the *Karami*,¹¹¹²³ *Murr*,¹¹¹²⁴ *Dany Chamoun*¹¹¹²⁵ and the *Al-Halabi*¹¹¹²⁶ judgments examined below in sections C.1, ‘Terrorist act’ and C.3, ‘Intentional homicide’.¹¹¹²⁷ This might be because Lebanese courts consider that every accomplice to intentional homicide must have that knowledge. Again, however, the Trial Chamber cannot conclude that this is so, based only on the fact that the decisions examined share this feature.

6117. Fourth, similarly, in the one case the Trial Chamber has considered in which the terrorist operation targeted a particular *building*, the *Zouk Mikayel Church* case, the Lebanese Judicial Council found the accomplice knew that church was the target.¹¹¹²⁸ And in its judgment concerning the bombing at *Al-Tal*—the only judgment the Trial Chamber has uncovered that clearly found

¹¹¹²³ *Karami* Judgment, p. 132.

¹¹¹²⁴ In the *Murr* Judgment, the court stated outright regarding the accomplice Mr Raji Abdou that he knew the target’s identity, p. 19, and implied it regarding the other two accomplices, Mr Naja Kaddoum and Mr Elias Awad, by stating that their role was monitoring the target Minister Murr’s movements, p. 19. The Trial Chamber’s comments regarding the *Murr* Judgment in its Rule 167 decision, p. 46 referred to a different accused.

¹¹¹²⁵ The court also stated outright that the accomplices Mr Camille Karam, Mr Tony Obeid, Mr Jean Chahine, Mr Georges Feghali, Mr Elie Akiki and Mr Farid Saadeh knew the target’s identity in the *Dany Chamoun* Judgment, pp 30, *see also* p. 72, and implied the same regarding the final accomplice, Mr Jean Samia, p. 33 (the court omitted the latter from its list, on p. 30 of the judgment, of participants in a meeting at which they would have learned the attack’s target, if they did not already know it. But on p. 33 of its judgment the court described evidence that Jean Samia attended that meeting and it did not question the accuracy of that evidence). As with the *Murr* Judgment, the Trial Chamber has previously stated regarding the *Dany Chamoun* Judgment that it did not assist in determining the required level of knowledge for accomplice liability because it involved a situation in which an alleged accomplice had no knowledge of the perpetrator’s criminal intent. Rule 167 decision, p. 46. This statement referred to the Lebanese Judicial Council’s finding at p. 73 of the judgment that one of the 13 accused, Mr Rafik Saadeh, was innocent even though he had distributed weapons and uniforms to other accused, because he was merely performing his duties as officer in charge of a weapons warehouse and did not ‘[wish] to become involved ... in the crime of murdering Dany Chamoun’.

¹¹¹²⁶ *Al-Halabi* Judgment, p. 27, *see also* pp 52-54.

¹¹¹²⁷ For an example of a Lebanese court finding the accomplice under Article 219 (4) knew the victim’s identity in a case of intentional homicide by a sole perpetrator, Cassation decision 38/1999. *See also* Cassation decision 135/1995, finding an accused was not an accomplice under Article 219—the court did not specify any particular part of the Article—to a sole-perpetrator intentional homicide where the perpetrator hid his intention to kill the victim from the accused, as noted in Rule 167 decision, p. 46.

¹¹¹²⁸ *Zouk Mikayel Church* Judgment, p. 101, regarding Mr el-Khoury; *see also* the descriptions of this judgment in Rule 167 decision, p. 46.

that a terrorist operation aimed to kill a particular *group of people*, namely Lebanese army soldiers—the Council concluded the accomplice who had helped to disguise his brother, one of the perpetrators, as a soldier ‘knew about his brother Abdul Ghani Jawhar’s plans’.¹¹¹²⁹ From the context it seems likely that the court considered this accomplice knew the target was that particular group of people. But the same caveat applies to the findings regarding what the accomplices knew in these judgments. That is, they were findings of fact and the Trial Chamber simply cannot confirm, from the judgments, whether these findings were or were not legally significant.

iv. Article 219 (5) specifically

Anyone who, having so agreed with the perpetrator or an accomplice before commission of the offence, helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice.

6118. The Trial Chamber has not found any Lebanese judicial decisions finding an accused to be an accomplice under Article 219 (5), specifically, to any of the crimes whose commission the Prosecutor alleges Mr Merhi, Mr Oneissi and Mr Sabra assisted, namely terrorism, intentional homicide and attempted intentional homicide.¹¹¹³⁰ A common example, in the Lebanese case law, of conduct found to satisfy Article 219 (5) is selling¹¹¹³¹ or buying¹¹¹³² items after they were stolen, such as cars.

6119. Some Lebanese courts state, generally, that Article 219 covers only conduct by the accomplice *before* the relevant crime is committed. If the accused did something to assist the perpetrator or co-perpetrators *thereafter*, according to these decisions,¹¹¹³³ they cannot be liable as an accomplice under Article 219.¹¹¹³⁴ This limitation is not apparent from Article 219 itself. To

¹¹¹²⁹ *Al-Tal Bombing Judgment*.

¹¹¹³⁰ The *Karami Judgment* considered at p. 133 whether certain accused were accomplices under Article 219 (5) to terrorism, intentional homicide and attempted intentional homicide. However, it determined they were not, for lack of evidence that those accused had a prior agreement with a perpetrator or accomplice as the Article requires.

¹¹¹³¹ Cassation decision 171/2003. However, the court in that case found the accused was not an accomplice because it was not proven he agreed to sell the item, a car, before it was stolen.

¹¹¹³² Cassation decision 68/2015; *see also* Cassation decision 92/2015.

¹¹¹³³ *See, for example*, Cassation decision 457/2002 and Cassation decision 458/2002, pp 2-4, both of which state that there are two types of complicity, namely complicity prior to the offence and complicity after it, and that Article 219 concerns the former only; Cassation decision 186/2018, stating that Article 219 requires, relevantly, the accomplice’s participation in *preparing for* the crime.

¹¹¹³⁴ As the relevant Lebanese case law acknowledges, some post-crime acts may still constitute one of the less serious forms of criminal liability set out in Articles 221 and 222 of the Lebanese Criminal Code.

the contrary, based on the wording of Article 219 (5) a person could do one of the acts described after the commission of the crime, as long as they had agreed to do so before that point. Indeed all of those acts, ‘helping to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice’, normally would occur afterwards. The Trial Chamber is therefore satisfied that the plain wording of Article 219 (5) encompasses acts committed after the crime so long as the agreement to do so was reached before the crime was completed.

6120. Article 219 (6) concerns ‘Anyone who, having knowledge of the criminal conduct of offenders responsible for highway robbery or acts of violence against state security, public safety, persons or property, provides them with food, shelter, a refuge or a meeting place.’ This Article too could conceivably cover acts performed by the accomplice after the crime was committed.¹¹¹³⁵ As there are no charges in this case under this Article, the Trial Chamber has not extensively considered Lebanese case law on its scope.

6121. Lebanese judicial decisions on Article 219 (5) interpret that Article to encompass providing one of the specified kinds of help *after* the crime is committed, having agreed to do so beforehand. For example, in a case in which an accused was charged under Article 219 (5) with complicity in a drug-related felony, the Lebanese Court of Cassation stated:

for the elements of the crime of collusion by shielding to be fulfilled, there has to be an agreement between the colluder and the participants in a specific crime. Further, the colluder has to have shielded the participants from justice *after the crime occurred*, or to hide the items resulting from the crime, used in order to commit it or prepared for it.

The court accepted that the accomplice—after two others had trafficked in and distributed drugs—had assisted them by using his car to transport them so that they would not be stopped at security checkpoints, knowing that they were ‘wanted’ for those crimes. But it upheld a judgment of nonsuit against the accused for lack of proof that before the crimes’ commission, he ‘knew about’ those crimes and agreed to provide this assistance.¹¹¹³⁶

¹¹¹³⁵ The Appeals Chamber found that it does. First interlocutory decision on applicable law, para. 219.

¹¹¹³⁶ Cassation decision 211/2018.

6122. In other cases where the accomplice's conduct occurred *after* the crime, the Court of Cassation found that an accused was not liable under Article 219 (5) for lack of a prior agreement—but not, apparently, because the conduct post-dated the crime.¹¹¹³⁷ The Lebanese Judicial Council's judgment in *Karami* also briefly considered charges under Article 219 (5), in addition to those under Article 219 (4). And in that judgment too, the finding that Article 219 (5) liability was not proven seems to have turned on the lack of prior agreement, not the timing of the accused's act.¹¹¹³⁸

6123. In light of these decisions and the wording of the code, the Trial Chamber finds that in relation to Article 219 (5), the decisions suggesting that Article 219's temporal scope is limited to pre-crime conduct should be interpreted to refer only to the requisite agreement with the perpetrator or accomplice 'before commission of the offence'—not the 'help' agreed on.¹¹¹³⁹

6124. Regarding the *mens rea* of an accomplice under Article 219 (5) specifically, Lebanese judicial interpretations include:

- the 'accomplice knows about the crime that is going to be committed and has a previous agreement with the perpetrator or one of the participants in the crime',¹¹¹⁴⁰—meaning by the latter another accomplice;
- the accomplice must have agreed 'before the commission of the offence, to conceal the traces of, or the persons who participated in, the offence';¹¹¹⁴¹ and

¹¹¹³⁷ See for example, Cassation decision 30/2003; Cassation decision 171/2003; Cassation decision 152/2018. Regarding the interpretation of the *mens rea* of accomplice liability in Cassation decision 30/2003, see further, Trial Chamber's summary in its Rule 167 decision, p. 46. See also the reference to Cassation decision 171/2003 in Rule 167 decision, p. 45.

¹¹¹³⁸ *Karami* Judgment, p. 133.

¹¹¹³⁹ The Appeals Chamber appears to have interpreted Article 219 (5) in the same way. First interlocutory decision on applicable law, paras 219, 220, 228.

¹¹¹⁴⁰ Cassation decision 90/2015.

¹¹¹⁴¹ *Karami* Judgment, p. 133. The Lebanese Judicial Council also stated there that to meet the conditions of Article 219 (5) the accomplice must agree on these matters 'with the perpetrator'. Article 219 (5) plainly also encompasses agreement with other accomplices, thus the Trial Chamber interprets this statement to refer only to the knowledge the accomplice must have about the intended crime before it is committed.

- if they did not do so, they cannot be criminally liable even if they knew before the crime took place that the perpetrator was going to commit it and expressed a desire and intention to participate in its commission.¹¹¹⁴²

No decision on Article 219 (5) that the Trial Chamber has found analyses whether the accomplice must know, specifically, who the intended victim is when the crime targeted a particular individual.¹¹¹⁴³

(b) International criminal law principles on aiding and abetting

6125. The Trial Chamber has briefly contrasted the Lebanese law of accessorial liability with the international criminal law mode of liability known as aiding and abetting. This is only for completeness in addressing the Parties' submissions, rather than because the Trial Chamber considers that Article 3 (1) (a) of the Statute requires the Special Tribunal to consider international legal principles on this issue.

6126. The statutes of international criminal courts and tribunals, under general headings of international criminal responsibility, describe how a crime may be committed. All list aiding and abetting as a basis for individual criminal liability.¹¹¹⁴⁴ The formulation 'participated as an accomplice' in Article 3 (1) (a) of the Special Tribunal's Statute comes directly from Article 2 (3) of the *International Convention for the Suppression of Terrorist Bombings*. However, as no international prosecutions have ever been brought for an offence proscribed under that convention—for indeed no mechanism exists to do so—there is no case law of an international institution using that particular definition of 'participates as an accomplice'. That convention therefore cannot help in *defining* the elements of aiding and abetting, irrespective of whether it can be considered as a general principle of law.

6127. International criminal courts and tribunals treat aiding and abetting as a form of accomplice or accessory liability, sometimes interchangeably using the terms 'accomplice' and

¹¹¹⁴² Cassation decision 30/2003.

¹¹¹⁴³ The published versions of these decisions do not disclose whether the indictment alleged the accused in fact knew the victim's identity before the crime was committed. Nor is it clear, from any of the decisions examined, whether the court concluded that the accused did, indeed, have that knowledge.

¹¹¹⁴⁴ ICTY Statute, Art. 7 (1); ICTR Statute, Art. 6 (1); SCSL Statute, Art. 6 (1); Rome Statute, Art. 25 (3) (a), (c); *see also* ECCC Law, Art. 29.

‘accessory’.¹¹¹⁴⁵ The features common to these courts and tribunals’ definitions of aiding and abetting are the following:

- The objective or conduct element, namely the *actus reus* of aiding and abetting a crime, requires an accused to engage in acts or omissions that provide either practical assistance, encouragement or moral support to the commission of the crime.¹¹¹⁴⁶ The act or omission must have a ‘substantial effect’ on the crime;¹¹¹⁴⁷
- The *mens rea* is that the accused knows that their actions or omissions would assist the commission of a specific crime,¹¹¹⁴⁸ such as murder, rape or torture;¹¹¹⁴⁹
- The accused need not have known the precise crime that was intended and in fact committed.¹¹¹⁵⁰ In other words, they need not have been certain which of a number of crimes would ultimately be committed,¹¹¹⁵¹ provided that they knew that one of those crimes would probably be committed, and the one that was actually committed was among

¹¹¹⁴⁵ *Furundžija* Trial Judgment, para. 257; *Tadić* Appeal Judgment, para. 229; *Šainović and others* Appeal Judgment, para. 1642.

¹¹¹⁴⁶ *Furundžija* Trial Judgment, paras 235, 249; *Blaškić* Appeal Judgment, para. 46; *Šainović and others* Appeal Judgment, paras 1626, 1649, 1677. *See also* *Tadić* Appeal Judgment, para. 229 (iii). In that paragraph the ICTY Appeals Chamber described the relevant component of the *actus reus* for aiding and abetting as ‘acts *specifically directed to* assist, encourage or lend moral support to the perpetration of a certain specific crime’ (emphasis added) and some subsequent judgments followed this approach. However, a majority of the ICTY Appeals Chamber (differently constituted) shortly after this judgment determined that ‘specific direction’ is not an element of aiding and abetting liability under customary international law and the SCSL has reached the same conclusion.

¹¹¹⁴⁷ *Furundžija* Trial Judgment, paras 234-235, 249; *Tadić* Appeal Judgment, para. 229 (iii); *Blaškić* Appeal Judgment, para. 46; *Brima and others* Trial Judgment, para. 775; *Taylor* Appeal Judgment, paras 362, 368, 482; *Šainović and others* Appeal Judgment, paras 1626, 1649, 1677.

¹¹¹⁵¹ *Haradinaj and others* Appeal Judgment, para. 58.

them.¹¹¹⁵² In addition, the accused need not have known every detail of the crime in question,¹¹¹⁵³ just the essential elements of that crime;¹¹¹⁵⁴ and

- The accused must have known the principal's specific intent, in instances where specific intent is an element of the crime,¹¹¹⁵⁵ such as persecution as a crime against humanity or genocide. However, the accused need not have shared the principal's *mens rea* to commit the crime in question.¹¹¹⁵⁶

6128. Aiding and abetting in ICC proceedings differs slightly. Article 25 (3) (c) of the Rome Statute specifies that to be liable for aiding or abetting the commission or attempted commission of a crime within the ICC's jurisdiction, an individual must have done so 'For the purpose of facilitating the commission of such a crime.'¹¹¹⁵⁷ The ICC has nonetheless mostly used the same interpretation as the other international criminal courts and tribunals,¹¹¹⁵⁸ but characterising any departures from it as deriving from the specific wording of the Rome Statute,¹¹¹⁵⁹ rather than deciding that those principles are not generally accepted in international criminal law.

¹¹¹⁵² *Šainović and others* Appeal Judgment, para. 1772; *Haradinaj and others* Appeal Judgment, para. 58; *Mrkšić and Šljivančanin* Appeal Judgment, paras 49, 159; *Simić* Appeal Judgment, para. 86; *Blaškić* Appeal Judgment, para. 50; *Furundžija* Trial Judgment, para. 246; *Karera* Appeal Judgment, para. 321; *Sesay and others* Appeal Judgment, para. 546; *Sesay and others* Trial Judgment, para. 280; *Fofana and Kondewa* Appeal Judgment, para. 366; *Brima and others* Appeal Judgment, paras 242-243.

¹¹¹⁵⁶ *Lukić and Lukić* Appeal Judgment, para. 428; *Haradinaj and others* Appeal Judgment, para. 58; *Blagojević and Jokić* Appeal Judgment, para. 221; *Krnojelac* Appeal Judgment, paras 51-52; *Aleksovski* Appeal Judgment, para. 162; *Furundžija* Trial Judgment, para. 245; *Ntawukulilyayo* Appeal Judgment, para. 222; *Sesay and others* Trial Judgment, para. 280; *Fofana and Kondewa* Appeal Judgment, para. 367.

¹¹¹⁵⁷ Rome Statute, Art. 25 (3) (c). On the significance of this difference, *see for example*, *Bemba and others* Trial Judgment, para. 97 (where the ICC Trial Chamber stated that 'this wording introduces a higher subjective mental element' compared to 'other international instruments' 'and means that the accessory must have lent his or her assistance with the aim of facilitating the offence'). *See also* Sabra Defence final trial brief, fn. 1554, acknowledging that Article 25 (3) (c) sets a 'higher' *mens rea* standard.

¹¹¹⁵⁸ *See for example*, *Bemba and others* Appeal Judgment, paras 1326-1327, 1329-1330 (as to the *actus reus* of aiding and abetting) and paras 1399-1401 (as to the *mens rea*).

¹¹¹⁵⁹ *See for example*, *Bemba and others* Appeal Judgment, paras 1326-1327.

6129. The Sabra Defence made submissions about several concepts that appear in the decisions of international criminal courts and tribunals on aiding and abetting. First, the ‘ICC’s control theory, under which the co-perpetrator must make an “essential contribution” to the crime’.¹¹¹⁶⁰ Second, the requirement that the accomplice’s conduct have a substantial effect on the crime.¹¹¹⁶¹ Third, the requirement that the accomplice know that conduct assisted the commission of a specific crime.¹¹¹⁶² Finally, the Sabra Defence also refers to ‘the specific direction requirement as set out in parts of the ICTY’s jurisprudence’.¹¹¹⁶³

6130. Specifically, regarding the *actus reus* of complicity, the Sabra Defence argues that at a minimum, the international criminal law ‘substantial effect’ threshold ‘should apply’ in this case.¹¹¹⁶⁴ It elaborated:

Doing so leads to a proper delineation of criminal responsibility and preserves the Appeals Chamber’s intention that the concept of complicity, which is more protective of the rights of the accused, is to be applied. For these reasons, the accused can only meet the second objective element specified above¹¹¹⁶⁵ if their assistance had an essential, or at minimum, a substantial effect upon the commission of the crimes.¹¹¹⁶⁶

6131. On the *mens rea* of complicity—in particular its ‘second subjective element’ of ‘intent to assist the perpetrator in his commission of the crime’¹¹¹⁶⁷—the Sabra Defence challenges the Appeals Chamber’s analysis of international criminal law case law in its first interlocutory decision. It argued that:

There is no equivalent jurisprudence to assist in understanding a second subjective threshold for aiding and abetting other than the specific direction requirement. The Appeals

¹¹¹⁶⁰ Sabra Defence final trial brief, para. 823, citing *Lubanga* Appeal Judgment, para. 469; *see also* para. 821, fn. 1536, citing *Mbarushimana* decision on confirmation of charges, paras 276-285 and a secondary source, DeFalco 2013.

¹¹¹⁶¹ Sabra Defence final trial brief, para. 823, citing First interlocutory decision on applicable law, para. 226 and noting the Appeals Chamber there relied ‘solely on ICTY jurisprudence’.

¹¹¹⁶² Sabra Defence final trial brief, para. 823, citing *Šainović and others* Appeal Judgment, no paragraph specified.

¹¹¹⁶³ Sabra Defence final trial brief, para. 831. In the same paragraph, in relation to this issue, the Sabra Defence cites the *Perišić* Appeal Judgment, para. 26—citing *Tadić* Appeal Judgment, para. 229—and paras 36, 44-48.

¹¹¹⁶⁴ Sabra Defence final trial brief, para. 823.

¹¹¹⁶⁵ The Sabra Defence had earlier defined this element, as ‘assistance in a form specified in Article 219’ of the Lebanese Criminal Code. Sabra Defence final trial brief, para. 819, citing First interlocutory decision on applicable law, paras 219, 228.

¹¹¹⁶⁶ Sabra Defence final trial brief, paras 823-824.

¹¹¹⁶⁷ Sabra Defence final trial brief, paras 825, 829-834.

Chamber indicates that international criminal law provides a second subjective element for aiding and abetting, however this is not provided for in the citations it relies upon.¹¹¹⁶⁸

6132. Moreover, it submits, referring to a doctrine adopted by one ICTY Appeals Chamber¹¹¹⁶⁹—and swiftly rejected by another¹¹¹⁷⁰—termed ‘specific direction’ in aiding and abetting liability, that, ‘Something akin to the specific direction requirement is necessary and appropriate for the proper interpretation of the second subjective element derived from Lebanese law.’¹¹¹⁷¹

6133. This requirement, however, cannot be viewed as generally accepted in international criminal law. The ICTY Appeals Chamber, which adopted this requirement in a majority decision in February 2013 in *Perišić*,¹¹¹⁷² reversed it a mere 11 months later in *Šainović and others* finding that “‘specific direction’ was not in fact an element of aiding and abetting liability under customary international law’.¹¹¹⁷³ And, in between these two judgments, the Appeals Chamber of the SCSL, in *Taylor*, reached the same conclusion.¹¹¹⁷⁴ The Sabra Defence acknowledges this international post-*Perišić* case law,¹¹¹⁷⁵ and the slightly differing definition of aiding and abetting under the Rome Statute.¹¹¹⁷⁶

6134. It explains that resorting to using international criminal law principles was necessary to ‘coherently’ interpret the applicable Lebanese law.¹¹¹⁷⁷ This, however, contradicts other Sabra Defence arguments that Lebanese law applies exclusively and the two bodies of law cannot apply either simultaneously or alternatively. Logically, if Lebanese law applies exclusively how can it

¹¹¹⁶⁸ Sabra Defence final trial brief, para. 833 (footnotes omitted).

¹¹¹⁶⁹ And as a result, was subsequently (properly, as a binding precedent) applied by one ICTY Trial Chamber, *Stanišić and Simatović* Trial Judgment, paras 1264, 2360, 2405.

¹¹¹⁷⁰ In the *Šainović and others* Appeal Judgment.

¹¹¹⁷¹ Sabra Defence final trial brief, para. 833. The brief, at para. 834, went on: ‘This second subjective element for aiding and abetting is of significance in the adjudication of the case against SABRA. The accused are not charged with having criminal political beliefs. If any assistance they provided was (for example) specifically directed at fulfilling the ideological aims of Hezbollah, this would be a distinct intention from a situation where they specifically directed their assistance towards the commission of a terrorist act. Only the latter intent would sufficiently qualify as giving rise to criminal complicity, and it is the responsibility of the Prosecution to prove beyond reasonable doubt that this intent exists’.

¹¹¹⁷² *Perišić* Appeal Judgment, paras 36-40.

¹¹¹⁷³ *Šainović and others* Appeal Judgment, para. 1649; *see also* para. 1663.

¹¹¹⁷⁴ *Taylor* Appeal Judgment, paras 466-481, 486.

¹¹¹⁷⁵ Sabra Defence final trial brief, para. 832, citing *Šainović and others* Appeal Judgment and *Stanišić and Simatović* Appeal Judgment, no paragraphs specified.

¹¹¹⁷⁶ Sabra Defence final trial brief, fn. 1554.

¹¹¹⁷⁷ Sabra Defence final trial brief, para. 812.

be legally ‘necessary’ to draw on international criminal law concepts to ‘properly’ interpret Lebanese law?

6135. The Trial Chamber is not convinced that the Lebanese domestic law on aiding and abetting should be interpreted by using international criminal law case law. The Trial Chamber, moreover, does not accept that it must consider international criminal law principles on this issue at all.

6136. But even if it were obliged to take this route, logically it should first determine the common features of the definitions of aiding and abetting of the various international criminal courts and tribunals, and then contrast them with their Lebanese equivalents. And then ascertain which are more favourable to an accused. This is essentially the method used by the Appeals Chamber.

6137. The Appeals Chambers of *ad hoc* international criminal tribunals have found the principles summarised above to constitute customary international law, in relation to accessorial liability.¹¹¹⁷⁸ Assuming for argument’s sake that this is correct—and it is stressed here that not every State defines accessorial liability in the same manner, as is graphically illustrated by the difference between Article 219 (5) of the Lebanese Code and the ICTY and other international case law—the customary principle will only apply to international crimes being tried internationally.¹¹¹⁷⁹ And not to crimes defined by domestic legislation, here Lebanon’s, albeit being tried in an international context under a Statute annexed to a Security Council resolution.

6138. In attempting to introduce an international mode of liability that was not part of Lebanese law at the relevant time, and given that some aspects of the international definitions are less favourable to an accused person, the Sabra Defence’s approach may also breach the principle of legality. The Trial Chamber recognises that imposing a requirement of ‘specific direction’ would be more favourable to an accused person, but this doctrine existed for less than a year in the ICTY case law before it was overturned, and is not generally accepted in other international criminal

¹¹¹⁷⁸ For example, *Furundžija* Trial Judgment, paras 234-235; *Šainović and others* Appeal Judgment, para. 1626; *Taylor* Appeal Judgment, paras 482-486. See also *Tadić* Appeal Judgment, paras 194-229, see also paras 185-186 on the principle of personal culpability in international criminal law generally. Most of the ICTY Appeals Chamber’s analysis of customary international criminal law in that judgment concerns a different mode of liability that is not relevant in these proceedings (liability based on participation in the realisation of a common design or purpose, which corresponds to Article 3 (1) (b) of the Special Tribunal’s Statute). However, the judgment (particularly para. 226) implies that the Appeals Chamber also concluded that the principles it set out in para. 229 concerning aiding and abetting reflect customary international criminal law.

¹¹¹⁷⁹ The *Šainović and others* Appeal Judgment’s survey of national jurisdictions and definitions, revealing a divergence of practice, illustrates this, paras 1643-1646.

courts and tribunals. The Trial Chamber therefore disagrees with the Sabra Defence's proposed approach. It is hence unnecessary to reach a finding on whether it accurately characterised either the international criminal law case law it sought to have applied, or the Appeals Chamber's interpretation of particular decisions.

6139. The Prosecution too made submissions regarding international criminal law case law and aiding and abetting. It emphasised that an aider and abettor in international criminal law proceedings need not know the precise crime that was either intended or committed.¹¹¹⁸⁰ This is legally correct. However, the Prosecution went further submitting that the elements of aiding and abetting under international criminal law 'are consistent with Lebanese law'.¹¹¹⁸¹

6140. In fact, the international criminal law concept of aiding and abetting differs in some respects from those in the Lebanese Criminal Code. That code limits the *actus reus* for liability as an accomplice to the six categories of acts listed in Article 219 (1) to (6). International criminal law generally, on the other hand, does not constrict the *actus reus* like this.¹¹¹⁸² In international criminal law proceedings an accused person may be liable for aiding and abetting a crime because of what they did *after* the crime occurred, although the accused's acts or omissions must nevertheless have had a substantial effect on the crime.¹¹¹⁸³ Article 219 (5) of the code, on the

¹¹¹⁸⁰ Prosecution final trial brief, paras 1152-1153, fns 2396-2399, citing the *Šainović and others* Appeal Judgment, paras 1772-1775; *Haradinaj and others* Appeal Judgment, para. 58; *Mrkšić and Šljivančanin* Appeal Judgment, para. 159; *Simić* Appeal Judgment, para. 86; *Blaškić* Appeal Judgment, para. 50; *Vasiljević* Appeal Judgment, para. 102 (i); *Tadić* Appeal Judgment, para. 229 (iii); *Karera* Appeal Judgment, para. 321; *Nahimana and others* Appeal Judgment, para. 482.

¹¹¹⁸¹ Prosecution final trial brief, para. 1151; *see also* para. 1154.

¹¹¹⁸² The Appeals Chamber reached the same conclusion in its First interlocutory decision on applicable law, para. 228.

¹¹¹⁸³ *For example*, *Tadić* Trial Judgment, para. 692; *Blaškić* Appeal Judgment, para. 48; *Simić* Appeal Judgment, para. 85; *Sesay and others* Trial Judgment, para. 278; *Taylor* Trial Judgment, para. 484. *See also* First interlocutory decision on applicable law, para. 226, fn. 338. *Compare* *Nuon Chea and Khieu Samphan* Case 002/01 Trial Judgment, paras 712-713; *Nuon Chea and Khieu Samphan* Case 002/02 Trial Judgment, para. 3723. For the position in the ICC *see for example*, *Bemba and others* Appeal Judgment, para. 1399. The ECCC Trial Chamber in *Nuon Chea and Khieu Samphan* (Case 002/01), referring to *Blaškić*, considered that 'the ICTY approach reflects an understanding that an offer made before or during the commission of a crime, of assistance to be provided after the fact, may encourage or morally support the perpetrator and thereby have a substantial effect on the commission of a crime.' *Nuon Chea and Khieu Samphan* Case 002/01 Trial Judgment, para. 712 (citing *Blaškić* Appeal Judgment, para. 48, and other ICTY cases). *See also* *Nuon Chea and Khieu Samphan* Case 002/02 Trial Judgment, para. 3723. However, although this principle is clearly accepted and repeatedly stated in international criminal court and tribunal judgments, it has not often been applied. In practice, accused persons have been convicted of aiding and abetting a crime on the basis of conduct that occurred not just after, but also before the commission of the crime. For instance, in the *Nuon Chea and Khieu Samphan* (002/01) case, the Trial Chamber found that the accused Mr Nuon Chea provided encouragement and moral support to the perpetrators of crimes committed during the forced transfer of inhabitants from Phnom Penh (defined as 'movement of population (phase one)'), through his role, both before and after the crimes, in disseminating

other hand, requires an agreement to commit one of the acts listed in that Article *before* the offence is committed. But the acts listed could occur either *before* or *after* the crime.

6141. The only conduct covered by Article 219 (4), aiding or abetting acts *preparatory* to the crime, occurs *before* the crime occurred or at most, according to the Appeals Chamber, and some Lebanese decisions, during its commission. In deciding cases under Article 219 (4), Lebanese courts have suggested that the accused must have some prior knowledge of the specific crime the perpetrator intends to commit. But the cases do not define the extent of this knowledge. Thus, whether Lebanese case law differs from the international case law in this respect is unclear.

6142. Under Lebanese law, the accused also needs to know to some extent, and accept, the consequences of both the perpetrator's intended conduct and their own conduct, beforehand. Some Lebanese judicial decisions find that the accused must agree with the perpetrator on at least these things. And, Article 219 (5) explicitly requires the accused to have agreed with the perpetrator or accomplice before the commission of the crime to do one of the acts specified in that provision.

6143. No such agreement is generally required under international criminal law. Rather, as explained above, the accused person only need know that their acts or omissions will assist the crime.¹¹¹⁸⁴

6144. In summary, therefore, accomplice liability under Lebanese law, and in particular under Article 219 (4) and (5), covers a narrower range of conduct than aiding and abetting under international criminal law and requires proof of some additional matters. For these reasons, the Lebanese mode of liability in certain respects is more favourable to the accused than the relevant

the forced movement, praising past crimes and targeting policies and advocating their implementation. Mr Nuon Chea's words and actions encouraged the perpetrators to commit the crimes and therefore had a substantial effect on their commission. On this basis, the Trial Chamber found Mr Nuon Chea responsible for aiding and abetting the direct perpetrators to commit crimes against humanity of murder, persecution on political grounds and other inhumane acts, *Nuon Chea and Khieu Samphan*, Case 002/01 Trial Judgment, paras 889-891; *see also* para. 547. The Trial Chamber also found Mr Nuon Chea responsible for aiding and abetting the crime against humanity of extermination during the movement of population (phase one). However, on appeal, the Supreme Court Chamber reversed this conviction on the basis that neither the scale element—that Khmer Republic soldiers and officials had been killed on a large scale—nor the requisite *mens rea* for the crime of extermination had been established beyond reasonable doubt. *See Nuon Chea and Khieu Samphan* Case 002/01 Appeal Judgment, paras 536-541, 1099, disposition.

¹¹¹⁸⁴ *See above*, at paras 6127-6128. *See also* First interlocutory decision on applicable law, para. 227.

international criminal law mode, as the Appeals Chamber concluded¹¹¹⁸⁵ and the Merhi and Oneissi Defence submitted.¹¹¹⁸⁶

(c) Conclusion: the law applicable to accomplice liability

6145. In conclusion, the Trial Chamber finds that the Lebanese Criminal Code is the relevant applicable law to participating in a crime as an accomplice, under Article 3 (1) (a) of the Statute. The words in that Article ‘participated as accomplice’ do not describe a mode of liability specific to international criminal law, but rather one familiar to domestic legal systems, including Lebanon’s, and explicitly defined in Article 219 of the code. From its brief examination of international criminal law on aiding and abetting, the Trial Chamber agrees with the Appeals Chamber’s conclusion that, of the two, the Lebanese concept of accomplice liability is the more favourable to the accused. This is not determinative, since the Trial Chamber does not accept that such examination was legally necessary in the first place or that there is an ambiguity in Article 219. However, it is an additional consideration in favour of applying the Lebanese instead of an international definition.

6146. In the present case, therefore, the *actus reus* of participating in a terrorist act, intentional homicide or attempted intentional homicide as an accomplice is, for Article 219 (4) complicity, an act or omission that assists the perpetrator’s or perpetrators’ preparation for the crime, and for Article 219 (5) complicity of the kind charged, an act or omission that helps to shield one or more of the participants in the crime from justice. Based on the wording of those Articles, the Trial Chamber has concluded that to fulfil Article 219 (4) the accused accomplice’s conduct must occur before the crime is committed, whereas Article 219 (5) covers conduct occurring either before or after the crime’s commission.

6147. To fulfil Article 219 (5), the person who performed the shielding act or omission must have agreed, before the crime was committed, with either the perpetrator(s) or another accomplice or accomplices, to help to shield one or more of the participants in the crime from justice. This finding, too, follows from the words of the Article itself.

¹¹¹⁸⁵ First interlocutory decision on applicable law, paras 228, 264.

¹¹¹⁸⁶ Merhi Defence final trial brief, para. 580; *see also*, regarding the *mens rea* only, Merhi Defence closing submissions, T. 18 September 2018, pp 103-104; Oneissi Defence final trial brief, para. 646, fn. 1420, citing First interlocutory decision on applicable law, para. 228.

6148. The Trial Chamber further finds that to be an accomplice under either Article, the person must know which particular crime (or crimes) the perpetrator(s) intend to commit. They must also know the likely consequences of both the perpetrator's or perpetrators' commission of that crime, and their own act or omission. They must accept that these are the likely consequences. And they must know and accept these matters before the crime begins to be committed. In this limited sense, therefore, for the purpose of both Article 219 (4) and Article 219 (5), to be an accomplice the person must have a prior understanding or agreement concerning the crime—as the Appeals Chamber found and all Parties professed to accept.

6149. The Trial Chamber thus does not follow the approach of those Lebanese decisions that suggest that an accomplice may learn and accept the necessary details during the crime's commission. It is more consistent with the wording of the provisions, in particular the fact that Article 219 (4) concerns 'preparatory' acts and Article 219 (5) requires agreement 'before commission of the crime', to find that they require prior knowledge on the accomplice's part. Consistent with the case law, however, the Trial Chamber finds that an accomplice may gain the necessary knowledge very shortly before the perpetrator begins to commit the crime; there is no minimum period for it.

6150. The Trial Chamber accepts as reasonable, and will follow, the approach observed in some Lebanese judicial decisions, of requiring that an accomplice to a terrorist act know before the crime begins to be committed which particular means the perpetrator intends to use to commit that act. Thus, to be an accomplice to the terrorist act alleged in this case, the Accused must have known that it was intended to be committed using an explosive device. This interpretation is open on the language of Articles 219 (4) and (5) and 314 of the Lebanese Criminal Code. As the requirements of Lebanese law in this respect are unclear, this interpretation is also preferable because it is stricter and consequently more favourable to the Accused than the alternative, namely that they need not have known this detail to be criminally liable.

6151. Otherwise, the level of knowledge required of an accomplice will depend on the nature of the principal crime and the circumstances of the particular case, but in any event need not extend to all details of the principal crime. As the Trial Chamber stated in its decision under Rule 167, it would suffice in this case if those charged as accomplices knew they were acting pursuant to a plan to commit a terrorist act, namely, to assassinate Mr Hariri by means of a large explosive

device in a public place, therefore causing terror, and further that in so doing they were aware that others would die and be injured.

6152. It is unclear whether, as a matter of Lebanese law, an accomplice to a terrorist act, an intentional homicide or an attempted intentional homicide that targeted a particular person must know that person's identity. The Trial Chamber therefore considers it preferable to accept the stricter standard of knowledge that the Merhi, Oneissi and Sabra Defence proposed. That is, those charged as accomplices must, legally, have known before the crimes were committed that Mr Hariri was the target of the attack. However, when determining the individual criminal responsibility of Mr Merhi, Mr Oneissi and Mr Sabra, the Trial Chamber has also briefly considered the alternative—that Mr Hariri's identity was a detail or 'particular' that they did not need to know to have been accomplices to any of the crimes charged.

C. Substantive crimes

1. Terrorist act

6153. Article 314 of the Lebanese Criminal Code defines terrorist acts as 'all acts intended to cause a state of terror and committed by means liable to create a public danger such as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents.'

6154. The Appeals Chamber in its first interlocutory decision, ultimately—but only after a lengthy search for a possible definition of an international crime of terrorism—decided that the crime of terrorism in Article 314 of the Lebanese Criminal Code was largely as set out in the Article itself.

(a) *Actus reus*

6155. In the first interlocutory decision on the applicable law, the Appeals Chamber concluded that the objective or material element, namely the *actus reus* of this offence, was any act using a means liable to create a public danger¹¹¹⁸⁷ 'or the credible threat of' such an act.¹¹¹⁸⁸

¹¹¹⁸⁷ First interlocutory decision on applicable law, paras 49, 147, disposition, 3 (a)-(b). *See also* Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, para. 48.

¹¹¹⁸⁸ First interlocutory decision on applicable law, disposition, 3 (a).

6156. All of the ‘means’ listed in Article 314 are physical means—in particular, devices, materials, products and agents. This suggests that Article 314 refers to a physical means, rather than a manner or method of doing something. The Appeals Chamber referred to this fact, stating, ‘the Lebanese legislature appears to have adopted a physical connotation to the term “means”, as further demonstrated by the use of the Arabic word “wassila”.’¹¹¹⁸⁹

6157. Notably, Article 314, in relation to the ‘means’ also uses the term ‘such as’ meaning that it is an illustrative rather than a closed list. In legislative terms, it is the equivalent of stating ‘for example’ and is commonly used to list examples of what *may* constitute the means for committing a crime. In particular, the words ‘such as’ after ‘means liable to create a public danger’ signal that the list in the provision is not exhaustive. This was also the Appeals Chamber’s interpretation.¹¹¹⁹⁰

6158. Some Lebanese courts, however, have interpreted this more restrictively, seeming to consider that only an act using one of the means listed in the Article will qualify. An example of this, which the Appeals Chamber highlighted, occurred in the case concerning the 1995 homicide of Sheikh Nizar al-Halabi. Sheikh al-Halabi, a religious leader, was ambushed by masked attackers and shot and killed immediately after getting into a car outside his home to travel to work one morning. His son and two bodyguards were present and injured in the attack.¹¹¹⁹¹

6159. The Lebanese Judicial Council found that those accused did not commit a terrorist act—apparently for the sole reason that they did not use one of the means listed in Article 314. The Council stated:

Whereas Article 6 of the Act of 11 January 1958 punishes all terrorist acts.

Whereas Article 314 of the Criminal Code defines terrorist acts as all acts aimed at creating a state of panic and committed by such means as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents that are liable to cause a public danger.

While it is true that the actions of the defendants Hamid, Aboud, Al-Kasm, Nabah and Abd al-Mo‘ti pertaining to the homicide of Sheikh Nizar al-Halabi were liable to cause a state

¹¹¹⁸⁹ First interlocutory decision on applicable law, para. 50.

¹¹¹⁹⁰ First interlocutory decision on applicable law, para. 50, disposition, 3 (b), fn. 432.

¹¹¹⁹¹ *Al-Halabi* Judgment, p. 24.

of panic in view of the Sheikh's religious and social standing and the fact that the offence was committed in broad daylight in a street full of residents, shopkeepers and pedestrians, *the offence was not committed by any of the means listed in Article 314.*

Whereas the defendants must be acquitted of the offence defined in Article 6 of the Act of 11 January 1958 inasmuch as its elements have not been fulfilled.¹¹¹⁹²

6160. In its *Dany Chamoun* judgment two years earlier, the same court seemed to take a more nuanced approach, finding:

While it may be true that the crime that is being prosecuted was intended and succeeded in creating panic, it was not perpetrated by any of the means referred to in the Article, and the means used (handguns and submachine guns), the place in which they were used, a private and closed apartment, and the persons targeted were not designed to bring about a public emergency.¹¹¹⁹³

6161. This passage suggests that, besides the fact that Article 314 does not list handguns or submachine guns, the Lebanese Judicial Council also considered relevant, first, whether the 'means used' were inherently liable to create a public danger, second, whether those means were employed in public or in private and third, who the target was. However, the Appeals Chamber concluded that both this and the *Al-Halabi* judgment exemplified a 'narrow interpretation of the "means" element of Article 314',¹¹¹⁹⁴ according to which a 'means' not listed in the Article could only constitute the *actus reus* of terrorism under Article 314 if it was 'likely *per se* to cause a danger to the general population'.¹¹¹⁹⁵

¹¹¹⁹² *Al-Halabi* Judgment, pp 55-56 (emphasis added), examined in First interlocutory decision on applicable law, paras 52, 125. Despite the Council's characterisation in this passage, Article 6 of the 1958 law does not 'define' terrorist acts as such. Rather, Article 314 contains the crime's definition and Article 6 of the 1958 law deals with penalties for it.

¹¹¹⁹³ *Dany Chamoun* Judgment, p. 70.

¹¹¹⁹⁴ First interlocutory decision on applicable law, para. 55.

¹¹¹⁹⁵ First interlocutory decision on applicable law, para. 54; *see also* paras 51-53, 125. In support of its statement at para. 51 that 'Some Lebanese courts have propounded a strict interpretation of Article 314', the Appeals Chamber cited one additional decision, Military cassation decision 125/1964, and stated that according to that decision, 'it is not the conduct, but the *means or instrument or device* that must be such as to create a public danger.' First interlocutory decision on applicable law, para. 51. Based on the published extract of the decision—which is very brief—the Trial Chamber agrees that the Military Court of Cassation interpreted Article 314 as it is written, that is, as requiring the use of 'means liable to create a public danger' such as one of those listed. However, that decision does not otherwise seem to have interpreted the Article restrictively.

6162. Some Lebanese judgments suggest that even using one of the listed ‘means’ will not fulfil the *actus reus* of the crime, if it does not in fact create a public danger. For example, in a judgment issued in 1998, the Lebanese Court of Cassation found that the use by three accused of an unspecified ‘small quantity of explosives’,¹¹¹⁹⁶ on a number of occasions, was insufficient to create a public danger within the meaning of Article 314.¹¹¹⁹⁷ The size and power of the explosive materials used seems to have ranged from a nine-volt battery and a wire to charges of unspecified size made using explosive materials extracted from a missile.¹¹¹⁹⁸ Another example is the Lebanese Judicial Council’s 1999 judgment in the case of *Al-Rifai and others*. The case concerned a series of incidents that occurred at different times and places and involved varying degrees of violence, including several bombings and attempted murders, perpetrated by a number of alleged supporters of the so-called Islamic State in Lebanon and the Levant. The Lebanese Judicial Council stated regarding Article 314:

it can be understood from this Article that an act is considered a terrorist act where it is intended to cause a state of terror, *and where there is a material element, i.e. the means whose usage must be liable to create public danger*;

Whereas public danger refers to a wide-scaled danger that arises when the damage resulting from the means used is liable to propagate to a larger scale because of its force and violence, leading to an increase in the risks and the seriousness of the damage resulting from its usage;

Whereas *if the usage of explosive materials can lead in theory to the risks and damage as described above, it is not always the case* given that the force and violence of the blast of the explosive devices and materials differs from one device to another. The result might be a wide-scaled danger or might be limited to the location where the explosive charge was placed. Both possibilities depend on the nature and quantity of the used material, their mechanisms, and the locations where they were placed.¹¹¹⁹⁹

¹¹¹⁹⁶ Cassation decision 85/1998, p. 1.

¹¹¹⁹⁷ Cassation decision 85/1998.

¹¹¹⁹⁸ Cassation decision 85/1998, pp 2-3. Six-hundred kilograms of explosive materials were extracted from the missile, in two lots of 300 kilograms, but the judgment does not state the size of the charges created using those materials.

¹¹¹⁹⁹ *Al-Rifai and others* Judgment, pp 9-10 (emphasis added).

6163. Applying this interpretation, the Lebanese Judicial Council found that detonating explosive devices in the relevant locations did not fulfil the *actus reus* of a terrorist act, even though it injured some people, because:

it did not ... cause wide-scaled danger as described in article 314 of the Criminal Code, since the force of the blast was not strong enough and its mechanism was not very advanced. The damage caused by the blast did not go beyond the limited and direct location where it was used.¹¹²⁰⁰

6164. By contrast, according to the Appeals Chamber, ‘means’ that produce more modest effects—such as guns—may satisfy the means requirement under Article 314 if, due to the circumstances in which they are used, they are likely to pose a public danger.¹¹²⁰¹ The Appeals Chamber reached this view in part by interpreting Article 314 in light of a definition of terrorism that it considered constituted customary international law and was therefore binding on Lebanon.¹¹²⁰²

6165. The definition of terrorism that it considered to exist under international law also appears to have been the sole basis for the Appeals Chamber’s view—not explicitly stated until the disposition of its first interlocutory decision¹¹²⁰³—that *the credible threat of* an act using means liable to create a public danger will fulfil the *actus reus* of Article 314.¹¹²⁰⁴ The Appeals Chamber did not identify, nor is the Trial Chamber aware of, any Lebanese case law suggesting that Article 314 encompasses threats. And, that Article itself is, patently, expressed to be limited to acts actually committed—‘Terrorist acts are all acts intended to cause a state of terror and committed by means liable to create a public danger’.

¹¹²⁰⁰ *Al-Rifai and others* Judgment, p. 10.

¹¹²⁰¹ First interlocutory decision on applicable law, paras 125-129, disposition, 3 (b), fn. 432.

¹¹²⁰² See First interlocutory decision on applicable law, paras 63-113, disposition, 3. For the Appeals Chamber’s justification for taking into account customary international law.

¹¹²⁰³ The Appeals Chamber’s summary of the elements of Article 314 ‘interpreted in consonance with international law’ in the body of its First interlocutory decision on applicable law, at para. 147, relevantly refers only to ‘the volitional commission of an act’. But the disposition, 3 (a), adds after those words ‘or the credible threat of an act’.

¹¹²⁰⁴ First interlocutory decision on applicable law, paras 65, 85-113, 139-141, 145-147—analysing terrorism under international law and referring to various international and non-Lebanese domestic legal definitions that extend to threats—and disposition, 3, asserting that the interpretation of Article 314 including this element was ‘in light of international rules binding upon Lebanon.’

6166. In fact, the Appeals Chamber concluded that every element of the crime of terrorism under Article 314 should be interpreted in light of international law, although it acknowledged that this approach must be subject to the principle of legality. As it stated in the disposition of its first interlocutory decision:

Article 314 of the Lebanese Criminal Code and Article 6 of the Law of 1958, *interpreted in the light of international rules binding upon Lebanon, provided such interpretation does not run counter to the principle of legality*, require the following elements for the crime of terrorism (see above paras 47-60, 124-30).¹¹²⁰⁵

6167. However, in the Trial Chamber's view, for several reasons, such recourse to international law was and is unnecessary. First, Lebanese judicial interpretations are binding on neither other Lebanese courts nor the Special Tribunal. Indeed, the Appeals Chamber explicitly took this fact into account in interpreting Article 314.¹¹²⁰⁶ A chamber of the Special Tribunal may legitimately disagree with an interpretation or distinguish it on its facts. Second, Article 2 of the Statute is crystal clear in requiring the Special Tribunal to apply the Lebanese Criminal Code to its proceedings. Third, the wording of Article 314 is unambiguous, meaning that there is no need to construe an (absent) ambiguity in favour of an accused person, either in the Article's wording or in its interpretation.

6168. The Sabra Defence submits that the Appeals Chamber should not have referred to international law to interpret the words 'means liable to create a public danger' in Article 314. Specifically, counsel for Mr Sabra contends that Lebanese law exclusively applies when interpreting the offences referred to in Article 2 of the Statute, including terrorism.¹¹²⁰⁷ For the reasons earlier stated, the Trial Chamber agrees that it is sufficient in this case to rely on the clear wording of Article 314 itself. The Trial Chamber does not accept however that *only* Lebanese law must guide its interpretation of these offences. For instance, the principles set out in Article 16 of the Special Tribunal's Statute, importing international human rights law, also apply.

¹¹²⁰⁵ First interlocutory decision on applicable law, disposition, 3 (emphasis added).

¹¹²⁰⁶ First interlocutory decision on applicable law, para. 142.

¹¹²⁰⁷ Sabra Defence final trial brief, paras 800, 808 (describing the offence under Article 314 by reference to 'Lebanese law and precedent' only); Sabra Defence closing submissions, T. 21 September 2018, p. 15. *See also* Sabra Defence final trial brief, para. 810 (stating, 'In light of the [amended consolidated] [i]ndictment, no further expansion or application of international customary law is required' (footnotes omitted)).

6169. But in any event, the Trial Chamber need not attempt to determine the exact scope of the words ‘means liable to create a public danger’. This is because the charges against the Accused specify one of the means listed in the Article, namely an explosive device, and on the face of that Article, such a means is, inherently ‘liable to create a public danger’; there is no need to prove that it has that capacity.

6170. This was always the case in relation to Mr Hariri’s death, meaning that not having seen the pleaded material facts in an indictment should have made no difference to the Appeals Chamber’s analysis under Rule 176 *bis* of Article 314. In other words, the Appeals Chamber could have reached the same result without needing to see the material facts that were pleaded in the indictment. It was public knowledge and the subject of 11 UNHCR reports to the UN Secretary-General and Security Council, that Mr Hariri and others had been killed in a massive explosion that had to reach the threshold of a ‘means liable to create a public danger such as explosive devices’ under Article 314.¹¹²⁰⁸

6171. Equally, since the charges concern the commission of an act, not the credible threat of one, it is unnecessary in this case to determine whether Article 314 could cover such a threat notwithstanding its clear language to the contrary. No Party addressed that question explicitly. That said, the Sabra Defence rejected importing elements not found in Lebanese law into the definition¹¹²⁰⁹ and the Prosecution omitted the ‘credible threat’ aspect of the Appeals Chamber’s definition when purporting to summarise it, in its final trial brief.¹¹²¹⁰

¹¹²⁰⁸ See also Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, para. 49, noting that ‘In the instant case the indictment charges the accused with participating in the commission of a terrorist act “by means of an explosive device”. [...] Therefore, neither the indictment nor the confirmation decision relies on the definition of terrorism as set out in the Interlocutory Decision’, meaning the First interlocutory decision on applicable law. While the indictment there referred to was later amended, this aspect of it did not change.

¹¹²⁰⁹ Consistent with this position, when defining terrorism in its final trial brief, para. 808, the Sabra Defence cited only para. 49 of the First interlocutory decision on applicable law—where the Appeals Chamber summarised the definition under Lebanese law—not subsequent paragraphs or the disposition of that decision, where the Appeals Chamber proposed that that Lebanese definition be interpreted in light of international law.

¹¹²¹⁰ Prosecution final trial brief, para. 1127, stating that the Appeals Chamber had concluded that the relevant element was ‘the volitional commission of an act’ and citing only para. 147 of the First interlocutory decision on applicable law, not its disposition.

6172. The Prosecution otherwise appears to accept the Appeals Chamber's interpretation of the *actus reus* of the crime, as do counsel for Mr Ayyash and Mr Oneissi.¹¹²¹¹ The Merhi Defence did not directly address that interpretation, confining its legal submissions related to terrorism to the elements of conspiracy to commit that crime and complicity in doing so. But none of those submissions suggests that the Merhi Defence contests the Appeals Chamber's interpretation of Article 314.

6173. The Appeals Chamber also noted,¹¹²¹² and no Party has challenged,¹¹²¹³ that deaths and destruction of property caused by a terrorist act are aggravating circumstances only, pursuant to Article 6 of the Lebanese law of 1958. In other words, these are circumstances in which the crime *may* be committed and if proven to exist, entail a harsher penalty in the Lebanese legal system, but are not necessary for the legal characterisation of an accused person's conduct as that crime.

(b) *Mens rea*

6174. The Lebanese Criminal Code defines intent in Article 188, as 'the will to commit an offence as defined by law.' The amended consolidated indictment uses Article 188 for each charge against the Accused. Article 314 expressly provides that the intention of the offence is 'to cause a state of terror'.

6175. The Appeals Chamber gave this phrase its normal meaning, finding that the subjective or mental element (*mens rea*) is that the person deliberately acts with the intent to cause a state of terror.¹¹²¹⁴ Terrorism is therefore a crime of specific, or special, intent, namely, *dolus specialis*. Further, as the Appeals Chamber noted, the *mens rea* of any additional crime resulting from the

¹¹²¹¹ Prosecution final trial brief, paras 1127, 1129-1130; Ayyash Defence final trial brief, para. 712, accepting the Appeals Chamber's First interlocutory decision on applicable law as to the applicable law generally; Oneissi Defence final trial brief, para. 654. In addition, the Legal Representatives of Victims expressly accept the Appeals Chamber's interpretation of both the *actus reus* and *mens rea* of terrorism under Article 314. Legal Representative of Victims final trial brief, paras 59-64. In their closing submissions, the Legal Representatives of Victims distinguished between findings necessary to establish the guilt of the Accused and those necessary to 'justice and truth'. Legal Representatives of Victims closing submissions, T. 14 September 2018, p. 99. In light of this and the Legal Representatives of Victims' written submissions, the Trial Chamber does not interpret the Legal Representatives of Victims' submissions concerning the motive or purpose behind the attack (closing submissions, T. 14 September 2018, pp 95-102, 105-106) as contending that that motive or purpose is an element of the definition of a terrorist act under Article 314.

¹¹²¹² First interlocutory decision on applicable law, paras 59, 145, 148.

¹¹²¹³ The Prosecutor positively asserts this is so in the amended consolidated indictment, para. 56 (g). No Defence submissions were made on the issue.

¹¹²¹⁴ First interlocutory decision on applicable law, paras 49, 57, 147 (c), disposition: 3 (c).

terrorist offence, such as murder, is not an element of the *mens rea* of terrorism under Article 314.¹¹²¹⁵

6176. Lebanese judicial decisions on terrorism by use of an explosive device suggest that it is not difficult to establish the required *mens rea* for a terrorist act under Article 314. In some cases the court appears to have found the *mens rea* from the fact that an accused deliberately used such a device and or its effect. This is logical. For example, detonating a bomb in a crowded market place by this very action will obviously ‘cause a state of terror’ at least among the crowd and those in the immediate area affected by the blast, thus satisfying the *mens rea* requirement. The Appeals Chamber also recognised the close link between the aim of the crime namely to ‘cause a state of terror’ and the result, which is to create ‘a public danger’.¹¹²¹⁶

6177. Lebanese courts do not appear to consider that the perpetrator’s sole or principal aim must be to cause a state of terror among the *general public*. Having the intent to cause terror in a particular area and or among a particular group has sufficed. For example, in 1993 three men placed an explosive device at a bridge near a monastery in Balamand, in northern Lebanon, aiming to attack a bus carrying Christian religious leaders who were participating in a meeting at the monastery on the topic of unity between the Catholic and Eastern Orthodox churches. The device exploded early—when the bus was 100 metres from the bridge—killing one of the three men.¹¹²¹⁷ In a 1994 judgment regarding this incident, the Lebanese Judicial Council found that the surviving two men:

in view of the circumstances surrounding the event, and its outcome in all senses if the bus carrying the prelates had been struck by the explosive device which had been prepared and placed under the bridge where the convoy would have passed—did, with their deceased companion Abdallah Al-Helou, intend to cause terror in the area, thereby violating the security of the State. This corresponds to the offence stipulated in article 314 of the Criminal Code, and in article 6 of the Law enacted on 11 January 1958.¹¹²¹⁸

¹¹²¹⁵ First interlocutory decision on applicable law, para. 57.

¹¹²¹⁶ First interlocutory decision on applicable law, para. 128.

¹¹²¹⁷ *Balamand Monastery Judgment*, pp 6-9.

¹¹²¹⁸ *Balamand Monastery Judgment*, p. 14. *See also Al-Tal Bombing Judgment*, where the perpetrators’ particular target was Lebanese army soldiers.

The Trial Chamber considers that this interpretation of Article 314 is reasonable and legally correct, given that it simply requires the acts be ‘intended to cause a state of terror’.

6178. The Lebanese case law, however, is not consistent on what may constitute the special intent needed for an offence under Article 314. In *Fatieh*, for example, a 1953 case, an accused who twice threw unspecified explosives at a house was found to have committed a terrorist act even though his obvious intention was to influence someone for personal reasons, specifically his wish to marry their daughter.¹¹²¹⁹ On its face this does not appear to be a terrorist act and the Trial Chamber is therefore not convinced that it should follow this decision’s reasoning.

6179. In the 1997 judgment concerning the attempted assassination of Minister Michel Murr, the Lebanese Judicial Council found for the purpose of convicting Mr Samir Geagea of instigating terrorism:

Whereas the attempted assassination of Minister Michel Murr on 20 March 1991 and the second car-bomb operation on 29 March 1991 involved the use of explosives, created panic among the population, killed and injured a number of persons, and destroyed residential and commercial buildings, they constituted terrorist acts within the meaning of article 314 of the Criminal Code, entailing the penalty prescribed in article 6 of the Law of 11 January 1958.¹¹²²⁰

It did not elaborate further on the *mens rea* of this crime.

6180. By contrast, in the 1998 judgment on the use of an unspecified ‘small quantity of explosives’, the Court of Cassation determined that the intention of the three accused did not reach the threshold for terrorism under Article 314. One explosion occurred at midnight in November 1997, 700 metres from a home in Al Jarran in the *Muhafaza* of Nabatieh, southern Lebanon. Another occurred in Al Marout, at an unspecified date in or after 1997, and a third in *Magharet el Leimoune*, around two weeks later. The court found that the accused intended only to achieve personal objectives, in the case of the Al Jarran explosion, or to test the explosives in the two others.¹¹²²¹

¹¹²¹⁹ *Fatieh* cassation decision 334/1953. The Trial Chamber has relied in part on the Appeals Chamber’s description of this decision, since the Trial Chamber has been able to obtain only a short extract from the decision.

¹¹²²⁰ *Murr* Judgment, p. 53. *See also* First interlocutory decision on applicable law, paras 60, 128.

¹¹²²¹ Cassation decision 85/1998, p. 5. *See also* First interlocutory decision on applicable law, fn. 84.

6181. In *Al-Rifai and others*, the Lebanese Judicial Council reached a similar finding in relation to bombings. As well as finding the absence of the *actus reus* for terrorism, the Council also concluded a lack of *mens rea*, because the accused did not intend to cause a state of terror. Instead, it found that the accused intended to harass shop owners to prevent them from selling alcohol or trading, as they considered these activities contradicted Islamic Sharia.¹¹²²² This finding and that in the 1998 explosives judgment described above can be limited to the facts of the cases.

6182. The Appeals Chamber referred to some of these decisions and concluded that establishing the special intent to cause a state of terror must be done on a case-by-case basis.¹¹²²³ The Trial Chamber agrees that this is the only way to determine whether an accused has the special intent necessary for a crime which requires it.

6183. The Appeals Chamber also accepted a Prosecution submission¹¹²²⁴ that in addition to the use of explosives, Lebanese courts consider relevant things such as: the social or religious status of the principal target, the commission of the attack in daylight in a street full of people, the collateral killing of bystanders and the destruction of residential and commercial buildings.¹¹²²⁵ The Trial Chamber agrees that these factors could also be considered according to the facts of each case. Moreover, these factors are pertinent to the attack on Mr Hariri in February 2005.

6184. The Prosecution and the Ayyash and Oneissi Defence appeared to accept the Appeals Chamber's characterisation of the *mens rea* of the crime as deliberately acting with the intent to cause a state of terror.¹¹²²⁶ The Merhi Defence did not directly address the Appeals Chamber's definition of this crime. The Oneissi Defence separately argues, concerning the Lebanese law on accomplice liability, that 'when the accused is alleged to be an accomplice to a terrorist act ... the required special intent to spread terror *may only* be inferred from the means used'.¹¹²²⁷ If this

¹¹²²² *Al-Rifai and others* Judgment, p. 10.

¹¹²²³ First interlocutory decision on applicable law, para. 60.

¹¹²²⁴ F0929, Prosecutor's Brief Filed Pursuant to the President's Order of 21 January 2011 Responding to the Questions Submitted by the Pre-Trial Judge (Rule 176 *BIS*), 31 January 2011, para. 30.

¹¹²²⁵ First interlocutory decision on applicable law, para. 60, fn. 85; *see also* paras 126-128.

¹¹²²⁶ Prosecution final trial brief, paras 1127-1130; Ayyash Defence final trial brief, para. 712, accepting the First interlocutory decision on applicable law as to the applicable law generally; Oneissi Defence closing submissions, T. 20 September 2018, pp 101, 103-120; Oneissi Defence final trial brief, para. 647—submitting generally that the First interlocutory decision on applicable law is binding—and para. 661, implicitly accepting the Appeals Chamber's definition by submitting that the perpetrators of the terrorist act alleged in this case must have intended 'to create a state of terror'.

¹¹²²⁷ Oneissi Defence final trial brief, para. 654 (emphasis added).

submission means that the *only* way to establish the requisite special intent of the perpetrator to cause a state of terror is by inference from the means used, the Trial Chamber rejects it, in light of the Lebanese case law considered above. But the Trial Chamber recognises that the *mens rea could* be inferred from the means, for example, a powerful bomb deliberately detonated in a crowded public place as in the hypothetical scenario above.

6185. Additionally, some Lebanese case law supports the view that to be liable for committing a terrorist act, the accused perpetrator must have known of the means to be used to commit the act. For example, in the *Murr* case the Lebanese Judicial Council apparently considered it necessary for even those accused as accomplices, rather than perpetrators, of terrorism, to know the operation in question ‘was to be executed by means of explosives’.¹¹²²⁸

6186. Considering these Lebanese judicial interpretations, the Trial Chamber believes that it is legally correct and reasonable to interpret Article 314 as requiring some level of knowledge of the means intended or used to commit the crime. This is also consistent with the Appeals Chamber’s interpretation.¹¹²²⁹ Accordingly, to commit a terrorist act by means of an explosive device, in contravention of Article 314, the Trial Chamber finds that the accused perpetrator must at least have known that it was to be committed by means of an explosive device.

6187. The Sabra Defence argues that if the Trial Chamber is ‘minded to apply international customary law *as per* the Appeals Chamber’s first interlocutory decision then it must consider *all* the elements of the offence of terrorism in international customary law including the requisite motive for the commission of a terrorist act, namely for a political, religious or ideological purpose’.¹¹²³⁰

6188. However, counsel conceded during their oral closing submissions, as they had to, that Lebanese law on its own contains no specific motive requirement in the definition of a terrorist act—that is, if that law is not interpreted in light of the customary international law

¹¹²²⁸ *Murr* Judgment, p. 56.

¹¹²²⁹ *For example*, First interlocutory decision on applicable law, para. 128, acknowledging that the aim and the result of the crime are ‘closely intertwined’.

¹¹²³⁰ Sabra Defence final trial brief, para. 810 (original emphasis). *See also* Sabra Defence final trial brief, paras 427-428; Sabra Defence closing submissions, T. 21 September 2018, pp 14-20, 56-57.

definition¹¹²³¹—assuming that definition’s existence of course. Moreover, as the Trial Chamber understood those closing submissions, the Sabra Defence’s primary submission concerning the alleged non-personal motive or purpose behind the attack of February 2005 was that this was a material fact the Prosecution should have pleaded in the amended consolidated indictment.¹¹²³² In other words, that it was directed more towards an alleged lack of notice of the details of the Prosecution’s case rather than the strict requirements of Article 314. In response, during its oral closing submissions the Prosecution explicitly, and in the Trial Chamber’s view correctly, rejected that motive must be proven to establish a terrorist act under Article 314.¹¹²³³

6189. The Appeals Chamber considered this issue in its first interlocutory decision and concluded that the customary international law definition that it had determined to exist did not include such a motive requirement.¹¹²³⁴ Although the Sabra Defence did not challenge this conclusion in its response to the Trial Chamber’s order in July 2017 to file legal submissions on the applicable law,¹¹²³⁵ the Sabra Defence later argued that the Appeals Chamber erred in this respect.¹¹²³⁶ Some academic commentary supports this view.¹¹²³⁷

6190. The Sabra Defence also submits that interpreting Article 314 in light of international law including this ‘additional requirement’¹¹²³⁸ would be consistent with Article 3 of the Lebanese Criminal Code, ‘which allows retroactive application of statutes that benefit the accused.’¹¹²³⁹

¹¹²³¹ Sabra Defence closing submissions, T. 21 September 2018, pp 15, 18. The Sabra Defence contrasted this with the definition of ‘political offences’ in Article 196 of the Lebanese Criminal Code, which specifically refers to motive, Sabra Defence closing submissions, T. 21 September 2018, p. 54.

¹¹²³² As discussed above at chapter II ‘The Prosecution’s pleaded case’, (B) (5) ‘Hezbollah and the political context’. As to it being the Sabra Defence’s primary submission concerning this issue, Sabra Defence closing submissions, T. 21 September 2018, pp 13-14, 57-59.

¹¹²³³ Prosecution closing submissions, T. 11 September 2018, p. 37, T. 14 September 2018, p. 74.

¹¹²³⁴ First interlocutory decision on applicable law, para. 98.

¹¹²³⁶ Sabra Defence final trial brief, paras 427-428; Sabra Defence closing submissions, T. 21 September 2018, pp 15-19.

¹¹²³⁷ Gillet and Schuster 2011, pp 1008-1009, cited by the Sabra Defence in its final trial brief, para. 427, fn. 818, and closing submissions, T. 21 September 2018, pp 15-16.

¹¹²³⁸ Sabra Defence final trial brief, paras 427-428.

¹¹²³⁹ Sabra Defence final trial brief, para. 428. Article 3 of the Lebanese Criminal Code provides, ‘Any statute that amends the definition of an offence in a manner that benefits the accused shall be applicable to the acts committed prior to its entry into force, unless an irrevocable judgment has been rendered.’

6191. The Trial Chamber does not agree. Lebanese law on this is clear. Article 192 of the Lebanese Criminal Code specifies that motive ‘shall not constitute an element of an offence except in cases specified by law.’ And Article 314 does not require a motive.

6192. But substantively, indeed conclusively, nothing in Article 2 of the Statute suggests that the Special Tribunal should examine the law of other nations, the case law of international criminal courts or tribunals or treaties and other international instruments, including those that are not legally binding—as the Appeals Chamber did in finding the existence of a customary international law definition of the offence of terrorism—in applying the ‘provisions of the Lebanese Criminal Code relating to the prosecution and punishment of acts of terrorism’. Despite the Appeals Chamber’s lengthy (41 page)¹¹²⁴⁰ *obiter dicta* on the apparent existence of a customary international law definition of terrorism, the Trial Chamber is not convinced that one exists. The Appeals Chamber extensively considered the international law that is binding on Lebanon and took it into account in interpreting Article 314.¹¹²⁴¹ In the Trial Chamber’s view this was unnecessary.

6193. The Statute contains only two obvious references to the laws of other nations or international law. Article 3 refers to superior responsibility and takes some modes of liability from the 1998 Rome Statute and the 1997 *International Convention for the Suppression of Terrorist Bombings*. Article 16 imposes some principles from international human rights law. So, even if an international customary definition of terrorism exists—which the Trial Chamber does not accept on the analysis in the Appeals Chamber’s decision—where substantive crimes are concerned, the Special Tribunal is only permitted by Article 2 of its Statute to apply the provisions of the Lebanese Criminal Code. It would thus be legally impermissible to apply an additional element of an alleged international offence to a crime specified in the Lebanese Criminal Code.

¹¹²⁴⁰ It has been critiqued in academic writings; *see for example*, Ambos LJIL 2011; Ambos *amicus curiae* brief 2011; Gillet and Schuster 2011, pp 1011-1014, 1018; Saul LJIL 2011; Saul *amicus curiae* brief 2011; Saul 2013; Kirsch and Oehmichen 2011. The Sabra Defence referred to some of this criticism in its final trial brief, para. 427, and closing submissions. T. 21 September 2018, pp 15-17. For the single example of this criticism that the Sabra Defence specifically identified.

¹¹²⁴¹ First interlocutory decision on applicable law, paras 63-113, disposition, 3. The Appeals Chamber did this so as to interpret the provisions of Lebanese legislation as it considered Lebanese courts would interpret them, namely, in light of applicable international law. First interlocutory decision on applicable law, para. 41, *see also* paras 45-46, 62, 71-82, 114-124, 147; Appeals Chamber decision on Defence requests for reconsideration of First interlocutory decision on applicable law, paras 6, 48.

6194. This approach may appear at first sight to be paradoxical, because as a matter of international law, Lebanon's customary obligations are part of the law applicable in that country. In the Trial Chamber's view, however, the clear language of the Statute must take precedence over an unwritten general policy aim of interpreting applicable Lebanese legislation exactly as Lebanese courts should, in theory, interpret them.

6195. In any event, as a matter of Lebanese *domestic* law and practice, customary international law rules criminalising an individual's conduct are not generally applied in criminal proceedings unless implemented in Lebanese legislation. The Appeals Chamber itself acknowledged this.¹¹²⁴² It also conceded that the Statute 'makes clear that codified Lebanese law, not customary international law',¹¹²⁴³ applies in the Special Tribunal and therefore a customary international law definition of terrorism 'cannot be directly applied' in its proceedings.¹¹²⁴⁴

6196. Finally—on the issue of the apparent existence of a customary rule that binds Lebanon after morphing into its national criminal laws—the Sabra Defence only very briefly described the sources that the Trial Chamber presumes it relies on to demonstrate the general State practice conforming with this alleged additional element of the definition and acceptance by States of its supposedly legally-binding nature.¹¹²⁴⁵ Those sources consist of several treaties, a draft treaty, UN General Assembly pronouncements and 'judicial and commisional analyses and national legislation'.¹¹²⁴⁶ The only further reference for these sources is the Appeals Chamber's discussion of them in its first interlocutory decision.¹¹²⁴⁷

6197. The Sabra Defence also cited one journal article criticising that decision.¹¹²⁴⁸ The Trial Chamber, however, does not consider this superficial examination of sources of customary law

¹¹²⁴² First interlocutory decision on applicable law, paras 114, 120, stating that 'customary rules *which are self-executing*' are binding within Lebanon (emphasis added); *see also* para. 76, defining self-executing and non-self-executing norms.

¹¹²⁴³ First interlocutory decision on applicable law, para. 123.

¹¹²⁴⁴ First interlocutory decision on applicable law, para. 123, original emphasis removed.

¹¹²⁴⁵ Or, to adopt the commonly used short-hand, the requisite State practice and *opinio juris sive necessitatis*. *See* Statute of the International Court of Justice, Art. 38 (1) (b); *North Sea Continental Shelf Judgment*, para. 77.

¹¹²⁴⁶ Sabra Defence final trial brief, para. 427. *See also* para. 810, in particular the assertion 'This [motive] requirement is reflected in various international conventions and domestic practice, and widely considered to be reflective of the definition of terrorism under international customary law'.

¹¹²⁴⁷ Sabra Defence final trial brief, fns 815-816.

¹¹²⁴⁸ Gillet and Schuster 2011. Sabra Defence final trial brief, para. 427, fn. 818; Sabra Defence closing submissions, T. 21 September 2018, pp 15-16.

sufficiently demonstrates the existence of this alleged customary motive requirement. For these additional reasons, the Trial Chamber is satisfied that, consistent with the plain wording of Articles 192 and 314 of the Lebanese Criminal Code, proof of motive is not an element of the offence of terrorism.

6198. Evidence of facts giving rise to a motive can still have some value when considering terrorism and the other offences charged in the case. In particular, where such evidence is before the Trial Chamber, it serves to contextualise the offences and will or may provide a reason for their commission. It can also provide evidence of an accused person's intent.

(c) Conclusion: the elements of a terrorist act

6199. In summary, the Trial Chamber has concluded that under the law applicable in the Special Tribunal, to commit a terrorist act by means of an explosive device, a person must:

1. perform an act using an explosive device that is liable to create a public danger;
2. know that the act is to be committed using an explosive device that is liable to create a public danger; and
3. intend to cause a state of terror.

2. Conspiracy aimed at committing a terrorist act

6200. Conspiracy is a substantive crime under Lebanese law, rather than a mode of liability as in some other legal systems. As earlier noted, Article 270 of the Lebanese Criminal Code provides that 'Any agreement concluded between two or more persons to commit a felony by specific means shall be qualified as a conspiracy'.

6201. Article 2 (a) of the Statute specifically identifies 'the rules regarding ... conspiracy' as being applicable in the Special Tribunal when they form part of the 'provisions of the Lebanese Criminal Code relating to the prosecution and punishment of acts of terrorism'.

6202. In this case, the Prosecutor alleges that the aim of the agreement was to commit a terrorist act by means of an explosive device, in order to kill Mr Hariri.¹¹²⁴⁹ More specifically, the

¹¹²⁴⁹ Amended consolidated indictment, paras 48, 51, 53-54.

Prosecutor alleges the Accused agreed to achieve their aim of killing Mr Hariri by detonating a large quantity of explosives in a public place¹¹²⁵⁰ and that:

- the Accused agreed on the conspiracy's aims with Mr Badreddine and as yet unidentified others;¹¹²⁵¹
- Mr Ayyash and Mr Merhi, together with Mr Badreddine, agreed on those aims at some time between 11 November 2004 and the morning of 14 February 2005 prior to the attack;¹¹²⁵²
- Mr Oneissi and Mr Sabra joined the conspiracy between 22 December 2004 and 14 February 2005, but again, no later than the morning of that day, before the attack;¹¹²⁵³ and
- either Mr Hariri's assassination by the alleged means 'intentionally with premeditation should',¹¹²⁵⁴ or each of the Accused 'foresaw and accepted the risk would',¹¹²⁵⁵ 'kill and attempt to kill others in the immediate vicinity of the explosion, and cause the partial destruction of buildings.'¹¹²⁵⁶

(a) The Appeals Chamber's interpretation of Article 270

6203. The Appeals Chamber concluded that conspiracy under Lebanese law consists of five elements.¹¹²⁵⁷ In its first and second interlocutory decisions on the applicable law, it described those elements as follows:

- first, conspiracy requires the participation of two or more people, though they need not all be identified for one of them to be prosecuted;¹¹²⁵⁸ 'a single person can be tried for

¹¹²⁵⁵ Amended consolidated indictment, para. 54 (f).

¹¹²⁵⁶ Amended consolidated indictment, para. 54 (g).

¹¹²⁵⁷ First interlocutory decision on applicable law, para. 194, fn. 302, citing in support (misdescribing the decision number as 124/1994) the *Balamand Monastery* Judgment cited in Elias Abou Eid, *Al-qararat al-kubra fi al-ijtihad al-loubnani wal-moukaran* [The major decisions in Lebanese and comparative jurisprudence], volume 22, p. 98.

¹¹²⁵⁸ First interlocutory decision on applicable law, para. 194, fn. 303 (citing in support El-Fadel 1963, p. 83), paras 195, 202 (a), disposition, 7 (a); second interlocutory decision on applicable law, paras 82, 84. There is a discrepancy

conspiracy, when it is proved that he agreed with others to commit the relevant crime, even though these “others” remain unknown’;¹¹²⁵⁹

- second, an agreement between those persons—a merger of their wills—is necessary.¹¹²⁶⁰ Not all the participants must reach this agreement at the same time; rather, additional participants can join the agreement later.¹¹²⁶¹ That occurs when the additional participant’s will merges with the other conspirators.¹¹²⁶² The agreement need not be secret; need not have any ‘specific form’¹¹²⁶³ or particular time-line;¹¹²⁶⁴ and can be conditional on the occurrence of a circumstance or event;¹¹²⁶⁵
- third, the aim of the agreement must be to commit a crime against State security. The position of Article 270 of the Lebanese Criminal Code and Article 7 of the Lebanese law of 1958 in the code shows that their scope is limited to this set of crimes.¹¹²⁶⁶ A terrorist act is a crime against State security.¹¹²⁶⁷ Since it is the only one of those crimes listed in Article 2 of the Statute, ‘for purposes of this Tribunal, the aim of the conspiracy *must be* a terrorist act’;¹¹²⁶⁸

between the year of publication of the textbook by Mohammed El-Fadel that the Appeals Chamber cited—1963—and that stated on the extract the Trial Chamber has obtained, 1965. An English translation of the latter forms part of Annex D to the Sabra Defence’s final trial brief, pp 104-111 (referring to the publication as ‘*Al-Jaraa’im Al-Waqi’a ‘ala Amin Al-Dawla*’). Other than this discrepancy, all signs are that it is the same publication.

¹¹²⁶⁰ First interlocutory decision on applicable law, paras 194 (citing in support El-Fadel 1963, p. 83), 196, 202 (b), disposition, 7 (b); second interlocutory decision on applicable law, paras 82, 84.

¹¹²⁶¹ First interlocutory decision on applicable law, paras 194, 196, 202 (b), disposition, 7 (b); second interlocutory decision on applicable law, para. 82.

¹¹²⁶² First interlocutory decision on applicable law, para. 196.

¹¹²⁶³ First interlocutory decision on applicable law, para. 196.

¹¹²⁶⁴ The Appeals Chamber stated regarding this issue, ‘no explicit time-line is required for the validity of the agreement. The agreement stands, even though it is a long-term one or has no predefined or foreseen term.’ First interlocutory decision on applicable law, para. 196.

¹¹²⁶⁵ First interlocutory decision on applicable law, para. 196.

¹¹²⁶⁶ Article 270 of the Lebanese Criminal Code is located in Book II of that Code, in Chapter I, ‘Offences against State security’. Article 7 of the Lebanese law of 1958, since it replaces Article 315 of the Lebanese Criminal Code, is located in the same chapter, specifically in sub-chapter II which concerns offences against internal State security. First interlocutory decision on applicable law, paras 193-194 (citing in support El-Fadel 1963, p. 83), 197-198, 202 (c), disposition, 7 (c); second interlocutory decision on applicable law, paras 82, 85 (citing in support El-Fadel 1963, pp 92-93 and El-Zoghbi 1995, volume 10, p. 39), disposition, C (a).

¹¹²⁶⁷ First interlocutory decision on applicable law, paras 197-198; second interlocutory decision on applicable law, fn. 73.

¹¹²⁶⁸ First interlocutory decision on applicable law, para. 202 (c), disposition, 7 (c) (emphasis added). *See also* para. 198; second interlocutory decision on applicable law, para. 85, fns 73, 85.

- fourth, the participants must agree on the means to carry out the crime.¹¹²⁶⁹ They must ‘predetermine’ that means.¹¹²⁷⁰ The Appeals Chamber also stated in its first interlocutory decision that the participants’ agreement must ‘contemplate the means *and tools* that the conspirators want to use to commit the crime’¹¹²⁷¹—but elsewhere in that decision seemed to use ‘means’ and ‘tools’ interchangeably,¹¹²⁷² and did not otherwise refer to ‘tools’ when analysing the crime of conspiracy in either of its decisions on the applicable law.¹¹²⁷³ Where the charge is conspiracy aimed at committing a terrorist act, as is charged in this case, the conspirators must agree on means that fall within Article 314 of the Lebanese Criminal Code, namely, means liable to create a public danger.¹¹²⁷⁴ However, provided that requirement is met, ‘a precise determination of the means is not required. If the conspirators agree that they will use a means described as terrorist, it is sufficient to say that they agree on the means to execute the agreement’;¹¹²⁷⁵ and
- finally, the participants must have criminal intent.¹¹²⁷⁶ If a participant has reached or joined an agreement that meets the criteria set out in the bullet points above, they automatically have the requisite criminal intent,¹¹²⁷⁷ unless they believe that the conspiracy is lawful. As the Appeals Chamber expressed it, ‘the mere existence of the agreement fulfils the criminal intent. Criminal intent does not materialise if a co-conspirator believed that the conspiracy, which afterwards turned out to be unlawful, was instead lawful’.¹¹²⁷⁸

¹¹²⁶⁹ First interlocutory decision on applicable law, paras 199 (citing in support El-Fadel 1963, p. 94), 202 (d), disposition, 7 (d); second interlocutory decision on applicable law, paras 82, 86-87, disposition, c (a).

¹¹²⁷⁸ First interlocutory decision on applicable law, para. 200.

6204. The Appeals Chamber also observed, regarding the intent required for conspiracy, that ‘As with all intentional crimes, the motive is not taken into consideration, unless to mitigate or aggravate the sentence.’¹¹²⁷⁹ In light of Article 192 of the Lebanese Criminal Code and the Lebanese case law, the Trial Chamber interprets the statement that ‘the motive is not taken into consideration’ as meaning that motive is not an element of the crime of conspiracy itself. Applying Article 192, Lebanese courts still need to take motive ‘into consideration’ if motive is a specified element of the crime against State security that is the alleged object of the conspiracy.¹¹²⁸⁰

6205. In addition, the Appeals Chamber concluded that, provided that the five elements of conspiracy are established, for the conspirators to incur criminal liability it does not matter that the envisaged crime was not actually executed. Once the merger of wills has taken place, so has the crime of conspiracy. Therefore, Lebanese law does not recognise ‘attempted’ conspiracy.¹¹²⁸¹

(b) Sources of principles on conspiracy

6206. The Appeals Chamber noted that ‘the Lebanese case law on conspiracy is very sparse’.¹¹²⁸² It confined its analysis to one Lebanese judgment, the 1994 *Balamand Monastery* judgment concerning the premature explosion of a device that was intended to detonate under a bus carrying religious leaders.¹¹²⁸³ It also cited some publications¹¹²⁸⁴ and submissions made by the Prosecution and the Defence Office in 2011 and 2017.¹¹²⁸⁵

¹¹²⁷⁹ First interlocutory decision on applicable law, para. 200.

¹¹²⁸⁰ In the *Camille Chamoun* Judgment, the Lebanese Judicial Council adopted this approach at pp 10-11, finding motive was a specified element of the crime defined in Article 2 of the Lebanese law of 1958. See also the summary of principles on conspiracy from Lebanese Judicial Council judgments in Alia 1987, p. 168, specifically the statement ‘Criminal intent is inferred from motive if it is deemed an element of crimes against the security of the state’, and the similar statement in Alia 1999, p. 89.

¹¹²⁸¹ First interlocutory decision on applicable law, para. 200, fns 308-309, citing in support F0929, Prosecutor's Brief Filed Pursuant to the President's Order of 21 January 2011 Responding to the Questions Submitted by the Pre-Trial Judge (Rule 176 *BIS*), 31 January 2011, para. 51, quoting the *Balamand Monastery* Judgment and El-Fadel 1963, p. 97.

¹¹²⁸² First interlocutory decision on applicable law, fn. 302.

¹¹²⁸³ First interlocutory decision on applicable law, fns 302, 308. For the facts of the *Balamand Monastery* Judgment.

¹¹²⁸⁴ First interlocutory decision on applicable law, fns 303-304, 306-307, 309, 311; second interlocutory decision on applicable law, fn. 84, referring to Alia 1999; Elias Abou Eid, *Al-qararat al-kubra fi al-ijtihad al-loubnani wal-moukaran* [The major decisions in Lebanese and comparative jurisprudence], volume 22; El-Fadel 1963, pp 86-87; El-Zoghbi 1995, volume 9, Conspiracy, Chapter 2.1.2: ‘Simple Agreement’.

¹¹²⁸⁵ First interlocutory decision on applicable law, paras 191-192, fn. 308, referring to F0929, Prosecutor's Brief Filed Pursuant to the President's Order of 21 January 2011 Responding to the Questions Submitted by the Pre-Trial Judge (Rule 176 *BIS*), 31 January 2011; F0930, Defence Office's Submissions Pursuant to Rule 176 *bis* (B), 31 January 2011; second interlocutory decision on applicable law, paras 5, 7, 90, fn. 102, referring to STL-17-07/I/AC/R176bis, F0013, Prosecution Submissions pursuant to the Appeals Chamber Scheduling Order of 24 August

6207. The Lebanese Judicial Council in *Balamand* neither found that any accused had committed conspiracy¹¹²⁸⁶ nor analysed its application to terrorism, the felony against State security alleged. It identified the elements of the crime, then proceeded to consider instead whether the accused had committed the crimes of terrorism and attempted intentional homicide and find some of them had.¹¹²⁸⁷ Apparently this was because it considered that ‘if the plotters dispense with preparatory or preliminary measures and begin directly to execute their plot, the conspiracy becomes an attack on the security of the state, and the perpetrators are liable to penalties as attackers rather than conspirators’.¹¹²⁸⁸

6208. The Lebanese Criminal Code, however, does not require this approach.¹¹²⁸⁹ It also diverges from some earlier judgments of the Council, where it appears to have accepted that an accused could be convicted of both conspiracy to commit terrorism and terrorism itself.¹¹²⁹⁰

6209. *Balamand* and *Murr* were the only two Lebanese judgments cited by the Parties in their submissions on conspiracy that actually referred to the crime defined in Article 270.¹¹²⁹¹ In *Murr*, for reasons that are unclear, the Lebanese Judicial Council declined to apply that crime to the facts

2017, 7 September 2017; STL-17-07/I/AC/R176bis, F0012, Public Redacted Version of the “Defence Office Submissions Following the Order of the Appeals Chamber Dated 24 August 2017” Dated 7 September 2017, 11 September 2017; STL-17-07/I/AC/R176bis, F0015, Prosecution Response to Defence Office Submissions of 7 September 2017 and Request to the Appeals Chamber arising from Defence Office Submissions, 14 September 2017; STL-17-07/I/AC/R176bis, F0016, Defence Office Response to the Prosecution Submissions on the Applicable Law of 7 September 2017, 14 September 2017; and oral submissions made at a public hearing on 11 October 2017.

¹¹²⁸⁶ As the Appeals Chamber acknowledged this in its First interlocutory decision on applicable law, fn. 302.

¹¹²⁸⁷ *Balamand Monastery* Judgment, pp 12-16.

¹¹²⁸⁸ *Balamand Monastery* Judgment, p. 13, citing El-Fadel, *Crimes against State security*, pp 80-119.

¹¹²⁸⁹ The only relevant restriction appears in Article 181, in a sub-section of the code entitled ‘Notional plurality of offences’. Article 181 provides, ‘If an act has several qualifications, they shall all be mentioned in the judgement and the Judge shall impose the heaviest penalty. However, if both a general provision of criminal law and a special provision are applicable to the act, the special provision shall be applied.’

¹¹²⁹⁰ For example, see the extracts from Judicial Council judgment 76/1959 and Judicial Council judgment 79/1959 in Alia 1987, appendix. The Trial Chamber has been unable to obtain a complete copy of either judgment.

¹¹²⁹¹ The Sabra Defence cited the *Balamand Monastery* Judgment in its written submissions on the law applicable to conspiracy in its final trial brief, fns 1511, 1514-1515, 1517. The Merhi Defence cited both the *Murr* Judgment and the *Dany Chamoun* Judgment in its final trial brief, para. 583, fn. 1102, in support of a legal submission apparently concerning both conspiracy and complicity, but in fact the passages cited relate only to complicity. The *Dany Chamoun* Judgment does not refer to the crime of conspiracy under Article 270 at all.

of the case, even though it was charged.¹¹²⁹² The only felonies that it considered¹¹²⁹³ were terrorism, intentional homicide and attempted intentional homicide. It found that several of those accused either co-perpetrated or were accomplices to those crimes, while another accused, Samir Geagea, instigated the relevant crimes.¹¹²⁹⁴

6210. The Trial Chamber therefore undertook its own searches in an attempt to identify more Lebanese case law on conspiracy, but found scant case law generally, and only a few judgments that determined that an accused had committed the crime.

6211. They include one judgment concerning a plot to assassinate a political leader, the Lebanese Judicial Council's 1969 judgment on the attempted assassination of the former Lebanese president, Mr Camille Chamoun. In that case, two Syrians became aware that Mr Muhammad Nabil Akkari had been saying that he wished to assassinate Mr Chamoun. In 1966, they approached him offering their assistance, including money, weapons and help in securing his escape after the murder. In 1968, after some meetings between the three and unsuccessful efforts to carry out their plan, they drove to the offices of the Lebanese National Liberal party, outside where Mr Akkari shot and wounded Mr Chamoun while the other two waited in the car. Mr Akkari was arrested, while the two Syrians escaped and 'the investigation was unable to uncover' their identities. Two others alleged to have been involved were tried with Mr Akkari.¹¹²⁹⁵

6212. The Council found that Mr Akkari had conspired with the Syrians to assassinate Mr Chamoun and thus co-perpetrated a conspiracy to commit the crime against State security

¹¹²⁹² The Lebanese Judicial Council's only comment on the crime of conspiracy in the *Murr* Judgment was at p. 53: 'Whereas the indictment decision charged Samir Geagea with the two criminal offences defined in Articles 270 and 271 of the Criminal Code; Whereas the said Articles 270 and 271 define the offence of conspiracy and specify cases involving an attack on state security, but contain no provisions regarding charges or penalties, it would be inappropriate to apply their provisions in the context of the offences defined and the penalties prescribed in respect of the facts ascertained in the case of the accused. The conclusion that may be drawn from this with respect to the accused Samir Geagea is also applicable to the other accused mentioned in the indictment decision in connection with those two Articles'. It is unclear why the Lebanese Judicial Council did not consider Article 7 of the Lebanese law of 1958 which, as set out above, prescribes the penalty for conspiracy.

¹¹²⁹³ The Lebanese Judicial Council in the *Murr* Judgment also considered, and convicted some accused of, a misdemeanour relating to weapons.

¹¹²⁹⁴ *Murr* Judgment, pp 52-53. As the Lebanese Judicial Council explained, it convicted Mr Geagea of instigation of terrorism and intentional homicide only, not attempted intentional homicide, because under Article 218 of the Lebanese Criminal Code, instigation of a crime is punishable with the penalty for the crime the instigator wished to cause the commission of, irrespective of whether the crime was complete, attempted or abortive.

¹¹²⁹⁵ *Camille Chamoun* Judgment, pp 1-10.

defined in Article 2 of the Lebanese law of 1958.¹¹²⁹⁶ That crime requires certain specified acts intended to provoke civil war or sectarian conflict, or to incite murder, pillage or vandalism. It found that the two other accused were accomplices to Mr Chamoun's attempted murder, for having given Mr Akkari some help, but had not joined the three conspirators' agreement.¹¹²⁹⁷

6213. In 1959, the same court appears to have found that six accused had conspired to commit a terrorist act. One, a Mr Farouk, had 'repeatedly contacted' another, Mr Georges, telling him that he (Mr Farouk) intended to detonate bombs to cause unrest and terror, and requesting Mr Georges's vehicle and help. Subsequently, one night, Mr Georges went to Mr Farouk's house with two others, Mr Nasri and Mr Farid. There, after a discussion, the four decided it was 'a suitable opportunity to detonate a bomb' at a particular bus stop. They travelled to the house of another person, Mr Salim, to invite him to participate and 'as soon as he knew about the matter' he summoned the sixth man, Mr Hussein, 'by telephone from his place of work, and Hussein arrived immediately'. The five informed Mr Hussein 'of their idea and their intent' and Mr Georges, Mr Nasri and Mr Farid showed the other three 'the location of the bus'. The first three then left, while Mr Salim drove Mr Farouk and Mr Hussein to where Mr Hussein detonated a grenade in the middle of a crowded street, injuring a passer-by and causing fragments to hit the walls of buildings.¹¹²⁹⁸

6214. The Council found that 'the actions of the six accused regarding their final meeting in Salim's house, in which they agreed to commit the act being considered in this case, pertain to a conspiracy and its sentence as stipulated in Article 7 of the Law of 11 January 1958.'¹¹²⁹⁹ It also seems to have found that Mr Salim's, Mr Farouk's and Mr Hussein's involvement in detonating the grenade constituted co-perpetration of a terrorist act and that Mr Georges and Mr Nasri were accomplices to the commission of that act.¹¹³⁰⁰

¹¹²⁹⁶ *Camille Chamoun* Judgment, pp 10-12, 14.

¹¹²⁹⁷ *Camille Chamoun* Judgment, pp 12-14.

¹¹²⁹⁸ Extract from Judicial Council judgment 79/1959 in Alia 1987, appendix. The Trial Chamber was unable to obtain a complete copy of this judgment.

¹¹²⁹⁹ Extract from Judicial Council judgment 79/1959 in Alia 1987, appendix.

¹¹³⁰⁰ Under Article 219 (1) of the Lebanese Criminal Code in conjunction with Article 6 of the Lebanese law of 1958. It is unclear from the Trial Chamber's extract of the judgment why the court did not make the same finding concerning the sixth accused, Mr Farid.

6215. In a 1964 decision, the Military Court of Cassation noted that a previous judgment had found that:

- some people who attended certain meetings at two different houses, including an accused named Mohamed, had agreed to perform acts including ‘assaults using terrifying means against persons and against an official institution, namely the Embassy of the Republic of ... in Beirut’;¹¹³⁰¹
- ‘breaching security was the primary motive behind the intended acts, which were to be executed by means of explosives expressly prepared for that purpose’;¹¹³⁰² and
- these circumstances ‘amounted to terrorist acts intended to be committed on the basis of an agreement with others, and therefore amounted to a conspiracy by the accused named Mohamed, which is the offence stipulated and provided for in Articles 6 and 7 of the Law of 11 January 1959’.¹¹³⁰³

However, no additional information is available regarding either the facts of this case or the Court’s ultimate finding.¹¹³⁰⁴

6216. Given the dearth of Lebanese case law on conspiracy, the Trial Chamber has also examined in detail several academic texts that analyse this crime under Lebanese law, including all of those cited by the Appeals Chamber.¹¹³⁰⁵ While the Trial Chamber has taken these sources into account, like the case law they are at best aids to interpretation. The only binding source of Lebanese legal

¹¹³⁰¹ Name omitted in the Trial Chamber’s extract. Extract from Military cassation decision 125/1964 in Judge Jabran Mansour, Collected Decisions of the Military Court of Cassation, p. 2.

¹¹³⁰² Extract from Military cassation decision 125/1964 in Judge Jabran Mansour, Collected Decisions of the Military Court of Cassation, p. 2.

¹¹³⁰³ Extract from Military cassation decision 125/1964 in Judge Jabran Mansour, Collected Decisions of the Military Court of Cassation, p. 2. The date ‘1959’ in the passage quoted appears to be a typographical error, the correct year being 1958, as stated above. The Appeals Chamber referred to the Lebanese Judicial Council’s definition of terrorism in this decision, in its First interlocutory decision on applicable law, para. 51. For the Trial Chamber’s analysis of that definition.

¹¹³⁰⁴ The Trial Chamber is also unaware of the factual basis for the Lebanese Judicial Council’s apparent finding that an accused committed the crime of conspiracy to commit terrorism—as well as the crime of terrorism itself—in Judicial Council judgment 76/1959. Likewise, the Trial Chamber does not know the facts underlying Judicial Council judgment 79/1958. In that judgment, the Lebanese Judicial Council apparently rejected an appeal from another court’s decision finding an accused guilty of conspiracy to commit a crime, or crimes, not charged in this case.

¹¹³⁰⁵ Alia 1999; El-Fadel 1965, pp 86-87; El-Zoghbi 1995, volume 9, Conspiracy, Chapter 2.1.2: ‘Simple Agreement’. The Appeals Chamber also referred to a fourth publication, in fn. 302 of its First interlocutory decision on applicable law, by citing the *Balamand Monastery* Judgment ‘cited in Elias Abou Eid, *Al-qararat al-kubra fi al-ijtihad al-loubnani wal-moukaran* [The major decisions in Lebanese and comparative jurisprudence], volume 22, at 98’.

principles on this crime remains the Lebanese Criminal Code itself.¹¹³⁰⁶ The Trial Chamber must also consider any applicable principles of international human rights law.

(c) Elements 1 to 3 and 5: participants, agreement, aim and intent

6217. The first and third elements of the crime of conspiracy are straightforward and the Trial Chamber agrees with the Appeals Chamber's description of them, set out in the first and third bullet points above. The need to show that there were two or more participants and—in this case—that their aim was to commit a terrorist act as defined in Article 314 is apparent from the Lebanese Criminal Code itself, read in conjunction with Article 2 of the Statute. The code does not contain any requirement that the prosecuting authority must identify every participant in the conspiracy to prove that the crime occurred.

6218. The *Camille Chamoun* case illustrated that when the prosecuting authority cannot do so, Lebanese courts will still convict an accused of this crime.¹¹³⁰⁷ In any event, in the Special Tribunal, the question of precisely what information about alleged co-conspirators must appear in an indictment is a procedural one, of notice, and is thus to be determined principally by reference to non-Lebanese legal sources.¹¹³⁰⁸

6219. The Trial Chamber also agrees with the Appeals Chamber's description of the second element of conspiracy, namely the requirement for an agreement, set out in the second bullet point of paragraph 6203 above. Most of the specific features the Appeals Chamber described do not appear in the applicable Lebanese legislation. Article 270 relevantly confirms only that an 'agreement' must be 'concluded'.

6220. However, the Lebanese Judicial Council elaborated on this element of the crime in *Balamand*, as follows:

The agreement: This is the offence in itself. It means convergence of intent and unity of will among the conspirators, with the firm, final, definitive and uncontested aim of achieving a single goal; with the coordination of the various roles which they distribute

¹¹³⁰⁶ Ostensibly Article 7 of the Lebanese law of 1958—which concerns the penalty for entering into a conspiracy—also applies in the Special Tribunal's proceedings. However, it is subject to Article 24 of the Statute. In any case, this Article offers no guidance regarding the definition of the crime.

¹¹³⁰⁷ *Camille Chamoun* Judgment, pp 10, 14.

¹¹³⁰⁸ Rule 3 (A). See chapter II 'The Prosecution's pleaded case', (B) (2) 'Legal standard—notice'.

among themselves and the existence of a definitive decision supported by a positive intention to commit a specific crime. This need not necessarily take the form of a permanent organisation or of an ongoing organised association with ranks, structures and leaders to direct its activities. It is sufficient for there to be unity of wills, which come together and aim at the intended goal. Moreover it need not be secret, but could also be conceived as being a public affiliation.¹¹³⁰⁹

6221. The references to the ‘form’ of the agreement in that description centre on the form of the relationship between the participants. The same is true of all of the secondary sources the Appeals Chamber relied on regarding conspiracy.¹¹³¹⁰

6222. The Trial Chamber therefore interprets the Appeals Chamber’s conclusion as that the participants’ agreement need not have any ‘specific form’ as encompassing that issue. It is immaterial whether the participants’ agreement is oral or written. And the participants need not belong to a formal, ongoing or permanent organisation. The Lebanese judicial decisions in which conspiracy was found to have been committed, surveyed above, support this interpretation.

6223. Neither the *Balamand Monastery* judgment, nor any other Lebanese judicial decision of which the Trial Chamber is aware, considered whether any particular time frame is necessary or whether the relevant agreement may be conditional, meaning that the participants will proceed only if a specified future event occurs. No decisions the Trial Chamber has surveyed examined whether, *as a matter of law*, co-conspirators may join the conspiracy at different times, either, although in at least two of them—*Camille Chamoun* and the 1959 judgment summarised above—the Lebanese Judicial Council apparently found that the conspirators reached their agreement at the same time.¹¹³¹¹ The Lebanese case law surveyed therefore neither supports nor contradicts the Appeals Chamber’s view on the issues of timing and conditionality of the agreement.

¹¹³⁰⁹ *Balamand Monastery* Judgment, pp 12-13.

¹¹³¹⁰ Alia 1999, pp 82-83, relevantly states that the agreement constituting a conspiracy ‘does not have to take place through an organisation, an association or an existing political party. It can be valid through any union of wills towards the crime regardless of the form or nature of the organisation’. Similar statements appear in El-Fadel 1965, pp 86-87 and El-Zoghbi 1995, volume 9, Conspiracy, Chapter 2.1.2: ‘Simple Agreement’.

¹¹³¹¹ *Camille Chamoun* Judgment; Judicial Council judgment 79/1959.

6224. But several commentators, including three the Appeals Chamber cited in its analysis of other elements of this crime, expressly share that view.¹¹³¹² As this view also appears to the Trial Chamber to be reasonable in light of the broad wording of Article 270, namely ‘*Any* agreement concluded between two or more persons’ the Trial Chamber accepts it as legally correct. That is, the agreement need not have any particular time frame, it may be conditional in the sense described and conspirators may either initially ‘reach’ or later ‘join’ it.

6225. Whenever a conspirator joins, however, it is essential that at that point, their own will unites with that of every other conspirator, in the sense described by the Lebanese Judicial Council in *Balamand*. This is implicit in Article 270’s description of an ‘agreement’—in the singular—‘between’ the conspirators. The Merhi and Sabra Defence specifically emphasise this requirement.¹¹³¹³

6226. In support, both cite the Appeals Chamber’s first interlocutory decision on the applicable law.¹¹³¹⁴ The Sabra Defence cites *Balamand*¹¹³¹⁵ and several secondary sources.¹¹³¹⁶ The Merhi Defence also relies on the ICTR’s *Seromba* Appeal Judgment and in particular its analysis of the *actus reus* of conspiracy to commit genocide.¹¹³¹⁷ This judgement, however, merely confirmed the existing international case law that the ‘*actus reus* of conspiracy to commit genocide is the making of an agreement between two or more persons to commit genocide’ and, further, that this could be established by circumstantial evidence.¹¹³¹⁸ While this is legally correct on both points, it takes things no further. For the reasons earlier stated, the Trial Chamber considers it unnecessary to refer to international case law to interpret the crimes under Lebanese law charged in this case.

¹¹³¹² On participants joining at different times and conditionality: El-Zoghbi 1995, volume 9: ‘Crimes against the security of the State’, chapter 2: ‘Elements of the Conspiracy’, section 2.1.4, chapter 3: ‘Legal Issues’, section 3.2.1; Jaafar 2000, pp 27-28, 32. On conditionality and time frame: El-Fadel 1965, pp 86-87; Alia 1999, p. 83. On participants joining at different times: Nasr 2009, p. 534. The Appeals Chamber cited El-Zoghbi 1995, in its Second interlocutory decision on applicable law, fn. 84; El-Fadel 1963, in its First interlocutory decision on applicable law, fns 303-304, 306, 309, 311 and Second interlocutory decision on applicable law, fn. 84; and Alia 1999, in its First interlocutory decision on applicable law, fns 307, 311.

¹¹³¹³ Merhi Defence final trial brief, paras 415-416, 422; Sabra Defence final trial brief, para. 805.

¹¹³¹⁷ Merhi Defence final trial brief, para. 422, fn. 809, citing *Seromba* Appeal Judgment, paras 218-221.

¹¹³¹⁸ *Seromba* Appeal Judgment, para. 221.

6227. The Trial Chamber also accepts that the crime of conspiracy is automatically, and wholly, committed once an agreement meeting the definition in Article 270 exists; the agreement is the essence of the crime. It follows that there is no such thing as an attempted conspiracy and that conspirators are criminally liable under Article 270 whether or not they actually achieve their aim. The Lebanese Judicial Council has adopted this view,¹¹³¹⁹ most commentators agree with it¹¹³²⁰ and it is a reasonable and legally valid interpretation of the Lebanese Criminal Code.

6228. The Trial Chamber agrees with the core of the Appeals Chamber's definition of the fifth element of conspiracy that it identified, namely criminal intent. It is logical that if accused persons reach or join the relevant agreement—that is, satisfying the four other elements—they necessarily have the intention to carry out the aim of the conspiracy and nothing else is needed to prove the crime's mental component. Nothing in the code contradicts this interpretation. It is also consistent with the required intent found in *Balamand*, namely, 'The criminal intent: a conspiracy is a deliberate criminal offence. That is to say, an individual seriously and sincerely intends to participate in the agreement, knowing that the purpose is to commit a specific criminal offence against state security.'¹¹³²¹

6229. The Trial Chamber, however, disagrees with the Appeals Chamber's apparent conclusion that intent cannot exist if the accused believed the conspiracy was lawful, since on its face this is inconsistent with the Lebanese Criminal Code. To perpetrate any crime an accused must meet the

¹¹³¹⁹ For example, in the *Balamand Monastery* Judgment, the Lebanese Judicial Council stated at p. 13: 'The issue of whether a conspiracy exists is unaffected by the fact that the purpose has been determined, for it is a separate and complete offence in itself. Nor is it affected by the fact that the plotters have agreed on the execution of their plot or have been unable to execute it'. The Lebanese Judicial Council also implicitly agreed there can be no attempted conspiracy, for example by stating that the agreement 'is the offence itself', and that 'Where it is the case that the means have not been designated and agreed on, the agreement is incomplete, and consequently the conditions for the existence of a conspiracy are not fully met and no penalty is incurred.' *Balamand Monastery* Judgment, p. 13. See also Judicial Council judgment 241/1963, in which the Lebanese Judicial Council overturned another court's decision purporting to apply Article 201 of the Lebanese Criminal Code to conspiracy—and thus 'considering the offence a conspiracy attempt'—on the basis that it contradicted the same court's finding that the accused was guilty of conspiracy itself.

¹¹³²⁰ Jaafar 2000, pp 30, 35; Nasr 2009, p. 534; El-Zoghbi 1995, volume 9, Conspiracy, chapter 1: 'Legal Status', section 1.B.1, chapter 3.3: 'Legal Issues: Prosecution and Withdrawal'. The Appeals Chamber cited in relation to this issue El-Fadel 1963, p. 97, First interlocutory decision on applicable law, fn. 309. However, the Trial Chamber's copy of El-Fadel's publication does not mention either the concept of attempted conspiracy or the irrelevance of whether the conspirators achieve their aim.

¹¹³²¹ *Balamand Monastery* Judgment, p. 13.

code's general standard of consciously and willingly committing the act.¹¹³²² Under Article 224, a mistake of *fact*—not law—will also preclude an accused from being criminally liable.¹¹³²³

6230. However, Article 223 of the code makes clear that it is generally irrelevant if an accused was ignorant of or misinterpreted criminal law.¹¹³²⁴ The Lebanese judicial decisions on conspiracy surveyed by the Trial Chamber do not support the view that a mistaken belief in the legality of the conspiracy, *as opposed to a mistake of fact*, will preclude liability. Some secondary sources express a similar view,¹¹³²⁵ but the Trial Chamber considers that in each instance either it is unclear whether the commentator was referring to an accused's mistaken belief that the conspiracy was lawful, or their analysis was inaccurate in light of Article 223.

6231. The Parties appear to accept, in substance, the first, second, third and fifth elements of the crime of conspiracy, as interpreted by the Trial Chamber above.¹¹³²⁶ The Parties' submissions on the intent required to establish the *mens rea* of conspiracy are framed in quite different ways,¹¹³²⁷ but the Trial Chamber has not identified any substantive legal difference between them regarding this issue.

¹¹³²² Set out in Article 210 of the code.

¹¹³²³ Article 224 provides:

Anyone who acted on the basis of an error of fact pertaining to one of the elements of an offence shall not be punishable as a perpetrator or instigator of, or as an accomplice to, an intentional offence.

If the error related to an aggravating circumstance, he shall not be held responsible for it. On the contrary, he shall benefit from the excuse that he was unaware of its existence.

These provisions shall be applicable in the case of the identity of the victim being mistaken.

¹¹³²⁴ Article 223 provides:

No one may plead ignorance of criminal law or misinterpretation of its provisions. The following, however, shall be deemed to constitute an impediment to conviction:

1. Ignorance or a material error pertaining to a civil or administrative law on which conviction depends;
2. Ignorance of a new law if the offence is committed within three days of its promulgation;
3. Ignorance on the part of a foreigner who has been in Lebanon for not more than three days of a positive-law offence that is not punishable under the laws of his country or the laws of the country in which he resided.

¹¹³²⁵ Alia 1999, p. 88; Nasr 2009, p. 532; El-Zoghbi 1995, volume 9, Conspiracy, chapter 2.5: 'Elements of the Conspiracy: Criminal Intent'.

¹¹³²⁶ Prosecution final trial brief, paras 1138-1139; Ayyash Defence final trial brief, paras 712, 721-727; Merhi Defence final trial brief, paras 403-456; Merhi Defence closing submissions, T. 18 September 2018, pp 94-95; Oneissi Defence final trial brief, paras 637-643; Sabra Defence final trial brief, paras 437, 453, 804-807.

¹¹³²⁷ Ayyash Defence final trial brief, paras 721-722, 726-727, particularly para. 726 referring to 'a conspiracy with shared intent'; Merhi Defence final trial brief, paras 574-578; Oneissi Defence final trial brief, paras 638, 721; Sabra Defence final trial brief, para. 807. The Prosecution simply summarised—without comment—the elements identified by the Appeals Chamber, in a way consistent with the Trial Chamber's interpretation of them, in its final trial brief, para. 1138.

6232. An additional question regarding the second element—the need for an agreement—is whether a group can conclude an agreement, within the meaning of Article 270, if some members do not know each other and do not know that each of them belongs to the group. The Appeals Chamber did not deal with this question in its interlocutory decisions.¹¹³²⁸

6233. One view is that it would distort the concept of a conspiracy that appears in Article 270 and Lebanese judicial decisions to find accused can mentally ‘converge’¹¹³²⁹ and ‘unite’¹¹³³⁰ with one another as required, without at least knowing of each other’s participation. The Merhi Defence more or less made this argument in written submissions,¹¹³³¹ but subsequently resiled from it in oral closing submissions.¹¹³³² Unquestionably, the scenario of conspirators being unaware of one another—either their existence or their identity—is very different to the known examples of judicially-determined conspiracy in Lebanon, described above, where all co-conspirators apparently met face-to-face.¹¹³³³

6234. However, the contrary view is that accused can still ‘conclude’ an ‘agreement’ to commit a felony by specific means without knowing even of the existence of all their fellow conspirators. This is because each one individually can still know they are part of a group, have the required common aim to perpetrate a crime against the security of the State, know what means the group intends to use to perpetrate that crime¹¹³³⁴ and make a definite commitment to carrying out that aim.

6235. Each person may communicate with a lead conspirator who provides them with the necessary information and to whom they convey their personal commitment. Arguably, *Balamand*

¹¹³²⁸ Compare, the Appeals Chamber’s conclusion that some participants may ‘remain unknown’. From the context, including the sources the Appeals Chamber cited, it is clear that that conclusion concerned whether prosecuting authorities know or can prove all the conspirators’ identities—not the conspirators’ knowledge of one another.

¹¹³²⁹ *Balamand Monastery* Judgment, p. 12.

¹¹³³⁰ *Balamand Monastery* Judgment, pp 12-13.

¹¹³³¹ Specifically, the Merhi Defence submitted that if the users of Green 300 and Green 071 (Mr Ayyash and Mr Merhi, according to the Prosecution) ‘did not know each other and did not know that the other was part of the Green Network, it would be difficult to accept the suggestion that there could have been a merger of wills between Merhi and Ayyash, and that there had been a consolidation and union of their wills.’ Merhi Defence final trial brief, para. 418.

¹¹³³² Lead counsel for Mr Merhi relevantly stated during closing submissions, ‘The Prosecutor talked about ten co-conspirators. I’m not saying that all the ten conspirators must know one another’. Merhi Defence closing submissions, T. 18 September 2018, p. 107.

¹¹³³³ Judicial Council judgment 79/1959; unknown judgment described in Military cassation decision 125/1964; *Camille Chamoun* Judgment.

¹¹³³⁴ Though what exactly they need to know about that means is a separate question, discussed below.

contemplated this scenario, since the Lebanese Judicial Council clearly considered that conspiracies can be highly organised and hierarchical, even though legally they do not have to be.¹¹³³⁵ Article 270 does not preclude this interpretation. Indeed, in the Trial Chamber's view, it is the more logical and legally correct interpretation. Therefore, the Trial Chamber accepts it.

(d) Element 4: agreement to commit a terrorist act 'by specific means'

6236. The final legal question regarding conspiracy, and the only one on which the Parties fundamentally differ, is what do the words '*by specific means*' signify in the definition in Article 270, 'Any agreement concluded between two or more persons to commit a felony by specific means'?

6237. As with accomplice liability, the Prosecution on the one hand, and the Defence of the four Accused on the other, disagree about the extent of knowledge that each accused must have of an alleged terrorist plot to incur criminal liability under Lebanese law.

6238. The Appeals Chamber apparently concluded that to be liable for conspiracy to commit a terrorist act, first, those accused must have agreed to use a means liable to create a public danger and, second, they need not have precisely determined how to execute their agreement. But neither the meaning of, nor the basis for,¹¹³³⁶ these conclusions is entirely clear. In the Trial Chamber's view, the Appeals Chamber's analysis leaves uncertain whether, to establish this element of the crime of conspiracy to commit a terrorist act, it is necessary to prove:

- only that those accused agreed they would use 'means liable to create a public danger' within the meaning of Article 314, not that they agreed on *a particular means* in that category; or
- that they agreed they would use those particular means, meaning that they agreed to use an explosive device; or
- that they also agreed on any other details of how they would achieve their aim.

¹¹³³⁵ *Balamand Monastery* Judgment, pp 12-13.

¹¹³³⁶ The only authority the Appeals Chamber cited for them was an analysis in a 1963 textbook of this element of conspiracy generally—not under Lebanese law alone and not on the crime of conspiracy to commit a terrorist act in particular. El-Fadel 1963, p. 94, cited in the First interlocutory decision on applicable law, fn. 306.

And if the answer lies in the third point, *which* additional details must they have agreed on?

6239. The Trial Chamber has previously considered this issue, when determining the Oneissi Defence's application under Rule 167 for Mr Oneissi's acquittal at the close of the Prosecution case.

6240. In its decision, the Trial Chamber adopted the third approach but to a limited extent, stating:

to participate in a conspiracy to kill Mr Hariri—namely, to enter into an agreement to kill him (it is pleaded that he “concluded or joined an agreement”), Mr Oneissi, as an indicted co-conspirator, did not have to know of the specific details of the crime. It was sufficient that he and Mr Sabra and Mr Merhi were aware that they were acting pursuant to a plan to commit a terrorist act, namely, to assassinate Mr Hariri by means of a large explosive device in a public place, thereby causing terror, and further that in doing so they were aware that others would die and be injured. They did not need to know details such as where it would be detonated, the precise location or time, or the manner of detonating it, such as on a moving or a parked vehicle.¹¹³³⁷

6241. Thus, the Trial Chamber found that to be liable for the conspiracy alleged, it was sufficient for the participants to have known—and by implication, agreed on—both the particular physical means of committing the alleged terrorist act, namely an explosive device, and four additional matters.

6242. The first is that that device would be large. The second is that it would be used in a public place. The third is that the purpose was to assassinate Mr Hariri. The fourth is that this would kill and injure other people in addition to Mr Hariri. However, the Trial Chamber found the participants need not know more specific details of the plan.

6243. In its finding for purposes of the Rule 167 decision, the Trial Chamber grouped these four matters based on how the Prosecutor framed the conspiracy charge in the amended consolidated indictment. It pleads the fourth—the awareness that others would die and be injured—in paragraphs 54 (e) to (g), separately and subsequently to the first three. It described the first three

¹¹³³⁷ Rule 167 decision, pp 47-48.

matters collectively, in paragraph 54 (d), immediately after describing the alleged agreement between the conspirators in paragraph 54 (c):

(c) concluded or joined an agreement, aimed at committing a terrorist act intended to cause a state of terror by a predetermined means liable to create a public danger,

(d) *namely by the assassination by means of a large explosive device in a public place of the former Prime Minister, and leading political figure, Rafik HARIRI.*¹¹³³⁸

6244. The amended consolidated indictment does not specify whether the Prosecutor alleges that *all three together* constituted, as a matter of either fact or law, the predetermined means of causing a state of terror. Or whether, for instance, using a large explosive device in a public place in itself was sufficient to cause a state of terror, and the purpose of assassinating Mr Hariri was a separate matter on which the participants in the conspiracy allegedly agreed.

6245. By contrast, in its closing submissions the Prosecution explicitly argued that to establish the alleged conspiracy aimed at committing a terrorist act it need not prove those participants knew the alleged purpose of assassinating Mr Hariri.¹¹³³⁹

6246. The Trial Chamber maintains the view it expressed in its Rule 167 decision.

6247. The first two approaches above interpret ‘specific means’ as confined to physical means, the sense in which Article 314 apparently uses ‘means’. The Appeals Chamber, however, may have been advocating either;¹¹³⁴⁰ it is unclear which. But the Lebanese case law and secondary sources on conspiracy interpret ‘specific means’ in Article 270 more broadly, as referring generally to how conspirators have agreed to realise the felony. That felony, by contrast, is the

¹¹³³⁸ Amended consolidated indictment, paras 54 (c)-(d) (emphasis added).

¹¹³³⁹ Prosecution closing submissions (counsel David Kinnecome), T. 11 September 2018, pp 114-117. *See also* Prosecution closing submissions, T. 13 September 2018, p. 87, particularly lines 19-22 where the Prosecutor, Mr Farrell, stated it ‘would logically follow’ regarding everything charged in the case that the Accused need not know Mr Hariri was the target, but that he wished to consult some of his team and that he or one of his team would ‘come back to’ the Trial Chamber about the issue, and T. 14 September 2018, pp 34-35, at which Senior Trial Attorney Mr Povoas stated of Mr Oneissi and Mr Sabra, ‘They needed to know who the victim was’, but then clarified, ‘My submissions are factual, on the evidence, and it’s something which I invite you to find. Mr Farrell’s submissions were what legally we are required to do under the terms of the law. So in my submission, we can go beyond what is necessary by law.’

¹¹³⁴⁰ First interlocutory decision on applicable law, para. 199.

conspirators' aim, 'end' or 'purpose'. It is *what* they will do rather than *how* they will do it. For example, the Lebanese Judicial Council stated in *Balamand*:

The designation of means to achieve the purpose of the conspiracy: the conspirators must decide on the means intended for use to carry out the offence for which they have agreed on. It cannot be said that full agreement exists unless the plotters have agreed on both the end and the means. Where it is the case that the means have not been designated and agreed on, the agreement is incomplete, and consequently the conditions for the existence of a conspiracy are not fully met and no penalty is incurred.¹¹³⁴¹

It had earlier defined the purpose element of conspiracy in this way:

Its purpose is to commit some crime detrimental to State security: A conspiracy does not subsist unless the agreement between two or more persons states the purpose and goal the perpetrators intend, which must be clear, explicit and unambiguous; i.e. to commit a specific crime detrimental to the security of the State.¹¹³⁴²

6248. But *Balamand* neither found nor specifically analysed the crime of conspiracy to commit terrorism. And neither do any of the secondary sources the Trial Chamber has examined. Each of those secondary sources interprets the words 'by specific means' in Article 270 in a similarly broad way to *Balamand*.¹¹³⁴³

6249. The 1959 and 1964 decisions on conspiracy to commit terrorism do not examine the meaning of 'by specific means'. In both cases, the conspirators were found to have known what physical means were to be used—explosive devices—and some more information about the plot. In the 1959 case that information was, at least, the exact location of the intended terrorist act, a particular bus stop, and by implication the fact that the device in question was a grenade. In the case referred to in the 1964 decision, the additional information was, at least, that the plot targeted persons and a particular 'official institution' that was also a physical location, namely a foreign embassy.

¹¹³⁴¹ *Balamand Monastery Judgment*, p. 13 (emphasis added).

¹¹³⁴² *Balamand Monastery Judgment*, p. 13 (emphasis added).

6250. In its 1969 judgment in *Camille Chamoun*, regarding conspiracy to commit the different crime against State security set out in Article 2 of the 1958 law, the Lebanese Judicial Council did not define ‘by specific means’. But it found that the ‘specific means’ the three co-conspirators agreed on, to achieve their aim of committing the Article 2 crime, was to murder Mr Chamoun.¹¹³⁴⁴

6251. Not only did all three co-conspirators know of the intention to murder that particular person but, the court found, two of them gave ‘the necessary orders and directions to’¹¹³⁴⁵ Mr Akkari as to how he was to commit the murder. The Council implicitly found that the specific additional matters the three agreed on about the murder were, at least, that Mr Akkari would go to a particular place to try to kill the victim and that the other two would accompany him and wait to help him to escape. However, the judgment does not suggest that the court thought it was necessary, to find conspiracy, to prove the participants’ agreement on those additional matters.

6252. In its final trial brief, the Prosecution essentially submits that to fulfil the definition of conspiracy aimed at committing a terrorist act under Lebanese law, it need only prove the five elements of such a conspiracy described by the Appeals Chamber.¹¹³⁴⁶ Regarding the minimum knowledge required to prove agreement ‘by specific means’, the Prosecution simply quoted one of the Appeals Chamber’s descriptions of this element of the crime in its first interlocutory decision, ‘an agreement on the means to be used to commit the crime (which for conspiracy to commit terrorism must satisfy the ‘means’ element of Article 314)’.¹¹³⁴⁷

6253. In oral closing submissions, the Prosecution specifically rejected the proposition that to establish any of the elements of the conspiracy, alleged participants must know, or agree on, the identity of the particular person that the alleged terrorist act targeted—here, Mr Hariri. Counsel for the Prosecution submitted that the pleading, in the amended consolidated indictment, that the conspirators knowingly agreed to commit the alleged terrorist act ‘in order to kill Hariri’¹¹³⁴⁸ was notice of the material facts of the Prosecution’s case only. Notice of this kind goes ‘beyond what

¹¹³⁴⁸ Amended consolidated indictment, para. 51.

is strictly required at law’ and ‘doesn’t change the legal elements that are required to obtain a conviction and cannot do so’.¹¹³⁴⁹

6254. The Oneissi Defence argues that to prove the conspiracy alleged, the Prosecutor must prove not just that all alleged co-conspirators agreed on the creation of a public danger, but that they agreed on using a large explosive device to do so.¹¹³⁵⁰ The Oneissi Defence further submits that it must also be proven that Mr Oneissi knew and agreed to use such a device in a public place to assassinate Mr Hariri.¹¹³⁵¹ In support it cites the Appeals Chamber’s description of the elements of conspiracy and the Trial Chamber’s decision under Rule 167.¹¹³⁵²

6255. The Merhi Defence goes further than the Oneissi Defence. It submits that Lebanese law requires¹¹³⁵³ that the means to which the alleged co-conspirators must have agreed were not only using a particular type of device¹¹³⁵⁴ and doing so in a public place,¹¹³⁵⁵ but also making the movements of the target—in this case Mr Hariri—subject to surveillance¹¹³⁵⁶ and organising the allegedly false claim of responsibility for the attack.¹¹³⁵⁷ In oral closing submissions, the Merhi Defence also implicitly submitted that under Lebanese law the alleged co-conspirators must have known the target’s identity.¹¹³⁵⁸

¹¹³⁴⁹ Prosecution closing submissions, T. 11 September 2018, pp 116-117, T. 13 September 2018, p. 87, T. 14 September 2018, pp 34-35.

¹¹³⁵² First interlocutory decision on applicable law, para. 202 and Rule 167 decision, pp 30-31, cited in Oneissi Defence final trial brief, fn. 1417.

¹¹³⁵³ This was clearly a legal submission, notwithstanding that in its final trial brief the Merhi Defence combined it with its procedural submissions on the framing of the indictment, discussed in chapter II ‘The Prosecution’s pleaded case’, (B) ‘Issues arising from the Prosecution’s pleadings’. *For example*, the characterisation of these four matters as ‘means’ for the purpose of the definition of conspiracy in Merhi Defence final trial brief, paras 424-427, 432, 438-439, 453, 455. The Merhi Defence also relevantly stated regarding the location of the attack, in para. 429 of its final trial brief, ‘the choice of location is one of the means used by the conspirators to cause a “state of terror”’ (quoting Article 314 of the Lebanese Criminal Code).

¹¹³⁵⁴ Specifically a VBIED. Merhi Defence final trial brief, paras 437, 439, 443.

¹¹³⁵⁵ Merhi Defence final trial brief, paras 428-430. Counsel for Mr Merhi also relevantly submitted orally: ‘The Prosecutor did not provide evidence that Mr Merhi concluded an agreement with the rest of the accused and co-conspirators on the means and resources to be used to commit the crime of conspiracy. The Prosecutor did not prove that Mr Merhi agreed with the other accused and co-conspirators *on the location of the attack*. Therefore, the Prosecution failed to prove that Mr Merhi had joined an agreement with a view to commit a crime against State security, and had prior knowledge and had agreed on the means to be used by the co-conspirators, of which he was part, to commit the crime’, Merhi Defence closing submissions, T. 18 September 2018, p. 97 (emphasis added).

¹¹³⁵⁶ Merhi Defence final trial brief, paras 433, 436.

¹¹³⁵⁷ Merhi Defence final trial brief, paras 444, 446, 451.

¹¹³⁵⁸ *For example*, Merhi Defence closing submissions, T. 18 September 2018, p. 97, at which lead counsel for Mr Merhi stated: ‘The Prosecutor needed to prove that Mr Merhi knew that a terrorist attack, as it was alleged by the

6256. The Ayyash Defence submits generally that all members of an alleged conspiracy must be ‘fully aware of the objective of the conspiracy and the means to achieve that objective’.¹¹³⁵⁹ The Sabra Defence submits that the Prosecution must prove ‘the existence of a specific agreement on the part of Sabra to use one of the means to commit a terrorist act as provided for within Article 314.’¹¹³⁶⁰ In its final trial brief, the Sabra Defence argued that to prove the alleged conspiracy, the Prosecution must prove that the conspirators knew that Mr Hariri was the intended target.¹¹³⁶¹ However, counsel for Mr Sabra clarified in oral closing submissions that this was a procedural submission on the framing of the indictment, not a submission on the elements of this crime under Lebanese law.¹¹³⁶² Meaning that it went to notice to the Defence of the Prosecution’s case.

6257. The Trial Chamber does not find any of the Parties’ submissions decisive in resolving the issue, since they cited little legal authority. However, the Lebanese Criminal Code, and the limited Lebanese case law on the issue appear to support the view the Trial Chamber reached in its decision under Rule 167.

6258. The better interpretation of the words in Article 270 ‘by specific means’, directly after the words ‘to commit a felony’, is that they refer to *how* the felony is to be committed; those words would be meaningless if they did not refer to something additional to the definition of the felony itself. And ‘specific’ suggests the conspirators must agree to commit their intended crime in a particular manner as opposed to just in some or any way. The code does not assist in determining what will be specific enough to qualify.

6259. However, the Lebanese case law and commentary on this crime, and the Appeals Chamber’s interlocutory decisions, suggest it is not necessary for the conspirators to agree on many

Prosecution, targeting Mr Hariri would be committed’ and pp 107-108, at which he stated: ‘the accomplices must know at least that the target was Prime Minister Hariri ... These are important details, important information that the accomplice must have knowledge of ... What we are talking about is that the accomplice must be aware of the important details of the attack, of the plot’. Although the latter submission ostensibly concerned complicity under Article 219 of the Lebanese Criminal Code, it followed questions from the judges that also concerned conspiracy under Article 270, in particular the questions set out at pp 105-106 (starting with ‘How far does knowledge need to go?’ and ending with ‘is it sufficient that they’re aware that it’s a plan to kill Mr Hariri by means of an explosive device?’).

¹¹³⁵⁹ Ayyash Defence final trial brief, para. 725. It cited no authority in support of that submission.

¹¹³⁶⁰ Sabra Defence final trial brief, para. 806, citing the First interlocutory decision on applicable law, para. 199.

¹¹³⁶¹ Sabra Defence final trial brief, paras 458, 859.

¹¹³⁶² Sabra Defence closing submissions, T. 21 September 2018, pp 6-7.

details of the alleged plot. None of the Parties argued that Article 270 requires this. This interpretation is reasonably open on the face of Article 270 and infringes neither the rights of the Accused to a fair trial nor other principles of general criminal and international human rights law.

6260. The Trial Chamber has not found any Lebanese case law determining whether conspirators need know a person's identity where a conspiracy to commit a terrorist act aims to kill a particular person. The Appeals Chamber's interlocutory decisions—despite Article 1 of the Statute referring specifically to Mr Hariri's death—do not address this issue.

6261. In the Trial Chamber's view, it is reasonable to conclude that the law requires knowledge of the main target's identity at least in a conspiracy to commit a terrorist act aimed at killing a particular person, because of that person's public profile, for example, holding high public office. This is because their murder—or alternatively, their murder *by a terrorist means as defined in Article 314*—itself will be liable to cause a state of terror. The murder of a prominent and important political, religious or cultural figure, for example, could fulfil this requirement.

6262. Given the lack of guidance concerning this issue, however, when determining the individual criminal responsibility of the Accused, the Trial Chamber will also briefly consider the alternative scenario—that the Accused did not need to know Mr Hariri was the target in order to have committed the crime of conspiracy to commit a terrorist act. In other words, adopting a doctrine used in common law jurisdictions—and relied upon by the Prosecutor in closing submission—Mr Hariri's identity was a mere particular. Meaning that knowing that he was the target is not an element of the crime.

6263. Accordingly, the Trial Chamber finds that to prove a conspiracy to commit a terrorist act by specific means, it must be shown that the alleged conspirators agreed to use some means liable to create a public danger, and specifically which one, and that they agreed on some other key details of the plot. In particular, based on the definition of a terrorist act in Article 314, the alleged conspirators must also have agreed on using the relevant means in a way that would cause a state of terror. While not legally necessary in all cases, to satisfy this requirement it would be sufficient for the participants to have agreed on using a large explosive device in a public place, and that people would die and be injured as a consequence of this act.

6264. Furthermore, where, as in this case, the alleged aim of the planned terrorist act was to kill a particular person, namely Mr Hariri, and his death itself was liable to cause a state of terror—the better view is that the alleged conspirators must also have agreed on that aim, and therefore known who that targeted person was. That is, in the circumstances of this particular case, they must have known that Mr Hariri was the target. If however this conclusion is legally incorrect—in that knowing that Mr Hariri was the object of the conspiracy is not an element of conspiracy under Lebanese law—the Accused must have agreed on the matters described above.

6265. To be criminally liable for participating in a conspiracy to commit a terrorist act, however, they do *not* need to have agreed on more specific details than those. For instance, they do not need to have agreed on precisely when, where and how the device they intended to use would be detonated; whether and precisely how the conspirators would conduct surveillance in preparation for committing the intended crime; or what steps they would take to elude detection.

6266. Lastly, the Trial Chamber recognises that the required knowledge, as well as other elements of the crime, may be inferred from the circumstances; there need not be ‘direct’ evidence of them. Moreover, in a case such as this one, where the conspiracy allegedly achieved its aim of committing a terrorist act, the relevant circumstances may include the way in which that act was committed. For example—and pertinently for the present case—evidence that several people co-perpetrated a terrorist attack, that they did so in an organised way that would have been impossible without prior planning and coordination and that their particular part in committing the attack required them to know its specific means of commission beforehand, could establish or assist in establishing that they were conspirators.

6267. The relatively few Lebanese decisions concerning conspiracy, surveyed above, do not expressly endorse this view.¹¹³⁶³ Neither did the Appeals Chamber in the discussion of this crime in its interlocutory decisions. But it follows from the principles of procedural law, both international and Lebanese.¹¹³⁶⁴ The approach Lebanese courts have taken when assessing

¹¹³⁶³ The closest equivalent to an endorsement of this view in the case law is the Lebanese Judicial Council’s statement in the *Camille Chamoun* Judgment, p. 10, that it took into account the evidence of the accused’s attack on Mr Chamoun, along with that of earlier events, to reach its verdict on the charges in that case. As set out earlier, those charges included conspiracy, but to commit a crime against State security other than terrorism.

¹¹³⁶⁴ See chapter III ‘Assessment of evidence’ generally, and (C) (4) ‘Circumstantial evidence’.

evidence of *mens rea* in cases concerning other crimes¹¹³⁶⁵ also appears to the Trial Chamber to be consistent with this view.

(e) Conclusion: the elements of conspiracy aimed at committing a terrorist act

6268. In summary, the Trial Chamber has concluded that under the law applicable in the Special Tribunal, to commit the crime of conspiracy aimed at committing a terrorist act, two or more people must agree to commit a terrorist act, each of them knowing:

1. that the act will be committed using a means that is liable to create a public danger;
2. which particular means liable to create a public danger will be used; and
3. that that means will be used in a way that is liable to create a state of terror.

6269. If the terrorist act is intended to kill a particular person *and* killing that person would be likely to create a state of terror, each of them must also know:

4. that the act is intended to kill that person.

However, the Trial Chamber will also consider whether any Accused would be individually criminally responsible if they need only have known the first three things.

3. Intentional homicide

6270. Chapter VIII, sub-chapter I, section 1, sub-section 1 in book II of the Lebanese Criminal Code deals with intentional homicide. Sub-section 1 comprises Articles 547 to 550 but, as earlier noted, all counts on the amended consolidated indictment concerning this crime¹¹³⁶⁶ are charged under Articles 547 and 549 (1) and (7) specifically¹¹³⁶⁷—alleging Mr Ayyash committed the crimes of intentional homicide and attempted intentional homicide, each with premeditation using explosive materials, and the other Accused participated as accomplices in those crimes.

¹¹³⁶⁵ For example, the *mens rea* of perpetrators of intentional homicide and accomplices to that and other crimes charged in this case.

¹¹³⁶⁶ Under counts 3-4 and 7-8. Regarding the attempt counts (5 and 9).

¹¹³⁶⁷ In conjunction with provisions of the code concerning the elements of offences and modes of liability generally. As explained earlier, in relation to modes of liability, the Prosecution also brings those charges under Article 3 (1) (a) of the Statute.

6271. The Lebanese Criminal Code classifies intentional homicide as a type of felony against persons, specifically, a felony against human life and physical integrity.¹¹³⁶⁸ Articles 547 and 549 (1) and (7) are thus provisions of the code ‘relating to the prosecution and punishment of ... crimes and offences against life and personal integrity’ to which Article 2 (a) of the Statute refers.

6272. Article 547 provides:

Anyone who intentionally kills another person shall be punishable by hard labour for a term of between 15 and 20 years,

while Article 549 (1) and (7) provides:

Intentional homicide shall entail the death penalty if it was committed in the following circumstances:

(1) With premeditation;

...

(7) Using explosive materials.

6273. Since Article 24 of the Statute, not Lebanese law, governs sentencing in the Special Tribunal, the only relevant aspects of these provisions are those that provide guidance about the elements of the crimes charged. A brief definition of intentional homicide appears in Article 547, namely, intentionally killing another person.¹¹³⁶⁹ Article 549 (1) and (7) relevantly shows that, under the Lebanese Criminal Code, neither premeditation nor the use of explosive materials need

¹¹³⁶⁸ In book I of that code, Article 179 essentially defines a felony as one punishable as such; chapter II, sub-chapter I, section 1, ‘Penalties in general’, in particular Article 37 which lists the penalties prescribed in Articles 547-550—death, hard labour for life and fixed-term hard labour—as ‘ordinary penalties’ for felonies, only; and the headings to chapter VIII and sub-chapter I of that chapter, respectively: ‘Felonies and misdemeanours *against persons*’ and ‘Felonies and misdemeanours *against human life and physical integrity*’ (emphasis added).

¹¹³⁶⁹ The Special Tribunal’s official English translation of Article 547 uses the words ‘intentionally kills *another person*’ (emphasis added). The Prosecution submits that ‘*a person*’, which the Appeals Chamber used in the disposition section of its First interlocutory decision on applicable law, para. 11, more closely reflects the Arabic text of Article 547. Prosecution final trial brief, fn. 2356. The Trial Chamber does not see a substantive difference between the two versions and, taking into account the fact that no other Party raised any concern about this, considers it reasonable to rely on the official English translation.

be established for a person to have committed intentional homicide. Instead, these are aggravating circumstances, as defined above.¹¹³⁷⁰

(a) *Actus reus*

6274. The *actus reus* of intentional homicide, as described in Article 547, is the killing of another person. Inherent in this description is that a person must have died. To determine what else, beyond a victim's death, must be proven to establish the *actus reus* of this crime it is necessary to consult other provisions of the Lebanese Criminal Code and Lebanese case law.

6275. Article 204 of the Lebanese Criminal Code provides:

A causal link between an act and omission on the one hand, and the criminal consequence on the other, shall not be precluded by the concurrent existence of other previous, simultaneous or subsequent causes, even if they were unknown to the perpetrator or independent of his act.

If, however, the subsequent cause is independent and sufficient in itself to bring about the criminal consequence, the perpetrator shall incur the penalty only for the act that he committed.

6276. Article 204 requires a 'causal link' between the 'criminal consequence'—in this case, the victim's death—and the conduct of the accused and that that conduct may be either an act or an omission.

6277. Article 204 also suggests that where the crime alleged is intentional homicide:

- the required causal link may exist even if the victim's death also had 'other previous, simultaneous or subsequent causes', but

¹¹³⁷⁰ The Appeals Chamber agreed with this interpretation in its First interlocutory decision on applicable law, paras 151, 167, fn. 271. All of the Lebanese case law on Article 549 (1) and (7) discussed below also supports this interpretation. Both the Prosecution and the Sabra Defence explicitly agreed with this interpretation. Prosecution final trial brief, para. 1135; Prosecution closing submissions, T. 13 September 2018, p. 85; Sabra Defence final trial brief, para. 802. Of the Parties, only the Prosecution and Sabra Defence made any submissions specifically on the definition of intentional homicide. As earlier stated, the Ayyash Defence relied on the Appeals Chamber's First interlocutory decision on applicable law generally, Ayyash Defence final trial brief, para. 712.

- if there was a subsequent cause of the victim's death that was independent of the accused's conduct and sufficient in itself to kill the victim, the accused will not be liable for intentional homicide, only 'the act that he committed'.

6278. After examining the Lebanese Criminal Code and some Lebanese decisions and secondary sources, the Appeals Chamber summarised the *actus reus* of intentional homicide under Article 547 as consisting of: first, an act or culpable omission aimed at impairing the life of another¹¹³⁷¹ person; second, the result of the death of a person; and third, a causal connection between that conduct¹¹³⁷² and that result.¹¹³⁷³ Only the Prosecution and the Sabra Defence made submissions specifically on the law of intentional homicide, and both accepted this summary as substantially accurate.¹¹³⁷⁴ The Trial Chamber considers that this summary, in itself, is reasonable and legally correct in light of the wording of Articles 547 and 204 and Lebanese case law. Further, the Trial Chamber relies on most—but not all—aspects of the Appeals Chamber's analysis of the requisite causal connection, for the following reasons.

6279. The Appeals Chamber stated in its first interlocutory decision on applicable law that Article 204 provides for two different theories of causation 'in an ambiguous manner', as it 'sets the theory of equivalence of causes as a general rule, but adds'—in the second sentence of the Article—'an important exception in the form of the theory of adequate or sufficient cause'.¹¹³⁷⁵

6280. It contrasted that exception with Article 568 of the code.¹¹³⁷⁶ Article 568 is in the same sub-chapter as Article 549 and applicable in principle in the Special Tribunal, as relating to the punishment of offences against life and personal integrity. It essentially provides that where there were other circumstances, unknown to the perpetrator and independent from their act, that caused death or harm, intentional or unintentional, the perpetrator's sentence may be reduced as specified

¹¹³⁷¹ First interlocutory decision on applicable law, para. 185 (a); the Appeals Chamber used 'a person' in the disposition, 11.

¹¹³⁷² The Appeals Chamber in para. 185 (c) and disposition, 11 (c), described the relevant conduct as 'the act', but it is clear from the context, including para. 185 (a) and disposition, 11 (a), that this term encompasses both acts and omissions.

¹¹³⁷³ First interlocutory decision on applicable law, para. 185 (a)-(c), disposition, 11 (a)-(c), *see also* paras 153-154, 156, 158.

¹¹³⁷⁴ Prosecution final trial brief, para. 1131; *compare*, its submission regarding the wording of the first element; Sabra Defence final trial brief, para. 802.

¹¹³⁷⁵ First interlocutory decision on applicable law, para. 158.

¹¹³⁷⁶ First interlocutory decision on applicable law, para. 159.

in Article 200—the provision of the code that defines attempt, examined in detail in section 4 below.

6281. Thus, as the Appeals Chamber noted, Article 568 appears to provide that where there was a cause of a person's death independent from the accused's act, the accused remains responsible for the victim's death, but the sentence is mitigated.¹¹³⁷⁷ Whereas the second sentence of Article 204 suggests that in such cases the accused will be responsible only for the act they committed. However, the Appeals Chamber went on:

Nonetheless, it can be inferred from a comprehensive reading of the Code together with the jurisprudence that Lebanese law applies mainly the theory of the adequate or sufficient cause. In other words, the perpetrator is held liable for his criminal act coupled with criminal intent even if he ignored¹¹³⁷⁸ other reasons which, combined with his act, led to the victim's death. This analysis is also in line with the origins of the Lebanese Criminal Code. Indeed, the Lebanese text in this respect is originally taken from the Italian criminal code of 1930, which in turn adopts the theory of the adequate or sufficient cause.¹¹³⁷⁹

6282. The Parties neither contested the Appeals Chamber's interpretation of Article 204 nor made any submissions about it.

6283. The Trial Chamber is not persuaded that there is an ambiguity in Article 204 itself. The first sentence provides generally that a causal link between the accused's act and a victim's death can exist even if there was also another cause, including one independent of the accused's act. The second sentence addresses the specific scenario of an independent cause sufficient in itself to bring about that death.

6284. On the face of the code, there does appear to be some ambiguity, and indeed potential inconsistency, in the relationship between Articles 204 and 568. However, as the two are linked to one another, they are probably intended to address different scenarios. The Trial Chamber

¹¹³⁷⁷ First interlocutory decision on applicable law, para. 160.

¹¹³⁷⁸ The words 'even if he ignored' in this passage appear to mean 'even if he did not know', translating the French phrase '*même s'il ignorait*', which has that meaning. The French version of the First interlocutory decision on applicable law, para. 160, uses that phrase. Moreover, the relevant words in the Special Tribunal's official English and French translations of Article 204 itself, 'causes... unknown to the perpetrator'/'*causes... inconnues de l'auteur*', unquestionably mean causes that the perpetrator does not know—not causes that the perpetrator 'ignores' in the sense that they know those causes but disregard them.

¹¹³⁷⁹ First interlocutory decision on applicable law, para. 160 (footnotes omitted).

interprets the Appeals Chamber's conclusion to mean that Article 204—not Article 568—reflects the dominant approach to causation in Lebanese law and should therefore be applied. Considering the absence of any contest from the Parties on this matter, the Trial Chamber accepts that view.

6285. For the purposes of Article 204, many possible interventions could cause a victim's death but without severing the causal link with the accused's actions. As an example, a case of intentional homicide where explosives have caused a building to collapse and trap people under the rubble. There, a failure to rescue a trapped person, whose life could have been saved with timely medical intervention and treatment, will not preclude the causal link with the actions of the accused.

6286. The Appeals Chamber also stated, regarding the *actus reus* of intentional homicide under Lebanese law, that the victim's death 'has to be a direct result of the criminal activity'.¹¹³⁸⁰ It did not cite any authority for this statement, although it may have drawn the phrase 'direct result' from Lebanese decisions it referred to elsewhere.

6287. In particular, in a 1999 judgment convicting an accused who had shot someone multiple times with a pistol of intentional homicide, the sixth Chamber of the Lebanese Court of Cassation found that the victim's 'death occurred as a direct result of this act'.¹¹³⁸¹ However, the court did not examine whether directness of the result was legally required to establish the *actus reus* of this crime. No Party has argued that it was and the Trial Chamber has not found any other Lebanese case law suggesting this. Accordingly, based on the wording of Article 204, the Trial Chamber finds that it is necessary only for the accused's conduct to be *a* cause of the victim's death.

6288. In its first interlocutory decision on applicable law, the Appeals Chamber further concluded that under Lebanese law, if a victim's death results from the acts of multiple people who share the same intention, they are all co-perpetrators of that death. It is not necessary for all of them to have performed the same act or 'administered the fatal blow'.¹¹³⁸² Again, the Parties did not contest this

¹¹³⁸⁰ First interlocutory decision on applicable law, para. 156.

¹¹³⁸¹ Cassation decision 38/1999, p. 5. *See also* the references to this decision in relation to accomplice liability. The Appeals Chamber, in its First interlocutory decision on applicable law referred to this decision in its discussion of means of proving that the death itself had occurred, not causation, fn. 258. In fn. 265, the Appeals Chamber also used the phrase 'direct result' when describing the *mens rea* of intentional homicide, citing Court of Appeal of North Lebanon decision 1/1952,

¹¹³⁸² First interlocutory decision on applicable law, para. 157.

view and the Trial Chamber considers it a reasonable and correct interpretation of Article 212 of the Lebanese Criminal Code, discussed above, and relevant Lebanese case law.

6289. As the Appeals Chamber noted, in Lebanon accused have been convicted of co-perpetrating intentional homicide where each had fired a gun but it was not possible to determine which of them fired the bullet that killed the victim.¹¹³⁸³

6290. More relevantly, the *Al-Halabi* and *Karami* cases show conduct that Lebanese courts consider sufficient to establish the *actus reus* for co-perpetration of intentional homicide in the context of an assassination operation with a number of participants. Of the twenty accused in *Al-Halabi*, the Lebanese Judicial Council convicted three as co-perpetrators of Sheikh al-Halabi's intentional homicide.¹¹³⁸⁴ These were the two who fatally shot him¹¹³⁸⁵ and a third, Mr Khaled Mohammed Hamid. Mr Hamid had recruited some of the participants in the operation, arranged the car and the weapons, was present and armed at the scene of the crime, waiting for the Sheikh to emerge, blocked his path with a car which enabled the others to shoot him and then drove them away.¹¹³⁸⁶

6291. For the four accused convicted as co-perpetrators of intentional homicide in *Karami*, the relevant conduct appears to have been:

- recruiting others to execute the scheme of killing the victim and coordinating their actions, participating personally in reconnaissance operations for that crime and being present on the day of the crime on the boat from which the lethal explosive charge was detonated remotely (Mr Ghassan Touma);¹¹³⁸⁷
- participating personally in reconnaissance operations for the crime, participating in testing the device used to detonate the lethal explosive charge, carrying both that device

¹¹³⁸³ Cassation decision 170/2000, pp 1-2; Cassation decision 75/2004, pp 3-5; First interlocutory decision on applicable law, fn. 259.

¹¹³⁸⁴ As well as the attempted intentional homicide of the three injured victims. *Al-Halabi* Judgment, pp 63-64.

¹¹³⁸⁵ Mr Mounir Salih Aboud and Mr Ahmad Munthir al-Kasm.

¹¹³⁸⁶ *Al-Halabi* Judgment, p. 51. In the *Al-Rifai and others* Judgment, the same court applied similar reasoning at pp 1-4, 6-7, 15 to convict several accused as co-perpetrators of the attempted intentional homicides of Mr Mufti El-Sabounji, Mr Haji Taha Naji, Mr Hussein El-Oueik and his companions and Mr Oum-Georges, in four separate incidents. Their acts ranged from firing shots, throwing a grenade or giving weapons to another co-perpetrator, to driving the other co-perpetrators to the scene of the crime, then going elsewhere to wait for those other co-perpetrators' call alerting them to return and collect those other co-perpetrators after they had committed it.

¹¹³⁸⁷ *Karami* Judgment, pp 130-131.

and that charge, being present on the day of the crime on the boat from which the lethal explosive charge was detonated remotely and pressing the button on the device, detonating the charge (Mr Ghassan Menassa);¹¹³⁸⁸ and

- participating personally in reconnaissance operations for the crime, then driving the boat on the day of the crime (Mr Afif Khoury)¹¹³⁸⁹ and while present on that boat, tracking the passage of the victim's helicopter and alerting another co-perpetrator—Mr Menassa—to its location (Mr Khalil Elias Matar).¹¹³⁹⁰

6292. Lebanese case law suggests that different items may be 'explosive materials' within the meaning of Article 549 (7) of the code, thereby aggravating the crimes of intentional homicide and attempted intentional homicide. In *Karami*, the Lebanese Judicial Council accepted this aggravating element in the explosive charge in the helicopter—specifically, a charge or bomb weighing about 2.7 kilograms, hidden behind Mr Karami's usual seat.¹¹³⁹¹ Another example, in a case of attempted intentional homicide, is a hand grenade.¹¹³⁹²

(b) *Mens rea*

6293. The Trial Chamber has also examined relevant Lebanese decisions and the Appeals Chamber's first interlocutory decision on applicable law, plus the applicable legislative provisions, for guidance regarding the *mens rea* of intentional homicide. Since the aggravating circumstance of 'premeditation' focuses on the accused's mental state, the Trial Chamber also briefly deals with that.

6294. To satisfy the definition in Article 547, the killing must be 'intentional'. Article 188 of the code defines intent as 'the will to commit an offence as defined by law'. Article 189 is also relevant, providing a form of indirect intent¹¹³⁹³ or *dolus eventualis*,

¹¹³⁸⁸ *Karami* Judgment, pp 130-131.

¹¹³⁸⁹ *Karami* Judgment, p. 131.

¹¹³⁹⁰ *Karami* Judgment, pp 126-128. *Compare*, the statement in the Prosecution final trial brief, para. 1165, that the Lebanese Judicial Council found Mr Matar was a co-perpetrator 'since Matar knowingly used a device to signal to the perpetrator when Karami's helicopter was passing by a specific location to facilitate the use of explosives to kill Karami'. This is correct, but in the relevant finding, the court specifically referred to Mr Matar's presence on the boat and tracking of the helicopter's passage as well.

¹¹³⁹¹ *Karami* Judgment, pp 25, 138-142.

¹¹³⁹² *Al-Rifai and others* Judgment, pp 5-6.

¹¹³⁹³ *Dany Chamoun* Judgment, p. 74.

An offence shall be deemed to be intentional, even if the criminal consequence of the act or omission exceeds the intent of the perpetrator, if he had foreseen its occurrence and thus accepted the risk.

6295. Articles 190 and 191 of the Lebanese Criminal Code provide further precision regarding the scope of Article 189. On the one hand, ‘fault exists where a harmful act results from negligence, recklessness or failure to comply with laws and regulations’ (Article 190). On the other, by virtue of Article 191, if either ‘the perpetrator did not foresee the consequences of his wrongful act or omission although he could or should have foreseen it’ or ‘he foresaw it and believed that he could prevent it’, the offence will be unintentional—namely, Article 189 will not apply.

6296. Notwithstanding that Article 191 appears to refer to actual, or in other words subjective, foresight—what consequences the perpetrator *in fact* ‘*did not foresee*’ or ‘*foresaw*’—in the judicial decisions examined below, Lebanese courts have sometimes interpreted the Article as setting a constructive or objective standard—what consequences the perpetrator *should have foreseen*.¹¹³⁹⁴

6297. So far as the Trial Chamber can ascertain from the published versions of the decisions,¹¹³⁹⁵ even when purporting to apply a subjective standard—to find that the perpetrator in fact foresaw the relevant consequences—Lebanese courts have not required any direct evidence of what the accused actually thought. Rather, they have consistently inferred the required foresight from facts suggesting the consequences were foreseeable. Or, to put it another way, they have apparently found that the accused *did* foresee a consequence based on evidence that showed he or she could reasonably have been expected to foresee that consequence.

6298. In its first interlocutory decision on applicable law, the Appeals Chamber divided the *mens rea* for intentional homicide into two parts, intent and knowledge—once more drawing on a combination of the Lebanese Criminal Code itself, Lebanese decisions and secondary sources for its conclusions. It agreed that this crime requires the ‘intent to cause death, whether direct or *dolus eventualis*’,¹¹³⁹⁶ and suggested the requisite knowledge was ‘knowledge of the circumstances of

¹¹³⁹⁴ For example, the Lebanese Court of Cassation adopted this approach in Cassation decision 317/2002. The Appeals Chamber cited this decision in its First interlocutory decision on applicable law, fn. 268 but mistakenly described the decision number as 318.

¹¹³⁹⁵ Some of which are brief extracts only.

¹¹³⁹⁶ First interlocutory decision on applicable law, para. 185 (e), disposition, 11 (e).

the offence (including that the act is aimed at a living person and conducted through means that may cause death)'.¹¹³⁹⁷

6299. No Party contested this two-part characterisation of the *mens rea* of intentional homicide under Lebanese law.¹¹³⁹⁸ The Trial Chamber also accepts it to be consistent in substance with the code and relevant case law, although neither addresses intent distinctly from knowledge to the same degree as the Appeals Chamber. The Appeals Chamber's suggested knowledge requirement, in part, appears to the Trial Chamber to logically flow from the description of a perpetrator in Article 210, in particular the words 'No one shall be sentenced to a penalty unless he *consciously* and willingly committed the act'.¹¹³⁹⁹ As for the importance of knowing the means, Lebanese courts seem to have imputed the *mens rea* to an accused from the fact that they used means capable of causing death, for example, a gun,¹¹⁴⁰⁰ a cleaver¹¹⁴⁰¹ or a bomb,¹¹⁴⁰² and aimed it directly at the victim,¹¹⁴⁰³ or at vulnerable bodily locations such as the head or chest,¹¹⁴⁰⁴ shot or stabbed more than once,¹¹⁴⁰⁵ shot at close range¹¹⁴⁰⁶ or threw the bomb into premises where people were.¹¹⁴⁰⁷

6300. Some straightforward illustrations from Lebanese case law of how an accused may be deemed to have intentionally killed their victim due to *dolus eventualis*, under Article 189, are:

- An accused fired a machine gun in the direction of quarrelling people; two bullets hit the victim, 20 metres from the accused, killing him. In convicting the accused of intentional homicide under Article 547, the Lebanese Court of Cassation found that he intentionally fired the shots; that even if he did not intend to kill the victim, he should

¹¹³⁹⁷ First interlocutory decision on applicable law, para. 185 (d), disposition, 11 (d), *see also* para. 162.

¹¹³⁹⁸ The Prosecution and Sabra Defence specifically accepted it. Prosecution final trial brief, paras 1133-1134; Sabra Defence final trial brief, para. 802.

¹¹⁴⁰⁵ Cassation decision 37/1999, p. 1; Cassation decision 8/2004, pp 1-2; Cassation decision 275/2004, p. 2.

¹¹⁴⁰⁶ Cassation decision 37/1999, p. 1; Cassation decision 47/1999, p. 2. *See also* First interlocutory decision on applicable law, para. 164, fn. 266. *Compare*, Cassation decision 317/2002, and Cassation decision 24/2004, both of which the Appeals Chamber referred to in its First interlocutory decision on applicable law. The chamber in Cassation decision 24/2004 determined an accused had the intention to kill the victim where he had fired a pistol at close range to—specifically, less than 30 centimetres from—the victim's head. However, its decision suggests the chamber may also have based its determination partly on statements the accused made shortly before the shooting.

¹¹⁴⁰⁷ *Al-Rifai and others* Judgment, pp 6-7.

have expected that aiming and firing his machine gun in the direction of the quarrelling people would injure one or more of them; and that he accepted that risk;¹¹⁴⁰⁸

- An accused who had been having an affair with the victim's wife had two vigorous physical fights on the same day with the victim, who died from his injuries. During the first fight, the accused hit the victim hard on the head with a stone and during the second, either hit him again on the head with a stone or pushed him so hard that he fell and hit his head on a rock (it could not be determined which). The Lebanese Court of Cassation concluded that the accused could have expected death to occur as a result of targeting his blows to the victim's head. Further, the accused had had time to collect himself in the interval between the fights. It rejected that the accused had committed unintentional killing—a lesser offence which is also known as 'manslaughter', as described in Article 550 of the Lebanese Criminal Code—and replaced a lower court's conviction under Article 550 with one under Article 547.¹¹⁴⁰⁹

6301. The more complex Lebanese assassination cases, involving death or injury to several people with evidence of a plot targeting someone, provide examples of the requirements under Article 189. In the *Dany Chamoun* case, in addition to being the leader of the National Liberal Party, Mr Chamoun was the son of the former Lebanese President Chamoun.¹¹⁴¹⁰ The operation to assassinate Dany Chamoun caused his, his wife's and two sons' deaths. The Lebanese Judicial Council found that three armed attackers had entered the family's apartment and shot each victim multiple times, while several more waited at the building entrance or near their cars.¹¹⁴¹¹

6302. Apart from the three who shot the victims, none of the other accused—neither those who had incited the perpetrators to assassinate Mr Chamoun nor those who had remained outside the building—had committed any crime against Mr Chamoun's wife and children, because the circumstances did not suggest that:

¹¹⁴⁰⁸ Cassation decision 317/2002.

¹¹⁴⁰⁹ Cassation decision 458/2002, pp 1-2, 4. The Appeals Chamber also discussed this decision, in its First interlocutory decision on applicable law, paras 164-165, fns 267-268.

¹¹⁴¹⁰ *Dany Chamoun* Judgment, pp 22, 26.

¹¹⁴¹¹ *Dany Chamoun* Judgment, pp 26, 30-31.

it occurred to the inciters or accomplices to the assassination that [those three] perpetrators ... would also murder Dany Chamoun's wife and children, and that they accepted the possibility of this outcome.¹¹⁴¹²

6303. Conversely, in its subsequent decisions in *Al-Halabi* and *Karami*, the Lebanese Judicial Council applied Article 189 to determine that some accused had the requisite intention to commit various crimes against Sheikh Al-Halabi's son, his bodyguards and the others aboard Mr Karami's helicopter. In *Al-Halabi*, the court found Mr Aboud, Mr Al-Kasm and Mr Hamid guilty of the attempted intentional homicide of the Sheikh's bodyguards and son because they had 'anticipated the possibility of injuring and killing his bodyguards and anyone with him in the car'. The court appears to have considered that they knew the number of bodyguards in advance and when they ambushed the car fired shots landing 'all over' it.¹¹⁴¹³

6304. In *Karami*, the Lebanese Judicial Council found the accused Mr Matar:

being aware of the plan, was aware of the fact that Prime Minister Karami would not be alone in the targeted helicopter and that the manner in which it was to be blown up would lead to the death of the persons accompanying him, notwithstanding which he accepted the risk of that anticipated outcome and carried out the above-mentioned acts in a resolute and purposeful manner, having prior knowledge of their potential consequences, thereby manifesting a constructive intent to kill the persons accompanying Prime Minister Karami in the helicopter as provided in article 189 of the Criminal Code.¹¹⁴¹⁴

Consequently, it convicted Mr Matar, as a co-perpetrator, of the attempted intentional homicides of the helicopter's other passengers and crew under Article 549 (1) and (7)—in conjunction with Article 201, concerning attempt, discussed below.¹¹⁴¹⁵ It applied the same reasoning to convict Mr Touma, Mr Menassa and Mr Khoury of the same crimes.¹¹⁴¹⁶

6305. Lebanese case law is also the main source of guidance about what 'premeditation' for the purpose of Article 549 (1) means, as the code does not define the term. The Trial Chamber will

¹¹⁴¹² *Dany Chamoun Judgment*, p. 74.

¹¹⁴¹³ *Al-Halabi Judgment*, p. 53.

¹¹⁴¹⁴ *Karami Judgment*, p. 127.

¹¹⁴¹⁵ *Karami Judgment*, p. 127.

¹¹⁴¹⁶ *Karami Judgment*, pp 130-131.

address this issue only briefly since premeditation is not an element of the crime of intentional homicide under Lebanese law, only an aggravating factor for sentencing purposes.

6306. Lebanese decisions suggest that premeditated intentional homicide requires that the perpetrator decided in advance to commit that crime and had a clear and calm state of mind when preparing or planning to do so.¹¹⁴¹⁷ No minimum time period of premeditation is specified;¹¹⁴¹⁸ one court found that the accused premeditated the crime only minutes before committing it.¹¹⁴¹⁹

6307. The Appeals Chamber took essentially the same view of the definition suggested by Lebanese case law,¹¹⁴²⁰ and the Prosecution, as the only Party to make submissions on this issue, accepted that view.¹¹⁴²¹ The Appeals Chamber also examined how premeditation interacts with *dolus eventualis*¹¹⁴²² and concluded that Lebanese law treats premeditation as an aggravating factor of the intentional homicide both of the victim actually intended and any additional victims whose deaths were reasonably foreseeable.¹¹⁴²³ The Trial Chamber agrees with this conclusion, noting again however that premeditation under Article 549 (1) bears only on sentencing.

(c) Conclusion: the elements of intentional homicide

6308. In summary, the Trial Chamber has concluded that under the law applicable in the Special Tribunal, to commit an intentional homicide, a person must:

1. perform an act or omission that is a cause of another person's death; and
2. intend to cause the death of another person.

Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber, p. 14.

¹¹⁴²³ First interlocutory decision on applicable law, paras 169-175, 188, disposition, 12.

4. Attempted intentional homicide

6309. Articles 200 and 201 of the Lebanese Criminal Code concern attempt in relation to felonies such as intentional homicide. Article 203 also contributes to defining a criminal attempt—that is, one for which a person will be criminally responsible—to commit an intentional homicide under Lebanese law. Articles 200 and 203 relevantly provide:

Article 200: Any attempt to commit a felony that began with acts aimed directly at its commission shall be deemed to constitute the felony itself if its completion was prevented solely by circumstances beyond the control of the perpetrator.

...

Any person who begins to commit an act and then voluntarily desists shall be punished only for acts that he committed which constituted offences *per se*.

Article 203: An attempt shall be punished, even if its aim was unattainable owing to a factual circumstance unknown to the perpetrator. The perpetrator shall not be punished, however, if his act stemmed from a lack of understanding.

6310. Article 201 provides for the commutation of penalties ‘If all acts aimed at the commission of a felony were completed but produced no effect owing to circumstances beyond the control of the perpetrator’.

6311. Thus Lebanese law gives certain attempts to commit an intentional homicide the same legal status as an intentional homicide. It is only in sentencing such attempts that it will take into account the fact that the victim did not die. Read together, Articles 200, 201 and 203 provide that as long as the perpetrator’s act(s) did not ‘stem from a lack of understanding’,¹¹⁴²⁴ the perpetrator will incur the same criminal responsibility as for an intentional homicide once their attempt has begun, ‘with acts aimed directly at’¹¹⁴²⁵ committing that crime, if only circumstances beyond the perpetrator’s control prevented the victim’s death.

¹¹⁴²⁴ Lebanese Criminal Code, Art. 203.

¹¹⁴²⁵ Lebanese Criminal Code, Art. 200.

6312. If, on the contrary, the perpetrator voluntarily desisted after failing to complete that crime, they cannot be criminally liable for attempted intentional homicide—but only for their conduct up to that point and if it was a separate crime.

6313. Under Article 203, it is irrelevant whether the victim could never have been killed because of a particular factual circumstance, provided the perpetrator did not know that circumstance. For instance, if the victim were not where the perpetrator thought they would be. Further, Article 201 shows that Lebanese law also penalises attempted intentional homicide where all acts aimed at the commission of that crime were completed. The difference between this scenario and that of the completed crime, in which the victim dies—and between it and the kind of attempt described in the first sentence of Article 200—affects only sentencing.

6314. In its first interlocutory decision on applicable law, the Appeals Chamber’s summary was that there are three elements to attempted intentional homicide under Lebanese law. They are:

- an objective element, specifically a preliminary physical action that marks the beginning of the execution of the crime;¹¹⁴²⁶
- a subjective element, specifically the intent to commit that crime.¹¹⁴²⁷ In other words, the alleged perpetrator of attempted intentional homicide must have the *mens rea* for intentional homicide;¹¹⁴²⁸ and
- the absence of a voluntary abandonment of the offence before it is committed.¹¹⁴²⁹

The Appeals Chamber considered that Article 201 refers to ‘a specific kind of attempt: the abortive offence’.¹¹⁴³⁰

6315. Only the Prosecution and the Sabra Defence made (brief) submissions specifically on the law applicable to attempted intentional homicide. Both accepted the Appeals Chamber’s summary.¹¹⁴³¹ Having examined the code and Lebanese case law, the Trial Chamber agrees that

¹¹⁴²⁶ First interlocutory decision on applicable law, paras 177-178, 187 (a), disposition, 11 (a).

¹¹⁴²⁷ First interlocutory decision on applicable law, paras 177-178, 187 (b), disposition, 11 (b).

¹¹⁴²⁸ First interlocutory decision on applicable law, paras 177-178.

¹¹⁴²⁹ First interlocutory decision on applicable law, paras 177, 179, 187 (c), disposition, 11 (c).

¹¹⁴³⁰ First interlocutory decision on applicable law, para. 180.

¹¹⁴³¹ The Prosecution relied specifically on the Appeals Chamber’s summary in the First interlocutory decision on applicable law, para. 187, as stating the elements of attempted intentional homicide. Prosecution final trial brief,

in substance, the kind of attempt described in the first sentence of Article 200 consists of the three elements the Appeals Chamber listed.

6316. On its face, the Appeals Chamber’s description of the objective element only covers that kind of attempt, not the other, ‘abortive offence’ kind described in Article 201. However, in light of the wording of the Lebanese Criminal Code, particularly the heading ‘Attempt’ to the subsection containing Articles 200-203, and the Appeals Chamber’s own analysis of Article 201, the Trial Chamber considers the Appeals Chamber’s description must be read as referring to the *minimum* conduct that must be proven to establish the objective element of an attempted intentional homicide—not as excluding the Article 201 scenario of ‘completed’ acts aimed at committing that crime.¹¹⁴³²

6317. The code is unambiguous regarding the requirement the Appeals Chamber described as the absence of voluntary abandonment. The circumstances that prevent the victim’s death must be beyond the perpetrator’s control. Examples of such circumstances include the administration of medical treatment to the victim by third parties,¹¹⁴³³ the malfunctioning of the device intended to be used to commit the crime¹¹⁴³⁴ and the intended victim’s failure to appear in a particular location at the expected time.¹¹⁴³⁵

6318. The Appeals Chamber stated in its first interlocutory decision on applicable law that ‘a mere preparatory act is insufficient to establish the existence of an attempt’ under Lebanese law.¹¹⁴³⁶ The Trial Chamber agrees with this conclusion. Numerous Lebanese decisions

para. 1132. The Sabra Defence relied on both the First interlocutory decision on applicable law, paras 177-183, and Articles 200-203 and 547-549 of the Lebanese Criminal Code. Sabra Defence final trial brief, para. 803.

¹¹⁴³² Lebanese case law varies in the terminology it uses to describe the different kinds of attempt, with some judgments using ‘attempt’ for the Article 200, first paragraph scenario only and ‘abortive offence’ for the Article 201 scenario, but others describing the latter as ‘attempt’ as well. This appears to be a semantic difference only. *Compare, for example, Camille Chamoun Judgment*, pp 1, 12, 14 with *Al-Halabi Judgment*, pp 52-54, 56-58, 63-65 and *Balamand Monastery Judgment*, p. 15, defining ‘attempt’ in terms corresponding to the Article 200, first paragraph scenario only—admittedly the only relevant scenario in that case. Article 202 of the Lebanese Criminal Code similarly distinguishes between ‘attempted’ and ‘abortive’ misdemeanours and provides for a more severe penalty for the latter.

¹¹⁴³³ *Camille Chamoun Judgment*, pp 8, 12; *Zouk Mikayel Church Judgment*, pp 102, 104; *Al-Halabi Judgment*, pp 24, 52-54; *Al-Rifai and others Judgment*, pp 5-6; Cassation decision 275/2004, p. 2.

¹¹⁴³⁴ *Balamand Monastery Judgment, Al-Rifai and others Judgment*, p. 1.

¹¹⁴³⁵ *Al-Halabi Judgment*, p. 54. *See also* Cassation decision 102/2002, which the Appeals Chamber cited as authority for this element of attempt in its First interlocutory decision on applicable law, fn. 292. Cassation decision 102/2002 concerned involuntary abandonment of an attempted misdemeanour (theft), not an attempted intentional homicide. The circumstance beyond the perpetrator’s control that prevented the crime’s completion was that a person other than the perpetrator raised the alarm.

¹¹⁴³⁶ First interlocutory decision on applicable law, para. 178.

characterise attempt as involving, at least, the beginning of a criminal phase that is distinct from preparatory acts.¹¹⁴³⁷ Moreover, this conclusion is consistent with the Lebanese Criminal Code. Several provisions of the code including Article 219 specifically differentiate between the commission of a crime and its preparation.

6319. In the *Zouk Mikayel Church* judgment, in considering the crime of an attack aimed at changing the Lebanese constitution by unlawful means,¹¹⁴³⁸ the Lebanese Judicial Council described a criminal attempt as requiring ‘overt material acts aimed directly at the commission of the offence and indicating, through their attendant circumstances and in an unequivocal manner, the actor’s definite resolve to achieve the intended result’.¹¹⁴³⁹ The perpetrators there had placed two explosive devices inside a church in Zouk Mikayel, in central Lebanon, and managed to detonate one of them, killing 11 people and injuring 54 others. The second device was discovered before it could explode.¹¹⁴⁴⁰

6320. In *Karami*, the Lebanese Judicial Council described criminal attempt as requiring action that would normally achieve the intended result even if it does not constitute one of the material elements of the crime.¹¹⁴⁴¹ The court found that these were the same conduct criteria as for co-perpetrating a crime by participating directly in its commission.¹¹⁴⁴² *Karami* however, actually involved an attempted intentional homicide under Article 201, since with the explosion on the helicopter, all acts aimed at the crime’s commission were completed. In the *Al-Halabi* case, similarly, the act of firing the shots that injured the Sheikh’s bodyguards and son completed the attempt, or ‘abortive offence’, against those three victims, contrary to Article 201.¹¹⁴⁴³

6321. *Al-Halabi* also offers examples of partially completed attempted intentional homicides contrary to Article 200, since the case concerned not only the ambush that killed the Sheikh and

¹¹⁴³⁷ For example, *Al-Halabi (Saoud)* Judgment, pp 2-3; *Al-Rifai and others* Judgment, pp 1-4. Additionally, the *Al-Halabi* Judgment, pp 52-54, and *Karami* Judgment, pp 108, 111, 122-123, 126-127, 130-133 while not stating outright that attempt is distinct from preparation, implicitly support this view. The *Karami* Judgment also analysed attempt. See also First interlocutory decision on applicable law, fn. 289.

¹¹⁴³⁸ Article 301 of the Lebanese Criminal Code.

¹¹⁴³⁹ *Zouk Mikayel Church* Judgment, p. 105.

¹¹⁴⁴⁰ *Zouk Mikayel Church* Judgment, p. 37.

¹¹⁴⁴¹ The Appeals Chamber used a similar description, ‘action ... that should lead, within the normal course of events, to achieving the criminal purpose’, relying on a submission from the Head of Defence Office. First interlocutory decision on applicable law, para. 178, fn. 288.

¹¹⁴⁴² *Karami* Judgment, p. 126.

¹¹⁴⁴³ *Al-Halabi* Judgment, pp 52-53, 63-64.

injured the three other victims, but also three previous attempts on his life. The Lebanese Judicial Council applied Article 200 to convict seven accused of co-perpetrating one or more of the three attempted murders, in its judgment in that case issued in January 1997.¹¹⁴⁴⁴ In a subsequent judgment, it convicted an eighth accused, Mr Yasser Saoud, for co-perpetrating one of those attempts.¹¹⁴⁴⁵ Each of the first seven accused had travelled to an agreed ambush spot and lain in wait there—in vain—for the Sheikh to arrive, on one or more of the three relevant occasions.¹¹⁴⁴⁶ Mr Saoud had voluntarily stored weapons at his house and some of the other co-perpetrators met there before the second attempt, armed themselves and waited for the signal to travel to the ambush spot.¹¹⁴⁴⁷

6322. All eight had also participated in some prior activities related to the assassination operation, such as planning, firearms exercises or obtaining a car for that operation,¹¹⁴⁴⁸ and the court did not state in this judgment what conduct, exactly, it considered marked the beginning of each attempted murder.¹¹⁴⁴⁹ However, in its subsequent judgment against Mr Saoud the court clarified that it considered the second attempt began at the moment the other co-perpetrators came to Mr Saoud's house, took up their weapons and waited for the signal.¹¹⁴⁵⁰

6323. Other acts that Lebanese courts have found to meet the Article 200 threshold for beginning an attempted intentional homicide have included, in each case on the same day the crime was intended to be committed:

¹¹⁴⁴⁴ *Al-Halabi* Judgment, pp 54, 56, 63-64.

¹¹⁴⁴⁵ *Al-Halabi (Saoud)* Judgment.

¹¹⁴⁴⁶ *Al-Halabi* Judgment, pp 28-30, 54.

¹¹⁴⁴⁷ *Al-Halabi (Saoud)* Judgment, pp 2-3.

¹¹⁴⁴⁸ *Al-Halabi* Judgment, pp 27-29, 54; *Al-Halabi (Saoud)* Judgment, pp 2-3.

¹¹⁴⁴⁹ Regarding five of the seven accused in question, the court relevantly stated at p. 54 of its *Al-Halabi* Judgment (emphasis added): 'The defendants Khaled Hamid, Mounir Aboud, Ahmad al-Kasm, Rabih Nabah and Wasim Abd al-Mo'ti jointly attempted to kill him on three occasions ... *They planned these three operations, prepared weapons, kept watch on Sheikh al-Halabi and divided their roles after his ambush*, as described in the chapter on the facts and substantiated by evidence. However, Sheikh al-Halabi failed to pass the spot where they were lying in wait, thereby preventing the perpetrators from achieving the desired outcome, even though they commenced the acts that were directly aimed at perpetrating the offence.' The Appeals Chamber appears to have interpreted this passage as identifying each of the listed acts as 'acts that were aimed directly at the commission of the crime, as required by Article 200', First interlocutory decision on applicable law, para. 178. In the Trial Chamber's view, the passage does not clearly do so.

¹¹⁴⁵⁰ *Al-Halabi (Saoud)* Judgment, p. 3.

- at the intended detonation site in the *Balamand Monastery* case, beginning to prepare the explosive charge and stringing the wire that would set it off;¹¹⁴⁵¹
- travelling with weapons to the location of the intended murder;¹¹⁴⁵² and
- similarly to the finding in the second *Al-Halabi* judgment—one person giving others the weapons the latter took to the location of the intended murder.¹¹⁴⁵³

6324. The Trial Chamber concludes from this that Lebanese courts do not necessarily have a precise or entirely consistent position on what conduct, exactly, will meet the minimum threshold under Article 200 of having ‘begun’ an attempted intentional homicide. However, one factor Lebanese courts clearly take into account is proximity, in time, to the moment the attempt ended or was aborted. They consistently find that attempts began within hours or minutes of that moment, on the same day. The Trial Chamber considers this to be a reasonable approach.

6325. The case law examined here also shows that Lebanese courts apply the principle of *dolus eventualis*, set out in Article 189 of the Lebanese Criminal Code, to convict accused of the attempted intentional homicide of unintended victims. In its first interlocutory decision on applicable law, the Appeals Chamber concluded that with regard to such victims, Lebanese law holds a person ‘responsible for an aborted intentional homicide, because although the perpetrator has executed all elements of the crime of intentional homicide with *dolus eventualis*, he did not achieve the expected result for reasons beyond his control.’¹¹⁴⁵⁴ The Parties accepted this conclusion, as does the Trial Chamber.

6326. Lastly, the Trial Chamber notes for avoidance of doubt that despite the overlapping analysis in some Lebanese decisions, particularly *Karami*, of what can amount to an attempt and what level of involvement will constitute co-perpetration of that attempt, they are two distinct questions.

6327. On its face, the definition of perpetration, whether by a sole or several perpetrators, in Article 212 of the Lebanese Criminal Code, still applies in attempt cases. The Lebanese decisions

¹¹⁴⁵¹ *Balamand Monastery* Judgment.

¹¹⁴⁵² *Al-Rifai and others* Judgment, pp 3-4, 13, 15.

¹¹⁴⁵³ *Al-Rifai and others* Judgment, p. 15.

¹¹⁴⁵⁴ First interlocutory decision on applicable law, para. 183.

the Trial Chamber has examined do not suggest otherwise. Hence, for a finding of co-perpetration of attempted intentional homicide, the court must establish that each accused had the *mens rea* for a co-perpetrator of intentional homicide. If that *mens rea* is present, an accused may be a co-perpetrator either for bringing into being the constituent elements of the attempted intentional homicide or for participating directly in its commission; there is no requirement that each accused engage in the same acts.

6328. The *Al-Rifai and others* case provides examples of both kinds of co-perpetration of an Article 201 attempted intentional homicide—where all relevant acts have been completed. The Lebanese Judicial Council convicted as co-perpetrators both the person who had shot the intended murder victim, a Mufti—finding he had brought into being both the *mens rea* and *actus reus* of intentional homicide, although the victim did not die—and three others who had, variously, driven him to and from the scene, helped him to climb into the Mufti’s apartment and stood guard, armed, at the building or get-away car—finding they participated directly in the execution of the crime.¹¹⁴⁵⁵ The Trial Chamber considers these findings were reasonable and legally sustainable. Although some other Lebanese judicial decisions have found people who did the acts the three latter accused did to be accomplices only, it is consistent with the wording of the Lebanese Criminal Code to find all four to have been co-perpetrators instead.

6329. In summary, the Trial Chamber has concluded that under the law applicable in the Special Tribunal, to commit an attempted intentional homicide:

1. a person must perform an act or omission that either:
 - a. begins the execution of an intentional homicide of another person, or
 - b. executes completely the act(s) or omission(s) aimed at committing that crime, except that the other person does not die;
2. the first person must intend to cause the death of another person; and
3. circumstances beyond the first person’s control must prevent the other person’s death.

¹¹⁴⁵⁵ *Al-Rifai and others* Judgment, pp 1-2.

XIV. LEGAL FINDINGS ON ELEMENTS OF THE CRIMES AND INDIVIDUAL CRIMINAL RESPONSIBILITY

A. Legal findings on charged crimes (Counts 2-9)

1. Committing a terrorist act by means of an explosive device

(a) The crime

6330. The Trial Chamber finds that the explosion in Beirut on 14 February 2005 was a terrorist act within the meaning of Article 314 of the Lebanese Criminal Code. This defines a terrorist act as one ‘intended to cause a state of terror and committed by means liable to create a public danger such as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents.’

6331. Detonating an ‘explosive device’ of 2,500 to 3,000 kilograms of TNT equivalent high explosives, set on the back of a light truck, falls squarely within Article 314 as one ‘committed by means liable to create a public danger’.

6332. This particular device was of such a powerful explosive, RDX, and so large that it was inevitably going to kill or injure numerous people who were nearby when it exploded. Detonating a device of that magnitude likewise was inevitably going to destroy or damage proximate buildings and vehicles, and ignite fires. The explosion endangered any property and anyone nearby.

6333. The device exploded in a busy city street in the middle of a weekday: it was detonated approximately 50 to 80 centimetres above ground level in a street lined by multi-storey buildings. This created a ‘canyon effect’ that increased its destructive power.

6334. Numerous members of the public were bound to be have been inside buildings or passing by in vehicles or on foot, and within the explosion’s range, regardless of the fact that the target was Mr Rafik Hariri. And hundreds were, as is shown by the proportion of those killed and injured who were not members of Mr Hariri’s convoy. More than half of the 22 killed by the

explosion,¹¹⁴⁵⁶ other than the suicide bomber, and almost all of the 226 others who were injured,¹¹⁴⁵⁷ had no connection with Mr Hariri's convoy.

6335. The Trial Chamber is also satisfied beyond reasonable doubt that the explosion was an act intended to cause a state of terror. It has found the required intention to cause a state of terror from the circumstances of the explosion.

6336. The Trial Chamber has relied on the size and power of the explosive device, the manner, time and place of its detonation, and its intended target. Detonating the device in those circumstances obviously had the potential to cause fear and panic among, at least, members of the public in the area of the detonation. The evidence proves that it did. Anyone knowing that the attack was to be committed in this manner must have foreseen these consequences.

6337. Additionally, the Trial Chamber is satisfied that the fact that a suicide bomber targeted Mr Hariri shows that the explosion was intended to cause a state of terror.

6338. Mr Hariri was a former prime minister of Lebanon and a prominent political figure who, at the time of his death, was preparing for parliamentary elections in May 2005. His murder, or attempted murder, in a huge explosion would attract enormous publicity and cause many Lebanese to experience fear, insecurity and loss. The evidence from participating victims and witnesses proves that this occurred. Anyone who knew that the explosion was to be triggered in the street when Mr Hariri's convoy was passing, must have foreseen that numerous people would be killed or injured, regardless of whether it succeeded in killing him.

6339. It was also foreseeable that the public would learn that a suicide bomber triggered the attack and that this too would frighten and horrify them.

6340. Lebanese law does not define 'a state of terror', but the ordinary meaning of the word 'terror' and the Lebanese judicial interpretation of Article 314 convinces the Trial Chamber that these foreseeable consequences amounted to 'a state of terror'. The Trial Chamber also concludes

¹¹⁴⁵⁶ Amended consolidated indictment, Schedule A at p. 28, identifying 13 of those killed as bystanders; First decision on agreed facts, paras 1, 8, disposition; Second decision on agreed facts (Merhi), paras 1, 3, disposition; Agreed facts, no. (i).

¹¹⁴⁵⁷ All Parties signed agreements as to evidence under Rule 122, that 226 people were injured in the explosion. First decision on agreed facts, paras 1, 8, disposition; Second decision on agreed facts (Merhi), paras 1, 3, disposition; Agreed facts, no. (ii); Amended consolidated indictment, Schedule B at pp 39-44.

that the state of terror was not just intended for the immediate area of the attack. The attack was intended to resonate throughout Lebanon and in the region, and its intended effects were not just confined to Mr Hariri's supporters. Rather, the evidence of the political background to the attack shows that it was designed to destabilise Lebanon generally.

6341. This attack is also larger in magnitude than other terrorist incidents tried by the Lebanese courts under Article 314. The attack perhaps most closely compares to the car-bombing intended to assassinate Mr Michel Murr in 1991, which likewise 'created panic among the population, killed and injured a number of persons, and destroyed ... buildings.'¹¹⁴⁵⁸ In the present case, however, each impact was on a greater scale, and foreseeably so.

(b) Aggravating circumstances: deaths and destruction of buildings

6342. The explosion on 14 February 2005 caused deaths and the partial destruction of buildings with people inside, such as the St Georges and Byblos Hotels. Although neither is required to prove that a terrorist act was committed, these aggravating circumstances under Article 6 of the Lebanese law of 11 January 1958 are therefore established as a matter of fact. The Article is, however, irrelevant in these proceedings, as it prescribes the death penalty in such circumstances and that punishment does not exist in the Special Tribunal.¹¹⁴⁵⁹

2. Intentional homicide and attempted intentional homicide

6343. The Trial Chamber is satisfied beyond reasonable doubt that the objective elements of both intentional homicide and attempted intentional homicide are established, as is the aggravating circumstance of the use of explosive materials.¹¹⁴⁶⁰

(a) Intentional homicide

6344. The *actus reus* of this crime is the performance of an act, or omission, that is a cause of a person's death.¹¹⁴⁶¹ All Parties agreed that the explosion killed Mr Hariri, and the Trial Chamber

¹¹⁴⁵⁸ *Murr Judgment*, p. 53.

¹¹⁴⁵⁹ See chapter XIII 'Applicable law', (A) (4) 'Articles 6 and 7 of the Lebanese law of 1958'.

¹¹⁴⁶⁰ For the Trial Chamber's findings on the subjective element (*mens rea*) of these crimes, see sub-sections (C) 'Salim Jamil Ayyash', (4) (a) (iii) b. 'Mens rea for intentional homicide', (4) (b) (ii) 'Findings', (4) (c) (ii) 'Findings'.

¹¹⁴⁶¹ See para. 6308.

entered this as an agreement as to evidence.¹¹⁴⁶² This agreed fact establishes the *actus reus* of his intentional homicide.

6345. Firstly, and most obviously, this fact fulfils the requirement of death. Secondly, the fact that the explosion caused Mr Hariri's death fulfils the conduct and causation requirements for this crime.

6346. Applying the same reasoning, the Trial Chamber finds that the agreed fact that the explosion killed 21 other people, who are listed in schedule A of the amended consolidated indictment,¹¹⁴⁶³ satisfies all components of the *actus reus* of the intentional homicide of those 21 people. Specifically, it is established that they died and that the explosion caused their deaths.

(b) Attempted intentional homicide

6347. The Trial Chamber is also satisfied that the first and third of the three elements of the crime of attempted intentional homicide of 226 other people are established. Those first and third elements are the *actus reus*—requiring conduct that either began to execute the intentional homicide of the 226 people, or executed the necessary act(s) or omission(s) completely, except that those people did not die—and the requirement that circumstances beyond the perpetrator's or perpetrators' control prevented their deaths.¹¹⁴⁶⁴

6348. Under Article 200 of the Lebanese Criminal Code, the minimum *actus reus* of this crime is an act or omission that begins to execute the intentional homicide of a person, while Article 201 of that code applies to completed attempts to commit intentional homicide that have 'no effect'.¹¹⁴⁶⁵ Lebanese case law makes clear that 'no effect' in this context means simply that the person did not die, not that they were uninjured.¹¹⁴⁶⁶ Consequently, Lebanese courts have treated explosions of powerful explosive devices that injured many people near them¹¹⁴⁶⁷ as completed attempts to commit intentional homicide.

¹¹⁴⁶² Agreed facts, no. (i).

¹¹⁴⁶³ Agreed facts, no. (i).

¹¹⁴⁶⁴ See para. 6329.

¹¹⁴⁶⁵ See chapter XIII 'Applicable law', (C) (4) 'Attempted intentional homicide'.

¹¹⁴⁶⁶ See chapter XIII 'Applicable law', (C) (4) 'Attempted intentional homicide'.

¹¹⁴⁶⁷ Such as that in the *Zouk Mikayel Church* case. See para. 6319.

6349. The explosion of 14 February 2005 is in the same category. The explosive device triggered that day, both in itself and in the circumstances of its detonation, was likely to kill multiple people when detonated. The Trial Chamber further finds that the device's detonation either was the sole act, or completed fully the acts, required to realise its lethal potential. And that potential was, sadly, realised in the case of 23 people,¹¹⁴⁶⁸ but was not in that of the 226 other people whom it physically injured—some of them severely, some less so.

6350. All Parties agreed that the explosion injured those 226 people, and the Trial Chamber has entered this as an agreement as to evidence.¹¹⁴⁶⁹ The fact that each person was physically injured shows that each was within the range of the explosion.¹¹⁴⁷⁰ Further, no dispute exists that the explosion was likely to cause the death of these 226 people. In these circumstances, the Trial Chamber is satisfied beyond reasonable doubt that an act likely to cause death was committed in respect of each of these 226 people.

6351. With so large a group affected, the reasons why the injured did not die were unlikely to be the same for each person. Medical treatment after the attack would likely have saved some people's lives. Others may have avoided serious injury in the first place, by virtue of where they were at the moment of the blast. The Trial Chamber is satisfied on the evidence that these as well as a range of other circumstances prevented the 226 injured people's deaths.

6352. There is no evidence that any perpetrator of the attack played a part in the circumstances that spared these 226 lives. If circumstances such as where precisely some people were at the moment of detonation meant that the explosion could never have killed them, there is also nothing to suggest the perpetrator or perpetrators would have known those circumstances. Without such knowledge, as explained above,¹¹⁴⁷¹ whether or not the explosion could actually have killed each person is irrelevant in determining liability for their attempted intentional homicide.

6353. The Trial Chamber therefore finds that the death of each of these 226 people was prevented solely by circumstances beyond the perpetrator's or perpetrators' control. The attack on them

¹¹⁴⁶⁸ Including the suicide bomber.

¹¹⁴⁶⁹ Agreed facts, no. (ii).

¹¹⁴⁷⁰ The Trial Chamber deals with the question of the foreseeability of their presence there and the effect of Article 189 of the Lebanese Criminal Code (concerning *dolus eventualis*), for the purpose of determining individual criminal responsibility for this crime, *see* sub-section (C) 'Salim Jamil Ayyash', (4) (a) (iii) 'Findings', below.

¹¹⁴⁷¹ *See* para. 6313.

hence falls under Article 201: all acts required to commit a felony, intentional homicide, ‘were completed, but produced no effect owing to circumstances beyond the control of’ the perpetrator or perpetrators.

(c) Aggravating circumstance: use of explosive materials

6354. Finally, the Trial Chamber finds beyond reasonable doubt that the explosive device used in the attack contained explosive materials within the meaning of Article 549 (7) of the Lebanese Criminal Code. Specifically, the Trial Chamber has already found that the device contained RDX. This is a form of high explosives material, also known as explosives.

6355. Further, taking into account both the wording of Article 549 (7) itself and Lebanese case law such as the *Karami Judgment*,¹¹⁴⁷² the Trial Chamber is satisfied beyond reasonable doubt that committing intentional homicide and attempted intentional homicide by detonating that device would constitute ‘using explosive materials’ to commit those crimes. That aggravating circumstance is therefore established, although as such, it is not necessary for proving either crime. Moreover, as with the circumstances aggravating the crime of committing a terrorist act, the punishment that Article 549 (7) prescribes for committing these crimes using explosive materials—the death penalty—cannot apply in this case.¹¹⁴⁷³

B. Conspiracy to commit a terrorist act (Count 1)

6356. Each of the four Accused are charged with participating in a conspiracy, in which it is alleged that they together with Mustafa Amine Badreddine ‘and others as yet unidentified, including the assassination team agreed to commit a terrorist act by means of an explosive device’ in order to assassinate Mr Hariri.¹¹⁴⁷⁴ The short heading in count one of the amended consolidated indictment is ‘Conspiracy aimed at committing a Terrorist Act’.

6357. The Prosecutor pleads that the ‘aim of the conspiracy, to which all conspirators knowingly agreed, was to commit a terrorist act by detonating a large quantity of explosives in a public place, in order to kill’ Mr Hariri.¹¹⁴⁷⁵

¹¹⁴⁷² See para. 6292.

¹¹⁴⁷³ See paras 6272-6273, *see also* para. 5892.

¹¹⁴⁷⁴ Amended consolidated indictment, paras 1 (count one), 48.

¹¹⁴⁷⁵ Amended consolidated indictment, para. 51.

6358. Each co-conspirator is pleaded to have had a separate role. Mr Ayyash is alleged to have been the ‘assassination team coordinator’. Mr Merhi was ‘the coordinator of the false claim of responsibility’. Mr Badreddine was the ‘monitor/coordinator’ of the conspiracy. Mr Oneissi and Mr Sabra had the pleaded roles of performing ‘supporting tasks for the assassination’. These were seeking a suitable individual, namely Mr Abu Adass, to use ‘to make the false claim of responsibility, in a video, for the attack’ on Mr Hariri, and ‘to ensure the delivery of the video, with a letter attached, for broadcast after the assassination’.¹¹⁴⁷⁶

6359. The evidence underlying the conspiracy is set out and analysed in other sections.

1. The crime of conspiring to commit a terrorist act

6360. The elements of the crime of conspiring to commit a terrorist act are thoroughly analysed at chapter XIII ‘Applicable law’, (C) (2) ‘Conspiracy aimed at committing a terrorist act’. The evidence and the facts must prove the legal elements of the conspiracy charged.

6361. To assassinate someone as closely guarded and protected as Mr Hariri required much careful planning and preparation in the context of this case. This included:

- obtaining a detailed knowledge of his movements, his convoy, its personnel and his usual position within it;
- establishing closed mobile networks for communications between those having some role in the plot, knowing or otherwise;
- choosing a method of assassination;
- obtaining the Mitsubishi Canter, the vehicle used for the assassination;
- picking a suitable site for an explosion;
- selecting a manner of detonation including recruiting the suicide bomber;
- procuring the explosives; and
- setting up the claim of responsibility, including arranging Mr Abu Adass’s role in it.

¹¹⁴⁷⁶ Amended consolidated indictment, para. 48 (b)-(c).

6362. For the conspiracy to exist it was not necessary that everyone having some role in the plot knew that they were part of a conspiracy that involved killing Mr Hariri. For example, the evidence establishes beyond reasonable doubt that at least some users of the Green, Red, Blue and Yellow mobile networks had the common aim of assassinating Mr Hariri, but others may not have. A number of people appear to have been involved in the essential preparatory work, but the number who had to have known of the objective of the plot, namely to kill Mr Hariri, of necessity, would have been smaller.

6363. Legally, to find the existence of a conspiracy to commit a terrorist act, the objective of which was to kill Mr Hariri, the Trial Chamber must be satisfied that, before the attack, two or more people knew and agreed on the four things required by Article 270 of the Lebanese Criminal Code. In this case, this means that they knew and agreed:

1. to kill Mr Hariri;
2. by a means liable to create a public danger;
3. namely, a large explosive device; and
4. that the device would be used so as to create a state of terror—specifically, as charged, that it would be detonated in a public place, consequently killing and injuring people.

6364. However, even if they were not legally required to have known that Mr Hariri was their target,¹¹⁴⁷⁷ the conspirators must have known of and agreed to the last three things in the list, namely, numbers (2) to (4). After carefully reviewing the evidence, the Trial Chamber has concluded that all participants to this conspiracy—in which murdering Mr Hariri was its object—were aware of and agreed with all four. The Trial Chamber is satisfied that all conspirators were aware that they were participating in a conspiracy to murder Mr Hariri and how it was to be done. This required only a small tight-knit group.

6365. The Trial Chamber has determined that the evidence establishes the existence of a conspiracy to commit a terrorist act aimed at killing Mr Hariri. This applies whether or not

¹¹⁴⁷⁷ Given the lack of Lebanese case law on the question of whether conspirators to commit a terrorist act must know the identity of the target, the Trial Chamber has also considered the legal framework that would apply where knowledge of the target is not an element of the crime, *see* chapter XIII ‘Applicable law’, (B) (2) (c) ‘Conclusion: the law applicable to accomplice liability’, *see also* paras 6262-6267.

knowledge of the ultimate objective of killing Mr Hariri is a required element of the crime under Lebanese law. This means that for the purposes of the findings below, on the facts of this case, it does not matter whether Lebanese law requires knowledge of the objective of killing Mr Hariri. This is because the evidence establishes that those who were using the Red mobiles on Monday 14 February 2005 must have known on that day that Mr Hariri was the target of the attack.¹¹⁴⁷⁸

(a) Findings on the elements of the crime of conspiracy: a brief summary

6366. The Trial Chamber has found that Article 270 of the Lebanese Criminal Code defines the crime of conspiracy for the purpose of proceedings before the Special Tribunal.¹¹⁴⁷⁹ It applies to felonies that are crimes against State security, such as terrorist acts. A conspiracy to commit a felony is an agreement between at least two people to commit that felony by specific means.

6367. If the felony is a terrorist act, each conspirator must have agreed to commit the act using a means liable to create a public danger. They must also have agreed on the particular ‘means’ to be used, and on using it in a manner likely to create a state of terror. Furthermore, if the terrorist act aims to kill a particular person, and killing that person would *itself* be likely to create a state of terror, each person must also have agreed to that aim.¹¹⁴⁸⁰

6368. Additionally, the Trial Chamber has found that a conspiracy to commit a terrorist act in order to kill Mr Hariri exists if at least two people agreed to use a large explosive device in a public place, accepted that this act would kill and injure people, and aimed to kill Mr Hariri.

6369. Each would be a conspirator even if some knew details of the plot that others did not, some had no contact with others, some joined the plot after it was formed, and each played a different part in effecting it. The conspirators need not—though they may—belong to a formal organisation. And, to find that a conspiracy occurred the Trial Chamber need not determine who all the conspirators were, and it need not exist for any defined length of time.

6370. A conspiracy to commit a terrorist act in order to kill Mr Hariri need not achieve its aim; the agreement is the crime. In this case though, sadly the conspiracy did achieve its deadly aim.

¹¹⁴⁷⁸ The Trial Chamber has concluded, in determining the applicable law that it is reasonable to conclude that the law requires knowledge of the main target’s identity at least in a conspiracy to commit a terrorist act aimed at killing a particular person, because of that person’s public profile, for example, holding high public office.

¹¹⁴⁷⁹ See chapter XIII ‘Applicable law’, (C) (2) ‘Conspiracy aimed at committing a terrorist act’.

¹¹⁴⁸⁰ See paras 6261-6264.

On 14 February 2005, a large explosive device detonated on a public Beirut city street killing Mr Hariri and 21 others, while injuring many others. This terrorist act also fulfilled the objective elements of the intentional homicide of Mr Hariri and 21 others, and the attempted intentional homicide of the other injured 226.¹¹⁴⁸¹

(b) Charges

6371. In count one of the amended consolidated indictment, the Prosecutor charges the four Accused with participating in a conspiracy to commit a terrorist act, with others, including the former Accused, Mr Mustafa Amine Badreddine, and five unidentified people referred to as Subjects 5, 6, 7, 8 and 9, abbreviated as S5, S6, S7, S8 and S9.¹¹⁴⁸²

6372. These five and Mr Ayyash were allegedly the ‘assassination team’. The six in the ‘assassination team’ used Red and Blue network mobiles, and four, Mr Ayyash, and Subjects 6, 8 and 9, also used Yellow network mobiles.¹¹⁴⁸³ Paragraph 48 pleads that Mr Ayyash, Mr Merhi, Mr Oneissi and Mr Sabra together with Mr Badreddine ‘and others as yet unidentified, including the assassination team, agreed to commit a terrorist act by means of an explosive device in order to assassinate’ Mr Hariri. This is the objective of the conspiracy.

6373. All conspirators, according to the amended consolidated indictment, knowingly agreed to commit a terrorist act by detonating a large quantity of explosives in a public place, in order to assassinate Mr Hariri.¹¹⁴⁸⁴ It was intended to cause a state of terror by a predetermined means liable to create a public danger. The conspirators also either acted intentionally and with premeditation, or foresaw and accepted the risk that their actions would kill and attempt to kill others in the immediate vicinity of the explosion and partially destroy buildings.¹¹⁴⁸⁵

¹¹⁴⁸¹ As set out above in sub-sections, (A) (1) ‘Committing a terrorist act by means of an explosive device’ and (2) ‘Intentional homicide and attempted intentional homicide’.

¹¹⁴⁸² Amended consolidated indictment, paras 1, 3, 15 (a), 48, 50-51, 53, 54 (a)-(c), (h).

¹¹⁴⁸³ Amended consolidated indictment, para. 15 (a), (c)-(d). On the Prosecution’s case, Mr Ayyash used mobiles Red 741, Blue 233 and Yellow 294; Subject 5 used mobiles Red 636 and Blue 585; Subject 6 used mobiles Red 678, Blue 610 and Yellow 457; Subject 7 used mobiles Red 946 and Blue 324; Subject 8 used mobiles Red 893, Blue 817 and Yellow 933; and Subject 9 used mobiles Red 652, Blue 864 and Yellow 024; *see* amended consolidated indictment, para. 18.

¹¹⁴⁸⁴ Amended consolidated indictment, paras 1, 3, 48, 51, 54 (a), (d).

¹¹⁴⁸⁵ Amended consolidated indictment, para. 54 (c), (e)-(g).

6374. The amended consolidated indictment pleads that Mr Ayyash as the alleged coordinator of the assassination team, Mr Merhi as the alleged coordinator of the false claim of responsibility and Mr Badreddine as the alleged ‘monitor/coordinator’ entered into this agreement between 11 November 2004 and the morning of 14 February 2005, before the attack.¹¹⁴⁸⁶ These three and the five unidentified members of the assassination team—Subjects 5, 6, 7, 8 and 9—according to the amended consolidated indictment, were ‘early members’ of the conspiracy.¹¹⁴⁸⁷

6375. The Prosecutor also alleges that Mr Ayyash, Mr Merhi and Mr Badreddine used a closed network of three Green mobiles to monitor and coordinate all aspects of the conspiracy, including the preparation and perpetration of the attack and the preparation of the false claim of responsibility.¹¹⁴⁸⁸

6376. The pleadings specify that Mr Ayyash and the other members of the assassination team used Red, Blue and Yellow network mobiles for the surveillance of Mr Hariri. The so-called ‘assassination team’, under Mr Ayyash’s coordination, also used the Red network mobiles on 14 February 2005.¹¹⁴⁸⁹ Mr Ayyash and Mr Badreddine coordinated the purchase of the Mitsubishi Canter that was used to perpetrate the attack.¹¹⁴⁹⁰ Mr Ayyash was also in contact with Mr Merhi in preparations for the attack, including making the false claim of responsibility.¹¹⁴⁹¹

6377. Mr Oneissi and Mr Sabra, according to the amended consolidated indictment, joined the conspiracy between 22 December 2004 and the morning of 14 February 2005, before the attack. They performed the supporting but necessary tasks of seeking a suitable individual, Mr Ahmad Abu Adass, to make a videoed false claim of responsibility for the attack. They also ensured the delivery of the video, and an attached letter, for broadcast after the attack.¹¹⁴⁹²

6378. Mr Oneissi, it is alleged, also participated in Mr Abu Adass’s disappearance by posing as ‘Mohammed’ who befriended him at the Arab University Mosque.¹¹⁴⁹³ Mr Merhi, Mr Oneissi and

¹¹⁴⁸⁶ Amended consolidated indictment, paras 48 (a)-(b), 54.

¹¹⁴⁸⁷ Amended consolidated indictment, para. 48 (b).

¹¹⁴⁸⁸ Amended consolidated indictment, paras 15 (b), 19 (a).

¹¹⁴⁸⁹ Amended consolidated indictment, paras 15 (a), (c)-(d), 19 (b).

¹¹⁴⁹⁰ Amended consolidated indictment, para. 3 (a).

¹¹⁴⁹¹ Amended consolidated indictment, paras 3 (a), 19 (c), 31.

¹¹⁴⁹² Amended consolidated indictment, paras 48 (c) (i)-(ii), 54.

¹¹⁴⁹³ Amended consolidated indictment, para. 3 (b).

Mr Sabra used their personal mobiles—termed as a group of ‘Purple phones’—to communicate with each other regarding the preparation and carrying out of the false claim of responsibility.¹¹⁴⁹⁴

6379. The Prosecutor also alleges that the four Accused were—as was Mr Badreddine—Hezbollah supporters.¹¹⁴⁹⁵

(c) Findings of fact

6380. The Trial Chamber, as set out above in other sections, has found the following facts established, including those where it is necessary to make the finding beyond reasonable doubt:

i. Political background

- Mr Hariri was a prominent political figure in Lebanon. He had served as prime minister in five governments before resigning in October 2004 and was preparing for parliamentary elections, due to start in May 2005, when he was killed.¹¹⁴⁹⁶

ii. Role of coloured network mobiles

- Some of the users of the Green, Red, Blue and Yellow networks were involved in a common mission, namely, to assassinate Mr Hariri;¹¹⁴⁹⁷
- During the period alleged in the amended consolidated indictment, the Green network comprised Green 023, Green 300 and Green 071. It was a closed network between the three mobiles. It had the appearance of functioning, at least in part, as a ‘mission command’.¹¹⁴⁹⁸ However, a mission command, in particular when it relates to separate limbs of the mission as is the case here, does not automatically

¹¹⁴⁹⁴ Amended consolidated indictment, paras 15 (e), 19 (c)-(d). Further details of the charged involvement of each of the Accused in the conspiracy are summarised in the relevant sections below, *see* (B) (3) ‘Findings on the charged conspiracy to commit a terrorist act’, (D) (3) ‘Findings on individual criminal responsibility’.

¹¹⁴⁹⁵ Amended consolidated indictment, para. 49.

¹¹⁴⁹⁶ These are facts agreed by all Parties that the Trial Chamber has exercised its discretion to consider to be proven. Agreed facts, nos (v)-(vii).

¹¹⁴⁹⁷ *See* para. 4736.

¹¹⁴⁹⁸ *See* chapter VIII ‘Nature and purpose of colour-coded mobile networks and Purple group of mobiles’, (C) (7) ‘Findings; chapter X ‘Chronology of network mobile activity before Mr Hariri’s assassination on Monday 14 February 2005’, (E) (7) ‘Role of the Green network’; *see also* paras 2407-2408.

make all of its members equally responsible for or knowledgeable about the mission;¹¹⁴⁹⁹ and

- Communication between the three Green mobiles followed a structure in which Green 023 communicated only with Green 071 and with Green 300. The users of Green 071 and Green 300 had no contact with each other on their Green mobiles.¹¹⁵⁰⁰

iii. Attribution of Green network mobiles to Mr Badreddine, Mr Ayyash and Mr Merhi

- Mr Ayyash was the user of Green 300; and Mr Badreddine was the user of Green 023; while the Trial Chamber could not be satisfied beyond reasonable doubt that Mr Merhi was the user of Green 071.¹¹⁵⁰¹

iv. Surveillance of Mr Hariri

- The users of the six core Red mobiles, the six core Blue mobiles and the four core Yellow mobiles, conducted surveillance of Mr Hariri and his movements on fourteen different days between 20 October 2004 and Monday 14 February 2005;¹¹⁵⁰²
- Mr Ayyash was the user of at least one mobile in each of these three core groups, namely Red 741, Blue 233 and Yellow 294;¹¹⁵⁰³
- Before Monday 14 February 2005, the day of the attack, the following instances of surveillance were recorded (some of which overlap):

¹¹⁴⁹⁹ See sub-section (3) (f) (ii) 'Mr Badreddine's Green network activity', paras 6623-6635, below.

¹¹⁵⁰⁰ See chapter VIII 'Nature and purpose of colour-coded mobile networks and Purple group of mobiles', (C) 'Green network', (7) 'Findings'.

¹¹⁵⁰¹ See paras 3189, 3671 4262.

¹¹⁵⁰² See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (E) 'Findings'.

¹¹⁵⁰³ See paras 3067, 3141, 3255. Mr Ayyash may also have been using Blue 322, but as this was not pleaded, the Trial Chamber has made no findings to this effect against him.

- Red 741, Mr Ayyash's Red mobile was involved in at least four instances of surveillance. This mobile was in contact with other Red mobiles while their users conducted mobile surveillance of Mr Hariri, on:
 - Monday 31 January 2005 (Higher Shiite Council);
 - Thursday 3 February 2005 (St Georges Marina);
 - Tuesday 8 February 2005 (near the Parliament); and
 - Saturday 12 February 2005 (during trips to churches in Badaro and Mazraa).¹¹⁵⁰⁴
- Mr Ayyash's Blue 233 was involved in at least four separate surveillance operations. It was in contact with other Blue mobiles while their users were engaged in mobile surveillance of Mr Hariri, namely on:
 - Saturday 29 January 2005 (a visit to Mr Hamade's residence from Quraitem Palace and a trip to Al-Naameh Villa);
 - Monday 31 January 2005 (Higher Shiite Council);
 - Monday 7 February 2005 (trip from airport to Quraitem Palace); and
 - Tuesday 8 February 2005 (near the Parliament).¹¹⁵⁰⁵
- Mr Ayyash's Yellow 294 was in contact with other Yellow mobiles while their users twice conducted mobile surveillance of Mr Hariri, on:
 - Tuesday 21 December 2004 (during a meeting with the Hezbollah leader, Mr Hassan Nasrallah in Dahyieh, south Beirut); and

¹¹⁵⁰⁴ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

¹¹⁵⁰⁵ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

- Friday 31 December 2004 (during a journey between Faqra Villa and Quraitem Palace).¹¹⁵⁰⁶
- Mr Ayyash was also the user of another Blue mobile, Blue 322, between 18 October 2004 and Monday 27 December 2004, but because this was not pleaded in the amended consolidated indictment no findings in this respect are made against him;¹¹⁵⁰⁷
 - Blue 322 was in contact with other Blue mobiles while their users were conducting mobile surveillance of Mr Hariri on Tuesday 21 December 2004, when he was meeting Mr Nasrallah;¹¹⁵⁰⁸
- Subject 6 was the user of Red 678 and Blue 610;¹¹⁵⁰⁹ and
 - Red 678 was involved in two surveillance operations. It was in contact with other Red mobiles, including Mr Ayyash's Red 741, while their users conducted mobile surveillance of Mr Hariri on:
 - Monday 31 January 2005 (Higher Shiite Council); and
 - Saturday 12 February 2005 (during trips to churches in Badaro and Mazraa). Red 678 was also in areas relevant to the surveillance and participated in it.¹¹⁵¹⁰
 - Blue 610 was involved in seven instances of surveillance. It was in contact with other Blue mobiles, including Mr Ayyash's Blue 233, while their users

¹¹⁵⁰⁶ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

¹¹⁵⁰⁷ See para. 3096.

¹¹⁵⁰⁸ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

¹¹⁵⁰⁹ See para. 4274.

¹¹⁵¹⁰ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

were engaged in mobile surveillance of Mr Hariri. Blue 610 was also in areas relevant to the surveillance and participated in it. This occurred on:

- Monday 27 December and Friday 31 December 2004 (trips from Faqra Villa to Quraitem Palace);
- Saturday 1 January 2005 (visiting Mr Marwan Hamade's residence and returning to Quraitem Palace);
- Saturday 29 January 2005 (trip to Mr Hamade's residence from Quraitem Palace, and to Al-Naameh Villa);
- Monday 31 January 2005 (Higher Shiite Council);
- Friday 4 February 2005 (from Quraitem Palace to the airport); and
- Saturday 12 February 2005 (trip to church in Badaro).

v. 'Hierarchical' call flows

- The patterns of call flows from the Green network users to the Blue and Red networks reveal several that *could* be considered 'hierarchical'.¹¹⁵¹¹ Several calls from Mr Badreddine on Green 023 to Mr Ayyash on Green 300 were followed, within a short time, by calls from Mr Ayyash—either on Blue 233 or Red 741—to, respectively, another Blue or Red mobile;¹¹⁵¹² and
- There were at least six call flows from Mr Ayyash on Green 300 to Mr Badreddine on Green 023 after Mr Ayyash had been contacted by other network mobiles.¹¹⁵¹³

¹¹⁵¹¹ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (E) 'Findings', (7) 'Role of the Green network'.

¹¹⁵¹² See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005'.

¹¹⁵¹³ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005', (3) 'The day of the attack—Monday 14 February 2005'.

vi. Mitsubishi Canter

- The attack on Monday 14 February 2005 involved an explosion of RDX of 2,500-3,000 kilograms of TNT equivalent, laid out in the rear of a Mitsubishi Canter, weighing around two tonnes;¹¹⁵¹⁴
- The explosives were triggered by an unknown suicide bomber;¹¹⁵¹⁵
- Obtaining the Canter was part of the conspiracy to kill Mr Hariri;¹¹⁵¹⁶
- A ‘dealership’ in Tripoli sold the Canter to two unidentified men on either Monday 17 or Tuesday 25 January 2005. Of those two dates, 25 January 2005 is the more probable;¹¹⁵¹⁷
- On Tuesday 25 January 2005, in the afternoon, there were seven network mobile calls with Subject 6’s attributed Blue 610, connecting to cells in Tripoli. Four of them were with Mr Ayyash on Blue 233. Mr Ayyash’s Green 300 called Mr Badreddine’s Green 023 at 15:10 that day. That was in between two of Blue 610’s seven calls in Tripoli—approximately eleven minutes after the fourth call and 27 minutes before the fifth;¹¹⁵¹⁸
- Green or Blue mobile users had activated cells that provide predicted best server coverage in Tripoli on five days earlier in January 2005:
 - On Tuesday 11 January 2005, Mr Ayyash’s Green 300 mobile had activated cells that provided predicted best coverage to the Tripoli ‘showroom’ or ‘dealership’ where the Canter was bought, with two calls to Mr Badreddine’s Green 023; and

¹¹⁵¹⁴ See para. 1448.

¹¹⁵¹⁵ See para. 1448.

¹¹⁵¹⁶ See para. 4793.

¹¹⁵¹⁷ See chapter XI ‘Importation and sale of Mitsubishi Canter’, (C) ‘Findings’.

¹¹⁵¹⁸ See para. 4780.

- On Wednesday 12, Friday 14, Saturday 15 and Saturday 22 January 2005, Blue 817 (allegedly Subject 8) had activated cells in Tripoli with calls to Subject 6's Blue 610 and Blue 510.¹¹⁵¹⁹
- vii. Explosion on Monday 14 February 2005
- The six core Red mobiles, including Mr Ayyash's Red 741, played a crucial role in executing the attack on Monday 14 February 2005:¹¹⁵²⁰
 - specifically, on Monday 14 February 2005, the six Red mobiles used by Mr Ayyash and Subjects 5, 6, 7, 8 and 9, tracked Mr Hariri and his convoy's movements, made calls that alerted other members of the Red network to Mr Hariri's location, and prepared for the final surveillance and for the execution of the attack along the route that he was expected to take; and
 - aimed at ensuring that the explosive device detonated at the exact time the convoy would pass.¹¹⁵²¹
- Thirty-three calls occurred between the six core Red mobiles in the two hours before the attack. Mr Ayyash's Red 741 mobile was the only one that was in contact with all of the other five Red mobiles that day. Mr Ayyash's calls on Red 741 to Subject 6's Red 678, Subject 8's Red 893 and Subject 9's Red 652, at 11:33:33, 11:34:31 and 11:35:05, triggered the relocation of the users of those three mobiles from Quraitem Palace to the Parliament area, substantially launching the beginning of the operation;¹¹⁵²²

¹¹⁵¹⁹ See paras 4777-4778.

¹¹⁵²⁰ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005'.

¹¹⁵²¹ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005', (E) 'Findings'; see also paras 4718-4720.

¹¹⁵²² See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005', (E) 'Findings'.

- Mr Ayyash's last call using his Red 741 was at 12:50:55,¹¹⁵²³ less than five minutes before the explosion. After the explosion, neither Red 741 nor any other Red mobile was ever used again;¹¹⁵²⁴
- Mr Ayyash coordinated the movements of the users of the three other Red mobiles, Subject 6's Red 678, Subject 8's Red 893 and Subject 9's Red 652 that day;¹¹⁵²⁵
- Just before the attack, there were calls involving Mr Badreddine's Green 023, Mr Ayyash's Green 300 and Mr Ayyash's Red 741:
 - At 11:57, Subject 5's Red 636 called Red 741, then near the crime scene on the PHENMB1 cell. Red 636 was south of the crime scene near the Suleiman Frangieh tunnel, using the ZOUKAK2 cell at the call's start and the PHENMB1 cell at its end. Forty seconds later, at 11:58:31, Mr Ayyash used Green 300 to call Mr Badreddine's Green 023 for 14 seconds. This was the last call within the Green network. Mr Ayyash's Green 300 activated cell towers approximately 100 to 300 metres from the crime scene.¹¹⁵²⁶

viii. False claim of responsibility

- On the afternoon of Monday 14 February 2005, Al-Jazeera broadcast a video in which Mr Ahmad Abu Adass claimed responsibility for the attack on Mr Hariri on behalf of an unknown group, 'Victory and Jihad in Greater Syria', but without referring to the date or manner of his death. A more specific claim, naming the date of the attack as 14 February 2005, was made in the letter that accompanied this video.¹¹⁵²⁷

¹¹⁵²³ From Red 893 for ten seconds. Red 741 used ZOUKAK1, Red 893 activated ETOILE1. *See* para. 4652.

¹¹⁵²⁴ *See* paras 4654-4655, 4669.

¹¹⁵²⁵ *See* chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005'; chapter XIV 'Legal findings on elements of the crimes and Individual criminal responsibility', (C) 'Salim Jamil Ayyash', (3) (e) 'Findings' (on count two).

¹¹⁵²⁶ *See* paras 4644-4645.

¹¹⁵²⁷ *See* chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (G) 'Whether the claim of responsibility was false', (3) 'Findings'.

ix. Disappearance of Ahmad Abu Adass on Sunday 16 January 2005

- Mr Abu Adass disappeared from his home in Beirut on the morning of Sunday 16 January 2005. His family reported him missing on Wednesday 19 January 2005 and never saw him again.

x. Attribution and activity of Purple mobiles

- Mr Merhi was the user of his personal mobile Purple 231; Mr Oneissi was the user of his personal mobile Purple 095; and Mr Sabra was a user of mobile Purple 018;¹¹⁵²⁸
- During the period pleaded for the conspiracy, Mr Oneissi and Mr Sabra used Purple 095 and Purple 018. Mr Oneissi's mobile and Mr Sabra's shared mobile called each other and Mr Merhi on Purple 231, and Mr Oneissi and Mr Sabra's mobile were present in locations near the Arab University Mosque in Beirut, where Mr Abu Adass prayed daily, in late December 2004 and early January 2005;¹¹⁵²⁹
- The Purple mobiles were inactive on Sunday 16 January 2005, but Green 071 and Mr Badreddine's Green 023 had five calls to each other early in the morning that day;¹¹⁵³⁰
- Mr Oneissi's Purple 095 briefly connected to a cell providing coverage to the mosque on the evening of Monday 17 January 2005;
- From Tuesday 18 January 2005 to Saturday 13 February 2005, there was limited contact between the Purple mobiles, and between the Green mobiles; and
- The final call between Green 071 and Mr Badreddine on Green 023 was on Monday 7 February 2005.

¹¹⁵²⁸ See paras 3616, 3826, 4038-4039.

¹¹⁵²⁹ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (D) (3) 'Activity of Mr Merhi's Purple 231, Mr Oneissi's Purple 095 and Mr Sabra's attributed Purple 018, between December 2004 and Friday 7 January 2005'.

¹¹⁵³⁰ See paras 5372-5378.

xi. Video of false claim of responsibility

- The video featuring Mr Abu Adass must have been made between Sunday 16 January 2005, when he left his home, and the attack on Monday 14 February 2005, but on an unknown date, in an unknown location and by unknown people.¹¹⁵³¹

xii. Dissemination of false claim video on Monday 14 February 2005

- On Monday 14 February 2005, a call was made to Reuters news agency at 14:11 from a payphone, in which the caller claimed responsibility for the attack in the name of the *Nusra* and *Jihad* group in Greater Syria. Eight minutes earlier at 14:03, Mr Sabra's shared mobile, Purple 018, had activated a cell providing coverage to an area a few hundred metres from this payphone;
- This call was followed by one to Al-Jazeera at 14:19, from a second payphone. The caller read a statement, claiming responsibility for the attack in the name of the same *Nusra* and *Jihad* group. Mr Oneissi's Purple mobile and Mr Sabra's shared Purple mobile activated a cell at least one kilometre from this payphone within twenty minutes of the call;
- A second call to Al-Jazeera was made at 15:27, from a third payphone, saying that a video tape had been placed in a tree near the Al-Jazeera building. Mr Sabra's shared Purple 018 activated cells providing coverage to this payphone, 26 minutes later;
- At 15:55, Al-Jazeera employees recovered an enclosed letter and the video tape featuring Mr Abu Adass from a tree near the Al-Jazeera office. Mr Sabra's shared Purple 018 activated cells providing coverage to the area around the tree with the videotape, five minutes after the collection of the tape. Mr Oneissi's Purple 095 connected to a cell providing predicted coverage to the tree containing the videotape at the time it was collected;

¹¹⁵³¹ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (G) 'Whether the claim of responsibility was false', (3) 'Findings'.

- A third call was made to Al-Jazeera at 17:04, from a fourth payphone, in which the caller demanded that the video be broadcast. Eleven minutes later, at 17:15, Mr Sabra's attributed shared Purple 018 called Mr Merhi's Purple 231 while connecting to a cell, adjacent to that covering the fourth payphone, about 750 metres away;
- The calls from the four payphones were made with the same telecard;
- According to Al-Jazeera's Beirut chief, Mr Ghassan Ben-Jeddo, who took each call, there were three different callers. Following the final call to Al-Jazeera at 17:04, when the caller urged the broadcast of the video tape, the footage was eventually shown at 17:30;
- On Monday 14 February 2005, Mr Oneissi's Purple 095 and Mr Sabra's shared Purple 018 were used in areas near or *relatively* near to the four payphones from which media outlets were called, and the tree from which the video was collected;
- There were nineteen calls between the three Purple mobiles that day; and
- Mr Merhi used his personal mobile Purple 231 which was in southern Beirut, ten times, seven of which were contacts with Mr Sabra's shared personal mobile, Purple 018, during the afternoon. Mr Merhi's Purple 231 was in contact with Mr Sabra's shared Purple 018 before the call to Reuters, after the three calls to Al-Jazeera, and just before and just after the collection of the video tape and the letter.

xiii. Discarding of Purple mobiles after the attack

- Mr Oneissi, Mr Sabra and Mr Merhi stopped using those personal mobiles, Purple 095, 018 and 231 shortly after the attack; Purple 231 on Tuesday 15 February, and Purple 018 and Purple 095 on Wednesday 16 February 2005.¹¹⁵³²

¹¹⁵³² See paras 5610-5615.

xiv. Mobile network congestion after the attack on Monday 14 February 2005

- After the attack, the mobile telecommunications networks in Beirut were experiencing congestion, in which calls could not be made, or were redirected to neighbouring cells; and
- This diminishes the reliability of the cell site evidence that afternoon and hence where Mr Oneissi's mobile and Mr Sabra's shared mobile were when calls were made.

6381. The Trial Chamber has found that it is not satisfied beyond reasonable doubt that Mr Merhi, Mr Oneissi or Mr Sabra participated in targeting Mr Abu Adass at the Arab University Mosque in late December 2004 or early January 2005, his reported disappearance on Sunday 16 January 2005 or disseminating the claim on the day of the attack. It is also not satisfied beyond reasonable doubt that Mr Oneissi was the 'Mohammed' pleaded in the amended consolidated indictment.

6382. It is also not satisfied that Mr Abu Adass was abducted on Sunday 16 January 2005, as opposed to his voluntarily leaving his home. Nor that any of the three Accused participated in abducting him on that day or any other. Nor that he was forced to participate in making the false claim of responsibility for the attack. Nor that any of the three took part in producing the video of the claim of responsibility, or any of the necessary preparations for it.¹¹⁵³³

6383. The Trial Chamber has set out above, in detail, the historical and political background to the attack on Mr Hariri.¹¹⁵³⁴ As to the alleged links between the attack, the Accused and Hezbollah specifically, the Trial Chamber has found or accepted that the evidence establishes that:¹¹⁵³⁵

- Hezbollah is a political grouping with a military wing;¹¹⁵³⁶
- Those responsible for coordinating the attack had access to what could correctly be described as 'military-grade explosives';¹¹⁵³⁷

¹¹⁵³³ See paras 5459, 5771; chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (J) 'Conclusion'.

¹¹⁵³⁴ See generally, chapter IV 'Historical and political background to the attack'.

¹¹⁵³⁵ See chapter IV 'Historical and political background to the attack'.

¹¹⁵³⁶ See para. 421.

¹¹⁵³⁷ See chapter IV 'Historical and political background to the attack', (T) 'Summary'.

- Mr Badreddine was a senior Hezbollah military official, at least during the war in Syria between 2011 and May 2016;¹¹⁵³⁸
- Mr Ayyash, Mr Oneissi and Mr Sabra were Hezbollah supporters, and Mr Ayyash had Hezbollah connections;¹¹⁵³⁹
- Mr Merhi's younger brother was a Hezbollah member; Mr Merhi used his personal mobile Purple 231 to contact a Hezbollah MP;¹¹⁵⁴⁰
- Numerous people including many close to Mr Hariri viewed the attack on Mr Marwan Hamade on 1 October 2004 as a warning to him and Mr Walid Jumblatt; and
- The Syrian regime and elements in Hezbollah may have had motives to eliminate Mr Hariri, but there is no evidence that the Hezbollah leadership was involved in Mr Hariri's assassination; nor is there direct evidence of Syrian involvement in it.¹¹⁵⁴¹

2. Who participated in the conspiracy charged?

6384. The Trial Chamber has found that Mr Ayyash was using Red 741, one of the Red mobiles that was active in the assassination of Mr Hariri on Monday 14 February 2005 and in his surveillance in the weeks before this. Mr Badreddine is alleged in the amended consolidated indictment to have conspired with him and unidentified others to commit the terrorist attack.

6385. From the findings set out above, the Trial Chamber cannot find beyond reasonable doubt that Mr Oneissi and Mr Sabra participated in the conspiracy charged.

6386. Mr Merhi, as pleaded in the amended consolidated indictment, is alleged to have coordinated their roles in the events surrounding Mr Abu Adass's disappearance, including making a false claim of responsibility for the attack. Mr Badreddine is alleged to have monitored, and with Mr Merhi, coordinated the preparation of the false claim of responsibility. It should logically follow that if the Trial Chamber is not satisfied beyond reasonable doubt that Mr Oneissi and

¹¹⁵³⁸ See chapter IV 'Historical and political background to the attack', (T) 'Summary'.

¹¹⁵³⁹ See chapter IV 'Historical and political background to the attack', (T) 'Summary'.

¹¹⁵⁴⁰ See paras 757-758.

¹¹⁵⁴¹ See chapter IV 'Historical and political background to the attack', (T) 'Summary'.

Mr Sabra had the criminal responsibility alleged, then neither could Mr Merhi who was allegedly coordinating acts that the Trial Chamber cannot find proven.

6387. The Trial Chamber has been unable to conclude beyond reasonable doubt that Mr Merhi was using Green 071. Despite this, an issue for determination would be whether, if Mr Merhi had been communicating by a Green network mobile with Mr Badreddine, he nonetheless could have been participating in the conspiracy.

6388. A further issue is whether the evidence is capable of proving that Mr Badreddine likewise had the pleaded role in respect of either aspect of the conspiracy, namely, the false claim of responsibility or the surveillance and actual attack on Mr Hariri. And if so, whether this affects Mr Ayyash's criminal liability for participating in the conspiracy.

6389. The Parties submissions on the conspiracy are set out below. To determine whether Mr Merhi could be found guilty of participating in the conspiracy it is therefore necessary to briefly examine the submissions relating to Mr Oneissi, Mr Sabra and Mr Badreddine.

(a) Prosecution submissions

6390. In its pre-trial briefs, the Prosecution submitted that the four Accused and Mr Badreddine, as shown by their actions in the preparation, execution and aftermath of the attack, agreed among themselves and with unidentified others, including the assassination team, to commit a terrorist act by means of an explosive device to assassinate Mr Hariri.¹¹⁵⁴²

6391. The conspirators, as noted above, entered into, or joined the agreement on the following dates: Mr Ayyash, Mr Merhi, Mr Badreddine and the assassination team joined sometime between 11 November 2004 and the morning of 14 February 2005, before the attack. Mr Sabra and Mr Oneissi entered it between 22 December 2004 and the morning of 14 February 2005, likewise before the attack.¹¹⁵⁴³

¹¹⁵⁴² Prosecution's updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), para. 60; Prosecution pre-trial submissions (Merhi case), annex A at para. 51.

¹¹⁵⁴³ Prosecution's updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), paras 60-61; Prosecution pre-trial submissions (Merhi case), annex A at paras 51-52.

6392. Of Mr Oneissi's and Mr Sabra's roles in the conspiracy, the Prosecution's pre-trial brief states the following:

ONEISSI's and SABRA's actions demonstrate that they had joined the conspiracy to commit a terrorist act by assassinating HARIRI with the agreed role of participating in the preparation and dissemination of a false claim of responsibility in order to shield the perpetrators from justice. The statements made in the phone calls to Al-Jazeera and the contents of the video-tape demonstrate their knowledge of the crimes committed, including that HARIRI was the target and had been killed, the means used, and the intentions of the perpetrators.¹¹⁵⁴⁴

6393. In opening the case against Mr Merhi, the Prosecution stated that 'the nature of this conspiracy was sufficiently complex as to require not only division of labour among the co-conspirators, but in addition, a hierarchy of management among its membership to ensure that the acts necessary to achieve its ends were completed in a co-ordinated manner'.¹¹⁵⁴⁵

6394. The conspiracy was alleged to have occurred in five distinct phases: from 1 October to 10 November 2004; 11 November to 20 December 2004; 21 December 2004 to 13 January 2005; 14 January to 7 February 2005 and from 8 February to 14 February 2005.¹¹⁵⁴⁶

6395. During the first phase, from 1 October to 10 November 2004, Blue 585 and Blue 324 communicated with each other on ten days in the areas of Quraitem Palace and the Parliament. In this first stage of the planning, perhaps triggered by Mr Hariri's anticipated resignation as prime minister, the Blue and Green networks were created and the initial process of watching Mr Hariri began.¹¹⁵⁴⁷ During the second phase—11 November to 20 December 2004—the nature of the information gathering about Mr Hariri's routines changed. The Blue network's surveillance became dynamic, with the Blue mobiles starting to follow Mr Hariri as he moved.¹¹⁵⁴⁸

¹¹⁵⁴⁴ Prosecution's updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), para. 166.

¹¹⁵⁴⁵ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 16 June 2014, p. 24.

¹¹⁵⁴⁶ Prosecutor's opening statement, T. 16 January 2014, pp 88-89, 92, T. 17 January 2014, pp 3, 9-10, 20-21, 42; Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 41.

¹¹⁵⁴⁷ Prosecutor's opening statement, T. 16 January 2014, pp 88-89; Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 41-42.

¹¹⁵⁴⁸ Prosecutor's opening statement, T. 16 January 2014, p. 89; Prosecutor's opening statement regarding Hassan Habib Merhi T. 18 June 2014, p. 42.

6396. The third phase—21 December 2004 to 13 January 2005—was marked by a significantly heightened degree of activity. First, a number of Yellow mobiles joined the Blue mobiles in the surveillance of Mr Hariri. Second, the Blue network expanded from three to 15 mobiles, while the Yellow network eventually shut down. Third, the triangular protocol adhered to by the original three Blue mobiles was set aside. Fourth, Mr Sabra and Mr Oneissi became actively involved through their Purple mobiles. Fifth, the Red network was created. Sixth, initial steps in relation to the purchase of a vehicle to deliver the bomb were taken. Lastly, the level of surveillance of Mr Hariri increased dramatically.¹¹⁵⁴⁹

6397. The fourth phase, from 14 January to 7 February 2005, was a period where preparatory steps were acted upon and the final tools to co-ordinate the attack emerged.

6398. First, the Red network became operational as the primary surveillance network. Second, Mr Ayyash started using a new Blue mobile (Blue 233) and also became the user of Red 741. Third, Mr Abu Adass was abducted from his home on 16 January never to be seen alive again, with the false claim video having been prepared. Fourth, the Mitsubishi Canter van was purchased on 25 January. Finally, efforts continued to lay a false trail by connecting the conspirators to Tripoli. The abandonment of Mr Merhi's Green 071 brought to an end the fourth phase of the conspiracy.¹¹⁵⁵⁰

6399. The final phase, which lasted from Tuesday 8 February to Monday 14 February 2005, concentrated on three things; these were the continued surveillance of Mr Hariri, coordination of the participants on the day of the assassination and the delivery of the false claim of responsibility.¹¹⁵⁵¹ The Blue and Red mobiles narrowed to a core group of co-conspirators.¹¹⁵⁵²

6400. In its final trial brief and oral closing submissions, the Prosecution argued that the level of sophistication, detailed planning and commitment involved in the attack means that it could only have resulted from a conspiracy to commit a terrorist act by means of an explosive device, led by

¹¹⁵⁴⁹ Prosecutor's opening statement, T. 16 January 2014, pp 92-93, T. 17 January 2014, pp 3, 9-10; Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 43.

¹¹⁵⁵⁰ Prosecutor's opening statement, T. 17 January 2014, pp 10-12, 20-21; Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 43.

¹¹⁵⁵¹ Prosecutor's opening statement, T. 17 January 2014, p. 21; Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 44.

¹¹⁵⁵² Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, p. 43.

a sophisticated military actor.¹¹⁵⁵³ Mr Badreddine was that actor, according to the Prosecution, by virtue of his senior role in Hezbollah, being a ‘Hezbollah military commander of the first order’.¹¹⁵⁵⁴

6401. The Prosecution pointed to a number of specific actions. These were the preparatory surveillance of Mr Hariri, the purchase of the Canter in Tripoli and laying a false investigative trail to Tripoli using Red network mobiles. The Red mobiles were intentionally bought, set up and used there to mislead the eventual investigation into the attack, by diverting its attention from other relevant mobile use during the preparatory stages that could be linked back to the perpetrators.¹¹⁵⁵⁵

6402. Further, there was the execution of the attack. This included the use of military-grade explosives, in the middle of the capital, targeting a person travelling in an armoured convoy. The Prosecution also submitted that the sophistication of the mobile networks used for these activities, and the preparation and execution of the false claim of responsibility pointed to the existence of an agreement among numerous people for this criminal purpose.¹¹⁵⁵⁶

6403. The Prosecution maintained in its closing submissions that at least the ten people specified in the amended consolidated indictment knew about the plot and were part of the conspiracy. These were Mr Badreddine, the four Accused, and the unidentified members of the assassination team,¹¹⁵⁵⁷ namely Subjects 5, 6, 7, 8 and 9.

6404. Mr Badreddine, according to the Prosecution, masterminded and oversaw the attack and led a group of co-conspirators including the four Accused, who were all trusted to fulfil crucial

¹¹⁵⁵³ Prosecution final trial brief, paras 1124-1126, 1140, 1094-1095; Prosecution closing submissions, T. 11 September 2018, pp 22-26, T. 14 September 2018, pp 5-6.

¹¹⁵⁵⁴ Prosecution closing submissions, T. 11 September 2018, pp 21-22, T. 14 September 2018, pp 5-6, in response to the Trial Chamber’s written questions, ‘Why does the Prosecution allege in the sub-heading preceding paragraph 1094, that the attack could only have been carried out “being led by a sophisticated military actor”? And what is meant by that expression?’, Questions for closing submissions, para. 21. Elsewhere in its brief, the Prosecution describes Hezbollah as the sophisticated actor, with Mr Badreddine’s operational abilities ascribed by virtue of his membership in that organisation; Prosecution’s final trial brief, para. 1095, describing ‘a sophisticated, experienced group supported by an unusually well-resourced sponsor.’

¹¹⁵⁵⁵ Prosecution closing submissions, T. 11 September 2018, p. 25; Prosecution final trial brief, paras 458-467, 720-726, 897. The Trial Chamber has accepted that the Red mobile activity shows a deliberate effort to create a misleading forensic trail. *See also* chapter VIII ‘Nature and purpose of colour-coded mobile networks and Purple group of mobiles’, (D) ‘Red network’, (7) ‘Findings’.

¹¹⁵⁵⁶ Prosecution final trial brief, paras 1124, 1140, referring to the detailed submissions made in sections V to VIII of the final trial brief.

¹¹⁵⁵⁷ Prosecution closing submissions, T. 14 September 2018, pp 38, 44-45.

roles in the conspiracy and were therefore necessarily at the ‘very core’ of the planning and execution of the plot.¹¹⁵⁵⁸ Mr Badreddine was ‘the superior at the top of the plot’ and ‘at the very head of the conspiracy’.¹¹⁵⁵⁹ Mr Ayyash was ‘at the epicentre’ of planning and executing the attack, leading the assassination team and a wider group of conspirators to carry out the preparatory surveillance and purchase of the van, and the attack itself.¹¹⁵⁶⁰

6405. Mr Badreddine, Mr Ayyash and the remainder of the assassination team must therefore have known of the plot to assassinate Mr Hariri. In particular, they must have agreed with the others to commit the terrorist act by means of an explosive device to kill him, known that the public explosion would cause additional deaths and intended to cause a state of terror.¹¹⁵⁶¹ The assassination team of Mr Ayyash and Subjects 5 to 9 used the core six Red mobiles, the core six Blue mobiles and the core four Yellow mobiles.¹¹⁵⁶²

6406. Mr Ayyash’s and Mr Badreddine’s mobile activity suggests that they met in person on 20 October 2004, 17 January 2005 and 18 January 2005.¹¹⁵⁶³ Prosecution counsel submitted in their closing arguments that the ‘core six’, the ‘inner core’ who ‘were involved in the coordination on the 14th of February’ all knew of the plan to assassinate Mr Hariri.¹¹⁵⁶⁴

6407. Of Mr Merhi’s role, the Prosecution submitted that the evidence established that he was in charge of creating and delivering the false claim of responsibility—a crucial part of the overall conspiracy—in leading Mr Oneissi and Mr Sabra, who were the trusted central actors in this part of the plot.¹¹⁵⁶⁵ These three Accused must therefore have known, in advance of the attack, of the perpetrators’ purpose, including the objective of the attack and the means of perpetration, and

¹¹⁵⁵⁸ Prosecution closing submissions, T. 11 September 2018, pp 20, 33, T. 13 September 2018, p. 98, T. 14 September 2018, pp 5-6.

¹¹⁵⁵⁹ Prosecution closing submissions, T. 13 September 2018, pp 98-99, T. 14 September 2018, p. 5.

¹¹⁵⁶⁰ Prosecution closing submissions, T. 11 September 2018, pp 20-21, 31-32, T. 14 September 2018, pp 39-42; Prosecution final trial brief, paras 1156-1166.

¹¹⁵⁶¹ Prosecution closing submissions, T. 14 September 2018, pp 37-38; Prosecution final trial brief, paras 1155, 1167.

¹¹⁵⁶² Prosecution final trial brief, paras 358, 389 (i), fn. 620. It is the Prosecution’s case that Mr Ayyash used mobiles Red 741, Blue 233 and Yellow 294; Subject 5 used mobiles Red 636 and Blue 585; Subject 6 used mobiles Red 678, Blue 610 and Yellow 457; Subject 7 used mobiles Red 946 and Blue 324; Subject 8 used mobiles Red 893, Blue 817 and Yellow 933; and Subject 9 used mobiles Red 652, Blue 864 and Yellow 024; *see* amended consolidated indictment, para. 18.

¹¹⁵⁶³ Prosecution final trial brief, paras 399, 438, 477 (iv), 782, 818-823, 828-829. In these submissions, the Prosecution alleged outright that the meeting on 18 January 2005 occurred, but characterised the call activity on 20 October 2004 and 17 January 2005, respectively, as ‘consistent with’ and ‘suggesting’ a meeting, only.

¹¹⁵⁶⁴ Prosecution closing submissions, T. 14 September 2018, pp 36-37.

¹¹⁵⁶⁵ Prosecution closing submissions, T. 14 September 2018, pp 36-37.

agreed to shield them from justice.¹¹⁵⁶⁶ The Prosecution specifically submitted in relation to Mr Merhi that his:

knowledge of the plot, and intentional agreement with the co-conspirators, is further established through his ongoing use of his Purple Phone to supervise and coordinate the false claim component of the plot. **MERHI** co-ordinated the actions of **ONEISSI** and **SABRA** as they located, identified, approached, and abducted a suitable individual to make the false claim of responsibility, which in turn required sufficient knowledge of the nature of the plot, including the means of execution.¹¹⁵⁶⁷

6408. In oral closing submissions, Prosecution counsel stated that Mr Merhi ‘was the coordinator. He was in charge of the false claim. He was in charge of making sure the false claim could take place and creating the video and the letter and then delivering it’.¹¹⁵⁶⁸ However, he ‘was not at the forefront of events in executing the plot. He selected people to do that’.¹¹⁵⁶⁹

6409. Tripoli also featured in the conspiracy. The mention of Tripoli and jihad during the calls to his family following Mr Abu Adass’s disappearance mirrors the false trail to Tripoli that the assassination team left by purchasing, setting up and using the Red mobiles there, to mislead investigators.¹¹⁵⁷⁰ This dovetailing of the two parts of the plot shows that these three Accused, Mr Merhi, Mr Oneissi and Mr Sabra, knew about the entire plot and its purpose.¹¹⁵⁷¹ The timing of their mobile telephone activity on 13 January 2005 is consistent with their having had ‘a conspiratorial meeting’ that day.¹¹⁵⁷²

6410. Further, their involvement in delivering the video and letter after the attack—which described the aim of the plot as Mr Hariri’s assassination—and their pattern of conduct, as evidenced by their mobile call activity, reveals their prior knowledge of the creation of the tape, its content and its purpose.¹¹⁵⁷³ Moreover, Mr Sabra and Mr Oneissi must have known of the plot

¹¹⁵⁶⁶ Prosecution closing submissions, T. 11 September 2018, pp 32-34, T. 14 September 2018, pp 22-24, 33, 38; Prosecution final trial brief, paras 1168, 1174-1182, 1186-1194.

¹¹⁵⁶⁷ Prosecution final trial brief, para. 1177.

¹¹⁵⁶⁸ Prosecution closing submissions, T. 14 September 2018, p. 22.

¹¹⁵⁶⁹ Prosecution closing submissions, T. 14 September 2018, p. 33.

¹¹⁵⁷⁰ See para. 6401.

¹¹⁵⁷¹ Prosecution closing submissions, T. 11 September 2018, p. 34, T. 14 September 2018, pp 71-72; Prosecution final trial brief, paras 458-467.

¹¹⁵⁷² Prosecution final trial brief, para. 477 (iii).

¹¹⁵⁷³ Prosecution closing submissions, T. 11 September 2018, p. 35, T. 14 September 2018, pp 61, 70; Prosecution final trial brief, paras 1179-1181, 1192-1194.

to kill Mr Hariri, as this was necessary for the selection of an individual with the characteristics needed to create a believable claim of responsibility for the attack.¹¹⁵⁷⁴

6411. Although the Accused therefore knew that the conspiracy's aim was to assassinate Mr Hariri, the Prosecution submitted in its final trial arguments that it need not prove this.¹¹⁵⁷⁵ Even if the Trial Chamber were not satisfied that Mr Oneissi and Mr Sabra had the requisite *mens rea* or knowledge to be conspirators, it could still find Mr Merhi guilty of participating in the conspiracy.

6412. The Prosecution submitted—in response to the Trial Chamber's written questions regarding whether it could convict Mr Merhi if it acquitted Mr Oneissi and Mr Sabra—that only a finding that Mr Oneissi and Mr Sabra did not perform the preparatory and shielding acts alleged may affect any findings against Mr Merhi.¹¹⁵⁷⁶ The question was:

If the Trial Chamber were not satisfied beyond reasonable doubt of the guilt of Mr Oneissi and Mr Assad Hassan Sabra, what flow-on effect, if any, would there be in relation to Mr Hassan Habib Merhi's pleaded role, given that he is alleged to have coordinated their activities?

The answer by the Prosecution's lead counsel was:

The only way in which it would have an impact is if you found that all of the allegations made against Mr. Sabra and Mr. Oneissi and their *actus reus*, their acts and conduct, if you didn't find any of that took place and that the Purple Phone patterns just didn't betray the pattern we say, then obviously that's problematic. But otherwise, it has absolutely no effect.

6413. This point is crucial to the Trial Chamber's findings in relation to whether the Prosecution has proved its case against Mr Merhi, either as a co-conspirator or for aiding and abetting the crimes charged.

6414. The separation, according to the Prosecution, between the two sides of the plot—preparing and executing the attack, and the false claim—evidenced by the bifurcated use of the Green

¹¹⁵⁷⁴ Prosecution closing submissions, T. 14 September 2018, pp 34, 37.

¹¹⁵⁷⁵ Prosecution closing submissions, T. 11 September 2018, pp 116-117, T. 13 September 2018, p. 87; *see also* Prosecution closing submissions, T. 13 September 2018, pp 79-81, with respect to knowledge of this on the part of Mr Oneissi and Mr Sabra prior to the disappearance of Mr Abu Adass, as it pertains to aiding and abetting.

¹¹⁵⁷⁶ Questions for closing submissions, para. 5; Prosecution closing submissions, T. 14 September 2018, pp 72-73.

network, and the existence of separate Blue, Red and Yellow networks, was, according to the Prosecution, ‘only forensic’.¹¹⁵⁷⁷ The Trial Chamber understands the expression ‘only forensic’ to mean a merely formal or technical separation, intended to prevent the discovery of links between the different aspects of the plot during an eventual investigation.

6415. In reality, the Prosecution argued, the core conspirators operating the networks acted in tandem as a single entity, overseen by Mr Badreddine through the Green network, with a common purpose of executing the attack.¹¹⁵⁷⁸ For example, Mr Ayyash and Mr Merhi, who were each responsible for one side of the plot, at key moments were in contact directly and involved in hierarchical call flows involving the Green network mobiles.¹¹⁵⁷⁹ These are the clearest examples of the four Accused’s involvement in the conspiracy through their respective parts of the plot.¹¹⁵⁸⁰

6416. The four Accused and Mr Badreddine shared a common support for Hezbollah;¹¹⁵⁸¹ the Green network, according to the Prosecution, was ‘a Hezbollah network’.¹¹⁵⁸² The political context surrounding the plot, while not required for the legal definition of the crime, explains the conspiracy’s evolution, timing and stages.¹¹⁵⁸³ Finally, the Prosecution pointed to a correlation between the activities of others, such as the Syrian military intelligence chief, Mr Rustom Ghazaleh, and the senior Hezbollah official, Mr Wafik Safa, and developments in the plot to assassinate Mr Hariri.¹¹⁵⁸⁴

6417. Defence submissions stated the Prosecution had characterised Mr Ghazaleh and Mr Safa as co-conspirators. Consequently, the Trial Chamber had asked the following question of the Prosecution:

Is the Prosecution now alleging, as stated at paragraph 434 of the Sabra brief, that the Syrian President Mr Bashar Al-Assad, the then Syrian Military Intelligence Chief in Lebanon, Mr Rustom Ghazaleh, and ‘the head of the central unit for liaison and

coordination in Hezbollah' Mr Wafik Safa, were co-conspirators in the plot to murder Mr Hariri?¹¹⁵⁸⁵

6418. Prosecution counsel clarified that the Prosecution does not seek, nor does the Trial Chamber need to make, any findings on anyone not named in the amended consolidated indictment.¹¹⁵⁸⁶

(b) Defence submissions

6419. The **Ayyash Defence** submits that the Prosecution could not prove the existence of a conspiracy. It submits that the Prosecution infers the alleged conspiracy from the size of the explosion and certain mobile telephone activity. This conspiracy is impossible to prove. The meetings that the Prosecution alleges occurred are speculative and the calls it relies on are 'contentless'.¹¹⁵⁸⁷

6420. Even if a 'collaborative group' existed, it is likely that some of the alleged conspiracy's unidentified members did not know the true purpose or the ultimate objective of the conspiracy.¹¹⁵⁸⁸ The Canter was more likely purchased on Monday 17 than Tuesday 25 January 2005, and on 17 January, Blue 233 (attributed to Mr Ayyash) was not active.¹¹⁵⁸⁹

6421. If the Canter had been purchased on Monday 17 January 2005, the Prosecution's theory on the network mobile activity in Tripoli before and on that day makes no sense.¹¹⁵⁹⁰ Furthermore, the Prosecution wrongly alleges a correlation between the progress of the alleged conspiracy and contemporaneous political events in Lebanon.¹¹⁵⁹¹ The Ayyash Defence also submits that the Prosecution, in its final trial brief and for the first time, elevated Mr Ghazaleh and Mr Safa to the role of co-conspirators.¹¹⁵⁹²

¹¹⁵⁸⁵ Questions for closing submissions, para. 11 (footnote omitted).

¹¹⁵⁸⁶ Prosecution closing submissions, T. 11 September 2018, pp 26-27.

¹¹⁵⁸⁹ Ayyash Defence final trial brief, paras 126, 149-157; Ayyash Defence closing submissions, T. 17 September 2018, pp 82, 84, 86.

¹¹⁵⁹⁰ Ayyash Defence final trial brief, paras 99-100; Ayyash Defence closing submissions, T. 17 September 2018, p. 88.

¹¹⁵⁹¹ Ayyash Defence final trial brief, para. 45; Ayyash Defence closing submissions, T. 17 September 2018, p. 14.

¹¹⁵⁹² Ayyash Defence final trial brief, para. 67; Ayyash Defence closing submissions, T. 17 September 2018, p. 19; *see also* para. 114.

6422. Regarding the Prosecution's allegation that the Green network was a 'Hezbollah network', the Ayyash Defence argues that this is not supported by the evidence; Mr Nasrallah made no mention of it at the press conference the Prosecution relies upon, and it does not corroborate Mr Wissam Al-Hassan's evidence, which has limited relevance and is unreliable. The Prosecution's argument that the Accused, as supporters of Hezbollah, would thus have had access to the use of this network is an 'illogical leap'.¹¹⁵⁹³

6423. The **Merhi Defence** submits that the Prosecution failed to demonstrate a merger of wills between all of the alleged co-conspirators¹¹⁵⁹⁴ or that Mr Merhi, specifically, had the knowledge required to be a co-conspirator. There was no contact between Green 071 and Green 300 or other network mobiles and only minimal contact between a personal mobile attributed to Mr Ayyash and Purple 231.¹¹⁵⁹⁵ This is insufficient to infer that Mr Merhi knew and agreed to all facets of the conspiracy.¹¹⁵⁹⁶

6424. In closing submissions, the Merhi Defence emphasised that Green 071 never went to any of the locations related to the crime or had any significant activity on any of the key dates. The eighteen Green mobile calls were 'unrelated to the phones used to survey Mr Hariri or the phones of those who executed the assassination', and had nothing to do with the coloured networks or the purchase of the Canter. The mobiles attributed to him 'were clearly absent during each and every important phase of the alleged conspiracy'.¹¹⁵⁹⁷

6425. Additionally, there is no evidence that Mr Merhi knew and agreed to the means and tools used to carry out the conspiracy, including the location of the explosion, the surveillance of Mr Hariri, the acquisition and use of a bomb transported in a vehicle and the organisation of the false claim.¹¹⁵⁹⁸

¹¹⁵⁹³ Ayyash Defence final trial brief, paras 69-73. This is dealt with in more detail in chapter IV 'Historical and political background to the attack', (S) 'The Accused's and Mustafa Amine Badreddine's alleged associations with Hezbollah'.

¹¹⁵⁹⁵ Merhi Defence final trial brief, paras 418-420, 453; Merhi Defence closing submissions, T. 18 September 2018, pp 67-69, 75-76, 98.

¹¹⁵⁹⁶ Merhi Defence final trial brief, para. 418.

¹¹⁵⁹⁷ Merhi Defence closing submissions, T. 18 September 2018, pp 67-69.

¹¹⁵⁹⁸ Merhi Defence final trial brief, paras 424-451; Merhi Defence closing submissions, T. 18 September 2018, p. 97. The Trial Chamber has rejected that the Accused must legally have known of *all* of these specific things to have committed a conspiracy to commit a terrorist act. The Merhi Defence also implicitly submitted, in oral closing

6426. Further, the Prosecution presented no evidence about the date on which the conspiracy was concluded, which is a material fact.¹¹⁵⁹⁹ Any date that precedes the time-frame alleged in the amended consolidated indictment constitutes an expansion of the charges and would therefore be invalid.¹¹⁶⁰⁰ The Merhi Defence also challenges the Prosecution in including Mr Ghazaleh and Mr Safa as members of the conspiracy, on the procedural ground that they were not named in the amended consolidated indictment.¹¹⁶⁰¹

6427. The Merhi Defence, in closing submissions, in response to the Prosecution stating that it was not necessary to prove that Mr Oneissi was ‘Mohammed’, noted that the Prosecution was alleging that Mr Merhi coordinated the kidnapping of Mr Abu Adass, and:

Therefore, the Prosecution failed to prove the identity of the kidnapper, and this failure is a failure to prove the charge of coordinating the kidnapping by Mr. Merhi. And if Oneissi was not the alleged Mohammed, is not Mohammed, that would have serious consequences on the Prosecution’s theory.¹¹⁶⁰²

6428. In response to the Prosecution’s suggestions that the user of Green 071 and Purple 231 participated in meetings with other mobile users, the Merhi Defence noted that the Prosecution in-house expert witness Mr Gary Platt had used four elements to support this proposition. These were short calls, convergent movements, activation of the same cells and a period of silence or inactivity. These, however, were not available regarding Mr Merhi. ‘Basically, the Prosecution simply interpreted here phone calls, and a call there, to conclude there were possible meetings’. Counsel described it as ‘a virtual story that was created by the Prosecution in which he determined the actors, directed its scenario, and presented it to you in a pattern that varies with the interests of the Prosecution in this case’.¹¹⁶⁰³

arguments, that Lebanese law requires the conspirators to have known the target’s identity. The Trial Chamber has accepted that such knowledge is required in this case. *See* para. 6152.

¹¹⁵⁹⁹ Merhi Defence final trial brief, paras 404-414; Merhi Defence closing submissions, T. 18 September 2018, pp 94-95, T. 19 September 2019, pp 16-18.

¹¹⁶⁰¹ Merhi Defence final trial brief, paras 37-50, 415; *see also* para. 115.

¹¹⁶⁰² Merhi Defence closing submissions, T. 18 September 2018, p. 82, responding to Prosecution final trial brief, para. 518.

¹¹⁶⁰³ Merhi Defence closing submissions, T. 18 September 2018, p. 84.

6429. The **Oneissi Defence** takes no position on whether there was a conspiracy, but submits that the Prosecution has not proven that Mr Oneissi entered into an agreement to commit a crime against State security or had the requisite knowledge to be liable as a conspirator.¹¹⁶⁰⁴

6430. The **Sabra Defence** submits that there is insufficient evidence to prove that the Accused knew or agreed with the aim of assassinating Mr Hariri by detonating a large quantity of explosives in a public place.¹¹⁶⁰⁵ Moreover, in the absence of concrete evidence about the circumstances in which each Accused came to participate in the alleged conspiracy, the increase in contact between the Purple mobiles is insufficient evidence on its own to infer that the Accused joined a conspiracy.¹¹⁶⁰⁶

6431. The Prosecution also failed to prove a motive underpinning the conspiracy, which rendered the amended consolidated indictment defective.¹¹⁶⁰⁷ Additionally, given the circumstantial nature of the Prosecution case, without evidence of the Accused's motive, the Trial Chamber cannot find that the Accused's guilt is the only reasonable inference.¹¹⁶⁰⁸

6432. The Prosecution failed to name known co-conspirators, including the Syrian President Bashar Al-Assad, Mr Ghazaleh, Mr Safa and other mobile users, and failed to allege their specific acts and omissions.¹¹⁶⁰⁹ The Prosecution was obliged to name, if not to indict, all known co-conspirators.¹¹⁶¹⁰ In closing submissions, counsel for Mr Sabra argued that the 'Prosecution needed to implicate Hezbollah, and others such as Ghazaleh, to prove the motive and the capacity of the conspiracy'. Both of these were material facts requiring pleading.¹¹⁶¹¹

¹¹⁶⁰⁴ Oneissi Defence final trial brief, paras 671-693, 703-714, 721; Oneissi Defence closing submissions, T. 19 September 2018, pp 120-121, T. 20 September 2018, pp 97-103, 138-140.

¹¹⁶⁰⁵ Sabra Defence final trial brief, paras 453-458; Sabra Defence closing submissions, T. 21 September 2018, pp 29-32; Sabra Defence pre-trial brief, para. 12 (v).

¹¹⁶⁰⁶ Sabra Defence final trial brief, para. 439.

¹¹⁶⁰⁷ Sabra Defence final trial brief, paras 421-430; Sabra Defence closing submissions, T. 21 September 2018, pp 13-28. On both procedural and substantive legal grounds, the Trial Chamber has rejected the Sabra Defence's submissions that the Prosecution must prove a motive for committing the alleged terrorist act. *See* paras 126, 6191, 6197, 6204.

¹¹⁶⁰⁸ Sabra Defence final trial brief, paras 429-430, 438.

¹¹⁶⁰⁹ Sabra Defence final trial brief, paras 431-436; Sabra Defence closing submissions, T. 21 September 2018, pp 26-29; Sabra Defence pre-trial brief, para. 12 (i).

¹¹⁶¹⁰ Sabra Defence final trial brief, paras 431, 435-436. The Trial Chamber has found that the Prosecution met its pleading obligations regarding the identification of co-conspirators. *See* para. 100.

¹¹⁶¹¹ Sabra Defence closing submissions, T. 21 September 2018, p. 13.

6433. The Prosecution also failed to prove the dates and circumstances in which each Accused joined the alleged conspiracy, which impacted the Accused's fair trial rights.¹¹⁶¹² Finally, there is insufficient evidence that any of the Accused are supporters of Hezbollah, which goes to the Prosecution's allegation of the Accused's motive for the attack.¹¹⁶¹³

(c) Legal Representatives of Victims submissions

6434. The Legal Representatives of Victims submit that irrespective of their individual roles and responsibilities, there is ample evidence that the four Accused, Mr Badreddine and others were involved in a conspiracy to assassinate Mr Hariri.¹¹⁶¹⁴ The intricate planning and logistical support, substantial financial investment, ability to acquire a large amount of military-grade explosives and number of unattributed mobiles make it inconceivable that only just five people planned and executed the attack.¹¹⁶¹⁵

6435. Therefore, they submit that, in addition to the Accused and Mr Badreddine, 'there was a larger scale of network or organisation that is responsible for the 14 February attack'. Further, the conspirators had a common political purpose—to kill Mr Rafik Hariri.¹¹⁶¹⁶ Based on the evidence, they submit that the 'organisation' in question is Hezbollah and that 'there is an irresistible inference that the conspiracy or joint criminal enterprise was inspired by' the Accused's and Mr Badreddine's 'association with that organization rather than any other more personal motive'.¹¹⁶¹⁷

¹¹⁶¹² Sabra Defence final trial brief, paras 437-439; Sabra Defence pre-trial brief, para. 12 (ii)-(iv). The Trial Chamber has rejected this submission. *See* chapter II 'The Prosecution's pleaded case', (B) (3) 'The dates of the alleged conspiracy', (c) 'Findings'.

¹¹⁶¹³ Sabra Defence final trial brief, paras 440-452; Sabra Defence closing submissions, T. 21 September 2018, pp 12-13, 20-27; Sabra Defence pre-trial brief, paras 24-26. As explained immediately above, the Trial Chamber has rejected the Sabra Defence's submissions that the Prosecution must prove a motive for committing the alleged terrorist act on both procedural and substantive legal grounds. For the Trial Chamber's general approach to submissions concerning Hezbollah. *See also* chapter II 'The Prosecution's pleaded case', (B) (5) 'Hezbollah and the political context', (c) 'Findings'; chapter IV 'Historical and political background to the attack', (S) 'The Accused's and Mustafa Amine Badreddine's alleged associations with Hezbollah'.

3. Findings on the charged conspiracy to commit a terrorist act

(a) The conspiracy generally

6436. The only inference reasonably available from the totality of the evidence is that there must have been an agreement between two or more people to commit a terrorist act by means of an explosive device in order to assassinate Mr Hariri. That is exactly what occurred. The evidence establishes that many people were involved in the preparatory steps, with numerous different mobile users having conducted surveillance, for instance. Moreover, it would be unreasonable to find that the commission of the crime, that required such a level of planning and coordination, as is set out above, could only have involved one person.

6437. The evidence, however, does not permit the Trial Chamber to establish how many knowing participants there were in the overall conspiracy. The Trial Chamber's view is that a conspiracy of this type required some but not necessarily all of the 'actors' identified above¹¹⁶¹⁸ to know what it was intended to achieve, namely, Mr Hariri's death.

6438. Breaking it down by the actions and actors necessary for its success: those involved in the surveillance of Mr Hariri's movements in December 2004 and January and February 2005 must have known that he and his convoy were the targets *of the surveillance*. This is the only reasonable conclusion available from the totality of the evidence regarding the Red, Blue, Yellow and Green networks.

6439. The user of every core Red, Blue and Yellow mobile, including Mr Ayyash, who conducted surveillance of Mr Hariri and his movements, would have known, by virtue of having participated in that activity, that Mr Hariri was the person under watch. Although they did not need to know the precise reason why, they had to have been trusted associates. This could have been through common membership in an organisation.

6440. The six core Red mobile users must have known who they were tracking on the day of the attack, both from their actions that day and their role in the surveillance leading to it. As for the claim of responsibility, anyone who was aware of the content of the video tape or its accompanying letter *before* the attack necessarily knew that Mr Hariri was the intended victim of a 'martyrdom',

¹¹⁶¹⁸ Namely, Subjects 5, 6, 7, 8, 9 and Mr Ayyash.

the term used in the video of the claim of responsibility,¹¹⁶¹⁹ or a suicide¹¹⁶²⁰ operation. But knowledge of this fact alone does not necessarily extend to awareness that Mr Hariri was going to die in a *terrorist* attack using an explosive device, as opposed to another manner of attack, for example, by shooting him in a public place. Further, the video does not mention how Mr Hariri was to die, nor when.

6441. Whoever triggered the explosive device that was on the Canter knew that they were detonating an explosive device in a public location in a manner intended to spread terror, and that it would kill and injure people. They must have known that they were going to detonate the explosives when Mr Hariri's convoy passed and that it was the target of the attack. The driver of the Canter was required to move towards Mr Hariri's convoy as it passed the St Georges Hotel and to detonate the explosives. After eliminating other possibilities as not reasonably available on the evidence, the Trial Chamber has concluded beyond reasonable doubt that the suicide bomber himself detonated the explosives.¹¹⁶²¹ The suicide bomber, therefore, at least legally, was a member of the conspiracy.

6442. The evidence establishes that two men bought the Mitsubishi Canter, and some Blue and Green mobile users may have known this and participated in the purchase. However, this does not establish that either those men or the Blue and Green mobile users were aware that it was intended to be used in an attack on Mr Hariri or that it was to be loaded with RDX or placed the explosives on it with or without this knowledge.

6443. Further, there is no evidence of mobile use *directly* connecting Mr Ayyash or any other Accused person with its purchase. Mr Ayyash's Green 300 twice connected to a cell covering the truck 'dealership' in Tripoli on 11 January 2005, at 14:30 and an adjacent one at 14:55, calling Mr Badreddine's Green 023, which was in Beirut.

6444. The Canter, however, was not sold to the two buyers until either Monday 17 or Tuesday 25 January 2005. Mr Ayyash may well have been there looking around for a suitable vehicle to use in the attack; that is one inference available from the evidence.

¹¹⁶¹⁹ The term used in the video tape. *See* para. 5702.

¹¹⁶²⁰ The term used in the letter. *See* para. 5703.

¹¹⁶²¹ *See* para. 1448.

6445. But there are others, such as that he was in Tripoli for some other reason. The evidence as to when the Canter was placed on show for sale at the dealership is vague; it was purchased in December 2004, but the dealers were unable to say with any precision when it was actually displayed for sale. So there is no evidence from which the Trial Chamber could positively conclude that the Canter was on display on Tuesday 11 January 2005 *and* that Mr Ayyash either saw it, *or* further, made inquiries about it.

6446. There was Blue network activity in Tripoli in January 2005. Blue 817 was in Tripoli on 12, 14, 15 and 22 January, and Subject 6's Blue 610 was there on Tuesday 25 January 2005. On Monday 14 February 2005, Subjects 6 and 8 were using their Red mobiles, respectively Red 678 and Red 893, while near the Parliament, to communicate with Mr Ayyash on Red 741. Subject 6 on Red 678, was also near Quraitem Palace when Mr Hariri departed for Parliament that day.

6447. On Tuesday 25 January 2005, Mr Ayyash's Blue 233, in Beirut, and Subject 6's Blue 610, in central Tripoli, exchanged calls at 14:40, 14:54 and 14:59. Mr Ayyash's Green 300 then called Mr Badreddine's Green 023 at 15:10. At 15:37, Subject 6's Blue 610, activating the cell providing coverage to the dealership, called Mr Ayyash's Blue 233, in Beirut. This may have coincided with the Canter's purchase.

6448. It is possible that whoever purchased the Canter—or at least one of the two—either knew of or participated in placing the RDX on it. On the other hand, it is equally conceivable that they did not. Both scenarios are plausible. Again, it stands to reason that whoever bought the Canter, or alternatively, provided it to those who loaded the explosives onto it, had to have been trusted. This is for the obvious reason that their involvement in this aspect of the conspiracy may have become evident after the explosion, if an investigation revealed its use in the explosion. As it indeed did. These people had to be relied upon not to reveal their participation—knowing or unknowing—in this. However, at the time of its purchase, they did not need to have known that it was to be used in Mr Hariri's assassination.

6449. Logically, those involved in the plot to kill Mr Hariri would have participated in some way in the Canter's purchase and employed a certain discipline while doing so. They most probably selected this particular truck yard in Tripoli because it sold trucks for cash, with little documentation and without verifying buyers' identities. Its location in Tripoli also, as the

Prosecution contends, moved the purchasers away from Beirut where the explosion was to occur. Nevertheless, those who actually bought the Canter did not need to have been aware of the objective of the conspiracy.

6450. The Trial Chamber has examined the evidence holistically, in its totality, by examining each piece of evidence separately; it has also connected these pieces together and re-examined them as a whole.

6451. However, it cannot conclude from the combination of calls made in Tripoli on Tuesday 11, Wednesday 12, Friday 14, Saturday 15, Saturday 22 and Tuesday 25 January 2005—when combined with the other relevant evidence—that the only reasonable inference available is that the two men who bought the Canter knew that it was intended to be used in a terrorist attack on Mr Hariri. It is equally plausible that whoever bought it did not know the purpose of its purchase.

6452. There is no firm evidence about who bought the vehicle, or where it went thereafter. There is a gap in the evidence between its purchase and its reappearance in the explosion several weeks later. It is highly probable that Subject 6, using Blue 610 in Tripoli on Tuesday 25 January 2005 at a relevant time and location was involved in its purchase, especially given his role in the wider surveillance and his use of Red 678, and hence his knowing involvement in the attack, on Monday 14 February 2005.

6453. The Trial Chamber, however, cannot conclusively determine that Subject 6 was one of the two men who physically purchased the vehicle, as opposed to being someone who was nearby and possibly supervising its acquisition, or watching while it happened. It would appear from the activities of Red 678 and Blue 610, both attributed to Subject 6—who was clearly involved in both the surveillance of and attack against Mr Hariri—that this person was involved in some way in the Canter's purchase.

6454. It is indeed possible—based upon the call data records showing the movement of Blue 610 between Tripoli and Beirut—that the user of Blue 610 was driving the Canter from Tripoli to Beirut, if it had in fact been purchased on Tuesday 25 January. However, this is not the only inference available from the call data records as it is likewise conceivable that the user of Blue 610 was travelling to Beirut in another vehicle. There is no evidence outside of the call data records as to what Blue 610 was doing, nor of that person's identity.

6455. So who, then could have been in the conspiracy? In the Trial Chamber's view, from the evidence, there are two equally reasonable possibilities, namely, a tight conspiracy restricted to a handful of participants, or one with a broader but still restricted membership, possibly limited to the ten or so suggested by the Prosecution.

(b) A broader conspiracy?

6456. From the evidence, it could appear that the conspiracy involved, as the Prosecution argued, as many as ten or more participants. In this scenario, the participants had varying roles, but each part was sufficiently important to the plan's success that, before the attack on 14 February 2005, each of them knew its essential elements. That is, not just that their operation focused on Mr Hariri, but also that the aim was to kill him, and how this was to be done.

6457. The members of such a conspiracy would have included some or all of those who executed the terrorist attack, including the six core Red mobile users on 14 February 2005 and, at least legally, the suicide bomber. They may also have included the two men who purchased the Canter and the person(s) who loaded the explosives onto it. In addition, such a conspiracy could also have included those who persuaded or directed others to do the acts needed to prepare for and execute the attack, even if they did not themselves participate directly in any of those acts; and those who prepared the false claim of responsibility for the attack.

6458. The dissemination of the claim of responsibility was clearly meant to divert attention away from the attackers and to avoid detection and apprehension,¹¹⁶²² but the conspirators may also have intended to foster a state of terror by broadcasting a claim by an unknown, fictitious militant group.

6459. Preparing the false claim involved committing serious criminal acts including the possible abduction and murder of Mr Abu Adass, who disappeared in mid-January 2005. The planning of and propagating the claim of responsibility—including preparing Mr Abu Adass for the video and then filming him—required strict secrecy and particular skills. Evidently, at least one person who participated in it knew of its connection with Mr Hariri's intended assassination before it occurred.

¹¹⁶²² See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (G) 'Whether the claim of responsibility was false', (3) 'Findings'.

The video, however, does not say how Mr Hariri was to be murdered; there is no mention of an explosion.

6460. Whoever made the video must have known of its connection with Mr Hariri's intended death. Logic dictates that more than one person would have been involved in making the video and preparing Mr Abu Adass for his role in it. However, there is no evidence of when this occurred; the video must have been made between Sunday 16 January 2005 when Mr Abu Adass left his home, and the time when the attack occurred on Monday 14 February 2005. But exactly when is a matter of speculation, as nothing connects any of the Accused with anything related to making the video, including when, where and how it was made.

6461. Whoever called Al-Jazeera and Reuters on Monday 14 February 2005, after the attack, must have known at the time that they were participating in activities related to it. In this respect, at least, they were legally accessories to the terrorist act under Article 219 (5) of the Lebanese Criminal Code if they were aware that it was a *false* claim of responsibility for the attack *and* had entered into the agreement to do so *before* the attack occurred.

6462. If, however, they were unaware that the calls related to a *false* claim, the caller(s) could not have been legal accessories under Article 219 (5) as alleged. Its *actus reus* requires that they 'helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice', or, as alleged in this case 'to shield one or more of the participants from justice'.¹¹⁶²³ The Prosecution alleges only the third kind of assistance, help in shielding participant(s) in the crimes from justice.

6463. If the caller(s) believed that the real culprit, as the letter accompanying the video claimed, was the *El-Nusra-wal-Jihad-fi-Bilad-El-Sham* 'Society for Support and Jihad in Greater Syria', *Abou Hafass El-Chami*,¹¹⁶²⁴ they could not have thought that they were 'shielding the participants

¹¹⁶²³ In the video, Mr Abu Adass said: 'In the name of Allah, Lord of the Worlds, Blessings and Peace be upon his Beloved Prophet and his family and all his companions. In support of our brothers, the Mujahedeen in the Land of the Two Holy Mosques, and to avenge their innocent martyrs, who were killed by the security forces of the infidel Saudi regime in the Land of the Two Holy Mosques, we have resolved, having placed our trust in God Almighty, to inflict just punishment upon the agent of that regime and its cheap tool in Greater Syria, the sinner and holder of ill-gotten gains Rafiq Hariri, through the execution of a resounding martyrdom operation; such as to confirm our promise of Victory and jihad and to herald numerous martyrdom operations against the infidels, apostates and tyrants in the Greater Syria. Praise be to Allah, Lord of the Worlds.', exhibit P499 (The digital format of the video tape containing the claim of responsibility); exhibit P499.1 (Transcript of text read by Ahmad Abu Adass on the tape).

¹¹⁶²⁴ Exhibit P500 (Letter accompanying the video tape) (emphasis omitted).

from justice’. Rather, they would have thought that they were publicising the atrocity, as opposed to diverting attention away from the true perpetrators and thus helping to cover up the crime. Their criminal liability would have been different.

6464. However, on the facts found—namely that the Trial Chamber is not satisfied beyond reasonable doubt of either Mr Oneissi’s or Mr Sabra’s involvement in any aspect of making the false claim—the Trial Chamber does not have to explore whether this is an inference reasonably available from the evidence.

6465. Apart from the six core Red mobile users, the suicide bomber, those who purchased the Canter or loaded the explosives, those who prepared the false claim and those who directed them, unknown others *may* have helped to prepare the attack and, legally, participated in the conspiracy.

(c) A tighter conspiracy?

6466. However, another alternative inference, namely that only a much smaller subset had the necessary knowledge to be conspirators, is also available on the evidence. The conspiracy plausibly could have comprised only those who *definitely had to* know the assassination operation’s aim in order to fulfil their role in it.

6467. Thus, it is equally conceivable that the conspirators deliberately kept that aim secret from as many people involved as possible—by doing critical tasks themselves, such as assembling the explosive device—or restricting the information flow between their operatives, or both. The networks’ hierarchical and compartmentalised communication structure would have facilitated this.

6468. If membership of the conspiracy was on a ‘need-to-know’ basis, this eliminates several potential conspirators. First, someone tasked only with conducting surveillance before the day of the attack did not need to know that its objective was to murder Mr Hariri. Indeed this may not have been the sole purpose of much of the surveillance.

6469. The Trial Chamber could therefore not conclude that all of those involved in the surveillance were knowingly participating in the conspiracy alleged. Rather, because of

Mr Hariri's status and the prevailing political environment,¹¹⁶²⁵ they could reasonably have thought they were just engaged in routine monitoring of his movements. The evidence that Mr Hariri thought that he was under surveillance also supports this possible inference. His security detail certainly believed this,¹¹⁶²⁶ and must have factored this into the measures they adopted to protect him in the months before his death.¹¹⁶²⁷

6470. Mr Hariri also thought that his telephones were bugged, and the evidence shows that he sometimes used this fact to convey messages to those he believed were monitoring his communications.¹¹⁶²⁸ The Trial Chamber also heard evidence that Lebanese state agencies such as the ISF had Mr Hariri under active surveillance.¹¹⁶²⁹ From the evidence—given the extent of their penetration into Lebanese life and their apprehension about Mr Hariri at the time—a logical inference is available that the Syrian agencies operating in Lebanon were also actively monitoring Mr Hariri. It is similarly highly probable that other State and non-State actors with an interest in Mr Hariri and Lebanon were also interested in his movements, his communications and his contacts, although to what extent and in what manner, is a matter of speculation.

6471. Naturally, whoever was engaged in the surveillance would have had to have been trusted enough not to have revealed their roles in the enterprise which would have become evident after the attack. In other words, anyone who had been involved in the surveillance of Mr Hariri before 14 February 2005, using mobiles that they were instructed either to discard or to return to someone afterwards for collection, would have realised at least *after the explosion* that their surveillance activities were connected with the attack. Only trusted associates could have been assigned such a task. But this does not mean that all of them must also have been entrusted, before the attack, with the information that it would happen, nor how, nor when, nor that they agreed to commit it.

¹¹⁶²⁵ See chapter IV 'Historical and political background to the attack'.

¹¹⁶²⁶ See paras 4284-4288, *see also* chapter IV 'Historical and political background to the attack', (H) 'Security arrangements and concerns in late 2004'.

¹¹⁶²⁷ Described in chapter IV 'Historical and political background to the attack', (H) 'Security arrangements and concerns in late 2004'.

¹¹⁶²⁸ See paras 706-707, 4287. *See also* Mr Hariri's statement, in an audio-recorded meeting with the Syrian Deputy Minister of Foreign Affairs on 1 February 2005, that Syria 'announce that they are monitoring the El-Hariri residence and recording everything', extracted in para. 673.

¹¹⁶²⁹ See paras 4284-4288.

6472. Similarly, while those whose role was confined to preparing either the claim of responsibility or the explosive device—if there were any such people—*may* have been fully aware of the conspiracy’s aim, the evidence does not establish that they *had to be*.

6473. Rather, it is also reasonably conceivable that someone involved in the plot met Mr Abu Adass in the Arab University Mosque and lured him from his home, but did not know that these actions were connected with Mr Hariri’s intended assassination, nor that he was to be killed specifically by a large explosive device. Contrary to the Prosecutor’s pleading in the amended consolidated indictment and to the Prosecution’s submissions, merely knowingly participating in the false claim of responsibility does not lead to the inevitable conclusion that the participants knew that they were engaged *in agreeing to commit a terrorist act* to assassinate Mr Hariri *and with an explosive device*.

6474. The Trial Chamber received no evidence from which it could conclude when, where and how the explosives came to be on the Canter. The evidence can only establish that it must have been between Monday 17 January and Monday 14 February 2005. For operational security and safety reasons, it can probably safely be assumed that the explosives were loaded onto the light truck only after firm decisions had been made to use the Canter, and when.

6475. Moreover, whoever put the explosives on the Canter did not have to have known why, namely, that a suicide bomber was to drive it into Mr Hariri’s convoy, nor even that it was to be detonated in a public place. Placing explosives on a truck and their detonation at a later point are not necessarily connected activities, especially as it is unknown when the explosives were put on the Canter. However, it is far more likely that whoever did this *was* involved in the conspiracy. It was a core activity in the conspiracy and, of necessity, such an action should have been restricted to those in on the plot.

6476. This is for the obvious reason that once the explosion occurred anyone who had *unknowingly* assisted would have realised what they had done, thus potentially compromising the secrecy of the operation.

6477. However, this also goes two ways as a trusted operative could have been tasked with putting the explosives on the Canter without being informed of precisely why—but nonetheless still sufficiently trusted not to reveal this afterwards. The expert evidence the Trial Chamber

received suggests that even if the device used the smallest amount of RDX possible on the evidence, that is, 2,500 kilograms of TNT equivalent, the explosives would still have had a volume of around 1.3 cubic metres and weighed close to two tonnes.¹¹⁶³⁰ Thus, the mere fact of placing or loading this quantity of RDX onto the Canter would have been inherently suspicious.

6478. This too points to the involvement in the conspiracy of people with a commonality such as membership of an organisation, namely a tight-knit organisation in which trusted operatives are delegated particular sensitive tasks. The Trial Chamber therefore believes that the most logical inference available from the evidence is that whoever put the explosives on the Canter was either part of the conspiracy or was trusted enough not to reveal their role in it. But it cannot be satisfied which, if either, occurred. It simply has no direct evidence one way or another as to what occurred. Additionally, there is no circumstantial evidence from which it could draw an inference establishing how the RDX came to be on the Canter, or who put it there.

6479. Of those known to have been involved in the assassination operation, this leaves as possible conspirators, with the unidentified suicide bomber, the users of the six core Red mobiles who participated in executing the attack on 14 February 2005, and the users of Green mobiles one of whom—Green 300's user (Mr Ayyash)—was also a core Red mobile user.¹¹⁶³¹

6480. The evidence does not rule out the possibility that one person alone procured the RDX explosives, wired or prepared them for detonation and put them in the Canter. It is intrinsically unlikely that this was the suicide bomber himself. However, theoretically at least, one Red and or Green mobile user who had oversight of the whole assassination plot could have carried it out *with* the suicide bomber, coordinating the surveillance and other necessary activities before and on 14 February 2005, without anyone else knowing what that person and the bomber aimed to do.

6481. Whether the conspiracy was thus restricted to two, or was larger, its members might have decided together to assassinate Mr Hariri, in a large explosion in a public place, before the Red, Blue and Yellow mobiles' surveillance or any other preparation began.

¹¹⁶³⁰ As the Prosecution submitted. *See above*, at para. 1214; exhibit P277 (Report of Gerard Murray), annex 1; exhibit P378 (International College of Experts report on attack of 14 February 2005), p. 21. *See also* para. 1144.

¹¹⁶³¹ *See* paras 3189, 3255.

6482. However, the conspirators may also have reached that decision later; perhaps as late as mid-January 2005, which is the earliest time on the evidence when the Canter could have begun to have been fitted for the attack. Alternatively, if it were a larger conspiracy some members, such as some of the Red mobile users, may have joined that conspiracy well after it was formed, possibly even learning the full or real objective only on the morning of the attack. All of these scenarios are possible on the evidence and any of them would fulfil the definition of a conspiracy, namely an agreement to commit the pleaded crime.

6483. The Trial Chamber does not believe that the assassination of the former Lebanese prime minister occurred in a vacuum, nor that it was organised by the six core users of the Red network. The extensive political and background evidence points to it being a political act directed by those whose activities Mr Hariri's were threatening. There is no evidence that Mr Ayyash or the other five core Red users fell into this category. The evidence is of their involvement in the conspiracy at least on 14 February 2005 and the immediate period leading to it, but the evidence does not establish affirmatively who directed them to murder Mr Hariri and thus eliminate him as a political opponent.

- (d) Salim Jamil Ayyash and the other core Red mobiles users were conspirators

6484. The Trial Chamber has concluded that the conspiracy must have included at least Mr Ayyash as the user of Red 741, Blue 233 and Green 300, and it has found that he was using these and other mobiles at the relevant time.

6485. The Trial Chamber, after carefully reviewing the evidence, is of the view that Subject 6, using Red 678 and Blue 610 was a conspirator. Overall, it is also satisfied, by virtue of their activities on 14 February 2005 and their surveillance of Mr Hariri in the preceding weeks, that the six core Red mobile users had the role the Prosecution alleged of an 'assassination team'. Accordingly, they all knowingly agreed to murder Mr Hariri using an explosive device; they are thus conspirators.

6486. The Trial Chamber is also satisfied that even if the conspiracy was deliberately kept 'tight', the users of the six core Red mobiles were participants, as the Prosecution alleged. Some of those

mobiles made significantly more calls than others did on 14 February 2005.¹¹⁶³² The evidence of their activity that day has shown that all six played a crucial role in executing the attack.¹¹⁶³³

6487. It also suggests that each Red mobile user also knew beforehand that the aim behind their tracking of Mr Hariri that day was his murder using an explosive device in a public place. Besides the times and places that day at which they made and received calls, it is particularly relevant that every core Red mobile user then stopped using that mobile, forever, shortly *before* the attack. It is improbable that all of them would do this, if some of them did not know that the attack was going to happen.

6488. In the Trial Chamber's view, a mobile user in any of the covert networks who had a supervision role, meaning someone who not only reported on developments but also coordinated, directed and or supervised others, must have known more about the mission than the users under their direction. And the more extensive the contact that user had with other network mobile users and with the acts needed to prepare for and then execute the terrorist attack to kill Mr Hariri, the more likely they would know that the mission's overall aim was the attack.

6489. My Ayyash as Red 741's user fits this profile. That mobile's call activity in the hours before the attack on 14 February 2005, in itself, makes it inconceivable that its user did not know the aim of the conspiracy by then.

6490. Red 741's calls to three other core Red mobiles—Subject 6's Red 678, Subject 8's Red 893 and Subject 9's 652—between 11:33:33 and 11:35:05 that day triggered their users' relocation to the Parliament area and by doing so, launched the beginning of the operation. The Trial Chamber is satisfied that this is the only reasonable inference available from the evidence.

6491. This evidence also supports the inference that Red 741's user coordinated at least some of the acts that executed the attack. Red 741's contact within the Red network on the day of the attack was also uniquely extensive; only Red 741 had calls with every other core Red mobile.¹¹⁶³⁴

¹¹⁶³² See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005'.

¹¹⁶³³ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (E) 'Findings', in particular, paras 4669, 4718-4720.

¹¹⁶³⁴ See paras 4669, 4718-4720; *see generally* chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005'.

Moreover, on four different days before 14 February 2005, Red 741 had had calls with various other Red mobile users at the same time that they were conducting mobile surveillance.¹¹⁶³⁵

6492. The Trial Chamber, for these reasons and those set out at chapter X ‘Chronology of network mobile activity before Mr Hariri’s assassination on Monday 14 February 2005’, is therefore convinced beyond reasonable doubt of Mr Ayyash’s participation in the conspiracy alleged. It is the only reasonable inference available from the totality of the evidence.

6493. Regarding the date of the commencement of the conspiracy, it is not possible to find a definite date on which those responsible for organising the conspiracy agreed that Mr Hariri was to be assassinated. They may have initially formed the intention to murder him in late 2004, given the volatile political environment and events at that time, following President Lahoud’s mandate extension.¹¹⁶³⁶ Among other political developments that the Trial Chamber has described in chapter IV ‘Historical and political background to the attack’, by that time the first two Bristol group meetings had occurred—on 22 September and 13 December 2004—Mr Hariri was planning to run for office again and was known to wish to loosen Syrian dominance over Lebanon.

6494. Factually, the following demonstrates that the planning for a *possible* attack on Mr Hariri must have started from at least mid-January 2005: the Red network handsets and SIM cards were purchased in Tripoli in late December 2004/early January 2005, and were initialised on 4 January 2005. The Red network—the assassination team, of which Mr Ayyash was a member—began surveillance of Mr Hariri’s movements from Friday 14 January and continued doing so until his death. Mr Abu Adass disappeared on Sunday 16 January, and the video was made between then and the attack. The Canter was purchased on either 17 or 25 January, but most probably on 25 January.

6495. It is highly probable that those responsible for organising Mr Hariri’s assassination decided to murder him only if he continued on his foreshadowed political path away from Syria, and had commenced their preparations for this by at least January 2005. Assassinating the former, and probable, future prime minister was an act that those responsible must have known would have had significant regional and international consequences. They could only have decided to go

¹¹⁶³⁵ On Monday 31 January 2005, Thursday 3 February 2005, Tuesday 8 February 2005 and Saturday 12 February 2005. See paras 4705-4708, 4715-4717.

¹¹⁶³⁶ See chapter IV ‘Historical and political background to the attack’.

through with it after having made a careful cost-benefit analysis in which they judged that the advantages of eliminating Mr Hariri would significantly outweigh the disadvantages.

6496. Despite the implementation of these preparatory steps outlined above none, either individually or collectively, inevitably led to Mr Hariri's assassination. The video could have been made and never used, as Mr Abu Adass was clearly dispensable; the Canter could have been purchased and then used for some other purpose, or sold; and, the information gained from the surveillance could have been stored for future use. The intended possible attack could have been aborted at any time. It is most likely that those responsible were prepared either way, namely, to continue to the attack if necessary, or to call it off.

6497. This decision to kill Mr Hariri, and in an enormous explosion in a public place, would not have been taken lightly. Mr Hariri had numerous powerful regional and international allies and connections, including in the United States, France, Saudi Arabia and the United Nations. It is thus highly likely that the decision to give the go ahead only occurred in February 2005 after the third Bristol Group meeting on Wednesday 2 February 2005. Mr Hariri had sent his delegates to the meeting. It was at this third meeting that its participants had agreed to call for the immediate and total withdrawal of Syrian forces from Lebanon, a position that Mr Hariri, according to his confidantes, had by then adopted. They had also called for the dismantling of the Syrian security apparatus in Lebanon,¹¹⁶³⁷ with Mr Hariri's tacit support.

6498. Significantly, the meeting had occurred the day after the Syrian Deputy Foreign Minister, Mr El-Moallem, had visited Mr Hariri at his home, for the final time, on Tuesday 1 February 2005. The transcript of its audio recording reveals that Mr Hariri had told Mr El-Moallem that 'Lebanon will not be ruled by Syria forever', as it was 'unacceptable', that he could 'bear no more orders'

¹¹⁶³⁷ Exhibit P407 (*Al-Mustaqbal* article on Bristol meeting), p. 2, which stated that its two main goals were the following, 'First: To end Syrian hegemony in Lebanon, restore sovereignty and restructure national authority on the basis that the Lebanese people are the sole source of power. The opposition also acknowledges the importance of finding an honourable settlement with Syria based on the full withdrawal of the Syrian army from Lebanon pursuant to the Taif Agreement in order to put an end to the serious crisis between the government and the international legitimacy which followed resolution 1559. Second: To restore the Lebanese democratic system by dismantling the security apparatus and putting an end to the interference of Syrian intelligence and their Lebanese accessories in public political life'.

from Syria, that ‘three quarters of me is already on the opposition side’ and that there was ‘interference in every small detail in the country’.¹¹⁶³⁸

6499. Despite Mr El-Moallem’s approach to Mr Hariri, the Bristol Group’s public statement, reported on Thursday 3 February 2005, went much further in relation to Syria’s involvement in Lebanon than in its previous statements. A significant cross-section of the Lebanese political class was by then publicly advocating the full implementation of the Taif Agreement, and Syria’s political, security and military redeployment from Lebanon.

6500. The Trial Chamber is therefore satisfied, based on the confluence of these events, that the *final* decision to commit the terrorist act was made only in the two weeks preceding Mr Hariri’s death. This is the only inference reasonably available from the evidence.

6501. Because of his role in the conspiracy, Mr Ayyash as the user of Red 741, Blue 233 and Green 300 must have known its aim, whether conditional or final, for some time before the attack. This was most likely by mid to late January 2005 at the latest, on the basis that the Canter was most probably purchased on 25 January, and preparations for its use in the attack could have begun. From the available evidence, the Trial Chamber cannot determine whether Mr Ayyash as the user of Red 741, Blue 233 and Green 300 did anything in relation to either the claim of responsibility, or the preparation of the Canter and the explosive device. In any event, it need not do this in order to determine his criminal responsibility.

6502. For the purposes of Mr Ayyash’s criminal responsibility it is legally sufficient for the Trial Chamber to find that the evidence establishes beyond reasonable doubt that he had agreed to commit the crimes charged by the day of the attack, namely Monday 14 February 2005. The Trial Chamber therefore finds that Mr Ayyash was a member of the conspiracy in having agreed to commit the terrorist act charged from at least sometime in early February and at the very latest by Monday 14 February 2005. It is satisfied that this is the only inference reasonably available from the totality of the evidence.

¹¹⁶³⁸ Exhibit P409.

(e) Whether Hasan Habib Merhi had a role in the conspiracy

6503. The Trial Chamber's analysis below is partly based on the assumption that Mr Merhi was the user of Green 071. The Trial Chamber, as set out in analysing the claim of responsibility, is not satisfied beyond reasonable doubt that Mr Oneissi or Mr Sabra participated in this component of the assassination plot.¹¹⁶³⁹ It follows logically from this that Mr Merhi, likewise, cannot be found guilty of coordinating their alleged participation in these activities that the Prosecutor pleaded were essential to the plot to assassinate Mr Hariri. The Prosecution effectively conceded this in final trial submissions in court.

6504. Mr Merhi's sole pleaded role in the conspiracy is as the coordinator of the false claim of responsibility. In relation to the actual disappearance of Mr Abu Adass, the only reliable evidence supporting it is of mobile calls between the three Accused over two separate periods.

6505. The evidence against him is in two strands. Both aspects derive solely from the call data records of two mobiles that he was using in 2004 and 2005, namely, his personal mobile Purple 231 and the Green network mobile, 071. This Green mobile, Green 071, was used solely for contacting Mr Badreddine at times the Prosecution alleges were crucial to the conspiracy in relation to the claim of responsibility. Mr Merhi's personal mobile contacted Mr Oneissi's Purple 095 and Mr Sabra's shared mobile 018, also at times (generally) related to events related to Mr Abu Adass and the dissemination of the claim of responsibility.

6506. The first period is between Wednesday 22 December 2004 and Friday 7 January 2005. Contact occurred in this period—on Wednesday 22, Tuesday 28 and Friday 31 December 2004 and Friday 7 January 2005—between Mr Oneissi on Purple 095 and Mr Merhi on Purple 231. This included times when Mr Oneissi's mobile was connecting to cells providing predicted best server coverage to areas 'near', meaning within one kilometre of, the Arab University Mosque in Beirut on 22 and 28 December 2004 and 7 January 2005.

6507. Mr Sabra's attributed mobile was also connecting to cells covering the mosque or the area adjacent on eight days namely, on Thursday 30, Friday 31 December 2004 and Saturday 1, Tuesday 4, Thursday 6 and Friday 7 January 2005. On two of these, 1 and 4 January, his Purple

¹¹⁶³⁹ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (J) 'Conclusion'.

018 was in contact with Mr Merhi's Purple 231. Mr Merhi, on Green 071, contacted Mr Badreddine on Green 023, on Thursday 23 and Monday 27 December 2004, and Sunday 2 January 2005.

6508. The second set of contacts occurred in the days preceding Mr Abu Adass's officially reported disappearance of Sunday 16 January 2005.

6509. There were calls between Mr Badreddine and Green 071 between Wednesday 12 and Sunday 16 January 2005 on their Green mobiles, and most particularly five times on the morning of Sunday 16 January 2005. On Friday 14 and Saturday 15 January 2005, Mr Merhi on Purple 231 called Mr Sabra's shared mobile three times. On Monday 17 January 2005, Mr Oneissi on Purple 095 called Mr Merhi on Purple 231.

6510. Further, and crucial to the pleaded allegation that Mr Merhi was coordinating the false claim of responsibility, which included identifying Mr Abu Adass and his subsequent abduction to make the video, the Prosecution is using what it termed as a series of 'hierarchical' calls between Mr Badreddine and Mr Merhi to prove this. The Prosecution alleges that there were three hierarchical calls between the relevant Green and Purple mobiles on Wednesday 12, Friday 14 and Saturday 15 January 2005. Allegedly, these show instructions being passed down from Mr Badreddine to Mr Merhi, and then from Mr Merhi to Mr Oneissi, Mr Sabra or to one of the Purple Associate mobiles.

6511. Specifically, and additional to the finding in relation to Mr Merhi regarding his alleged involvement that logically must follow an acquittal of Mr Oneissi and Mr Sabra, the Trial Chamber has also carefully analysed all the calls between Mr Merhi and Mr Badreddine, and Mr Merhi and Mr Oneissi and Mr Sabra's attributed mobile.

6512. This was to determine whether these did involve the hierarchical calls flows alleged by the Prosecution and if so, whether they could be found beyond reasonable doubt to prove their involvement in the conspiracy related to the attack on Mr Hariri. Here, the Trial Chamber has also factored in, as is analysed in greater detail in examining the claim of responsibility, at paragraphs 5802-5818, that Mr Merhi, Mr Oneissi and Mr Sabra were using their personal mobiles to communicate with each other at times alleged to be crucial to the indictment period.

6513. However, it is stressed that even if it can be accepted that they were ‘hierarchical’ in the sense of reporting upwards, namely, Green 071 to Green 023, and receiving instructions downwards, Green 023 to Green 071, they must be viewed in the context of the other available evidence, namely, what was happening and what the calls could be connected to. Without context anchoring them to some evidence, it is no more than meaningless metadata.

6514. The three supposedly hierarchical call flows are the following:

- On **Wednesday 12 January 2005**, at 20:20, Mr Badreddine’s Green 023 called Mr Merhi’s attributed Green 071 for 101 seconds. Two minutes later, Mr Merhi’s Purple 231 called Associate Purple 744. Associate Purple 744, according to Mr Donaldson is linked to Mr Merhi’s brother, and Mr Platt stated that it had contact with other Purple mobiles;
- Two days later, on **Friday 14 January 2005**, at 19:55, Green 071 made a three-minute call to Mr Badreddine’s Green 023. Four minutes later, Mr Merhi’s Purple 231 called Associate Purple 744. A minute later, at 20:00, Mr Merhi’s Purple 231 called Mr Sabra’s attributed Purple 018. At 20:01 and 20:04, Purple 018 called Mr Oneissi’s Purple 095; and
- The following day, **Saturday 15 January 2005**, at 18:51, Green 071 called Mr Badreddine’s Green 023 for 31 seconds. At 18:52, Mr Merhi’s Purple 231 called Purple 018.

6515. None of these calls connected to cells relevant to Mr Abu Adass’s address. The first call, on **Wednesday 12 January 2005**, in the Trial Chamber’s view is not an example of a ‘hierarchal’ call flow. A call from Mr Badreddine to Green 071 followed by Mr Merhi calling a mobile associated with his own brother does not fit within the Prosecution’s case theory that Mr Badreddine was coordinating Mr Merhi’s activities, who in turn was coordinating those of Mr Oneissi and Mr Sabra. Mr Merhi is not accused of co-ordinating his brother in any kind of criminal activity.

6516. The Trial Chamber has carefully considered how the remaining two so-called hierarchical call flows can be linked to any evidence in the conspiracy. The Trial Chamber is satisfied that Mr

Abu Adass disappeared on the morning of Sunday 16 January 2005, as was reported by his father to the police on Wednesday 19 January 2005. However, it cannot be satisfied based on untested, and hence unreliable, hearsay evidence of what occurred in the preceding days, namely, the circumstances of Mr Abu Adass leaving his home for the final time.

6517. There is no reliable evidence of anything relevant to the case regarding the making of the claim of responsibility, including its preparatory activities involving Mr Abu Adass, occurring on either Wednesday 12 or Friday 14 January 2005.

6518. Friday 14 January may have been the day when a witness, Witness 87, testified that he saw Mr Abu Adass teaching a young man to pray in the Arab University Mosque, but the Trial Chamber has been unable to positively link this with either Mr Oneissi or Mr Sabra. Regarding Saturday 15 January 2005, the Trial Chamber has been unable to find that someone called ‘Mohammed’ called Mr Abu Adass on that night, around 21:00 arranging to meet him the next day. It has therefore been unable to link this call to Mr Oneissi, who is pleaded to have been the ‘Mohammed’.

6519. Without these connections, however, these three calls between Green 071, attributed to Mr Merhi, and Mr Badreddine on Green 023, made on **Wednesday 12, Friday 14 and Saturday 15 January 2005**, are devoid of context. To link these calls and the Accused to Mr Abu Adass’s disappearance, some evidence would be needed connecting them with him. Using the Purple mobile activity on the afternoon of Monday 14 February 2005 does not fill in the missing gap. This is because these two strands of the case—namely, the recruitment of Mr Abu Adass and the calls disseminating the false claim of responsibility—depend upon each other. This is not just for reinforcement but, most essentially, to allow the Trial Chamber to draw the inferences necessary from their combination to find the Accused guilty beyond reasonable doubt. Here, combining the two strands of evidence, and considering them in their totality does not permit the Trial Chamber to conclude that the only inference available from the combination is guilt.

6520. The Trial Chamber therefore cannot determine from the context why the calls were made. It cannot find that they were hierarchical call flows between Mr Merhi and Mr Badreddine in which either Mr Merhi reported information to Mr Badreddine or Mr Badreddine issued coordination instructions, which in turn were passed on. The Trial Chamber has insufficient evidence to connect these calls to Mr Abu Adass’s disappearance.

6521. The Prosecution also submitted that on Sunday 16 January 2005, Mr Merhi's Purple 231, Mr Sabra's Purple 018, Mr Oneissi's Purple 095, Associate Purple 375 and Associate Purple 744 entered an 'exceptional' period of inactivity,¹¹⁶⁴⁰ connected with Mr Abu Adass's abduction.

6522. While it may be technically correct to describe the inactivity as 'exceptional' in the sense that no calls were made that day, the Trial Chamber cannot link it to any reliable positive evidence about the claim of responsibility. This is especially so in light of the Prosecution's case that Mr Oneissi and Mr Sabra used their personal mobiles during the period in which they were engaging in initially contacting Mr Abu Adass in the mosque and then again in organising the claim of responsibility on Monday 14 February 20105. Thus, any reason for the mobiles' non-use on Sunday 16 January is speculative, particularly as this fact is being used to support the argument that they were involved in his 'abduction' that day.

6523. The Prosecution is using their non-activity of their mobiles on Sunday 16 January to prove that the Accused were 'abducting' Mr Abu Adass, but in tandem with unreliable evidence that Mr Abu Adass left his house to meet Mr Oneissi, whom he thought was 'Mohammed'. The Trial Chamber, however, has been unable to find that Mr Abu Adass disappeared in the company of someone called 'Mohammed' on Sunday 16 January 2005—this hypothesis being only one of other reasonable possibilities available from the evidence.

6524. Additionally, the Trial Chamber cannot find beyond reasonable doubt that Mr Oneissi was 'Mohammed', as the Prosecutor initially alleged in the amended consolidated indictment.¹¹⁶⁴¹ The Trial Chamber has also been unable to conclude that Mr Abu Adass was 'abducted' on 16 January, as opposed to going somewhere freely and voluntarily, irrespective of what happened to him afterwards.

6525. The Trial Chamber is satisfied that there was indeed a person in the mosque, in about early January 2005, calling himself 'Mohammed' and seeking assistance in learning how to pray, but there is no evidence connecting this person to either Mr Oneissi, as is pleaded, or Mr Sabra. Further, as is dealt with at paragraphs 5851 and 5861, the evidence is insufficient to persuade the

¹¹⁶⁴⁰ Prosecution final trial brief, paras 550-552, 776-780.

¹¹⁶⁴¹ The Prosecution, in response to a written question from the Trial Chamber (Questions for closing submissions, para. 3.) did not positively assert that Mr Oneissi was Mohammed, but rather that the evidence provided 'some indication that Mr Oneissi was Mohammed', Prosecution closing submissions, T. 14 September 2018, p. 67.

Trial Chamber that Mr Abu Adass met *this particular* ‘Mohammed’ and assisted him in praying at this time.

6526. The Trial Chamber has also been unable to conclusively find that on Monday 17 January 2005 the family of Mr Abu Adass received an early morning call from ‘Mohammed’ claiming that he and Mr Abu Adass were in Tripoli, where their vehicle had broken down. Nor that they received a second call, in the evening, informing them that he had decided to go on jihad to Iraq, and would not be coming home. The only evidence for this is untested and contested Rule 158 hearsay evidence from Witness 56 that the Trial Chamber cannot safely rely upon in relation to its most important points.

6527. In connection with this, the Prosecution submitted that Mr Oneissi’s Purple 095 became active about half an hour before the first call was made to the Abu Adass residence in the morning on Monday 17 January 2005. It then travelled back to the Arab University Mosque area in the evening, which coincided with the calls the abductors made.¹¹⁶⁴²

6528. However, the evidence reveals only that Mr Oneissi’s Purple 095—activating the SFEIR3 cell in southern Beirut—received service text messages at 07:01, and—connecting to the COLA2 cell, which provided predicted best server coverage to the Arab University Mosque—texted Mr Merhi’s Purple 231 at 21:02. It was connecting to that cell until 21:02, also receiving text messages. Purple 231 then called Purple 095 at 21:04 and, again at 21:05, by which time Purple 095 was connecting to another cell, GHOBAl 3, a few kilometres away.

6529. Even if the Trial Chamber could accept that the ‘abductors’ made the two calls alleged, as the Prosecution argues in its final trial brief, nothing connects these calls with any of the Accused. A person’s mere presence in the form of a mobile call connecting to a cell covering the mosque—and for several minutes—does not prove that they were there making the relevant calls from an unidentified payphone. And why they would have needed to return to the area of the mosque to make a night-time call—for which, it is stressed, there are no records of calls from any unknown numbers, such as from payphones—after Mr Abu Adass had already left, is inexplicable.

¹¹⁶⁴² Prosecution final trial brief paras 555-557, 760; *see also* Amended consolidated indictment, para. 29.

6530. In closing arguments, Prosecution counsel posited, in response to Trial Chamber questioning on this point, that the conspirators must have returned to the mosque area to use a payphone to make the call. This was because in their eyes Mr Abu Adass needed to be seen as a Sunni extremist who had been recruited and groomed in his local mosque, so it made perfect sense to go back to the area and to make a payphone call from nearby.¹¹⁶⁴³

6531. This explanation may well be correct; a call may have been made from a payphone somewhere near the Abu Adass home, and for these reasons. However, against this is that there is no evidence of from where the call was made; there are no call data records of calls from a payphone to the family home on that day. And Lebanese landline-to-landline call data records were not generally available before 2006.

6532. The Trial Chamber accordingly cannot link Mr Oneissi's mobile briefly connecting to the COLA2 cell on the evening of Monday 17 January either with Mr Abu Adass's reported disappearance at least 36 hours earlier, or to a subsequent call to his home—the evidence for which in any event comes from untested and contested Rule 158 statements.

6533. Analysing the totality of the calls between the two Green mobiles leads to the same conclusion concerning the absence of context with any other evidence.

6534. There were eighteen calls between Green 071 and Green 023 between 13 October 2004 and Monday 7 February 2005. The longest was on Thursday 13 January 2005 and lasted nineteen and a half minutes. Five of the eighteen calls occurred on Sunday 16 January 2005 and the last call occurred on Monday 7 February 2005 early in the morning, at 00:34, when Green 300 called Green 023 for a 23-second call. Both mobiles were then in Dahyieh in southern Beirut.

6535. On Sunday 16 January 2005, Green 071 called Mr Badreddine's Green 023 five times between 06:19 and 09:00. Indeed this coincides with the time of the officially reported departure of Mr Abu Adass for the last time from his home.

6536. However, neither Mr Oneissi's mobile nor Mr Sabra's attributed mobile were active that day. If they participated in Mr Abu Adass leaving his home that day, how this was communicated

¹¹⁶⁴³ Prosecution closing submissions, T. 14 September 2018, pp 25-26, in response to a question from Judge Braidy as to why the alleged abductors had to return to the area of the Abu Adass home on 17 January 2005.

to Mr Merhi, and presumably then in turn to Mr Badreddine as the pleaded coordinator of the conspiracy, is unexplained. If it occurred as alleged, it may have been in person, but there is no evidence of this.

6537. There is nothing connecting any of the three Accused to Mr Abu Adass leaving his home that day. It therefore follows that there is nothing connecting Green 071's calls to Mr Badreddine's Green 023 that morning with the disappearance, notwithstanding their temporal coincidence with his leaving home for the last time.

6538. The evidence has not connected either Mr Oneissi or Mr Sabra to any activities concerning Mr Abu Adass's disappearance on Sunday 16 January 2005. Mere proximity to the mosque on thirteen days in those two months, namely between Wednesday 1 December 2004 and Monday 17 January 2005—and then only by virtue of their mobiles connecting to cells providing coverage to the mosque and adjacent areas, and assuming here that Mr Sabra was actually using Purple 018 on those days—without more, cannot establish their involvement in the disappearance.

6539. When the pleading regarding 'Mohammed' is taken from the equation—as a consequence of the finding that the evidence does not prove that Mr Oneissi was 'Mohammed'—all that remains are the calls between Mr Merhi and Mr Oneissi and Mr Sabra's shared mobile in the weeks before Mr Abu Adass's disappearance. Of itself, no matter how holistically the evidence is viewed, this cannot provide sufficient proof of their involvement in the alleged abduction of Mr Abu Adass, and certainly not for the pleaded purpose, namely of finding someone suitable to make a false claim of responsibility.

6540. To complete the picture, there were also calls between Green 071 and Mr Badreddine's Green 023 on 6 November, 23 and 27 November 2004 and on Sunday 2 January and Thursday 20 January 2005.

6541. Prosecution counsel, in the opening statement in the case against Mr Merhi, argued that the increase in communication between Mr Sabra and Mr Oneissi and the corresponding increase in contact between Mr Merhi and Mr Sabra and Mr Oneissi is evidence that Mr Merhi 'had taken steps to assemble his team to advance the false claim of responsibility'.¹¹⁶⁴⁴

¹¹⁶⁴⁴ Prosecutor's opening statement regarding Hassan Habib Merhi, T. 18 June 2014, pp 45-47.

6542. On **Sunday 2 January 2005**, at 19:18, Green 071 contacted Mr Badreddine's Green 023 for a 38-second voice call.¹¹⁶⁴⁵ Earlier that day, at 15:13, Mr Ayyash's Green 300 had also called Mr Badreddine's Green 023.¹¹⁶⁴⁶ As there was no Purple mobile activity near the area of the mosque, and Green 071 had been inactive for the previous five days, Mr Platt concluded that this call was pre-arranged and could not be an update call. Rather, it was consistent with the users of these Green mobiles arranging a meeting.¹¹⁶⁴⁷

6543. However, there is no evidence connecting these calls with anything related to Mr Abu Adass, the mosque, anyone called 'Mohammed', Mr Abu Adass's disappearance, the video—its making, or its broadcast. Essentially, the calls are devoid of context when viewed singly and as a whole. There is insufficient evidence linking this metadata with anything solid from which the Trial Chamber can conclude that they were calls made by a command network coordinating the claim of responsibility for the attack, which included abducting Mr Abu Adass for this purpose.

6544. The same holds in relation to Mr Merhi's pleaded role in the dissemination of the false claim of responsibility. The only evidence against him—once the evidence of the calls in the previous period is taken from the frame—is of seven calls between Mr Merhi's personal mobile Purple 231 and Mr Sabra's shared personal mobile Purple 018 on Monday 14 February 2005 between 14:03 and 17:24.

6545. Additionally, between 15:54 and 16:02 Mr Sabra's shared Purple 018 was in contact five times with Mr Oneissi on Purple 095, namely at 15:54, 15:58, 16:00, 16:01 and 16:02. In the last two calls these mobiles were activating cell BNPI3, a cell closely adjacent to that providing the predicted best server coverage to the tree near Al Jazeera where the video was placed.

6546. Al-Jazeera's Beirut chief, Mr Ben-Jeddo, who spoke to the caller in each call, testified that he spoke to three different people. The Trial Chamber, as is set out in detail above in analysing the

¹¹⁶⁴⁵ Gary Platt, T. 8 February 2017, pp 22-24; exhibit P1205 (Call sequence table of Green 071), p. 8; exhibit P1211 (Call sequence table of Green 023), p. 3; exhibit P1782 (Narrative overview of telephone activity and relevant events), para. 455; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 470, 474. *See also* exhibit P1807 (Chronology PowerPoint presentation – 1 January 2005 to 17 January 2005), slides 71, 73.

¹¹⁶⁴⁶ Gary Platt, T. 8 February 2017, pp 22-24; exhibit P1207 (Call sequence table of Green 300), p. 3; exhibit P1211, p. 3.

¹¹⁶⁴⁷ Gary Platt, T. 8 February 2017, pp 22-25.

evidence related to the claim of responsibility,¹¹⁶⁴⁸ cannot conclude beyond reasonable doubt that either Mr Oneissi or Mr Sabra put the video in the tree or made the calls to Al-Jazeera or Reuters. Nor can it come to the same conclusion as to whether they were aware of the conspiracy—namely to commit an act of terrorism with an explosive device with the aim of murdering Mr Hariri—*before* the explosion occurred.

6547. Further, the Trial Chamber has concluded, at paragraphs 5560 to 5563, that the general reliability of the cell site evidence for the afternoon of Monday 14 February 2005 had been undermined as a result of the network congestion that occurred after the attack on Mr Hariri. This has diminished the overall strength of the Prosecution’s evidence in relation to inferences that could be drawn from the Purple mobile activity that afternoon.

6548. Again, Mr Merhi’s sole role in the conspiracy is connected with the false claim of responsibility and coordinating Mr Oneissi and Mr Sabra. As the Trial Chamber is not satisfied beyond reasonable doubt that that pair did any of the pleaded activities—namely, those connected with Mr Abu Adass’s alleged grooming, luring, disappearance, alleged ‘abduction’ and subsequent appearance on the broadcast video—it likewise follows that Mr Merhi cannot be found guilty of coordinating those activities.

6549. Essential to this finding is the absence of context to the calls between Mr Merhi and Mr Oneissi and Mr Sabra’s shared mobile on those days in December 2004 and January 2005 when their mobiles were in contact. In light of these findings in relation to Mr Oneissi and Mr Sabra, the Trial Chamber cannot be satisfied beyond reasonable doubt that Mr Merhi had the role alleged in relation to Mr Abu Adass’s disappearance.

6550. The Trial Chamber therefore cannot find that Mr Merhi—or Mr Oneissi or Mr Sabra—were conspirators under Article 270, nor, as the underlying evidence is the same, as accessories under either Article 219 (4) or Article 219 (5), of the Lebanese Criminal Code. The accessory liability is further set out in paragraphs 6892 to 6896 below.

¹¹⁶⁴⁸ See paras 4897-4904, 5853-5862. See further, chapter XIV ‘Legal findings on elements of the crimes and Individual criminal responsibility’, (D) ‘Hussein Hassan Oneissi and Assad Hassan Sabra’, (3) ‘Findings on individual criminal responsibility’, below.

6551. It follows that without such evidence, the Trial Chamber cannot find beyond reasonable doubt that Green 071's and Mr Badreddine's calls related to Mr Abu Adass or the claim of responsibility for the attack. Even if the Trial Chamber has incorrectly not found that Mr Merhi was using Green 071, the result would be the same.

(f) Whether Mustafa Amine Badreddine had a role in the conspiracy

6552. The Trial Chamber cannot make any findings as to Mr Badreddine's role, if any, in coordinating the claim of responsibility for the attack. It has received insufficient evidence to find that Mr Badreddine was coordinating the claim of responsibility. How this impacts on the remainder of the pleaded allegations that Mr Badreddine was the conspirator responsible for coordinating the entire assassination plot is analysed below.

6553. The Prosecution, as noted above, argues that the level of sophistication, detailed planning and commitment involved in the attack means that it could only have resulted from a conspiracy to commit a terrorist act by means of an explosive device, led by a sophisticated military actor. That actor was Mr Badreddine, by virtue of his senior role in Hezbollah.

6554. The evidence against Mr Badreddine consists essentially of three threads of proof. The first is his use of Green 023 in the three-member Green network and his role, which is described by the Prosecution as its commander/coordinator. This evidence comes from a combination of call data records and Prosecution expert opinion evidence.¹¹⁶⁴⁹ This is analysed below in detail.

6555. The second is of the so-called hierarchical call flows involving calls to and from Green 023 and Mr Ayyash's Green 300, which, the Prosecution states accord with reporting and instructing, and as analysed above in relation to the claim of responsibility, a similar calling pattern with Mr Merhi. This too is a combination of call data records and expert opinion evidence. The third thread is knowledge of who Mr Badreddine was, as a senior Hezbollah official.

6556. Judge Braidy disagrees with the Trial Chamber in its proceeding to analyse and make legal findings on whether Mr Badreddine had a role in the conspiracy. This is because he is no longer an Accused in this case. She has appended to the judgment a dissenting opinion on this issue.

¹¹⁶⁴⁹ Essentially, that of Mr Philips and Mr Platt. Mr Donaldson's evidence was analytical overview opinion evidence.

i. Mustafa Badreddine and Hezbollah

6557. The evidence in this third category comes from information released by Hezbollah after Mr Badreddine's reported death in May 2016. Under the heading, 'Relationship with Hezbollah & Badreddine with Hezbollah', the Prosecution in its final trial brief argues that Mr Badreddine was 'an experienced operative with the necessary skills, knowledge and ability to train others in the sophisticated preparation and execution of the Attack'.¹¹⁶⁵⁰ The Prosecution argued that he 'was a senior military commander of vast experience and importance in Hezbollah and the history of the Resistance movement'.¹¹⁶⁵¹

6558. The evidence supporting this is that of Hezbollah's Secretary-General, Mr Hassan Nasrallah, describing Mr Badreddine as a military leader in confronting Israel in the war in July 2006. And that 'among his achievements was dismantling the networks of collaborators with the "Israeli" enemy in 2008 and the years that followed'. Further, he 'was in charge of leading and commanding the Hezbollah military and security units inside Syrian territories' after Hezbollah entered the conflict in Syria. This would have been from 2011.

6559. An *Al-Manar* television commemoration stated that Mr Badreddine had assumed the 'leadership of the Military Central Command in Hezbollah' in 1995, was a military leader in July 2006 and by 2016 commanded Hezbollah military and security units in Syria.¹¹⁶⁵²

6560. Contradictory information however was given on *Alahed's* website, stating that his leadership role began in 1992 (not 1995) when he 'became in charge of the Central Military Unit Command, and built formations and set out military plans'. Further, Mr Badreddine 'planned many of heroic and martyrdom operations and especial operations such the assault on hostile positions, planting explosive and clashes, which forced the Zionist occupier to withdraw in 2000'. His part in the conflict in July 1993 was said to have been significant in that he 'played a prominent role in facing the aggression in July 1993 and forced the enemy's Prime Minister Rabin, at the time to

¹¹⁶⁵⁰ Prosecution final trial brief, para. 321.

¹¹⁶⁵¹ Prosecution final trial brief, para. 317. In admitting the evidence, the Trial Chamber held that the evidence went to 'Mr Badreddine's position as a senior Hezbollah military commander and his military operational history, which the Prosecution claims can support the inference that he had the ability to orchestrate an operation like the 14 February 2005 attack'; Decision admitting documents on the death of Mr Badreddine, para. 27. In finding it admissible, the Trial Chamber did not determine how it could be used.

¹¹⁶⁵² See para. 744.

admit defeat by Hezbollah’. And in 1996, ‘during the aggression of the Grapes of Wrath, he established the foundations for a new stage which made the world recognise the legitimacy of resistance and its right to defend its territory’.

6561. The Trial Chamber, though, received no other evidence of Mr Badreddine’s activities nor of his leadership experience or capacities *in 2004 and 2005*—namely, the period relevant to the amended consolidated indictment—other than general assertions of his overall utility to the resistance.

6562. That Hezbollah sent fighters into Syria to assist President Al-Assad in the conflict there from 2011 onwards is well-known and undisputed. The Trial Chamber has no reason to disbelieve that Mr Badreddine was one of these fighters, nor that he was a senior Hezbollah official who had some command role in Syria between 2011 and 2016. However, the evidence of his role as a commander in 2004 to 2005 is not strong.

6563. The two news outlets referred to directly above, *Al-Manar* and *Alahed*, gave different dates for his alleged promotion to Hezbollah’s Central Military Unit Command, either 1992 or 1995, and there is no evidence of what his role was in this body, or indeed if that information is correct.

6564. Moreover, the Trial Chamber is cognisant that an element of propaganda may have been present in how Mr Badreddine’s achievements were extolled in relation to what occurred in 1993 and 1996. His contribution to both campaigns have been presented in a manner that make them appear singular.

6565. With this in mind, the Trial Chamber thus has to carefully assess whether Mr Badreddine’s alleged command role has for some reason been embellished. If Mr Badreddine were the acclaimed military commander presented by Hezbollah, his reported death in May 2016 near Damascus may have represented a setback for Hezbollah’s operations. To motivate its supporters, Mr Badreddine’s achievements may have been presented in a glowing light, even to the point of overstating them.

6566. Essentially, though, the evidence about Mr Badreddine’s precise role in Hezbollah at the time relevant to this case and whether it involved military command, is unclear. Thus, the Trial Chamber has no *reliable* evidence that Mr Badreddine had a command role in 2004 or 2005. He

may have but what it was and how much experience he had, relevant to the pleaded allegations in the amended consolidated indictment, is not in evidence.

6567. It is also useful to approach this issue by analogy with international criminal law cases that have alleged the criminality of military commanders. These typically fall into three categories. The first is via command responsibility where the commander is accused of having individual criminal responsibility for the actions of subordinates in failing to either prevent or punish their criminal acts.¹¹⁶⁵³ The second is of participation as a commander by ordering or directly participating in the crimes alleged.¹¹⁶⁵⁴ The third is of aiding and abetting the crimes of others, such as by not preventing crimes occurring—which rises to this level—or facilitating their commission, for example by supplying materiel and personnel to units known to be breaching international humanitarian law.¹¹⁶⁵⁵

6568. To prove these crimes, the commander's precise role, either *de jure* or *de facto*, has to be pleaded and established. This is normally through proving the indicia of command, such as through lines of subordination and orders that are issued and obeyed. Strict proof of these matters is required.

6569. While this is not such a case, and Mr Badreddine was not alleged to have incurred criminal responsibility by virtue of his role as a military commander, the Prosecution's final trial submissions are tantamount to alleging Mr Badreddine's culpability as being at least in part based upon who he was alleged to be. That he was a long-standing senior Hezbollah military commander is asserted in the sub-heading to the final trial brief of '**A. The Commander of the Network coordinating the Preparation for and Attack on Hariri, Mustapha BADREDDINE was a Hezbollah Military Commander**'.¹¹⁶⁵⁶

6570. Further, it explains 'how the person leading the operation at the apex of the Green Network, BADREDDINE, had the capabilities to carry out such a carefully orchestrated attack'.¹¹⁶⁵⁷

¹¹⁶⁵³ For example, *Hadžihasanović and Kubura* Appeal Judgment; *Halilović* Appeal Judgment.

¹¹⁶⁵⁴ For example, *Prlić and others* Appeal Judgment; *Popović and others* Appeal Judgment.

¹¹⁶⁵⁵ For example, *Perišić* Appeal Judgment; *Taylor* Appeal Judgment.

¹¹⁶⁵⁶ Prosecution final trial brief, sub-heading under, **IV. RELATIONSHIP OF ACCUSED & BADREDDINE WITH HEZBOLLAH**.

¹¹⁶⁵⁷ Prosecution final trial brief, para. 341.

Nevertheless, reliable evidence of this is lacking at the relevant time, namely, in late 2004 and 2005 when he was allegedly coordinating the activities of the conspirators to Mr Hariri's death.

6571. Thus, if the allegations of who Mr Badreddine was in the sense that he was a senior Hezbollah military commander, are taken out of the equation, the Trial Chamber is left only with the alleged Green command network, and a number of calls between Mr Badreddine and Mr Ayyash—but without evidence of their content. This of course raises the fundamental question of the strength of the case against Mr Badreddine's alleged participation as a co-conspirator absent any probative evidence of who he was alleged to be in 2004 and 2005. Without it, only a series of calls between Green mobiles remains.

6572. A domestic criminal law analogy could assist in analysing this. Such a parallel could be of a bank robbery where a lone fully masked and heavily disguised armed robber enters and robs a bank.

6573. Cell site evidence reveals calls between two people, one of whom is a known and convicted bank robber, including on the day of the robbery, from that known robber to someone whose mobile is connecting to a cell covering the bank just before the robbery. The two are using mobiles that only communicate with each other in the week before the robbery and are never used again after the robbery. The case rests solely on three factors: namely, the metadata in the form of call data records establishing calls between a mobile near the bank when the robbery occurred and the known bank robber, but without call content; that the second person is a known robber; and a weak description of the masked robber from those in the bank. To this could be added a series of robberies displaying exactly the same calling patterns.

6574. Obviously, neither person could be convicted on these facts if they were charged with committing just one robbery, without evidence of the patterns emerging from the other robberies and calls. If they were charged with committing multiple robberies, it would be based on the patterns of communication coinciding with the robberies. If the court did not permit the evidence that one was a convicted armed robber—as it would normally not, absent a compelling exception such as its use as similar fact or propensity evidence—the evidence against the suspects would be reduced to the pattern of the content-less mobile calls, and a weak description of the armed robber.

6575. The obvious question would be of how that person could be convicted, without more, of participating in a conspiracy to rob the bank. On that evidence, which is of course circumstantial, a trier of fact would surely have to have a reasonable doubt as to whether either was an actual criminal participant in the robberies, no matter how suspicious the mobile telephone activity was.

6576. To return to Mr Badreddine's situation: if he had indeed been a senior Hezbollah military commander at the relevant time, he would undoubtedly have had access to resources that an 'ordinary' criminal would not have had, that could have facilitated the planning, directing and executing of such a large-scale attack. If this is correct, it may have included an extensive experience of military leadership and, at least potentially, access to a large quantity of military-grade explosives, such as those used in the attack. However, again, reliable evidence of this is lacking for 2004 to 2005. For this reason, the Trial Chamber cannot find that Mr Badreddine had to have been a conspirator at that time based in part upon his known activities as a senior Hezbollah military commander with extensive military leadership experience and presumed access to RDX. Further, the Trial Chamber received no evidence as to the provenance of the RDX used in the attack.

ii. Mr Badreddine's Green network activity

6577. The alleged hierarchical call flows in combination with the use of a closed network, restricted on the Prosecution's pleading to three people, Mr Badreddine, Mr Ayyash and Mr Merhi, using their Green mobiles, is the other major strand in the Prosecution's case that Mr Badreddine coordinated the operation to assassinate Mr Hariri.

6578. The following calls may be examples of hierarchical call flows; the Prosecution's cell site expert Mr Philips testified that some of these were hierarchical, and the Prosecution made submissions to this effect about some of them.

6579. They must of course be analysed in their totality to ascertain whether patterns emerge from which findings beyond reasonable doubt may be made of Mr Badreddine's involvement:

- **Tuesday 18 January 2005:** on that day, Mr Hariri was at home at Quraitem Palace all day. At 16:49, Mr Badreddine's Green 023 called Mr Ayyash's Green 300, which activated PORT3, north-east of Parliament, for 22 seconds. Seven minutes later, at 16:56, Mr

Ayyash's Blue 233 called Blue 501 for 58 seconds. Blue 233 connected to CoastRoad_C. Blue 501—described as the 'Blue base' mobile—activated Sfeir_B. At 17:07, Mr Badreddine's Green 023 called Mr Ayyash's Green 300 for 68 seconds. Both mobiles activated PORT2, east of the Parliament;

- The Prosecution submitted that the two met at that time. Mr Platt thought that they had met in the port area.¹¹⁶⁵⁸ He relied on the sequence of calls showing one user travelling to the area and then the other; the silence of the mobiles attributed to them shortly after they both connected to PORT2; that Mr Badreddine's personal mobile 633 was turned off; the absence of further calls between Green 023 and Green 300 on 18 January 2005; and the significance of the location;¹¹⁶⁵⁹
- **On Wednesday 19 January 2005**, Mr Hariri was at Quraitem Palace all day. In the early hours of the morning, at 00:09 and 00:11, Mr Ayyash's Blue 233, activating cells in south Beirut, called Blue 742, which connected to cells between Beirut and the Syrian border. At 00:26, Blue 742, activating another cell along the same route, called Mr Ayyash's Blue 233 for 13 seconds. Thirty-three minutes later, at 00:59, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for two minutes and 20 seconds. Six minutes later, at 01:05, Green 023 called Green 300 for just over a minute and a half. For both of these calls, Green 300 connected to a cell in south Beirut and Green 023 connected to cells near Jounieh;
 - The Prosecution submits that Blue 742 went to Anjar and that Mr Ayyash took a unique interest in this journey;
- At 15:25 that day, Mr Badreddine's Green 023 called Mr Ayyash's Green 300 for 12 seconds; both mobiles activated cells in south Beirut. At 15:28, Mr Ayyash's Blue 233, activating a cell in southern Beirut, called Blue 501—described as the 'Blue base' mobile—for 12 seconds. At 15:33, Mr Ayyash's Blue 233 called Blue 864 for a minute and 42 seconds. Blue 233 activated a cell in south Beirut and Blue 864 activated a cell near the airport;

¹¹⁶⁵⁸ Exhibit P1782, para. 10 (pp 198-199); Gary Platt, T. 15 February 2017, p. 33, T. 16 February 2017, pp 29-30, 34, 37-38.

¹¹⁶⁵⁹ Exhibit P1782, para. 10 (pp 198-199); Gary Platt, T. 16 February 2017, p. 37.

- The Prosecution submits that this hierarchical call flow occurred on the first day when Blue 864 used cells in an industrial area east of the airport;¹¹⁶⁶⁰
- **On Tuesday 25 January 2005**, Mr Hariri was at Quraitem Palace all day. At 14:59, Mr Ayyash's Blue 233, activating Sfeir_A in south Beirut, called Blue 610, which connected to MAARAD2 in Tripoli, for a minute and a half. At 15:10, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for one minute and 21 seconds. Both mobiles were in south Beirut;
 - The Prosecution ties these calls to the purchase of the Mitsubishi Canter;
- **On Friday 28 January 2005**, Mr Hariri remained at Quraitem Palace. At 14:14, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for just over a minute. Green 300 connected to MOSBEH2 near Zouk-Mosbeh and Green 023 connected to TRIANO1, between Beirut and Zouk-Mosbeh. Three minutes later, Mr Ayyash's Red 741 activating MOSBEH2, called Subject 9's Red 652 for 57 seconds, with Red 652 connecting to FARAYA2 in the Faraya area. At 16:25, Green 023 called Green 300 for 35 seconds. Mr Ayyash's Green 300 activated NDU2, near Zouk-Mosbeh just north of Beirut. At 16:27, his Red 741, still connecting to NDU2, called Subject 6's Red 678 for 58 seconds. At 16:46, Mr Ayyash's Red 741, connecting to a cell west of Zouk-Mosbeh, called Red 678, which activated RAOUCH3 near Quraitem Palace, for 19 seconds. Two minutes later, at 16:48, Mr Ayyash's Green 300, connecting to MOSBEH2 in the Zouk-Mosbeh area, called Mr Badreddine's Green 023 for 20 seconds;
 - In the Prosecution's view these calls were linked to surveillance of the route between Quraitem Palace and Faqra Villa;
- **On Monday 31 January 2005**, Mr Hariri visited the Higher Shiite Council between 11:00 and 11:45. Just before his departure from Quraitem Palace, Subject 6's Red 678 and Subject 8's Red 893 were in contact connecting to cells covering the palace at 09:54. At

¹¹⁶⁶⁰ In closing submissions, Prosecution counsel submitted that Blue 742's activity on 18 January 2005 in the Anjar area and in the area described as 'East of Airport' is evidence of the Blue mobile network's covert conduct, but it does not seek positive findings on these non-material facts, Prosecution closing submissions, T. 14 September 2018, pp 12-14.

10:54:10, Mr Ayyash's Red 741 called Red 636 for 36 seconds with both connecting to PORT2. Immediately afterwards, at 10:54:54, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for 17 seconds. At 11:13, Mr Badreddine's Green 023, connecting to ZOUKAK1, located between Parliament and the crime scene, called Mr Ayyash's Green 300 connecting to SABRA3, near the Higher Shiite Council, for 23 seconds. At 11:16, Mr Ayyash's Red 741, activating SABRA3, called Subject 8's Red 893 in the same cell for nine seconds;

- The Prosecution made no submissions that these were hierarchical;
- At 11:44, Mr Badreddine's Green 023, called Mr Ayyash's Green 300 for just over a minute with Green 023 activating ZOUKAK1 and Green 300 still connecting to SABRA3. Four minutes later, at 11:48:11, Mr Ayyash's Red 741, activating SABRA3, called Subject 5's Red 636, activating ETOILE1 near Parliament, for 14 seconds. At 11:48:45, Mr Ayyash's Green 300, still connecting to SABRA3, called Green 023, which activated ZOUKAK1, for 10 seconds. A minute later, at 11:50, Green 023 called Green 300 for 19 seconds. Green 023 connected to PHENMB1 near the crime scene. Green 300 connected to GHOBAl3, which was north of SABRA3. At 11:51, Mr Ayyash's Red 741 called Subject 9's Red 652 for 11 seconds. Red 741 connected to PINS2, north of GHOBAl3. Red 652 activated SODECO3, further north;
- At 11:55, Mr Badreddine's Green 023, activating MRAICI2, which was west of the crime scene, called Green 300 for 26 seconds. Mr Ayyash's Green 300 connected to BASTA1, which was next to SODECO3 in the direction of Quraitem Palace. At 11:56, Mr Ayyash's Red 741 called Subject 5's Red 636 for 38 seconds. Red 741 activated BASTA3, which was next to BASTA1, again in the direction of Quraitem Palace. Subject 5's Red 636 connected to ZOUKAK1. At 12:03, Subject 6's Red 678, activating CARLTO3 in north-west Beirut, called Mr Ayyash's Red 741 for 23 seconds, with Red 741 connecting to KRAYTM1, next to Quraitem Palace. At 12:04, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for 42 seconds. Green 300 connected to RAOUCH1, next to Quraitem Palace. Green 023 connected to OUZAII1, north of the Higher Shiite Council;

- The Prosecution seeks to tie these calls to surveillance of Mr Hariri's journey from the Higher Shiite Council to Quraitem Palace. Mr Platt concluded that the seven calls between Green 300 and Green 023 during this short period were consistent with Green 023 getting information from Green 300 regarding the security detail's movements, and whether it was heading toward Mr Ayyash's location; and
- After the 11:54 call, when it had become clear that the convoy would not travel to Parliament, Mr Badreddine's Green 023 started moving toward southern Beirut.¹¹⁶⁶¹ According to Mr Platt, on this day, Mr Ayyash and Mr Badreddine wanted to gather first-hand detailed observations of the security detail's behaviour, in order to make decisions about the eventual attack;¹¹⁶⁶²
- **On Thursday 3 February 2005**, Mr Hariri visited Mufti Qabbani between 13:18 and 13:51 and then lunched with Deputy Prime Minister Fares on his yacht at the St Georges Marina at 14:00. At 15:43, Mr Ayyash's Red 741, connecting to MRAICI2, west of the crime scene, called Subject 5's Red 636 at SIMON3, in west Beirut, for just under two minutes. A minute later, at 15:44, Mr Ayyash's Green 300, activating MRAICI2, called Mr Badreddine's Green 023, for 23 seconds, connecting to the same cell;
 - The Prosecution submits that these calls relate to surveillance of Mr Hariri during his journey from the St Georges Marina to Quraitem Palace;
- **On Tuesday 8 February 2005**, Mr Hariri went to the Parliament at midday, leaving at 13:25 and returning to Quraitem Palace at 13:39. At 13:39, Subject 5's Red 636 called Mr Ayyash's Red 741 for 25 seconds. Subject 5's Red 636 activated MRAICI2, west of the crime scene. Red 741 activated MANARA2, in north-west Beirut along the coastal road. A minute later, at 13:40, Mr Ayyash's Green 300, connecting to MANARA2, called Mr Badreddine's Green 023 for 67 seconds, connecting to ROUEIS3 in south Beirut;

¹¹⁶⁶¹ Gary Platt, T. 23 February 2017, pp 90-91.

¹¹⁶⁶² Gary Platt, T. 23 February 2017, pp 83-84.

- The Prosecution submits that was a rehearsal of the attack and the hierarchical call flow was linked to surveillance of Mr Hariri's journey from Parliament to Quraitem Palace;
- **On Friday 11 February 2005**, Mr Hariri was at home at Quraitem Palace receiving visitors. From just before midday there was Red network activity near Quraitem Palace, including Mr Ayyash's Red 741. At 12:45, Mr Ayyash's Green 300, activating PORT3 east of Parliament, called Mr Badreddine's Green 023 for 49 seconds. Green 023 activated ROUEIS3 in south Beirut. At 12:46, Mr Ayyash's Red 741, activating PORT3, called Subject 6's Red 678, which connected to TOURBO3, in Tripoli for just under two minutes;
 - Mr Philips identified these calls as a hierarchical call flow but the Prosecution made no submissions about this;
- **On Saturday 12 February 2005**, Mr Hariri visited the Sacré Cœur Church at around 10:48 for twelve minutes. At 10:49, Mr Ayyash's Red 741, activating HOTELD2, north of the church, called Subject 9's Red 652, which activated MPT2, next to the church, for just under a minute and a half. At 10:51, Mr Ayyash's Green 300, activating SASSIN1 in north-east Beirut, called Mr Badreddine's Green 023;
 - The Prosecution submits that this hierarchical call flow is linked to the surveillance of Mr Hariri at the church;
- Several hours later, at 14:27, Subject 5's Red 636, connecting to FARAYA1, called Mr Ayyash's Red 741, which connected to MOSBEH2 in the Zouk-Mosbeh area, just north of Beirut, for 40 seconds. At 14:28, Mr Ayyash's Green 300, activating the same cell, called Mr Badreddine's Green 023, in ROUEIS3 in south Beirut, for 33 seconds;
 - Mr Philips thought that this was a hierarchical call flow, but the Prosecution made no submissions about it;
- At 15:47, Mr Badreddine's Green 023 called Mr Ayyash's Green 300, which activated RIMAL1 west of Zouk-Mosbeh, for 35 seconds. At 15:48, Mr Ayyash's Red 741 called Subject 6's Red 678 for 28 seconds. Red 741 activated MOSBEH2 and Red 678 activated MANARA2, in north-west Beirut;

- Mr Philips testified that this was hierarchical but the Prosecution made no submissions about it;
- At 17:07, Mr Ayyash's Green 300, connecting to RIMAL1 west of Zouk-Mosbeh, called Mr Badreddine's Green 023, which activated GHAZIR2, near Jounieh. The call lasted 29 seconds. Two minutes later, at 17:09, Mr Ayyash's Red 741 called Subject 5's Red 636 for 55 seconds. Red 741 activated MOSBEH2, and Red 636 connected to FAYTRO1, near Faraya. At 17:10, Red 741, still activating MOSBEH2, called Subject 7's Red 946, which also connected to MOSBEH2, for 25 seconds;
 - According to the Prosecution these calls relate to the surveillance of the route from Quraitem Palace to Faqra Villa;
- **On Monday 14 February 2005**, at 11:57, Subject 5's Red 636 called Mr Ayyash's Red 741, in the area of the crime scene on the PHENMB1 cell for 50 seconds. Red 636 was south of the crime scene in the area of the Suleiman Frangieh tunnel, using the ZOUKAK2 cell at the start of the call and the PHENMB1 cell at the end of the call;
 - Mr Platt considered that Subject 5's Red 636's movements were consistent with the mobile travelling from the south northwards through the tunnel, in tandem with the Mitsubishi Canter's direction of travel;
- Immediately after, Green 300 and Green 023 were used for the last time when Mr Ayyash's Green 300 called Mr Badreddine's Green 023 at 11:58 for 14 seconds, connecting to the PHENMB1 and MRAICI1 cells. The PHENMB1 relay cell mast was approximately 100 metres from the crime scene, while the predicted best coverage area of MRAICI1 was less than 30 metres away from it; and
- At 12:04, Mr Ayyash's Red 741, connecting to ZOUKAK1, called Subject 7's Red 946, which also connected to ZOUKAK1, for 14 seconds. Forty-five minutes later, between 12:49 and 12:50, Mr Hariri's convoy left the Parliament taking the coastal route to Quraitem Palace, arriving at the crime scene where the explosion occurred at 12:55:05.
 - The Prosecution submits that these described calls relate to the Mitsubishi Canter's arrival at the crime scene.

6580. From these call flows the Trial Chamber can conclude that Mr Ayyash and Mr Badreddine were in regular contact on their Green network mobiles during the indictment period—and for a period before—but for calls of a very short duration. Here, the Trial Chamber stresses that it has no direct evidence of what was said, and can only attempt to draw inferences from the surrounding circumstances as to why and about what the two were communicating. It also has no evidence of any meetings between any conspirators, or how or when they met, nor of what may have been said.

6581. There are two further calls that the Prosecution alleges had a hierarchical function; the first is before the pleaded indictment period:

- **On 30 September 2004**, at 22:19, Mr Ayyash's Green 300 called Mr Badreddine's Green 023 for 21 seconds. Mr Ayyash's Green 300 connected to SFEIR2 in southern Beirut. Mr Badreddine's Green 023 activated GANOUM3, which was also in southern Beirut. Less than a minute later, Mr Ayyash's Yellow 294, connecting to SFEIR2, called Yellow 024, which activated Bir_Abed_C, for 23 seconds;
 - The Prosecution submits that this call occurred on the eve of the attack on Mr Marwan Hamade on 1 October 2004, but makes no specific submissions linking the calls to this event. It argues that this hierarchical call flow occurred within hours of Mr Ayyash joining the Green mobile network, which demonstrates his role as the lead coordinator of the covert networks; and
- **On Tuesday 28 December 2004**, Mr Hariri was at Quraitem Palace. At 13:11, Yellow 457 called Mr Ayyash's Yellow 294 for 24 seconds. Yellow 457 activated TRIPOL2, which was in the area of the Nejme cell shop in Tripoli. Yellow 294 activated PORT1, which was north-east of Parliament. At 13:14, Mr Ayyash's Green 300, connecting to PORT1, called Mr Badreddine's Green 023, which activated ROUEIS3 in southern Beirut;
 - The Prosecution submits that these calls relate to the purchase of the Red SIM cards.

6582. The Trial Chamber can draw no conclusions about the first of these two calls, on **30 September 2004**, as its context is uncertain even when considered in the totality of the evidence of all the Green network calls. Of the second, on **Tuesday 28 December 2004**, the Trial Chamber

cannot positively find that the Red SIM cards were bought on that day, meaning that no inferences in that respect can be drawn from this sequence of calls.

6583. To connect Mr Badreddine to the conspiracy to commit the terrorist act and to murder Mr Hariri, the Trial Chamber must be satisfied beyond reasonable doubt that the only conclusion available from the evidence is that Mr Badreddine had both the *mens rea* and the *actus reus* to commit the crimes charged. Such a finding would not of course be one of finding Mr Badreddine's guilt beyond reasonable doubt as he is no longer an accused person.

6584. The Trial Chamber has already positively decided that it could make findings on Mr Badreddine's pleaded role as an unindicted co-conspirator. From 11 July 2016, when the Trial Chamber, on the Appeals Chamber's order, terminated the case against Mr Badreddine, he has not been an accused in the proceedings facing criminal charges before the Special Tribunal.¹¹⁶⁶³

6585. In the decision terminating those proceedings, the Trial Chamber held that international criminal law principles and practice permit the Prosecution to plead and lead evidence of the conduct of deceased or unindicted alleged accomplices. Furthermore, as a general principle of pleading indictments in international criminal law, the Prosecution must plead the identity of known alleged co-conspirators. Where the participation of more than one person is a legal requirement for conspiracy, international criminal procedural law indisputably allows a court to accept the pleading of the name and role of the unindicted and to hear evidence and make findings in relation to them. Any findings will be binding only in relation to the individual criminal responsibility of the four Accused, thus any potential findings concerning Mr Badreddine's alleged role would be factual, limited to the confines of the case and having no legal impact upon his 'interests'.¹¹⁶⁶⁴

6586. The Trial Chamber based its findings on the case law of the ICTY, ICTR, SCSL, and of the Nuremberg and Tokyo tribunals. Those international criminal courts and tribunals allowed the names of deceased alleged accused in indictments alleging their (uncharged) criminal conduct.

¹¹⁶⁶³ Decision amending the consolidated indictment, paras 24-25, based on the Appeals Chamber's three-two majority decision on the issue, substituting its own final decision for that of the Trial Chamber's interim decision.

¹¹⁶⁶⁴ Decision amending the consolidated indictment, paras 37-38, 44, 46-47.

6587. At the ICTY, for example, the names and alleged roles of unindicted individuals and deceased accused were pleaded in indictments in cases alleging their participation in joint criminal enterprises.¹¹⁶⁶⁵ In *Prlić and others* the Trial Chamber made findings about the role in the joint criminal enterprise of three deceased senior Croatian officials and one deceased Bosnian-Croat official, whose role was pleaded in the indictment.¹¹⁶⁶⁶ In a post-conviction interlocutory appeal in that case, the ICTY Appeals Chamber held that findings of criminal responsibility were binding only upon the accused in a specific case and that since the Croatian officials found to have been members of the joint criminal enterprise were not indicted or charged, their presumption of innocence was not impacted.¹¹⁶⁶⁷

6588. The ICTR also permitted the names of deceased co-conspirators in indictments where the accused and others were alleged to have engaged in a conspiracy to commit genocide. In *Karemera and Ngirumpatse*, the ICTR also described and made findings on the acts and conduct of deceased co-conspirators.¹¹⁶⁶⁸ Similarly, the SCSL, in *Fofana and Kondewa*, made multiple adverse findings of fact concerning the acts and conduct of the co-accused Sam Hinga Norman, who had died between the close of evidence and the rendering of the judgment, including that he had ordered the commission of crimes.¹¹⁶⁶⁹ At the ICC, in *Ongwen*, in the context of co-perpetration, a deceased co-accused, Raska Lukwiya, was referred to in the document containing the charges and in decisions confirming the charges against Mr Ongwen.¹¹⁶⁷⁰

6589. International standards on human rights, in light of which the Trial Chamber must interpret the law, neither prohibit a criminal court from hearing evidence concerning the actions of a deceased or unindicted person, nor from naming that person in a charging document, nor from using their name in the proceedings. International human rights law also does not prevent a court from hearing evidence of the actions of an unindicted co-perpetrator or using it against the accused

¹¹⁶⁶⁵ Such as in the *Prlić and others*, *Brđanin*, *Šešelj*, *Karadžić*, *Mladić* and *Haradinaj and others* indictments.

¹¹⁶⁶⁶ These were the late Croatian President Franjo Tuđman, the Croatian Defence Minister Gojko Šušak, the Chief of the Croatian Army Main Staff, General Janko Bobetko and the president of the self-proclaimed breakaway republic of Herceg-Bosna in Bosnia and Herzegovina, Mate Boban, *Prlić and others* Indictment.

¹¹⁶⁶⁷ *Prlić and others* appeal decision on Croatia's amicus curiae application, para. 9.

¹¹⁶⁶⁸ *Karemera and Ngirumpatse* trial decision on indictment and evidence after co-accused's death, paras 11, 14; *Karemera and Ngirumpatse* appeal decision on indictment and evidence after co-accused's death.

¹¹⁶⁶⁹ *Fofana and Kondewa* Trial Judgment, paras 722, 724, 736, 738-739, 743, 765 (iv), 766, 782, 809 (i) and (v), 812, 849.

¹¹⁶⁷⁰ ICC, *Prosecutor v. Ongwen*, ICC-02-04-01/15, Prosecution's Submission of the Document Containing the Charges, the Pre-Confirmation Brief, and the List of Evidence, Annex A, Document Containing the Charges, 21 December 2015 (public redacted version filed 22 December 2015), para. 15; *Ongwen* confirmation decision para. 66.

persons before the court. It does not prohibit a court from making findings in a judgment about the role of an unindicted person in a criminal enterprise.¹¹⁶⁷¹

6590. Using these guiding principles, the Trial Chamber decided that it could make factual findings concerning Mr Badreddine even after his reported death insofar as it affects factual and legal findings against the Accused.

6591. The core Prosecution allegation is that the Green network operated as a command mission network with Mr Badreddine at its peak; that in effect he was the main conspirator. On one hand, the case is that Mr Badreddine is directing the three-part operation, namely the purchase of the Canter, the assassination of Mr Hariri and the claim of responsibility. While conversely, the other two are using their Green mobiles to communicate relevant information to him about these strands of the case, thus presumably permitting him to make informed decisions about directing the operation.

6592. Thus, to be satisfied beyond reasonable doubt that that was indeed what was occurring—and that no other reasonable conclusion is available from the evidence—the Trial Chamber must connect each of the calls, individually and together, to evidence of what was occurring when the calls were made. The Trial Chamber must do this to provide context and hence a reason—and in the absence of any call content—for the calls. The Trial Chamber cannot speculate; the inference must be the only one reasonably available from the evidence.

6593. The Trial Chamber must therefore examine the calls, whether hierarchical or otherwise, individually and in the context of every other call. Context is all important, as the essence of the Prosecution's case of Mr Badreddine's, Mr Ayyash's and Mr Merhi's involvement in the conspiracy charged is of hierarchal call flows in which Mr Badreddine is directing the purchase of the Canter, the assassination of Mr Hariri and the claim of responsibility. Without these call flows there would only be calls between the three mobiles, seemingly operating as a closed network. It is only from the overall patterns of calls that the Trial Chamber could draw any inferences as to their context and hence about what the callers were communicating.

¹¹⁶⁷¹ See *generally*, Decision amending the consolidated indictment.

6594. Indeed, the Prosecution's lead counsel described them as a 'key theme in the case',¹¹⁶⁷² and the 'most clear reflection of the roles' attributed to Mr Ayyash and Mr Merhi, submitting that:

The most clear reflection of the roles which the Prosecution attribute to Mr. Ayyash and Mr. Merhi comes in the so-called Green-coloured phone hierarchal call flows. You see those repeated throughout the evolution of the narrative of the Prosecution case, and it occurs with each and every coloured phone right through to the Purple Phones. By that, I mean this: You will see a call coming in for Mr. Badreddine, the overall overarching principal conspirator. He will call Mr. Ayyash at a certain time. And then Mr. Ayyash will lift up his other phone once that call is finished, and sometimes towards the end of the call while it's still operating, and then call a Yellow Phone holder, a Blue Phone holder, and Red Phone holder. And you see those sequences repeated, but not just repeated, but at key times.¹¹⁶⁷³

6595. But patterns need context; they must connect to something concrete. The Prosecution's evidence consists only of metadata in the form of call data records, extracted into readable call sequence tables, approximating the location of a mobile when in a call. These must be considered in tandem with, and connected to known provable events, such as Mr Hariri's movements, Mr Abu Adass's disappearance, the purchase of the Canter and the calls to Reuters and Al-Jazeera. To find the connection, and hence to determine the existence of a conspiracy and who was participating in it, the Trial Chamber has carefully analysed the Green network calls.

6596. The evidence establishes that the three Green mobiles were operational for 42 days between 13 October 2004 and Monday 14 February 2005 and that they were in communication on 39 days and active on 41 days of this period.¹¹⁶⁷⁴

¹¹⁶⁷² Prosecution closing submissions, T. 11 September 2018, p. 33, 'The evidence reflects that, like Ayyash, Merhi used the Green Network to report to Badreddine on the progress of the false claim and to be directed on it, especially, you'll remember, at key moments, such as the days leading up to the abduction of Ahmad Abu Adass, the Green-Purple call flows, you'll recall, which reflect the preparation and the oversight of Badreddine through Merhi to Oneissi and Sabra. A compelling pattern reflected across the entire plot, because, of course, Ayyash had similar call flows from Green to Red, Green to Yellow, Green to Blue, all at key moments of the plot. That's a key theme in the case.'

¹¹⁶⁷³ Prosecution closing submissions, T. 13 September 2018, p. 91.

¹¹⁶⁷⁴ See para. 2203; see also chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005', (3) 'The day of the attack—Monday 14 February 2005'.

6597. There were nine calls between Mr Badreddine and Mr Ayyash between 20 October and 10 November 2004. There were four calls on the evening of 20 October 2004; one on the evening of 28 October 2004; one in the afternoon of 1 November 2004; one on 6 November 2004; and two on 10 November 2004. No calls then occurred for forty days.

6598. Calls were then made in December 2004:

- on Monday 20, Tuesday 21, Wednesday 22 and Thursday 23 December 2004. There were three calls on Monday 27 December 2004; one call each on Tuesday 28 and Thursday 29 December 2004; and one on Friday 31 December 2004.

6599. In January 2005, calls occurred as follows:

- one on 2 January 2005; four on 11 January 2005; one on 12 January 2005; two on Saturday 15 January 2005; one on Monday 17 January 2005; four on Tuesday 18 January 2005; five on Wednesday 19 January 2005; four on Thursday 20 January 2005; one each on Friday 21 and Monday 24 January 2005; and four each on Friday 28 and Monday 31 January 2005.

6600. In February 2005, there were the following calls:

- one on Tuesday 1 February 2005; four on Thursday 3 February 2005; one on Monday 7 February 2005; two on Tuesday 8 February 2005; three on Friday 11 February 2005; six on Saturday 12 February 2005; and one each on Sunday 13 and Monday 14 February 2005.

6601. Despite the volume of the calls—namely, eighty Green network calls between 13 October 2004 and Monday 14 February 2005, 78 of which were made between 20 October 2004 and Monday 14 February 2005, into which must be factored their brevity in lasting only between five and 248 seconds—it is difficult to reconcile their timing and the location of the callers with the Prosecution’s pleaded allegation that Mr Badreddine was at the peak of a conspiracy to commit a terrorist act in murdering Mr Hariri.

6602. Similarly, there is no evidence about anything that might have happened in the area to the east of Beirut Airport nor at Anjar, nor on the road between it and Beirut. During the trial, Prosecution counsel submitted that there were inferences available to the Trial Chamber about both locations, arguing that these related to obtaining or picking up the explosives for the

construction of the VBIED, or something else in relation to the procurement of materials to be used in the attack.¹¹⁶⁷⁵ The Prosecution, however, ultimately sought no findings on this and the Trial Chamber is unable to connect these calls to any evidence.

6603. Even viewing the calls detailed above in their most suspicious light the Trial Chamber can only note that they represent communications between the network users. There is no evidence—on any bar eight calls—connecting them to the surveillance of Mr Hariri, the purchase of the Canter, Mr Abu Adass's disappearance, the claim of responsibility or any other preparations for the attack. The Trial Chamber has therefore examined in detail the eight Green network calls that may be connected to events for which there is concrete evidence:

6604. The calls on **Tuesday 25 January 2005** may connect to the purchase of the Canter. They are consistent with Blue 610, in Tripoli, informing Mr Ayyash that the Canter had been purchased, and Mr Ayyash in turn informing Mr Badreddine of this fact, if this is what occurred. However, the Trial Chamber has been unable to conclusively determine that the Canter was actually purchased on that day, although it is the most likely date of sale.

6605. The calls on **Friday 28 January 2005** are indeed consistent with surveillance of the route between Faqra Villa and Beirut. However, as Mr Hariri was at Quraitem Palace all day, they otherwise do not connect with Mr Hariri's actual movements. There is no other context to these calls. Attempting to determine why Mr Ayyash and Mr Badreddine were briefly communicating with each other, for 35 and 20 seconds respectively, in two calls that afternoon is speculative. Their communication may, or may not have been, connected with surveillance of the route. It is difficult to construe these calls as examples of Mr Badreddine coordinating the surveillance.

6606. The Green network calls on **Monday 31 January 2005** may connect to the mid-morning surveillance of Mr Hariri's journey to the Higher Shiite Council, and his return to Quraitem Palace. For example, two Red network mobiles, Red 678 and Red 893, connected to cells near Quraitem Palace before his departure. Red 741, Red 678 and Red 893 connected to cells near the Higher Shiite Council while Mr Hariri was there. At the time of Mr Hariri's return to Quraitem Palace,

¹¹⁶⁷⁵ T. 5 September 2016, p. 53; T. 16 January 2017, pp 65-67; T. 17 January 2017, pp 50-52.

Red 741 and Red 678 activated cells along the route between the Higher Shiite Council and the palace.

6607. From when Mr Hariri's security detail left the Higher Shiite Council, Mr Ayyash and Mr Badreddine called each other five times, between 11:49 and 12:04, and Mr Ayyash's Green 300 activated cells along the route to the palace before ending on RAOUCH1, to its immediate west. The calls between Mr Ayyash and Mr Badreddine thus may have been connected with the surveillance.

6608. Likewise, the calls on **Thursday 3 February 2005** link to Mr Hariri's lunch at the St Georges Marina and are consistent with the presence of nearby Red and Blue network mobile users watching him. However, as with the calls on 31 January nothing in the call patterns reveals a reason for the calls, other than perhaps of information, namely, that Mr Hariri was lunching at the marina.

6609. The Prosecution also submitted that Mr Badreddine and Mr Ayyash may have met. This is indeed also possible, but this is not the only inference available from the proximity of the callers to each other, determined only by the cell to which their mobiles were briefly connecting, namely MRAICI2. The Trial Chamber has calculated, from the electronic presentation of evidence, that the predicted best server coverage of this cell extends for around 1.8 kilometres between its furthest eastern and western edges, and for 400 metres inland from its predicted coverage at the coast, with at least seven pockets of coverage outside the main area.

6610. The calls on **Sunday 8 February 2005** could be linked to a 'rehearsal' for the attack on 14 February 2005. The relevant network mobile activity reveals that Mr Hariri was the subject of Blue, Red and Green network surveillance that day on his trip from his home to the Parliament and back.

6611. The relevant call sequence, however, is of Subject 5's Red 636, connecting to a coastal cell west of the crime scene, calling Mr Ayyash's Red 741, which was in an adjoining cell, immediately followed by a call on his Green 300 to Mr Badreddine's Green 023. These calls occurred at 13:39 and 13:40, coinciding with Mr Hariri's return to Quraitem Palace. This 67-second call could represent Mr Ayyash informing Mr Badreddine that Mr Hariri had returned home. Why he needed

to do so, and how this could have allowed Mr Badreddine to coordinate the operations is unexplained.

6612. The calls on **Friday 11 February 2005** have no specific context that the Trial Chamber can connect to Mr Badreddine and the attack. The call pattern is of Mr Ayyash, then along the coast road in Beirut, but after having previously been near Quraitem Palace, where Mr Hariri was, calling Mr Badreddine for 49 seconds, and then immediately thereafter on Red 741 calling Subject 6's Red 678, which was in Tripoli, for around two minutes. The connection between a call from someone engaged in surveillance in Beirut to someone in Tripoli, after speaking to Mr Badreddine, is unexplained. It is difficult to connect this call—to someone far from the scene then under surveillance—to the pleaded allegation that Mr Badreddine was coordinating the assassination, including the surveillance.

6613. The morning calls on **Saturday 12 February 2005** link with the surveillance of Mr Hariri when he visited the Sacré Cœur Church. The Prosecution generally submits that these were updating calls, which may explain a call in which Mr Ayyash *may* be informing Mr Badreddine that Mr Hariri was at the church, just after receiving a call from Subject 9's Red 652. The afternoon calls, at 14:28, 15:47 and 17:07, could have context and *may* be associated with surveillance of the route between Faqra Villa and Quraitem Palace. Although why such surveillance should continue if the attack location had already been carefully selected, and rehearsed on 8 February 2005, is unexplained. In this sense, it is difficult to ascribe reasons for Mr Ayyash's and Mr Badreddine's calls that afternoon. And especially how it related to Mr Badreddine's pleaded role of commanding and coordinating the entire operation.

6614. Finally, the calls on **Monday 14 February 2005** appear to be connected with the attack. On its face, Mr Ayyash's call to Mr Badreddine at 11:58 for fourteen seconds seems linked to the attack.

6615. The most likely conclusion is of Mr Ayyash informing Mr Badreddine of something related to the attack. The Prosecution suggests that it was to inform him that the Canter was in place ready for the attack. However, the Trial Chamber has been unable to positively determine whether the Canter was *in situ* 57 minutes before the explosion, or where it then was. The Prosecution could not positively submit that the white van emerging from the tunnel at around that time was the

Canter. Thus, absent any evidence of the time of the Canter's arrival near the St Georges Hotel, the Trial Chamber cannot positively link this call to *that particular event* as opposed to the assassination in general.

6616. Four so-called hierarchical calls between the two thus appear to have a significance that may connect to the evidence of Mr Hariri's movements, and possibly the Canter's purchase. Two calls, namely those on **31 January** and **12 February 2005**, are contemporaneous with surveillance of Mr Hariri. One call, on **25 January 2005**, may connect to the purchase of the Canter, but the Trial Chamber, as is noted above, has been unable to positively conclude that the Canter was purchased on Tuesday 25 January although this seems to be the most likely date.

6617. The call on **14 February 2005** appears connected to the attack on Mr Hariri. The remaining calls, however, cannot be linked to anything directly connecting to Mr Hariri, his movements or any other evidence relating to the conspiracy pleaded.

6618. This leads to the question of whether these four calls, without any evidence of what was said—by themselves, and taken together, or added to all the other calls lacking context—provide sufficient evidence beyond reasonable doubt of Mr Badreddine's pleaded role as the person at the apex of the conspiracy, directing and commanding the entire operation against Mr Hariri.

6619. To put it another way, does adding all the other calls to the four that may represent what the Prosecution alleges they do, provide them—and the other calls—with the context from which the Trial Chamber can conclude that the only reasonable inference available is of Mr Badreddine's pleaded role? Can the Trial Chamber therefore deduce that if these four calls had some connection with the attack, the remaining calls must therefore also have been connected with the attack—by virtue of the Green network—thus strengthening the context of the four possibly contextual calls?

iii. Conclusion regarding Mustafa Badreddine's pleaded role in the conspiracy

6620. The resulting question is therefore whether the fact that the calls occurred—which provides the only evidence of Mr Badreddine's alleged connection with the conspiracy—provide sufficient evidence that he was the conspirator with the alleged pleaded peak masterminding, coordinating role? The answer is in the negative.

6621. The Trial Chamber has carefully examined the inferences that are reasonably available from the totality of the evidence. From the combination of calls and events it can only find that Mr Badreddine could have been aware that Mr Hariri was under surveillance on certain dates and that he was informed just before the assassination that something was happening, and hence inferentially, of the assassination. This means that there are competing inferences available as to what he was doing in making and receiving calls on his Green network mobile.

6622. The Trial Chamber cannot exclude as an inference reasonably available from the evidence that Mr Badreddine was a conduit for passing this information to someone else, or in various calls doing something unrelated to the explosion. There are other inferences available as to his possible role that do not mean that he was the coordinator of Mr Hariri's assassination, including his having a far more passive role. The Prosecution, it is emphasised, argued that he 'masterminded' the attack.

6623. There is no evidence that Mr Badreddine himself conceived or executed the plot to murder Mr Hariri. The call flows at best reveal his probable awareness of what was occurring. But they do not, taken in any combination, reveal that he did anything to further the conspiracy, including as is pleaded, coordinating it or even monitoring it. Mere knowledge does not equate to participation in a conspiracy. The essence of participation in a conspiracy is the agreement; here to commit a terrorist act by means of an explosive device with the objective of murdering Mr Hariri. It is only from the telecommunications metadata, in combination with other pleaded events, that the Trial Chamber is supposed to infer this agreement.

6624. This conclusion is further strengthened when considered in tandem with the evidence of the so-called false claim of responsibility and Mr Merhi's, Mr Oneissi's and Mr Sabra's pleaded roles. Once their roles are removed—on the basis that the underlying evidence is insufficiently reliable to find that they had the roles pleaded—the evidence of the Green network functioning as a mission command for executing Mr Hariri's assassination, no matter how suspicious its calls might appear, substantially diminishes. Moreover, the last call between Mr Merhi's attributed Green 071 and Mr Badreddine's Green 023 occurred on Monday 7 February 2005, and nothing links it to anything connected to the pleaded activities.

6625. Examining this in further detail, the Prosecution's opening statement explained this final call between Green 023 and Green 071, by stating that because the Canter had been purchased on Tuesday 25 January 2005:

as of 7 February, the co-conspirators, and particularly the accused Badreddine, must no longer have considered it necessary for Merhi to continue to communicate through his Green phone, so he stopped it a week before the assassination.¹¹⁶⁷⁶

Further, 'it was an available inference' that the video had been prepared by Monday 7 February.¹¹⁶⁷⁷ In its final trial brief, the Prosecution argued that this call:

indicates that the preparatory elements necessary for MERHI to discharge his role in enacting the false claim were nearing or at completion. This is another example of the structured co-ordination in the operating hierarchy beneath BADREDDINE and directly associates all three co-conspirators.¹¹⁶⁷⁸

6626. It is difficult, however, to reconcile this with the Prosecution's other arguments that Mr Badreddine 'masterminded' the attack, including coordinating the false claim of responsibility.

6627. If Mr Merhi's role indeed was to enact the false claim, his role was certainly not complete, on the pleaded facts, on Monday 7 February, as the claim was not broadcast for another week. It is also unclear what the 'preparatory elements' referred to were, as there is no evidence of Mr Merhi doing anything connected with the video, or Mr Abu Adass's alleged abduction.

6628. Mr Ayyash's Green 300 made its last ever call to Mr Badreddine's Green 023, forty seconds after Subject 5's Red 636 had called Mr Ayyash's Red 741 and less than an hour before the explosion.¹¹⁶⁷⁹ The direction of the calls may certainly suggest that Mr Ayyash as Red 741's and Green 300's user, was reporting information to Mr Badreddine on Green 023. Mr Ayyash was undoubtedly then very close to the crime scene, probably within one hundred metres of it.¹¹⁶⁸⁰ Call

¹¹⁶⁷⁶ Prosecutor's opening statement, T. 17 January 2014, pp 21-22.

¹¹⁶⁷⁷ Prosecutor's opening statement, T. 17 January 2014, p. 22.

¹¹⁶⁷⁸ Prosecution final trial brief, para. 933.

¹¹⁶⁷⁹ See para. 4644.

¹¹⁶⁸⁰ See paras 4644-4645; chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (E) (7) 'Role of the Green network'. The Trial Chamber has determined from its calculations in the electronic presentation of evidence that of the two cells that Mr Ayyash's Green 300 activated during the final call on 14 February 2005, the most of one, the portable relay cell PHENMB1, was around 100 metres from the crime scene. The shortest distance between the predicted best coverage of the other, MRAIC11, and the crime

flows on earlier days starting with Green 023 could also be consistent with calls conveying instructions downwards.¹¹⁶⁸¹

6629. The Trial Chamber has also found that Mr Ayyash's Green 300 and Mr Badreddine's Green 023 were in contact on Monday 11 January 2005, the sole day in the amended consolidated indictment period when Green 300 activated a cell in Tripoli. They were also in contact on Friday 15 January 2005 when another network mobile user, Blue 817 was in Tripoli and communicated with Subject 6 on Blue 610 who was in Beirut. Subject 6 on Blue 610 called Mr Ayyash as user of Red 741, Green 300 and Blue 233. Further contact occurred on Tuesday 25 January 2005 when the Canter was most likely purchased from the Tripoli 'dealership'.¹¹⁶⁸²

6630. The Prosecution's argument is that the Green network was the 'communication hub' that commanded and oversaw the preparation of each limb of the plot, including the attack, and the delivery and dissemination of the false claim. It had a limited direct association with the attack itself, namely the single call an hour before on Monday 14 February 2005, but its users used a high degree of covertness, discipline and focus to protect their anonymity.¹¹⁶⁸³

6631. Its behaviour, the Prosecution argues, showed a strong degree of co-ordination, cohesion and focus demonstrating an organised, well-resourced entity. This includes the open triangle formation of contact and the call flow, and the restricted number of short and sometimes co-ordinated calls.¹¹⁶⁸⁴

6632. While the Trial Chamber can accept that a covert network with such characteristics would operate in a manner rendering it difficult to make sense of the communications, the corollary is that because there is no direct evidence of their content almost all calls lack context.

scene was less than 30 metres. While the longest distance between the most remote portion of MRAICI1's predicted best server coverage and the crime scene was around 800 metres, Green 300's call to Green 023 started at 11:58:31, lasted only 14 seconds and activated MRAICI1 at the start of the call and PHENMB1 at the end of the call. Further, in a call immediately before, at 11:57:01, that lasted 50 seconds, Mr Ayyash's Red 741 had activated PHENMB1 at the start of the call and MRAICI1 at the end of the call.

¹¹⁶⁸¹ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (2) 'Surveillance of Mr Hariri and preparations for the attack—Wednesday 20 October 2004 to Sunday 13 February 2005', (E) (7) 'Role of the Green network'.

¹¹⁶⁸² See paras 4777, 4779-4780, 4794-4795.

¹¹⁶⁸³ Prosecution final trial brief, paras 354-355.

¹¹⁶⁸⁴ Prosecution final trial brief, para. 356.

6633. If the Green network existed only as a command network to organise Mr Hariri's assassination, as is pleaded, it follows logically that the calls should have been confined to matters connected with this. However, the lack of context to most of the calls makes it difficult to attempt to construe patterns from which this allegation could be found proven beyond reasonable doubt. For example, the first Green mobile call was between Mr Badreddine's Green 023 and Mr Merhi's attributed Green 071 on 6 September 2004. In noting this, the Trial Chamber does recognise that not every call had to be connected to the conspiracy.

6634. Mr Ayyash's calls to Mr Badreddine, however, point to him at least knowing that Mr Hariri was under surveillance and that on Monday 14 February 2005 he was the subject of the attack. But this is insufficient to place him in the conspiracy at its head as the organiser and coordinator of all of its activities, as is pleaded.

6635. The Trial Chamber has already found that it is not satisfied from the evidence that the Green network functioned as 'mission command'. It considered the numerous instances of call flows from the Green to the Blue and Red network and the attribution of various mobiles, and was satisfied that there was a connection between these calls and, further that there was clear sequencing. In the absence, however, of any content of any of these calls, or any other evidence, the finding is that it would be too speculative to infer a hierarchy from mere call 'sequencing'. Accordingly, it was not the only reasonable conclusion from the evidence that the Green network acted as mission command to coordinate Mr Hariri's assassination.

6636. This finding, however, does not alter the Trial Chamber's conclusion in relation to Mr Ayyash. It is not necessary that the Trial Chamber find that Mr Badreddine had the pleaded role alleged by the Prosecutor to find that Mr Ayyash participated in the conspiracy.

4. Conclusion

6637. The Trial Chamber is satisfied beyond reasonable doubt that Mr Ayyash participated in the conspiracy charged. The Prosecution has not proved Mr Oneissi's and Mr Sabra's pleaded roles as members of the conspiracy.

6638. Mr Merhi is alleged to have coordinated their pleaded roles in the false claim of responsibility. As their pleaded roles have not been proved, it follows that he cannot be guilty of

coordinating actions that have not been proved beyond reasonable doubt. Likewise—with Judge Braidy dissenting on the legal point of not analysing Mr Badreddine’s alleged complicity—for the same reason, Mr Badreddine’s pleaded role of coordinating the false claim aspect of the conspiracy cannot be established.

6639. The Trial Chamber—with Judge Braidy dissenting on whether it should have analysed this issue at all—is also not convinced that Mr Badreddine had the role pleaded in the amended consolidated indictment. The evidence of the Green network consisted only of calls between Mr Badreddine and Mr Ayyash, and between Mr Badreddine and Mr Merhi’s attributed Green 071. His pleaded role was of coordinating and monitoring the surveillance of Mr Hariri in preparation for the attack, purchasing the Canter and monitoring the physical perpetration of the attack and coordinating the false claim of responsibility. The Trial Chamber is not satisfied that he ‘masterminded’ the attack, as the Prosecutor alleged.

6640. The result of this is that Mr Merhi, Mr Oneissi and Mr Sabra must be acquitted of count one of conspiracy to commit a terrorist act. In the case of Mr Ayyash, a conviction must be entered on count 1.

C. Salim Jamil Ayyash

1. Introduction

6641. Salim Jamil Ayyash is charged in the amended consolidated indictment with having committed five offences contrary to the Lebanese Criminal Code.

6642. In short form these are, in count one, with conspiracy aimed at committing a terrorist act. In count two, with committing a terrorist act by means of an explosive device. In count three, with the intentional homicide of Mr Hariri. In count four, with the intentional homicide of 21 others, and, in count five, with the intentional attempted homicide of 226 others. Counts three to five plead that the crimes were committed ‘with premeditation by using explosive materials’.

6643. The same Prosecution evidence supports each count charged against Mr Ayyash. The Prosecution’s evidentiary submissions are effectively one for all offences, although its legal submissions are tailored to the elements necessary to prove each crime charged.

2. Count one—conspiracy aimed at committing a terrorist act

6644. The evidence supporting the count of conspiracy aimed at committing a terrorist act is analysed in detail directly above in assessing the evidence. This count has been examined separately because all four Accused are charged with having conspired, aimed at committing a terrorist act—together with Mr Badreddine and others unidentified—whereas Mr Ayyash alone is charged with committing the crimes alleged in counts two to five of the amended consolidated indictment.

6645. The Trial Chamber concluded in analysing the conspiracy charge that the Prosecution had proved beyond reasonable doubt its case that Mr Ayyash was guilty of the conspiracy charged, but that it had not proved its case in relation to Mr Merhi, Mr Oneissi and Mr Sabra. Further, it concluded—with Judge Braidy dissenting on the legal point of whether the Trial Chamber should have analysed Mr Badreddine's pleaded role—that the Prosecution had led insufficient evidence to establish the pleaded role of Mr Badreddine in the conspiracy alleged, namely as the 'monitor/coordinator' of the attack on Mr Hariri.¹¹⁶⁸⁵

3. Count two—committing a terrorist act by means of an explosive device

6646. Mr Ayyash is charged under count two of the amended consolidated indictment with having committed as a co-perpetrator—with the former Accused, Mr Badreddine, and others unidentified—a terrorist act by the assassination of Mr Hariri by means of an explosive device in a public place.¹¹⁶⁸⁶

6647. The evidence of the mobile activity of some users of the Blue, Red and Green networks on Monday 14 February 2005 is essential to the case against Mr Ayyash. Without it there is no case.

6648. The Trial Chamber has separately analysed the evidence relating to the purchase, in January 2005, of the Canter used in the attack. It has found that there is insufficient evidence to link Mr Ayyash with anything connected to its purchase or its preparation for its use in the explosion before the day of the attack. There is no evidence of either Mr Ayyash's knowledge of

¹¹⁶⁸⁵ Amended consolidated indictment, para. 48 (b).

¹¹⁶⁸⁶ Amended consolidated indictment, paras 55-56. The amended consolidated indictment refers to Article 3 (1) (a) of the Special Tribunal's Statute and Articles 188, 212-213 and 314 of the Lebanese Criminal Code and Article 6 of the Lebanese Law of 11 January 1958 on 'Increasing the penalties for sedition, civil war and interfaith struggle'.

the type or quantity of explosives used in the attack. There is also no evidence from which the Trial Chamber could infer Mr Ayyash's knowledge of either.

6649. Similarly, in analysing the evidence supporting the pleaded false claim of responsibility, the Trial Chamber has likewise been unable to find a connection between Mr Ayyash and that other limb of the plan to assassinate Mr Hariri from which it could draw a conclusion of either his knowledge of or involvement in it. The evidence and findings in relation to these pleaded allegations, therefore, are not repeated here.

6650. Accordingly, the Trial Chamber's assessment of the evidence connecting Mr Ayyash to the attack has been confined to the surveillance of Mr Hariri in the months before his death and, most specifically, to the mobile activity of the Red network including and especially Mr Ayyash's Red 741 on the day of the attack.

6651. The evidence of what occurred on the day of the attack is analysed directly below; it supports all counts charged against Mr Ayyash.

(a) Surveillance of Mr Hariri before Monday 14 February 2005

6652. The acts of surveillance of Mr Hariri between 20 October 2004 and 14 February 2005 are listed in the analysis of the evidence of the conspiracy, above, and more extensively in the analysis of the chronology of events leading to the attack. To provide perspective in relation to Mr Ayyash's *mens rea* or knowledge that Mr Hariri was the intended target of a terrorist attack, the surveillance in which Mr Ayyash participated, either directly in the field or by a network mobile from elsewhere, is briefly noted.

6653. In December 2004, using his Yellow 294,¹¹⁶⁸⁷ and in January 2005 on his Blue 233, Mr Ayyash was three times indirectly involved in the surveillance of Mr Hariri's movements, on:

- Tuesday 21 December 2004 when Mr Hariri visited Mr Hassan Nasrallah. Blue 322 contacted Blue mobile users, and Mr Ayyash's Yellow 294 contacted Yellow mobiles, both engaged in the same surveillance;

¹¹⁶⁸⁷ Mr Ayyash may also have been using Blue 322, but as this was not pleaded the Trial Chamber has made no findings to this effect against him.

- Friday 31 December 2004, his Yellow 294 was in contact with Yellow mobiles conducting surveillance of Mr Hariri travelling between Faqra Villa and Quraitem Palace; and
- Saturday 29 January 2005, using Blue 233—when Mr Hariri travelled from Quraitem Palace to Mr Marwan Hamade's residence, followed by a trip to his Al-Naameh Villa.

6654. Although Mr Ayyash was involved in this surveillance, the Trial Chamber, for the reasons set out analysing to the latest commencement date of the conspiracy, is not satisfied that the plan to kill Mr Hariri had materialised in December 2004. These acts of surveillance may have been preparatory to the plan to murder Mr Hariri or they may have been for general intelligence gathering of Mr Hariri's movements for other purposes. Either is equally possible and the Trial Chamber will not make a finding that they were directly connected with the attack on 14 February 2005.

6655. The surveillance involving the Red and Blue network mobiles in the weeks before Mr Hariri's death, however, was clearly connected to the assassination. This is irrespective of whether the decision to murder him had been taken in January, or alternatively was made in early February. Mr Ayyash was directly involved in the surveillance of Mr Hariri himself on the following five occasions between 31 January and 12 February 2005:

- Monday 31 January 2005, using both Red 741 and Blue 233—when Mr Hariri visited the Higher Shiite Council;
- Thursday 3 February 2005, on Red 741—when Mr Hariri was at the St Georges Marina;
- Monday 7 February 2005, using Blue 233—when Mr Hariri travelled from Beirut Airport to Quraitem Palace;
- Tuesday 8 February 2005, with both Red 741 and Blue 233—near the Parliament when Mr Hariri was there; and
- Saturday 12 February 2005, using Red 741—when Mr Hariri visited churches in Badaro and Mazraa.

(b) Mr Ayyash's mobile activity on Monday 14 February 2005

6656. The Trial Chamber has found beyond reasonable doubt that Mr Ayyash was the user of Yellow 294, Red 741, Blue 233 and Green 300.¹¹⁶⁸⁸ The review here focusses specifically on the activity of Mr Ayyash's three network mobiles on Monday 14 February 2005, in combination with that of the other users of the Blue, Red and Green networks. This overview includes the opinion evidence of the Prosecution investigator, Mr Gary Platt, who testified as an expert on the surveillance of criminal networks and the identification and organisation of covert communication networks. The totality of the network call activity that occurred on the day of the attack is analysed in greater detail above.¹¹⁶⁸⁹

i. Early morning mobile activity—use of Blue network mobiles

6657. The explosion in which Mr Hariri died occurred at 12:55 on Monday 14 February 2005. At different times on that day before this, Mr Ayyash used both his Red and Blue network mobiles to communicate with others. The others involved in the attack and using the Red network mobiles were Subjects 5, 6, 7, 8 and 9. The Prosecution's case is that they were also using Blue network mobiles.

6658. Mr Ayyash's mobile activities started in the early hours of the morning when he was active on his Blue mobile, Blue 233, and also on his personal mobile number 170. This started at 00:56 when Mr Ayyash's Blue 233 was connecting to a cell in southern Beirut.¹¹⁶⁹⁰ Substantial activity on the Blue network mobiles followed.¹¹⁶⁹¹

6659. Later that morning, at 10:51, his Blue 233 activated the Tabet El Dahra C cell, and at 11:19 his personal mobile 170 activated Ras_Nabah_A. According to Mr Platt, this activation of this cell

¹¹⁶⁸⁸ While Mr Ayyash may also have been using Blue 322 until 27 December 2004, this was not pleaded against him, so the Trial Chamber has made no findings to this effect.

¹¹⁶⁸⁹ See chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) 'The day of the attack—Monday 14 February 2005'.

¹¹⁶⁹⁰ Exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1127, 1141. See also exhibit P1923 (Chronology PowerPoint presentation – 13 February 2005 to 16 February 2005), slides 34-35; exhibit P1122 (ArcView shape files Touch).

¹¹⁶⁹¹ In the early morning of 14 February 2005, there was substantial Blue call activity in southern Beirut. Mr Ayyash's Blue 233 had three calls between 00:56 and 01:05 and two between 04:55 and 05:01. His personal mobile 170 was called by 'Subject 816' at 03:33 from an area east of the airport. See above, at paras 4631-4632; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1141-1143; Gary Platt, T. 13 March 2017, p. 12; exhibit P1259 (Call sequence table of ten numbers—Mr Ayyash), p. 364; see also exhibit P1923, slides 34-36, 38-40.

was consistent with Mr Ayyash travelling towards the Parliament area.¹¹⁶⁹² At that point, Mr Hariri had just left his home at Quraitem Palace—leaving at around 10:40 to drive to the Parliament.

ii. Departure of Mr Hariri's convoy for Parliament

6660. At approximately 10:45, Mr Hariri's security detail prepared to leave Quraitem Palace for the Parliament,¹¹⁶⁹³ and at around 10:54, his convoy was there.¹¹⁶⁹⁴ At around that time, three Red mobiles users were present in the area of Quraitem Palace, with their first call activity at 11:00, fifteen minutes after Mr Hariri's departure. There were two calls, at 11:00 and 11:01, involving Subject 8 on Red 893, Subject 6 using Red 678 and Subject 9 on Red 652.¹¹⁶⁹⁵

6661. The evidence, according to Mr Platt, does not suggest that any of the Red mobiles' users attempted to follow Mr Hariri to Parliament. In his view, this was because they knew where he was going because the timing of the Parliamentary session was 'already known, quite publicly, from the 8th of February onwards'.¹¹⁶⁹⁶

iii. Red network mobile activity while Mr Hariri was at the Parliament, after 11:00

6662. At 11:33, Mr Ayyash made his first call on Red 741. He was at that point connecting to ETIOLE1, which provided the predicted best server coverage to the Parliament.¹¹⁶⁹⁷ Mr Hariri was by then in the Parliament building itself, although in Mr Platt's view, 'Mr Ayyash, on his attributed phones ...would not be able to view Mr. Hariri at this stage'.¹¹⁶⁹⁸ A network coverage map of ETOILE1, created in the Prosecution's electronic presentation of evidence software, is extracted below. The Parliament is marked with a 'P' and the map shows its location on the border of ETOILE1's predicted best server coverage area:

¹¹⁶⁹² Gary Platt, T. 13 March 2017, pp 33-34, 44, 46-47; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1151, 1159; exhibit P1259, p. 364; *see also* exhibit P1923, slides 52-53, 61, 63.

¹¹⁶⁹³ *See* para. 4621; *see also* exhibit P1923, slides 50-51.

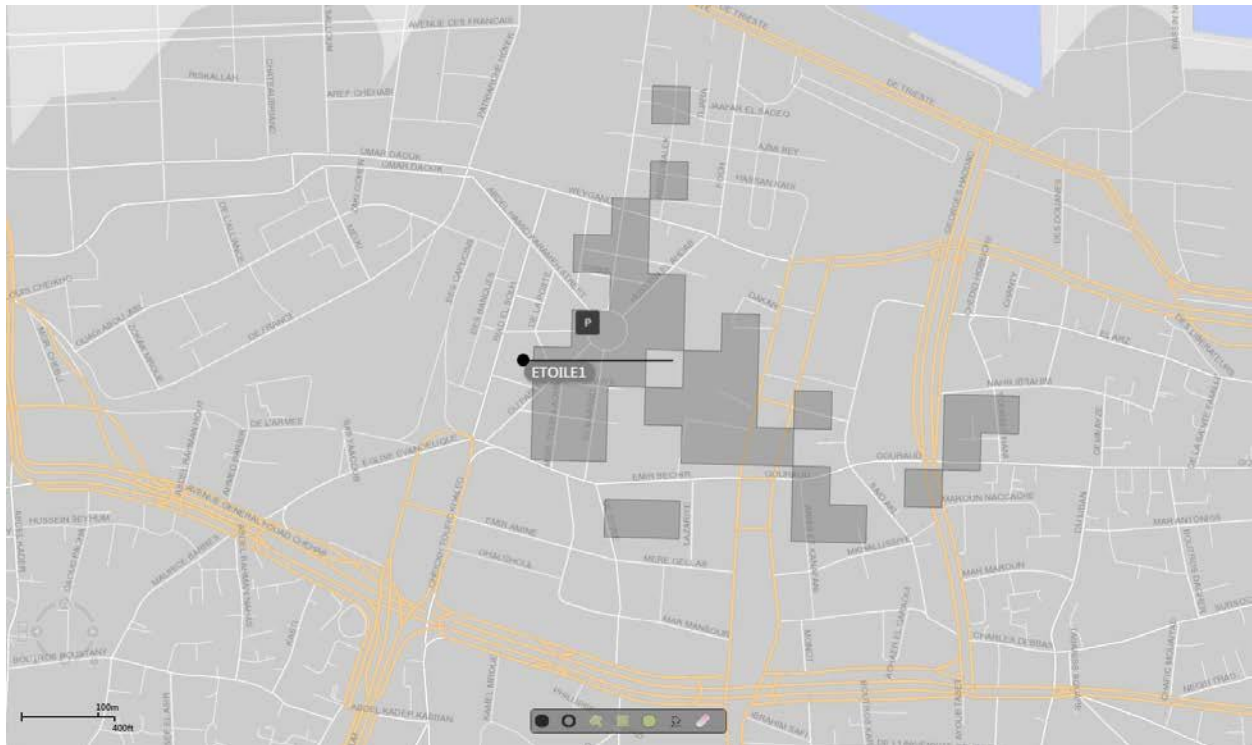

¹¹⁶⁹⁴ *See* para. 4623. It could also have been 10:56, based upon calls from Mr Hariri's security detail, but nothing turns on this possible difference of two minutes; *see also* exhibit P1923, slides 54-55.

¹¹⁶⁹⁵ *See* para. 4634.

¹¹⁶⁹⁷ *See* para. 4637.

¹¹⁶⁹⁸ Gary Platt, T. 13 March 2017, p. 49.

Map created by Trial Chamber using the electronic presentation of evidence, from exhibit P592.1 of the predicted best server coverage of ETOILE1

6663. In that call at 11:33, Mr Ayyash called Subject 6, on Red 678. Within one to two minutes, this call was followed by calls from Subject 6 to both Subject 8 (Red 893) and Subject 9 (Red 652). At that time, the three Subjects were still connecting to cells providing coverage near Quraitem Palace.¹¹⁶⁹⁹

6664. In Mr Platt's opinion, Mr Ayyash made this call to coordinate the movement of these three from their positions around Quraitem Palace to the Parliament and the crime scene areas.¹¹⁷⁰⁰

6665. These three Red mobiles then moved in that direction, between 14 and 18 minutes after the calls.¹¹⁷⁰¹ According to Mr Platt, this led to 'almost a changeover of the surveillance team'. This

¹¹⁶⁹⁹ See para. 4637. Subject 6 (on Red 678) called Subject 8 (on Red 893) and Subject 9 (on Red 652) at 11:34:31 and 11:35:05, respectively, exhibit P1204 (Call sequence table of Red 678), p. 6.

¹¹⁷⁰⁰ See para. 4637. Red 678 (Subject 6), Red 893 and Red 652 activated, respectively, the CARLTO3, CONCOR2 and MOVPIK1 cells, in the area of Quraitem Palace, see para. 4637; see also Gary Platt, T. 13 March 2017, pp 50-51.

¹¹⁷⁰¹ At 11:48, Red 893 (Subject 8) activated PHENMB1, the mast of which was approximately 100 metres from the crime scene. At 11:49, Red 652 (Subject 9) activated ETOILE3. At 11:53, Subject 6 (Red 678) activated ETOILE2. See para. 4640. Using the EPE software (exhibit P592.1), the Trial Chamber measured the shortest and longest distances between ETOILE2's predicted best coverage and (a) the Parliament as around 80 metres and 730 metres,

was, in his expert opinion, a surveillance technique where you ‘replace yourself with someone else so you don’t draw attention to yourself by being there for too long’.¹¹⁷⁰²

- iv. Blue network mobile activity while Mr Hariri was at the Parliament, after 11:00

6666. On the Prosecution’s case, both Subjects 5 and 7, using their Blue network mobiles, Blue 585 and Blue 324, were in southern Beirut before 11:00.¹¹⁷⁰³

6667. A few minutes after Mr Ayyash, using Red 741, had called Subject 6 on Red 678 who was near Quraitem Palace at 11:33, Mr Ayyash using Blue 233 contacted Blue 585. This was at 11:35.¹¹⁷⁰⁴

6668. Immediately after this call, Subject 5 (Blue 585) first tried to contact, and then contacted Subject 7 (Blue 324). Both were in the same area in southern Beirut, connecting to Touch’s Mar_Michael_C cell.¹¹⁷⁰⁵ As noted above, Subjects 6, 8 and 9 had been using their Red mobiles in the vicinity of Quraitem Palace at around 11:00, just after Mr Hariri’s departure to the Parliament.

6669. On the Prosecution’s case both Subjects 5 and 7 had Red and Blue network mobiles. Subject 5 was also using Red 636 and Subject 7 had Red 946. However, they did not use them until a little later. Mr Platt concluded that they switched to using their Red mobiles later, because using them in the morning would have ‘located’ them in Dahyieh, an area ‘which is a usual area that their phones are constantly active before, during, and after operations’.¹¹⁷⁰⁶

6670. According to the Prosecution, after these calls on the Blue network mobiles, Subjects 5 and 7 moved northwards from Dahyieh in southern Beirut towards the crime scene. To Mr Platt, the call at 11:35 from Mr Ayyash to Subject 5 using the Blue network mobiles was consistent with his coordination, command and control of the operation. This was because immediately after

and (b) the crime scene as around 450 and 1,560 metres. The shortest and longest distances between ETOILE3’s predicted best server coverage and the crime scene were around 630 and 1,600 metres.

¹¹⁷⁰² Gary Platt, T. 13 March 2017, p. 57.

¹¹⁷⁰³ See paras 4632-4633.

¹¹⁷⁰⁴ See para. 4638.

¹¹⁷⁰⁵ See para. 4638.

¹¹⁷⁰⁶ Gary Platt, T. 13 March 2017, pp 59, 90; see also exhibit P1923, slides 70-71, 80.

Mr Ayyash's call to Subject 5, Subject 5 then called Subject 7, both using their Blue network mobiles.¹¹⁷⁰⁷

6671. Twelve minutes later, at 11:47, while Mr Hariri was still at the Parliament, Mr Ayyash used the Blue network again, using Blue 233 to make a second call to Subject 5 on Blue 585. A minute later, at 11:48, Subject 5 on Blue 585 attempted to call Subject 7 on Blue 324, but the call did not connect. Mr Ayyash's Blue mobile activated the CoastRoad_C cell.¹¹⁷⁰⁸

6672. This was the last time Mr Ayyash used his Blue mobile—or that any Blue mobile was used—before the attack.¹¹⁷⁰⁹ According to Mr Platt, this call and Mr Ayyash's attempt to call Subject 7 was consistent with Mr Ayyash getting an update from the other two, Subjects 5 and 7, on their movements, and therefore with him coordinating the operation.¹¹⁷¹⁰

v. Movement of the Mitsubishi Canter towards the crime scene

6673. Conclusive evidence as to the Canter's movements in the hours before it was used in the explosion is lacking. The strongest piece of evidence is that at 11:56:57, while Mr Hariri was speaking to journalists and others at the café opposite the Parliament, a white van that resembled a Canter was in CCTV images taken in the President Suleiman Frangieh tunnel (the St Georges tunnel).¹¹⁷¹¹ According to the Prosecution, this was the Canter used in the explosion.¹¹⁷¹²

6674. In Mr Platt's view, the northward movement of Blue mobile users Subject 5 and Subject 7—who were according to the Prosecution, and in Mr Platt's evidence, also using Red 636 and Red 946—from southern Beirut towards the crime scene, was consistent with them being involved in transporting the Canter carrying the explosives to the crime scene area.¹¹⁷¹³

¹¹⁷⁰⁷ Gary Platt, T. 13 March 2017, p. 60.

¹¹⁷⁰⁸ See paras 4638-4639.

¹¹⁷⁰⁹ Gary Platt, T. 13 March 2017, p. 62. Blue 233 received or made calls again in the evening, at 18:50 and 20:24, exhibit P1259, p. 364. The Blue network mobiles remained in use until the closure of the network when Alfa deactivated them as a result of their non-use in October 2005, but with an exception, see chapter VIII 'Nature and purpose of colour-coded mobile networks and Purple group of mobiles', (E) 'Blue network', (7) 'Findings'.

¹¹⁷¹⁰ Gary Platt, T. 13 March 2017, p. 75.

¹¹⁷¹¹ See para. 4625; see also para. 1267.

¹¹⁷¹² Prosecution final trial brief, para. 987.

¹¹⁷¹³ Gary Platt, T. 13 March 2017, pp 76-77.

6675. Mr Platt explained that their movements after they switched to their Red mobiles coincided with the Canter's movement through the tunnel as shown in the CCTV images.¹¹⁷¹⁴ He based this conclusion on, among other things, 'a process of elimination'. This was because Subject 6 (on Red 678), Subject 8 (on Red 893) and Subject 9 (on Red 652) were 'around the Parliament area during this period,' and Mr Ayyash's mobiles were north of the Parliament.¹¹⁷¹⁵

6676. Mr Ayyash's two calls on Blue 233—at 11:35 and 11:47—activated the Riad_El_Soloh_B and CoastRoad_C cells, respectively.¹¹⁷¹⁶ Concerning the last activation, Mr Philips stated that 'no other Blue Phone is cell sited in this area around this time'.¹¹⁷¹⁷

- vi. Mr Ayyash's movement from the Parliament towards the crime scene area—from 11:47

6677. After 11:47,¹¹⁷¹⁸ according to Mr Platt, Mr Ayyash's attributed mobiles moved from the Parliament area immediately towards the crime scene area,¹¹⁷¹⁹ in Mr Platt's words they moved there a 'good hour' before the convoy left. He thought that the reason was that as 'other Subjects' were located around the Parliament area and were therefore able to carry out surveillance, Mr Ayyash could move to a location relevant to the second part of the operation: namely, the actual attack.¹¹⁷²⁰ Mr Platt explained, in relation to Mr Hariri, that 'there was no real need to follow him. All they needed to know is when he left the Parliament'.¹¹⁷²¹

6678. Mr Ayyash on Red 741 then made two calls, at 11:48:58 and at 11:49:36, to Subject 8 (on Red 893) and Subject 9 (on Red 652).¹¹⁷²² His first call activated a cell, the portable relay cell

¹¹⁷¹⁴ Gary Platt, T. 13 March 2017, pp 77, 84-85, T. 14 March 2017, pp 8-9. *See also* exhibit P1927 (EPE snapshot related to exhibit P1923, slides 71, 77, 80); exhibit P1928 (EPE snapshot related to exhibit P1923, slides 71, 80).

¹¹⁷¹⁵ Gary Platt, T. 13 March 2017, p. 78.

¹¹⁷¹⁶ Exhibit P1259, p. 364. Using exhibit P592.1, the Trial Chamber measured the shortest and longest distances between Riad_El_Soloh_B's predicted best server coverage and (a) the Parliament: around 120 and 860 metres and (b) the crime scene: around 1,030 and 1,900 metres. The shortest and longest distances between CoastRoad_C's predicted best server coverage and (a) the Parliament were around 45 and 715 metres and (b) the crime scene were around 830 and 1,650 metres. *See also* exhibit P1923, slides 71, 77.

¹¹⁷¹⁷ Exhibit P1117 (Expert report of John Edward Philips – Common Mission Phones), para. 5.7.1.9 (p. 59).

¹¹⁷¹⁸ Mr Ayyash's Blue 233 called Blue 585 and activated CoastRoad_C, *see* para. 4639.

¹¹⁷¹⁹ *See* paras 4639-4640; *see also* Gary Platt, T. 13 March 2017, p. 74.

¹¹⁷²⁰ Gary Platt, T. 13 March 2017, p. 64 (in response to a question from Judge Braidy).

¹¹⁷²¹ Gary Platt, T. 13 March 2017, p. 66.

¹¹⁷²² *See* paras 4640-4641. Red 893 activated the PHENMB1 cell. It is the only call by Red 893 activating a different cell than ETOILE1 (Gary Platt, T. 13 March 2017, pp 82-83). Red 652 activated ETOILE3.

PHENMB1, that was—based on calculations in the electronic presentation of evidence—within around 100 metres of the crime scene.¹¹⁷²³

6679. Mr Ayyash's second call activated ZOUKAK1. This cell provided coverage to an area between Parliament and the crime scene.¹¹⁷²⁴ Mr Platt noted that Mr Ayyash's Red 741 remained in the area between the crime scene and Parliament.¹¹⁷²⁵

6680. The extract below from the slides that Mr Platt used in court shows the cells that Mr Ayyash's mobiles connected to in the hour before Mr Hariri's assassination and the route taken by his convoy from Parliament. The Parliament is marked as 'P', the exit of the tunnel as 'SGT'¹¹⁷²⁶ and the crime scene as 'CS', while the convoy route is the black line. The three cells from right to left, are Touch's CoastRoad_C and Alfa's ZOUKAK1 and MRAICI1. The azimuth and mast of the portable relay cell PHENMB1 is marked between MRAICI1 and ZOUKAK1:

¹¹⁷²³ Red 741 activated PHENMB1 as the start cell and ZOUKAK1 as the end cell. *See* paras 4641, 4645; exhibit P592.1; exhibit P1123 (ArcView shape files Alfa); *see also* exhibit P1923, slide 73. PHENMB1, south-west of the marina, across from the Phoenicia Hotel, had a 150-metre radius coverage. Exhibit P777 (Annex 5 to Witness PRH707's statement), p. 5; exhibit 2D71 (Information regarding Alfa's relay station PHENMB1). It provided coverage within a 500-metre radius of the crime scene, exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1268. *See also* exhibits P330-P332 (Photographs of the portable mobile telephone base station, annotated by Ali Diab).

¹¹⁷²⁴ *See* para. 4640; exhibit P1930 (Snapshot 108 to Chronology PowerPoint); *see also* exhibit P1923, slide 79. ZOUKAK1 provided coverage within a 500-metre radius of Parliament and the crime scene, exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1267-1268. Using the EPE software (exhibit P592.1), the Trial Chamber measured the shortest and longest distances between ZOUKAK1's predicted best server coverage and (a) the crime scene, as around 75 metres and 3.32 kilometres, and (b) the Parliament, as around 130 metres and 2.5 kilometres. Subject 9, who received the call on Red 652, activated ETOILE3, exhibit P1199 (Call sequence table of Red 652), p. 6.

¹¹⁷²⁵ Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1164; *see above*, at para. 4640. *See also* exhibit P1926 (EPE snapshot related to exhibit P1923, slide 73).

¹¹⁷²⁶ According to Prosecution counsel (Mr Povoas), T. 13 March 2017, p. 72.

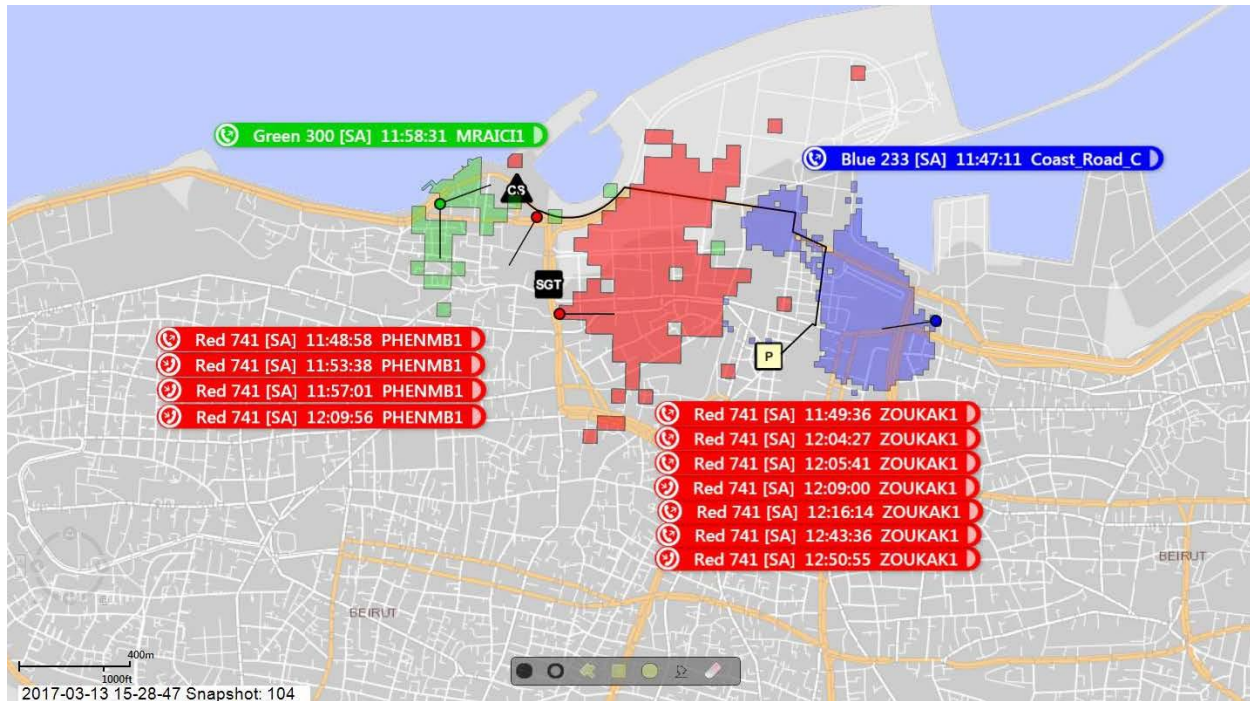

Exhibit P1926 (EPE snapshot related to exhibit P1923, slide 73)—cells activated by Mr Ayyash’s attributed mobiles between 11:47 and 12:50 and the route taken by the convoy

6681. At around 11:54, Mr Hariri left the Parliament and crossed the road to the *Café de l’Étoile*, where he met journalists.¹¹⁷²⁷ At 11:53:38, Subject 6 (on Red 678) called Mr Ayyash’s Red 741.¹¹⁷²⁸ Mr Ayyash’s Red 741 activated PHENMB1 again; its mast is close to the exit from the President Suleiman Frangieh tunnel and the crime scene¹¹⁷²⁹—at the start of this call.¹¹⁷³⁰

6682. Three other Red network calls followed within three minutes. Two were from Subject 6 (on Red 678), both to Subject 9 (Red 652). One was from Subject 9 to Subject 8 (Red 893). In Mr Platt’s view, these calls were possibly initiated because of Mr Hariri’s movement from

¹¹⁷²⁷ See para. 4624.

¹¹⁷²⁸ Exhibit P1259, p. 364.

¹¹⁷²⁹ Exhibit P1923, slide 73; exhibit P1926. Using exhibit P592.1, the Trial Chamber measured the PHENMB1 mast as around 270 metres from the tunnel’s north entrance, and about 100 metres from the crime scene.

¹¹⁷³⁰ See paras 4640-4641, 4643. Mr Ayyash’s call on Red 741 at 11:48 had also activated PHENMB1 at the beginning of the call. Its mast was within 100 metres of the crime scene and had a small coverage radius of around 150 metres, exhibit P1112 (Expert report of John Edward Philips – Single user analysis, Suspects 4, 5, 6, 7, and 8), paras 4.2.5.11, 4.2.5.13; exhibit P777 (Annex 5 to Witness PRH707’s statement), p. 5. Red 741 had activated ZOUKAK1 at the end of that call, within 23 seconds. This suggests that it was most probably not in the patches of ZOUKAK1’s predicted best server coverage furthest from the crime scene, namely, around three kilometres away. In three consecutive calls, between 11:53 and 11:58, Red 741 activated again—as a start or end cell—PHENMB1, ZOUKAK4 and MRAICI1. This too strongly suggests his presence in the immediate vicinity of the crime scene.

Parliament to the café.¹¹⁷³¹ Further, the call by Subject 6's Red 678 to Mr Ayyash's Red 741 at 11:53 was, in Mr Platt's opinion, consistent with Red 678 updating Red 741 'on the activities around Parliament'.¹¹⁷³²

6683. At 11:57:01, Subject 5 (on Red 636) called Mr Ayyash's Red 741. Subject 5 activated ZOUKAK2 at the start of the call¹¹⁷³³ and PHENMB1 at the end.¹¹⁷³⁴ Mr Platt commented that this was consistent with Subject 5 travelling from the south northwards through the tunnel and to the area on the other side of the tunnel.¹¹⁷³⁵

6684. According to Mr Platt, the 'previous activity from the Dahyieh area through central Beirut towards the crime scene' of both Subjects 5 and 7 was consistent with both of them being involved in the transportation of the Canter towards the crime scene. Mr Platt identified as Subjects 5 and 7 the two users of Blue 585 and Red 636 on one side, and Blue 324 and Red 946 on the other—who, in his evidence, are the same.¹¹⁷³⁶

6685. At 11:56:57, when a white van was in CCTV camera images in the tunnel, Subject 5, according to Mr Platt was travelling 'in line with the truck in its direction of travel'.¹¹⁷³⁷ Mr Platt also stated that Subject 5 was not the suicide bomber because his Blue mobile 585 was used for

¹¹⁷³¹ See para. 4643.

¹¹⁷³² Gary Platt, T. 13 March 2017, p. 92.

¹¹⁷³³ This cell provided coverage within a 500-metre radius of the crime scene and a 500-1,000 metre radius of Parliament. Exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1267-1268; exhibit P592.1 (Electronic Presentation of Evidence). Using exhibit P592.1, the Trial Chamber measured the shortest and longest distances between ZOUKAK2's predicted best server coverage area and (a) the crime scene, as around 480 and 935 metres, (b) the Parliament, as 520 and 975 metres and (c) the tunnel's northern exit, onto Suleiman Franjeh Boulevard, as around 130 and 580 metres. ZOUKAK2 is south of the tunnel. Exhibit P1923, slide 96.

¹¹⁷³⁴ Mr Ayyash's Red 741 also activated it as the call's recipient; Gary Platt, T. 13 March 2017, p. 94; exhibit P1203 (Call sequence table of Red 636), p. 3; exhibit P1259, p. 364. Two subsequent calls involving Red 636, at 12:01:45 and at 12:02:18, activated PHENMB1 and ZOUKAK4. ZOUKAK4 provided coverage within a 500-metre radius of the crime scene and within a 500-1,000 metre radius of the Parliament. Using exhibit P592.1, the Trial Chamber measured that ZOUKAK4 provided predicted best server coverage to the crime scene and the tunnel. The furthest portions of its predicted best server coverage from (a) the crime scene or tunnel, were around 890 metres and a kilometre, and (b) the Parliament, were around 675 metres and 1.28 kilometres. See also exhibit P1930; exhibit P1783 (Expert report of Gary Platt – Chronology), paras 1267-1268.

¹¹⁷³⁵ Gary Platt, T. 13 March 2017, p. 93. As noted in chapter X 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', fn. 8887, the tunnel is the roadway underpass between the *Fu'ad Shahab* and St Georges (Ain-El-Mreisseh) areas of Beirut. It has an entry and exit point on *Fakhr Ed Dine* Street, south of the Phoenicia and Monroe Hotels and of *Adnan El Hakim* Street, which runs east to west behind the Monroe Hotel. Exhibit P5 (Robyn Fraser report on CCTV evidence) paras 10, 115; Robyn Fraser, T. 22 January 2014, p. 41.

¹¹⁷³⁶ Gary Platt, T. 13 March 2017, pp 77, 84-85, T. 14 March 2017, pp 7-9, 16-18; exhibits P1927-P1928.

¹¹⁷³⁷ Gary Platt, T. 13 March 2017, p. 94.

weeks and months after the attack.¹¹⁷³⁸ Further, Prosecution counsel also stated that it was illogical for the suicide bomber to have had a mobile, due both to his state of mind and his close proximity to two and half tonnes of explosives on the Canter.¹¹⁷³⁹

6686. According to Mr Platt, Subject 5's call on Red 636 to Mr Ayyash on Red 741 was consistent with Subject 5 updating Mr Ayyash about Subject 5's arrival at the crime scene area.¹¹⁷⁴⁰ In his view, if Subject 5 was not 'inside the Canter van at the time he made this phone call...he must have had some sort of visual awareness of the movements of the Canter'. Further, if 'Subject 5, for instance, was aware of the ultimate destination of the Canter van and the driver wasn't, you could have Subject 5 leading the Canter van to the appropriate destination'.¹¹⁷⁴¹

vii. Mr Ayyash's call on Green 300 to Mr Badreddine on Green 023—
11:58

6687. Within 40 seconds of the end of the call from Subject 5 to Mr Ayyash on Red 741, at 11:58, Mr Ayyash used his Green mobile 300 to call Mr Badreddine on Green 023. At the start of the call, Green 300 activated MRAICI1, which provided coverage within a 500-metre radius of the crime scene, and at the end of the call it activated PHENMB1.¹¹⁷⁴² Mr Badreddine's Green 023 activated the ROUEIS3 cell, in southern Beirut.¹¹⁷⁴³ This was the last call between the Green network mobiles. In Mr Platt's view, this was because 'the operation succeeds on that day'.¹¹⁷⁴⁴

6688. According to Mr Platt, the timing of the final Green call and its immediate relationship with the call from Subject 5's Red 636 to Mr Ayyash's Red 741 is consistent 'with coordination

¹¹⁷³⁸ Gary Platt, T. 13 March 2017, p. 81.

¹¹⁷³⁹ Mr N. Povoas, during Mr Platt's testimony; Gary Platt, T. 13 March 2017, pp 96-97.

¹¹⁷⁴⁰ See para. 4644.

¹¹⁷⁴¹ Gary Platt, T. 14 March 2017, p. 9.

¹¹⁷⁴² See paras 4644-4645. See also exhibit P1923, slide 73; exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1268. Using exhibit P592.1, the Trial Chamber measured the shortest and longest distances between MRAICI1's predicted best server coverage and the crime scene as approximately 25 and 800 metres. These measurements are of course imprecise and depend upon the estimations of predicted coverage in the network maps. According to Mr Platt's report MRAICI1 also provided coverage within a 500 metre radius of Parliament. Exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1266. Using exhibit P592.1, the Trial Chamber also measured the shortest and longest distances between MRAICI1's predicted best server coverage and Parliament as approximately 400 metres and 1.42 kilometres.

¹¹⁷⁴³ Exhibit P1118 (PowerPoint presentation on common mission phones, John Edward Philips), slide 60. See fn. 8958.

¹¹⁷⁴⁴ Gary Platt, T. 14 March 2017, p. 8.

and a command structure, whereby clearly the people involved in the transportation of the Canter carrying the explosives were in contact with Mr Ayyash's Red mobile.¹¹⁷⁴⁵

6689. On the Prosecution's case, the 'next chain of command' call was to Mr Badreddine's Green mobile. Mr Platt explained that Mr Badreddine was then far away from the crime scene. He did not need to have any direct involvement, because the person in charge of the operation—given the activity of his mobile—was Mr Ayyash. Further, being remote from the crime scene, he distanced himself from the crime. Thanks to the Green mobiles, this created a 'sterile corridor between Mr Badreddine and the actual plot'. On some rare occasions, however, Mr Badreddine had direct involvement in the surveillance.¹¹⁷⁴⁶

6690. Mr Platt stated that by this time—just before the explosion—'the people involved, especially these six principal Subjects' would have been aware that the attack was due to take place.¹¹⁷⁴⁷ This was because since 'you're transporting a Canter van to the crime scene, it's clearly not going to be used in surveillance. You're adding something new to the equation'.¹¹⁷⁴⁸

viii. Red network mobile activity between 12:04 and Mr Hariri's departure from the Parliament

6691. Just after midday, Mr Ayyash and Subject 7 were somewhere between the Parliament and the crime scene, while Subjects 8 and 9 remained near the Parliament.

6692. At 12:04:27 and 12:05:41, Mr Ayyash on Red 741 called Subject 7 on Red 946. Both were then connecting to ZOUKAK1, which provided coverage between the crime scene and Parliament.¹¹⁷⁴⁹ Subject 8, on Red 893, and Subject 9, on Red 652, contacted Mr Ayyash's Red 741 at 12:09:00 and 12:09:56. Red 741 activated ZOUKAK1 and then PHENMB1.¹¹⁷⁵⁰

¹¹⁷⁴⁵ Gary Platt, T. 14 March 2017, p. 8.

¹¹⁷⁴⁶ Gary Platt, T. 14 March 2017, pp 7-8, 20-22.

¹¹⁷⁴⁷ In response to a question from Judge Re who asked, 'And in your view would those leading the Canter to its destination, if that is the correct scenario, have been aware that it was packed with explosives on the Prosecution case?'; Gary Platt, T. 14 March 2017, pp 9-10.

¹¹⁷⁴⁸ Gary Platt, T. 14 March 2017, p. 10; *see* para. 4642.

¹¹⁷⁴⁹ *See* para. 4648. From 12:04, Red 741 and Red 946 activated the same cell, ZOUKAK1.

¹¹⁷⁵⁰ *See* para. 4649. For the first call, at 12:09:00, Red 741 activated ZOUKAK1 at the start of the call and PHENMB1 at the end of the call. For the second call, it activated PHENMB1 at the start of the call and BEACH1 at the end of the call. BEACH1 provided coverage within a 500-metre radius of the crime scene, exhibit P1783 (Expert report of Gary Platt – Chronology), para. 1268. Using exhibit P592.1, the Trial Chamber measured the shortest and longest distances between its predicted best server coverage and the crime scene as around 45 and 135 metres.

6693. Both Subject 8 and Subject 9 were still near the Parliament when they made these calls. According to Mr Platt, they were in a position to observe Mr Hariri's movements and to update Mr Ayyash, who—according to Mr Platt—had a prominent role in the operation that he was coordinating.¹¹⁷⁵¹

6694. As noted above, at around 11:54, Mr Hariri had left the Parliament building and had gone to the café where he met journalists, MPs and others. Within a few minutes, two calls on the Red network involved Subjects 6, 8 and 9, whose mobiles were activating cells near the Parliament or in its area.¹¹⁷⁵²

6695. Mr Platt commented that the operation was then in two parts. One was in getting the Canter to the crime scene. The other was in observing Mr Hariri's movements around the Parliament area to inform the Canter side to be in place in time for the attack.¹¹⁷⁵³ After 12:00, four Subjects, numbers 5, 6, 8 and 9—the users of Red 636, Red 678, Red 893 and Red 652—were near the general area of the Parliament.¹¹⁷⁵⁴

6696. Two others, Mr Ayyash on Red 741 and Subject 7 on Red 946, were 'between the Parliament area and the crime scene and close to the crime scene'.¹¹⁷⁵⁵ Mr Platt also commented that after midday, and after escorting the Canter, Subject 5 (Red 636's user) moved away from the area close to the crime scene. He was then redeployed to assist the other three Red mobiles' users in the surveillance around the Parliament area. At 12:12, Red 636 activated ETOILE2, which provided coverage in the area.¹¹⁷⁵⁶

6697. At 12:16, Mr Ayyash's Red 741, activating ZOUKAK1, called Subject 8, on Red 893. Mr Ayyash's Red 741 was then inactive for almost half an hour. Mr Platt commented that in that period there was only one Red call—between Red 652 (Subject 9) and Red 678 (Subject 6). As Mr Hariri was still at the café there was no reason, in Mr Platt's view, to trigger any movement or activity.¹¹⁷⁵⁷

¹¹⁷⁵¹ See para. 4649; Gary Platt, T. 14 March 2017, pp 41-42.

¹¹⁷⁵² See para. 4643.

¹¹⁷⁵³ Gary Platt, T. 14 March 2017, pp 42-43.

¹¹⁷⁵⁴ See paras 4647-4649.

¹¹⁷⁵⁵ Gary Platt, T. 14 March 2017, p. 42.

¹¹⁷⁵⁶ Gary Platt, T. 14 March 2017, p. 17.

¹¹⁷⁵⁷ See paras 4649-4650.

6698. Red 741 made its last call, at 12:43, again activating the ZOUKAK1 cell, and again to Subject 8 on Red 893, who was still in the Parliament area. In Mr Platt's view, this was consistent with Mr Ayyash getting an update on what was occurring there.¹¹⁷⁵⁸ This was six to seven minutes before Mr Hariri left the café.

ix. Mr Hariri's departure from the Parliament—12:49-12:50

6699. Between 12:49 and 12:50, Mr Hariri departed the café in his convoy, intending to return to Quraitem Palace; the last call involving his security detail was at 12:50, from the Parliament area.¹¹⁷⁵⁹

6700. Mr Ayyash's Red 741 received its last call just after that, at 12:50:55, again from Subject 8 on Red 893, activating ETOILE1, which provided the predicted best server coverage to the Parliament.¹¹⁷⁶⁰ Mr Ayyash's Red 741 also activated ZOUKAK1 in this final call, and was still somewhere in an area between the crime scene and the Parliament.¹¹⁷⁶¹

6701. Mr Platt noted that at the time of the attack, only two Subjects were close to the crime scene, namely Mr Ayyash on Red 741 and Subject 7 on Red 946. The other four were all located in the general Parliament area. As noted above, Subject 5, on Red 636, had left the crime scene area and by 12:12 had joined the other three in the Parliament area.¹¹⁷⁶²

6702. At 12:50:34—immediately before its call to Mr Ayyash's Red 741—Subject 8 on Red 893 called Subject 7 on Red 946. According to Mr Platt, this was consistent with Subject 8—after having seen Mr Hariri departing the Parliament—alerting Subject 7 that the Canter carrying the explosives had to move to the crime scene.¹¹⁷⁶³ In Mr Platt's view, Subject 7 was with the Canter, and 'any communication made to the driver of the Mitsubishi would have had to have been made physically; in other words, verbally'.¹¹⁷⁶⁴

¹¹⁷⁵⁸ See para. 4651; Gary Platt, T. 14 March 2017, p. 46.

¹¹⁷⁵⁹ See para. 4626.

¹¹⁷⁶⁰ Subject 8's Red 893 activated ETOILE1 on all its calls from 12:05. Previously, it had activated cells in the Quraitem Palace area (CARACA3 and CONCOR2) at 11:00, 11:01 and 11:34, and PHENMB1 at 11:48; Gary Platt, T. 13 March 2017, pp 82-83; exhibit P1198 (Call sequence table of Red 893), p. 6.

¹¹⁷⁶¹ See para. 4652; see also exhibit P1926, exhibit P1930.

¹¹⁷⁶² Gary Platt, T. 14 March 2017, pp 14, 16-17, 24-25, 42; exhibit P1927; exhibit P1928.

¹¹⁷⁶³ See para. 4653.

¹¹⁷⁶⁴ Gary Platt, T. 14 March 2017, p. 13.

6703. Subject 8, according to Mr Platt, using ‘the coverage of ETOILE1, had the best line of sight of the movements of the convoy’.¹¹⁷⁶⁵ Subject 8’s Red 893 had called both Subject 7’s Red 946 and Mr Ayyash’s Red 741 within 20 seconds. The two calls lasted, respectively, five and ten seconds. Subject 7, in Mr Platt’s view, was ‘the access or the trigger point for the movement of the Canter towards the crime scene’. The second call was to Mr Ayyash who was coordinating the operation.¹¹⁷⁶⁶

6704. While there are no images of where the Canter was stationed for 50 minutes after—on the Prosecution’s case at 11:56:57—exiting the tunnel and then turning right, the Canter, according to Mr Platt, was potentially in close proximity of the crime scene, namely somewhere in the ZOUKAK1 and ZOUKAK4 cell areas.¹¹⁷⁶⁷ Both ZOUKAK1 and ZOUKAK4, in the Prosecution’s submission, provided coverage to the slip road where—or not far from which—the Canter would have stationed itself, but ZOUKAK4’s coverage ‘is nearer to the mouth of the slip road as it merges into the road towards the crime scene’.¹¹⁷⁶⁸

6705. As a result, by ‘a process of elimination’ or ‘a deduction of logic’ and based on cell coverage, Subject 7, on Red 946, was with the Canter and was the access or the trigger point for the Canter’s movement towards the crime scene. Further, consistent with this, Mr Platt noted that Subject 7 only received three incoming calls on his Red mobile and did not make any outgoing calls.¹¹⁷⁶⁹

6706. The last ever calls of the Red network mobiles occurred between 12:51:32 and 12:53:42. There were four calls between Subject 8 (Red 893), Subject 9 (Red 652), Subject 5 (Red 636) and Subject 6 (Red 678). These four calls and the two previous calls from Subject 8 to both Subject 7 and Mr Ayyash involved all six who were active on the Red network that day. At 12:54:57, an HSBC CCTV camera recorded Mr Hariri’s convoy passing the HSBC bank, preceded by a white

¹¹⁷⁶⁵ Gary Platt, T. 14 March 2017, p. 48. Around that time, the other Red mobiles in the Parliament area activated the BACHOU3 and BNPI3 cells. *See* paras 4654-4655.

¹¹⁷⁶⁶ Gary Platt, T. 14 March 2017, pp 48-49.

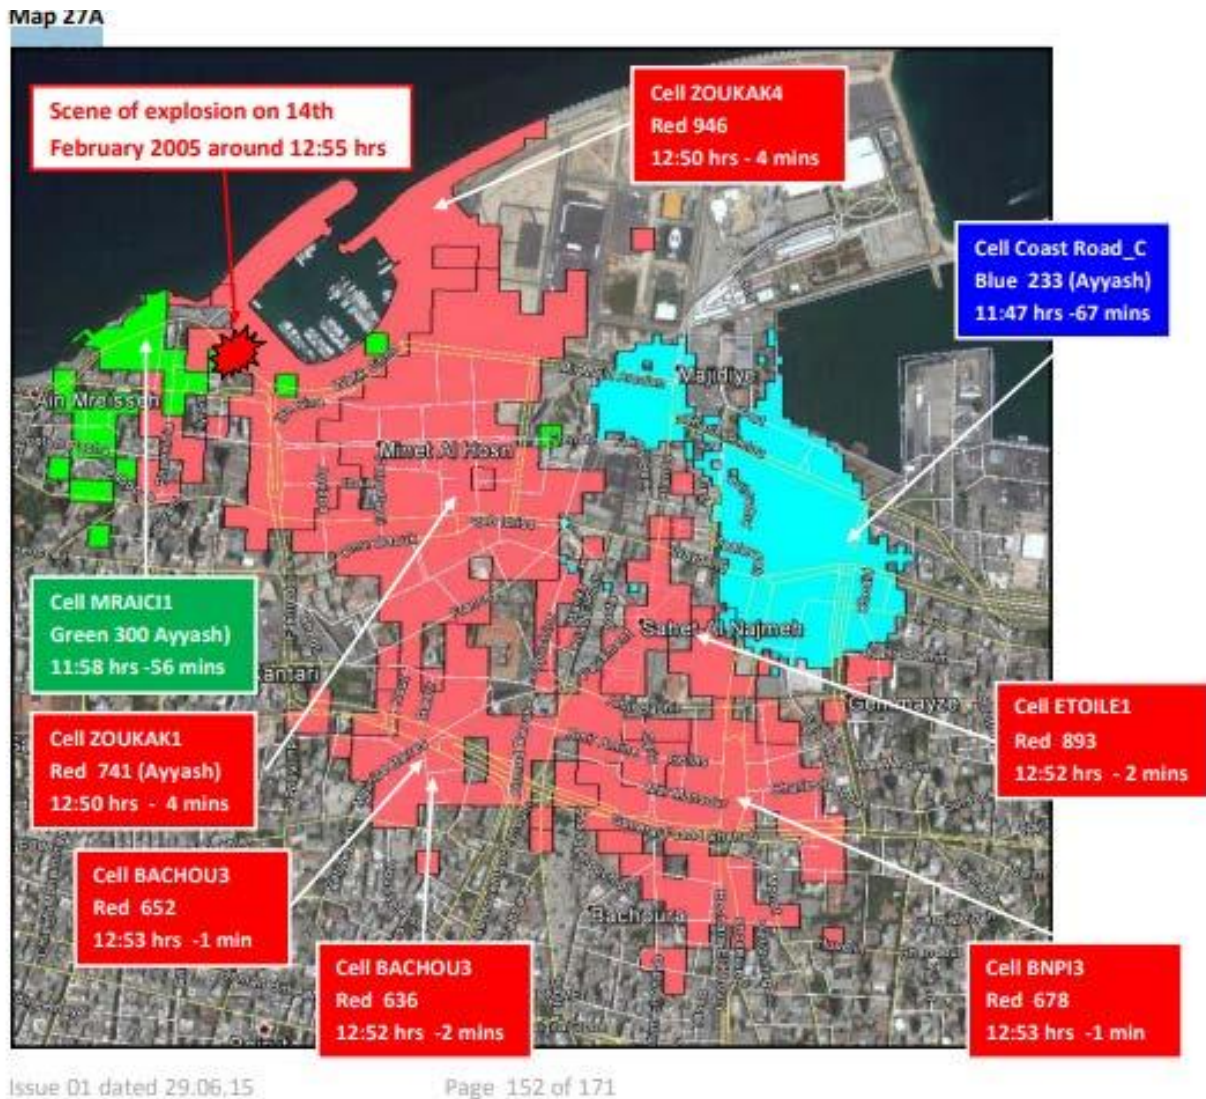

¹¹⁷⁶⁷ Mr Platt and Ms Robyn Fraser testified that images from the tunnel’s last CCTV show that the truck exited and merged onto a side street in front of the Monroe Hotel. For Mr Platt, ‘our contention is’ that the Canter was behind, to the east of the Monroe hotel, after taking a slip road that could be picked up once exiting the St Georges tunnel, in front of the Monroe hotel. Exhibit P49 (Marked image); exhibit P1930.1 (Marked version of exhibit P1930); exhibit P1923.3 (Marked version of slide 100 of exhibit P1923); Gary Platt, T. 14 March 2017, pp 27-31, 36-39; Robyn Fraser, T. 23 January 2014, pp 47-48. *See also* exhibit P1923.6 (EPE snapshots related to exhibit P1923, slide 129).

¹¹⁷⁶⁸ Prosecution submission during Mr Platt’s evidence; Gary Platt, T. 14 March 2017, pp 55-56.

¹¹⁷⁶⁹ Gary Platt, T. 14 March 2017, pp 12-15, 18-19, 48.

van entering the view about a minute earlier. At 12:55:05, the explosion occurred.¹¹⁷⁷⁰ The Red network mobiles were never used again.

6707. The map below, from Mr Philips's report 'Common mission phones?' shows the cells used by six Red mobiles, and Mr Ayyash's Blue 233 and Green 300, near the crime scene and Parliament—the area north-west of central Beirut—in the hour before the explosion.¹¹⁷⁷¹

¹¹⁷⁷⁰ See para. 4627.

¹¹⁷⁷¹ Exhibit P1117 (Expert report of John Edward Philips – Common Mission Phones), map 27A (p. 152).

(c) Prosecution submissions

6708. The evidence is common to all the crimes charged in the amended consolidated indictment. The Prosecution submits that it has proved beyond reasonable doubt that Mr Ayyash is guilty of committing a terrorist act by means of an explosive device.¹¹⁷⁷²

6709. As to Mr Ayyash's intention to commit the crime, the *mens rea*, the Prosecution submits that he participated directly and intentionally in it.¹¹⁷⁷³ His conduct and role demonstrate his underlying intent. Mr Ayyash's contribution to the surveillance activities establishes that he knew Mr Hariri was the main target. His involvement in choosing the Canter and his coordination of the network responsible for guiding the Canter into position just before the detonation of the carried explosive device demonstrates his knowledge of the means of the attack.¹¹⁷⁷⁴

6710. Further, Mr Ayyash's surveillance of, and presence at, the crime scene demonstrates that he necessarily would have foreseen the likelihood that the public explosion would cause additional deaths. This confirms that Mr Ayyash acted with the intention to cause terror.¹¹⁷⁷⁵

(d) Ayyash Defence submissions

6711. The Ayyash Defence in its final trial brief did not directly address each count charged in the amended consolidated indictment, with the exception of the conspiracy. Rather, it attacked the reliability of the Prosecution's telecommunications evidence, including the attribution of mobiles to Mr Ayyash, which underpins all the charges.

6712. According to the Ayyash Defence, the Prosecution failed to prove Mr Ayyash's participation in any of the crimes charged and hence Mr Ayyash's guilt beyond reasonable doubt.¹¹⁷⁷⁶ It submits that the Prosecution has based his alleged participation in the crimes and his criminal intent on content-less calls on mobiles that have not been attributed to Mr Ayyash and unreliable telecommunications evidence and analysis.¹¹⁷⁷⁷

¹¹⁷⁷² Prosecution final trial brief, paras 1124, 1126, 1195.

¹¹⁷⁷³ Prosecution final trial brief, para. 1125.

¹¹⁷⁷⁴ Prosecution final trial brief, para. 1167.

¹¹⁷⁷⁵ Prosecution final trial brief, para. 1167.

¹¹⁷⁷⁶ Ayyash Defence final trial brief, para. 720.

¹¹⁷⁷⁷ Ayyash Defence final trial brief, paras 713-718.

6713. Further, the allegation that Mr Ayyash shared the intent to commit each of the crimes with Mr Badreddine and unidentified others ‘presents the obvious difficulty of proving shared intent with unknown persons’.¹¹⁷⁷⁸

(e) Findings

i. Introduction

6714. The evidence connecting Mr Ayyash with the attack on Mr Hariri stems from his use of mobile Red 741. Without this there would be no evidence linking him with the explosion on 14 February 2005.

6715. The Red network undoubtedly was used in the assassination. It functioned as a closed network that ceased operation immediately before the attack, after having been used in the previous month in the surveillance of Mr Hariri and his convoy’s movements.

6716. It operated extensively on the day of the attack. Red network mobile users were near or in the area of Quraitem Palace just after Mr Hariri had left for the Parliament and they were active in monitoring him at the Parliament, when he was in the Parliament area. They must also have assisted in preparing the Canter for the attack at the crime scene. The Trial Chamber agrees with the Prosecution’s description of the Red network in the amended consolidated indictment and its final trial brief as the ‘assassination team’.¹¹⁷⁷⁹

6717. The evidence—albeit circumstantial—that mobile Red 741 was used by someone involved in the attack is overwhelming. Its movements and calls on Monday 14 February 2005 *vis-à-vis* Mr Hariri, when combined with its presence over four days between Monday 31 January and Saturday 12 February in movements coincidental to Mr Hariri’s, and its calls within a closed network that shut down immediately before the attack, provide proof beyond reasonable doubt of its role in the attack. This is the only inference reasonably available from the totality of the evidence concerning its use and movements. Mr Ayyash’s presence, using his Blue 233, in surveillance of Mr Hariri’s movements on four days between Saturday 29 January and Tuesday

¹¹⁷⁷⁸ Ayyash Defence final trial brief, para. 719.

¹¹⁷⁷⁹ Amended consolidated indictment, paras 15 (a), 22, 24, 32-34, 38-39, 48, 50; Prosecution final trial brief, paras 10-11, 1167.

8 February—and on two of them with both Red 741 and Blue 233—provides further support to this conclusion.¹¹⁷⁸⁰

6718. The Trial Chamber therefore finds that the surveillance of Mr Hariri's movements from at least Saturday 29 January 2005 was connected to the possibility of assassinating him. Consistent with the finding that a decision was made to assassinate him in at least early February 2005—as set out in analysing the conspiracy charge—the Trial Chamber finds that the surveillance in which Mr Ayyash was engaged from at least Thursday 3 February was an act preparatory to the assassination.

6719. It was only through analysing the possible co-location of the mobiles in that network with any other mobiles that the other networks, the Blue, Yellow and Green, were discovered. Further cell site analysis of potentially co-locating mobiles led to the attribution of mobiles to Mr Ayyash, Mr Badreddine and Mr Merhi. Thereafter, cell site analysis apparently led the investigators to Mr Oneissi and Mr Sabra. But it is Red 741 that holds the key to Mr Ayyash's involvement in the attack.

6720. It is thus fair to state that establishing who was using that mobile is the key to determining who bears responsibility for the terrorist attack on Mr Hariri—at least on Monday 14 February 2005—and thus whether the Prosecution has proved its case that Mr Ayyash was one of those responsible as charged in the amended consolidated indictment.

6721. The Trial Chamber, after carefully analysing the cell site evidence relating to Red 741 concluded that it was co-locating and moving in concert with Blue 233, Green 300 and with Mr Ayyash's personal mobiles 091 and 170, and that these mobiles had a single user, namely, Mr Ayyash. Mr Ayyash was also using Yellow 294.¹¹⁷⁸¹ The Trial Chamber has also found that the Red, Yellow, Green and Blue networks were connected and at least some of the users of the Red, Yellow, Green and Blue networks had a common mission, namely the assassination of Mr Hariri,¹¹⁷⁸² and that the Red network played a crucial role in executing the attack on 14 February 2005.¹¹⁷⁸³

¹¹⁷⁸⁰ The total is six days, Mr Ayyash was using both his Blue 233 and Red 741 on 31 January and 8 February 2005.

¹¹⁷⁸¹ See paras 3411-3412.

¹¹⁷⁸² See paras 2423, 4669, 4736.

¹¹⁷⁸³ See para. 4670.

6722. The issue is whether this is sufficient to establish beyond reasonable doubt his alleged culpability in committing the offences charged in the amended consolidated indictment.

ii. *Actus reus* for terrorism

6723. The Trial Chamber has found that a rectangular charge of 2,500 to 3,000 kilograms of TNT equivalent high explosives material, situated on the rear of a Mitsubishi Canter, was detonated on 14 February 2005. This was self-evidently an explosive device and therefore one of the physical means that Article 314 of the Lebanese Criminal Code specifies as liable to create a public danger.¹¹⁷⁸⁴

6724. The Trial Chamber has also found that the explosion on 14 February 2005 was a terrorist act within the meaning of Article 314 of the code.¹¹⁷⁸⁵

6725. Under Lebanese case law, a co-perpetrator may have either performed a physical act necessary to commit the crime, or have made some other direct contribution to the crime's execution.¹¹⁷⁸⁶ Different actions can constitute the co-perpetration of terrorist acts, intentional homicide and attempted intentional homicide, including planning and supervising the acts of other co-perpetrators.¹¹⁷⁸⁷

6726. The question here is not whether Mr Ayyash detonated the explosive with his own hands—which he did not—but whether his actions directly contributed to the execution of the crime, thereby satisfying the *actus reus* for co-perpetration of a terrorist act.

6727. On 14 February 2005, the Red mobiles tracked the movement of Mr Hariri and his convoy, alerted other members of the Red network to his location and prepared for the surveillance and for the execution of the attack along the route that he was expected to take. These actions were necessarily aimed at ensuring that the explosives detonated at the exact point when the convoy would pass.

6728. Three Red mobiles were active in the area of Quraitem Palace in the morning before the attack. Six were then active in the Parliament and crime scene areas. During the last two hours

¹¹⁷⁸⁴ See para. 6331.

¹¹⁷⁸⁵ See para. 6330.

¹¹⁷⁸⁶ See paras 6028-6029.

¹¹⁷⁸⁷ See para. 6031.

before the attack, there were 33 calls between the six Red mobiles. Significantly, between 12:49:33 and 12:53:42, Red 741, Red 636, Red 678, Red 946, Red 893 and Red 652 were involved in the final seven calls of the Red network. The explosion that killed Mr Hariri and others occurred at 12:55:05. After the explosion, the mobiles in the Red network were never used again.¹¹⁷⁸⁸

6729. The only reasonable inference available from the evidence is that, on 14 February 2005, the Red mobiles tracked the movement of Mr Hariri and his convoy, alerted the others of his location and prepared for surveillance and for the execution of the attack along the route that he was expected to take. This must have also aimed at ensuring that the explosive detonated at the exact time the convoy would pass. The users of Red mobiles had prepared the attack through repeated operations of surveillance and reconnaissance in previous days.

6730. On the evidence received, as set out in analysing the conspiracy in sub-section (B) ‘Conspiracy to commit a terrorist act (Count 1)’ above, the Trial Chamber is satisfied that Mr Ayyash had a central role in the execution of the attack on Monday 14 February 2005. The mission was to assassinate Mr Hariri. Mr Ayyash participated in the preparations for the attack from at least sometime in early February 2005, until four minutes before its completion. His last call, of ten seconds on Red 741, occurred at 12:50:55.¹¹⁷⁸⁹

6731. Blue 233 had contact with the highest number of the other Blue mobiles and, along with another Blue mobile, the most calls between 14 January and 14 February 2005.¹¹⁷⁹⁰ Mr Philips concluded that Mr Ayyash, as the user of Blue 233, was a “senior” member of the *Blue Phone Group* or ‘quite possibly the “leader” of the group’.¹¹⁷⁹¹ He also concluded that the user of Green 300, Red 741 and Blue 233—representing the only use of three what he termed ‘mission phones’, meaning network mobiles by a single person—had to be a ‘dominant player’.¹¹⁷⁹²

¹¹⁷⁸⁸ See para. 2272.

¹¹⁷⁸⁹ That Red 741 received from Red 893.

¹¹⁷⁹⁰ Exhibit P1117 (Expert report of John Edward Philips – Common Mission Phones), para. 5.2.18.3.

¹¹⁷⁹¹ Exhibit P1117 (Expert report of John Edward Philips – Common Mission Phones), paras 5.5.2.4, 5.6.2.14, referred to as ‘Suspect 1’; exhibit P1111 (Expert report of John Edward Philips – Single user analysis, Suspect 1, Mr Ayyash).

¹¹⁷⁹² Exhibit P1117 (Expert report of John Edward Philips – Common Mission Phones), p. 4, while concluding that ‘whilst, given their relationship with Green 023, Green 023 would appear to be at the top of any hierarchy and therefore the head of any command structure’. At para. 5.6.2.14 on p. 57, Mr Philips drew the following conclusion in relation to ‘Mission hierarchy’: ‘One pair of these mobile phones features Blue 233 which, based upon usage, is quite possibly the ‘leader’ of the group of *Blue Phones* and this would appear to be supported by this pair of *Red* and *Blue Phones* also having a common user with that of Green 300, the only pair of mobile phones to do so’.

6732. The Trial Chamber accepts this to the extent that Mr Ayyash's use of Red 741 on Monday 14 February, in combination with his participation in surveillance of Mr Hariri's movements in the preceding weeks using that mobile and Blue 233, reveals his leading role in the assassination. It is only through working backwards from Mr Ayyash's use of Red 741 on 14 February that his role in the attack can be established. This includes his surveillance activities using either Red 741 or Blue 233, or both, on six occasions between 29 January and 12 February, as seen in their context, the only reasonable inference available from the totality of the evidence is that they were preparatory to the attack.

6733. The Trial Chamber, as is set out above, is not convinced of the pleaded role of the Green network in the assassination. Thus, in this respect it partially accepts Mr Philips's opinion. It does not consider that Mr Philips's opinion that Mr Ayyash was a 'dominant player' is predicated on the combination of the use of Red and Blue *and* Green network mobiles. In the Trial Chamber's view, Mr Ayyash's use of the Blue and Red network mobiles in the period leading to the attack suffices to provide the necessary inferences beyond reasonable doubt.

6734. On that day, Mr Ayyash was physically present in the area between Parliament and the crime scene and in the crime scene area.¹¹⁷⁹³ His Red 741 mobile was the only mobile that, on the day of the attack, was in contact with all the other Red mobiles,¹¹⁷⁹⁴ namely those in the Parliament area throughout a large part of the operation and those closer to the crime scene.

6735. The Trial Chamber is aware that, according to the expert evidence, apparently there was no single dominant mobile in the Red network. Further, while Mr Philips identified Red 741 as the most dominant of the Red mobiles on 20 January and 11 February 2005—on the latter day together with two other Red mobiles—Red 652 was 'the most dominant' on 14 February 2005, with its user being involved in about 50 per cent of the calls in that network.¹¹⁷⁹⁵

¹¹⁷⁹³ Mr Platt testified that the mobiles attributed to Mr Ayyash took a more active role in the actual surveillance operations—on the ground rather than coordinating the operations remotely—from 31 January 2005, Gary Platt, T. 7 March 2017, p. 22.

¹¹⁷⁹⁴ Compare exhibit P1259 (Call sequence table of ten numbers—Mr Ayyash), p. 364, with exhibit P1198 (Call sequence table of Red 893), p. 6, exhibit P1199 (Call sequence table of Red 652), p. 6, exhibit P1202 (Call sequence table of Red 946), p. 4, exhibit P1203 (Call sequence table of Red 636), pp 3-4 and exhibit P1204 (Call sequence table of Red 678), p. 6.

¹¹⁷⁹⁵ Exhibit P1114 (Expert report of John Edward Philips – Red mission phones), paras 6.3.4.4-6.3.4.6, 6.3.12.7-6.3.12.9, 6.3.14.7.

6736. The Trial Chamber has however considered that, according to Mr Philips's evidence, several factors are relevant to identify a dominant number. These include the call volume, whether a number had contacts 'with the most numbers' of a certain network or whether 'often all calls routed' via that number. Mr Philips, for example, considered that, in a certain period, Blue 233 had contact with the highest number of the other Blue mobiles before concluding that its user was a senior member of the Blue network, if not its leader.

6737. The Trial Chamber has considered that Red 741 was the only mobile that, on the day of the attack, was in contact with all the other Red mobiles. In the totality of the circumstances, which includes the movements of Red 741 and its call patterns, the Trial Chamber has concluded that this mobile had a central role in the attack.

6738. It has also factored in that the call from Mr Ayyash's Red 741 to Subject 6 (Red 678), at 11:33:33, was followed within a very short time by calls from Subject 6 (on Red 678) to two other Subjects—Subject 8 (on Red 893) and Subject 9 on (Red 652)—at 11:34:31 and 11:35:05.

6739. In the Trial Chamber's view, this call from Red 741 at 11:33:33 must have triggered the relocation of the other three from the vicinity or area of Quraitem Palace to the Parliament and crime scene areas, thus substantially launching the beginning of the operation.

6740. Despite Mr Hariri having already left Quraitem Palace at approximately 10:45—to reach Parliament at around 10:54—Subject 8 (Red 893), Subject 9 (Red 652) and Subject 6 (Red 678) moved from the area of Quraitem Palace to the area of the Parliament or the crime scene area only around an hour later. This was by 11:48, 11:49 and 11:53, respectively. The Trial Chamber is satisfied that the evidence taken in its totality establishes—and it accepts Mr Platt's expert evidence on this point—that Mr Ayyash coordinated the movement of the three other Red mobiles' users.

6741. Accordingly, the Trial Chamber also finds that Mr Ayyash directly contributed to the execution of the crime of a terrorist act through his central and leading role in the execution of the attack. The Prosecution has not proved, for the reasons described below, Mr Ayyash's or the other Red mobiles' users' role in specific aspects of the operation—namely escorting or ensuring that the Canter carrying the explosive device was placed at the crime scene or its purchase. This,

however, does not affect the Trial Chamber's overall conclusion that Mr Ayyash directly participated in committing the crime charged.

6742. The evidence cannot categorically establish that the white truck in the CCTV footage exiting from the President Suleiman Frangieh tunnel, just before 11:57, and passing the Phoenicia Hotel and HSBC Bank, was a Mitsubishi Canter.¹¹⁷⁹⁶ Although it is highly likely that the white truck was the Canter used in the explosion, no witness could identify it as a Canter.

6743. The Trial Chamber therefore cannot conclusively accept Mr Platt's opinion that the Canter *may* have been stationed in a slip road close to the Monroe Hotel before moving to the crime scene. It is one possibility but the evidence is equivocal. Mr Platt's opinion relies on or assumes that the white truck in the CCTV images was the Mitsubishi Canter. This also applies to the possible roles of Mr Ayyash or the users of other Red mobiles.

6744. The Trial Chamber posed the following question to the Prosecution before its closing final trial submissions in court:

At paragraphs 1078 to 1080, the brief refers to CCTV (closed circuit television) footage of what could be the Mitsubishi canter allegedly carrying the explosives that were used in the attack. Does the Trial Chamber have to be satisfied beyond reasonable doubt that the canter is in fact depicted in the evidence referred to here?¹¹⁷⁹⁷

6745. The Prosecution responded that was not an essential fact for conviction, namely, it is not a material fact of which the Trial Chamber needs to be satisfied beyond reasonable doubt.¹¹⁷⁹⁸ The Trial Chamber agrees.

6746. While the evidence does not establish that the truck in the CCTV footage was the Canter used in the explosion, the Trial Chamber is satisfied regardless—for the reasons illustrated above—that Mr Ayyash's conduct suffices to constitute the *actus reus* of committing the act of terrorism charged.

¹¹⁷⁹⁶ See para. 1288.

¹¹⁷⁹⁷ Questions for closing submissions, para. 19.

¹¹⁷⁹⁸ Prosecution closing submissions, T. 13 September 2018, pp 103-104.

6747. As to the other Prosecution submissions that Mr Ayyash coordinated the purchase of the Canter used to carry the explosive device, the Trial Chamber is also not satisfied that the Prosecution has proved this.¹¹⁷⁹⁹ The Trial Chamber found that obtaining the Canter was part of the plot to commit the attack and kill Mr Hariri and that it is plausible that the network activity in Tripoli on certain dates in January 2005 related to obtaining the Canter in order to use it in the attack.¹¹⁸⁰⁰

6748. In particular, calls on 25 January 2005 were consistent with the user of Blue 610, attributed to Subject 6, in Tripoli, informing Mr Ayyash that the Canter had been purchased, and that Mr Ayyash in turn informed Mr Badreddine of this fact. If this is in fact what occurred. However, ‘consistency with’ something and proof are different matters. Consequently, the Trial Chamber was unable to find conclusively either that the Canter was purchased that day, or that any particular network mobile user had a role in the Canter’s purchase.¹¹⁸⁰¹

6749. The Trial Chamber is not of the view that Mr Ayyash’s alleged role in purchasing the Canter in Tripoli is a material pleaded fact that is indispensable to a conviction. Whether it is viewed as evidence supporting a pleaded material fact, namely, that Mr Ayyash was using Red 741, which was used in the attack, or a material fact is immaterial in the circumstances. The evidence of Mr Ayyash’s mobile use on 14 February 2005 provides the necessary proof beyond reasonable doubt of his involvement in the attack.

6750. The Trial Chamber is also not satisfied, for the reasons elaborated above, that the Prosecution has proved that the Green network functioned as ‘mission command’.¹¹⁸⁰² It is not satisfied that the pleaded so-called ‘hierarchical call flows’ from the Green network to the Blue and Red networks proved a reporting or supervisory relationship between Mr Badreddine and Mr Ayyash and other users of the Blue and Red network mobiles. This, however, does not matter for the purposes of the finding here. There is sufficient evidence, from Mr Ayyash’s actions on 14 February 2005, to prove his involvement in the attack, irrespective of the role of the pleaded Green network.

¹¹⁷⁹⁹ See para. 4795.

¹¹⁸⁰⁰ See para. 4795.

¹¹⁸⁰¹ See paras 4792, 4795.

¹¹⁸⁰² See para. 4743.

6751. The Trial Chamber finds that, by the actions detailed above, the conduct of the Red mobiles' users directly contributed to the execution of the crime and therefore establishes the *actus reus* for committing a terrorist attack by means of an explosive device. Mr Ayyash, on his Red 741, directly contributed to and had a central role in its execution¹¹⁸⁰³ by directly participating in it from the Parliament and the crime scene areas on 14 February 2005 and by contributing to its preparation in previous days.

6752. Further, the preparatory acts of surveillance of Mr Hariri, at least in February 2005, in which Mr Ayyash participated using both his Red and Blue mobiles, also support this finding.

6753. However, proof that his actions equate to criminal responsibility for the crime also depends upon his knowledge of what he was doing and his intention, or *mens rea*.

iii. *Mens rea* for committing a terrorist act

6754. The subjective or mental element for committing a terrorist act includes two parts: the first is knowledge that the act is to be committed using an explosive device that is liable to create a public danger, and the second is an intention to cause a state of terror. This is a specific intention, or *dolus specialis*.¹¹⁸⁰⁴

6755. The call patterns of Red 741 on Monday 14 February 2005 prove that Mr Ayyash was coordinating the operation on the ground. The Canter had to have been somewhere near the crime scene while Mr Hariri was at the Parliament, given the few minutes it was going to take his convoy to travel the distance between there and the St Georges Hotel. When Mr Ayyash was near the Parliament he made calls at strategic moments to those who must have been near the Canter.

6756. This must have been to communicate that it should be manoeuvred into position when the convoy passed. Mr Ayyash also called those who were at Quraitem Palace just after Mr Hariri had left, and who most probably had been engaged in surveillance of Mr Hariri, although, as Mr Platt

¹¹⁸⁰³ For further details see chapter 'Chronology of network mobile activity before Mr Hariri's assassination on Monday 14 February 2005', (C) (3) (b) 'Network activity'.

¹¹⁸⁰⁴ See para. 6175.

noted, they may have been there for ‘operational reasons’.¹¹⁸⁰⁵ Mr Ayyash was also himself placed in strategic positions, and finally close to the crime scene.

6757. As Mr Platt noted, at this point the Red network mobiles did not have to follow Mr Hariri’s convoy. They knew where it was travelling and what was going to happen to it.

6758. In respect of his calls to those who must have been near or with the Canter, they must have been near the St Georges Hotel for a period before the explosion. Mr Hariri’s convoy had a choice, generally, of taking one of two routes between the Parliament and his residence. The Canter was loaded with 2.5 tonnes of explosives and would have needed sufficient advance warning to move into position as it was something that could only be done slowly and with care. And as the convoy was taking the coastal route and would have to pass the hotel, the Canter had to have been positioned so as to be near when the convoy passed. It would have had to have been ready to move and for the suicide bomber to have been situated to be in a position to detonate the charge at the correct moment.

6759. This required someone, who was near the Parliament observing Mr Hariri, alerting those responsible for ensuring the Canter was in position that the convoy was leaving. That person would presumably also have informed those who were with the Canter of where Mr Hariri’s vehicle was in the convoy and that he was as usual driving himself.

6760. It took the convoy less than five minutes to travel from outside the Parliament to the St Georges Hotel. The Red network users, having spent some time in the previous month observing the convoy’s routes and movements, which would have included things such as the order in which vehicles drove and its usual security practices, would have known how it typically behaved. The Blue network users had engaged in mobile surveillance of the convoy as it travelled along the coastal route between Quraitem Palace and Faqra Villa and the way back.¹¹⁸⁰⁶ The Red mobile users in the Parliament and the crime scene areas must have known how long the convoy would

¹¹⁸⁰⁵ Gary Platt, T. 13 March 2017, pp 43-44. He could not exclude, however, that they were already *in situ* there before making the calls.

¹¹⁸⁰⁶ Mr Hariri had attended Parliament on 27 January and 8 February 2005. On 27 January, the security convoy used the coastal route to travel to Parliament, but there was no evidence of the return route. On 8 February—when mobile surveillance occurred—the convoy took the ‘inland’ route, Gary Platt, T. 22 February 2017, pp 17-18, 22, 26-27, T. 7 March 2017, pp 46, 57.

need to reach the hotel from the Parliament, based upon its usual behaviour, including its normal speed, and that it had to slowly traverse a bend near the hotel.

6761. Thus, the assassination team members would have known how much time they had between Mr Hariri's departure from the Parliament and having the Canter ready to move into position. This should also have included sufficient time for those assisting the Canter driver to move themselves to a safe distance from the scene. The quickest and most logical way of doing this would have been by motorbike which could have been maybe a kilometre away, and thus potentially out of harm's way, within less than a minute. As Mr Platt noted, motorbikes, due to their flexibility, are used quite extensively in surveillance, and could have been used by Subjects 5 and 7 on the day.¹¹⁸⁰⁷

6762. There is no direct evidence of either Mr Ayyash's knowledge or his intention to commit a terrorist act by means of an explosive device. Mr Ayyash's mental state, as is normal in prosecutions relying on circumstantial evidence, can only be inferred from his proven actions. These are detailed above.

6763. The only reasonable inference available from the totality of the evidence is that Mr Ayyash, by virtue of his actions on the day of the attack, must have known that Mr Hariri was to be murdered by an explosion in a VBIED in a public place and exactly where it was to occur. He must have been aware of the circumstances in which the device was to have been detonated, including that its detonation was intended on a public street, in the middle of a weekday, as Mr Hariri's convoy passed along a busy road.

6764. Inevitably, by virtue of its detonation at that time and place, an explosion of that nature and one killing Mr Hariri in particular, was going to create a state of terror. In this respect, the Trial Chamber has also taken into account that the target of the attack, Mr Hariri, was a prominent political figure whose assassination was likely to, and in fact did, cause feelings of fear, insecurity and loss among the Lebanese people. The Trial Chamber heard abundant evidence during the trial of the assassination's negative effect on Lebanon. Mr Ayyash, in participating in the plan to murder Mr Hariri, must have known this; no other inference is reasonably available from the evidence.

¹¹⁸⁰⁷ Gary Platt, T. 14 March 2017, pp 8-9.

6765. This provides the evidence of his specific intention to commit the terrorist act as charged. The only conclusion available from the totality of the evidence therefore is that Mr Ayyash by his actions intended to commit a terrorist act by means of an explosive device.

6766. The Prosecution also positively submitted of Mr Ayyash that:

His involvement in choosing the Canter Van demonstrates knowledge of the means of the Attack through a VBIED, as does his co-ordination of the network responsible for guiding the VBIED into position just prior to its detonation.¹¹⁸⁰⁸

6767. This submission relies upon a positive finding that Mr Ayyash was involved in the Canter's purchase and with knowledge of its intended use in the attack. The evidence concerning Mr Ayyash's alleged 'involvement in choosing the Canter Van', however, is weak. Additionally, it does not follow logically, and the evidence does not establish, that whoever bought the Canter must have known at the time of its purchase—namely, in mid to late January 2005—that it was intended to be turned into a VBIED for the purpose of assassinating Mr Hariri.

6768. However, legally and factually, there was no need to prove that he was involved in the Canter's purchase nor in preparing the false claim of responsibility. Mr Ayyash's actions on Monday 14 February 2005 in combination with his actions in the previous weeks suffice to provide the necessary evidence of his knowledge and thus his intention. His involvement in the surveillance of Mr Hariri's movements in the weeks before the assassination, and at the latest from 3 February 2005, is corroborative of his actions on Monday 14 February 2005. The Trial Chamber is satisfied that the surveillance was a necessary preparatory act for the assassination. The only inference reasonably available from the evidence is that Mr Ayyash, using his Red and Blue network mobiles, participated in it knowing that the surveillance was part of the plan to assassinate Mr Hariri.

6769. The Trial Chamber is therefore satisfied beyond reasonable doubt that Mr Ayyash possessed the requisite knowledge that the explosive device was liable to create a public danger. That is the only conclusion that is reasonably available from the evidence. The Trial Chamber therefore concludes that Mr Ayyash possessed the *mens rea* to commit a terrorist act.

¹¹⁸⁰⁸ Prosecution final trial brief, para. 1167.

6770. Accordingly, the Trial Chamber finds Mr Ayyash guilty, as a co-perpetrator, of terrorism (count two) under Articles 188, 212, 213 and 314 of the Lebanese Criminal Code and Article 3 (1) (a) of the Statute of the Special Tribunal.

4. Counts three, four and five—intentional homicide and attempted intentional homicide

6771. Each of counts three, four and five aver that Mr Ayyash committed intentional homicide or attempted intentional homicide. The evidence underlying each count is identical, but the counts have different legal elements. For this reason, the Trial Chamber has assessed the legal elements separately.

6772. The wording of the pleading of these counts in the amended consolidated indictment, however, is slightly inconsistent. Count three, of the intentional homicide of Mr Hariri with premeditation by using explosive materials, pleads in paragraph 58 that Mr Ayyash committed the offence with Mr Badreddine, and that:

- c. each bearing individual criminal responsibility as co-perpetrators with shared intent to cause Rafik HARIRI's death and by knowingly bringing about the detonation of a large explosive device resulting in his death,
- d. committed the intentional homicide of Rafik HARIRI,

6773. As an aggravating circumstance, which is applicable on sentence, premeditation is pleaded, and added to this is a pleading of committing the offence, that:

- e. ii. by knowingly bringing about the detonation at 12:55 at Rue Minet el Hos'n Beirut, Lebanon, of explosives equivalent to approximately 2500 kilogrammes of TNT that may cause death.

6774. This pleads that as an aggravating circumstance Mr Ayyash knew of the approximate quantity and type of explosives used in the attack.

6775. Count four, of the intentional homicide with premeditation and by using explosive materials of the 21 others who died as a result of the explosion, however, pleads in paragraph 60 that Mr Ayyash committed this offence in the following manner:

- e. by using a large quantity of explosive materials in a public place with shared intent and premeditation to commit the intentional homicide of former Prime Minister, and leading political figure, Rafik HARIRI, within his motor convoy,

[and]

- h. by then knowingly bringing about the detonation at 12:55 at Rue Minet el Hos'n, Beirut, Lebanon, being a public street, of explosives equivalent to approximately 2500 kilogrammes of TNT that may cause death.

6776. For this count the aggravating circumstances are described as premeditation and 'by bringing about the said detonation of explosive materials', without specifying Mr Ayyash's knowledge of their type or approximate quantity.

6777. In count five, which is the attempted intentional homicide with premeditation by using explosive materials of 226 people, repeats this pleading at paragraph 62, and with the same aggravating circumstances:

- d. by using a large quantity of explosive materials in a public place with shared intent and premeditation to commit the intentional homicide of former Prime Minister, and leading political figure, Rafik HARIRI, within his motor convoy,

[and]

- g. by then knowingly bringing about the detonation at 12:55 at Rue Minet el Hos'n, Beirut, Lebanon, of explosives equivalent to approximately 2500 kilogrammes of TNT that may cause death.

6778. It would appear that the Prosecutor, in the amended consolidated indictment, is pleading on one hand, for the charge of the intentional homicide of Mr Hariri, that Mr Ayyash knew only that the quantity of explosives was large. However, on the other hand, for the charges of the intentional homicide of the additional 21 people and the attempted intentional homicide of 226 others, the Prosecutor is alleging that Mr Ayyash had specific knowledge, but not as an aggravating feature, of the type and approximate quantity of explosives used in the attack.

6779. These pleadings go to Mr Ayyash's *mens rea*, or intention, and thus what the Prosecutor must prove beyond reasonable doubt to establish his guilt.

6780. Thus, the literal wording of the amended consolidated indictment requires the Trial Chamber to consider whether the Prosecutor has proved that Mr Ayyash knew that the Canter contained 'explosives equivalent to approximately 2500 kilogrammes of TNT' in respect of counts four and five. However, it need only consider this in count three for the purposes of aggravation in sentencing.

6781. Why the Prosecutor chose to plead Mr Ayyash's specific knowledge of the type and quantity of explosives used is unclear, given that the Prosecution led no evidence capable of establishing this. Premeditation and use of explosive material are not elements of the crime of intentional homicide under Lebanese law, but are aggravating factors in sentencing a convicted offender.¹¹⁸⁰⁹ Resolution of this matter is thus one for sentencing proceedings.

- (a) Count three—Intentional homicide of Mr Rafik Hariri with premeditation by using explosive materials

6782. Mr Ayyash is charged under count three of the amended consolidated indictment with having committed as a co-perpetrator—with the former Accused, Mr Badreddine, and others unidentified—the crime of intentional homicide of Mr Hariri with the aggravating circumstances of premeditation and using explosive materials equivalent to approximately 2,500 kilogrammes of trinitrotuene (TNT).¹¹⁸¹⁰ The Prosecutor specifies in count three of the amended consolidated indictment that Mr Ayyash, Mr Badreddine and others unidentified:¹¹⁸¹¹

- c. each bearing individual criminal responsibility as co-perpetrators with shared intent to cause Rafik HARIRI's death and by knowingly bringing about the detonation of a large explosive device resulting in his death,
- d. committed the intentional homicide of Rafik Hariri
- e. in the aggravating circumstances of

¹¹⁸⁰⁹ See para. 6273.

¹¹⁸¹⁰ Amended consolidated indictment, paras 57-58. The amended consolidated indictment refers to Article 3 (1) (a) of the Special Tribunal's Statute and Articles 188, 212-213, 547 and 549 (1) and (7) of the Lebanese Criminal Code.

¹¹⁸¹¹ Amended consolidated indictment, para. 58.

- (i) premeditation, and
 - (ii) by knowingly bringing about the detonation at 12:55 at Rue Minet el Hos'n Beirut, Lebanon, of explosives equivalent to approximately 2500 kilogrammes of TNT that may cause death.
- i. Prosecution submissions

6783. The Prosecution submits that it has proved Mr Ayyash's guilt beyond reasonable doubt.¹¹⁸¹² It argues that Mr Ayyash was using mobiles from each of the networks involved in the attack. He coordinated and participated in the surveillance of Mr Hariri from the very early stages of preparation of the attack until its execution. He coordinated the purchase of the Canter used to carry the explosive device. He also coordinated the execution of the attack from the vicinity of the crime scene on 14 February 2005.¹¹⁸¹³

6784. These activities, in the Prosecution's submission, establish beyond reasonable doubt that Mr Ayyash played a principal and direct role in the commission of the attack and thus is responsible as a co-perpetrator of the underlying crimes.¹¹⁸¹⁴

6785. In particular, he participated in and coordinated the surveillance of Mr Hariri directly before his assassination on 14 February 2005. He also coordinated the placement of the Canter carrying the explosive device, enabling the detonation of the explosives to kill Mr Hariri and the others, as well as the execution of the attack.¹¹⁸¹⁵

6786. Specifically, regarding Mr Ayyash's acts on the day of the attack, the Prosecution argues that there was an overnight concentration of activity by Mr Ayyash on the Blue network. With his call on Blue 233 call at 10:50 to Blue 585 while he was *en route* to the crime scene, where he converged with Subject 5, the user of both Red 636 and Blue 585. This reinforces the direct significance of Mr Ayyash's role in ensuring that the Canter was in place at the crime scene before the arrival of Mr Hariri's convoy.¹¹⁸¹⁶

¹¹⁸¹² Prosecution final trial brief, paras 1124, 1126, 1195.

¹¹⁸¹³ Prosecution final trial brief, para. 1162.

¹¹⁸¹⁴ Prosecution final trial brief, para. 1163.

¹¹⁸¹⁵ Prosecution final trial brief, para. 1166.

¹¹⁸¹⁶ Prosecution final trial brief, paras 975-976, 978.

6787. At 11:33, Mr Ayyash, on Red 741, called Subject 6 (Red 678's user). This triggered Subject 6's calls to Red 893 and Red 652 to move to the vicinity of *Place de l'Étoile* where Mr Hariri was. In this way, Mr Ayyash 'was making sure that the Red Phones would be well placed to update him on Hariri's movements after he exited the Parliament'.¹¹⁸¹⁷

6788. Subject 5 (Red 636's user) who was using a cell in the vicinity of the President Suleiman Frangieh tunnel,¹¹⁸¹⁸ called Mr Ayyash one minute after 'the Mitsubishi Canter Van was recorded on CCTV camera travelling through the ... tunnel', to announce his arrival and receive further directions.¹¹⁸¹⁹ Mr Ayyash therefore 'was able to confirm his own direct observations that the bomb had physically arrived in the immediate vicinity of the planned location of the Attack'.¹¹⁸²⁰

6789. Mr Ayyash updated Mr Badreddine on this and—knowing that Mr Hariri had yet to depart the Parliament area through calls with the Red mobiles users there—'was in a position to direct the VBIED to turn off and wait as planned, if necessary'.¹¹⁸²¹ According to the Prosecution, the Canter 'waited on the side of the road' until the signal was given to Subject 7, using Red 946, of the moment Mr Hariri departed from café *Place de l'Étoile*.¹¹⁸²²

6790. Only forty seconds after his last contact with Subject 5, Mr Ayyash's Green 300 made a short call to Mr Badreddine's Green 023 to update him that the means of the attack, the Canter carrying the explosives, had arrived in the immediate vicinity of the crime scene.¹¹⁸²³ Mr Ayyash's Green 300 activated a cell in the immediate vicinity of the crime scene.¹¹⁸²⁴ After calling Mr Badreddine, Mr Ayyash immediately joined Subject 7, Red 946's user, 'to wait with the suicide bomber in the side road, receiving updates from the Parliament area ensuring that everything was in place as the suicide bomber was made to wait'.¹¹⁸²⁵ Sixteen seconds after Red 893 gave the signal to Red 946 that Mr Hariri's convoy had left, Red 893 also called Mr Ayyash's Red 741.

¹¹⁸¹⁷ Prosecution final trial brief, para. 981.

¹¹⁸¹⁸ At 11:57:01, Red 636 activated the ZOUKAK2 cell at the beginning of the call and the PHENMB1 cell at the end.

¹¹⁸¹⁹ Prosecution final trial brief, para. 988.

¹¹⁸²⁰ Prosecution final trial brief, para. 990.

¹¹⁸²¹ Prosecution final trial brief, paras 991-992.

¹¹⁸²² Prosecution final trial brief, para. 993.

¹¹⁸²³ Prosecution final trial brief, para. 991.

¹¹⁸²⁴ Prosecution final trial brief, para. 444. Mr Ayyash's Green 300 activated the MRAICI1 cell.

¹¹⁸²⁵ Prosecution final trial brief, para. 996.

That both Red 946 user and Mr Ayyash were called suggests that Mr Ayyash had already separated from Red 946 and the suicide bomber.¹¹⁸²⁶

6791. Relying on the Appeals Chamber's first interlocutory decision on the applicable law and the Lebanese case law, and specifically in the *Murr* and *Karami* cases, the Prosecution submits that someone who plays a principal role in the execution of a crime is guilty as co-perpetrator even if his underlying acts do not constitute an element of the crime.¹¹⁸²⁷ The Prosecution submitted:

Like in the *Michel Murr* case, AYYASH is guilty of helping to plan, supervise, surveil, and prepare the execution of a car bombing, and is therefore responsible as a co-perpetrator for the underlying crimes.¹¹⁸²⁸

6792. Further, Mr Ayyash's 'activities on the day of the assassination were much more pronounced' than those of the accused Mr Khalil Mattar in the *Karami* case.¹¹⁸²⁹ Mr Mattar had knowingly used a device to signal to the perpetrator when Mr Karami's helicopter was passing by a specific location to facilitate the use of explosives to kill him. Based on Mr Mattar's 'activities', the Lebanese Judicial Council requalified his criminal conduct from complicity to direct participation in the underlying crimes of terrorism and intentional homicide.¹¹⁸³⁰

6793. As to Mr Ayyash's intention to commit the crime—the *mens rea*—the Prosecution submits that his contribution to the surveillance activities establishes that he knew Mr Hariri was the main target. Further, Mr Ayyash's involvement in choosing the Canter and his coordination of the network responsible for guiding it into position just before the detonation of the explosive device demonstrates his knowledge of the means of the attack.¹¹⁸³¹

ii. Defence submissions

6794. The Ayyash Defence submits generally that the Prosecution failed to prove Mr Ayyash's guilt beyond reasonable doubt.¹¹⁸³² It submits that the Prosecution has based his alleged

¹¹⁸²⁶ Prosecution final trial brief, para. 999.

¹¹⁸³¹ Prosecution final trial brief, para. 1167.

¹¹⁸³² Ayyash Defence final trial brief, para. 720.

participation in the crimes and his criminal intent on content-less calls on mobiles that have not been attributed to Mr Ayyash and unreliable telecommunications evidence and analysis.¹¹⁸³³

6795. The allegation that Mr Ayyash shared the intent to commit each of the crimes with Mr Badreddine and unidentified others ‘presents the obvious difficulty of proving shared intent with unknown persons’.¹¹⁸³⁴

iii. Findings

a. *Actus reus* for co-perpetration

6796. The Trial Chamber has determined that the acts necessary, or the *actus reus* of intentional homicide consists of the following three elements. These are first: an act or culpable omission aimed at impairing the life of another person; second, the result of the death of a person; and third, a causal connection between that conduct and the death. It decided that killing Mr Hariri on 14 February 2005 satisfied the *actus reus* of intentional homicide.¹¹⁸³⁵

6797. In analysing the applicable law, the Trial Chamber also decided, based on Lebanese case law, that a co-perpetrator may have done either a physical act necessary to commit the crime, or made some other direct contribution to the execution of the crime.¹¹⁸³⁶

6798. The Lebanese courts have considered what suffices to establish the *actus reus* for co-perpetration of intentional homicide in the context of an assassination operation that included multiple participants. These include, recruiting others to execute the scheme of killing the victims and coordinating their actions; participating personally in reconnaissance operations for the crime; tracking the victim’s passage; and alerting other co-perpetrators of his location.¹¹⁸³⁷

6799. Neither Mr Ayyash nor any of the Red mobiles’ users physically perpetrated the crime in the sense of detonating the explosion—the Trial Chamber has found that a suicide bomber triggered the attack and detonated the explosive.¹¹⁸³⁸ However, committing a crime through co-perpetration, according to Lebanese law, is not limited to physical perpetration. Co-perpetration in

¹¹⁸³³ Ayyash Defence final trial brief, para. 713.

¹¹⁸³⁴ Ayyash Defence final trial brief, para. 718.

¹¹⁸³⁵ See paras 6344-6345.

¹¹⁸³⁶ See paras 6028-6029.

¹¹⁸³⁷ See para. 6291.

¹¹⁸³⁸ See para. 1448.

its context here is taking the preparatory steps necessary to ensure that the explosives were detonated when Mr Hariri's convoy passed the chosen spot.

6800. Mr Ayyash did not detonate the explosive with his own hands, so the legal issue is whether his actions directly contributed to the execution of the crime and therefore satisfy the *actus reus* for co-perpetration of intentional homicide. The Trial Chamber, for all the reasons set out above in relation to count two, is satisfied beyond reasonable doubt that they did.

6801. The Trial Chamber has analysed the evidence proving Mr Ayyash's actions and intention, namely, his *mens rea* and *actus reus*, in its findings above concerning count two, with committing a terrorist act by means of an explosive device.

6802. The evidence supporting all counts is the same. The terrorist act was aimed at killing Mr Hariri in a public place with an explosive device. The only real difference in the legal elements required to satisfy the crimes charged in counts two (the terrorist act) and three and four (intentional homicide) is that for count two the Prosecution must prove a specific intention in relation to the terrorist act. Count five (attempted intentional homicide) has a separate legal element of *dolus eventualis*, or an acceptance of a probable outcome, here being the likely death of people other than Mr Hariri. In the circumstances of this case, the same evidence establishes the legal *mens rea* for counts two to five. That is, detonating a large explosion—aimed at a motor convoy—in a public place that was crowded with people.

6803. Mr Ayyash was the user of Green 300, Red 741, Blue 233 and Yellow 294 during the relevant periods.¹¹⁸³⁹ The Red, Yellow, Green and Blue networks were connected and at least some of the users of the Red, Yellow, Green and Blue networks had a common mission, namely the assassination of Mr Hariri.¹¹⁸⁴⁰ The Red network played a crucial role in executing the attack on 14 February 2005.¹¹⁸⁴¹

6804. The only reasonable conclusion available from the evidence is that, on Monday 14 February 2005, the Red mobiles tracked the movement of Mr Hariri and his convoy, alerted the others involved of his location and prepared for surveillance and for the execution of the attack

¹¹⁸³⁹ See para. 3411.

¹¹⁸⁴⁰ See paras 2423, 4669, 4736.

¹¹⁸⁴¹ See para. 4670.

along the route that he was expected to take. This must have also aimed at ensuring that the explosive detonated at the exact time the convoy would pass. The users of the Red mobiles had prepared the attack through repeated operations of surveillance and reconnaissance in previous days.

6805. The Trial Chamber can infer from Mr Ayyash's actions that he must have been aware of what he was doing. This is the only conclusion reasonably available on the evidence. The evidence establishes that Mr Ayyash had a central role in the execution of the attack. The mission was to assassinate Mr Hariri. Mr Ayyash participated in the preparations for the attack from at least early February 2005 until four minutes before its completion. His last call¹¹⁸⁴² occurred at 12:50:55 and lasted ten seconds.

6806. By these actions, the conduct of the Red mobiles' users directly contributed to the execution of the crime and therefore establishes the *actus reus* for co-perpetration of intentional homicide. The Trial Chamber is therefore satisfied that Mr Ayyash, on his Red 741, directly contributed to the execution of the intentional homicide of Mr Hariri by directly participating in it from the Parliament and the crime scene areas on 14 February 2005 and by contributing to its preparation in previous days.¹¹⁸⁴³

6807. Accordingly, the Trial Chamber also finds that Mr Ayyash's actions directly contributed to the execution of the crime of intentional homicide of Mr Rafik Hariri through his central and leading role in the execution of the attack. Again, the legal issue is whether he knowingly did so and with the requisite intention to commit premeditated intentional homicide with explosive materials.

b. *Mens rea* for intentional homicide

6808. The *mens rea* for intentional homicide under Lebanese law has two parts. The first is the intention to cause death, whether direct or by *dolus eventualis*. The second is knowledge of the circumstances of the offence, including the use of means capable of causing death.¹¹⁸⁴⁴

¹¹⁸⁴² That Red 741 received from Red 893.

¹¹⁸⁴³ Prosecution final trial brief, para. 1162.

¹¹⁸⁴⁴ See paras 6298-6299.

6809. The Prosecutor specifically charged that Mr Ayyash and Mr Badreddine knowingly brought about the detonation of the explosives that killed Mr Hariri. In their context here, the words ‘bringing about’ must mean ‘causing’. Their knowledge that it was a ‘large explosive device’ is pleaded.

6810. Again, there is no direct evidence of Mr Ayyash’s knowledge or intention. It must be inferred from the totality of the evidence. Using the same reasoning employed for the findings in relation to count two above, the Trial Chamber finds that the evidence proves beyond reasonable doubt that Mr Ayyash intended to kill Mr Hariri and had the requisite knowledge about the circumstances of the offence. This is the only conclusion reasonably available from the evidence.

6811. Mr Ayyash was the user of a mobile in the networks that the Trial Chamber has found were involved in Mr Hariri’s assassination, namely, the Red and Blue networks. He also used a Yellow mobile and was one of three users in the Green network. The Trial Chamber has found that, through his mobiles, Mr Ayyash was in contact with other network mobiles during mobile surveillance operations of Mr Hariri’s movements and therefore contributed to them.

6812. The only reasonable inference available from the evidence is that Mr Ayyash was aware of the object of the mission—namely that Mr Hariri was the target of the operation and explosives material were to be used to kill him—and that he intended to kill Mr Hariri.

6813. As to the Ayyash Defence’s general submissions concerning the ‘difficulty of proving shared intent with unknown persons’, the Trial Chamber notes that, in the amended consolidated indictment, the Prosecution pleads ‘each bearing individual criminal responsibility as co-perpetrators with shared intent to cause Rafik HARIRI’s death’.¹¹⁸⁴⁵

6814. However, under Lebanese law, no ‘shared’ intent by co-perpetrators needs to be established. Under Article 547 of the Lebanese Criminal Code ‘Anyone who intentionally kills another person shall be punishable’. Under Article 213 of the code, ‘Each of the co-perpetrators

¹¹⁸⁴⁵ In the tracked-changed version filed on 12 July 2016, the amended consolidated indictment, para. 58, reads: ‘~~MUSTAFA AMINE BADREDDINE and~~ SALIM JAMIL AYYASH,

a. on the 14th day of February 2005,

b. ~~together~~ with Mustafa BADREDDINE and others unidentified,

c. each bearing individual criminal responsibility as co-perpetrators with shared intent to caused Rafik HARIRI’s death and by knowingly bringing about the detonation of a large explosive device resulting in his death’.

of an offence shall be liable to the penalty prescribed by law for the offence'. Therefore, the intent of any other unidentified co-perpetrator is not relevant to determine whether Mr Ayyash had the required *mens rea* for intentional homicide.

6815. In the amended indictment, the Prosecutor used the wording 'shared intent'. This was when Mr Badreddine was an accused in the case and was jointly charged with Mr Ayyash under this count. By pleading 'each bearing individual criminal responsibility as co-perpetrators with shared intent...' the Prosecutor was clearly referring to each of Mr Ayyash and Mr Badreddine. No other interpretation is reasonably available. The expression 'each bearing individual criminal responsibility' in combination with the words 'with shared intent', is used in each count in the amended consolidated indictment.

6816. In any event—irrespective of whether or not it is a legal requirement under the Lebanese code—it is clear that those who were involved in the operation to murder Mr Hariri in a terrorist attack using a large quantity of explosives, and knew what they were doing, had a 'shared intent'. No other conclusion is reasonably available on the evidence. All users of the Red network mobiles on Monday 14 February 2005 had this 'shared intent'.

6817. For the same reasons set out above in analysing Mr Ayyash's *mens rea* for count two, the same evidence establishes beyond reasonable doubt his knowledge and his intention to murder Mr Hariri with explosive materials.

6818. In light of the findings above, the Trial Chamber finds Mr Ayyash guilty beyond reasonable doubt, as a co-perpetrator, of the intentional homicide of Mr Rafik Hariri (count three) under Articles 188, 212, 213 and 547 of the Lebanese Criminal Code and Article 3 (1) (a) of the Statute of the Special Tribunal.

- (b) Count four—Intentional homicide (of 21 persons in addition to the intentional homicide of Rafik Hariri) with premeditation by using explosive materials

6819. Under count four of the amended consolidated indictment, Mr Ayyash is charged with having committed, as a co-perpetrator, the intentional homicide of 21 other people with the aggravating circumstances of premeditation and using explosive materials equivalent to approximately 2,500 kilogrammes of trinitrotuene. Mr Ayyash either intended to kill members of

Mr Hariri's convoy and members of the general public in the vicinity, or foresaw and accepted the risk that such deaths would occur. These victims of the attack died either on 14 February 2005 or subsequently as a result of the injuries sustained in the attack.¹¹⁸⁴⁶

6820. In paragraphs 60 (e) and (h) of the amended consolidated indictment, under particulars of the offence, the Prosecutor charges Mr Ayyash:

- e. by using a large quantity of explosive materials in a public place with shared intent and premeditation to commit the intentional homicide of former Prime Minister, and leading political figure, Rafik HARIRI, within his motor convoy,

....

- h. by then knowingly bringing about the detonation at 12:55 at Rue Minet el Hos'n Beirut, Lebanon, being a public street, of explosives equivalent to approximately 2500 kilogrammes of TNT that may cause death.

6821. Here, the Prosecutor appears to be alleging that Mr Ayyash had specific knowledge of the approximate quantity of the explosives employed. As noted above, in this respect the wording of counts three and four of the amended consolidated indictment is inconsistent.

i. Submissions

6822. The Prosecution submits that Mr Ayyash's surveillance of, and presence at, the crime scene demonstrates that he necessarily would have foreseen the likelihood that the public explosion would cause additional deaths.¹¹⁸⁴⁷ The Ayyash Defence did not separately address this charge.

ii. Findings

6823. The Parties entered into an agreement as to evidence that the explosion killed 21 people in addition to Mr Hariri, as listed in schedule A of the amended consolidated indictment.¹¹⁸⁴⁸ This is

¹¹⁸⁴⁶ Amended consolidated indictment, paras 59-60. The amended consolidated indictment refers to Article 3 (1) (a) of the Special Tribunal's Statute and Articles 188, 189, 212-213, 547 and 549 (1) and (7) of the Lebanese Criminal Code.

¹¹⁸⁴⁷ Prosecution final trial brief, para. 1167.

¹¹⁸⁴⁸ Agreed facts, no. (i).

uncontested and the Trial Chamber finds it proven beyond reasonable doubt in the case against Mr Ayyash.

6824. For the same reasons the Trial Chamber has found that Mr Ayyash's conduct satisfies the *actus reus* of co-perpetration of the intentional homicide of Mr Hariri,¹¹⁸⁴⁹ it is also satisfied that Mr Ayyash directly contributed to the execution of the intentional homicide of the 21 additional people.

6825. Regarding Mr Ayyash's *mens rea*, the only reasonable inference available from the evidence is that he was aware that explosive materials were to be used in the attack. And further, that these were of a sufficient quantity to detonate in Mr Hariri's moving convoy and to kill him and anyone else in the vicinity.

6826. Additionally, Mr Ayyash directly participated in mobile surveillance of Mr Hariri and, at other times, was in contact with those conducting mobile surveillance. From this he must have known that Mr Hariri always travelled in a convoy, would not have been alone in his car and that others would be in the convoy. Further, the calls he received from the users of the Red network who were watching Mr Hariri's departure from the Parliament must have informed him that Mr Hariri was travelling in his convoy of five vehicles.

6827. Mr Ayyash must have therefore known that the explosives that were to be detonated when Mr Hariri's convoy passed the St Georges Hotel may cause the deaths of anyone either in the convoy or in the immediate vicinity of the intended explosion. Mr Ayyash was also in an area near the crime scene immediately before the explosion. From moving between the Parliament and the crime scene area he must have been aware of how many people were on the streets in the general vicinity of the hotel.

6828. Detonating a device of that size and power inevitably was going to kill many people who were at least in the immediate vicinity of the blast. This is especially because it was planned to detonate on a public city street in the middle of a weekday. Numerous members of the public could reasonably have been expected to have been within its range. The explosives mounted on a moving VBIED necessarily had to be of a magnitude greater than, for example, those deployed in a car

¹¹⁸⁴⁹ See sub-section (C) (4) (a) (iii) a. '*Actus reus* for co-perpetration'.

bomb in a stationary vehicle, which is detonated either remotely when the target was in the vehicle, or by the ignition being switched on. That is a targeted explosion designed to cause much less damage.

6829. The Trial Chamber has comprehensively analysed the effect of the explosion and the 11,000 square metre crime scene that resulted.¹¹⁸⁵⁰ The explosion was massive, and the explosives were designed to target an armoured convoy moving at speed. The photographs and videos in evidence, accompanied by eyewitness and expert testimony graphically demonstrated the extent of the effect of the explosion, including the colossal damage caused to the buildings in its immediate vicinity. These buildings of course had people inside them.

6830. The evidence therefore proves beyond reasonable doubt that Mr Ayyash, by his actions on Monday 14 February 2005, intended to commit the intentional homicide of those who died in or as a result of the explosion. The Trial Chamber therefore concludes that Mr Ayyash intended to kill members of Mr Hariri's convoy and members of the general public, or at least foresaw that deaths would occur and accepted the risk that this would happen.

6831. The Trial Chamber therefore finds Mr Ayyash guilty, as a co-perpetrator, of the intentional homicide of 21 persons, in addition to Mr Rafik Hariri, as listed in schedule A of the amended consolidated indictment (count four), under Articles 188, 189, 212, 213 and 547 of the Lebanese Criminal Code and Article 3 (1) (a) of the Statute of the Special Tribunal.

- (c) Count five—Attempted intentional homicide (of 226 persons in addition to the intentional homicide of Rafik Hariri) with premeditation by using explosive materials

6832. Under count five, Mr Ayyash is charged with the attempted intentional homicide of 226 other persons—listed in schedule B of the amended consolidated indictment—who were injured in the explosion.

6833. The aggravating factors of premeditation and using explosive materials equivalent to approximately 2,500 kilogrammes of trinitrotuene are also pleaded. Mr Ayyash either intended to kill members of Mr Hariri's convoy and members of the general public in the vicinity or foresaw

¹¹⁸⁵⁰ See chapter VI 'Explosion on 14 February 2005'.

and accepted the risk that such deaths would occur. However, the attempt failed to reach the intended result due to circumstances beyond the control of the co-perpetrators.¹¹⁸⁵¹

i. Submissions

6834. The Prosecution submits that Mr Ayyash's surveillance of, and presence at, the crime scene demonstrates that he necessarily would have foreseen the likelihood that the public explosion would cause additional deaths.¹¹⁸⁵² The Ayyash Defence made no specific submissions about this charge.

ii. Findings

6835. The Parties agreed to the fact that the explosion injured 226 people—as listed in schedule B of the amended consolidated indictment—as uncontested.¹¹⁸⁵³ The Trial Chamber has already found that an act likely to cause death was committed in respect of each of these 226 people, and that their death was prevented solely by circumstances beyond the perpetrators' control.¹¹⁸⁵⁴ The Trial Chamber therefore finds this fact proven beyond reasonable doubt in the case against Mr Ayyash.

6836. For the same reasons, the Trial Chamber has found that Mr Ayyash's conduct satisfies the *actus reus* of co-perpetration of the intentional homicide of Mr Hariri, and the 21 others killed in the explosion,¹¹⁸⁵⁵ it is also satisfied that Mr Ayyash directly contributed to the attempted intentional homicide of 226 other people.

6837. As noted earlier, a perpetrator of attempted intentional homicide must have the *mens rea* to commit the crime of intentional homicide. Based on the same reasoning applied in relation to count four above,¹¹⁸⁵⁶ the Trial Chamber is satisfied beyond reasonable doubt that Mr Ayyash intended to kill the members of Mr Hariri's convoy and the members of the public who were

¹¹⁸⁵¹ Amended consolidated indictment, paras 61-62. The amended consolidated indictment refers to Article 3 (1) (a) of the Special Tribunal's Statute and Articles 188-189, 200-201, 212-213, 547 and 549 (1) and (7) of the Lebanese Criminal Code.

¹¹⁸⁵² Prosecution final trial brief, para. 1167.

¹¹⁸⁵³ Agreed facts, no. (ii).

¹¹⁸⁵⁴ See paras 6350-6353.

¹¹⁸⁵⁵ See sub-sections (C) (4) (a) (iii) a. '*Actus reus* for co-perpetration' and (C) (4) (b) (ii) 'Findings'.

¹¹⁸⁵⁶ See sub-section (C) (4) (b) (ii) 'Findings'.

injured in the attack. Or, alternatively, he at least foresaw that deaths would occur and accepted that risk.

6838. There is no other conclusion reasonably available from the evidence. Detonating a truckload of explosives in a busy street near occupied buildings will inevitably kill many people. Some may not die but instead sustain injury. Some injuries will be severe. However, whether or not these people died from their injuries the act of participating in the detonation of the explosion was an act likely to cause death. In this respect the conduct amounted to an attempted intentional homicide with premeditation by using explosive materials. Mr Ayyash did not act alone; he had an important role in the operation against Mr Hariri.

6839. Accordingly, the Trial Chamber finds Mr Ayyash guilty, as a co-perpetrator, of the attempted intentional homicide of the 226 people listed in schedule B of the amended consolidated indictment (count five) under Articles 188, 189, 201, 212, 213 and 547 of the Lebanese Criminal Code and Article 3 (1) (a) of the Statute of the Special Tribunal.

5. Conclusion

6840. Mr Ayyash had a central role in the execution of the attack and directly contributed to it. Mr Ayyash intended to kill Mr Hariri and had the required knowledge about the circumstances of the assassination mission, including that explosives were the ‘means’ to be used.

6841. For all the reasons outlined above, the Trial Chamber is satisfied beyond reasonable doubt that the Prosecution has proved the guilt of Salim Jamil Ayyash on all counts charged in the amended consolidated indictment.

D. Hussein Hassan Oneissi and Assad Hassan Sabra

6842. The allegations in the amended consolidated indictment against Hussein Hassan Oneissi and Assad Hassan Sabra inextricably link the two in the conspiracy alleged; they are alleged to have acted together. Thus, for convenience and the ease of analysis, their alleged individual criminal liability is jointly reviewed, but with separate findings on each.

6843. The Prosecutor alleges in the amended consolidated indictment in count one that: Mr Oneissi and Mr Sabra, from 22 December 2004, until the morning of Monday 14 February 2005 before the attack, and Mr Ayyash and Mr Merhi, from 11 November 2004 until the morning of 14 February 2005 before the attack—together with Mr Badreddine and unidentified others—concluded or joined an agreement aimed at committing a terrorist act intended to cause a state of terror by a predetermined means liable to create a public danger, namely the assassination of Mr Hariri by means of a large explosive device in a public place.¹¹⁸⁵⁷

6844. He also pleads that, from 22 December 2004 until 14 February 2005, Mr Oneissi and Mr Sabra were: accomplices to the crimes of committing a terrorist act (count six); the intentional homicide of Mr Hariri (count seven); the intentional homicide of 21 others (count eight); and the attempted intentional homicide of 226 people (count nine), through their participation in the false claim of responsibility.¹¹⁸⁵⁸

6845. Under the conspiracy count, the Prosecutor pleads that Mr Oneissi and Mr Sabra:

performed supporting tasks for the assassination, namely:

- i. to seek a suitable individual, later identified as Abu Adass, who would be used to make a false claim of responsibility, on a video, for the attack against Hariri; and,
- ii. to ensure delivery of the video, with a letter attached, for broadcast after the assassination.¹¹⁸⁵⁹

6846. While for counts six to nine, it is specifically pleaded that they:

¹¹⁸⁵⁷ Amended consolidated indictment, para. 54.

¹¹⁸⁵⁸ Amended consolidated indictment, paras 64-70.

¹¹⁸⁵⁹ Amended consolidated indictment, para. 48 (c).

agreed with the said co-perpetrators to perform, and then performed, acts preparatory to the offence, and acts to shield the co-perpetrators and themselves from justice, which would falsely blame others in a fictional fundamentalist group, as follows:

- i. as preparatory to the offence and/or acts to shield the co-perpetrators and themselves from justice, by identifying and then using a 22-year-old Palestinian man named Ahmad Abu Adass in order to create a false claim of responsibility from him on video for the forthcoming offence on behalf of a group called 'Victory and Jihad in Greater Syria'; and
- ii. as acts to shield the co-perpetrators and themselves from justice, by then ensuring the video, with the attached letter, of the false claim of responsibility would be broadcast on the television in Lebanon immediately after the said offence.¹¹⁸⁶⁰

1. Trial Chamber's findings on the conspiracy charge, count one

6847. The ambit of the conspiracy and the facts underlying it, including the alleged role of each Accused, Mr Badreddine and the unnamed co-conspirators, are detailed above.¹¹⁸⁶¹

6848. The Trial Chamber's conclusions below are based on the factual findings relating to Mr Oneissi's and Mr Sabra's role in the events charged, in particular as to their pleaded involvement in making the false claim of responsibility for the attack on Mr Hariri.¹¹⁸⁶² To recapitulate, the Trial Chamber has found the following facts established beyond a reasonable doubt in relation to their conduct, namely that:

- During the amended consolidated indictment period, Mr Oneissi was the user of mobile Purple 095, while Mr Sabra was a user of mobile Purple 018. His wife also used the mobile;¹¹⁸⁶³

¹¹⁸⁶⁰ Amended consolidated indictment, paras 64 (f), 66 (f), 68 (h) and 70 (h).

¹¹⁸⁶¹ See sub-section (B) 'Conspiracy to commit a terrorist act (Count 1)', above.

¹¹⁸⁶² See chapter XII 'Claim of responsibility for the attack on Rafik Hariri' for further details.

¹¹⁸⁶³ See chapter IX 'Attribution of mobile telephones to the Accused and Mustafa Amine Badreddine', (D) (3) 'Findings' and (E) (4) 'Conclusion'.

- From December 2004 through February 2005, Mr Oneissi's mobile and Mr Sabra's shared mobile regularly contacted each other and Mr Merhi, the user of mobile Purple 231;¹¹⁸⁶⁴
- Mr Oneissi's Purple 095 or Mr Sabra's attributed mobile Purple 018 activated cells near the Arab University Mosque in Beirut nearly every day from 29 December 2004 until 7 January 2005;¹¹⁸⁶⁵
- Mr Oneissi's Purple 095 activated a cell near the mosque around the time of the second call to Mr Abu Adass's home on 17 January 2005;¹¹⁸⁶⁶
- On 25 January 2005, Mr Sabra's attributed mobile Purple 018 called Mr Merhi, activating a cell near the tree where the false claim video was found on 14 February 2005;¹¹⁸⁶⁷ and
- On 4 February 2005, Mr Sabra's attributed mobile Purple 018 called Mr Merhi, activating a cell near the payphone used to make the third call to Al-Jazeera on 14 February 2005.¹¹⁸⁶⁸

And on 14 February 2005:

- Mr Oneissi's mobile Purple 095 and Mr Sabra's attributed mobile Purple 018 activated cells near the payphones where the first two calls to the news organisations were made at around the time of these calls;¹¹⁸⁶⁹
- Mr Sabra's attributed mobile Purple 018 activated cells near the payphone where the third and fourth calls to the news organisations were made around the time of the calls;¹¹⁸⁷⁰ and

¹¹⁸⁶⁴ See paras 2471-2473.

¹¹⁸⁶⁵ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (D) (3) (c) (ii) a. 'Mr Oneissi's and Mr Sabra's presence 'near' the mosque around prayer times' for further details.

¹¹⁸⁶⁶ See para. 5476.

¹¹⁸⁶⁷ See paras 5532, 5687.

¹¹⁸⁶⁸ See para. 5687.

¹¹⁸⁶⁹ See paras 5656-5660.

¹¹⁸⁷⁰ See paras 5661-5665.

- Mr Oneissi's mobile Purple 095 and Mr Sabra's attributed mobile Purple 018 activated cells near the tree containing the video at around the time it was collected.¹¹⁸⁷¹

And further, on 16 February 2005:

- Mr Oneissi abandoned his personal mobile Purple 095, after having used it since January 2003;¹¹⁸⁷² and
- Mr Sabra's attributed mobile Purple 018 ceased use, after it had been used by Mr Sabra and his wife since November 2001.¹¹⁸⁷³

6849. However, the Trial Chamber also found that it had not been established beyond a reasonable doubt in respect of Mr Oneissi and Mr Sabra that:

- Either had met Mr Abu Adass at the Arab University Mosque in late December 2004 or early January 2005;¹¹⁸⁷⁴
- Mr Oneissi had posed as 'Mohammed' and thereby befriended Mr Abu Adass;¹¹⁸⁷⁵
- Either had called Mr Abu Adass on 15 January 2005 to lure him from his home;¹¹⁸⁷⁶
- Either had abducted Mr Abu Adass after he left his home on 16 January 2005;¹¹⁸⁷⁷
- Either had called Mr Abu Adass's family on 17 January 2005 to tell them that Mr Abu Adass was going on jihad and would not return home;¹¹⁸⁷⁸
- Either had created the false claim video or accompanying letter, or had any role in this;¹¹⁸⁷⁹

¹¹⁸⁷¹ See paras 5667-5678.

¹¹⁸⁷² See para. 5808.

¹¹⁸⁷³ See para. 5808; chapter IX 'Attribution of mobile telephones to the Accused and Mustafa Amine Badreddine', (E) (4) 'Conclusion'.

¹¹⁸⁷⁴ See para. 5296.

¹¹⁸⁷⁵ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (D) (3) (c) (i) 'Whether the Prosecution has proved that Mr Oneissi was 'Mohammed''.

¹¹⁸⁷⁶ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (E) (2) (d) (i) 'Ahmad Abu Adass's disappearance on Sunday 16 January 2005'.

¹¹⁸⁷⁷ See para. 5459.

¹¹⁸⁷⁸ See paras 5475-5480.

¹¹⁸⁷⁹ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (F) (2) (c) 'Findings', (3) (c) 'Findings'.

- On 9 or 10 February 2005, either Mr Oneissi or Mr Sabra had purchased the telecard used at the payphones to make the calls to the news organisations;¹¹⁸⁸⁰
- Either had placed the video and letter in the tree near Al-Jazeera;¹¹⁸⁸¹ nor that
- On 14 February 2005, either Mr Oneissi or Mr Sabra had made any of the telephone calls to Reuters or Al-Jazeera from the four payphones.¹¹⁸⁸²

6850. In sum, the Trial Chamber found that Mr Oneissi's and Mr Sabra's participation in the false claim aspect of the case had not been proven beyond a reasonable doubt.

2. Submissions

6851. The Prosecution, in its final trial brief, submits that the evidence establishes beyond reasonable doubt that Mr Oneissi and Mr Sabra each played a central role and actively participated in the false claim of responsibility, which required knowing the assassination plot's objectives. The nature and extent of their role establishes that they must have known the crimes they agreed to support.¹¹⁸⁸³ Mr Oneissi and Mr Sabra's participation in the false claim of responsibility aided and abetted the perpetrators and showed their agreement to do so in the months leading up to the attack. Their dissemination of the false claim after the attack helped shield the participants from justice.¹¹⁸⁸⁴

6852. Further, Mr Oneissi and Mr Sabra were aware of the perpetrators' intent and knowingly agreed to join and support the conspiracy, given their involvement in the false claim of responsibility. The false claim was so important that those involved were part of the full conspiracy and knew that they were assisting the perpetrators to commit a terrorist act and homicide.¹¹⁸⁸⁵

6853. At the very least, they were trusted operatives who would have deduced the perpetrators' objective given the nature of their task.¹¹⁸⁸⁶ Advance planning before the attack was required, so

¹¹⁸⁸⁰ See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (F) (2) (c) 'Findings', (3) (c) 'Findings'.

¹¹⁸⁸¹ See para. 5538.

¹¹⁸⁸² See chapter XII 'Claim of responsibility for the attack on Rafik Hariri', (F) (4) (e) 'Findings'.

¹¹⁸⁸³ Prosecution final trial brief, para. 1194.

¹¹⁸⁸⁴ Prosecution final trial brief, para. 1188.

¹¹⁸⁸⁵ Prosecution final trial brief, paras 1189-1190; Prosecution closing submissions, T. 11 September 2018, pp 32-35.

¹¹⁸⁸⁶ Prosecution final trial brief, para. 1191.

that they could plan the delivery of the false claim video and letter.¹¹⁸⁸⁷ They would also have been instructed before the attack as to what was to be said by those making calls to Reuters and Al-Jazeera.¹¹⁸⁸⁸ Evidence of the advance planning includes Mr Sabra activating cells on 25 January and 4 February 2005 to call Mr Merhi near a payphone used to call Al-Jazeera and near the tree where the video would be placed.¹¹⁸⁸⁹

6854. The Oneissi Defence submits that the Prosecution has not proved that Mr Oneissi entered into an agreement to commit a crime against state security, knew that a terrorist act would be carried out, took the risk that other crimes could be committed, knew the conspirators' intent or the means and tools to be used or intended to be an accomplice.¹¹⁸⁹⁰ Neither has it been proved that he participated in either Mr Abu Adass's disappearance or the dissemination of the false claim.¹¹⁸⁹¹ Mr Oneissi did not know the purpose of the so-called 'COLA Phase'.¹¹⁸⁹² He was not informed before the attack of the terrorist plot against Mr Hariri or the role of the false claim.¹¹⁸⁹³

6855. The Sabra Defence submits that there is neither evidence to suggest Mr Sabra had the propensity to commit the crimes nor that he knew or met the other Accused or conspirators, nor that he was a member of or associated with Hezbollah.¹¹⁸⁹⁴ The Prosecution cannot prove what preparatory steps Mr Sabra agreed to and what his contribution was to the disappearance of Mr Abu Adass or the dissemination of the false claim video.¹¹⁸⁹⁵ Mr Sabra did not know in advance of the target, means or date of the attack.¹¹⁸⁹⁶ Mr Sabra was not aware of the conspiracy or its

purpose and so did not intend to join it and he did not understand that his assistance would facilitate a terrorist attack.¹¹⁸⁹⁷

3. Findings on individual criminal responsibility

(a) General analysis

6856. During the amended consolidated indictment period, Mr Sabra's attributed mobile Purple 018 and Mr Oneissi's Purple 095 called each other, and Mr Merhi on Purple 231, and were present in the area of locations where false claim-related activities took place, such as the Arab University Mosque in late December 2004 and early January 2005. Additionally, Mr Oneissi used his personal mobile—and Mr Sabra's attributed mobile Purple 018 was used—near relevant payphones on Monday 14 February 2005, and the tree from which the video was collected, and they stopped using their mobiles shortly after the attack.

6857. The most incriminating piece of evidence against the two Accused—if Mr Sabra was in fact using Purple 018 on the day, which is a fact that the Trial Chamber cannot find established beyond reasonable doubt—in the Trial Chamber's view, is the discarding of long-used mobiles within two days of the attack. Of itself, this act is inherently suspicious and it could provide strong supporting evidence of guilt when combined with other pieces of circumstantial evidence. It could suggest that the mobile users had a good reason not to continue using them, such as a fear of apprehension and that they were taking steps to minimise this possibility.

6858. However, even when considered with the other pieces of evidence—as set out directly above—this is not persuasive. In the Trial Chamber's view—for argument's sake—even if it were satisfied that the two Accused physically participated in making the false claim of responsibility on the afternoon of 14 February 2005, discarding the mobiles raises competing inferences.

6859. One is the obvious, namely, of a consciousness of guilt in taking positive steps to conceal their own actions. But, on the other hand, in the Trial Chamber's view, it is equally consistent with someone realising *after the event* that what they had done was connected with making the false claim and thus attempting to distance themselves from their involvement in the event—in this

¹¹⁸⁹⁷ Sabra Defence final trial brief, paras 868-871; Sabra Defence closing submissions, T. 21 September 2018, pp 50-52.

scenario the Trial Chamber assumes that the *actus reus* is satisfied, and from this it would have to infer their knowledge, or *mens rea*, from a time before the attack.

6860. In other words, in the absence of positive evidence that is capable of establishing beyond reasonable doubt that the Accused knew *before* the explosion that they were going to participate in making a false claim of responsibility—which was designed to shield the perpetrators of an as yet unrealised terrorist act—the mere act of discarding mobiles two days later does not of itself provide additional circumstantial evidence of their *mens rea*.

6861. This piece of evidence would have to be considered with the other relevant facts. However, adding the evidence of what in the circumstances was clearly a suspicious act to the other facts does not strengthen those other facts. This is because these facts are insufficient—either taken together with or without the fact of the discarding of the mobiles—to prove their participation in the false claim of responsibility beyond reasonable doubt. Putting it another way, using the single most (proven) incriminating piece of evidence against the two Accused does not bolster the other facts that the Trial Chamber has established beyond reasonable doubt to the point that they could be found guilty of committing the offences charged.

6862. And, as is explained below, the most incriminating *pleaded* fact, and indeed the only direct piece of evidence led against either Mr Oneissi or Mr Sabra in relation to their alleged participation in the crimes, was that Mr Oneissi was ‘the Mohammed’ who befriended Mr Abu Adass before he disappeared. But this crucial piece of evidence has not been proved beyond reasonable doubt and cannot be viewed with the discarding of the mobiles.

6863. The Trial Chamber’s determination is reinforced by the Prosecution’s submission that Mr Oneissi’s and Mr Sabra’s knowing assistance of the perpetrators in acts preparatory to the crime and knowing assistance to shield the perpetrators from justice, and their knowing agreement to join and support the conspiracy, is based on their participation in the false claim of responsibility.¹¹⁸⁹⁸

6864. In particular, the Prosecution’s case against the two Accused—as pleaded in each version of the indictment and pre-trial briefs—was fundamentally premised on Mr Oneissi being

¹¹⁸⁹⁸ Prosecution final trial brief, paras 1188-1189; Prosecution closing submissions, T. 11 September 2018, p. 32.

‘Mohammed’. Whatever the Prosecution might have said in its final trial brief and closing submissions to the effect that the Trial Chamber could find the two Accused guilty without finding proven their involvement in Mr Abu Adass’s abduction, its case theory was in fact based on their positive involvement in this preparatory act.¹¹⁸⁹⁹ But the Trial Chamber has not been satisfied beyond reasonable doubt that Mr Oneissi was ‘Mohammed’. Nor of their participation in any aspect of Mr Abu Adass’s disappearance and appearance in the video.

6865. Their pleaded awareness—that *before* the explosion on Monday 14 February 2005—they were assisting in diverting responsibility for the explosion was essentially based on Mr Sabra’s and Mr Oneissi’s alleged participation in what happened to Mr Abu Adass in early to mid-January 2005, namely, his recruitment, abduction and video appearance.¹¹⁹⁰⁰ And this in turn rested strongly on Mr Oneissi’s positive identification as ‘Mohammed’ from photo boards and the contemporaneous presence of their mobiles, at times, near the mosque.

6866. The Prosecution’s case theory regarding their roles was therefore heavily premised upon Mr Oneissi being Mohammed. If established, this would have allowed the Trial Chamber to employ a form of backwards reasoning in respect of their *mens rea* on 14 February, based upon their earlier participation in the setting up of the false claim by finding and perhaps ‘abducting’ Mr Abu Adass. In other words, if they were involved in Mr Abu Adass’s disappearance or ‘abducting’ him—and knowing that it was connected with Mr Hariri’s intended assassination—this would have provided the necessary knowledge and hence intention for their actions on the afternoon of 14 February 2005.

6867. The Trial Chamber notes here that the allegation that they were involved in abducting Mr Abu Adass from his home on Sunday 16 January 2005 appears in neither the amended consolidated indictment nor the Prosecutor’s pre-trial brief. This is explained further in analysing the false claim of responsibility at paragraphs 5451-5459.

¹¹⁸⁹⁹ Amended consolidated indictment, paras 3 (b)-(c), 23, 27-29, 48 (c) (i)-(ii), 54; Prosecution’s updated pre-trial brief (Ayyash, Badreddine, Oneissi and Sabra case), annex A, paras 62, 114, 118-130. *See also* Prosecution pre-trial submissions (Merhi case), annex A, paras 53, 105, 109-121.

¹¹⁹⁰⁰ This is not intended to suggest that the video was made in mid-January 2005 as there is no evidence as to when it was made.

6868. If, however, their participation in the disappearance of Mr Abu Adass cannot be proved, a major plank in the Prosecution's case theory disappears. This is insofar as it could go to prove that they knew that they were participating in covering up Mr Hariri's death on the afternoon of 14 February by virtue of a prior agreement to do so—as is charged. And that is what has happened here. The Trial Chamber—as explained above¹¹⁹⁰¹—is not satisfied beyond reasonable doubt that they were involved in Mr Abu Adass's non-pleaded but argued 'abduction', nor his disappearance.

6869. And in any event, even if the Trial Chamber were convinced beyond doubt of their involvement in the 'Mohammed deceit'—which it is stressed, it is not—according to the Prosecution, this would mean that they must have known the full scope of the assassination plot. But this does not follow logically; it cannot be the only inference reasonably available from the evidence.

6870. It is equally plausible, in the Trial Chamber's view, that those responsible for Mr Abu Adass's disappearance, such as enticing him away from his home—as opposed to those who planned the entire operation—did not need to know the purpose for which they were either kidnapping or leading him away.

6871. Crucially, no evidence was led of anything relating to the filming of the video. Naturally, those involved in making the video, by virtue of its content, must have known that Mr Abu Adass's participation in it was linked to Mr Hariri's future assassination. But there is no evidence of (a) who made the video nor (b) when and where it was made nor (c) that those who were involved in his disappearance also made the video. The conspiracy could have comprised a mere handful of people, of which maybe only one or two had actually made the video, and thus knew of its contents before it was broadcast. But this is unknown. In a conspiracy of two, one could have made the video.

6872. In this respect there are inferences available both ways as to the size of the conspiracy and hence as to whether those who were supposed to participate in the false claim knew before the explosion that their actions were connected with it.

¹¹⁹⁰¹ See para. 5459.

6873. One possibility, which is reasonably available on the evidence, is that the operation was segmented by dividing different people, who were unaware that the aim was to kill Mr Hariri, into performing separate but essential tasks. Under this scenario, knowledge of the ultimate objective of the operation, namely, Mr Hariri's assassination, could well have been confined to a handful of people inside and outside of Lebanon. Those responsible for ensuring that the false claim was broadcast on 14 February 2005 would not necessarily have known before the explosion that they would be calling Al-Jazeera afterwards to instruct it to collect a video and to broadcast it.

6874. A trusted operative was indeed needed, but, in the Trial Chamber's view, that person did not need to be a co-conspirator. Their knowledge of their role could be confined to a 'need to know' basis. The evidence does not prove that it was essential to the operation that *only* a co-conspirator could make the calls on 14 February, or put the envelope containing the video in the tree at some unknown time. To the contrary, the fewer who knew about the aim of the operation, the better. Under this scenario, a small group of trusted operatives—in other words, conspirators—performed all tasks requiring knowledge of the objective.

6875. The other potentially plausible explanation is that the combination of the recruitment and abduction of Mr Abu Adass and the calls to the media outlets on 14 February 2005 was so integral to the overall operation that these essential actions could only be entrusted to those who knew why they were doing it, namely, as part of the plot to assassinate Mr Hariri—either as co-conspirators or as accomplices.

6876. But in the absence of any direct evidence on this, the Trial Chamber is unable to make a finding either way. Thus, in the Trial Chamber's view, it is as equally plausible that those who made the calls and put the video in the tree knew in advance of the attack on Mr Hariri, as it is that they did not. There is no evidence which conclusively establishes either scenario, one way or another.

6877. The possibility that both are equally sustainable must therefore inevitably raise a reasonable doubt as to the Prosecution theory that Mr Oneissi and Mr Sabra—if they were involved in the false claim on 14 February 2005—must have known in advance that their actions were connected to Mr Hariri's intended assassination. The evidence does not establish this either factually or as a matter of logic, or inferential reasoning from circumstantial evidence.

6878. Another factor militating against Mr Oneissi or Mr Sabra knowing of the explosion in advance—assuming it could be proved that they in fact made the calls on 14 February 2005—is of their personal mobiles communicating with each other and Mr Merhi. None were using network mobiles to communicate on this vital part of the plot.

6879. The Prosecution’s explanation for this is that none thought that this would lead to their detection, and they took some precautions in using public payphones and an anonymous telecard to make the calls. And this is a plausible explanation, for there is no right or wrong way to communicate a false claim of responsibility after a terrorist attack.

6880. However, if this is the case, in the Trial Chamber’s view, it reveals a remarkable lapse in discipline in communication among those who were said to be indispensable to the operation. The evidence has established the existence of tightly controlled networks that only communicated either with other mobiles in that single network or with another related network.¹¹⁹⁰² The use of personal mobiles thus also goes against the Prosecution’s theory that they must have known in advance that their actions were contributing towards the operation to assassinate Mr Hariri, either before or after the explosion, or both.

(b) Accomplice liability under Articles 219 (4) and (5) of the Lebanese Criminal Code

6881. During the amended consolidated indictment period—as noted above—Mr Sabra’s attributed mobile Purple 018 and Mr Oneissi using his personal mobile Purple 095 called each other, and Mr Merhi on Purple 231. Their mobiles were present in the area of locations where false claim-related activities took place, such as the Arab University Mosque in late December 2004 and early January 2005. The two personal mobiles were used near relevant payphones on 14 February 2005, and the tree from which the video was collected. Their personal mobiles stopped use shortly after the attack.

6882. This conduct is insufficient either to prove conduct that assisted the perpetrators’ preparation for the attack or that helped to shield the perpetrators or accomplices from justice.

¹¹⁹⁰² See chapter VIII ‘Nature and purpose of colour-coded mobile networks and Purple group of mobiles’.

Their actions, in Mr Oneissi being in these locations and Mr Sabra's attributed mobile Purple 018 also being there therefore do not satisfy the *actus reus* for accomplice liability.

6883. Similarly, the Prosecution has failed to establish the mental element, or *mens rea*, of accomplice liability for either Accused. Using or not using a mobile, calling each other and being somewhere in the area of locations where false claim-related activities took place is likewise insufficient to demonstrate beyond a reasonable doubt that Mr Oneissi or Mr Sabra knew and accepted that the perpetrators would carry out an attack using an explosive device that was likely to kill people and spread terror. This is assuming that Mr Sabra was using his attributed mobile at all relevant times.

6884. Moreover, there is no evidence from which the Trial Chamber could conclude beyond reasonable doubt—even if it was found proved that they did participate in calling the news agencies *after* the attack on 14 February 2005—that they were aware *in advance* of the attack, which occurred at around 12:55, that calling Al-Jazeera and Reuters later that afternoon was connected with the attack. This is an essential requirement under Articles 219 (4) and (5).

6885. The Trial Chamber accepts that if they indeed participated in making the calls to either news outlet—by virtue of the content of the letter that was read during the call—they would have known *then* that their actions were connected with the attack. However, this would not of itself prove their knowledge of this before the attack, as is required by Article 219 of the Lebanese Criminal Code, to incur criminal liability as an accomplice.

6886. The Trial Chamber's conclusion as to the lack of evidence that Mr Oneissi or Mr Sabra participated in the 'Mohammed deceit', the abduction of Mr Abu Adass or the dissemination of the false claim therefore precludes their liability as accomplices.

6887. Accordingly, the Trial Chamber finds that Mr Oneissi's and Mr Sabra's liability as accomplices for the crimes of committing a terrorist act (count six), the intentional homicide of Mr Hariri (count seven), the intentional homicide of 21 other persons (count eight) and the attempted intentional homicide of 226 persons (count nine) has not been proven beyond a reasonable doubt.

(c) Conspiracy

6888. The same underlying facts and conduct are used to prove Mr Oneissi's and Mr Sabra's alleged participation in the conspiracy to commit a terrorist act by means of an explosive device in order to assassinate Mr Hariri. To find them guilty of participating in the conspiracy charged in count one, the Trial Chamber must be satisfied beyond reasonable doubt of the same facts that would have proved their criminal liability as accomplices as charged in counts six to nine of the amended consolidated indictment.

6889. Given the Trial Chamber's determination, for purposes of accomplice liability, that Mr Oneissi and Mr Sabra did not know of or accepted that the perpetrators would carry out a terrorist act with an explosive device, homicide or attempted homicide, it follows that the Trial Chamber cannot be convinced beyond a reasonable doubt that they knew and agreed with the conspirators to commit a terrorist act using a large explosive device in a public place to assassinate Mr Hariri.

6890. To be clear, the fact of these personal mobiles calling the other mobile, and Mr Merhi, and Mr Oneissi's Purple 095's and Mr Sabra's attributed mobile Purple 018's presence in the area of false claim-related activities at the Arab University Mosque, payphones and the tree, is insufficient evidence on its own to demonstrate that Mr Oneissi or Mr Sabra entered into an agreement to commit a terrorist act during the amended consolidated indictment period. And most especially so in the absence of evidence that they participated in what happened to Mr Abu Adass. Indeed, the Prosecution's argument that Mr Oneissi and Mr Sabra knowingly joined the conspiracy is premised on their involvement in the false claim of responsibility.¹¹⁹⁰³ So the Trial Chamber's determination that the Prosecution failed to prove the two Accused did take part in the false claim is fatal to the charge of conspiracy.

6891. Accordingly, the Trial Chamber finds that Mr Oneissi and Mr Sabra cannot be found responsible for conspiracy to commit a terrorist act as charged in count one.

¹¹⁹⁰³ Prosecution final trial brief, para. 1189; Prosecution closing submissions, T. 11 September 2018, p. 35.

E. Hassan Habib Merhi

6892. According to the amended consolidated indictment, Mr Merhi, together with Mr Badreddine, coordinated the preparation of the false claim of responsibility. He specifically co-ordinated the activities of Mr Oneissi and Mr Sabra in the lead-up and aftermath of the attack.¹¹⁹⁰⁴

6893. The Prosecution further submits that Mr Merhi supported the terrorist attack by co-ordinating one of its integral components—the false claim of responsibility—which in turn also helped shield the perpetrators of the attack from justice.¹¹⁹⁰⁵

6894. Mr Merhi is charged as an accomplice—under Articles 219 (4) and (5) of the Lebanese Criminal Code—to the homicide, attempted homicide and terrorist act. Specifically, his alleged contributions to the crimes are described in the amended consolidated indictment as: (a) preparatory to the offence and as acts shielding the co-perpetrators and himself from justice by participating in the identification and subsequent use of an individual in creating a false claim of responsibility video; and (b) acts shielding the co-perpetrators and himself from justice by ensuring that the false claim of responsibility is broadcast on TV after the offence.¹¹⁹⁰⁶

6895. The Merhi Defence submits that there is no evidence demonstrating beyond reasonable doubt that Mr Merhi committed before or after the attack any concrete act which would have aided, abetted and or facilitated the commission of the alleged terrorist act.¹¹⁹⁰⁷ The Prosecution does not accuse Mr Merhi of any specific act relating to the false claim of responsibility.¹¹⁹⁰⁸

6896. Mr Merhi's alleged contributions to the crimes are solely related to the false claim of responsibility. For the Trial Chamber to assess whether his actions amount to criminally relevant contributions to crimes, it must be established factually what exactly he did. Evidence of Mr Merhi's actions is generally lacking. Mr Merhi's call activity on Purple 231 may link him to Mr Oneissi and Mr Sabra. However, even if the Trial Chamber were to be satisfied that Mr Merhi—

¹¹⁹⁰⁴ Amended consolidated indictment, para. 3 (d).

¹¹⁹⁰⁵ Prosecution final trial brief, para. 1168.

¹¹⁹⁰⁶ Amended consolidated indictment, paras 64 (f), 66 (f), 68 (h), 70 (h). *See also* Prosecution final trial brief, para. 1172.

¹¹⁹⁰⁷ Merhi Defence final trial brief, paras 482, 569.

¹¹⁹⁰⁸ Merhi Defence final trial brief, para. 540.

on Purple 231—supervised Mr Oneissi and Mr Sabra, the Trial Chamber found that it was unable to link Mr Oneissi and Mr Sabra to the false claim of responsibility. Accordingly, the link between Mr Merhi and the false claim of responsibility is missing.

F. Conclusion

6897. As explained above, the Trial Chamber finds Mr Ayyash criminally responsible in relation to counts 1 to 5 of the amended consolidated indictment. The Trial Chamber has also determined that Mr Merhi, Mr Oneissi and Mr Sabra are not criminally responsible in relation to counts 1 and 6 to 9 of the amended consolidated indictment.

6898. The Trial Chamber, as part of its obligation to provide a reasoned opinion, addresses what a casual reader could perhaps view as an inconsistency in reasoning, and hence the result of the case.

6899. In examining the evidence supporting the pleaded false claim of responsibility, the Trial Chamber made a detailed analysis of mobile cell activations and—in light of the somewhat limited reliability of the telecommunications evidence—whether these could establish the particular locations of their users. This was especially important in that context, as the Prosecutor had pleaded that Mr Oneissi and Mr Sabra were in specific, precise locations, such as the Arab University Mosque, the four payphones used to make calls to Reuters and Al-Jazeera on the afternoon of Monday 14 February 2005, or near the tree where the video-taped claim of responsibility was deposited.

6900. In relation to Mr Ayyash's individual criminal responsibility, the Trial Chamber also closely examined the cell activations of Red 741, and the other Red mobiles, on the morning of Monday 14 February 2005 before the attack on Mr Hariri, and on all other key dates before then, including where and when the Blue mobiles were used.

6901. The Trial Chamber, however, did not attempt specific calculations—with the assistance of the electronic presentation of evidence—on the precise areas of these cell activations. This is primarily because the Prosecution did not allege that Mr Ayyash was at any *precise* location, and it was not necessary to determine that he was. In other words, where the Prosecutor alleges that Mr Oneissi and Mr Sabra were *at the mosque* or made telephone calls from payphone boxes,

specificity in placing a mobile's user at a location matters immensely. Where this is not the case, as for Mr Ayyash, it does not matter much that the mobile user's location can only be approximated in relation to a larger area, and most particularly vis-à-vis Mr Hariri's provable movements.

6902. The Trial Chamber's conclusion that Mr Ayyash bears individual criminal responsibility is not based on determining his or the other Red mobiles' precise locations. Rather, it comes from the combination of the several strands of evidence. These include: the increased activity of Red mobile contact on the morning of 14 February 2005, the closed nature of the Red network, the involvement of the Red mobiles in the surveillance of Mr Hariri in the weeks before the attack, the calls right before the attack, their cell activations in the general area of the crime scene—including of the portable relay cell PHENMB1—and their discarding of the network mobiles minutes before the attack.

6903. In these circumstances, the Trial Chamber's decision to acquit Mr Merhi, Mr Oneissi and Mr Sabra, but to convict Mr Ayyash using a similar type of evidence—the telecommunications evidence—was consistent with the distinctions in pleading and context.

XV. DISPOSITION

6904. For the reasons above and having considered the Parties' submissions, and pursuant to Article 23 of the Statute of the Special Tribunal for Lebanon and Rule 168 of the Rules of Procedure and Evidence, the Trial Chamber finds the Accused:

SALIM JAMIL AYYASH

GUILTY, pursuant to Articles 2 and 3 (1) (a) of the Statute of the Special Tribunal for Lebanon, and Article 212 of the Lebanese Criminal Code, of the following counts charged on the amended consolidated indictment, as a co-perpetrator of:

COUNT 1—Conspiracy aimed at committing a terrorist act (Articles 270 and 314 of the Lebanese Criminal Code);

COUNT 2—Committing a terrorist act by means of an explosive device (Article 314 of the Lebanese Criminal Code);

COUNT 3—Intentional homicide of Rafik Hariri with premeditation by using explosive materials (Articles 547 and 549 (1) and (7) of the Lebanese Criminal Code);

COUNT 4—Intentional homicide (of 21 persons in addition to the intentional homicide of Rafik Hariri) with premeditation by using explosive materials (Articles 547 and 549 (1) and (7) of the Lebanese Criminal Code); and

COUNT 5—Attempted intentional homicide (of 226 persons in addition to the intentional homicide of Rafik Hariri) with premeditation by using explosive materials (Articles 200, 547 and 549 (1) and (7) of the Lebanese Criminal Code).

AND

HASSAN HABIB MERHI

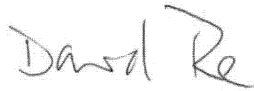

HUSSEIN HASSAN ONEISSI

ASSAD HASSAN SABRA

NOT GUILTY of all counts charged in the amended consolidated indictment, namely counts one, six, seven, eight and nine.

Done in Arabic, English, and French, the English version being authoritative.

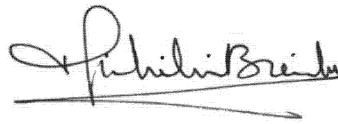

Leidschendam,
The Netherlands
18 August 2020

Judge David Re, Presiding

Judge Janet Nosworthy

Judge Micheline Braidy

XVI. SEPARATE OPINION OF JUDGE DAVID RE

A. Introduction

1. This separate opinion examines several aspects of the proceedings before the Special Tribunal. It makes some general observations that might be useful in future proceedings either in this tribunal or in other international criminal courts and tribunals and United Nations and other inter-governmental fact-finding missions. The five issues explored here are:

- 1) whether a court may make findings against an absent unindicted co-conspirator, co-accused or co-perpetrator to establish individual criminal liability based on accessorial liability. This is as a response to Judge Micheline Braidy's short dissent on the issue;
- 2) the treatment of the 'four generals' by the United Nations International Independent Investigation Commission (UNIIC) and the Lebanese authorities, and a possible solution to the protracted litigation before the Special Tribunal;
- 3) some general observations about the Defence Office;
- 4) observations on the pre-trial phase of the case, including the Prosecution's record-keeping practices; and
- 5) referrals to the Appeals Chamber under Rule 68 (G) for interlocutory decisions on the applicable law.

B. Whether a court may make a finding on the role of an unindicted co-conspirator, co-perpetrator or accessory

2. I had the advantage of reading Judge Braidy's dissenting opinion in which she disagrees with the Trial Chamber making any findings on whether the former Accused, Mustafa Amine Badreddine, had a role in the conspiracy alleged. My learned colleague held that the Trial Chamber 'should not even have analysed the individual criminal responsibility of someone who is not (anymore) an accused and whose proceedings have been terminated'.

3. The fact that her view is contrary to that of the long established international criminal law case law is beside the point. As she is entitled to, she disagrees with it, and eloquently says so.

4. It is axiomatic that a majority is not always correct merely by virtue of numerical judicial superiority, and that a lone dissent may eventually gain acceptance and transform into established principle. Over time, social conventions change, and the law eventually catches up. However, here and with great respect, I do not believe that this particular minority view will gain traction with the passage of time. This is because of the potentially significant consequences of its practical application.

5. One difficulty with acceding to the legal approach advocated is that logically it cannot be restricted to conspiracy charges. Besides stating the obvious, that this would provide the greatest incentive for a potential co-accused to eliminate their co-conspirator(s)/co-accused to ensure that neither ever faced justice, the approach attacks the legal foundation of conspiracy, co-perpetration and accessorial liability.

6. The very concept of co-perpetration and conspiracy, depends upon more than one person agreeing to commit a crime and then doing so. Likewise, accessorial liability whether before, during or after the commission of a crime, requires other principal perpetrators to have engaged in criminal conduct.

7. In any offence in which conspiracy, co-perpetration or accessorial liability is charged, a legal element of the crime or mode of liability is that someone else is *legally* implicated in what occurred. The alleged actions of that other person have to be pleaded and specified. This is irrespective of whether that person is dead or alive or their whereabouts are unknown.

8. Taking the approach advocated in Judge Braidy's dissent would defeat the possibility of ever trying anyone in the absence of a co-perpetrator, irrespective of the reasons for their absence from the proceedings. This would apply regardless of the level of seriousness of the crime or the degree of complicity alleged.

9. It would apply as equally to aiding and abetting genocide as to knowingly disposing of an inexpensive stolen item.¹ The person who knowingly assisted the sole but now absent or deceased

¹ Also known in some jurisdictions as the crime of 'receiving stolen property'.

mastermind of a terrorist incident in which thousands of people perished could never face justice. Anyone who allegedly conspired to commit genocide with a deceased, or even an absent long on the run accused, could never be tried, whatever the strength of the evidence against the alleged genocidaire.

10. There is nothing legally special about Mr Badreddine and his pleaded role in the crimes charged. He is no more than an unindicted former co-accused, whatever may have been his position in Hezbollah, and at any time.

11. Conspiracy requires an agreement between at least two people. If a court legally cannot find its existence merely because only one conspirator is before the court, this novel way of viewing accessorial liability, if it gained acceptance, would mean that the charge would always fail. Had Mr Ayyash been the only other person alleged on the Prosecutor's indictment to have conspired with Mr Badreddine, on the position advocated in the dissent, the charges would fail on that basis alone. He could never have been brought before a court anywhere.

12. Thus, on that view, termination of the charges against the one who was no longer before the court would automatically terminate the proceedings against the other. To put it another way, when Mr Badreddine's name leaves the indictment, he takes Mr Ayyash's with him. This illustrates quite simply the logical but inevitable consequence of following the approach of the dissent. Respectfully, I disagree with its legal foundations and the unintended legal and social consequences that would flow from applying it. These must be contrary to public policy in bringing suspected perpetrators of crimes to justice.

C. The 'four generals' and the UN and UNHCR's public silence—the case of Jamil El-Sayyed

13. Between August and October 2005, eight Lebanese nationals were arrested, ostensibly in connection with the attack on Mr Rafik Hariri. They were detained for a lengthy period without charge or the notification of a trial date. Four of these were senior Lebanese officials, who came to be known as the 'four generals'. These were General Jamil El-Sayyed, General Raymond Azar, General Ali El-Haj and General Mustapha Hamdan.² They were released only in the month

² There are variations in the spellings of these names in their transliteration from Arabic into English.

following the Special Tribunal for Lebanon's establishment, pursuant to an order of its Pre-Trial Judge, issued on 29 April 2009.

14. Mr El-Sayyed was the director of the Lebanese *Sûreté Générale* between 1998 and 25 April 2005, and was imprisoned and held without charge by first the UNIIC and then the Lebanese authorities between 30 August 2005 and his release on 29 April 2009, a period of three years and eight months.³ His initial arrest and subsequent detention, however, was according to either a 'warrant' or a 'recommendation' of the first UNIIC Commissioner, Mr Detlev Mehlis.

15. Mr Mehlis was appointed by the UN Secretary-General as the first UNIIC Commissioner in May 2005 and remained in the position for less than a year, until January 2006. He produced two reports for the Security Council, in October and December 2005.

16. Mr Serge Brammertz, who was the UNIIC Commissioner from 11 January 2006 until 1 January 2008, succeeded him. The third UNIIC Commissioner was Mr Daniel Bellemare, who remained in that post until the UNIIC ceased operation on 28 February 2009. The following day he became the Prosecutor of the newly established Special Tribunal for Lebanon.

17. Mr Mehlis's first report to the Security Council, issued on 19 October 2005, accused the four generals of being among the main organizers of Mr Hariri's assassination, stating:

On 30 August 2005, the Lebanese authorities arrested and detained four high-level officials of the Lebanese security and intelligence apparatus, pursuant to arrest warrants issued by the Lebanese Prosecutor General based on recommendations from the Commission that there was probable cause to arrest and detain them for conspiracy to commit murder in connection with the assassination of Rafik Hariri.⁴

18. The lengthy detention without charge of the four generals and four others was the subject of a referral to the UN Human Rights Council's Working Group on Arbitrary Detention (WGAD)

³ Jamil El-Sayyed, T. 5 June 2018, pp 2-3, 67, 86. Mr El-Sayyed testified from 5 to 7 June 2018. *See also* Order regarding the detention of four Generals.

⁴ S/2005/662, Report of the International Independent Investigation Commission established pursuant to Security Council resolution 1595 (2005), Detlev Mehlis, Commissioner, Beirut, 19 October 2005, para. 174. The Trial Chamber, on the application of the Defence of Mr Assad Hassan Sabra that had requested that it admit each in its entirety into evidence, examined all the UNIIC reports in deciding the application; *for example*, F2722, Decision on Agreements as to Evidence Between Prosecution and Sabra Defence on United Nations Fact-Finding Mission and UNIIC Reports, 16 September 2016.

in 2007. The Working Group investigated the circumstances surrounding their arrest and detention, and communicated with the UNHCR—which was another UN agency—and the Lebanese government about what had and was occurring. It reported in its Opinion 37/2007 that:⁵

The deprivation of liberty of Jamil El Sayed, Mustapha Hamdan, Raymond Azar and Ali El Haj, Ayman Tarabay, Mustapha Talal Mesto, Ahmad Abdel Aal and Mahmud Abdel Aal is arbitrary, being in contravention of articles 9 and 14 of the International Covenant on Civil and Political Rights, to which Lebanon is a party, and falls within category III of the categories applicable to the consideration of cases submitted to the Working Group.⁶

19. Relevant to Mr El-Sayyed's case, the Working Group in its report outlined the following background facts:

- On 30 August 2005, at 5:30 a.m., patrols came to Mr El-Sayyed's home with an order signed by Mr Mehlis, describing Mr El-Sayyed as a 'suspect'. He was taken to the UNHCR headquarters and interrogated in the absence of a lawyer. He was then placed in detention at the ISF (Lebanese Internal Security Forces) headquarters;⁷
- On 1 September 2005, he was taken to the UNHCR headquarters and confronted with a witness, in the presence of his lawyer and UNHCR investigators. The interview was recorded and filmed. 'The witness had his head covered by a bag, apart from his eyes. The witness affirmed that General El Sayed had visited Damascus seven times between November 2004 and February 2005 for meetings with the Chief of the Syrian Presidential Guard and the head of the Syrian intelligence services to plan the assassination of President Hariri and that on the last occasion he had been accompanied by General Mustapha Hamdan, at that time Chief of the Lebanese Presidential Guard';⁸

⁵A/HRC/10/21/Add.1 Promotion and Protection of all Human Rights, Civil, Political, Economic, Social and Cultural Rights, Including the Right to Development. Opinions adopted by the Working Group on Arbitrary Detention 4 February 2009, Opinion 37/2007, para. 101, stating that:

'General Al-Sayyed, according to the witness, cooperated closely with General Mustapha Hamdan and General Raymond Azar in the preparation of the assassination of Mr. Hariri. He also coordinated with General Ghazali (and, among others, people from Ahmad Jibreel in Lebanon). General Hamdan and General Azar provided logistical support, including money, telephones, cars, walkie-talkies, pagers, weapons, identification cards, etc'.

The communication of the opinion was 'addressed to the Government on 27 April 2007'.

⁶ WGAD report, para. 47.

⁷ WGAD report, para. 10.

⁸ WGAD report, para. 12.

- Mr El-Sayyed denied these meetings and requested more details on their dates. He invited the investigators to check every date in his diaries. The masked witness was unable to specify any of the dates of the seven alleged meetings. Mr El-Sayyed remained in detention at UNIIIC's disposal on the basis of a verbal order notified to him by one of the investigators on the night of 30 August;⁹
- On 3 September 2005, he was brought before the Lebanese examining magistrate, who subjected him to a purely formal interrogation which did not last more than one hour. Following this investigation, the magistrate issued a warrant for his detention;¹⁰
- From 3 September to 19 October 2005, five interrogation sessions took place with UNIIIC investigators. Each time that the investigator alluded to an individual, Mr El-Sayyed 'asked to be confronted with this individual, and the question was immediately shelved';¹¹
- The accusations against Mr El-Sayyed were based primarily on the declarations of two individuals (identified as 'witnesses'). 'The first, Mr. Hussam Hussam, is probably the masked individual with whom Mr El-Sayyed was confronted on 1 September 2005.' On 27 November 2005, the witness withdrew his declaration at a press conference;¹²
- On 19 January 2006, Mr El-Sayyed was taken to the UNIIIC headquarters for interrogation;¹³
- On 15 March 2006, the third UNIIIC report, Mr Brammertz's first, was published. It did not mention Mr El-Sayyed. Neither did the fourth and fifth UNIIIC reports of 6 June and 25 September 2006;¹⁴
- On 7 and 8 April 2006, and at his request, UNIIIC had a 'discussion' with Mr El-Sayyed '(the investigator refuses to describe the session as an interrogation)'. This discussion is to date his only discussion with the present UNIIIC officials;¹⁵

⁹ WGAD report, para. 12.

¹⁰ WGAD report, para. 13.

¹¹ WGAD report, para. 14.

¹² WGAD report, para. 15.

¹³ WGAD report, para. 16.

¹⁴ WGAD report, para. 17.

¹⁵ WGAD report, para. 18.

- On the basis of this discussion, Mr El-Sayyed presented a statement on 23 May 2006, requesting UNHCR to revoke its recommendation to keep him detained. On 6 June 2006, UNHCR replied, ‘indicating that all the questions raised in the statement fell within the exclusive competence of the Lebanese judicial authorities’;¹⁶
- On 20 June 2006, Mr El-Sayyed’s lawyers requested the examining magistrate to withdraw the warrant for his detention. The request went unanswered, so on 12 October 2006, Mr El-Sayyed lodged a further application with UNHCR to revoke its detention recommendation. On 24 October 2006, Mr Brammertz stated that the Lebanese authorities had exclusive competence to deal with any questions of detention;¹⁷
- Mr El-Sayyed presented an application for release on 25 March 2007;¹⁸

The Working Group also found:

- ‘The Lebanese examining magistrate responsible for the case acknowledges that he has no evidence against General El Sayed or against the other detainees but has to date not taken any decision pending completion by the International Investigation Commission of its investigations and its transmission to him of details concerning the detainee. Mr. Brammertz’s report dated 12 December 2006 indicates that the International Investigation Commission has transmitted to the Lebanese courts information on the individuals who are in detention, being aware that this can help the Lebanese authorities take the steps which they deem appropriate or necessary concerning their detention, and reaffirms the exclusive responsibility of the Lebanese courts for decisions relating to the detention of these persons’;¹⁹
- ‘In its response, the Government states that it cannot be held liable for any violations that may have occurred in regard to the investigations conducted by the International Investigation Commission, in particular those concerning the interrogation of Jamil El-Sayed carried out by the international investigator in the absence of his lawyer and without

¹⁶ WGAD report, para. 19.

¹⁷ WGAD report, para. 20.

¹⁸ WGAD report, para. 21.

¹⁹ WGAD report, para. 26.

his having been informed of this right. The Government contends that the Lebanese authorities and courts have no connection with investigative acts of the International Investigation Commission’;²⁰ and

- ‘A real grey area exists regarding which authority considers itself competent to rule on the judicial situation of these detainees. According to the information obtained by the source, the Investigation Commission states that it is the Lebanese courts that are competent to decide on questions of detention. This position was reaffirmed in Commissioner Brammertz’s last report dated 12 December 2006’.²¹

1. Mr El-Sayyed’s testimony in the trial

20. Mr El-Sayyed testified during the trial for the defence of Mr Hussein Hassan Oneissi and described the circumstances of his arrest and detention without charge.

21. In preparation for Mr El-Sayyed’s testimony, I viewed a video recording of the UNIIC investigator’s interview with him of 2 September 2005. It had been disclosed to the Trial Chamber in advance of Mr El-Sayyed’s evidence for its possible use during his testimony, but ultimately was not used in court nor admitted into evidence.²² It was a strange sight, especially when it became evident that Mr El-Sayyed recognised the voice coming from under the paper bag.

22. When Mr El-Sayyed testified, as Presiding Judge, I made the following introductory comments to him, which put on the record some disturbing aspects of his treatment by UNIIC officials when he was in its custody:

I’d also note from a transcript of a recording of a suspect statement on the 2nd of September 2005, where you were interviewed by the United Nations International Independent Investigations Commission, that you participated in what in international terms is a fairly bizarre procedure, in which a witness was brought in to confront you with a bag over his head and holes cut for his eyes, and an investigator then spoke to you in English in a lengthy

²⁰ WGAD report, para. 27.

²¹ WGAD report, para. 7.

²² R128-4-0046, disclosure 3521, transcript of recording suspect statement, 2 September 2009, ERN 10009238C-10009238C_TS_D_EN_AR.

conversation afterwards and treated you, I would assess, as very badly and in a very unprofessional manner.

It was quite extraordinary that an investigator would speak to you in that manner, especially when you're in custody at the time as a prisoner, and he basically accused you of lying.

Just to give some context to it, I put this on the record to give some context to your evidence here. After you were arrested, I think, on the 30th of August 2005, the transcript shows -- I viewed the video, too, and I've heard the tone used by the investigator.

23. To provide context to these remarks, I then read onto the trial record part of the transcript of the interview, saying:

Just for a background context here, the situation you were in at that point, at that time you were in custody as a suspect. The investigator, you and him were in the room, and transcript goes, you:

El-Sayyed: "Don't hit on the table."

Investigator: "I hit the table when I want. Is it clear?"

El-Sayyed: "No, no, you can hit me if you want."

Investigator: "No, I don't hit you."

El-Sayyed: "You are strong enough."

Investigator: "Yes, but I'm a German police officer working for the United Nations."

El-Sayyed: "I won't be provoked."

Investigator: "And I ask the questions."

El-Sayyed: "Please be calm with me."

Investigator: "We stay with the rules. You stayed calm with the witness? No, you were shouting all the time."

El-Sayyed: "We were discussing."

Investigator: “And you were bullshitting.”

El-Sayyed: “No, no, no.”

Investigator: “You were bullshitting about talking the thing off the head, whatever.”

El-Sayyed: “I was bullshitting. What do you have to tell me? I’m hearing you.”

Investigator: “So you deny that you know the people he was asking you, yes, Marhi Assad?”

El-Sayyed: “No, no, no, please.”

Investigator: “Did you not meet him?”

El-Sayyed: “Please, please.”

Investigator: “You did not meet Marhi Assad?”

El-Sayyed: “Please.”

Investigator: “Yes or no?”

El-Sayyed: “No.”

Et cetera. That was at page 59 to 60 of the transcript. Then at 68, the investigator says:

“So he is a liar.”

And you say: “Surely he is not to be a liar.”

Investigator: “He is known to be a liar, yes, and you are telling only the the truth.”

23

24. As the Presiding Judge, I then said to Mr El-Sayyed:

I’m just putting on the record how badly you were treated in custody. You’re not going to be treated like that here. My assessment is what happened in that interview was disgraceful.

²³ T. 5 June 2018, pp 7-10. The video and transcript of the interview were on the Oneissi Defence’s second updated exhibit list, F3650, Annex F.

It does not withstand scrutiny and it is far below accepted international standards. So we thank you very much for coming here. You'll be treated with dignity and courtesy here'.²⁴

2. Background to Mr El-Sayyed's arrest

25. Mr El-Sayyed, in his testimony during the trial, provided some background information to his arrest. He testified that on 31 May, 2 June, 15 August and 21 August 2005, he was approached by a UNIIC investigator and told that he had to, 'Find a victim or it could be you'.²⁵

26. The approach included, he said, one from western intelligence officials proposing that he go to visit President Bashar Al-Assad in Syria and ask him to constitute a Syrian judicial investigation commission and to:

choose a heavy -- heavy weighted victim like Rustom Ghazaleh and more, one of those who served in Lebanon.

This sort of victim -- this victim would confess having assassinated Hariri based on a personal or a financial disagreement, and this victim would give this written confession, and then this victim would be found later killed in a car accident or in a suicide action. Then the Syrian authorities would convene us as an investigation committee, and then we will have an agreement with Assad similar to the agreement we had with Gadaffi for the Lockerbie case. For the Lockerbie case.²⁶

27. Mr El-Sayyed also testified about his interrogation by the UNIIC Commissioner, Mr Mehlis and the same investigator, on 30 August very late in the evening, after 23:00. These corresponded in substance with details in the Working Group's report extracted above. Referring first to a conversation with a British UNIIC investigator earlier that evening, Mr El-Sayyed stated:

He said Detlev Mehlis and Gerhard Lemon will come. So they did come. They sat next to each other, and they said: "I propose that you produce a victim now you are in our hands. It's still not a wasted opportunity. You can go back home. Just give us a victim."

I looked at Detlev Mehlis. I told him you are the judge and he is the policeman. "I am addressing myself to you as a judge: Would this be acceptable?" He looked down and he

²⁴ T. 5 June 2018, pp 10-11.

²⁵ T. 5 June 2018, pp 117-122.

²⁶ T. 5 June 2018, pp 117-118.

didn't answer. So I asked: "As a judge, would you find this acceptable?" I told him: "I will not cooperate with you." "He said: "Now, you will go to prison. And believe me, you will stay in prison for a long time and we will take you to the international tribunal. There will be an international tribunal. You have two days to think before I refer you to the Lebanese judge." I said, "No need for me to think. I will not think".²⁷

3. Continued detention after the key witness retracted his statement against Mr El-Sayyed

28. The detention of the four generals continued, notwithstanding that the key witness publicly retracted his statement in November 2005. Their names were not mentioned in any UNIIC report subsequent to the first report of October 2005.

29. Commissioner Brammertz in the sixth UNIIC report, dated 12 December 2006, stated that:

The Commission regularly shares with the appropriate Lebanese authorities the substance of all relevant information that it obtains in a manner that does not compromise the interest of the source of this information, be it an individual, an organization or a State. This includes an analytical report on the credibility of a witness, recently transmitted to the Prosecutor General and the investigative judge assigned to the Hariri case. This process is of particular importance where the information is relevant to individuals who are detained, as it may assist the Lebanese authorities in taking any steps they deem appropriate or necessary in relation to detention.²⁸

30. This appears to have been an oblique reference to the circumstances of the four generals and the credibility of the witness upon whom the UNIIC relied to recommend their arrests. However, it neither names them nor categorically states that the evidence against them was not credible.

31. This broad hint, however, was not taken and the four remained in detention until the Special Tribunal became seized of their case in 2009.

²⁷ T. 5 June 2018, pp 123-124.

²⁸ S/2006/962, Sixth report of the International Independent Investigation Commission established pursuant to Security Council resolutions 1595 (2005), 1636 (2005) and 1644 (2005), 12 December 2006, para. 96.

32. On the conditions of their detention, the Working Group reported that ‘all are being held in isolation in cells without light and ventilation, 2 metres long and 1.3 metres wide. Three of the detainees are said to be suffering from serious physical and mental health problems.’²⁹

33. During his detention, Mr El-Sayyed, through his lawyers, sent a number of memoranda to the UNHCR Commissioners and the UN Secretary-General asking them to facilitate his release from custody.

34. The final UNHCR interview with Mr El-Sayyed appears to have occurred on 14 February 2009, when UNHCR’s Chief of Investigations and an investigator interviewed him about ‘matters that you are willing to tackle and things that you think could be useful to the Commission’. The Chief of Investigations, Mr Najib Kaldas, commenced the interview by stating:

We understand everything that happened before today. What I can say and I’ll just say it on the record here; is that the Commissioner at the moment Mr. Bellemare and I’m the chief of investigations are very committed to treat people fairly and to investigate this murder and other matters that we’re investigating fairly, but we are very, very committed to resolving the crime; we have a mostly new team of investigators; so, there is perhaps a new approach to the investigation. You have had some concerns about what’s happened in the past and I will convey those concerns to Mr. Bellemare at your request. I’m happy to that. The main purpose of today that we would like to, and thank you for signing the document, just the document the fact that we are here at your request.³⁰

4. Special Tribunal’s Pre-Trial Judge’s order to release the four generals

35. In the month following Mr El-Sayyed’s final interview with the UNHCR, on 27 March 2009, the Pre-Trial Judge ordered the Lebanese judicial authorities to defer to the Special Tribunal’s competence, and to provide a list of all persons detained in connection with the investigation of the ‘Hariri case’. On 8 April 2009, the Lebanese judicial authorities provided the

²⁹ WGAD report, para. 9.

³⁰ R128-4-0046, disclosure 3521, D0361908_U_EN, ‘UNHCR audio recorded interview of AL-SAYYED Jamil 14 Feb 09 (60111009A). The Oneissi Defence disclosed this interview to the Trial Chamber before Mr El-Sayyed testified.

list, which contained only the names of the four generals, and on 10 April 2009, the results of the investigation and a copy of the relevant court records.³¹

36. On 27 April 2009, the new Prosecutor, Mr Bellemare, filed a submission before the Pre-Trial Judge, stating that the four should be released with immediate effect.

37. He stated that he had reviewed all the records and ‘taken account, in light of a review of all this information, of inconsistencies in the statements of key witnesses and of a lack of corroborative evidence to support these statements’ and ‘taken account of the fact that some witnesses had modified their statements and one key witness had expressly retracted his original statement incriminating the persons’.³² On 29 April 2009, the Pre-Trial Judge ordered the release of the four, ‘unless they are held on another basis’.³³ They were immediately released.

38. With due respect to Mr Bellemare—who was the UNIIC Commissioner from 1 January 2008—and his submission to the Pre-Trial Judge arguing that the four should be released, none of this could have been new to him. The relevant key witness retraction had occurred three years and five months before, in November 2005. As the third UNIIC Commissioner he had to have known all of this, and, additionally, that his predecessor, Mr Serge Brammertz had formed the view that there was no credible evidence against any of the detained four.

39. At the time when the Pre-Trial Judge ordered Lebanon to defer the *Hariri* case to the Special Tribunal, namely in March 2009, Mr Bellemare—as is evident from the indictment confirmed in June 2011—was investigating those whose mobile telephones might be connected with the attack. There has never been any suggestion, so far as I am aware, that Mr El-Sayyed’s mobiles had any connection with the attack or the five Accused.

5. Proceedings before the Special Tribunal

40. Well over ten years ago, on 17 March 2010, Mr El-Sayyed filed an application before the Special Tribunal’s President requesting the ‘release of evidentiary material related to the crimes of libellous denunciations and arbitrary detention’. The President assigned the matter to the Pre-

³¹ Order regarding the detention of four Generals, paras 3-4.

³² Submission of the Prosecutor to the Pre-Trial Judge Under Rule 17 of the Rules of Procedure and Evidence, 27 April 2009, para. 30.

³³ Order regarding the detention of four Generals, disposition.

Trial Judge, who, on 17 September 2010, ruled that he had jurisdiction to determine the substance of the application.³⁴

41. The Prosecutor, Mr Bellemare, had opposed Mr El-Sayyed's application, and appealed the decision. The Appeals Chamber dismissed the appeal on 10 November 2010, and remanded the matter to the Pre-Trial Judge to consider the merits of Mr El-Sayyed's application, namely his request for access to documents that may be contained in his criminal file.

42. Mr El-Sayyed filed his application before the then President four and a half years after the commencement of his detention without trial. Another ten years has elapsed, meaning that almost fifteen years have now passed since he was detained on the recommendation/request of the UNHCR Commissioner, Mr Mehlis. According to the UN Working Group report, as is noted above, one of the two 'false witnesses' against him 'withdrew his declaration publicly at a press conference held on 27 November 2005'.³⁵

43. The litigation regarding Mr El-Sayyed's access to the material sought continues at the Special Tribunal, with the Prosecutor filing regular updates every six months to the Pre-Trial Judge on his disclosure of material to Mr El-Sayyed. The Prosecutor's last filing was on 11 June 2020, referring to an order made almost eight years earlier by the Pre-Trial Judge.³⁶

6. Who bears responsibility?

44. At the conclusion of Mr El-Sayyed's testimony, I said the following to him:

We thank you for coming and providing evidence, which we will of course assess in the same way as we will assess the evidence of all the other witnesses who have given evidence on points. Look, we do understand that there are some emotions here because of your incarceration for I think it was three years and eight months. I think between the 30th of August, 2005 and the 29th of April, 2009.

³⁴ CH/PTJ/2010/005, F0019, Order relating to the jurisdiction of the Tribunal to rule on the application by Mr El Sayed dated 17 March 2010 and whether Mr El Sayed has standing before the Tribunal, 17 September 2010.

³⁵ WGAD report, para. 15.

³⁶ STL-El Sayed/PTJ, F0182, Prosecution's Submission in Compliance with the "Decision Setting a Deadline for the Prosecutor to Disclose to Mr. El Sayed the Documents Mentioned in the Pre-Trial Judge's Order of 12 May 2011" of 8 October 2012, 11 June 2020.

And we understand it's difficult for you to be detached and objective about the Tribunal itself, as you're associating the continuation of the Tribunal with what happened at the UNHCR. But you appreciate the Prosecutor came in 2012, and Mr. Povoas some years later. They have nothing to do with what occurred to you and the others who were detained, and they are doing their job professionally. And the investigation has proceeded after the establishment of the Tribunal, and you know one of the first -- the first judicial acts was to release you.

Now, the media reported the other day that I'd said that I was offering an apology on behalf of the Tribunal to you. I didn't and I can't. It's not my role. But I can certainly recognize, as an independent Judge, that your detention was unlawful and it was contrary to international human rights. It was reported by the Human Rights Council, and even after that it continued.

And whatever the motivations in arresting you in the first place, and I make no judgement about that. You were arrested under the -- in accordance with Lebanese law. The detention clearly wasn't and just -- it wasn't in accordance with international human rights standards. Lebanon is a signatory to the International Convention on Civil and Political Rights. And this is my view as a Judge, an independent Judge, that once a commissioner working for the United Nations, an independent commissioner forms a view that there is no evidence against someone who is in detention, even if they're detained by other authorities but at the behest of the commission, the commissioners have a moral and legal duty to do something about it. They have no legal power to do anything but they do have what's called the moral -- that they do -- that they can take steps such as included in communications or reports, and the reports of the UNHCR from the 3rd through to the 11th report, nine reports were silent on the detention. In my view, that was something which should not have occurred.

Once those who were in higher position had formed the view that there is no credible evidence against detainees, it's incumbent upon them to take the appropriate action to ensure that someone in your position is released. You can't be detained for three years and eight months without charge or trial. It's a clear breach of your rights.

So it's not an apology on behalf of the Tribunal. It wasn't the Tribunal that did it. It's just a recognition that it should never occur again.³⁷

³⁷ T. 7 June 2018, pp 35-37.

45. So, how should this shameful episode be resolved? Nothing on the trial record gives any confidence that Mr El-Sayyed will receive compensation, an *ex-gratia* payment or an apology from the Lebanese government. The Trial Chamber received much evidence at trial concerning aspects of dysfunctionality in Lebanese state institutions.

46. The essential matter of causation, which does not seem to be in dispute, is that Mr El-Sayyed was detained on Mr Mehlis's 'recommendation' or request, for interrogation by UNIIIC officials. Mr El-Sayyed was detained by the UNIIIC for three or four days before being taken before a Lebanese judge. That judge continued the detention on the basis that the UNIIIC was investigating his possible role in Mr Hariri's assassination.

47. However, the main witness against Mr El-Sayyed, Mr Hussam, publicly recanted in a televised press conference on 27 November 2005, thus raising real questions about his credibility in any investigation or court proceedings. This is irrespective of his reasons for withdrawing his allegations.

48. Mr Mehlis's first report to the Security Council, of 19 October 2005, had relied upon Mr Hussam's account as the basis for the continuing detention of the four generals. His second report, of December 2005, however, stated that Mr Hussam's televised appearance was 'coerced' at 'the behest of the Syrian Judicial Commissions charged with investigating the Hariri assassination'.³⁸ Of the four generals, the second report referred to a new, unnamed witness who had provided a report that 'strengthens the evidence confirmed to date against the Lebanese officers in custody, as well as high-ranked Syrian officers'.³⁹

49. In March 2006, the third UNIIIC report—the first produced by Mr Brammertz—stated that '10 individuals are still held in custody in connection with the Hariri investigation', and all were suspected of committing crimes under the Lebanese Criminal Code, including 'persons suspected of instigating and participating in the planning and execution of the crime'.⁴⁰ It did not mention that they then had remained in custody for six and a half months, without any formal charges.

³⁸ S/2005/775, Second report of the International Independent Investigation Commission established pursuant to Security Council resolutions 1595 (2005) and 1636 (2005), 10 December 2005, para. 30.

³⁹ Second UNIIIC report, para. 34.

⁴⁰ S/2006/161, Third report of the International Independent Investigation Commission established pursuant to Security Council resolutions 1595 (2005), 1636 (2005) and 1644 (2005), 14 March 2006, paras 48-49.

50. It is unclear from when the UNHCR Commissioner(s) realised that there was no admissible evidence against Mr El-Sayyed, and presumably his fellow detainees, who are the subject of the Working Group's report. But from whenever that moment was, they should have insisted on his immediate release from unlawful detention. In other words, when the UNHCR stopped investigating Mr El-Sayyed as a suspect and turned its attention elsewhere—unless the Lebanese authorities had a lawful reason to keep him in detention—he should have been released, or charged with committing a crime.

51. The Working Group found that it had no mandate to rule on human rights violations caused by the UN's actions. Concerning the UN's responsibility (in 2007) for the continuing unlawful detentions in Lebanon, it concluded that:

The Working Group considers that it is thus not competent to rule on the arbitrariness of detentions resulting from violations imputed to investigators acting within the framework of an international investigation commission set up by the Security Council.⁴¹

52. This is what could be termed a 'legal loophole', rather than the 'grey area' referred to above. The Working Group also reported that:

The Lebanese examining magistrate responsible for the case acknowledges that he has no evidence against General El Sayed or against the other detainees but has to date not taken any decision pending completion by the International Investigation Commission of its investigations and its transmission to him of details concerning the detainee. Mr. Brammertz's report dated 12 December 2006 indicates that the International Investigation Commission has transmitted to the Lebanese courts information on the individuals who are in detention, being aware that this can help the Lebanese authorities take the steps which they deem appropriate or necessary concerning their detention, and reaffirms the exclusive responsibility of the Lebanese courts for decisions relating to the detention of these persons.⁴²

53. It concluded as follows:

⁴¹ WGAD report, para. 36.

⁴² WGAD report, para. 26.

The Working Group concludes that, if from the examination of the communication it is concluded that the detention is of an arbitrary character, the Lebanese Government bears full responsibility for it.⁴³

7. What the UN and UNIIC should have done

54. Senior UN officials must act courageously and according to international human rights instruments, many of which emanate from the UN itself, including the International Covenant on Civil and Political Rights (ICCPR). The Working Group found that Lebanon was breaching this human rights instrument by its continued arbitrary detention of Mr El-Sayyed and the others.

55. Putting to one side Mr Mehlis, who clearly was not going to take action, in my view, his two successors as UNIIC Commissioner should have taken *active public* steps for the immediate release of anyone detained at the UNIIC's behest against whom there was no admissible evidence. Once it was apparent that the reasons for their arrest, at the UNIIC's request were flawed, and that there was no reliable evidence against them—such as a formerly star witness recanting his testimony—they should have sent a loud and clear *public* message to the Lebanese authorities that the continued detentions breached international human rights law.

56. The Commissioners could have done this in their regular annual reports to the Secretary-General or addresses to the Security Council. Or they could have issued a separate public report on the topic. They did neither. The situation was that on one hand, one UN agency—the Human Rights Council—was investigating and determining that the detention was arbitrary and breaching the ICCPR, while, on the other, the agency responsible for the breach, the UNIIC, remained publicly silent about it.⁴⁴

57. To summarise: Mr El-Sayyed was arrested and detained at the UNIIC's behest; held incommunicado in the initial phases without access to a lawyer; accused of committing a terrorist

⁴³ WGAD report, para. 39.

⁴⁴ Alamuddin and Bonini, 'The UN Investigation of the Hariri Assassination', at p. 60, fn. 57, refers to an interview with Mr Brammertz. However, as of 4 August 2020, the link on the UN website was broken. 'Informal Comments to the Media by the Commissioner of the UN International Independent Investigation Commission into the Assassination of Former Lebanese Prime Minister Rafiq Hariri, Mr Serge Brammertz, on the Situation in the Middle East', UN Webcast Archives(19 July 2007)6m15–6m30) accessed 2 December 2013). In his addresses to the Security Council in 2006 and 2007, Mr Brammertz made no mention of the plight of the detainees. S/PV.5597, provisional, Monday 18 December 2006; and S/PV.5790, provisional, 5790th meeting, Wednesday, 5 December 2007. Neither did Mr Bellemare in his address, S/PV.6047, provisional, 6047th meeting, Wednesday 17 December 2008.

act and lying about it; bullied and threatened by an investigator while in custody; and, on his sworn testimony before the Special Tribunal, told to go find a suitable victim or it would be him. He was then detained without charge or trial until 28 April 2009, but without mention in the UNHCR's regular reports to the Security Council that it had no reliable evidence justifying his continued detention.

58. Lebanon ignored the Working Group's opinion, addressed to its government on 27 April 2007. The opinion forcefully stated that the responsible Lebanese investigating magistrate acknowledged having no evidence against Mr El-Sayyed, although the government had disputed that the magistrate had said this, as the investigation was secret.⁴⁵ Yet he remained in detention for another two years.

59. The detainees should have been released. There was no legal 'grey area'. They were detained long after the original reasons for their arrests had gone. There is no indication that Mr El-Sayyed was under investigation for involvement in the attack on Mr Hariri, at least from the time of Commissioner Brammertz's report in December 2006, which appears to suggest although not explicitly, that he was not.

8. Resolution of the matter

60. The cost to the international community, and Lebanon, through its annual contributions to the Special Tribunal's budget, of dealing with the El-Sayyed litigation—specifically, the cost of the time spent by Prosecution and Registry officials, and the judges and staff of the Pre-Trial and Appeals Chamber—must surely by now greatly exceed the cost of any reasonable compensation payable by the Lebanese Republic to Mr El-Sayyed. And this unending litigation before the Special Tribunal continues.

61. This matter cries out for national and international resolution. The UN and Lebanon, in my view, jointly share responsibility for what occurred to the 'four generals'. The UNHCR, a UN agency, was responsible for their arrest and detention. The Lebanese investigating and judicial authorities then detained them without charge for three years and eight months, but on a number

⁴⁵ WGAD report, paras 26, 29.

of occasions during what was obviously an unlawful detention, UNIIIC officials were given access to interview them.

62. The UN, through its agency the UNIIIC, clearly bears some culpability here, irrespective of the legal niceties about the detainees being the responsibility of the Lebanese investigating authorities who were conducting their own investigations into the attack on Mr Hariri. In my view, the legal and moral responsibility is shared between the UN and Lebanon.

63. Lebanon and the UN, in my view, should therefore jointly compensate Mr El-Sayyed and the others who were unlawfully detained, and offer a public apology. And lessons should be learned from this unfortunate episode in UN investigatory and fact-finding missions.

64. Of course I am not privy to any discussions between the UN and Mr El-Sayyed's lawyers, but if the UN has not already reached a settlement with Mr El-Sayyed, it should; it has a legal and moral duty to compensate him for the consequences of its actions, and inactions, from 30 August 2005 onwards.

9. Why it is unlikely that Lebanon will compensate Mr El-Sayyed for his unlawful detention

65. Confidence that Lebanon will assume any responsibility for these injustices, however, is slight. During the trial, the Trial Chamber received evidence of dysfunctionality in the Lebanese state related to its government and governance, including its judicial and law enforcement authorities. Collectively, this provides little reason for optimism that Lebanon will right the wrongs here. It is worth highlighting how I have reached this view.

66. One aspect was of the mismanagement of the investigation into the attack on Mr Hariri. The judgment details some of the basic issues, such as how the crime scene was not secured, was contaminated and evidence was lost, and a senior Lebanese official correctly described the scene as 'chaotic'. There was no clear line of responsibility for the investigation. The FitzGerald fact-finding report reached the same conclusions.⁴⁶

⁴⁶ 'The review of the investigation indicates that there was a distinct lack of commitment on the part of the Lebanese authorities to investigating the crime effectively, and that this investigation was not carried out in accordance with acceptable international standards. The Mission is also of the view that the Lebanese investigation lacks the confidence

67. The ISF forensic team that retrieved vehicle parts from the crime scene took them to their office without photographing them *in situ*. The investigating judge then ordered them to take the parts back to the crater and to photograph them where they found them. The team then tried to do this. The forensic officials also did not use protective equipment such as forensic suits, nor even gloves.

68. On the night of the attack, the military investigating judge ordered the burnt-out vehicles at the crime scene to be removed, apparently because the authorities wanted the road reopened the next day. Bulldozers and tow trucks then drove onto the crime scene area to remove the vehicles in Mr Hariri's convoy. They were then taken to a police holding yard where they were left in the open and exposed to the elements for another six months.

69. The body of one victim, Mr Zahi Abou-Rjeileh, was found a day after the attack, and the medical examiner reported he had been alive for twelve hours after the explosion. The body of another, Mr Abdul Hamid Ghalayini, was found seventeen days later, and by his family rather than by investigating authorities.

70. Another matter of concern explored in the judgment is the arbitrary way in which some victims of the attack on Mr Rafik Hariri received compensation, while others received nothing. Participating victims complained about this in their evidence at trial. The payment of compensation to victims of the attack was indiscriminate, and according to the evidence, often based upon connections rather than an objective assessment of injury or need.

71. Evidence was also given of Syrian military intelligence officials attempting to obtain information about the investigation.

72. The envelope and VHS cassette containing the video of the false claim of responsibility disappeared after Al-Jazeera's Beirut bureau chief, Mr Ghassan Ben-Jeddo, gave them to Mr El-Sayyed, the day after the attack. Mr El-Sayyed says that he gave them to the military investigating judge. What happened to these crucial pieces of evidence is a mystery.

of the population necessary for its results to be accepted.' S/2005/203, Report of the Fact-finding Mission to Lebanon inquiring into the causes, circumstances and consequences of the assassination of former Prime Minister Rafik Hariri, 24 March 2005, executive summary.

73. Innocent people were rounded up, interrogated, held without charge and eventually released.⁴⁷

74. The long detention of the ‘four generals’ was the subject, as noted above, of this UN Human Rights Council’s report. The Lebanese government and judiciary refused to take steps to release the four men long after it was apparent that no legal basis existed to continue what had become an unlawful detention. The Working Group on Arbitrary Detention strongly makes this point.

75. There was an attack on Mr Marwan Hamade’s life on 1 October 2004. Despite his position as a prominent public figure, his case was never properly investigated. Mr Hamade testified in the trial that he had given a statement before an investigating judge. About ten days after the attack the Minister for the Interior visited him in hospital and told him that ‘the Syrian intelligence came, took over the file, and took all the evidence and files and reports to the Syrian intelligence headquarters in Anjar’.⁴⁸ Despite the Syrians leaving Lebanon in April 2005, the attack on Mr Hamade appears not to have been investigated between then and its transfer to Special Tribunal as a connected case under the Statute of the Special Tribunal for Lebanon, in 2009.

76. Mr Wissam Al-Hassan, on loan from the ISF to Mr Hariri as his chief of security at the time of the attack, returned to the ISF to take up a senior position in the investigation into Mr Hariri’s death. He also liaised extensively with the UNIIIC and the Office of the Prosecutor. This was despite the conflict of roles and his obvious lack of neutrality in the investigation.

77. While he was the prime minister of Lebanon, Mr Hariri also had extensive media, property and construction interests that overlapped with his governmental duties.

78. For at least eleven years before his death, Mr Hariri was giving monthly cash payments to the chief of Syrian military intelligence in Lebanon, Mr Rustom Ghazaleh. The evidence was of Mr Hariri paying the late Mr Ghazaleh, who died soon after the evidence was adduced, millions

⁴⁷ Mr Mehlis’s first report to the Security Council stated that ‘As a result of the Commission’s investigation to date, a number of people have been arrested and charged with conspiracy to commit murder and related crimes in connection with the assassination of Mr. Hariri and 22 others. The Commission is of course of the view that all people, including those charged with serious crimes, should be considered innocent until proven guilty following a fair trial’. First UNIIIC report, para. 223. Not one of this ‘number of people’ who were ‘charged with conspiracy to murder’ faced trial before the Special Tribunal, nor so far as I am aware, a Lebanese court. The ‘four generals’ were never charged with committing crimes connected with Mr Hariri’s murder, and self-evidently had not been so charged when the report was written in October 2005.

⁴⁸ Marwan Hamade, T. 8 December 2014, pp 31-36.

of US dollars over the period. The payments started at USD 40,000 per month and increased to USD 67,000 per month, with Mr Ghazaleh demanding an extra month's payment two days before Mr Hariri's murder.

79. The Lebanese government also repeatedly failed to cooperate with the Special Tribunal by responding to legitimate requests for assistance from Defence counsel through the Defence Office. The Trial Chamber had to issue two orders to Lebanon to comply.⁴⁹ Thereafter, it had to engage in a time-wasting exercise of what basically was a lengthy period of negotiation in an effort to convince Lebanon to comply with its international legal obligations pursuant to Security Council resolution 1757.

80. The Trial Chamber expended a great deal of effort into dividing the documents sought into easily understood categories, including specifying the government agency that should have been expected to hold the documents, if they existed. Despite this, Lebanese government officials responded effectively stating that they did not understand the nature of the requests. The Trial Chamber then rewrote what had been perfectly clear orders. It took over four years to resolve an issue that should have resolved itself within weeks, if not a few months at the most, had the Lebanese government been inclined to cooperate with the Defence requests for assistance.

81. These random examples, and it is emphasized that these come from the trial record, suggest that little hope exists that the Lebanese authorities will right the wrong against those who were arbitrarily detained. It is of course appreciated that some of these incidents date back to 2005. But against this, the fact that Mr El-Sayyed's litigation continues before the Special Tribunal indicates that he has not yet attained justice in Lebanon for what occurred.

82. In these circumstances, the United Nations should, if it has not already, move to compensate those who were wrongly detained for years on the basis of the recommendations of its officials. It should formally apologise for what occurred.

⁴⁹ This is detailed in the procedural history, annex A, to the judgment.

D. Some observations on the Defence Office

83. Some observations are made here regarding the experience of having an independent Defence Office, with a head who has a right of audience before the chambers. The points made may assist in critically evaluating this experiment, and hence in deciding whether the model requires modification for adoption in any future international institution.

84. This model does not exist in any other operational international criminal court or tribunal. It has not been replicated in any functioning international criminal court or tribunal established post the Special Tribunal's establishment, namely, the International Residual Mechanism for Criminal Tribunals (2010), the Residual Special Court for Sierra Leone (2012), and the Kosovo Specialist Chambers and Specialist Prosecutor's Office (2016).⁵⁰ No head of a defence office situated with an international court registry has an automatic right of audience before a chamber.

85. The Statute specifies that the Defence Office is an independent organ with an independent Head of the Defence Office, who, under Article 13 (1), 'shall be responsible for the appointment of the Office staff and the drawing up of a list of defence counsel'. Article 13 (2) specifies that the Defence Office:

shall protect the rights of the defence, provide support and assistance to defence counsel and to the persons entitled to legal assistance, including, where appropriate, legal research, collection of evidence and advice, and appearing before the Pre-Trial Judge or a Chamber in respect of specific issues.

86. It bears some similarities to Regulation 77 (2) 'Office of Public Counsel for the defence' of the International Criminal Court's Regulations of the Court that establishes the Office of Public Counsel as a 'wholly independent office' that falls within the Registry 'solely for administrative purposes'. Regulations 77 (4) (a), (b) and (c) provide:

4. The tasks of the Office of Public Counsel for the defence shall include:

⁵⁰ Article 22C of the 2014 Protocol to the Amendments to the Protocol on the Statute of the African Court of Human Rights and Justice (Malabo Protocol) combines the Special Tribunal's and ICC's regulatory framework in establishing an independent Defence Office, including a right of audience before the court. It has not entered into force, having as of 7 August 2020, received fifteen signatures but no ratifications: fifteen ratifications of the 55 State Parties are required for it to enter into force.

(a) Representing and protecting the rights of the defence during the initial stages of the investigation, in particular for the application of article 56, paragraph 2 (d), and rule 47, sub-rule 2.⁵¹

(b) Providing general support and assistance to defence counsel and to the person entitled to legal assistance, including legal research and advice ...;

(c) Appearing, on the instruction or with the leave of the Chamber, in respect of specific issues.

1. How the Head of the Defence Office exercised the rights of audience before a chamber

87. The manner in which successive Heads of the Defence Office have exercised their statutory right to appear before the Trial Chamber has raised some real issues as to whether the ICC model is preferable, namely, where appearance is permitted only on a chamber's direction or with its leave.

88. The Rules give the Head of the Defence Office, or their delegate, a right of audience before a chamber. Under Rule 57 (F):

At the request of a Judge or Chamber, the Registrar, the Defence or where the interests of justice so require, *proprio motu*, the Head of Defence Office or a person designated by him shall have rights of audience in relation to matters of general interest to defence teams, the fairness of the proceedings or the rights of a suspect or accused.

89. Rule 57 (C) specifies that:

The Head of Defence Office shall, for all purposes connected with pre-trial, trial and appellate proceedings, enjoy equal status with the Prosecutor in respect of rights of audience and negotiations *inter partes*.

90. The ICC Regulations do not permit this for its chief of Office of Public Counsel for the defence, specifying in Regulation 77 (4) (c) and (d) that the Office may appear only 'on the

⁵¹ Article 56 (2) (d) relates to having counsel appearing for someone who has been arrested or appears before the court in response to a summons, while Rule 47 (2) relates to the presence of counsel if the Prosecutor is authorized to take testimony pursuant to Article 15 (2).

instruction or with the leave of the Chamber'. The office also acts for suspects or accused persons and advances submissions on the instructions or with the leave of the Chamber. When necessary, this office has filed *amicus* briefs in cases, or appeared with leave. This, in my view, is an efficient model that has worked well in practice.

91. By contrast, the experience at trial at the Special Tribunal was of the Head of the Defence Office not always properly exercising this right of audience during the trial. To provide some insight in this respect and thus to illustrate the issues the Trial Chamber faced in the proceedings, several instances are highlighted below.

(a) Intervention during the Prosecutor's opening statement in *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra*

92. The Prosecutor made a very late application to join the case of Hassan Habib Merhi to that of the case of the initial four Accused.⁵² He did this on 18 December 2013, only four weeks before the scheduled commencement of the trial, when he asked the Pre-Trial Judge to refer the issue of joinder to the Trial Chamber.⁵³ The Merhi Defence opposed the referral,⁵⁴ and the Pre-Trial Judge made the referral on 2 January 2005.⁵⁵ The Prosecutor, meanwhile, on 30 December 2013, had applied directly to the Trial Chamber asking it to join the two cases.⁵⁶

93. The Trial Chamber invited counsel for Mr Merhi to attend the opening of the *Ayyash* case as observers. Instead of doing this, the three assigned counsel sat in the public gallery of the court, wearing their court robes. The Head of the Defence Office, Mr François Roux, on the other hand, appeared in the court room, accompanied by four lawyers from his office and announced that he was 'representing in these hearings the counsel, defence of Mr. Merhi, Mr. Aouini and Jad Khalil from Beirut, they are both here in the gallery'.⁵⁷

⁵² Annex A to the judgment, of the procedural history, fully sets this out.

⁵³ STL-13-04/I/PTJ, *Prosecutor v. Merhi*, F0033, Prosecution Request for Rule 89 (E) Referral of the Matter of Joinder, 18 December 2013; STL-11-01/PT/TC, *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra*, F1272, Prosecution Notice of Request for Pre-Trial Judge to Refer the Matter of Joinder of the Merhi Case to the Ayyash et al. case to the Trial Chamber, 18 December 2013.

⁵⁴ STL-13-04/I/PTJ, *Prosecutor v. Merhi*, F0046, Observations de la Défense relatives à la requête du Procureur aux fins de transfert à la Chambre de première instance de la question de la jonction, 30 December 2013.

⁵⁵ Joinder referral decision.

⁵⁶ STL-11-01/PT/TC, *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra*, F1289, Prosecution Motion for Joinder, 30 December 2013.

⁵⁷ T. 16 January 2014, p. 3.

94. This was legally incorrect. The Head of the Defence Office has no representational role for Defence counsel who are already assigned to represent an Accused.

95. The Trial Chamber had decided to allow Mr Roux to make a brief statement ‘concerning the rights of a fifth accused who is not a party to this trial’.⁵⁸ Mr Roux, however, objected to the Trial Chamber’s expressed order of proceedings, and stood up to demand a right to address it before the Prosecutor made his opening. He said:

This is just a question of procedure. We’re not following the right procedure. I believe I need to present my express reservations before any address of the merits. This is why -- this needs to be done according to procedures, according to the Lebanese procedure. Express reservations need to be made before addressing the substance of the case, the merits of the case, and of course we are following Lebanese procedure.⁵⁹

96. This too was legally incorrect. Nowhere does the Special Tribunal’s Statute or Rules specify that this international hybrid tribunal follows what Mr Roux described as ‘Lebanese procedure’. In fact, its Rules of Procedure and Evidence essentially combine the procedures of the ICC and the International Criminal Tribunal for the Former Yugoslavia (ICTY), but with some procedural innovations, such as the addition of a Pre-Trial Judge. The applicable procedural law is international criminal procedural law.

97. By analogy, Mr Roux’s intervention in this manner would be tantamount to his equivalent at the ICC, the Principal Counsel of the ICC’s Office of Public Counsel for the defence, informing the court that it was not following ‘correct procedure’ by not permitting him to address the court before the Prosecutor. And after this, telling the court that it should be applying the court procedures of, say, the Democratic Republic of the Congo or the Central African Republic—depending on the case—rather than those in the Rome Statute or the ICC’s Rules of Procedure and Evidence. It is difficult to imagine this occurring.

98. When Mr Roux had the opportunity to make his comments the following week, he again complained about not being allowed to make them before the Prosecutor’s opening, and criticised the Prosecutor for mentioning Mr Merhi’s name 124 times in his opening statement. And further,

⁵⁸ T. 16 January 2014, p. 6.

⁵⁹ T. 16 January 2014, p. 8.

that the Merhi Defence could not respond to this, and thus was unable to properly defend Mr Merhi.⁶⁰ He also stated:

Since Mr. Merhi's Defence team has no leave to address the Court in this hearing, it has asked me to speak on its behalf. The Merhi Defence team - again, let's remember we're still last Thursday morning – thanks the Bench for its invitation to attend this hearing as guest observers, a notion *sui generis* that does not exist in our Rules.⁶¹

99. Again, these statements are legally and factually incorrect. The indictment filed by the Prosecutor on 21 June 2013 named Mr Merhi as a co-conspirator to the conspiracy charged; his name is mentioned 48 times in the document. The indictment against Mr Merhi, filed on 5 June 2013 and confirmed on 31 July 2013, also charged him with participating in a conspiracy and of being an accomplice to committing a terrorist act by means of an explosive device, among other charges.

100. In these circumstances, no legal basis could exist to suppress the name of a co-accused—although indicted in another, as yet, not joined case—from a Prosecutor's opening statement, which is based on the pleadings in the indictment. These included the allegation that Mr Merhi had participated in the conspiracy and other counts charged. He was alleged to have had an integral role in the conspiracy.

101. Mr Roux also had no basis to state that counsel acting for Mr Merhi had 'no leave to address the Court in this hearing'. The Trial Chamber had expressly invited them to attend as observers and would have allowed them to address the court if they had requested this. Mr Roux as the Head of the Defence Office had no role in second-guessing whether the Trial Chamber would grant a right of audience to counsel in another intrinsically connected case.

102. The Trial Chamber, in its written decision to join the two cases, responded to Mr Roux's intervention. It is worth extracting a portion of the decision, if only to highlight how misguided and time-wasting the interruption was, including having to deal with it in a written decision. The Trial Chamber held:

⁶⁰ T. 20 January 2014, p. 9.

⁶¹ T. 20 January 2014, p. 8.

At a pre-trial conference in the *Ayyash* case on 9 January 2014, the Head of the Defence Office stated that the Defence Office was the ‘sole entity’ to represent the interests of Mr. Merhi in the *Ayyash* case, a point he repeated on 20 January 2014 after the Prosecutor’s and Legal Representatives of Victims’ opening statements in the *Ayyash* case. However, at the same time he stated, somewhat paradoxically, that it was not his role to respond on behalf of counsel for Mr. Merhi to the Prosecutor’s opening statement because ‘I don’t have any knowledge of the merits of the case file.’

The Trial Chamber, applying the Statute and the Rules, decides who will appear before it and in what capacity. Despite the provisions of Rule 57 (F), the Trial Chamber does not agree that Mr. Merhi’s interests required the intervention of the Head of the Defence Office in that manner as ‘sole entity’ *after* he had appointed three counsel to represent Mr Merhi at trial. Moreover, the Trial Chamber repeatedly invited counsel for Mr. Merhi to be present’ in the *Ayyash* proceedings as ‘observers, and they chose to observe the proceedings from the court’s public gallery during the opening of the case, and for the first three days of evidence. This was despite the Trial Chamber’s invitation for them to sit in the courtroom. Doing so could have enabled them to raise any concerns or reservations—not as a Party, as no joinder had been ordered—but by through the Trial Chamber’s general powers under Rules 130 and 131 to control its proceedings and ensure that they remain fair, impartial, and expeditious.⁶²

103. The Trial Chamber also rejected as ‘without legal foundation’ his arguments that the Prosecutor should not have named Mr Merhi in his opening.⁶³

(b) Intervention in the litigation concerning the reported death of Mustafa Amine Badreddine

104. After Mr Badreddine’s reported death in Syria in mid-May 2016, the Head of the Defence Office several times decided to intervene in the proceedings. He did this to support general Defence submissions, but also, additionally, to make representations on behalf of someone that he was arguing was deceased.

⁶² F1424, Decision on Trial Management and Reasons for Decision on Joinder, 25 February 2014, paras 7-8 (footnotes omitted).

⁶³ Decision on Trial Management and Reasons for Decision on Joinder, 25 February 2014, para. 59.

105. The Trial Chamber, on 11 July 2016, on the Appeals Chamber's three to two majority instruction, had terminated the proceedings against Mr Badreddine and ordered the Prosecutor to file an amended indictment to reflect this.⁶⁴ While it was doing this, the trial continued.

106. Mr Roux, however, again decided to intervene. In his filing, he observed that Mr Badreddine, whether dead or no longer in the proceedings, continued to have a presumption of innocence. He stated that:

The Head of Defence Office reiterates his observations aimed at ensuring that the presumption of innocence of Mr Badreddine is respected, including notably the prohibition of admitting into evidence any material relating exclusively to Mr Badreddine.⁶⁵

107. He submitted that Mr Badreddine's name must be removed from the intended amendment to the indictment, because he was no longer an Accused person. Consequently, the Trial Chamber should '**DECLARE** inadmissible any evidence presented exclusively against Mr Mustapha Amine Badreddine following his death'.⁶⁶

108. The Defence Office, however, had no mandate to intervene to protect the 'rights' of someone who was neither a suspect nor an Accused before the Special Tribunal.

109. Employees from his office, who were daily attending court, also twice stood up and attempted to prevent the Prosecution from leading relevant evidence relating to counts in the consolidated indictment. They were doing this—not to protect the rights of the defence as specified in Article 13 (2) of the Statute—but rather to protect the rights of Mr Badreddine, who the Appeals Chamber had decided by majority, was deceased, and was therefore no longer an accused, a suspect or a person (namely a live one) otherwise entitled to legal assistance.

110. On 30 August 2016, just before the resumption of the evidence of the Prosecution's cell site expert witness, Mr J. E. Philips, a Defence Office lawyer who was sitting in the courtroom

⁶⁴ F2633, Order Terminating Proceedings Against Mustafa Amine Badreddine Without Prejudice and Ordering the Filing of an Amended Consolidated Indictment, 11 July 2016.

⁶⁵ F2702, Observations of the Head of Defence Office on the Trial Chamber's Decision of 29 July 2016, 25 August 2016, para. 1.

⁶⁶ Observations of the Head of Defence Office on the Trial Chamber's Decision of 29 July 2016, 25 August 2016, p. 7. (bold emphasis in original).

rose to tell the Trial Chamber that it should not permit Mr Badreddine's name to be used on a slide prepared by the expert during his evidence. She referred to Defence Office filings and stated:

And in those filings, we submitted that the name of Badreddine ought to be removed from the indictment. And this is only to put on the record that right now there is a dispute on the indictment, and so that we understand that the PowerPoint names Mr. Badreddine and attributes phone numbers to Mr. Badreddine.⁶⁷

111. And, 'we are protecting the rights for presumption of innocence that Badreddine benefits from and which goes beyond the interested party's death.' The Trial Chamber sought but did not receive, an answer from her as to the Defence Office's standing to make this intervention during the Prosecution's presentation of its evidence.⁶⁸

112. Five hearings days later, on 6 September 2016, and still during Mr Philips's evidence, another Defence Office lawyer again stood up in court in an attempt to prevent the Prosecution from leading evidence in which Mr Badreddine was named as a co-conspirator.

113. The lawyer was objecting to the expert witness testifying about a slide, in exhibit P1118, slide number 148 entitled, 'Green 023: Mustafa Badreddine', below which was a text box stating, 'The apex of the command group'. That evidence was consistent with the Prosecutor's case as pleaded in the consolidated indictment. The lawyer stood up and interrupted Prosecution counsel—mid-question and mid-sentence—in an attempt to prevent the Prosecution leading evidence in a case to which the Defence Office was not a party.⁶⁹

114. But even after being told he had no standing to make these submissions, and to resume his seat,⁷⁰ the lawyer continued, stating 'Mr. Badreddine today is no longer a suspect, and therefore I

⁶⁷ T. 30 August 2016, p. 129.

⁶⁸ As Presiding Judge I asked, 'What is your standing to make submissions in relation to someone who is neither an accused person nor a suspect before the Court? Article 16 doesn't provide that. It refers to an accused person'. MS. BARBEAU: [Interpretation] Once again, I can't tell you anything more. This is our submission. That we are protecting the rights for presumption of innocence that Badreddine benefits from and which goes beyond the interested party's death'. T. 30 August 2016, p. 130.

⁶⁹ T. 6 September 2016, p. 47.

⁷⁰ PRESIDING JUDGE RE: You appear to be making, Mr. Soufi, an intervention, it would appear, under Rule 57 of the Rules of Procedure and Evidence. Can I please remind you of the terms of the Practice Direction on the Role of the Head of Defence Office in Proceedings before the Tribunal, dated the 30th of March, 2011, in particular paragraph 8, which reads: "If the Head of Defence Office considers that the interests of justice require his intervention orally or in writing *proprio motu*, pursuant to Rule 57(F), he shall inform the Pre-Trial Judge or Chamber in advance whenever possible. The Pre-Trial Judge or Chamber shall hear the other parties to the proceedings on the issue of whether the

fail to understand why the Prosecutor in open session presents him as having been involved in the crime. That was the only reason'.⁷¹

115. It would be inconceivable that employees from the defence offices situated within the registries of other international court and tribunals could come into a courtroom and try to assert in this manner the rights of someone they were arguing was deceased. And further, to attempt to prevent the court from hearing evidence of that person's alleged involvement in a conspiracy alleged in an indictment. Yet, this is exactly what happened here.

116. The Trial Chamber issued its decision confirming the amended consolidated indictment the following day, 7 September 2016. It noted that, as the case against Mr Badreddine had been terminated, neither Defence counsel nor the Head of the Defence Office had standing to make submissions relating to his 'interests'. Nor could they represent a deceased person in criminal proceedings.⁷² The Trial Chamber then made the following order to Mr Roux:

The Head of the Defence Office is obliged, under the relevant Practice Direction, to inform a Chamber in advance of making submissions *proprio motu* in the interests of justice. This was not done. Article 8 of the Practice Direction under the heading 'Section 2 Submissions during Proceedings', states:

If the Head of Defence Office considers that the interests of justice require his intervention orally or in writing *proprio motu*, pursuant to Rule 57(F), he shall inform the Pre-Trial Judge or Chamber in advance whenever possible. The Pre-Trial Judge or Chamber shall hear the other parties to the proceedings on the issue of whether the intervention is in the interests of justice only if the exceptional circumstances of the Case so require.

The Trial Chamber reminds the Head of Defence Office of the wording of, and his obligations under, the Practice Direction and orders him to comply with it in any future anticipated interventions under Rule 57 (F). Cogent policy reasons exist to allow a Chamber to decide whether it should hear the Parties on whether the Head of Defence

intervention is in the interests of justice only if the exceptional circumstances of the case so require". The Trial Chamber directs the Head of the Defence Office to comply with paragraph 8 of the practice direction I have just read. If you wish to make an intervention, you must notify the Chamber in advance in writing. Please resume your seat, Mr. Soufi. Please continue, Mr. Povoas'. T. 6 September 2016, p. 48. He did not. He continued arguing.

⁷¹ T. 6 September 2016, p. 51.

⁷² F2713, Decision Amending the Consolidated Indictment, 7 September 2016, para. 25.

Office—who is not a Party to proceedings, and has assigned Defence counsel to represent the Accused—may intervene in the proceedings.⁷³

117. These three examples demonstrate the Defence Office’s intervention in the proceedings in a manner that could be construed as disruptive.

2. Daily appearances in the trial by multiple representatives of the Defence Office

118. The Defence Office is not a party to proceedings at the Special Tribunal. The proceedings are brought in the name of the Prosecutor and are against the Accused persons named in an indictment. The legal representatives of victims participating in the proceedings are participants. The Head of the Defence Office is not.

119. The Defence Office is the equivalent of an international legal aid office that appoints defence counsel, provides them with assistance, and makes international requests for assistance on their behalf. Its Head also has some statutory functions in relation to the oversight of effective legal representation and others, including consultation in the management of the Special Tribunal and in amendments to the Rules of Procedure and Evidence.

120. Defence Office lawyers, however, sat in the courtroom on every day of the trial, and in every court session. They also did this when the court moved into closed and private session without seeking the Trial Chamber’s permission to remain there. Sometimes the number of Defence Office lawyers exceeded that of the Prosecution or counsel for an Accused. It generally exceeded the number of Trial Chamber staff who were in the courtroom assisting the judges, normally one or two. Sometimes the Head or his (or her) Deputy came to court, and sometimes both. But the rationale for the Defence Office having lawyers in the courtroom every day was never adequately explained.

121. These daily appearances cannot have been to monitor the effectiveness of the legal representation of the Accused, as this could have been done by reading the live transcript, or the daily corrected version, out of court. Reading a transcript of a day’s session is much quicker and more efficient than sitting, for unexplained reasons, in a courtroom all day. And in any event, as

⁷³ Decision Amending the Consolidated Indictment, 7 September 2016, paras 61-62, and disposition.

noted above, Mr Roux took the firm view that he could make no substantive submissions on any evidentiary issue before the Trial Chamber because his Office was not following the proceedings as such. This was with the obvious exception, noted above, of his Office twice attempting to stop the Prosecution from leading evidence in its case.

122. Sending lawyers into court every day must have come at a considerable cost to the Special Tribunal. In this respect, it is noted that the Defence Office throughout the proceedings, with its eleven budgeted posts,⁷⁴ had more staff than the Trial Chamber, which was actually trying the case and simultaneously writing hundreds of decisions, and then drafting the judgment.

123. In the first few weeks of the trial, as the daily presence of representatives of the Defence Office was unexplained, in my capacity as the Presiding Judge of the Trial Chamber, I queried it. It did not appear to be an efficient use of the Special Tribunal's limited resources. The first response to the query was that:

it strikes me that it was taken for read that the Defence Office would be present when it wished to do so and we have been present right from the beginning of these proceedings and we will continue to do so with each passing day.⁷⁵

124. On the second occasion, two weeks later, the same lawyer from the Defence Office attempted to introduce himself by stating on the record who the Defence Office was 'represented by' that day. When told that the Defence Office was not a party to the proceedings, but rather an observer, he insisted that the names of Defence Office lawyers sitting in the courtroom must be

⁷⁴ The Head of the Defence Office is also remunerated at the level of D2 (Director) level in the UN common system, and the Deputy at P5 (Professional) level. The Prosecutor, who has an office of 100 lawyers, investigators, analysts and other staff is remunerated two levels above as an Under Secretary-General. There is an incomparable difference between their different roles and responsibilities.

⁷⁵ T. 24 January 2014, p. 2.

recorded in the court transcript.⁷⁶ The lawyer also stated that to accomplish its mission, it was essential that the Defence Office was in court every day.⁷⁷

125. This continued throughout the trial right through the closing submissions, when Mr Roux's successor as the Head of the Defence Office, Ms Dorothée Le Fraper du Hellen, and her Deputy and other Defence Office lawyers, appeared in the courtroom. This was despite Ms Le Fraper du Hellen's conflict of role and interest in having formerly acted as co-counsel for Mr Merhi.⁷⁸

126. An analogous situation would be of a body with statutory oversight over the workings of a prosecution service sending lawyers into every trial, every day, to watch the proceedings. This simply would not occur. Or of international trial monitors in transitional justice situations observing court proceedings to report on whether they met international standards. The Special Tribunal's trials, however, are not comparable to this situation.

3. Lebanon's cooperation with the Special Tribunal's request for assistance from the Defence Office

127. Mr Roux, as Head of the Defence Office, also did not adequately fulfil his mandate of protecting the rights of the defence by assisting Defence counsel in obtaining assistance from Lebanon.

128. The Special Tribunal, like every other international criminal court and tribunal, has no enforcement arm and relies upon the cooperation of States. The Special Tribunal for Lebanon was established by United Nations Security Council resolution 1757, pursuant to Chapter VII of the

⁷⁶ PRESIDING JUDGE RE: I just want to make an observation here that the Defence Office isn't actually a party to the proceedings and you're not actually – we're noting that the Defence Office has had two people sitting in the proceedings observing, but you're not actually making an appearance for anybody because the parties are the Prosecutor and the four accused and their lawyers and the Legal Representative for the Victims of course are participating parties. So in that sense, all we're doing is noting the fact that the Defence Office has a lawyer and a case manager sitting in the court, for reasons we are not privy to and haven't quite been explained to us why the Defence Office has two people in the court every day. But maybe Mr. Roux can explain that at some point.

MR. SOUFI: [Interpretation] Yes, perhaps he will come and explain that. I just wanted to point it out for the accuracy of the record. I know that it's something that's important for you, Your Honour. I'm very sorry if I have delayed the proceedings; T. 25 January 2014, pp 1-2.

⁷⁷ T. 25 January 2014, p. 3, saying, 'in order to accomplish our mission, which includes observing the proceedings in order to be best able to defend the interests of the accused and the Defence - Defence with a capital D – we believe it's essential, very important, for us to be present to attend the hearings on a daily basis and that's why we are present in court and we shall be in the future'.

⁷⁸ This is detailed in my 'Declaration by Judge David Re in relation to certain fair trial aspects concerning the Defence of Hassan Habib Merhi', chapter XVII of the judgment, below.

UN Charter, and Lebanon accordingly must comply with the Special Tribunal's requests for assistance, irrespective of which of its four independent organs they emanate from. The Rules specifically provide for cooperation with Defence requests for assistance. This is an essential feature of equality of arms between the prosecution and defence, as part of the right to a fair trial mandated under international human rights.

129. The Defence Office thus has a vital role in assisting Defence counsel in obtaining Lebanon's cooperation in their investigations and preparation for trial. Non-cooperation could provide a valid basis to stay a case, either conditionally or permanently, if a chamber could not guarantee a fair trial to an Accused by virtue of a failure to provide such information to the defence.

130. Rule 15, 'Cooperation between National or International Entities and the Defence' provides that:

The Head of Defence Office may seek cooperation in a manner consistent with the Statute from any State, entity or person to assist with the defence of suspects and accused before the Tribunal. In a particular case, such cooperation shall be upon request of the Defence.

131. Under Rules 16 (C) and 18 (C), the Head of the Defence Office may make requests for assistance and cooperation to Lebanon and Third States at the request of the Defence, unless the Head of the Defence Office considers the request to be frivolous.

132. From March 2012 onwards, the Sabra Defence sent some 119 requests for assistance to the Lebanese authorities through the Head of the Defence Office, under a Memorandum of Understanding between the Government of the Lebanese Republic and the Defence Office on the Modalities of Their Cooperation, signed on 28 July 2010. Mr Roux and the Lebanese Minister for Justice were its signatories. The procedural background to the non-cooperation issue is detailed in the procedural history, annex A to the judgment.⁷⁹

133. It was obvious by the time the Trial Chamber assumed jurisdiction in the case, on 25 October 2013, that Lebanon was not cooperating with the Special Tribunal, as the 119 requests for assistance remained outstanding. The Defence Office's memorandum was not achieving its desired aim, namely, to assist the Defence of the Accused in their trial preparations. It was flawed. It had

⁷⁹ At paras 7048-7073.

no enforcement mechanism and only related to the pre-trial phase. Evidently, it required modification or renegotiation.

134. Relevantly, Article 5 (3) of the memorandum, headed, ‘Assistance for Coercive Measures’, provided that:

The Government shall designate the President of the Court of Cassation as Liaison Judge to enforce orders for cooperation issued by the Pre-Trial Judge. To this end, and in accordance with the Statute and the Rules, the Liaison Judge shall, without delay:

- a. maintain the confidentiality of the orders, unless the Pre-Trial Judge considers them to be public;
- b. take any measures necessary to ensure enforcement of the orders issued by the Pre-Trial Judge;
- c. enforce the aforementioned orders or transmit them directly to the competent authorities for enforcement, without delay.

135. The First President of the Lebanese Court of Cassation correctly brought to the Special Tribunal’s attention, in a letter dated 27 November 2013, that he had no enforcement powers as the ‘Liaison Judge’, and that he did not represent the Lebanese Government. He also pointed to the separation of powers between the judiciary and the executive that prevented him from acting as the enforcement mechanism.⁸⁰ He was effectively operating as a post-box and no longer wanted this function.

136. After exploring the issue further, and in an order issued on 13 January 2014, the Trial Chamber agreed. It noted that it was ‘not convinced that this is the most effective or expeditious way to convey a request for assistance to a State’, namely to send requests for assistance to a body that had no means to make compulsive orders to produce documents. It also suggested that Mr Roux should enter into arrangements similar to those that the Prosecutor had with the Lebanese Prosecutor-General, namely with an entity having direct enforcement powers. It also pointed out that the memorandum only referred to the Pre-Trial Judge and not to the Trial Chamber.⁸¹

⁸⁰ Order to cooperate and provide information sought by Badreddine Defence, paras 19-20.

⁸¹ Order to cooperate and provide information sought by Badreddine Defence, paras 21-22.

137. This was urgent: the trial was due to commence on 16 January 2014. Mr Roux, however, resisted this suggestion. On 31 January 2014, the Trial Chamber invited him to ‘make submissions on the most effective way to ensure cooperation with the Lebanese authorities.’⁸²

138. Almost three weeks later, on 19 February 2014, Mr Roux responded, stating that he did not intend to take steps to amend the memorandum. His reasoning was the Lebanese Government had agreed to be bound by the terms of the memorandum because it referred to Security Council resolution 1757, and:

As a consequence, the Head of Defence Office does not intend to undertake steps with a view to amending the Memorandum of Understanding, which fully satisfies the signatories.⁸³

139. However, the signatories who apparently were fully satisfied with the memorandum were Mr Roux, and the *former* Lebanese Minister for Justice, Mr Ibrahim Najjar. Moreover, it was negotiated before there were any Accused persons or even a pre-trial phase. It was no more than a theoretical document that was not working in practice.

140. Mr Roux had never negotiated or put in place an effective mechanism for Defence requests for assistance to Lebanon. Moreover, even after the trial’s commencement and in the face of abundant evidence that the Sabra and Badreddine Defence were not receiving the material necessary to defend the Accused, he was still refusing to accept this reality.

141. On 4 March 2014, the Trial Chamber held a status conference. It again heard submissions on the issue of Lebanon’s cooperation with the Special Tribunal from the Badreddine and Sabra Defence, and Mr Roux. Counsel for Mr Sabra stated that they had received material from ‘the Lebanese’, some of which was within the terms of their requests for assistance relevant to this decision. Mr Roux stated, however, he did not ‘envisage in any shape or form to request any modification at all’ to his memorandum.⁸⁴

⁸² F1379, Decision on Second and Fifth Motions by Counsel for Assad Hassan Sabra and Two Orders to Lebanon to Cooperate with the Tribunal, 31 January 2014. (Decision granting in part Sabra Defence motion for cooperation and orders to cooperate), paras 15-16, disposition.

⁸³ STL-11-01/T/TC, F1412, Conclusions of the Defence Office on the Cooperation of Lebanon, 19 February 2014, para. 4.

⁸⁴ T. 4 March 2014, p. 54.

142. The Trial Chamber consequently, on 31 March 2014, ordered Lebanon to cooperate and to provide the requested material. In doing this, it deliberately bypassed the Defence Office and its (non-functional) memorandum and issued its orders under Rule 20 (A) directly to Lebanon. In the decision it pointed out, regarding Mr Roux's expressed position, that:

whether the text of the Memorandum 'fully satisfies' the signatories—the Head of the Defence Office and the former Lebanese Minister for Justice—is not the test; the issue is whether it is producing the required results for the Defence counsel who need assistance in preparing their cases for trial.⁸⁵

And, further:

The Trial Chamber's view is that the Head of the Defence Office should renegotiate or amend the Memorandum of Understanding to ensure that it contains the necessary additional enforcement mechanisms for Defence requests for assistance. One possibility could be for the Head of the Defence Office to approach the Lebanese authorities to have designated an official with the necessary judicial enforcement powers to act in relation to Defence requests for assistance made under the Memorandum of Understanding. There could be other possibilities.⁸⁶

143. The matter continued, but without Mr Roux budging from his entrenched position that he and Mr Najjar were fully satisfied with the memorandum, irrespective of the reality of whether it was working or not, and sidestepping by omission the fact that Mr Najjar was the *former* minister.

144. The Trial Chamber dealt with this matter again in a status conference on 16 June 2014, attended by the Deputy Head of the Defence Office. As Presiding Judge, I pointed out that:

It is obvious to the Trial Chamber that the MOU has not been working, and so far as we can ascertain, no requests have been ascertained pursuant to this Memorandum of Understanding.⁸⁷

...

⁸⁵ F1471, Further Decision on Motions Under Rule 20 (A) by Counsel for Assad Hassan Sabra and Four Orders to Lebanon to Cooperate with the Tribunal, 31 March 2014, (Further order to cooperate with Tribunal), para 25.

⁸⁶ Further order to cooperate with Tribunal, para 35.

⁸⁷ T. 16 June 2014, p. 29.

The Trial Chamber again stated that the Head of the Defence Office should renegotiate or amend the MOU to ensure that it contains the necessary additional enforcement mechanism. The Trial Chamber, hoping that the Head of the Defence Office would cooperate in this respect, stopped short of issuing an order to him.

In the meantime, the Chamber, not having received a response from Lebanon, intervened and sought the assistance of our -- the Tribunal's Beirut office to find out what had happened. Now, this resulted in a second identical letter from the minister -- almost identical letter from the minister of justice which was sent and received last Thursday, the 9th of June, in which the minister said he'd already responded on the 5th of May, and this, of course, is completely correct. However, the minister said that he had not executed the order of the 31st of March because of the non-existence of an accord between the Lebanese government and the Defence Office to execute these orders and that the Registrar had specifically asked that the Prosecutor-General of Lebanon not be asked to assist in executing in the orders.

The minister of justice said that the MOU between the Lebanese government and the Defence Office must be amended to have a designated person enforce the Trial Chamber's and the Appeals Chamber's orders. Now, this is of course precisely what the Trial Chamber has three times said to the Head of the Defence Office. Now it is abundantly clear that one of the parties to the MOU, that is the minister of justice of Lebanon, is unhappy with it and wants it renegotiated. It is clear that the Lebanese authorities are not satisfied with it. As a result of this, the Trial Chamber will now order the Head of the Defence Office to do this, to renegotiate it. We'll issue a written decision shortly to that effect.⁸⁸

145. Mr Roux did not wait for the written order, and on 27 June 2014, filed a notification stating that he and the Registrar had agreed on a method to renegotiate the memorandum.⁸⁹

146. This, however, was seven months after Lebanon's First President of the Court of Cassation had notified the Special Tribunal that the memorandum was unenforceable, and five and a half

⁸⁸ T. 16 June 2014, pp 31-33. The Deputy Head of the Defence Office also informed the Trial Chamber that the Defence Office had been notified two days earlier that 'for the first time that the Lebanese government wishes to amend this MOU'. And further, that following the status conference on 10 April 2014, 'We informed the Lebanese authorities that the Defence Office was available to the Lebanese government to undertake, if it so wished, and amendment to the protocol'. T. 16 June 2014, p. 39.

⁸⁹ F1600, Notification from the Defence Office further to the oral order dated 16 June 2014 and the "Clarification Regarding Orders to Lebanon to Cooperate with the Special Tribunal" dated 23 June 2014, 27 June 2014.

months into the trial. As set out in the procedural history, in annex A to the judgment, the issue of Lebanon's cooperation with the defence was not resolved until August 2016, some four years after the initial requests had been sent to Lebanon through the Defence Office.

147. The only conclusion available from the facts above, and as incredible as it sounds, is that Mr Roux's intransigence certainly delayed, if not actually impeded Lebanon's cooperation with the defence. This fits uneasily with his statutory mandate to 'protect the rights of the defence'.

4. Head of the Defence Office's intervention when the Trial Chamber sought submissions on the applicable law

148. The Head of the Defence Office also intervened when the Trial Chamber, on 27 July 2017, ordered the Parties, and invited the Legal Representative of Victims, to file submissions on the applicable law on the counts charged in the amended consolidated indictment.⁹⁰

149. On 25 August 2017, Mr Roux sent an *ex-parte* email directly to the three Trial Chamber and two alternate judges, stating that he intended *proprio motu* to make submissions under Rule 57 (F). It was not, however, an administrative email; rather it contained substantive legal arguments concerning the interpretation of the rule. Mr Roux's email also contained a memorandum labelled 'strictly confidential' that in effect was asking the Trial Chamber to reconsider a previous decision it had made.

150. It is highly improper to communicate directly with judges in such a manner, namely, on a substantive legal issue and additionally, without informing or copying the Parties. This is regulated by the Special Tribunal's 'A Code of Professional Conduct for Counsel Appearing Before the Tribunal'—that is binding on the Head of the Defence Office—that specifies, at clause 40 that:

Counsel shall not contact a Judge directly in regard to any matters relevant to proceedings, unless otherwise invited or instructed by the judge and only if the other party is also represented.

⁹⁰ F3254, Order to Parties and Legal Representatives of Victims to file submissions and observations on Lebanese law, 27 July 2017.

151. The Trial Chamber immediately had the email forwarded to the Parties and the Legal Representative of Victims, asking the Prosecution if it wished to make submissions on the matter. It did. Of Mr Roux's conduct, the Trial Chamber noted in a decision on 7 September 2017, that:

Communications of this nature should go through the Trial Chamber's senior legal officer, must be copied to the Parties and Legal Representatives of Victims, and preferably, should be filed. Substantive legal submissions should not be made in *ex-parte* emails.⁹¹

152. The Trial Chamber, on 29 August 2017, and by email, then sought from Mr Roux a submission outlining the reasons for his anticipated intervention. Instead of responding to this, Mr Roux filed submissions on 31 August 2017 stating why he had the right to make submissions. He failed, as requested, to state the reasons for his intervention in the matter.

153. In its decision of 7 September 2017, the Trial Chamber decided to permit Mr Roux to file observations on the applicable law, but limited to 3,000 words and confined to the terms of its order to the Parties. Namely, submissions on the elements of the offences charged and the applicable modes of liability.

154. But instead of doing this, Mr Roux, the following day, 8 September 2017, filed an application to the Trial Chamber asking it to:

- STAY the ruling on the issue of the applicable law opened by the Chamber following its Order of 27 July 2017;

- INVITE the parties and the Head of Defence Office to be heard on the consequences of the ongoing proceedings on the applicable law with respect to the fairness of the proceedings and the rights of the accused in the *Ayyash et al.* case.⁹²

155. The basis for his application was that the Pre-Trial Judge had filed an application under Rule 68 (G) to the Appeals Chamber seeking a ruling on the applicable law on an indictment filed in a connected case, and the Trial Chamber's order related to matters the subject of this. This, however, was misconceived.

⁹¹ F3313, Decision on observations from Head of Defence Office on Lebanese criminal law, 7 September 2007, para. 7.

⁹² F3316, Submissions *proprio motu* from the Head of Defence Office following the Trial Chamber's Order of 27 July 2017 on the Applicable Law, 8 September 2017.

156. The Trial Chamber dismissed Mr Roux's application, which had not been supported by the Defence of any of the four Accused. It noted that Mr Roux's application was factually and legally incorrect, and that it was proceeding on two flawed premises, namely:

The first is that there is a connection between the pre-indictment proceedings before the Appeals Chamber and the legal issues in the *Ayyash* case, whereas there is none. The second is that the Trial Chamber was intending to make findings before hearing any submissions under Rule 167, or indeed final trial submissions, on the applicable law. This is not only speculative, but is misconceived and wrong. This application is without merit.⁹³

157. Mr Roux, however, on 8 September 2017, had sought to have the Trial Chamber certify its decision of 7 September 2017 for interlocutory appeal, with a question of:

Can the right of audience of the Head of Defence Office, in the absence of duly justified exceptional circumstances, be subject to oversight *a priori* by the Chamber?

158. The Trial Chamber dismissed it, holding:

The Trial Chamber's decision to confine the Head of the Defence Office's observations on a specific legal issue to the same topic as that of the Parties and participants—especially in the absence of any information about the topic of his proposed intervention—cannot in any way, much less significantly, 'affect the fair and expeditious conduct of the proceedings, or the outcome of the trial'. The application is without merit and is therefore dismissed.⁹⁴

159. The Head of the Defence Office also did not file any submissions on the applicable law.

160. The sequence of events outlined above, demonstrating how the Defence Office used the Special Tribunal's limited resources, speaks for itself.

⁹³ F3332, Decision dismissing the Head of the Defence Office's application to stay any ruling on the applicable law in the proceedings, 21 September 2017, para. 8.

⁹⁴ Decision denying the Head of the Defence Office certification to appeal the Trial Chamber's 'Decision on Observations from Head of Defence Office on Lebanese criminal law', 22 September 2017.

5. Conclusion

161. In my declaration on whether in certain respects Mr Merhi received a fair trial,⁹⁵ I outlined the conflict of role and interest that the current Head of the Defence Office has, in continuing to monitor the effectiveness of the legal representation of the Accused, in a trial in which she was co-counsel for Mr Merhi until all the evidence was received in the case. I have also pointed out how she and her Deputy had sixteen times disregarded two Trial Chamber orders.

162. The point about Mr Roux, as of the close of 2013, having appointed fifteen counsel to represent the five Accused, of whom fourteen were male, with the sole exception of his former law partner from Montpellier, Ms Le Fraper du Hellen, has already been made in the procedural annex. I only add that this occurred, not in 1913, but in 2013.

163. Nothing more need be said on those matters. However, collectively, these things should raise real concerns about the Defence Office's operation, and how effectively it has fulfilled its statutory mandate 'to protect the rights of the defence'.

164. Specifically, as identified above, the Defence Office: several times disrupted the trial by attempting to assert the rights of someone declared deceased and prevent the Prosecution from leading evidence in a trial; without any legitimate reason and at considerable cost had lawyers in the courtroom every day; impeded the facilitation of defence requests for assistance to Lebanon; improperly directly emailed the Trial Chamber judges, *ex parte*, on substantive legal matters; and repeatedly disobeyed clear Trial Chamber orders.

165. Further, as is set out in my declaration, its current Head cannot fulfil a core statutory function in monitoring the effective legal representation of the Accused in this trial, and potentially in another.

166. Despite the matters pertaining to Mr Roux, and in particular the deficient memorandum of understanding that he negotiated and then refused to renegotiate, he was reappointed by the UN Secretary-General to another three-year term commencing on 1 March 2015.

⁹⁵ Declaration by Judge David Re in relation to certain fair trial aspects concerning the Defence of Hassan Habib Merhi, chapter XVII of the judgment.

167. These observations are necessarily brief, as this is a separate opinion to a judgment. It does not qualitatively evaluate the filings and submissions made by the Defence Office, including to the plenary of judges, about which I have my own personal reservations. The observations are also confined to the conduct of the Defence Office before the Trial Chamber. They do not touch upon anything that has occurred before the Pre-Trial Chamber, the Appeals Chamber, or in two contempt cases, STL-14-05 and STL-14-06. An examination of the record in those other chambers would reveal similar experiences.

168. Having a statutory and independent focal point for the defence is an excellent idea, especially in coordinating international requests for assistance, and in providing defence training, support and assistance. However, the strength of any institution, and its sub-departments, depends upon its leadership. Others can judge for themselves the quality of the leadership described here. These matters set out above, in my view, raise serious issues that must be properly considered in any review of the functions of the Defence Office or its office-holders.

169. In light of what I have highlighted here, the Head of the Defence's statutory right of audience and intervention under Rule 57 (C) and (F) should be reconsidered. In my view, the ICC model is a better theoretical and practical model.

E. The pre-trial phase

170. The delays engendered by lengthy pre-trial processes are also of concern and require careful consideration in any attempt to replicate the Special Tribunal's pre-trial procedures in future international institutions.

171. The procedural history in annex A to this judgment outlines in detail what occurred in the lengthy pre-trial phase before the Pre-Trial Judge in the *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra* case, and its contrast with the much shorter and more efficient pre-trial phase, solely before the Trial Chamber, in the joined case of *Prosecutor v. Ayyash, Badreddine, Merhi, Oneissi and Sabra*. This was between the Trial Chamber's decision to join the two cases on 11 February 2014, and the recommencement of the trial on 18 June 2014.

172. The Special Tribunal, uniquely, has a Pre-Trial Chamber in which the Pre-Trial Judge both reviews and confirms the indictment submitted by the Prosecutor, and then retains jurisdiction

over the case in a pre-trial phase until he transfers it to the Trial Chamber for trial. During this pre-trial phase, the Trial Chamber only deals with specified matters such as challenges to the Special Tribunal's jurisdiction, challenges to the form of the indictment, and deciding whether to proceed to a trial *in absentia*. The Pre-Trial Judge may also refer matters to the Trial Chamber for determination. Thus, different aspects of the proceedings may simultaneously be in the two chambers.

173. Rule 89 'Functions after Review of the Indictment' sets out some of Pre-Trial Judge's duties, namely:

(A) After an indictment has been confirmed by the Pre-Trial Judge, he shall coordinate communication between the Parties during the pre-trial phase.

(B) The Pre-Trial Judge shall ensure that the proceedings are not unduly delayed. He shall take any measures necessary to prepare the case for a fair and expeditious trial.

174. The Pre-Trial Judge, under Rule 91 (c), also establishes a 'working plan' under which the Parties and participating victims must file witness and exhibit lists and pre-trial briefs and the Prosecution completes its disclosure of categories of material to the Defence. The Pre-Trial Judge's role is so extensive in this stage that he even sets the trial date, after consultation with the Presiding Judge of the Trial Chamber, Registrar and President, a function reserved in all other international criminal courts and tribunals for the chamber hearing the case at trial.

175. Much has been written about this innovation. However, nothing has yet been published from the perspective of the chamber, the Trial Chamber, which was on at the receiving end of the pre-trial phase. This, in my view, is another Special Tribunal internal mechanism that requires serious review.

176. The Special Tribunal's first President, Judge Antonio Cassese, who assisted in drafting the Statute, and produced the first draft of its Rules of Procedure and Evidence, in his explanatory memorandum of the Rules explained his vision of the Pre-Trial Judge's role:

Like the ICTY Pre-Trial Judges, the STL Pre-Trial Judge is vested with managerial powers over cases; his main task is to organize and speed up pre-trial proceedings. However, unlike the ICTY Pre-Trial Judges, who are members of the Trial Chamber assigned to a particular

case, under the Statute of the STL, the Pre-Trial Judge is not a member of the Trial Chamber, but rather a separate and autonomous Judge, who cannot sit on the Trial Chamber (see Article 2 of the Agreement and Articles 7(a) and 18 of the Statute). While the equivalent body in other tribunals must avoid being “contaminated” by contact with the evidence, the Pre-Trial Judge of the STL is free to deal with the evidential material submitted by the parties and may take a more active role during the initial stages of proceedings.⁹⁶

177. The theory was that the case should be ‘trial-ready’ when the Trial Chamber receives it, and as such should rapidly proceed to an expeditious and effective fair trial, all preparatory work by then having been done. But the reality, like many theories and particularly those proposed in an academic context, does not always match the theory. Perhaps what occurred in the pre-trial phase of this case is an extreme example of this incongruity.

178. The case was anything but trial ready when the Trial Chamber received the ‘case file’ on Friday 25 October 2013, with a trial commencement date of Monday 13 January 2014 already set by the Pre-Trial Judge. The following points are highlighted:

- the Prosecution was still investigating the case, obtaining witness statements and documents and disclosing them to the Defence;
- the *Merhi* case had been indicted but the Accused had not been apprehended and no referral had been made to the Trial Chamber to consider trying him *in absentia*;
- Defence investigations were ongoing and nowhere near complete;
- the Prosecution was still disclosing material to the Defence;
- the translation of thousands of pages of documents from Arabic into English for Defence disclosure was ongoing;
- Lebanon was refusing to provide requested material to the Defence,
- the Sabra Defence, consequently, was seeking a conditional stay of the trial;

⁹⁶ Rules of Procedure and Evidence (as of 25 November 201), Explanatory Memorandum by the Tribunal’s President, para. 11.

- the Prosecution's pre-trial brief was cursory and inadequate, and
- the Prosecution witness and exhibit lists had swollen beyond anything realistic and was in a state of flux:
 - its witness list of 540 names contained twice the number of witnesses, namely the 269, whose evidence was received at trial; and
 - its exhibit list of 8,642 was almost three and a half times larger than the 2,487 Prosecution exhibits received at trial.

179. The Trial Chamber was faced with a virtually unmanageable task, namely, from these thousands of potential exhibits and the lengthy witness list, of trying to familiarise itself with the evidence so as to make the necessary pre-trial decisions in a period of eleven and half weeks. Additionally, it was receiving strong internal and external diplomatic pressure to commence the trial immediately, given the perceived significant delays in the pre-trial phase.

180. Looking at just some of these matters: the overloading of the Prosecution's witness and exhibit lists graphically demonstrates just how problematic things were.

181. The first witness list, of 197 pages, and filed on 15 November 2012, contained 557 names. For most, the summary of the witnesses' expected evidence did not explain much about the content of their anticipated testimony. The corresponding exhibit list contained some 13,170 exhibits. This is what could only be described as a 'just in case' form of 'document dump'.

182. No one person could have had the necessary overview or oversight to have approved an exhibit list of 13,170 exhibits. No trial chamber could possibly deal, in any meaningful manner, with 13,170 documents. Nor could a Pre-Trial Judge or Defence counsel.

183. It was also unclear at this point how many experts and reports the Prosecution intended to use at trial. The Pre-Trial Judge, on 28 February 2013, had transferred to the Trial Chamber the Prosecution's notices filed under Rule 161 to determine the qualifications of the Prosecution's

proposed expert witnesses.⁹⁷ The expert witness summaries, however, were unclear as to the content and significance of their proposed testimony.

184. As an example, the description of the evidence of the two crucial explosives experts, the Argentinian professors whose evidence the Trial Chamber relied upon in the judgment, was described in the most bare terms in the Prosecution's witness list, as:

Witness no. 47, AMBROSINI Daniel PRH188, and Witness no. 337, LUCCIONI Bibiana PRH187:

The witness, an expert on the structural effect of explosions, will testify as to the contents of the joint reports on the explosion in the case of Rafic HARIRI. The witness will also testify about the contents of the joint report of the International College of Experts (ICE).

185. That was it. The Trial Chamber, in an order issued on 19 March 2013, noted that the summaries were not linked to the qualifications of the experts, something essential for determining whether they could be declared as experts pursuant to Rule 161. It ordered the Prosecution to file a short summary of each proposed report explaining how the expert was qualified to give the opinion expressed.⁹⁸

186. The Prosecution, however, expressed surprise at the proposition that this should have been considered before filing the witness list. To put this into perspective, the Office of the Prosecutor had been established on 1 March 2009, and it succeeded an almost four year investigation by the UNIIIC, whose last Commissioner was also the first Prosecutor. The case concerned an explosion, yet no one had apparently thought it necessary to summarise the lengthy and technical forensic reports about the detonation of explosives. Or if they had, it had not been done.

187. In a status conference before the Pre-Trial Judge on 10 April 2013, the Prosecution's acting Chief of Prosecutions stated that the order was 'unforeseen and unforeseeable' and would have a 'significant impact on the Prosecution's resources'. He stated that:

The Trial Chamber order results in the Prosecution to having to summarize 152 expert reports of 134 expert witnesses. And taking into account that several expert witnesses

⁹⁷ Pre-Trial Judge referring Sabra Defence request relating to expert witness notices to Trial Chamber.

⁹⁸ Decision on expert witnesses notices.

provided a number of expert reports and a number of them provided expert reports of several hundreds of pages, we are dealing - and this is a rough estimate - we are dealing with about 8.700 pages that require summaries. And it will not come as a surprise to you, Your Honour, that the expert reports repeatedly, as a common occurrence, deal with complex matters. And this meaning that they have to be very carefully summarized, considering the use the Trial Chamber obviously wishes to make of those summaries.⁹⁹

188. But summarising evidence is a basic function of investigation and trial preparation. This should have been done well *before* the proposed expert witnesses were added to the list.

189. For each proposed expert, the Trial Chamber was required to carefully examine the accompanying report and assess whether that person was qualified to provide an expert opinion. And only then, could it decide whether the report should be received into evidence and, if so, whether the expert had to attend court for questioning. Moreover, before making the decision, for each expert it would have to receive submissions from the Prosecution and counsel for the (then) four Accused, on both the expert's qualifications and the relevance and probative value of each report.

190. At that stage, the Prosecution was seemingly relying upon the evidence of some 134 experts whose qualifications and reports had not been summarised, with 8,700 pages of expert opinion, on complex and technical matters. The Trial Chamber, clearly, was in no position to make any decisions on expert qualifications at that point, particularly given the apparent fluidity in the Prosecution's witness and exhibit lists.

191. Ultimately, however, the Prosecution only relied upon the evidence of twenty experts at trial. This means that the evidence of at least 114 of the then 134 proposed expert witnesses put on the exhibit list in November 2012—fourteen months before the trial commenced—was irrelevant to the trial. That is why it would have been a pointless exercise for the Trial Chamber to attempt to read 8,700 pages of possible expert opinion, and especially so in the absence of any formal motion to admit to declare them as qualified experts and to admit their reports into evidence.

192. The unfairness to the Defence in having to attempt to absorb the evidence of 114 proposed expert witnesses whose evidence was ultimately not used at trial is manifest. As indeed it was in

⁹⁹ T. 10 April 2013, pp 3-4.

its having to attempt to decipher the relevance and probative value of 13,170 exhibits, and therefore make strategic litigation decisions while acting for Accused persons being tried *in absentia* who could not provide instructions to counsel. The cost of this exercise to the Special Tribunal must have been enormous.

193. Moreover, the Prosecution's two senior trial counsel who took the case to trial only commenced their employment in the first quarter of 2013. They could never have been expected to have gained the necessary familiarity with the case between then and the trial's commencement less than a year later. They could never have mastered 13,170 exhibits and the evidence of 557 witnesses in that time and thus made fully informed litigation decisions for trial. They had to have been making evidentiary decisions 'on the run'. They were formally introduced onto the court record only in the pre-trial status conference held on 10 April 2013.

194. In March and April 2013, the Prosecution added 1,351 exhibits to the exhibit list. On 31 May 2013, it then filed a consolidated updated witness list containing 587 witnesses. However, its consolidated updated exhibit list had also ballooned—this time to 14,737 exhibits. This was its high point.

195. Six weeks later, in mid-July 2013, the Prosecution filed revised lists, this time of 590 witnesses and 8,293 exhibits. The exhibit list thus went up by 1,407 documents and then down by 6,393 documents between November 2012 and July 2013.

196. But the exhibit list expanded again in mid-September 2013, this time to add another 2,249 documents to a new total of 8,642 exhibits; the number of witnesses was 540, of whom 135 were expected to testify live. Yet another iteration of the witness list was filed on 23 October 2013.

197. Thus, on 25 October 2013, the Trial Chamber received jurisdiction to try a case in which half of the anticipated witnesses would never provide evidence, close to three-quarters of the exhibits would be discarded from the list, and less than one sixth of the listed experts would provide evidence.

198. Then yet another version of the witness and exhibit list appeared, when on 8 January 2014 in the *Merhi* case, that was then in its (short) pre-trial phase before the Pre-Trial Judge, the Prosecution filed an exhibit and witness list in its case against Mr Merhi. In his case, the list was

of 6,524 exhibits and 461 witnesses, of whom 112 were expected to testify live. Most were common to the case against the other four Accused, but these lists were filed before the Pre-trial Judge, who was then seised of the *Merhi* case.

199. The issue of the pre-trial disclosure here is beyond the scope of this opinion; a PhD could be written on the topic. Suffice it to say that the Prosecution disclosed hundreds of thousands of documents to the defence in several thousand electronic disclosure ‘batches’ in no particular order.

200. A critical unresolved issue, however, was that Lebanon was not cooperating with Defence requests for assistance submitted through the Defence Office. As I have detailed above in my observations on the Defence Office, the 2010 memorandum of understanding between the Head of the Defence Office and the Lebanese Minister of Justice on this issue was defective in having no enforcement mechanism.

201. This should have been both recognised and rectified during the dedicated pre-trial phase. The Trial Chamber received jurisdiction to try the case on 25 October 2013 with this crucial issue for defence preparations still very much a live issue. The Trial Chamber then had to divert considerable attention away from its own preparations for trial to resolve it, while faced with a Defence Office Head who was refusing to acknowledge the fatal flaw in the memorandum that he had negotiated, and most specifically, that it did not work.

202. Another issue that should be briefly touched upon is of the Prosecution taking witness statements that it intended to tender into evidence under Rule 155—without the witness attending the court for questioning—that did not comply with the Special Tribunal’s requirements to make them admissible. The President, in January 2010, had issued a ‘Practice Direction on the Procedure for Taking Depositions under Rules 123 and 157 and for Taking Witness Statements for Admission in Court under Rule 155’.¹⁰⁰ This set out the requirements for making the statements admissible.

203. Many statements taken by the UNHIC or the Lebanese investigating authorities would not have complied with the requirements of the Practice Direction. The Prosecution, however, was on notice from January 2010 that its statements had to comply, and in reality even earlier because the relevant rules had been adopted in March 2009. Yet some statements taken after these dates did

¹⁰⁰ STL-PD-2010-02, 15 January 2010.

not, meaning that the Prosecution had to re-contact these witnesses and have them sign a declaration that did conform to the Practice Direction's requirements. The Trial Chamber made an order to this effect in May 2013.¹⁰¹

204. This goes directly to whether there had been adequate centralised pre-trial legal oversight of the investigation, at least from the perspective of ensuring that witness statements were taken in a manner that made them admissible in the proceedings. That, after all, is the purpose of a witness statement.

205. The inadequate nature of the Prosecution's pre-trial briefs was also of concern. The final pre-trial brief filed in the pre-trial phase, on 23 August 2013 was of a scanty 61 pages, with 389 footnotes unhelpfully referenced to documents disclosed according to a Rule. Taking a random example, the first line of paragraph 162, which read, 'At 17:15, SABRA called MERHI, at which time SABRA was in the area of the Fourth Payphone', was referenced to footnote 329, which read 'R91-200334, paras. 1037 and 1039'. This presumably referred to a document in a disclosure to the Defence made under Rule 91. Every reference was like this.

206. And only 52 pages were relevant to the case, as the last eight substantive pages related to connected attacks and a consistent pattern of conduct, evidence of which was not led in the trial. The pre-trial brief, a document of 19,711 words, was attempting to summarise and put the Defence on notice of a case involving at that point, 590 witnesses and 8,293 exhibits. And this was before another 2,249 exhibits were added to the list in mid-September 2013.

207. The pre-trial brief should have been much longer and properly summarised the different evidentiary themes and linked the relevant evidence—documents and exhibits—to evidence charts and summaries. It did not do this but it did comply with the (arbitrary) 21,000-word limit specified in the Practice Direction regulating word limits.¹⁰² To my mind, this was a real failure of the pre-trial phase. This should have been more properly supervised and considered from the perspective of both the Defence, and the chamber that was to try the case.

¹⁰¹ Rule 155 compliance decision.

¹⁰² Practice Direction on Filing of Documents before the Special Tribunal for Lebanon, STL/PD/2010/01/Rev.2, 14 June 2013, Article 5 (1) (g), Length of Documents. As an aside, the purpose of such a practice direction is unclear; the chambers, if necessary, should set word limits according to the need of the situation, rather than a formulation. Twenty-one thousand words for a pre-trial brief in a case of this length and complexity is too short and unrealistic.

208. The record-keeping of the Prosecution, and before it, the UNIIIC, was also found—during the trial—to have some deficiencies that should have come to light in the dedicated pre-trial phase. As an example, in deciding a Defence application to compel the Prosecution to disclose documents relating to the evidence of a Prosecution analyst, Mr Andrew Donaldson, the Trial Chamber noted that:

this litigation has revealed that the Prosecution’s record-keeping is inadequate in significant aspects with regard to its disclosure obligations. The Prosecution has admitted that, for the thousands of documents it classifies as internal work product, it has not gathered them into a central database. Instead, these documents are scattered across various computer drives, including the personal drives of Prosecution employees. As a result, searching for and identifying documents responsive to the category of records of questions and answers would have required the Prosecution to manually review around 70,000 computer files and around 60,000 emails, a process that would have taken weeks or months to complete and would have delayed Mr Donaldson’s testimony in the meantime.

As the Pre-Trial Judge rightly stated, ‘a wide measure of discretion is afforded to the Prosecution, with the full expectation that it will fulfil its disclosure obligations in an organised, comprehensible, useful and effective manner so as to ensure delays are minimised and the accused’s fundamental rights to a fair trial are respected’. The Trial Chamber finds it highly unlikely that the Prosecution would be able to meet this standard in the event it was required to conduct an extensive review of its internal documents as part of its obligation to search and categorise its documents that are disclosable. Moreover, when there is a voluminous amount of material to be properly categorised, the Prosecution cannot, for all practical purposes, throw up its hands but must establish a suitable process for reviewing and disclosing documents in batches as appropriate. The Trial Chamber expects the Prosecution to take appropriate steps going forward—such as maintaining a ‘correspondence log’ or something similar for communications relating to a witness’ evidence—to ensure it can meet its disclosure obligations under the Rules in an appropriate and timely manner.¹⁰³

209. In my view, appropriate corrective guidance should have been given, and if necessary, orders made on this issue in the dedicated pre-trial phase.

¹⁰³ Decision on disclosure re Andrew Donaldson’s reports, paras 102-103 (footnotes omitted).

210. I make no comment here on the protracted indictment ping-pong between the Prosecutor and the Pre-Trial Judge in the *Merhi* case and the connected cases, in STL-18-10.

211. The pre-trial phase also produced agreements as to evidence under Rule 122 relating only to nine uncontroversial facts, such as the location of the Lebanese Parliament, and Mr Rafik Hariri's date of birth and the dates of his terms as prime minister.

212. It is difficult to see how the pre-trial phase can be seen to have met Judge Cassese's vision, as noted above, of an expeditious pre-trial period run by an independent Pre-Trial Judge, that concentrated on ensuring that the Trial Chamber received a 'trial-ready' case. But in the circumstances described above, this could never have been the case. Also, the reality of litigation, and especially once counsel for multiple Accused are appointed, will inevitably disturb otherwise pristine theoretical visions of procedural perfection.

213. The first Prosecutor, Mr Bellemare, as is evident from his filing of three separate indictments between January and May 2011 against four Accused persons and then another one against Mr Merhi in February 2012, had no prepared 'trial-ready' case against any Accused when the indictments were filed. The numerous additions and subtractions to the exhibit list, over the next two years, some of which were equally dramatic in either direction, manifests a lack of centralised legal oversight over the Prosecution's pre-trial preparation. The nine different pre-trial indictments filed also show this. That the Prosecution was still investigating its case at the commencement of the trial is another indication.

214. Somewhat incredibly, in a highly circumstantial case that largely relied upon cell site evidence and its accuracy or reliability, the Special Tribunal's first Prosecutor did not file cell site expert evidence in submitting his initial indictments to the Pre-Trial Judge. The Pre-Trial Judge accordingly confirmed the indictments against Mr Ayyash, Mr Badreddine, Mr Oneissi and Mr Sabra, but without the benefit of Mr Philips's, or anyone else's, cell site expertise.

215. The Pre-Trial Judge noted in his report under Rule 95 transferring the case to the Trial Chamber that, in reviewing the indictments, he had not considered Mr Philips's reports on this 'fundamental' issue 'because they were not produced as exhibits' then.¹⁰⁴ The Prosecution did not

¹⁰⁴ Pre-Trial Judge Rule 95 (A) transfer of case file to Trial Chamber, para. 83.

engage Mr Philips until mid-2012—which coincided with the appointment of the new Prosecutor—and he produced his first version of his general report, ‘An introduction to cell site analysis as applied to GSM networks’, exhibit P549, only on 1 August 2012, over a year after the first indictment was confirmed in the case.

216. Regarding the timing of the transfer of the case to the Trial Chamber, in a separate concurring opinion to a decision relating to challenges to defects alleged to the indictment, on 5 July 2013, I expressed the view that:

The Trial Chamber requires a transfer of the case-file under Rule 95 to enable it to oversee the preparation by the Parties of their respective cases for trial and to allow it to make the necessary pre-trial decisions relating to receiving evidence at trial and the conduct of the trial itself. Without this the Trial Chamber is quite constrained in what it can do.¹⁰⁵

217. The experience of the Trial Chamber only receiving jurisdiction to try the case in late October 2013, in a case listed for trial for 13 January 2014, has merely hardened my view on this.

218. The Trial Chamber should have received the case much earlier. It needed a minimum of six months, and ideally more time, before the trial’s commencement to work with the Parties to reduce the length of the case and to make as many pre-trial commencement evidentiary decisions as possible. The Pre-Trial Judge lacked competence as only the Trial Chamber can do this.

219. The purpose of this opinion is not to attribute blame but rather to highlight significant deficiencies in the efficient functioning of the pre-trial phase. The size of the case—as is evident from the sheer volume of exhibits and witnesses on lists filed in the pre-trial phase that the Prosecution appeared to be trying to present at trial—was beyond the capacity of anyone to manage it: Pre-Trial Judge, Prosecution or Defence counsel.

220. This cannot recur. Hard lessons must be learnt here. Any future institution contemplating replicating the Special Tribunal’s framework in this respect should carefully examine what occurred in the pre-trial phase of this case and reconsider. The ICC’s experience, although employing a different model with its confirmation proceedings, has shown that adding judicial

¹⁰⁵ Decision certifying interlocutory appeal on challenge to form of indictment, 5 July 2013, para. 7.

layers to the pre-trial phase can often elongate and complicate rather than accelerate and streamline proceedings.

F. Interlocutory decisions on the applicable law

221. The final issue explored here is the utility of the mechanism in the Rules through which the Pre-Trial Judge may refer to the Appeals Chamber a matter regarding the applicable law before confirming an indictment. The procedure, it appears, has delayed rather than streamlined proceedings.

222. Under Rule 68 (G), ‘The Pre-Trial Judge may submit to the Appeals Chamber any preliminary question, on the interpretation of the Agreement, Statute and Rules regarding the applicable law, that he deems necessary in order to examine and rule on the indictment.’

223. The Appeals Chamber, pursuant to Rule 176 *bis*, ‘shall issue an interlocutory decision on any question raised by the Pre-Trial Judge under Rule 68 (G), without prejudging the rights of any accused’. It must first hear the Prosecutor and Head of Defence Office in public session. The Accused, according to Rule 176 *bis* (C), has a right to ‘request the reconsideration of the interlocutory decision’ within no later than thirty days of specified Prosecution disclosure.

224. The Rules of Procedure and Evidence were amended in a judicial plenary on 10 November 2010 to insert these two Rules. The then President, Judge Cassese, explained their rationale:

Further, the Pre-Trial Judge has the unique ability to submit to the Appeals Chamber interlocutory questions on legal issues that arise during the confirmation of the indictment (Rule 68(G)), a procedure aiming at ensuring consistency in applicable law throughout the legal proceedings and at speeding up pre-trial and trial deliberations.¹⁰⁶

225. The Appeals Chamber in its Interlocutory Decision on the Applicable Law: Terrorism, Conspiracy, Homicide, Perpetration, Cumulative Charging’, stated much the same thing:

The Tribunal’s Judges adopted Rules 68(G) and 176bis(A) to enable the Appeals Chamber to clarify in advance the law to be applied by the Pre-Trial Judge and the Trial Chamber,

¹⁰⁶ Rules of Procedure and Evidence (as of 25 November 2010), Explanatory Memorandum by the Tribunal’s President, para. 11.

thereby expediting the justice process in a manner supported by both the Prosecutor and the Head of the Defence Office.¹⁰⁷ (emphasis added)

226. These statements, however, are at odds with the law, the practice and reality. The Trial Chamber has explained in the judgment why it does not consider itself bound by what is essentially an abstract advisory opinion. The judgment states:

It is therefore highly exceptional that Rules 68 (G) and 176 *bis* empower the Appeals Chamber, on the Pre-Trial Judge's request, to be the first judicial entity to make certain legal findings in a case, rather than reviewing the correctness of legal findings already made by another judge or chamber.¹⁰⁸

227. I would take it a step further. In my view, the two Rules are not only unnecessary, but are possibly *ultra vires* the Statute of the Special Tribunal, and for the reasons explained below, should be removed.

228. The Special Tribunal for Lebanon is a trial court established by a Security Council resolution. Its Statute does not authorise it to issue advisory opinions such as those the International Court of Justice (ICJ) may render pursuant to Articles 65 to 68 of its Statute, and Article 96 of the Charter of the United Nations. This provides (1) 'The General Assembly or the Security Council may request the International Court of Justice to give an advisory opinion on any legal question'. The Appeals Chamber of the Special Tribunal for Lebanon also does not have the function of the International Law Commission or the ICJ. It is not charged with finding and declaring customary international law.

229. Further, it is difficult to see how such a procedure could be authorised pursuant to a court's inherent jurisdiction to do all things necessary to fulfil its basic judicial functions. Issuing an abstract non-binding legal advisory opinion in the absence of an indictment, facts or accused persons, cannot fall within such inherent powers.

230. Moreover, the procedure logically cannot ensure 'consistency in applicable law throughout the legal proceedings' if the Appeals Chamber's decision is not binding on the Trial Chamber,

¹⁰⁷ First interlocutory decision on the applicable law, para. 7.

¹⁰⁸ Judgment, para. 5950.

which after all, has to apply the law when there are defended Accused facing trial, either in person or *in absentia*.

231. The aim of introducing the procedure seemingly was aimed at ‘speeding up pre-trial and trial deliberations’, but how it could do this was not explained. To illustrate the incongruity of this statement, in 2012, the Appeals Chamber refused to reconsider its first applicable law decision, holding:

It will still be for the Trial Chamber to *apply and shape* the relevant legal principles in the light of the charges contained in the indictment and the evidence adduced by the parties. This judgment will be subject to an appeal and the Appeals Chamber will revisit any legal issue that might be raised by such an appeal under Article 26 of the Statute.¹⁰⁹

232. This statement contradicts Judge Cassese’s explanation of the aim of the 2010 November amendments, and the Appeals Chamber’s own view of the Rule’s purpose and function. This leads to the question of what was the purpose of the amendments.

233. The content of the Appeals Chamber’s first interlocutory decision in reality did not assist the Trial Chamber in its deliberations. Its existence forced the judges (and the Parties) to expend much time in examining it. Its lengthy deviation into searching for the existence of customary rules defining terrorism—that took up 60 pages of the judgment—was irrelevant and *obiter dicta*, meaning that it was not necessary for the resolution of the matter. Article 2 of the Statute expressly specifies that the applicable law for crimes falling within its jurisdiction is the Lebanese Criminal Code and the Lebanese law of 11 January 1958 on ‘Increasing the penalties for sedition, civil war and interfaith struggle’.

234. Furthermore, its treatment of the possible crimes that could be charged under the Lebanese Criminal Code was in many respects cursory, and there were no facts before the Appeals Chamber from which it could analyse potentially relevant crimes. Its analysis also had two crucial omissions.

235. First, it did not analyse the ambit of aiding and abetting, namely, the degree of knowledge that an accused person must have of an intended crime before they can be held legally liable as an

¹⁰⁹ Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law, para. 37 (footnotes omitted, emphasis added).

accomplice under Articles 219 (4) and (5) of the Lebanese Criminal Code. This would include, for example, whether the accomplices had to have known that Mr Hariri was to be murdered by the use of explosives in a public street.¹¹⁰

236. This omission is inexplicable given that the circumstances of his death were well-known. More significantly, it is the basis of the criminal liability of the charges against three of the Accused persons, Mr Merhi, Mr Oneissi and Mr Sabra. It is noted, however, that only Mr Ayyash was the subject of the first indictment and he was never alleged to have been an accomplice, as opposed to a conspirator or co-perpetrator. But this of itself highlights the flaws in the Rule 68 (G) referral process in which the Appeals Chamber provides an abstract opinion in the absence of facts that it could anchor to the elements of any crimes charged.

237. Second, the Appeals Chamber also omitted to analyse another critical legal element, this time of the crime of conspiracy aimed at committing a terrorist act under Articles 270 and 314 of the Lebanese Criminal Code.

238. Article 314 defines terrorist acts, as ‘all acts intended to cause a state of terror and committed by means liable to create a public danger such as explosive devices’. The Appeals Chamber, however, failed to analyse whether the Prosecution had to prove, for example, that the alleged conspirators had agreed on a particular ‘means’ such as using an explosive device.¹¹¹ Nor whether it was essential that they knew that Mr Hariri was the target of their actions. In their final trial submissions, the Prosecution and Defence disagreed on the interpretation of the elements of

¹¹⁰ In the judgment, at para. 6071 (footnotes omitted), the Trial Chamber held, ‘Further, while the Appeals Chamber’s first interlocutory decision appeared to have concluded that an accomplice must have known that a perpetrator intended to commit a particular crime, it did not examine whether an accomplice must have known the precise factual details of the crime or its minutiae, or the degree of knowledge required to make them criminally liable.’

¹¹¹ In the judgment, the Trial Chamber held at para. 6238 (with footnotes omitted), that ‘The Appeals Chamber apparently concluded that to be liable for conspiracy to commit a terrorist act, first, those accused must have agreed to use a means liable to create a public danger and, second, they need not have precisely determined how to execute their agreement. But neither the meaning of, nor the basis for these conclusions is entirely clear. In the Trial Chamber’s view, the Appeals Chamber’s analysis leaves uncertain whether, to establish this element of the crime of conspiracy to commit a terrorist act, it is necessary to prove:

- only that those accused agreed they would use ‘means liable to create a public danger’ within the meaning of Article 314, not that they agreed on a particular means in that category; or
- that they agreed they would use those particular means, meaning that they agreed to use an explosive device; or
- that they also agreed on any other details of how they would achieve their aim’.

this crime, and the Appeals Chamber's decision did not assist the Trial Chamber's deliberations on this issue.

239. The process did not expedite the Trial Chamber's deliberations, and how it could have expedited the Pre-Trial Judge's consideration of an indictment, likewise is left unexplained. The time-line below also shows how misconceived the aim of the dual amendment to the Rules was.

240. The Prosecutor submitted his first indictment, against Salim Jamil Ayyash, on 17 January 2011. Four days later, the Pre-Trial Judge submitted questions to the Appeals Chamber under Rule 58 (G). The Appeals Chamber issued its 153-page, 452-footnote decision on 16 February 2011.¹¹² The Pre-Trial Judge confirmed an indictment against the first four Accused on 28 June 2011. The indictment against the fifth Accused, Hassan Habib Merhi, was not confirmed until 31 July 2013. The Trial Chamber received jurisdiction to try the first four Accused only on 25 October 2013, and then, when it could, it joined the trial of Mr Merhi to that of the other four, on 11 February 2014.

241. This recurred in a connected case, in which the Pre-Trial Judge, on 11 August 2017, submitted questions under Rule 68 (G) to the Appeals Chamber, concerning the crime of 'criminal association' under the Lebanese code and its relationship with the crime of conspiracy. The Appeals Chamber rendered its decision two months later on 18 October 2017.¹¹³

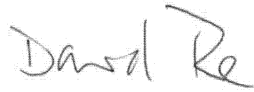

242. Despite this, the indictment in that case was not confirmed, it appears, until June 2019. Count two of this indictment charged 'criminal association' as an alternative to count one's conspiracy. The expedition here from the Rule 68 (G) procedure is not evident. The Appeals Chamber's decision defining 'criminal association' is not binding on a trial chamber. It thus has the potential to cause rather than alleviate delays in deliberations.

¹¹² It is unlikely that the 153-page, 452-footnote decision was written in the seventeen days between receiving the written filings and its issuance. Or even in the 26 days from 21 January, when the Pre-Trial Judge submitted his questions. Undoubtedly, significant work had to have been done on the applicable law, in advance of the Rule amendment in November 2010 and the Pre-Trial Judge's referral in mid-January 2011, and most particularly on its substantial analysis of terrorism. The Appeals Chamber, surprisingly, even refused to accept an *amicus* brief filed on 14 February 2011 by a leading academic expert on international terrorism law, Professor Ben Saul, on the basis that it was 'submitted outside time' by several days.

¹¹³ Second interlocutory decision on applicable law.

243. The procedure is also inherently unfair to an accused person. It is evident from the Appeals Chamber's failure to countenance a reconsideration of its first interlocutory decision in mid-2012, that they must await either: (a) the determination of an application under Rule 167 for an acquittal at the close of the Prosecutor's case; (b) a trial judgment; or (c) an appeal judgement after a trial, many years later, to have their views heard on the definitions of the charges on an indictment on which they have been tried. This cannot be in the interests of justice.

244. Rules 68 (G) and 176 *bis* in my view, serve no practical utility, probably exceed the scope of the Appeals Chamber's statutory jurisdiction, are not within the Special Tribunal's inherent jurisdiction, are unfair to the defence and lengthened the deliberation process. Hence, these Rules should either be no longer used, or, preferably, repealed.

Judge David Re
Presiding Judge

XVII. DECLARATION BY JUDGE DAVID RE IN RELATION TO CERTAIN FAIR TRIAL ASPECTS CONCERNING THE DEFENCE OF HASSAN HABIB MERHI

A. Introduction

1. The right to a fair trial is an essential feature of the rule of law and is an indispensable safeguard against arbitrary injustice. It lies at the heart of international human rights law and its importance cannot be overstated. Without a fair trial, there can be no justice.

2. This declaration concerns the right of the Accused, Hassan Habib Merhi, to a fair trial, and my concern that the Trial Chamber was unable, in certain respects, to guarantee this.

3. The direct cause of this is the conduct of the Head of the Defence Office, Ms Dorothée Le Fraper du Hellen, who was co-counsel for Mr Merhi throughout the Prosecution case against him, and during the presentation of a Defence case at trial. After the end of the receipt of evidence in the trial, Ms Le Fraper du Hellen resigned from her position as Mr Merhi's co-counsel and took office as the Head of the Defence Office.

4. The Head of the Defence Office has statutory oversight over the conduct of assigned Defence counsel at all stages of the proceedings including whether they are providing effective legal representation to an accused person. In accepting her appointment to that office, Ms Le Fraper du Hellen immediately assumed the statutory oversight over first, her own conduct when she was Mr Merhi's co-counsel, second over that of her former Merhi Defence counsel colleagues who continued acting for Mr Merhi, and, third, over the conduct of the counsel for the other three Accused, with whom she, as part of the Defence of Mr Merhi, had made joint litigation decisions in defending the four Accused.

5. The essence of my concern is twofold. The first is the fundamental conflict of roles intrinsic in someone monitoring and judging their *own* past professional conduct, and of those with whom they made joint litigation decisions, including their former lead counsel. The second is that because of this conflict of roles, the effective neutral oversight of the Defence of Mr Merhi—and that of

the other three Accused—ceased from the date that Ms Le Fraper du Hellen commenced her duties as the Head of the Defence Office. The unfortunate result was the Trial Chamber lost its proper oversight over whether their legal representation was effective.

6. The situation was exacerbated by Ms Le Fraper du Hellen's own role while conducting the Defence of Mr Merhi, as his assigned co-counsel. During her assignment as co-counsel she engaged in professional litigation decisions that assisted the Prosecution's case by presenting evidence that tended to incriminate the Accused person whose legal rights and interests she was assigned to defend. This raised a real issue about Mr Merhi's effective legal representation. The legal consequences of this, and Ms Le Fraper du Hellen's own professional actions, could become important issues in any appeal.

7. Further, there were procedural irregularities in Ms Le Fraper du Hellen's appointment as Head of the Defence Office. This arose because the President of the Special Tribunal, Judge Ivana Hrdličková, failed to consult the Special Tribunal's Council of Judges about the proposed appointment. This meant that the Secretary-General of the United Nations, who appointed Ms Le Fraper du Hellen to the post, did not have the benefit of fully informed advice about the legal ramifications of this proposed appointment.

8. The Trial Chamber should have intervened during the trial, as part of its overriding duty in matters affecting the fair trial rights of the Accused, in circumstances where questions arose regarding the effective legal representation of an Accused person. A chamber must intervene if the Head of the Defence Office is either unable or unwilling to do so. It should have intervened to put in place an effective system for monitoring the effectiveness of the legal representation. Its failure to do so has raised an issue of unfairness to Mr Merhi during the trial, irrespective of his acquittal on all counts charged in the amended consolidated indictment.

9. I sincerely regret that the Trial Chamber did not issue the appropriate corrective orders during the trial that would have remedied this situation at the time. It is my firm view that such action should have been taken then.

B. Relevant legal provisions

1. The right to a fair trial

10. Various international human rights law instruments mandate a fair and public trial in which an accused person has the right to be presumed innocent until proved guilty according to law. Each sets out a series of minimum rights.

11. Article 14 of the International Covenant on Civil and Political Rights (ICCPR), for example, sets out the minimum guarantees for a fair trial, including that an accused person must have ‘adequate time and facilities for the preparation of his defence and to communicate with counsel of his own choosing’.¹ Article 14 (3) (d) elaborates on this stating:

In the determination of any criminal charge against him, everyone shall be entitled to the following minimum guarantees, in full equality: To be tried in his presence, and to defend himself in person or through legal assistance of his own choosing; to be informed, if he does not have legal assistance, of this right; and to have legal assistance assigned to him, in any case where the interests of justice so require, and without payment by him in any such case if he does not have sufficient means to pay for it.

12. Article 6 ‘Right to a Fair Trial’ of the European Convention on Human Rights sets out the same ‘minimum rights’ in similar terms, including in Article 6 (3) (d), that an accused has the right,² ‘to defend himself in person or through legal assistance of his own choosing or, if he has not sufficient means to pay for legal assistance, to be given it free when the interests of justice so require’.

13. The American Convention on Human Rights likewise provides ‘minimum guarantees’, including an accused having ‘adequate time and means for the preparation of his defense’ and the right ‘to defend himself personally or to be assisted by legal counsel of his own choosing, and to communicate freely and privately with his counsel’.³

¹ Article 14 (3) (b). *See also* the Universal Declaration on Human Rights, article 11 (1), according to which everyone ‘charged with a penal offence has the right to be presumed innocent until proved guilty according to law *in a public trial at which he has had all the guarantees necessary for his defence* [emphasis added]’.

² Article 6 (3) (b) specifies that an accused must ‘have adequate time and facilities for the preparation of his defence’.

³ Article 8 (2) (c) and (d) ‘Right to a Fair Trial’.

14. The Special Tribunal is obligated to apply these standards. Article 16 of the Special Tribunal's Statute is entitled 'Rights of the Accused' and effectively mirrors those set out in Article 14 of the ICCPR, including as 'minimum guarantees, in full equality', to have 'adequate time and facilities for the preparation of his or her defence and to communicate without hindrance with counsel of his or her own choosing',⁴ and under Article 16 (4) (d):

Subject to the provisions of article 22,⁵ to be tried in his or her presence, and to defend himself or herself in person or through legal assistance of his or her own choosing; to be informed, if he or she does not have legal assistance, of this right; and to have legal assistance assigned to him or her, in any case where the interests of justice so require and without payment by him or her in any such case if he or she does not have sufficient means to pay for it.

15. Further, Rule 3 'Interpretation of the Rules', provides (with emphasis added):

(A) The Rules shall be interpreted in a manner consonant with the spirit of the Statute and, in order of precedence, (i) the principles of interpretation laid down in customary international law as codified in Articles 31, 32 and 33 of the Vienna Convention on the Law of Treaties (1969), (ii) *international standards on human rights*, (iii) the general principles of international criminal law and procedure, and, as appropriate, (iv) the Lebanese Code of Criminal Procedure.

2. The right to effective legal representation as part of the right to a fair trial

16. International human rights courts and organisations have interpreted the right to legal representation, and hence a fair trial, as meaning that it must amount to effective legal representation.⁶ In *Artico v. Italy*, for example, the European Court of Human Rights (ECtHR) held that:

⁴ Article 16 (4) (b).

⁵ Article 22 'Trials in absentia' specifies the circumstances in which a chamber may proceed to conduct a trial in the absence of the accused person.

⁶ For example, ECtHR, *Artico v. Italy*, 6694/74, Judgment, 13 May 1980 ('*Artico v. Italy*'), paras. 33, 36; *Imbrioscia v. Switzerland*, 13972/88, Judgment, 24 November 1993, paras. 37-38; *Steel and Morris v. The United Kingdom*, 68416/01, Judgment, 15 February 2005, para. 59; *Mihai Moldoveanu v. Romania*, 4238/03, Judgment, 19 June 2012, paras. 74-76. See also Basic Principles on the Role of Lawyers (adopted by the Eighth United Nations Congress on the Prevention of Crime and the Treatment of Offenders, Havana, Cuba, 27 August to 7 September 1990), article 21;

the Convention is intended to guarantee not rights that are theoretical or illusory but rights that are practical and effective; this is particularly so of the rights of the defence in view of the prominent place held in a democratic society by the right to a fair trial, from which they derive.⁷

17. Ineffective legal assistance breaches these fundamental human rights law guarantees. A court must ensure that an accused person is effectively represented in proceedings and intervene if it is apparent that this is not occurring. For example, the ECtHR in *Sannino v. Italy* held that the domestic court which had assigned unprepared lawyers to the applicant, had failed to ensure an *effective* defence, even though the applicant did not complain about the situation.⁸ Breaches of fundamental human rights law guarantees can result in appeals, retrials or orders nullifying trial proceedings.

18. The issue of ineffective legal representation at trial has arisen on appeal in international criminal law proceedings. For example, in the *Krajišnik* appeal at the International Criminal Tribunal for the former Yugoslavia (ICTY). There, *amicus curiae* counsel for the accused raised appeal grounds that the ineffectiveness of counsel at trial, and by former counsel in the pre-trial phase, had resulted in an unfair trial.⁹

3. The role of the Head of the Defence Office in ensuring effective legal representation

19. The Head of the Defence Office is responsible both for assigning counsel to act for suspects and accused persons and for monitoring their effective legal representation. This statutory role is separate from that of a court in ensuring that this occurs.

20. Under Article 13 of the Statute of the Special Tribunal under the heading, ‘The Defence Office’, the Head of the Defence Office is responsible for ‘the drawing up of a list of defence

European Union Directive 2013/48/EU, Article 3 (3) (b); G. Sluiter and others (eds), *International Criminal Procedure*, 2013, chapter 9, B.1.3.i (p. 1268); D. Harris and others, *Law of the European Convention on Human Rights*, 2018, pp 479-482.

⁷ *Artico v Italy*, para. 33.

⁸ *Sannino v. Italy*, ECtHR, 30961/03, Judgment, 27 April 2006, paras 50-52.

⁹ *Prosecutor v. Krajišnik*, IT-00-39-A, Judgment, 17 March 2009, paras 29-72.

counsel’. Rule 57 (D) ‘Functions of the Head of Defence Office’¹⁰ widens this role to appointing and assigning defence counsel where relevant, while Rule 59 specifically governs the assignment of counsel by the Head of the Defence Office.

21. Rule 57 (G) sets out the general principles for the quality of defence legal representation, stating:

The Head of Defence Office shall, in the interests of justice, ensure that the representation of suspects and accused meets internationally recognised standards of practice and is consistent with the provisions of the Statute, the Rules, the Code of Professional Conduct for Counsel, the Directive on the Appointment and Assignment of Defence Counsel and other relevant provisions. To this end, subject to lawyer-client privilege and confidentiality, where valid reasons exist to do so, he may:

- (i) monitor the performance and work of counsel and the persons assisting them;
- (ii) request all necessary information in order to exercise the function referred to in (i);
- (iii) ensure that the appropriate advice is given to the lead counsel as would contribute to an effective defence of the suspect or accused; and
- (iv) in exceptional circumstances and after considering the opinion of the lead counsel, invite the suspect or accused to provide his views on the adequacy and effectiveness of his legal representation and the performance of the Defence counsel. Any statement made by the suspect or the accused in this regard shall be recorded in writing and kept by the Head of Defence Office. A copy of the record shall be provided to the suspect or accused and his counsel.

22. Rule 57 (I) provides:

Neither the Head of Defence Office nor its members shall take any instructions from suspects or accused persons or be involved in factual allegations or matters

¹⁰ The Statute uses the term, ‘Head of the Defence Office’, while the Rules omit the definite article and state, ‘Head of Defence Office’.

relating to a specific case, which may raise conflicts of interest and affect the independence of the Office.¹¹

23. Rule 58 provides for the qualifications of Defence counsel.¹² Rule 57 (H) addresses the procedure in case the Head of the Defence Office is not satisfied that the representation meets the required standards, stating:

If the Head of Defence Office is not satisfied that the representation of a suspect or accused meets the standards set forth in Rule 58 (B), he may, in the interests of justice and after giving counsel an opportunity to be heard:

- (i) if Defence counsel has been assigned, withhold the payment of the fees of the assigned counsel or part thereof until there is a satisfactory resolution of the matter. Such decision may be reviewed by the President;
- (ii) make representations to a Judge or Chamber for the removal of counsel or for other measures intended to ensure the effective representation of the suspect or accused; and
- (iii) where appropriate, initiate disciplinary proceedings against the counsel concerned.

24. Article 27 (F) of the Directive on the Appointment and Assignment of Defence Counsel, states that:

Without prejudice to counsel-client privilege, the Head of Defence Office may, if he determines that reasonable cause exists, require assigned counsel to allow the Head of

¹¹ The Directive on the Appointment and Assignment of Defence Counsel, STL/BD/2009/03/REV.5. under Article 28 (A) goes further by stating 'To preserve the full independence and neutrality of the Defence Office, neither the Head of Defence Office nor any of his staff shall take any instructions from a suspect or accused or adopt a stance on any factual allegations of the Prosecution or the factual position of the Defence which *might* raise conflicts of interest.' (emphasis added)

¹² Rule 58 'Appointment, Qualification and Duties of Counsel' in paragraph (B) states that 'In the performance of their duties, counsel shall be subject to the relevant provisions of the Statute, the Rules, Practice Directions, the Rules of Detention, the Host State Agreement, the Code of Professional Conduct for Counsel and the codes of practice and ethics governing their profession, the Directive on the Appointment and Assignment of Defence Counsel, and if applicable, the Legal Aid Policy and any other Regulations adopted by the Head of Defence Office.'

Defence Office, or a person designated by him, on a strictly confidential basis, to inspect and examine counsel's work product.

Article 34 (A) of this Directive provides (with emphasis added) that:

With a view to the fairness of the proceedings, and after consulting the Pre-Trial Judge or Chamber, the Head of Defence Office may decide, at the request of counsel in question, to withdraw the appointment or assignment of counsel, by a written reasoned decision applying the standards set out in Article 7 of the Defence and Victims Code of Conduct.

4. The principles of natural justice—actual or apprehended bias by a decision-maker

25. A universal principle of human rights law, and also of administrative law, is that a decision-maker must not display bias in their decisions. The bias may be apprehended or actual and may be manifested in an actual or potential conflict of interest.

26. The ECtHR has held that when assessing whether an appearance or apprehension of bias exists, a court considers 'whether the fear can be held to be objectively justified'. In *Kyprianou v. Cyprus* it held in relation to judicial decision-making—but the principle is equally applicable to non-judicial decision-makers and especially those acting within the confines of a judicial system—that:

An analysis of the Court's case-law discloses two possible situations in which the question of a lack of judicial impartiality arises. The first is functional in nature: where the judge's personal conduct is not at all impugned, but where, for instance, *the exercise of different functions within the judicial process by the same person* [...], or hierarchical or other links with another actor in the proceedings [...], objectively justify misgivings as to the impartiality of the tribunal, which thus fails to meet the Convention standard under the objective test [...]. The second is of a personal character and derives from the conduct of the judges in a given case.¹³ (emphasis added)

27. The accepted test in international criminal law proceedings was first set out by the ICTY Appeals Chamber in *Furundžija* where it held that 'there is an unacceptable appearance of bias' if

¹³ *Kyprianou v. Cyprus*, 73797/01, Judgment (GC), 15 December 2005, para. 121.

‘the circumstances would lead a reasonable observer, properly informed, to reasonably apprehend bias’.¹⁴

28. Thus, a statutory decision-maker cannot make decisions on designated matters in which they have a potential or actual conflict of interest; they must recuse themselves. An example could be the decision-maker designating someone of their choice to inquire into their (the decision-maker’s) professional conduct. Or, once the inquiry is complete, receiving a report and taking decisions about its content and recommendations into their own conduct. This point is further developed below.

29. Another, which is pertinent here, is of a decision-maker who is entrusted with monitoring the professional conduct of a defined category of persons—here of assigned Defence counsel—ending up monitoring their own professional conduct. This involves assessing whether they have conducted themselves according to professionally accepted standards. Or, as formally set out in Rule 57 (G), to ‘ensure that the representation of suspects and accused meets internationally recognised standards of practice’.

C. Ms Le Fraper du Hellen’s actions as co-counsel for Mr Merhi at trial

30. During the trial, responsibility for different parts of the defence of each Accused was divided between the three lead and co-counsel, with their legal assistants. Like Prosecution counsel, Defence counsel divide complex cases into parts or themes to which different counsel are assigned responsibility. This is no secret as they willingly announce to the chamber who has responsibility for the preparation of different aspects of a case, and chambers may accordingly schedule evidence according to the preparedness of counsel to deal with matters for which they have responsibility. This is practical, efficient and quite normal.

31. Ms Le Fraper du Hellen evidently had responsibility for challenging parts of the Prosecution’s telecommunications evidence against Mr Merhi. The essence of the Prosecutor’s case, as pleaded in the amended consolidated indictment, was that he was using his own personal mobile telephone, termed as mobile ‘Purple 231’, to communicate with two co-Accused, Mr

¹⁴ *Prosecutor v. Furundžija*, IT -95-17/1-A, Appeal Judgment, 21 July 2000, para. 189.

Oneissi and Mr Sabra, in relation to the pleaded false claim of responsibility for the attack on Mr Rafik Hariri on Monday 14 February 2005.

32. Further, he was alleged to have been communicating exclusively with the former Accused, Mustafa Amine Badreddine, in a closed three-mobile network of what the Prosecutor described as a ‘Green’ network of mobiles. The Prosecutor pleaded that Mr Merhi was using a mobile, ‘Green 071’ and Mr Badreddine was using a mobile termed Green 023, and the two were in communication in this manner. The Prosecutor attempted to prove this by showing that Purple 231 and Green 071 were co-locating—meaning that they were travelling together and making and receiving calls and SMS—in such a manner that the only reasonable conclusion was that they had a single user in Mr Merhi.

33. The Trial Chamber, ultimately, was not satisfied beyond reasonable doubt that these two mobiles were co-locating and that Mr Merhi was using Green 071, as pleaded in the amended consolidated indictment.

34. However, during the trial, Ms Le Fraper du Hellen put into evidence a third mobile, termed the ‘Grey’ mobile, as one that was potentially co-locating with Green 071. Hence, the defence was that someone other than Mr Merhi could have been using the Grey and the Green mobiles. This was designed to cast a reasonable doubt on the Prosecution case. The Prosecution, however—as soon as she did this—then investigated this new Grey mobile and discovered that it was potentially co-locating with both Purple 231 and Green 071. It then presented expert evidence of this. Further, evidence was then found and presented that incontrovertibly proved that Mr Merhi was the sole user of the Grey mobile.

35. Ms Le Fraper du Hellen had neglected to ascertain whether the Grey mobile was potentially co-locating with Purple 231. The Prosecution did and found that it was. The Trial Chamber accepted its expert evidence on this point. Further, the Merhi Defence obviously failed to investigate who the Grey mobile was contacting. After Ms Le Fraper du Hellen’s actions alerted the Prosecution to the existence of this third mobile, the Prosecution did the investigations that the Merhi Defence should have done before putting evidence of the Grey mobile before the Trial Chamber. This of course raised immediate issues of Mr Merhi’s effective legal representation.

36. The Trial Chamber has found in the judgment that the Grey mobile and Purple 231 were co-locating and that Mr Merhi was the single user of both. It found that the Grey mobile provided the strongest piece of evidence that Mr Merhi was using his Purple mobile. In this respect, Ms Le Fraper du Hellen put this mobile into evidence, and therefore introduced evidence, that if accepted in a potential appeal in relation to its possible co-location with the Green network mobile, or generally, could result in Mr Merhi's conviction on appeal, or a retrial.¹⁵

D. Procedural history and submissions

37. The procedural background to Ms Le Fraper du Hellen's appointment to the post of Head of the Defence Office reveals that potential and actual conflicts of interest have arisen in relation to her statutory role in monitoring the effective representation of the Accused by virtue of her former role as Mr Merhi's co-counsel and her current role in monitoring the performance of counsel in that role. This extends past the termination of her appointment as co-counsel and into any potential appeal.

1. Assignment of Ms Le Fraper du Hellen as co-counsel for Mr Merhi

38. The relevant starting point is 20 December 2013, when the Head of the Defence Office, Mr François Roux, assigned Mr Mohamed Aouini as lead counsel to represent Mr Hassan Habib Merhi in the proceedings before the Special Tribunal.¹⁶

39. On 30 December 2013, he assigned two co-counsel, Ms Le Fraper du Hellen and Mr Jad Khalil, to work with Mr Aouini.¹⁷ Mr Khalil's assignment continues. Mr Roux and Ms Le Fraper du Hellen had been co-directors of the same law firm in Montpellier, France, *SCM Gambetta Avocats*.¹⁸ This of course raises the issue of whether Mr Roux himself had a sufficient 'arms'

¹⁵ The judgment states, at para. 3654, 'The Trial Chamber is of the view that the Prosecution could not establish co-location between Purple 231 and Green 071 without the Grey mobile. Similarly, the Prosecution could not rely only on a combination of the cell activations of Green 071 and the Grey mobile to prove that they were co-locating and had a single user. Only the combination of the Grey mobile and Green 071, and Purple 231 and Green 071, could prove that Mr Merhi's personal mobiles were co-locating with the Green network mobile.'

¹⁸ *SCP d'avocats*, François Roux - Guylaine Lang-Cheymol - Marie-Paule Canizares – Dorothée Le Fraper Du Hellen - Hélène Bras. Publicly available French corporate documents show their association in this firm including Mr Roux and Ms Le Fraper du Hellen entering into private deeds between themselves relating to its affairs.

length’ distance from which he could apply, if necessary, Rule 57 (G) against Ms Le Fraper du Hellen in investigating any perceived breach of ‘internationally recognised standards of practice’.

2. The trial of Prosecutor v. Ayyash, Badreddine, Merhi, Oneissi and Sabra

40. The trial in the case of *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra* commenced on 16 January 2014. On 11 February 2014, on the Prosecutor’s application, which was not opposed by counsel for Mr Merhi, the Trial Chamber joined his case to that of the other four Accused on a consolidated indictment, meaning that the trial continued but against the then five Accused.¹⁹

41. The Prosecution closed its case against the four Accused on 7 February 2018. After dismissing an application filed by counsel for Mr Oneissi to acquit him under Rule 167, the Trial Chamber then heard and received Defence evidence, with the last hearing day being 28 June 2018.²⁰ Ms Le Fraper du Hellen was co-counsel for Mr Merhi at all of these times.

3. Ms Le Fraper du Hellen’s appointment as Head of the Defence Office

42. Mr Roux retired on 28 February 2018 when his appointment was not renewed, and from 1 March 2018, his deputy, Ms Héleyn Uñac, became the acting Head of the Defence Office. Until then Mr Roux had been responsible for monitoring the effectiveness of Mr Merhi’s legal representation, which of course included Ms Le Fraper du Hellen’s conduct. The vacant post was advertised.

43. On 18 June 2018, the Secretary-General of the United Nations announced the appointment of Ms Le Fraper du Hellen as Head of the Defence Office, with immediate effect. Effectively, this meant that from that day, not only was she acting for Mr Merhi but was simultaneously also responsible for monitoring her own performance as his counsel under Rule 57.

¹⁹ Transcript of 11 February 2014, pp 92-96; F1424, Decision on Trial Management and Reasons for Decision on Joinder, 25 February 2014. Pursuant to an order of the Appeals Chamber, the Trial Chamber terminated the case against Mr Badreddine on 11 July 2016. F2633, Order Terminating Proceedings against Mustafa Amine Badreddine Without Prejudice and Ordering the Filing of an Amended Consolidated Indictment, 11 July 2016.

²⁰ The Trial Chamber issued its final evidentiary decision on 16 July 2018. F3711, Decision admitting one Sabra Defence *aide-memoire* into evidence and declining to admit another two, 16 July 2018.

44. The panel that interviewed candidates for the position and made recommendations to the Secretary-General included a high-ranking United Nations official. Mr Roux was also involved in the process.

45. The Secretary-General was required to consult the Special Tribunal's President on the appointment under Article 13 (1) of the Statute, which reads:

The Secretary-General, in consultation with the President of the Special Tribunal, shall appoint an independent Head of the Defence Office, who shall be responsible for the appointment of the Office staff and the drawing up of a list of defence counsel.

46. The President, however, neither consulted nor informed the Trial Chamber. Nor did she inform or consult the Special Tribunal's statutory Council of Judges, pursuant to Rule 37 (B), either that the Secretary-General had consulted her, or the result of the consultations, in other words, what she had advised the Secretary-General.

4. Ms Le Fraper du Hellen ceasing to represent Mr Merhi

47. On 20 June 2018, two days after Ms Le Fraper du Hellen's immediate appointment to her new role, the acting Head of the Defence Office, Ms Uñac, wrote to the Trial Chamber stating that Ms Le Fraper du Hellen, on 14 June 2018 in an email to her, had requested the withdrawal of her assignment as co-counsel for Mr Merhi as of 27 June 2018. Ms Le Fraper du Hellen, she explained, felt ethically unable to carry out her duties as co-counsel due to a risk of persistent major conflict of interest between her new and old roles.

48. Ms Uñac also sought consultation with the Trial Chamber pursuant to Article 34 (A) (ii) of the Directive on the Appointment and Assignment of Defence Counsel. This mandates consultation with a chamber *before* the Head of the Defence Office intervenes in the legal representation of counsel assigned to represent an accused, and is consistent with the Trial Chamber's role as the ultimate guarantor of the right to a fair trial, which includes monitoring the effectiveness of an accused's legal representation.

49. On 26 June 2018—while the Trial Chamber was still receiving evidence from the Defence—as the Presiding Judge of the Trial Chamber, I met Ms Uñac, Ms Le Fraper du Hellen and lead counsel for Mr Merhi, Mr Aouini, in the presence of the Trial Chamber's senior legal officer. The

Trial Chamber at that point had already issued scheduling orders, after the lengthy trial, for the Parties and the Legal Representatives of Victims to file their final trial briefs, and to hear oral closing submissions.²¹ The potential withdrawal of co-counsel for an Accused at this critical point in the trial was of obvious concern to the Trial Chamber.

50. During that meeting, Mr Aouini assured me that he could finalise his written final trial brief for Mr Merhi and prepare for the oral closing arguments without seeking a replacement for Ms Le Fraper du Hellen.²²

51. On 28 June 2018, the Trial Chamber held a court session to receive the remaining Defence evidence. It then adjourned to allow the Parties and Legal Representatives of Victims to prepare their written and oral closing submissions which were at that stage scheduled for 16 July 2018, for the Prosecution and Legal Representatives of Victims, and from 13 August 2018 for the Defence. Oral closing submissions were scheduled from 27 August to 7 September 2018.

52. The following day, 29 June 2018, I wrote to Ms Uñac stating that the Trial Chamber was satisfied that Ms Le Fraper du Hellen's withdrawal—in the manner described, and at that late stage of the trial—was consistent with Mr Merhi's right to a fair and expeditious trial. I stated that I was confident that Ms Le Fraper du Hellen was cognisant of the need to avoid any potential conflict between her former and new roles.²³

53. Consequently, the same day, 29 June 2018, Ms Uñac withdrew Ms Le Fraper du Hellen's assignment as co-counsel.²⁴

²⁴ F3701, Withdrawal of the Assignment of Ms Dorothée Le Fraper du Hellen, Co-counsel of the Defence team for Mr Hassan Habib Merhi, pursuant to Article 34 (A) of the Directive on the Appointment and Assignment of Defence Counsel, 29 June 2018.

5. Ms Le Fraper du Hellen's commencement as the Head of the Defence Office

54. Three weeks later, on 23 July 2018, Ms Le Fraper du Hellen was sworn in as Head of the Defence Office and commenced her duties. Ms Uñac reverted to her position as the Deputy Head of the Defence Office.

55. From that day, Ms Le Fraper du Hellen became formally responsible under Rule 57 for monitoring the quality of the legal representation of all four Accused throughout the proceedings—namely, from the moment of their appointment as counsel. This included her own performance as counsel from 30 December 2013 until 29 June 2018, and the performance of her former lead counsel, Mr Aouini, and her former co-counsel Mr Khalil, from the dates of their assignments, respectively 20 and 30 December 2013, onwards. And, additionally counsel acting for the other three Accused.

6. Ms Le Fraper du Hellen's delegation of some statutory functions to her deputy

56. Four weeks later, on 24 August 2018, Ms Le Fraper du Hellen wrote to the President, the Registrar, the Prosecutor, and me as the Presiding Judge of the Trial Chamber, informing us that she was delegating some of her functions under Rules 57 (G) and (H) to Ms Uñac, in respect of matters concerning the conduct of the defence of Mr Merhi.²⁵

57. She explained that she had executed this delegation due to her former role as co-counsel for Mr Merhi and 'out of concern for transparency and in order to avoid any potential conflict of interests'.

7. The Trial Chamber's correspondence with Ms Le Fraper du Hellen concerning the conflict

58. On 31 August 2018, as Presiding Judge, I responded to Ms Le Fraper du Hellen's memorandum of 24 August 2018. I noted that there was a potential conflict between her former

²⁵ F3732, Publication of Correspondence with Head of Defence Office on Potential Conflict of Interest, 10 September 2018 (Publication of correspondence), pp 3-6.

and current positions and that this conflict extended to the conduct of the defence of *all* four Accused.

59. I also pointed out that counsel acting for the four Accused—or five, while Mr Badreddine was still an Accused—had acted in coordination on numerous occasions and that Ms Le Fraper du Hellen, as Mr Merhi’s co-counsel throughout the presentation of evidence at trial, had been part of this coordination. The coordination manifested itself in filings, oral submissions and the cross-examination of Prosecution witnesses.

60. I noted that delegating her functions to Ms Uñac in relation to Mr Merhi’s effective representation had created another irresolvable conflict. Namely—as a matter of employment law or according to the principles of natural justice— Ms Uñac would be placed in an untenable situation in which she may have to take a reasoned decision as to her immediate superior’s professional conduct in her former capacity as co-counsel for Mr Merhi. I invited all recipients to consider mechanisms to resolve the matter and suggested that an amendment to the Special Tribunal’s Rules of Procedure and Evidence may be necessary.²⁶

61. On 5 September 2018, Ms Le Fraper du Hellen replied, stating that she maintained her decision to delegate those functions to Ms Uñac. She submitted that the Secretary-General of the United Nations had appointed her to fulfil the role as Head of the Defence Office with the utmost integrity, dignity and independence. She argued that she remained the sole competent authority to assess the most suitable measures to protect the rights of the Defence and asked the Trial Chamber to respect her decision.²⁷

62. On 10 September 2018, to ensure public transparency in this matter, in my functions as Presiding Judge I published the correspondence of 24 August, 31 August and 5 September.

63. Between 11 and 21 September 2018, the Trial Chamber held court sessions to hear the oral closing arguments of the Parties and the Legal Representatives of Victims. Ms Le Fraper du Hellen, in her new role as the Head of the Defence Office, was present in the courtroom during

²⁶ Publication of correspondence, pp 1-12.

²⁷ Publication of correspondence, pp 13-14.

some of the sessions on 11, 17 and 21 September 2018,²⁸ but not when counsel for Mr Merhi presented their closing submissions.²⁹

64. During this time, namely, the written and oral Defence final trial submissions, Ms Le Fraper du Hellen was responsible for monitoring the quality of the legal representation of the four Accused. This included Defence counsel—including those she had worked with on Mr Merhi's defence—making legal submissions on matters on which she had participated in taking decisions while acting for Mr Merhi. Most pertinently, this included submissions in the Merhi Defence's final trial brief and oral closing arguments on Mr Merhi's alleged use of the Green, Grey and Purple mobiles.

8. Trial Chamber's order for submissions on the conflict of roles, and submissions received

65. On 21 September 2018, in an order delivered in court, the Trial Chamber sought written submissions from the Parties, the Head of the Defence Office and the Deputy Head of the Defence Office, by 1 October 2018, addressing the potential conflict of interest between the Head of the Defence Office's previous and present roles, and specifically, whether judicial intervention was required.³⁰

66. On 28 September 2018, in my function as the Presiding Judge, I supplemented my earlier publication of relevant correspondence and reacted to the Head of the Defence Office's submission of 5 September 2018 that 'the matter of effective representation ... falls within my exclusive jurisdiction'. I pointed out how the general principles of international criminal procedural law provide for judicial scrutiny, thereby squarely contradicting the Head of the Defence Office's submissions.³¹

67. On 1 October 2018, the Head of the Defence Office informed the Trial Chamber that she had reconsidered and revoked her previous decision to delegate some of her functions under Rules 57 (G) and (H) to Ms Uñac, in respect of matters concerning the conduct of the defence of

²⁸ Transcript of hearing of 11 September 2018, p. 11; T. 17 September 2018, p. 3; T. 21 September 2018, pp 2-3.

³⁰ Order for Written Submissions Addressing the Potential Conflict of Interest Between the Head of Defence Office's Previous and Present Roles, T. 21 September 2018, pp 72-74.

³¹ Addendum.

Mr Merhi. She explained that she did so to ‘avoid any inappropriate speculation as to the manner in which each of us performs our respective duties’.

68. Ms Le Fraper du Hellen, however, maintained that she could see no actual or potential conflict of interest on her part and submitted that judicial intervention was unnecessary because the Defence Office’s resources allowed the establishment of an alternative mechanism to address any potential conflict of interest in relation to her role vis-à-vis the Merhi Defence.³² The Deputy Head of the Defence Office did not make observations with respect to the desirability of any judicial intervention, but informed the Trial Chamber that she agreed with the withdrawal of the delegated functions to her.³³

69. The Parties filed submissions on this issue on 1 October 2018. The Merhi and Sabra Defence took no position. The Oneissi Defence argued that the Trial Chamber does not have the power to interfere in the relations between the Defence Office and Defence counsel. The Ayyash Defence submitted only that judicial intervention was not warranted at this time.³⁴

70. The Prosecution submitted that judicial intervention would be warranted only if the lack of effective representation led to material prejudice to the Accused, thus impacting the fairness of the proceedings. The theoretical possibility that counsel for the Accused may not meet the standards in Rules 57 (G) and 58 (B) and the possibility that the Head of the Defence Office would not properly assess the effective representation of the Accused due to her conflict of interest did not at

Oneissi en réponse à l’Ordonnance de la Chambre du 21 septembre 2018*, 1 October 2018, paras 3-4. The Sabra Defence filed its submissions confidential and *ex parte* the Prosecution. The Trial Chamber ordered the reclassification of this filing to public in F3744, Order Reclassifying Sabra Defence Submissions of 1 October 2018, 3 October 2018.

this stage require a judicial remedy to rectify an unfairness at trial. Other avenues, such as amending the Rules or the Code of Professional Conduct of Counsel,³⁵ could also be considered.³⁶

9. Trial Chamber's instruction to Ms Le Fraper du Hellen on her proposed 'alternative mechanism'

71. On 5 October 2018, the Trial Chamber instructed Ms Le Fraper du Hellen to provide details of the envisaged 'alternative mechanism', including any legal basis for it.³⁷ It noted that her submissions 'do not elaborate on this envisaged alternative mechanism' and 'her submissions provide no suggested timeline for resolving the matter'. The Trial Chamber also emphasised that it sought an expeditious solution.

72. On 12 October 2018, as Presiding Judge, I notified the Parties and the Legal Representatives of Victims of a proposed amendment to Rule 57.³⁸

73. On 15 October 2018, Ms Le Fraper du Hellen submitted that Rule 57 (G), read in conjunction with Article 27 (F) of the Directive on the Appointment and Assignment of Defence Counsel, allowed her to appoint a qualified independent consultant to monitor the effectiveness of the representation of the Accused by Defence counsel. The consultant's mandate and the modalities should remain strictly confidential and internal to the Defence Office. This was necessary to safeguard the Office's independence. The consultant would make recommendations to her.³⁹

³⁵ Code of Professional Conduct for Counsel Appearing Before the Tribunal, 28 February 2011; Code of Professional Conduct for Defence Counsel and Legal Representatives of Victims appearing before the Special Tribunal for Lebanon, STL/CC/2012/03, 14 December 2012.

³⁶ F3742, Prosecution's Submissions pursuant to the Trial Chamber's Order of 21 September 2018, 1 October 2018. *See also* F3742/ADD, Addendum, with Full Citation Details for Footnotes 2-4, to "Prosecution's Submissions pursuant to the Trial Chamber's Order of 21 September 2018", 4 October 2018.

³⁷ F3745, Order in Relation to Head of Defence Office's Observations of 1 October 2018, 5 October 2018, paras 5-6.

³⁸ F3748, Notification of Proposed Amendment to Rule 57 'Functions of the Head of Defence Office' to Provide a Mechanism to Deal with Conflicts of Interest in the Defence Office, 11 October 2018. Publicly noting a proposed Rule change is not without precedent: in F1424, Decision on Trial Management and Reasons for Decision on Joinder, 25 February 2014, at para. 40, the Trial Chamber noted that the then Head of Defence Office, Mr Roux, had proposed to the Rules Committee to amend Rule 57 to permit him to assign Defence counsel to an accused *before* the Trial Chamber had decided under Rule 106 to proceed to try accused *in absentia*. The proposed amendment was rejected by the plenary meeting of judges. And in any event, proposed Rule amendments—which are a form of legislation—as a matter of public policy should not be kept secret any more than proposed amendments to national legislation, including amendments to criminal codes or rules of evidence and procedure.

³⁹ F3749, *Observations de la Chef du Bureau de la Défense suite à l'Ordonnance de la Chambre de première instance du 5 octobre 2018*, 15 October 2018 (Observations), paras 3-4.

74. Specifically, of her own role, Ms Le Fraper du Hellen stated, at paragraph 4:

Given the very nature of the mission entrusted to that independent consultant, its modalities of implementation shall remain a confidential and internal matter of the Defence Office, without the possibility of intervention or monitoring by a Judge, a Chamber or another organ of the Tribunal. Indeed, the statutory independence of the Defence Office, acting through its Head, but also the independence of those Defence Counsel acting with due regard to their professional and ethical obligations, must be safeguarded.

75. For the reasons discussed below this is both misconceived and legally wrong. Moreover, engaging an independent consultant to review the conduct of the defence does not constitute an ‘alternative mechanism’. Rather, it does no more than seek advice from a qualified outsider, a course that is always open—in the absence of a statutory prohibition—to a statutory office-holder. The Registrar, Prosecutor, or a chamber could also seek the advice of an independent consultant so long as it did not involve the delegation of a non-delegable decision-making function.

76. In respect of monitoring the effective representation of the remaining three Accused, Ms Le Fraper du Hellen simply asserted, but without providing any reasoning, that ‘I maintain my position that there is no conflict of interest which would prevent me from performing my duties with respect to them’.⁴⁰

77. The result of Ms Le Fraper du Hellen’s actions is that at least since 1 October 2018—or whenever the delegation was actually revoked, as the notification did not specify its date—she has been responsible for monitoring the effectiveness of Mr Merhi’s legal representation, both during and after her assignment as his co-counsel. To put it another way, she has again made herself responsible for monitoring her own past professional conduct and that of her former colleagues.

⁴⁰ Observations, para. 6.

E. Discussion

1. Ms Le Fraper du Hellen's conflict of roles and interest

78. There are four identifiable conflicts of interest here.⁴¹ The most serious and obvious is that between Ms Le Fraper du Hellen's current role and her earlier role as Mr Merhi's co-counsel. She cannot perform her statutory functions under Rule 57 (G) by monitoring her own professional conduct, nor that of those she had acted jointly with. To do so would breach the general principle of law known as *nemo judex in causa sua* (or *nemo judex in sua causa*), meaning that no-one is a judge in their own cause. A decision maker must be impartial. They cannot judge their own conduct, including that in which they have participated with others.

79. The second conflict relates to the performance of her statutory functions over the professional conduct of counsel with whom she jointly acted for four and a half years. Ms Le Fraper du Hellen co-signed each filing made by the Merhi Defence during the pre-trial and trial phases of the proceedings, until 29 June 2018.

80. Ms Le Fraper du Hellen eventually recognised the existence of the conflict, and—for a mere five weeks, and for ethical reasons—delegated her statutory monitoring functions to her deputy, Ms Uñac, before realising that this created another irresolvable conflict and revoked this delegation. This exacerbated the situation as Ms Le Fraper du Hellen had once again assumed responsibility for monitoring her own professional conduct while she had been acting for Mr Merhi.

81. The third conflict is in relation to monitoring the conduct of counsel for the other Accused, with whom she and the Merhi Defence had made numerous joint litigation decisions while she was assigned to represent Mr Merhi. This conflict of interest also relates to Ms Le Fraper du Hellen's

⁴¹ A fifth conflict may arise out of Article 8 (E) of the Code of Professional Conduct for Defence Counsel and Legal Representatives of Victims appearing before the Special Tribunal, which states that 'Defence Counsel who is assigned to an *in absentia* accused shall not have contact with the accused. If Defence Counsel is contacted, directly or indirectly, by the *in absentia* accused he shall, due to his awareness of the risk such contact may pose to the accused's right to a retrial, and without this act amounting to acceptance of Defence Counsel by the *in absentia* accused: (i) refuse to discuss any element of the case with the *in absentia* accused; and, (ii) refer the accused to the Head of the Defence Office to receive independent legal advice.'

duty under Article 13 of the Statute and Rule 57 (G) to *independently* monitor the performance and work of counsel and persons assisting them.

82. The fourth arises as a result of Trial Chamber's findings in the judgment that the introduction into evidence of the Grey mobile provided the strongest piece of evidence it could use to find beyond reasonable doubt that Mr Merhi was using his personal mobile Purple 231, as pleaded in the amended consolidated indictment.⁴² Ms Le Fraper du Hellen is responsible for this, notwithstanding the ultimate responsibility of lead counsel for the conduct of the defence. If the Prosecutor appeals the acquittal, the issue of whether the Grey mobile could also establish that Mr Merhi was using the pleaded Green network mobile 071 would inevitably arise, thus exacerbating the conflict arising from her professional actions during the trial.

83. In my letter to Ms Le Fraper du Hellen of 31 August 2018, as Presiding Judge, I identified how counsel for the five different Accused had acted in co-ordination during the trial, by stating:

On numerous occasions since the joinder of the *Merhi* and *Ayyash* cases counsel acting for the five (or four) Accused have acted in co-ordination in filings and in oral submissions and in cross-examining Prosecution witnesses. This is normal practice, is procedurally proper, and promotes judicial efficiency. Statistically, in relation to written litigation, this is shown in at least 24 filings between F2201 on 17 September 2015 and F3648 on 7 May 2018 that the Merhi Defence jointly filed before the Trial or Appeals Chambers with counsel acting for the other Accused – seeking relief or opposing Prosecution motions. You signed each of these as co-counsel for Mr Merhi.⁴³

In six other filings the Merhi Defence joined the submissions of other Defence counsel,⁴⁴ and in one other⁴⁵ the Ayyash Defence joined a motion filed by the Merhi Defence. Additionally, in numerous oral submissions in court, Defence counsel supported the legal and factual submissions of other Defence counsel. You did this yourself in court. This revealed some commonality of legal representational interest which naturally involved

⁴² At paras 3611-3616 of the judgment, finding at para. 3611, 'The Trial Chamber is therefore satisfied beyond reasonable doubt that Mr Merhi was using Purple 231. The strongest piece of evidence comes from that identifying the Grey mobile as Mr Merhi's'.

⁴³ Filings F2201, F2298, F2321, F2434, AR126.10_F0001, AR126.10_F0008, AR126.10_F0010, F2668, F2693, F2814, F2833, F2925, F2954, F3098, F3117, F3118, F3183, F3215, F3222, F3318, F3372, F3399, F3627 and F3648.

⁴⁴ Filings AR126.11_F0006, F2476, F2505, F2610, F2614, F2682, F2684, F2968, F3181 and F3395.

⁴⁵ F2919.

coordination with the counsel assigned to act for other Accused, which as noted above, is quite normal and proper.

This, like questioning opposing witnesses and making decisions on dealing with Prosecution evidence and presenting your own evidence, including calling witnesses, is the essence of Defence litigation strategy. And, regardless of whether it is conceived and executed by Defence counsel acting jointly or individually for their own assigned Accused, it falls directly within the head of effective legal representation, regulated by Rule 57.

84. The Merhi Defence, and Ms Le Fraper du Hellen personally, acted with commonality of legal representational interest vis-à-vis the defence lawyers acting for the other Accused, including Mr Badreddine. The perception of a conflict of interest therefore encompasses matters relating to the conduct of *all* defence counsel in the *Ayyash, Merhi, Oneissi and Sabra* case.

85. Furthermore, information about the representation of the Accused, which was unavailable to the Trial Chamber but is relevant to the issue of effective representation and hence a fair trial, may be known to Ms Le Fraper du Hellen as a consequence of her previous role. This additionally creates the perception of a conflict between her former and present functions. A chamber cannot accept any tainting of an Accused person's right to a fair trial. Any such tainting could also diminish the reputation of the Defence Office and the Special Tribunal as a whole and could bring the administration of justice into disrepute.

86. The conflict of roles, and of interest, here is obvious. Ms Le Fraper cannot be a judge in her own cause. She cannot be neutral in determining whether she and her colleagues provided effective legal representation to Mr Merhi and the other Accused persons. Her failure to divest herself of this role has breached the right of an Accused person to a fair trial.

2. The continuing duty to monitor the effectiveness of legal representation

87. Central to this matter is the right of an accused person to legal assistance at all stages of criminal proceedings. This fundamental procedural defence right, as noted above, is set out in the Statute's 'minimum guarantees' for the accused. To be meaningful, however, the legal assistance must be effective. Ineffective legal assistance breaches these human rights law guarantees.

88. Consequently, to ensure a fair trial, the effectiveness of an accused's legal representation must be closely monitored. A chamber trying a case is 'the ultimate guardian of the fairness of the proceedings'.⁴⁶ As this guardian of a fair trial, a chamber has an overriding duty to ensure that an accused is effectively represented and to intervene in the interests of justice where the representation does not meet that standard.

89. A fundamental conflict of roles and interest exists between Ms Le Fraper du Hellen's current and previous roles at the Special Tribunal. She cannot independently monitor her own professional conduct and has failed to divest herself of responsibility for monitoring either her own conduct or that of colleagues with whom she made joint litigation decisions.

90. It is emphasised that the duty of a court to monitor the effectiveness of legal representation lasts from the moment of a lawyer's appointment or assignment as defence counsel until its withdrawal. It follows that this duty continues after the close of the evidence at trial and even after the trial judgment rendered under Rule 168. It continues into any appeal proceedings.

91. The declaration that I made under Rule 148 (A) in my capacity as the Presiding Judge on 21 September 2018, that the case is over⁴⁷—after the Parties concluded the presentation of their cases—terminates neither the duty of the Trial Chamber nor the Head of the Defence Office to monitor the quality of legal representation at trial. This duty continues both *retrospectively* and *prospectively*, as logically it must.

92. Conceivably, issues relating to the effectiveness of legal representation at trial—such as allegations of Defence representational incompetence, or even malpractice—could potentially come to light only after a trial has concluded, as has occurred for example at the ICTY. It is not always evident to 'outsiders', namely, those not privy to the inside details of professional incompetence, when it is actually occurring. In this sense, it is analogous to fraud which is often only detected after the event, such as through an audit. Defence incompetence at trial could be revealed in a trial judgment or detected by counsel newly assigned on appeal scrutinising the trial record and judgment in light of decisions taken at trial by Defence counsel.

⁴⁶ ECtHR, *Kononov v. Russia*, 41938/04, Judgment, 27 January 2011, para. 43.

⁴⁷ T. 21 September 2018, p. 110.

93. Hence, in Ms Le Fraper du Hellen's case, her duty to monitor the effectiveness of the legal representation of the Accused is not only prospective, in the sense of the professional conduct of counsel from 23 July 2018 onwards. Rather, it extends to the entirety of the representation, from the moment of assignment—including of course her own and the other counsel on the Merhi Defence team. Lead counsel of course takes the final decisions.

94. Although Mr Roux had this statutory responsibility under Rule 57 until his retirement on 28 February 2018, this does not mean that the responsibility for monitoring the effectiveness of Defence counsel until that date finished when he left office. The responsibility for the same period continues *retrospectively* with his two successors, Ms Uñac and now Ms Le Fraper du Hellen.

95. This demonstrates that the conflict between Ms Le Fraper du Hellen's former role as co-counsel for the entirety of the evidence in the trial—in which she participated in taking numerous joint strategic litigation decisions with counsel for the other Accused—and her current role, is thus irresolvable. She must delegate this duty.

3. Procedural irregularities in Ms Le Fraper Du Hellen's appointment as Head of the Defence Office

96. The duties of the President of the Special Tribunal are spelt out under Rule 32 (B) and specify that the President 'shall coordinate the work of the Chambers and be responsible for the effective functioning of the Tribunal and the good administration of justice'.

(a) Failure to consult the Council of Judge's on the proposed appointment

97. Rule 37 establishes a 'Council of Judges', composed of the President, the Vice-President, the Presiding Judge of the Trial Chamber and the Pre-Trial Judge. Rule 37 (B) mandates consultation by the President with the Council. It states, in obligatory terms, that 'The President shall consult the other members of the Council on all major questions relating to the functioning of the Tribunal.' This is a statutory check and balance against the arbitrary and capricious exercise of presidential power. The Council should also serve as an advisory body.

98. This Council, however, for all intents and purposes is defunct. It has met only three times since 1 March 2015;⁴⁸ the last time was more than three years ago in May 2017.

99. The Secretary-General is required to consult the President of the Special Tribunal in appointing a Head of the Defence Office. There is no reason to believe that he did not. The President, however, neglected to consult either the Council of Judges or the Trial Chamber on Ms Le Fraper du Hellen's proposed appointment. This is not the first time that she has failed to consult the Council of Judges on 'major questions relating to the functioning of the Tribunal'.⁴⁹

(b) Consequences of breaching a mandatory requirement to consult

100. The issue of Judge Hrdličková's failing to consult the Council of Judges arose in recent litigation before the Appeals Chamber, after she had acted without transparency and consultation or warning to convene a second trial chamber, known as 'Trial Chamber II'.

101. In separate opinions, two international judges of the Appeals Chamber ruled on the legal meaning of 'consultation' and in the context of the President's failure to consult the Council of Judges on such a major question.⁵⁰ Referring to Rule 37 (B)'s mandatory exhortation that the President consult the Council of Judges, Judge Nsereko wrote:

The general tenor of these provisions require the President to consult individuals and the organs of the Tribunal concerned before exercising her mandate or responsibilities. For instance, the very responsibility of coordinating the work of the Chambers necessarily calls for such consultation with the judges of the Chambers or at least the Presiding Judges. According to the Oxford English Dictionary, the word "coordinate" means "to cause (things or persons) to function together or occupy their proper place as parts of an interrelated whole order". Of particular significance is the obligation of the President to

⁴⁸ When Judge Hrdličková assumed office.

⁴⁹ The President likewise failed to consult the Council of Judges in late 2017 and January 2018 on the introduction of a judicial disciplinary mechanism, which was drafted by her office and then presented to the other ten judges as a *fait accompli*. Moreover, she drafted this mechanism so that she controls judicial complaints herself, which effectively makes it very difficult to complain against perceived presidential breaches of the Code of Professional Conduct for the Judges of the Special Tribunal for Lebanon (STL-CC-2016-04). The President also failed to inform, much less, consult the Council on the establishment of 'Trial Chamber II' in November 2019. In fact, the only issue on which the President has consulted the Council, in the last three years—and then by email—was on the dates of the annual judicial break.

⁵⁰ STL-18-10/MISC.2/AC, Decision on "Appeal Against Decision Of President Convening Trial Chamber II", 13 December 2019.

consult the Council of Judges on all major questions relating to the functioning of the Tribunal. By establishing the Council and requiring the President to consult it on all such questions, the drafters of the Rules sought to ensure that when making decisions or taking initiatives of such magnitude, the President does not act in the solitude of his or her office, but in council.

....

Although consultation does not necessarily oblige the decision-maker to agree with the views of the consultees, it at least helps to ensure that his or her ultimate decision is informed or has benefited from the input of the views of the consultees and thus minimises the risk of bad decisions.⁵¹

102. On the legal ramifications of failing to consult the Council of Judges where it was mandatory to do so, Judge Nsereko held:

It is a general principle of administrative law that the failure to consult before taking any administrative action, when consultation is required as in this case, vitiates the action taken. [footnote 23 – see below⁵²] Consequently, the President’s Order convening Trial Chamber II might be said to have been tainted with illegality. The Order was, figuratively speaking, “the fruit of a poisonous tree”, i.e. the President’s alleged request to the UN Secretary General to create Trial Chamber II was based on incorrect information or an uninformed view.⁵³

⁵¹ Opinion of Judge Daniel David Ntanda Nsereko, paras 27-28.

⁵² [footnote 23] See, for example, H.W.R. Wade & C.F. Forsyth, *Administrative Law*, 8th ed. (Oxford University Press, 2000) at p. 229, citing United Kingdom, *House of Lords, Grunwick Processing Laboratories Ltd. v. AG v Commission of the European Communities*, Case 85/76, Judgment of 13 February 1979.

⁵³ Opinion of Judge Daniel David Ntanda Nsereko, para. 29.

103. Judge Baragwanath, on the same topic, and interpreting the meaning of the need to ‘consult’ under Rule 37 (B), held:

Specifically, “consult” (as used in Rule 32 (B)),⁵⁴ is a powerful term that carries legal weight and significance. In the much cited case *Port Louis Corporation v Attorney-General of Mauritius*, Lord Morris outlined the requirements of consultation:

The [consultees] must know what is proposed; they must be given a reasonably ample and sufficient opportunity to express their views or to point to problems or difficulties; they must be free to say what they think. [footnote 21]⁵⁵

And in *R v. Secretary of State for Social Services, ex parte Association of Metropolitan Authorities*, Webster J spelled out its implications:

[...] it must go without saying that to achieve consultation sufficient information must be supplied by the consulting party to enable it to tender helpful advice [...] [that is] sufficiently informed and considered information or advice about aspects of the form or substance of the proposals, or their implications for the consulted party [...] [footnote 22]⁵⁶⁵⁷

104. On the legal implications of the Secretary-General being misinformed on a matter upon which the President failed to consult the Council of Judges, in circumstances in which she should have done so, Judge Baragwanath held:

If the Secretary-General was indeed misinformed, as impliedly alleged, the letters of appointment issued to the judges of Trial Chamber II are arguably “fruit of the poisoned tree”. If so, the decision of the Secretary-General, if based on inaccurate information from the President may, although does not necessarily, taint a subsequent decision – such as, in

⁵⁴ The reference to Rule 32 (B) is an obvious typographical error, as within context, Judge Baragwanath is clearly referring to Rule 37 (B).

⁵⁵ [Footnote 21] United Kingdom, Privy Council, *The Mayor and Corporation of Port Louis v. Attorney-General of Mauritius*, [1965] AC 1111, 27 April 1965, 1124.

⁵⁶ Opinion of Judge David Baragwanath, paras 53-54.

⁵⁷ [Footnote 22] United Kingdom, Queen’s Bench Division, *R v. Secretary of State for Social Services, ex parte Association of Metropolitan Authorities*, [1986] 1 All ER 164, 21 May 1985, 167.

this case, the creation of the second Trial Chamber and appointment of its judges: *A (FC) v. Secretary of State for the Home Department*. [footnote 31⁵⁸]

105. These two opinions powerfully underline what is required where consultation is legally mandated and the legal consequences flowing from breaching such obligatory requirements. These are that the decision itself is defective, with the legal effect that an appointment stemming from a flawed decision could consequently be found to be void. This, in my view, is apposite here.

106. Whatever the President advised the Secretary-General was without the benefit of the input of the Council of Judges, and the Trial Chamber, which was best-placed to advise her, and hence the Secretary-General, on the real conflict that would occur with Ms Le Fraper du Hellen's appointment.

107. In the circumstances, namely the potentially deleterious effect on the rights of the Accused to a fair trial, it is self-evident that the President should have consulted the Trial Chamber on the appointment *before* it was made. Had it been so consulted, the Trial Chamber could have pointed to some of the pertinent considerations raised in this declaration, so as to allow the appointing authority to consider them. Regrettably, neither the Council nor Trial Chamber was either consulted or informed.

108. Had the President consulted me I would have strongly counselled her to advise the Secretary-General that the appointment was unwise and that it could embarrass the Special Tribunal, the United Nations and his own office. I have no doubt that the Council of Judges would have advised her in similar terms; it could not have done otherwise.

109. Further, had I been aware that the Secretary-General had consulted the President before he made the appointment, and that she had not consulted me in my capacity as a member of the Council of Judges, I would have separately written to the Secretary-General pointing out the concerns that I have identified in this declaration. He would then have received the information and advice necessary to make an informed decision as to whether he should follow the selection

⁵⁸ [Footnote 31] United Kingdom, House of Lords, *A (FC) v. Secretary of State for the Home Department* [2005] UKHL 71, 8 December 2005, paras 34, 51, 59, 88, 120, 161.

panel's recommendation to appoint Ms Le Fraper du Hellen to the position. However, as the Council of Judges was kept in the dark, such a course was impossible.

110. It follows from the President's breach of Rule 37 (B) that the appointment process was irregular and legally flawed. The Secretary-General cannot have received proper advice on all relevant aspects of Ms Le Fraper du Hellen's appointment.

111. The Secretary-General acted, as is normal, on the advice of the selection panel that had interviewed the candidates for the post. However, as he was uninformed of some major issues concerning this candidate, he could not consider relevant factors that, as the decision-maker, he should have considered. These were: Ms Le Fraper du Hellen's conflict of roles in acting as both Defence counsel and the statutory monitor of Defence counsels' conduct in the same case (and potentially on appeal), Ms Le Fraper's professional conduct during *Prosecutor v. Ayyash, Merhi, Oneissi and Sabra* case, and the potential conflict she had in relation to the connected case of STL-18-10 of *Prosecutor v. Ayyash*. Without this information the Secretary-General could not make an informed decision.

4. The need for judicial intervention during the proceedings

112. Ms Le Fraper du Hellen, in her submissions to the Trial Chamber, insisted that the matter was out of the Trial Chamber's hands as she had been appointed by the Secretary-General of the United Nations to the post, essentially in good faith. Further, according to these submissions, she alone was responsible for all decisions relating to the effectiveness of the legal representation of the Accused.

113. No issue is taken here with the proposition that she was appointed by the Secretary-General of the United Nations to the post in good faith. However, for two essential reasons her views are legally misconceived.

114. The first is that the identity of the appointing authority is *generally* an irrelevant consideration in determining whether the appointee has a conflict of issue or role. The conflict here exists independently of the appointing authority.⁵⁹ The problem at hand is that Ms Le Fraper

⁵⁹ It is of course recognised that an appointing authority could in some circumstances have a conflict in making certain appointments, either of a post or a person, such as an appointing authority choosing a favoured individual to inquire

du Hellen's appointment to this particular position thrust her into an immediate conflict of interest *vis-à-vis* the legal representation of the Accused in the *Ayyash, Merhi, Oneissi and Sabra* case and her statutory duty to monitor its effectiveness.

115. Secondly, as emphasised above, the Trial Chamber is mandated by Article 16 of the Special Tribunal's Statute to ensure that the Accused receive a fair trial, a vital component of which is having the effective legal representation of the Accused properly monitored. Ms Le Fraper du Hellen's apparent belief to the contrary is legally wrong.

116. The Special Tribunal's Head of the Defence Office has an important and specified statutory role in this, but whatever she does in this respect is subject to a chamber's ultimate oversight. Ms Le Fraper du Hellen is neither the sole, nor final, arbiter of whether the Accused are effectively represented—as is clear from the abundance of international human rights case law on this point, as referred to above.

117. In international criminal law proceedings, such as at the ICTY, Trial Chambers have intervened in the interests of justice in relation to issues of the effectiveness of Defence representation of accused persons.⁶⁰ It is indeed surprising, if not unsettling, that the Head of the Defence Office was unaware that courts have an overriding duty to ensure that accused persons have effective legal representation.

118. Regrettably, Ms Le Fraper du Hellen's views on this endanger the rights of an accused person to receive a fair trial. They are at odds with her independent statutory role under Article 13 (2) of the Statute which requires her to 'protect the rights of the defence', namely, of suspects and accused persons.

into the authority's own alleged wrongdoing. This appears to have occurred here with Ms Le Fraper du Hellen nominating an independent counsel to monitor, if necessary, the effective legal representation of Mr Merhi.

⁶⁰ For example, ICTY, *Prosecutor v. Kunarac, Kovač and Vuković*, IT-96-23 & 23/1, Decision on the Request of the Accused Radomir Kovač to Allow Mr Milan Vujin to Appear as Co-Counsel Acting Pro Bono, 14 March 2000, para. 9. Mr Vujin was a defence lawyer who had appeared for a former accused. But he himself had been convicted of contempt before the Tribunal in relation to that representation, and at that time his case was under appeal. Mr Kovač's lawyers sought the Trial Chamber's permission to permit Mr Vujin to appear as 'pro-bono counsel' pending resolution of his appeal against conviction. The Trial Chamber refused, finding, at para. 13, 'The Trial Chamber considers the inherent power by necessity to include the power to refuse audience to counsel, notwithstanding that he may be otherwise qualified'.

119. The Prosecution's and Ayyash Defence's submissions that judicial interference at the stage was not warranted as no material prejudice had then occurred did not fully address the matter. This was because in its deliberations on the charges the Trial Chamber may have had to consider whether any of the Accused suffered material prejudice as a result of Ms Le Fraper du Hellen's occupying the role of Head of the Defence Office, despite this conflict of interest. Rule 57 (I) makes it clear that the present situation should be avoided.

120. Moreover, another important consideration is that the proceedings have been conducted *in absentia* and those representing the Accused do not have the benefit of instructions from those they represent. The Accused may not currently be in a position to make informed decisions about the quality of their representation, nor protest, as some have at, for example, the International Criminal Tribunal for Rwanda (ICTR) and the ICTY, that their representation is less than adequate.⁶¹

121. Furthermore, it is established international criminal law procedural case law that counsel enjoy the presumption of competence. This is premised on guarantees that assigned counsel have the requisite professional qualifications and meet the formal requirements as set out in the various international criminal courts' and tribunals' rules of procedure and evidence and internal directives on the assignment of defence counsel. This presumption places the burden on the accused to draw the Trial Chamber's attention to any infringement to his or her right to assistance of counsel unless 'counsel's incompetence was so manifest as to oblige the Trial Chamber to act'.⁶² This is not going to occur when Defence counsel are acting for accused persons who are being tried *in absentia*. In

⁶¹ For example, ICTR, *Nahimana, Barayagwiza and Ngeze v. Prosecutor*, ICTR-99-52-A, Judgment, 28 November 2007, paras 130-192; ICTY, *Prosecutor v. Krajišnik*, IT-00-39-A, Judgment, 17 March 2009, paras 38-72. Before dismissing points raised on appeal regarding ineffective representation by counsel, both Appeals Chambers scrutinised the alleged failures and incompetence of defence counsel, and any alleged failure from the Trial Chambers to intervene; ICTY, *Prosecutor v. Blagojević*, IT-02-60-AR73.4, Decision on Appeal by Vidoje Blagojević to Replace his Defence Team, 15 September 2003, upholding the Trial Chamber's decision in *Prosecutor v. Blagojević & Jokić*, IT-02-60-T, Decision on Independent Counsel for Vidoje Blagojević's Motion to Instruct the Registrar to Appoint new Lead and Co-Counsel, 3 July 2003, refusing the Accused's application to replace his entire (assigned) defence team on the basis of his lack of trust in its members and a breakdown in communications between lawyer and client.

⁶² *Prosecutor v. Nahimana, Barayagwiza and Ngeze*, ICTR-99-52-A, Judgment, 28 November 2007, para. 131; *Prosecutor v. Bikindi*, ICTR-01-72-A, Judgment, 18 March 2010, paras 21-22; *Prosecutor v. Akayesu*, ICTR-96-4-A, Judgment, paras 77-78; *Prosecutor v. Krajišnik*, IT-00-39-A, Judgment, 17 March 2009, para. 42. See also, ECtHR, *Kamasinski v. Austria*, 9783/82, Judgment, 19 December 1989, para. 65.

such a situation, it is especially important for the Trial Chamber to uphold the rights of those who are not participating in the proceedings.

122. To take this a step further—and only hypothetically to demonstrate the principle—had the Trial Chamber convicted Mr Merhi and, on appeal new counsel are assigned to act in an appeal against the conviction, counsel who appeared for Mr Merhi at trial could be obliged to provide affidavits, or even testify, on appeal relating to their professional actions at trial. This is in fact what occurred in the *Krajišnik* appeal at the ICTY, where *amicus curiae* counsel for the accused raised appeal grounds that the ineffectiveness of counsel at trial, and by former counsel in the pre-trial phase, had resulted in an unfair trial. This resulted in (former) lead counsel at trial having to testify before the Appeals Chamber as to his own professional conduct and that of co-counsel during trial, including providing internal defence documents.⁶³

123. This is no mere hypothetical possibility. The Prosecution may appeal Mr Merhi's acquittal on all counts. The Trial Chamber has found, and it is noted, based substantially on Ms Le Fraper du Hellen's actions in providing the Prosecution with additional evidence against Mr Merhi, that he was the single user of the mobile Purple 231. The Merhi Defence's contention at trial was that the Prosecution had not proved that Mr Merhi was using Purple 231. However, Ms Le Fraper du Hellen's professional conduct resulted in the Prosecution uncovering the additional evidence that allowed the Trial Chamber to make a finding that was contrary to the Merhi Defence's case, and thus Mr Merhi's personal interests, at trial.

5. The remedy

124. To minimise the risk that any prejudice would become material, all involved, and in particular, a Trial Chamber as the ultimate guarantor of a fair trial, should have remedied the situation. In this regard, Ms Le Fraper du Hellen's involvement in the *Ayyash, Merhi, Oneissi and Sabra* case should have been addressed, sooner rather than later, through delegation to her deputy or to an alternative mechanism.

125. There is no suggestion here that the Head of the Defence Office is actually biased or unprofessional and the legal assumption that she professionally performs her functions is noted.

⁶³ *Prosecutor v. Krajišnik*, IT-00-39-A, Judgment, 17 March 2009, paras 29-72.

However, her current role and duties of oversight of the conduct of the defence in the *Ayyash, Merhi, Oneissi and Sabra* case cannot be satisfactorily executed given her prior role in the same proceedings. This would apply in the event of any appellate proceedings after the judgment. Furthermore, no suggestion is made here that Mr Aouini, the lead counsel for Mr Merhi, has not at all times acted properly and professionally in representing Mr Merhi.

126. The Special Tribunal's Statute and Rules lack a regulatory framework to deal with situations of conflicts of interest such as these relating to the Head of the Defence Office in relation to oversight of the defence of Mr Merhi. In light of this, internal efforts have been undertaken to amend the Rules to provide a statutory solution.

127. However, in the absence of any such Rule amendment over the last two years, the difficulty is finding a solution which permits the Head of the Defence Office to legally delegate her functions outside of the Defence Office. Delegating her powers to her deputy in respect of the monitoring of the representation of Mr Ayyash, Mr Oneissi and Mr Sabra is legally permissible, and to avoid the continuation of the conflict identified above, she must do this without further delay.

128. The problematic aspect is delegating her powers in respect of the Merhi Defence to someone outside of the Defence Office. The Rules do not provide a mechanism that permits her to delegate her essential decision-making powers elsewhere. Ms le Fraper du Hellen suggests that she has the authority to delegate her functions outside of the Defence Office on the basis of Article 27 of the Directive on the Appointment and Assignment of Defence Counsel.

129. On this point, she is also legally mistaken. Article 27 of the Directive on the Appointment and Assignment of Defence Counsel addresses the inspection and examination of counsel's work product. It does not, and legally cannot, delegate or abrogate the Head of the Defence Office's statutory decision-making powers such as, under Rule 57 (H) (ii) and (iii), to make representations to a chamber to remove counsel or to initiate disciplinary proceedings against them.

130. These are decision-making powers entrusted by the Rules to the Head of the Defence Office. They cannot be delegated to someone outside her Office. Similarly, the Special Tribunal's other statutory office-holders cannot unilaterally delegate their functions to outsiders. The Prosecutor cannot withdraw and put an outsider in his place. A Judge cannot stand aside and select an external legal consultant to take his or her place on the bench.

131. In fact, Rule 60 *bis* (E) (ii) in the context of a contempt investigation or prosecution,⁶⁴ demonstrates that the involvement of an external entity must be judicially sanctioned.

132. The Head of the Defence Office may delegate matters to her deputy where there is no conflict of interest but absent express statutory authorisation she may not delegate her statutory role to an outsider. And, as Ms Le Fraper du Hellen has recognised herself, she cannot delegate such matters to her deputy as this would place Ms Uñac in the professionally untenable position of having to monitor her superior's professional competence.

133. The Trial Chamber in exercising its duty to ensure a fair trial cannot wait if and until a regulatory framework is put in place through an amendment of the Rules. This is why I have written this declaration in the absence of a formal order to this effect from the Trial Chamber.

134. In principle, as I stated in my correspondence with Ms Le Fraper du Hellen, an independent alternative mechanism that could address all aspects that fall into the ambit of the conflict of interest identified by the Trial Chamber could have cured its concerns. These were expressed in the Trial Chamber's correspondence with her.

135. Ms Le Fraper du Hellen, however, has stated that *she* would appoint an independent consultant herself, and apparently has done so. The Head of the Defence Office must act professionally and independently, but the very nature of a recusal due to a conflict of interest means that the recused person cannot choose their own replacement. Rule 57 (H) contains serious sanctions that may be taken against Defence counsel. Ms Le Fraper du Hellen cannot choose the person who *could* judge her professional conduct as counsel and make recommendations to *her* as to what she should do about *her own* conduct. This raises an actual conflict of interest.

136. In comparison, under Rule 60 *bis* (E) (ii) in a contempt investigation or prosecution—which the Prosecutor would normally undertake—if he has a conflict of interest, the Registrar rather than the Prosecutor selects *amicus curiae* to take the Prosecutor's role. In light of this, and

⁶⁴ Rule 60*bis* 'Contempt and Obstruction of Justice' in paragraph (E) (ii) states that 'When the Contempt Judge has reason to believe that a person may be in contempt of the Tribunal, he may where the Prosecutor indicates a preference not to investigate the matter or submit an indictment himself, or where in the view of the Contempt Judge, the Prosecutor has a conflict of interest with respect to the relevant conduct, direct the Registrar to appoint an *amicus curiae* to investigate the matter and report back to the Contempt Judge as to whether there are sufficient grounds for instigating contempt proceedings'.

in an effort to avoid *any* tainting of the Accused's fair trial rights, Ms Le Fraper du Hellen cannot herself choose any independent consultant who is to have a role in the oversight of the defence of Mr Merhi. But this is what she appears to have done.

137. Most crucially, as is noted above, Ms Le Fraper du Hellen, recognizing the existence of her own actual conflict of interest, proposed to delegate her non-delegable statutory powers to an outsider. But even if it were legally permissible, which it is not, it would leave a reporting lacuna.

138. The independent consultant would have no-one to report to. They cannot report to Ms Uñac given that legally contractually she cannot supervise her own supervisor's professional conduct. And they cannot report to Ms Le Fraper du Hellen herself because of her own conflict, although this is what she says that she is putting into effect. On both levels the proposal is thus legally and practically unworkable.

139. In conclusion, Ms Le Fraper du Hellen's proposal was legally impermissible but further, even if it were permitted, it would not cure the conflict of interest. If she cannot recognise the inherent conflict of interest and take appropriate action, and the Rules do not (currently) allow a delegation of her functions outside of her office, the only satisfactory solution to the problem is intervention by a chamber in the interests of justice.

140. The Trial Chamber, in my view, should have intervened in the interests of justice to ensure that the Accused continued to have a fair trial, especially in circumstances in which the Accused were not participating in the trial and cannot monitor the effectiveness of their legal representation *in absentia*. As noted in the introduction above, I sincerely regret that this did not occur.

141. The Head of the Defence Office must delegate her duties under Rule 57 to her deputy in respect of the defence of Mr Ayyash, Mr Oneissi and Mr Sabra.

142. Ms Le Fraper du Hellen cannot continue to have a monitoring or oversight role in respect of the Merhi Defence at any stage of the proceedings. Therefore, in respect of her duties under the Rule in respect of his defence, the Registrar must appoint independent *amicus curiae* who can report directly to the appropriate chamber if and when required on any matter related to the conduct of the Merhi Defence as it concerns the trial.

143. It would be acceptable for the Registrar to choose counsel from the list of counsel maintained by the Defence Office under Rule 59 (B).

6. Possible conflict of roles in STL-18-10, *Prosecutor v. Ayyash*

144. The identified conflict of interest does not only affect Ms Le Fraper du Hellen's role in defence matters related to the conduct of the *Ayyash, Merhi, Oneissi and Sabra* proceedings.

145. Another issue is the possibility of conflict in relation to her duties with respect to the monitoring of Defence counsel in the connected case of STL-18-10, *Prosecutor v. Ayyash*. One of the named victims in that case is Mr Marwan Hamade, who was the subject of an attack against him, on 1 October 2004 in Beirut. He is named in all five counts of the indictment in that case.⁶⁵ Salim Jamil Ayyash, the former Accused Mustafa Amine Badreddine, and unnamed others are alleged to have been responsible for Mr Hamade's attempted murder and the murder of his bodyguard.

146. Mr Hamade testified in the *Ayyash, (Badreddine), Merhi, Sabra and Oneissi* trial for eight days, on 17 to 20 November, and 8 to 11 December 2014. The Trial Chamber heard evidence of the attack on him, and he gave extensive political and background evidence that is comprehensively referenced in the judgment. However, on 13 November 2014, just before he was due to testify, the Prosecution sought a ruling from the Trial Chamber in relation to the opposition of the Defence of all (then) five Accused to the Prosecution calling Mr Hamade to testify on any political matters, and its leading related evidence.

147. The Trial Chamber heard detailed submissions from the Prosecution and counsel for the five Accused that day and the next. Ms Le Fraper du Hellen herself made submissions on behalf of the Merhi Defence, opposing Mr Hamade's evidence.⁶⁶ Mr Roux, as the Head of the Defence Office, was also present in the court.

148. When Mr Hamade appeared for questioning in court the following week, Ms Le Fraper du Hellen was present in court on each of the four days of his evidence in chief, representing Mr

⁶⁵ STL-18-10/I/PTJ, *Prosecutor v. Ayyash*, F0012, Public Redacted Indictment, 14 June 2019.

⁶⁶ T. 13 November 2014, pp 92-100.

Merhi.⁶⁷ She was not present when Mr Hamade returned for Defence cross-examination in December 2014 and counsel for Mr Merhi did not cross-examine him.

149. This illustrates that the role of the Head of the Defence Office in both cases is so intertwined that the conflict of roles is not confined to the present case. In case STL-18-10, Ms Le Fraper du Hellen is also monitoring the conduct of counsel she has appointed to represent Mr Ayyash in a second trial, including lead counsel, Mr Emile Aoun, with whom she made joint strategic litigation decisions throughout the *Ayyash, Merhi, Oneissi and Sabra* trial. These include, on 13 November 2014, in opposing Mr Hamade's testimony.

F. Head of the Defence Office—and Deputy Head of the Defence Office—disobeying two Trial Chamber orders, sixteen times

150. Also of serious concern here is that Ms Le Fraper du Hellen, in her capacity as the Head of the Defence Office, disregarded the Trial Chamber's explicit orders—between 30 September and 20 December 2019—in sixteen different filings she personally signed.

151. On 20 September 2019, after reviewing how many filings and decisions in the case remained confidential, the Trial Chamber issued a 'Decision and orders relating to the Public nature of the proceedings and reclassifying filings from "Confidential" To "Public"'.⁶⁸

152. Because of the obvious conflict of roles and interest between Ms Le Fraper du Hellen's former and current roles, the Trial Chamber specifically ordered her Deputy Head of the Defence Office to review some relevant confidential filings, including those filed by the Defence of the former Accused, Mustafa Amine Badreddine.

153. The order was for Ms Uñac, as the Deputy Head of the Defence Office, to either immediately (a) file public redacted versions or (b) seek their reclassification as 'public'.⁶⁹

154. The Trial Chamber put the Deputy Head of the Defence Office's name, in lieu of that of Ms Le Fraper du Hellen, on the coversheet of the order. This, additionally, signified that it was

⁶⁷ Mr Roux was also present on 17 and 20 November 2014.

⁶⁸ F3777, Decision and Orders Relating to the Public Nature of the Proceedings and Reclassifying Filings from 'Confidential' to 'Public', 20 September 2019.

⁶⁹ Decision and orders regarding confidentiality of filings, para. 12.

addressed to the Deputy, rather than the official who had the conflict of interest. In the decision and order, the Trial Chamber held:

So far as the Trial Chamber can ascertain, only a small number of its decisions and orders remain ‘confidential’, and it is currently reviewing the extent of any necessary redactions to these.

The Trial Chamber notes with concern that, in respect of a number of these, it ordered the Parties to file public redacted versions or to have them reclassified, but this has not yet occurred, and without explanation. As for the Badreddine Defence filings, the Trial Chamber on 29 July, 31 October and 25 November 2016 ordered the former Head of Defence Office (Mr François Roux) to file public redacted versions of specified confidential filings—or have them reclassified as “public”. But more than three years have passed in respect of the first order, and almost three in respect of the other two, without this occurring. This is inexplicable.

The Trial Chamber therefore orders the Parties, the Legal Representatives of Victims, the Registrar, and the *Deputy Head of Defence Office* to review the relevant confidential filings and to either immediately (a) file public redacted versions or (b) seek their reclassification as ‘public’. This must be done by **Friday 4 October 2019**.

Finally, the Trial Chamber orders the Parties, the *Deputy Head of Defence Office*, the Legal Representatives of Victims and the Registrar to provide a progress report to the Trial Chamber by **Friday 4 October 2019** in relation to this decision and order, providing reasons in respect of each remaining confidential filing as to why it is still classified as ‘confidential’ and what steps, if any, have been taken to have it reclassified or redacted.⁷⁰ (italics added)

155. Ms Le Fraper du Hellen, however, responded to this explicit order by simply ignoring it—as indeed did her Deputy—and filing and signing it herself in direct contravention of the Trial Chamber’s explicit order. She did this on the following thirteen occasions, namely:

⁷⁰ Decision and orders regarding confidentiality of filings, paras 9, 11-13.

- 30 September 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷¹
- 1 October 2019—the Head of the Defence Office sought reclassification of two filings;⁷²
- 2 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷³
- 2 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷⁴
- 3 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷⁵
- 3 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷⁶
- 3 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷⁷
- 4 October 2019—the Head of the Defence Office sought reclassification of one filing;⁷⁸

⁷¹ F2439, *Notification du dépôt de la version publique expurgée des « Observations du Bureau de la Défense suite à l'ordonnance « Requesting submissions on access to private or closed session proceedings from outside the courtroom » en date du 29 Janvier 2016 », datées du 5 février 2016*, 30 September 2019.

⁷² F3779, *Motion for reclassification*, 1 October 2019.

⁷³ F2162, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Consolidated Response to six Prosecution Motions for Admission of Call Sequence Tables and Related Statements », daté du 1^{er} septembre 2015*, 2 October 2019.

⁷⁴ F2530, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Response to Prosecution Rule 154 Motion for the Admission of Passport Applications », daté du 31 mars 2016*, 2 October 2019.

⁷⁵ F2191, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Response to the "Prosecution Motion for the Admission of Call Sequence Tables Related to the Movements of Rafik Hariri and Related Events" », daté du 10 septembre 2015*, 3 October 2019.

⁷⁶ F2333, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Response to "Prosecution Motion for Video-conference Link Testimony for PRH009 and PRH078" », daté du 24 novembre 2015*, 3 October 2019.

⁷⁷ F2355, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Response to "Prosecution Motion to add PRH705 to its Witness List" », daté du 2 décembre 2015*, 3 October 2019.

⁷⁸ F3785, *Motion for Reclassification*, 4 October 2019.

- 17 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁷⁹
- 22 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁸⁰
- 31 October 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁸¹
- 11 December 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing;⁸² and
- 20 December 2019—the Head of the Defence Office submitted a public redacted version of a previous confidential filing.⁸³

156. The order could not have been clearer: *the Deputy Head of Defence Office* was ordered to review the relevant confidential filings and to either immediately (a) file public redacted versions or (b) seek their reclassification as ‘public’.

157. On 12 December 2019, the Trial Chamber issued further ‘Orders regarding declassification of exhibits’. In this order, the Trial Chamber directed the Parties and Legal Representatives of Victims to review all exhibits tendered during the proceedings to identify those that must remain confidential and those that could be made public or done so with redactions, and to file an update report.⁸⁴

⁷⁹ F2237, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Response to “Prosecution Motion for Protective Measures for [REDACTED]” »*, daté du 1 octobre 2015, 17 October 2019.

⁸⁰ F2351, *Notification du dépôt de la version publique expurgée du document intitulé « Confidential Badreddine Defence Response to “Prosecution Motion to Add PRH707 to its Witness List” »*, daté du 2 décembre 2015, 22 October 2019.

⁸¹ F2411, *Notification du dépôt de la version publique expurgée des « Observations du Chef du Bureau de la Défense au soutien de la requête de la Défense de M. Oneissi aux fins de reconsidération de la décision de la Chambre en date du 20 janvier », datées du 21 janvier 2016*, 31 October 2019.

⁸² F2240, *Notification du dépôt de la version publique expurgée du document intitulé « Badreddine Defence Notice of Reclassification of its Response to the “Prosecution Motion for Protective Measures for Witness [Redacted]” »*, daté du 2 octobre 2015, 11 December 2019.

⁸³ F2338, *Notification du dépôt de la version publique expurgée du document intitulé “Badreddine Defence Response to “Prosecution Motion to Add [Redacted] to its Witness List””*, daté du 26 novembre 2015, 20 December 2019.

⁸⁴ F3802, *Orders Regarding Declassification of Exhibits*, 12 December 2019, para. 4.

158. In respect of exhibits tendered by the Badreddine Defence, the Trial Chamber ordered that:

As before, the Trial Chamber orders the *Deputy Head of Defence Office* to proceed in the same way with respect to exhibits tendered by the Badreddine Defence.⁸⁵ (italics added)

159. As was the case with the decision and order of 20 September 2019, the Trial Chamber placed the name of the Deputy, and not the Head of the Defence Office, on the order's coversheet. Ms Le Fraper du Hellen again ignored the Trial Chamber's explicit order and filed the report herself on 17 December 2019.⁸⁶

160. Ms Le Fraper du Hellen's disregard of the Trial Chamber's orders—and it would appear her Deputy's—was deliberate. In the two progress reports that Ms Le Fraper du Hellen filed on 4 October 2019, she directly quoted the Trial Chamber's orders to her Deputy. In identical footnotes in these reports, she stated:

As she did previously, the Deputy Head of Defence Office referred the matter to the Head of Defence Office. See, for illustrative purposes, the email from the Deputy Head of Defence Office to the Legal Officer of the Trial Chamber of 24 October 2018 by way of which she requested the Legal Officer to inform the Trial Chamber that its email of 23 October 2018 had been transmitted to the Head of Defence Office.⁸⁷

161. The Special Tribunal's Rules of Procedure of Evidence, its Staff Rules and its Codes of Conduct all apply to the Head of the Defence Office and her Deputy. Neither Ms Le Fraper du Hellen nor Ms Uñac asked the Trial Chamber to reconsider its orders directed to the Deputy Head of the Defence Office. Neither explained why they were disregarding judicial orders.

162. Disobeying a judicial order is a serious matter in any jurisdiction, national or international, and penalties may apply. It is difficult to imagine that conduct in disobeying a lawful court order some sixteen times without a justifiable reason, in a national jurisdiction, would be ignored. There is no reason in principle why the Special Tribunal's chambers should ignore this disobedience of

⁸⁵ Orders regarding declassification of exhibits, para. 6.

⁸⁶ F3809, *Rapport relatif aux pièces déposées par l'équipe de Défense de M. Badreddine dans le cadre du procès, conformément à l'Ordonnance de la Chambre de première instance du 12 décembre 2019*, 17 December 2019.

⁸⁷ F3791, Report regarding documents filed by the Defence Office in the trial, submitted in accordance with the Trial Chamber's Order of 20 September 2019, 4 October 2019, fn. 3; F3792, Defence Office Report Regarding the Confidential Exhibits and Documents Filed by the Badreddine Defence Team in the Trial, submitted in Accordance with the Trial Chamber's Order of 20 September 2019, 4 October 2019, fn. 2.

its orders, and by staff members and counsel who are subject to its statutory and internal regulations.

163. Rule 60 provides for ‘Misconduct of Counsel or other Persons Appearing before the Tribunal’ and provides that:

(A) If a Judge or Chamber finds that counsel or anyone appearing in proceedings before the Tribunal is offensive, abusive or obstructing the proper conduct of the proceedings, or is negligent, or otherwise fails to meet the acceptable standards of professional competence and/or ethics in the performance of his duties, the Judge or Chamber may, after giving them the opportunity to be heard:

- (i) issue a formal warning;
- (ii) defer, suspend, or refuse audience to them; or
- (iii) determine that they are no longer eligible to represent a suspect or an accused before the Tribunal, a victim participating in the proceedings, or to appear before the Tribunal.

164. Further, Rule 60 *bis* (A) under the heading ‘Contempt and Obstruction of Justice’ provides:

The Tribunal, in the exercise of its inherent power, may hold in contempt those who knowingly and wilfully interfere with its administration of justice, upon assertion of the Tribunal’s jurisdiction according to the Statute.

165. The Special Tribunal’s Staff Regulations and Staff Rules govern the conduct of staff members. The Head of the Defence Office, although appointed by the Secretary-General, and like the Prosecutor, is a Special Tribunal staff member. So is the Deputy Head. The relevant rules provide that:

A failure to ‘observe the standards of conduct expected of an international civil servant, may amount to unsatisfactory conduct’ and disciplinary proceedings.⁸⁸

⁸⁸ Rule 110.1 (a) ‘Alleged Misconduct’.

It also provides under ‘Conflict of interest’ that:

- (v) Staff members shall abstain from any conduct which may be directly or indirectly in conflict with the discharge of their official duties.

166. The conduct of counsel who appear before the Special Tribunal is governed by ‘A Code of Professional Conduct for Counsel Appearing Before the Tribunal’, and the ‘Code of Professional Conduct for Defence Counsel and Legal Representatives of Victims appearing before the Special Tribunal for Lebanon’. The Head of the Defence Office has a right of audience in proceedings and that Code applies to her. That general code which applies to all counsel, under the heading ‘Professional Conduct’, states that:

- 1 Counsel shall, within his or her respective role in proceedings:
 - a. conduct himself or herself professionally and in accordance with the law, rules and ethics of the legal profession;

Article 17, ‘Professional misconduct’, in the Code of Conduct for Defence Counsel, provides that:

Counsel commits professional misconduct in particular when he:

- (i) violates or attempts to violate any provisions of the Statute, the Rules, the Defence or Victims’ Directive as appropriate, the Joint Code or this Code, imposing an ethical or professional duty on Counsel.

167. Ms Le Fraper du Hellen obviously disagreed with the Trial Chamber’s expressed view, in applying long settled law and international human rights principles that she had a conflict of interest and roles between her former and current roles. She refused to implement the Trial Chamber’s proposed solution, stating that she disagreed with it.

168. Mere disagreement with a court order provides insufficient justification to ignore or to deliberately flout one. Doing so attacks the rule of law and foundations of justice. This is aggravated when an advocate appearing before a court, who is bound by professional codes—national and international—does so, and repeatedly and without explanation or excuse. The appropriate course is to appeal a court order, or to seek its reconsideration, rather than to ignore it. Ms Le Fraper du Hellen is not above the law.

169. In the circumstances outlined above, namely, what appears to be a wilful disregard of two Trial Chamber orders, and in sixteen separate filings, an appropriate measure would be to invoke Rule 60 (A) and to direct the Head of the Defence Office, and her Deputy, to show cause as to why they should not be formally warned or excluded from the proceedings under sub-headings (i) and (ii). I have seriously considered whether this should be done, although other options, as outlined above, are also available.

170. Finally, this declaration should be sent directly to the UN Secretary-General.

DECLARATIONS

FOR THESE REASONS, I MAKE THE FOLLOWING DECLARATIONS:

- 1) **THE HEAD OF THE DEFENCE OFFICE**, Ms Le Fraper du Hellen, has an irresolvable conflict of interest in her dual roles as former co-counsel for Hassan Habib Merhi, and her current role in monitoring the conduct of Defence counsel in the same case under Rule 57 (G);
- 2) **THE EFFECTIVE LEGAL REPRESENTATION OF THE ACCUSED, HASSAN HABIB MERHI** has been jeopardised by the Head of the Defence Office's appointment to that position;
- 3) **THE HEAD OF THE DEFENCE OFFICE** must delegate her duties under Rule 57 (G) and (H) in relation to the conduct of the defence of Salim Jamil Ayyash, Hussein Hassan Oneissi and Assad Hassan Sabra to the Deputy Head of the Defence Office;
- 4) **THE REGISTRAR** should appoint *amicus curiae* to report to the relevant chamber, when and if necessary, on any matters relating to the conduct of the defence of Hassan Habib Merhi under Rule 57;
- 5) **THE HEAD OF THE DEFENCE OFFICE'S** conflict of roles potentially extends to her role in monitoring the performance of Defence counsel in the case of STL-18-10, *Prosecutor v. Salim Jamil Ayyash*;
- 6) **THE APPOINTMENT OF THE HEAD OF THE DEFENCE OFFICE** was irregular and legally flawed by virtue of the failure of the President of the Special Tribunal to consult the

Council of Judges on such an issue, as is mandated by Rule 37 (B), and thus to provide the Secretary-General with its advice; and

- 7) **THE SECRETARY-GENERAL OF THE UNITED NATIONS** was not properly informed of the conflict of roles in appointing Ms Le Fraper du Hellen to the position of Head of the Defence Office.

Judge David Re
Presiding Judge

XVIII. SEPARATE OPINION OF JUDGE JANET NOSWORTHY

A. Introduction

1. As the Trial Chamber delivers its Judgment, I am fully appreciative of the enormous privilege which has been accorded to me, as a member of the Trial Chamber in this historic matter. The first terrorism case within more recent international criminal history. This extraordinary case being completed in most extraordinary times has yielded many new, diverse and profound issues for determination by Special Tribunal judges at every level—challenges to jurisdiction, trial *in absentia*, cell site and telecommunications evidence. These matters are of great interest, to not only the Lebanese community but those in the sphere of international criminal law as also the wider international and diplomatic community.

2. I am hugely aware that the process is not about me the Judge, but the delivery of Justice consistent with human rights standards.

3. I write this, my Opinion, in view of certain differences which separate me from my learned brother and sister, Judges Re and Braidy, on a number of issues and conclusions drawn. In some instances my own views and how the matter at hand should be resolved, will or might not always ultimately affect the determination of guilt, so much as the reasoning and route which led to and affected material findings of fact and law which instruct and inform judicial assessment and determination.

4. I provide in this Opinion my views on a number of matters relating to the law applicable in the Special Tribunal. These matters particularly concern one of the substantive crimes charged in the present case, terrorism under Article 314 of the Lebanese Criminal Code, and one of the charged modes of individual criminal responsibility, namely accomplice liability (or complicity). I will begin by setting out the principles that I consider to govern the exercise of statutory interpretation both generally and in this Tribunal specifically, in section B below.

5. As I explain below, the interpretation of Article 314 of the Lebanese Criminal Code raises the issue of whether customary international law could have been properly used by the Trial Chamber to inform its application and therefore interpretation in the present case. While I agree—

erring on the side of judicial caution—with my learned colleagues that a definition of terrorism has not yet crystallised under customary international law, I am of the view that, had such a definition crystallised, it would have been proper to use it to inform the Trial Chamber’s interpretation of Article 314.¹ I will therefore also set out in section B the definition of customary international law, the use of customary international law by domestic courts, its use by other international criminal courts and tribunals, and the processes or methodologies which these courts have used to determine whether a rule of customary international law has come into existence or emerged. I will then go on to discuss in section C the crime of terrorism, as applicable in the Special Tribunal, specifically.

6. Finally, in section D, I will address three matters relating to complicity: the interpretation of Article 3 (1) (a) of the Statute of the Special Tribunal; the precise scope of the concept of complicity under Lebanese law; and the power of the Trial Chamber to convict an Accused for the lesser offence defined in Article 222 of the Lebanese Criminal Code.

B. The interpretative framework

7. The Appeals Chamber set out, in its first interlocutory decision on the applicable law, in a fairly comprehensive manner its general approach to interpretation, before proceeding to the specific application of this framework while addressing *preliminary questions* posed by the STL’s Pre-Trial Judge, in exercise of one of his special powers under Rule 68 (G) of the Rules and Procedure and Evidence, in order to assist in confirmation of the indictment, as set out below. The questions relevant to this discussion are set out elsewhere in my Opinion.

8. While my learned colleagues engage with the application of these interpretative parameters, I consider that a clearer general position would assist the subsequent more specific assessments and approaches to interpretation. Further, I wish to address a number of material interpretative methods and findings made in the Judgment, not all of which I am fully in accordance with. Therefore I consider it necessary to examine a Judge’s duty to interpret the law, general applicable principles of interpretation as well as specific issues of interpretation which arose during the course of the case.

¹ See section C (4) below.

9. It was in this context that the Appeals Chamber, pursuant to Article 176 *bis* issued its first interlocutory decision on the above and other questions.

1. Judges' duty to interpret

10. Like the Appeals Chamber, I consider that judicial interpretation is an exercise that is always required when considering the operation of any legal rule.² This involves a 'process of bringing clarity to the law through interpretation', which 'is an ordinary, vital core function of the judiciary.'³ Judicial 'interpreters' have an abiding duty, 'as far as practicable to give consistency, homogeneity and due weighting to the different elements of a diverging or heterogeneous set of provisions'.⁴ Further, I unreservedly concur in the view of the Appeals Chamber that in contemporary times the ancient legal maxim, *in claris not fit interpretatio* (when the text is clear there is no need for interpretation) is no longer *du jour* and that for modern day judges it is no longer acceptable interpretative protocol. It undermines the value and importance of the words themselves and the nuances and layers properly within the interpretation process.

11. Consideration has also been given to the fact that by contrast to the international arena Lebanese law is more highly codified, however, from observation, the interpretative hands of Lebanese Judges are not completely restrained, as a matter of law and practice. There is evidence of continuous and vibrant interpretation of the law from courts and judges at every level of the Judiciary. Of course, they are bound by interpretative rules such as ensuring that in the course of interpretation they do not thereby *create* new law or engage and employ an interpretation or end result which is not *foreseeable* to an Accused or prospective offender.

2. Principles of interpretation

12. I draw reference to certain common general principles of interpretation which, in my view, govern the interpretation of both international and national laws; albeit with some variations. I believe that the principle of legality or the *nullum crimen sine lege* principle, is applicable in two respects, Firstly: the conduct charged must have been criminalised under *national* or *international* law at the date that the offence was committed. This imports that if there is no criminalisation then

² First interlocutory decision on applicable law, para. 19.

³ STL, Appeals Panel, Decision on Interlocutory Appeal Concerning Personal Jurisdiction in Contempt Proceedings, 23 January 2015, para. 61.

⁴ First interlocutory decision on applicable law, para. 23.

the act is not prosecutable. No *jurisdiction ratione materiae* or subject matter jurisdiction may be asserted in the circumstances. Secondly: The principle of *nullum crimen sine lege* frames judicial interpretation and Judges must remain fully within the scope of this rule when called upon to interpret the law. The Legality principle applies to the elements of crimes and modes of liability,⁵ and is a rule of customary international law⁶ requiring that the accused's conduct was criminalised under national or international law at the time of commission in terms which were foreseeable and accessible. It is also accepted and codified in modern democratic states, including in Lebanon, as a basic requirement of the rule of law.⁷ This rule is founded on the firm principle that it is for the Legislature and not the court or judge to define a crime and prescribe its punishment.⁸ It has the further extremely important purpose of protection of the Accused persons from arbitrary arrest, detention, charge and conviction on a non-existent charge.

13. I consider the position of the Appeals' Chamber⁹ in first requiring engagement of the teleological approach, is not entirely without merit, in that the intent of the Legislature will be a measure again which to judge or determine whether the interpretation offends the principle of

⁵ *Milutinović and others* Appeal decision on challenging jurisdiction, paras. 37-38, paras. 39-40 (holding that legality is not infringed for a mode of liability under international law as long as the same conduct was criminalised under national law); *Nuon Chea and Khieu Samphan* Case 002/01 Appeal Judgement, 23 November 2016, para. 761; Cassese 2009, pages 91-92; Gallant 2009, pages 357-358.

⁶ ICTY, *Hadžihasanović and others*, IT-01-47-AR72, Decision on Interlocutory Appeal Challenging Jurisdiction in Relation to Command Responsibility, 16 July 2003 ('*Hadžihasanović and others* Appeal decision on command responsibility'), para. 55; *Milutinović and others* Appeal decision on challenging jurisdiction, para. 37-38, *see also* paras 39-40. The principle appears in numerous international human rights instruments, including the ICCPR (Article 15), the Arab Charter on Human Rights (Article 15), the American Convention on Human Rights (Article 9) and the European Convention on Human Rights (Article 7).

⁷ STL, Decision on Motion Challenging Jurisdiction, 6 November 2014, para. 31. For the key Lebanese legislative provisions on this issue, *see* the Judgment, Applicable law, para. 5919.

⁸ *Delalić and others (Čelebići)* Trial Judgment, para. 408.

⁹ The Appeals Chamber appears to find that the principle of legality should be applied after the operation of other interpretative precepts. The Appeals Chamber considered that after the teleological exercise is exhausted, recourse can be had to 'the general principle of criminal law of *favor rei* (in favour of the accused)' and 'the principle of legality (*nullum crimen sine lege*)', stating that these 'are general principles of law applicable in both the domestic and the international legal contexts.' First interlocutory decision on applicable law, para. 32. The Appeals Chamber does, however, appear to accommodate a broader understanding of the principle of legality when it comes to appraising domestic case law, *see* First interlocutory decision on applicable law, paras 114, 131-144, disposition, para. 3, chapeau. The Appeals Chamber also makes clear elsewhere that the principle of *favor rei* is part of the broader principle of legality, *see* STL, Decision on Interlocutory Appeal Concerning Personal Jurisdiction in Contempt Proceedings, 2 October 2014 ('Contempt personal jurisdiction decision'), para. 29 (As per the hierarchical structure of Rule 3, only if these principles are not helpful or capable of resolving the ambiguity should one then turn to Rule 3 (B)—the interpretation which is more favourable to the accused taking into account the general principle of the non-retroactive application of criminal law (*nullum crimen sine lege*), a specific aspect of the principle of legality and when in case of doubt, one should rule in favour the accused (*in dubio pro reo* or *favor rei*)).

Legality or whether it does not. And strict interpretation itself must be viewed within that context and that of Legislative will.

14. On the matter of the prohibition of retroactive application of the law my colleagues opined that where an offence is criminalised under Lebanese law at the date of the alleged offence (2004-2005), yet under current day international law the elements of aiding and abetting were more favourable to the Accused then no issue of Legality could arise, with which I generally agree.¹⁰ However those cases must be distinguished from the instant case where the offence or modes of liability existed under both national and international law at the date of commission of the offence. Furthermore, where a law is enacted or is in existence there is a presumption of regularity unless a challenge is made to the law for example by invoking the principle of *nullum crimen sine lege*. Then the issue is not whether the existing law may be applied but whether the subsequent interpretation of the law contravenes the principle of Legality, such as the rule of restrictive interpretation also known as *lex stricta*.

15. Significantly, for these purposes, whether the principle of Legality is employed without first engaging teleological methods, or after, I consider it is imperative that it be viewed within the context of contemporary human rights standards. I have to set out my understanding of how the rule is applied and its scope within the contemporary context including the material date, 14 February 2005.

16. Importantly as in relation to international instruments, including the Tribunal's Statute itself, I take the view, like the Appeals Chamber, that the framework interpretative precepts are those out in the Vienna Convention. To the extent that the Majority disputes the application of these principles to the Tribunal's Statute,¹¹ I disagree. While the Statute is not itself a treaty, it is well-established that international criminal instruments may be considered with reference to these

¹⁰ Judgment, Applicable law, para. 5932.

¹¹ The Majority states in the Judgment, Applicable law, para. 5969, that 'The Special Tribunal's Statute is not a treaty but an annex to a Security Council resolution adopted pursuant to Chapter VII of the Charter of the United Nations. However, the Appeals Chamber decided to apply international law on the interpretation of treaties to the Statute, unless the applicable Lebanese law clearly provided otherwise.' However, in its section setting out the interpretative principles applicable, the Majority do not take a further view on the applicability of this framework.

principles,¹² including for interpretative guidance.¹³ There is arguably support for this position within some international courts and international criminal law courts, while conceding that equally some do not support this view. Closer, stronger and concrete support is found the Special Tribunal's Rules which make express reference to the Vienna Convention approach as part of the Tribunal's interpretative regime,¹⁴ and the Tribunal has adopted these precepts in numerous previous decisions.¹⁵

17. I also consider that in broad terms, these same interpretative principles apply in domestic courts, as principles of customary international law.¹⁶ As the Appeals Chamber expressed, these rules 'are general principles of judicial interpretation that are at the basis of any serious attempt to interpret and apply legal norms consistently.'¹⁷ The 'Vienna Convention codifies logical and practical norms which are consistent with domestic law',¹⁸ and 'reflect customary rules of interpretation which originate from principles found in 'systems of municipal law "expressive of common sense and of normal grammatical usage"'.¹⁹

¹² See, e.g., *Delalić and others (Čelebići)* Trial Judgment, para. 1161 ('It is well settled that an interpretation of the Articles of the Statute and provisions of the Rules should begin with resort to the general principles of interpretation as codified in Article 31 of the Vienna Convention on the Law of Treaties').

¹³ ICTY, *Prosecutor v. Kordić and Čerkez*, IT-95-14/2-AR73.6, Decision on Appeal Regarding the Admission into Evidence of Seven Affidavits and One Formal Statement, 18 September 2000 ('*Kordić and Čerkez* 18 September 2000 decision'), fn. 39, stating 'In interpretation, the Tribunal *is guided by* the principles which may be drawn from Article 31 (1) of the Vienna Convention on the Law of Treaties' (emphasis added); ICTY, *Prosecutor v. Slobodan Milošević*, IT-02-54-AR73, Reasons for Decision on Prosecution Interlocutory Appeal from Refusal to Order Joinder, 18 April 2002, para. 16, stating, 'Although neither the Tribunal's Statute nor its Rules of Procedure and Evidence are, strictly speaking, treaties, the principles of treaty interpretation have been used by the Appeals Chamber *as guidance* in the interpretation of the Tribunal's Statute, as reflecting customary rules', citing *Tadić* Appeal Judgment, 15 July 1999, para. 282 and *Delalić and others (Čelebići)* Appeal Judgment, paras 67-70, and '[s]uch principles may also be used appropriately *as guidance* in the interpretation of the Tribunal's Rules of Procedure and Evidence.'

¹⁴ Rule 3 (A). See also Decision on Interlocutory Appeal Concerning Personal Jurisdiction in Contempt Proceedings, 12 June 2015, para. 22 (As Rule 3 (A) commands, this treaty, in so far as it reflects customary international law, is relevant to the interpretation of the Rules).

¹⁵ See Public Redacted Version of "Decision on the Prosecutor's Connected Case Submission of 30 June 2011" of 5 August 2011, 16 September 2019, para. 12 ('The Pre-Trial Judge will interpret Article 1 of the Statute and Rule 1 of the Rules in conformity with the rules on treaty interpretation as spelled out in the Vienna Convention on the Law of Treaties, taking into account the specific features of acts of the Security Council as opposed to treaties.)

¹⁶ As set out below, I believe that customary international law has interpretative relevance in domestic courts.

¹⁷ First interlocutory decision on applicable law, para. 26.

¹⁸ ICTR, *Nsengiyumva*, Joint and Separate Opinion of Judge McDonald and Judge Vovrah, 3 June 1999, para. 14, cited in First interlocutory decision on applicable law, fn. 41.

¹⁹ ICTR, *Kanyabashi*, Joint and Separate Opinion of Judge Wang and Judge Nieto-Navia, 3 June 1999, para. 11, cited in First interlocutory decision on applicable law, fn. 41, quoting R. Jennings and A. Watts (eds), *Oppenheim's International Law*, vol. I, 9th ed. (Longman, 1996) ('*Oppenheim's International Law*'), p. 1270; see also *Delalić and others (Čelebići)* Appeal Judgment, para. 67 (noting the Vienna Convention 'reflect[s] customary rules' of interpretation and citing *Case Concerning the Territorial Dispute (Libyan Arab Jamahiriya/Chad)*, Judgment, I.C.J.

18. The Vienna Convention precepts require that '[a] treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose'.²⁰ Under this framework, the usual starting point for interpretation is 'the ordinary meaning'. The interpreter of a provision will focus on the 'express language of the provision';²¹ 'start with a statute's language';²² and 'begi[n] with the words'.²³ The ECCC Pre-Trial Chamber, interpreting a provision of the Cambodian Code of Criminal Procedure, considered that '[p]ursuant to recognized principles of interpretation, 'in construing statutes, and all written instruments, the grammatical and ordinary sense of the words is to be adhered to, unless that would lead to some absurdity or inconsistency with the rest of the instrument.'²⁴ An 1857 British civil judgment defined this as a 'universal rule' of statutory interpretation (as quoted).²⁵

19. While the starting point is plain wording of the text, 'one must take into account the ordinary meaning of the terms interpreted in the context of the provisions of the Statute and the Rules, their object and purpose.'²⁶ No hierarchy exists between the principles set out in Article 31 (1), and the contextual, or teleological, reading takes place alongside the plain English one. This process is designed to ensure that interpretation renders provisions 'effective and operational with a view to attaining the purpose for which they were agreed upon.'²⁷ The teleological approach is 'based on the search for the purpose and the object of a rule with a view

Reports (1994), at 21, para. 41, for the customary status of Article 31 of the Vienna Convention on the Law of Treaties).

²⁰ Vienna Convention on the Law of Treaties, Art. 31 (1).

²⁵ *Grey v. Pearson* (1857) 10 ER 1216, 1234.

²⁶ Contempt personal jurisdiction decision, para. 35.

²⁷ First interlocutory decision on applicable law, para. 28. *See also* First interlocutory decision on applicable law, para. 30 ('Accompanying the process of teleological interpretation is the principle of effectiveness, also expressed in the maxim *ut res magis valeat quam pereat* (in order that a rule be effective rather than ineffectual)'); Contempt personal jurisdiction decision, para. 73 (In the present circumstances, this case concerns the integrity of our judicial proceedings and the proper administration of justice – cornerstones of the rule of law. Therefore, we find that the principle of effectiveness requires that the Tribunal guard its primary jurisdiction from contemptuous attacks by adopting an effective approach to its inherent jurisdiction.); Second interlocutory decision on applicable law, para. 23 (The Appeals Chamber also reiterates that the principle of teleological interpretation calls for a construction of the provisions of the Statute in such manner as to render them effective and operational with a view to bringing to fruition their purpose).

to bringing to fruition as much as possible the potential of the rule.’²⁸ The teleological approach also applies to the interpretation of domestic law.²⁹

20. It has been advanced that the objects and purpose based approach, according to the principle of *effectiveness* is subject to certain parameters, again offered by the principle of legality. As the ICTY Appeals Chamber in *Hadžihasanović et al.* stated: ‘[...] an expansive reading of criminal texts violates the principle of legality, widely recognised as a peremptory norm of international law, and thus of the human rights of the accused.’³⁰ However in response my own view is that applying an objects and purpose based *effectiveness* approach to a particular provision, logically, would or could *not* offend the principle of legality as the judicial interpreter is seeking to discern and effect the intent and will of the Legislator, as expressed through the relevant provisions and its own object and purpose, within its context—and to fulfil it. Now, as to the wider component of the need to administer justice in a fair and efficient manner, I categorically consider that to fulfil the intent of parliament, rendering an objects and purpose, effective methodology cannot be considered ‘inefficient’ or ‘unfair’. It is fully in keeping with *lex stricta* requirements.

21. Generally in respect of how judges may permissibly interpret and develop the law, Professor Antonio Cassese, who was also the first President of the Special Tribunal, had underlined how the concept of legality in international criminal law had moved towards a strict, non-expansive, approach.³¹ He concluded that the principle of non-retroactivity of criminal rules is now solidly embodied in criminal law. That it followed that courts may only apply substantive criminal rules that existed at the time of commission of the alleged crime.³² Professor Cassese acknowledged, consistent with current procedural and human rights law, that judges had the right to engage in law development without infringing the principle of Legality. He set the following parameters engaging a tri-partite test for such instances of law development, which I embrace:

²⁸ *Ibid.*, para. 29.

²⁹ See Second interlocutory decision on the applicable law, para. 60.

³⁰ *Hadžihasanović and others* Appeal decision on command responsibility, para. 55.

³¹ Cassese’s International Criminal Law, pp 24 *et seq.*

³² *Ibid.*, p. 149.

- a. Development must be in keeping with the rules of criminal of criminal liability defining the essence of the offence;
- b. It must conform with fundamental principles of international law; and
- c. The particular development must be reasonably foreseeable by the defendant.³³

22. This, in my view, at the highest, highlights the potential for a judicial misstep, when not interpreting as *strictly* required. This is a risk and an error which judges strive, and should continually strive to avoid. Clearly Professor Cassese did not intend to prohibit teleological interpretation³⁴ and indeed as the President of the Appeals Chamber in the first interlocutory decision on the applicable law, that Chamber, including him, jointly expressed that it is a valid process for interpretation of the Tribunal's Statute.

23. The duty of strict construction operates 'in addition to the well-recognised paramount duty of the judicial interpreter, or judge, to read into the language of the legislature, honestly and faithfully, its plain and rational meaning and to promote its object.'³⁵ The interpretative approach should be within the scope of the law, not beyond it; as is stressed by the various approaches which emphasise furtherance of the law itself as the object and purpose.³⁶

³³ *Ibid.*, p. 152.

³⁴ The fight against impunity is sometimes treated as a component of the teleological approach which has received adverse scrutiny from highly respected judicial and academic members of the international community. The goal of seeking to end impunity is not lacking in legal *bona fides*, as it affirms the existence of the Rule of Law, in my opinion. That hallowed rule is equally based on the principle that no one is above the law and that officials of State and persons of high stature and influence should be also subject to the bounds of the law as is the common and ordinary citizen, and should not avoid criminal responsibility when deserved. Very significantly, this Special Tribunal does not search for "those most responsible". It concerns jurisdiction *ratione personae* over "the persons *responsible* for the attack which resulted in the death of Mr. Hariri and others", without any reference to their stature. Further no international court or tribunal has legal authority to seek out persons (allegedly) responsible, solely on the basis of their official governmental capacity, high office or stature, in the absence of relevant facts supporting investigation, suspicion and charge. All international courts, including the Special Tribunal for Lebanon, have legal mechanisms and systems for trial of persons who come before them. All have very precise rules, consistent with human right standards concerning, suspects and accused persons which exist at every stage of proceedings: pre-trial, trial and appellate. There are highly precise and complicated rules procedure and evidence. These are the operable standards that govern international criminal proceedings. I am therefore not persuaded as to the force of criticisms in this regard.

³⁵ *Delalić and others (Čelebići)* Trial Judgment, para. 408.

³⁶ The Appeals Chamber has, for example, held that the goal of the Tribunal is 'to administer justice in a fair and efficient manner', see First interlocutory decision on applicable law, para. 32. The ICC *Al Bashir* Trial Chamber interpreted the object and purpose of the Statute – i.e. the focus of the 'teleological approach - as the need to further the NCSL principle itself, 'by providing a priori legal certainty on the content of the definition of the crimes provided for in the Statute.' ICC, Decision on the Prosecution's Application for a Warrant of Arrest against Omar Hassan Ahmad Al Bashir, 4 March 2009, para. 131.

24. A final point I would like to note concerning teleological interpretation is that it is, in my opinion, consistent with what is described in a human rights context as the ‘progressive evolution of the law.’ This permits, within the scope of interpretation, a judge to situate the law in the ‘conditions of the day’, and adapt to changing circumstances. Christos Rozakis, a Vice President of the European Court of Human Rights, has argued that the ‘living instrument’ interpretative approach to the Convention is ‘the paramount concept which permeates the whole case law of the ECHR and conceptually determines the evolution of the interpretation of the clauses of the Convention’.³⁷

25. I would also wish to refer to *malum in se* crimes which by their very nature are abhorrent and repulsive to humanity. I accept that as a matter of law they do not *per se* import criminal responsibility or fall within the concept of an act which has been criminalised. Rather the abhorrent nature of the crime may be applied to repel and counter an assertion by the offender that he did not know the act was criminalised at the date of the offence. In other words, by virtue of its abhorrent nature it is so improbable that such act or conduct could possibly be lawful, that all sane and reasonable persons would or will have been put on “notice” or “foreseen” that it was criminalised.

26. Finally, I come now to the rule of construction of *favor rei*. Here, I concur with the view that it is only where the teleological framework has failed to offer any positive results and ambiguity remains, it then becomes appropriate to deploy the principle of *favor rei*. As the Co-Investigating Judges held at the ECCC, the principle of ‘*in dubio pro reo*’ has a residual role in the interpretation of legal provisions, and its application is limited to doubts that remain after the application of the standard rules of interpretation.³⁸ I believe that *favor rei* should be employed only where there is residual *ambiguity*. That is when all interpretative means have been employed and not brought resolution, with the result that two interpretations of the law present themselves after other means or methods of interpretation have been employed and have failed. Only then may

³⁷ Rozakis C., ‘The European Judge as Comparatist’ (2005) 80 *Tul L Rev* 257, p. 261.

³⁸ ECCC, Case 004/1, Closing Order, D308, 10 July 2017, para. 26. The Co-Investigating Judges went on, less persuasively, to consider the principle as substantively identical to the principle of strict construction. The two are separate, and the principle of *favor rei* operates when strict construction has failed to provide a solution, *see, e.g., Delalić and others (Čelebići)* Trial Judgment, para. 413 (‘The effect of strict construction of the provisions of a criminal statute is that where an equivocal word or ambiguous sentence leaves a reasonable doubt of its meaning which the canons of construction fail to solve, the benefit of the doubt should be given to the subject and against the legislature which has failed to explain itself. This is why ambiguous criminal statutes are to be construed *contra proferentem*.’)

Judges of the Special Tribunal resort to *favor rei*, otherwise they act prematurely. The presence of the two results—one favourable to the Accused and one which is adverse to him, requires that the Judicial interpreter, resolve the issue his favor (*favor rei*). I consider it a rule of construction rather than falling neatly under the umbrella of *in dubio pro reo* which concerns a standard related to evidence and proof beyond reasonable doubt. However, in reflection, wherever this honoured principle falls as a rule of construction or a component of *in dubio pro reo*, the spirit and intent is identical: that a finding adverse to the Accused should not be reached in the circumstances.³⁹

3. Definition of customary international law

27. First, I note that customary international law is widely recognised as a primary source of international law. It is included in Article 38 (1) of the Statute of the International Court of Justice—the principal judicial organ of the United Nations, of which Lebanon is a founding member⁴⁰—which enumerates the sources of law which the ICJ can apply in determining an international legal dispute.

28. The ICJ Statute defines it as ‘evidence of a general practice accepted as law’.⁴¹ A noted legal scholar and author⁴² (a subsidiary source of law under Article 38 (1) (d) of the ICJ Statute) has stated that jurists and scholars alike concur in the opinion that the above text reflects the view that customary international law is composed of two elements: general state practice—termed the ‘objective element’—which is required to be relatively uniform and constant.⁴³ Secondly, there is a psychological element consisting of a subjective conviction of a State that it is legally bound to follow the practice giving rise to the norm or principle, termed the ‘subjective element’. This mental element is known as *opinio juris sive necessitas*,⁴⁴ referred to in its shortened form as *opinio juris*. Its underlying rationale is to distinguish the practice that a state may engage in without

³⁹ The Majority prefers to term the rule of construction *in dubio pro reo*. See Judgment, Applicable law, paras 5922- 5928.

⁴⁰ According to the preamble to the Lebanese Constitution, Lebanon declares itself as a founding and active member of the United Nations and states that it abides by its covenants.

⁴¹ Statute of the International Court of Justice, Art. 38 (1) (b).

⁴² Michael P. Scharf, *Customary International Law in Times of Fundamental Change: Recognizing Grotian moments* (Cambridge University Press, 2013) (‘Scharf 2013’), p. 33.

⁴³ *Ibid.*, p 38: Scharf opines that although the ICJ refers to ‘constant and uniform usage’ as a yardstick, it has made clear that perfect consistency is not required.

⁴⁴ See also Alina Kaczorowska, *Public International Law* (4th ed.) (Routledge, 2010), (‘Kaczorowska 2010’) p. 27.

any sense of *obligation* to follow the practice, and instead does it routinely out of courtesy or habit, termed as *usage*.⁴⁵

29. This ‘two-element’ approach to identifying customary international law has also been adopted by the International Law Commission⁴⁶ and international criminal courts and tribunals,⁴⁷ noting that customary international law ‘results from the gradual development of international instruments and national case-law into general rules’.⁴⁸

30. The judgments of the ICJ itself and those of its predecessor, the Permanent Court of International Justice, have also consistently stated that a customary rule requires the presence of both of these elements, and have expanded on the definition of each of the two elements.

31. It has been held in respect of the objective element of state practice that it must be: firstly, constant and uniform; secondly, generally accepted by states; and thirdly, be of a certain duration. The ICJ in the *North Sea Continental Shelf Case* found that state practice must be both ‘extensive and virtually uniform’, but need not necessarily be of long duration.⁴⁹ For its acceptance as a customary rule, it must have crystallised and be of certain maturity when it is sought to be relied on as a customary rule. Complete uniformity is not required. As to the requirement of generality it imports widespread practice, but not necessarily universal or global adherence to the rule.

32. In the well-known *Lotus* case,⁵⁰ the PCIJ opined that international law is based on the will of states expressed in conventions and in ‘usages generally accepted as expressing principles of law’. The ICJ has also expressed that states’ action must not only ‘amount to settled practice, but

⁴⁹ *North Sea Continental Shelf* Judgment, para. 74.

⁵⁰ PCIJ, *S.S. Lotus* Judgment, P.C.I.J. Rep. Series A No. 10, p. 18.

they must also be carried out in such a way as to be evidence of a belief that this practice is rendered obligatory by the existence of the rule of law requiring it'.⁵¹ It is often emphasised that, where the above two elements are satisfied (manifest), a rule of customary international law will be deemed to bind *all* states (with the exception of persistent objectors, as discussed below), without needing to demonstrate that the particular state allegedly bound by the rule had participated in its formation or had otherwise accepted it as a norm or principle of law. In other words, customary international law is a source of law that is of global application.⁵²

33. The 'persistent objector rule' (treated by jurists and scholars as axiomatic⁵³) has been recognised by the ICJ in the *Asylum* and *Anglo-Norwegian Fisheries* cases, for example.⁵⁴ It expresses the principle that where, during the formative stage of a customary international law principle, a State *persistently objects* to that developing rule and informs other states of its objection, then it will not be bound by it. Silence, in face of the emerging rule, will amount to acquiescence in the rule, with the burden of proof being on the objecting state.⁵⁵ Hence, a state need not participate directly in the emergence or creation of the customary rule in order for it to apply to that state. The persistent objector rule does not apply to peremptory norms or *jus cogens*.⁵⁶

34. I understand the practical result of the above with reference to this case to be as follows. In the event that—as was found by the Special Tribunal's Appeals Chamber—there had been an established rule of customary international law setting out a more expansive definition of the 'means' employed to commit and act of terrorism than those set out in Article 314 of the Lebanese Criminal Code, it would bind Lebanon even if it had not expressly participated in the emergence of the rule, as it would be regarded as having *acquiesced* in this emerging customary international law rule unless it had registered its *constant* and *persistent* objection with other States.

⁵⁵ Kaczorowska 2010, pp 27-28.

⁵⁶ Latin name *jus cogens* (compelling law) A norm accepted and recognised by states generally and the international community as a whole as one from which no derogation is permitted. It can only be modified by a subsequent like norm of the same character of general international law.

35. While the definition of the two limbs of customary international law is relatively clear, there are noted challenges in identifying what these two elements demand in practice. In other words, what is the correct methodology for courts to employ when trying to determine whether the two elements exist, thereby demonstrating that a rule of customary international law has crystallised.

36. Courts have relied on an extremely wide range of sources as evidence of custom. Treaties, national legislation, state declarations, domestic and international case law, as well as reports from the ICRC and other international agencies are amongst the sources that have been reviewed by international and internationalised criminal courts and tribunals.⁵⁷

37. In the *Norman* case, the SCSL reviewed international legal instruments, the jurisprudence of the ICTY, and municipal laws to find that child recruitment was a crime under international law during the relevant time of the indictment.⁵⁸ In the *Krstić* case, the ICTY looked at the codification work undertaken in international treaties, international case law, the codification work undertaken by the International Law Commission and other international committees, the drafting work leading to the Rome Statute and its Elements of Crimes (even though the latter post-dated the relevant events), and, lastly, the legislation and practice of states, in particular their judicial interpretations and decisions.⁵⁹

38. As Crawford notes in relation to ICJ jurisprudence,⁶⁰ international criminal courts have also often inferred the existence of *opinio juris* from state practice.⁶¹ In *Tadić*, the Appeals Chamber held that:

When attempting to ascertain State practice with a view to establishing the existence of a customary rule or a general principle, it is difficult if not impossible to pinpoint the actual

⁶¹ Thomas Rauter, *Judicial Practice, Customary International Criminal Law and Nullum Crimen Sine Lege* (Springer, 2017), pp 128-131. In his book, the author conducts a comprehensive study of almost all cases of international and internationalised courts and tribunals. He found that until 2017, only 11 judgments of ICTY Trial Chambers make

behavior of the troops in the field for the purpose of establishing whether they in fact comply with, or disregard, certain standards of behavior... In appraising the formation of customary rules or general principles, one should therefore be aware that, on account of the inherent nature of this subject-matter, reliance must primarily be placed on such elements of official pronouncements of States, military manuals and judicial decisions.⁶²

39. The Appeals Chamber does not specify whether it regarded ‘pronouncements of States, military manuals and judicial decisions’ as forms of State practice or *opinio juris*,⁶³ or indeed as both,⁶⁴ suggesting that it has followed the approach of inferring *opinio juris* from state practice. It is indeed unsurprising that courts would be able to infer the mental element (*opinio juris*) of customary international law from the states’ actual behavior (practice). It would be impossible to enter a state’s ‘mind’ and ascertain the intention behind its behavior, and it would be unreasonable to require that *opinio juris* be proven exclusively through statements from states about their motivations. Such stringent evidential separation between the two limbs of customary international law would render it impossible to prove in practice.

40. International criminal courts and tribunals have also taken a variety of approaches when applying the test in the *North Sea Continental Shelf Case* requiring State practice to be both ‘extensive and virtually uniform’⁶⁵ in ascertaining customary international law does not in itself appear to be uniform across international criminal courts and tribunals.⁶⁶

41. The SCSL in the *Norman* case has also noted that ‘the number of states needed to create a rule of customary law varies according to the amount of practice which conflicts with the rule and

explicit reference to State practice and/or *opinio juris*, 7 judgments of the ICTY Appeals Chamber make explicit reference to State practice and/or *opinio juris*, 2 judgments from the Trial Chambers and Appeals Chambers each at the Special Court for Sierra Leone make explicit reference to State practice and/or *opinio juris*, and twice have the Trial Chambers at the ECCC made explicit reference to State practice and/or *opinio juris*. His study revealed that there are even fewer instances where specific evidence was allocated to ‘State practice’ or ‘*opinio juris*’.

⁶² *Tadić* Decision on the Defence motion for Interlocutory Appeal on Jurisdiction, para. 99.

⁶³ Legal scholars are also divided on this matter. See, e.g., W. Heintschel von Heinegg, ‘Criminal International Law and Customary International Law’ in *International Criminal Law and the Current Development of Public International Law*, Zimmermann (ed.) (Duncker and Humblot, 2003), pp 27-47, p. 35.

⁶⁶ Compare *Tadić* Appeal Judgment, paras 224-226; *Delalić and others (Čelebići)* Trial Judgment, paras 255-256; *Fofana and Kondewa* Appeal Judgment, para. 405; *Kayishema and Ruzindana* Trial Judgment, paras 141-147; ICTY, *Prosecutor v. Vasiljević*, IT-98-32-T, Judgment, 29 November 2002, para. 227, especially fn. 586 where the Trial Chamber criticises *Kayishema and Ruzindana* for not reviewing State practice in its finding.

even a practice followed by a very small number of states can create a rule of customary law if there is no practice which conflicts with the rule'.⁶⁷ Judge Robertson's dissenting opinion in this case points out that global criminalisation of a particular conduct as evidence that such conduct can amount to the status of an international crime would, for example, provide for an act such as theft to qualify as an international crime.⁶⁸

42. This case also demonstrates some of the divergence of academic and judicial opinion on the matter.

43. The appellate majority judges in *Norman* raised a credible case for the existence of a rule or norm under customary international law, providing clear underlying reasoning as to why its application did not offend the principle of legality. They rationally pursued resolution of the issue before them in the preliminary jurisdiction motion which was: whether the crime as defined in Article 4 (c) was recognized as a crime entailing individual criminal responsibility under customary international at the time of the alleged acts. They looked first at Article 38 (1) (b) of the ICJ Statute.

44. They then proceeded to examine whether the prohibition on child recruitment had crystallized. They took the view that, since a high amount of States, 185 of them, including Sierra Leone, were parties to the Geneva Convention prior to 1996, it followed that the provisions of the conventions were widely recognised as customary international law.⁶⁹ All but six states had ratified the Convention, giving it the highest number of states parties of all international conventions, and therefore demonstrating that it had become customary international law. There was not a single reservation.⁷⁰

45. They also considered *nullum crimen sine lege* and *sine poena* to determine whether the principle of retroactivity had been breached and answered in the negative.⁷¹ The majority considered that the discussion during the preparation of the Rome Statute showed a focus on the

⁶⁷ *Norman* child recruitment decision, para. 49.

⁶⁹ *Norman* child recruitment decision, para. 17.

⁷⁰ *Ibid.*, para. 18.

⁷¹ *Ibid.*, para. 25 *et seq.*, para. 53.

codification of the existing rule prohibiting child recruitment.⁷² It also noted in this regard that a rule of customary international law need not be codified in a treaty before it can be said to have crystallised, nor is it necessary for individual criminal responsibility to be explicitly codified in a treaty in order for individual responsibility to arise under customary international law.⁷³

46. Judge Robertson's dissent challenged the application of the 1977 Geneva Conventions and the Conventions of the Rights of the Child, on the basis that those conventions may have created an obligation on the part of States to refrain from recruiting child soldiers, but did not criminalize such activity.⁷⁴ The Rome Statute had indeed criminalized child recruitment, but did not constitute codification of customary international law.⁷⁵ Judge Robertson warned of risk of potential contravention of the *nullum crimen sine lege* principle.⁷⁶ He challenged the contention that *malum in se* crimes could, by virtue of their intrinsically *abhorrent* nature, be exempted from the operation of the principle of legality which would result in retroactive application of law. He cited Professor Cassese in support of this contention.⁷⁷ However, in my view, the majority's assessment of the available sources had made a credible case for finding that customary international law on the matter had crystallised, while Judge Robertson seemed to place the threshold somewhat higher.

47. It is therefore apparent that, although customary international law has a clear *definition*, there is considerable variation in the way in which courts have undertaken the task of looking at the information before them to determine whether it conforms with that definition and therefore whether a rule of customary international law has emerged. On the one hand, this level of variation is intrinsic in the exercise, because the information put before the court as evidence of the formation of customary international law will be different in each case. This is an inevitable feature of customary international law's emergence. However, I am cognizant of the fact that, for the purposes of the current case, we are considering whether a rule of customary international law has emerged with regard to the definition of a crime and therefore affecting an accused's individual criminal responsibility. I therefore believe that, in this situation in particular, a high level of rigour and a high evidential standard is necessary in the exercise of considering whether a rule of

⁷² *Ibid.*, para. 33.

⁷³ *Ibid.*, para. 38.

⁷⁴ *Norman Dissenting Opinion of Justice Robertson*, paras 1-2.

⁷⁵ *Ibid.*, para. 2.

⁷⁶ *Ibid.*, paras 11-17.

⁷⁷ *Ibid.*, para. 11.

customary international law has emerged. I believe that applying the evidential standard of ‘beyond reasonable doubt’ when considering whether the existence of a rule of customary international law had been proven, would serve to adequately protect the rights of the accused in a criminal trial.

4. Customary international law in domestic courts

48. Specifically with respect to customary international law, the Appeals Chamber held that it ‘will apply Lebanese law as interpreted and applied by Lebanese courts’.⁷⁸ All Trial Chamber members concur that they would generally, apply Lebanese law as applied by Lebanese Judges unless there was reason to depart from so doing.⁷⁹

49. The Appeals Chamber has stated that Lebanese statutory law did not expressly provide for implementation of customary international law rules or for their ranking within the Lebanese legal system and that it was for the courts to determine their applicability and rank. That where they were provided for in the Constitution, they enjoyed the standing of legislation, however this meant that they could be repealed or amended by legislation.⁸⁰ That in the case of self-executing customary international law rules, in addition to being binding in interstate relations, they also take effect within Lebanese law and are binding on state officials and individuals.⁸¹ However their scope and content changes or ceases to apply as soon as the corresponding rule applicable in the world community changes. My opinion is not divided from that of the Appeals Chamber in these respects.

50. In the Appeals Chamber’s opinion, there are two clear ways in which binding international law will be relevant in domestic courts. The first is as a source of directly applicable law.⁸² This includes treaties that have been ratified by the Head of State after authorization or approval by the legislature.⁸³ Accordingly, ‘international customary rules which are self-executing, in addition to binding Lebanon in interstate relations, also take effect within Lebanese domestic law and are binding on State officials and individuals.’ These are ‘the international obligations undertaken by

⁷⁸ First interlocutory decision on applicable law, para. 35.

⁸⁰ First interlocutory decision on applicable law, paras 119, 121-122.

⁸¹ *Ibid.*, para. 120.

⁸² *Ibid.*, para. 74.

⁸³ *Ibid.*, para. 74.

Lebanon with which, in the absence of very clear language, it is presumed any legislation complies'.⁸⁴

51. The Appeals Chamber was also of the opinion that binding customary international law that was not self-executing applied in Lebanese Courts subject to the limitation that it could not be directly applied in the absence of enactment in Lebanese law but could be utilised as an interpretative aid in construing the provisions of the Lebanese Criminal Code.⁸⁵ The Appeals Chamber describes the interpreting of the provisions of the Lebanese Code as they would be by Lebanese Courts consistent with the general principles of interpretation common to most States of the world: the principle that one should construe the Legislation of a State in such a manner as to align it as much as possible with international legal standards binding on the State.⁸⁶ It also points to Article 4 of the Lebanese Code of Civil Procedure, which makes reference to the application of custom which I do not necessarily consider as strong support for its application within a criminal law context, but view it objectively as a demonstration of its acceptance as a valid and applicable source of law, and fit for application within Lebanon.⁸⁷

52. The Appeals Chamber and the Trial Chamber are all in agreement that Lebanese courts will not apply customary international law in a *direct* manner, even when customary international law is binding. The point at issue is therefore whether there is a general principle—of national or international origin—which requires interpretative recourse to customary international law which was binding, and *not* directly applicable to the provisions of the Code, by reason of the fact that it had not been enacted into law in the Lebanon.

53. Here, I am compelled to join in the view of the Appeals Chamber as I consider that such a general principle of interpretation *is* in existence.⁸⁸ I believe that to find a general principle—

⁸⁴ *Ibid.*, para. 20.

⁸⁵ First interlocutory decision on applicable law, para. 114.

⁸⁶ *Ibid.*, para. 123.

⁸⁷ See Article 4 which reads in the relevant part: If the law is obscure, the Judge shall interpret shall interpret it in a manner which consistent with its purpose and with other texts. In the absence of the law, the judge shall apply the general principles of law, customs, and the principles of justice. First interlocutory decision on applicable law, fn. 38.

⁸⁸ See First interlocutory decision on applicable law, fns 63, 231, referring to U.K., Court of Appeal, *Salomon v Commissioners of Customs and Excise*, [1967] 2 Q.B. 139, at 143, *reprinted in* 41 I.L.R. 1 at 7; U.K., Court of Appeal, *Post Office v Estuary Radio Ltd*, [1968] 2 Q.B. 752 at 756 (Lord Diplock), *reprinted in* 43 I.L.R. 114, at 121; U.K., House of Lords, *Garland v British Rail Engineering Ltd*, [1983] 2 A.C. 751, at 771 (Lord Diplock); J.L. whether of national or international origin—requires a careful consideration of sources. In identifying a general principle drawn from national jurisdictions, it is usual to explore both civil and common law systems. Reference to the Lebanese framework for civil interpretation does not assist the finding of a general principle with reference to criminal law, however its presence, although in a civil capacity serves as a demonstration that it is a valid source of law which is applied in the Lebanon by Lebanese Judges, the recorded instances, albeit not profuse.

54. As for the substance of the sources referred to by the Appeals Chamber, they support the proposition that in general, a court will not disregard its international obligations. In the words of Lord Denning, ‘Parliament does not intend to act in breach of international law, including therein specific treaty obligations.’⁸⁹ According to Brownlie, too, ‘there is a general duty to bring internal law into conformity with obligations under international law.’⁹⁰ However, these sources, by themselves might not resolve the specific question of when binding customary international law applies as an interpretative source.

55. The need to fully interrogate the existence of such a general principle is further made out due to the potential for certain ambiguities in the case-law, even in relation to the seemingly uncontroversial position that domestic courts should apply clearly binding international law. The Irish High Court, for example, ruled that ‘one can only conclude therefore that principles of international law enter domestic law only to the extent that no constitutional, statutory or other judge made law is inconsistent with the principle in question. Where a conflict arises, the rule of international law must in every case yield to domestic law.’⁹¹ However, the Chilean Appeals Court

Law, sec. 21; I. Brownlie, *Principles of Public International Law*, 7th ed. (Oxford University Press, 2008) (‘Brownlie 2008’), p. 35.

The reason for this rule is that, in the words of Lord Denning, “Parliament does not intend to act in breach of international law, including therein specific treaty obligations”. ruled that, on the flipside: ‘a state could not invoke municipal laws to justify non-compliance with duties arising from a treaty.’⁹²

56. Specific concerns arise, too, in relation to reliance on customary international law in domestic courts, given the difficulty of clearly identifying customary international norms. The Dutch Supreme Court in *Bourtese* ruled that customary international law could not supersede an act of Parliament; and, in *H v Prosecutor*, ruled that Article 94 of the Dutch Constitution implicitly precluded courts from testing Acts against rules of customary international law.⁹³ One author commented that ‘especially in the context of customary international law, it is an oversimplification to state that domestic courts just apply international law [...] [d]omestic courts sometimes find rules of a customary nature, and sometimes play a vital role in the emergence of new rules.’⁹⁴ To the extent that domestic courts are involved in creating custom, it might be hard to argue that they are under a hard-and-fast obligation to apply it.

57. Despite these limitations, however, I consider that it can be reasonably stated that there has emerged a general principle that domestic courts should direct themselves to relevant customary international law as an interpretative source—but only where such customary international law has clearly crystallised as a binding source, and both conditions referred earlier in this Opinion have been satisfied.

58. In general, I believe that a domestic judge works within both national and international frameworks. Antonio Cassese described the ‘role-splitting’ of the domestic judge as an agent of both the domestic and international legal order.⁹⁵

59. A significant number of courts, across a range of civil and common law backgrounds, have confirmed the position taken in the British cases referred to by the Appeals Chamber. The Malawi

conventions that may be applied in Lebanon such as the Covenant of 1966, the international jurisprudence, the general principles of international law and customary international law, when these instruments contradict domestic legislation.)

⁹⁵ A. Cassese, ‘Remarks on Scelle’s Theory of Role-Splitting (*dédoublement fonctionnel*) in international law’ (1990) 1 EJIL 210, 212.

High Court has held, for example, that ‘the courts will try as much as possible to avoid a clash between what our laws say on the subject and what international agreements or conventions are saying on the subject.’⁹⁶ The Supreme People’s Court in China ruled on the question of whether China is required to choose an interpretation consistent with the relevant provisions of international treaty obligations of the People’s Republic of China. It concluded that if two or more reasonable interpretations and one is consistent with the relevant provisions of the international treaty, then will follow that interpretation.⁹⁷ The Australian court considered that ratification of a convention is a positive statement [that is] an adequate foundation for a legitimate expectation, absent statutory or executive indications to the contrary, that administrative decision-makers will act in conformity with the Convention.⁹⁸

60. While there is, of course, a greater degree of variability when it comes to customary international law, a significant number of other courts have also held that domestic courts should consider such norms, where clearly binding.

61. The U.S. Supreme Court referred to the customary international law principle of non-intervention when applying US antitrust laws to foreign anti-competitive conduct and gave a restrictive interpretation to its Sherman Antitrust Act.⁹⁹ In *Roper v. Simmons*, a case on juvenile capital punishment, the United States Supreme Court read the Eighth Amendment in line with customary international law referring not only to state practice and *opinio juris*, but *a fortiori* the Court’s consistent practice of referring to customary international law.¹⁰⁰

62. The Canadian Court of Appeal has also held that domestic law should be interpreted, as far as possible, consistently with conventional and customary international law.¹⁰¹ In the 1986 case of *Mills v. The Queen*, the Supreme Court of Canada referred to the Universal Declaration of Human Rights and the ICCPR as interpretive aids to reading the Canadian Charter of Rights and

Freedoms.¹⁰² Since then, Canadian courts have regularly applied international human rights instruments – as customary international law – to statutory interpretation.¹⁰³ In another Supreme Court case, the Court took into consideration Canada’s international obligations *vis-à-vis* the rights of a child and noted that while parliament, at the time, had yet to implement the Convention on the Rights of the Child, ‘the values reflected in international human rights law may help inform the contextual approach to statutory interpretation and judicial review.’¹⁰⁴ The Court further emphasised that ‘the legislature is presumed to respect the principles enshrined in international law, both customary and conventional. These constitute part of the legal context in which legislation is enacted and read. In so far as possible, therefore, interpretations which reflect these values are preferred.’¹⁰⁵

63. In *Amaratunga v. Northwest Atlantic Fisheries Organization*, a case concerning wrongful dismissal by an international organization, the issue hinged on legal interpretation.¹⁰⁶ The Supreme Court of Canada found it necessary to discuss customary international law on state immunity and whether the same exists for international organisations,¹⁰⁷ and in finding that the applicant’s claim was accepted in part, considered the ICCPR and comments of the United Nations Human Rights Committee.¹⁰⁸

64. In *Nguyen*, a case on capital punishment of a non-citizen, the Singapore Court of Appeal accepted that although it was not bound to the Vienna Convention on Consular Relations 1963 since Singapore was not a party to that Convention, a similar rule applies to Singapore pursuant to customary international law.¹⁰⁹ The Court further cited an International Court of Justice decision in clarifying the meaning of the rule contained in the Convention.¹¹⁰

¹¹⁰ *Ibid.*

65. Finally, while the Lebanese case-law pointed to by the Appeals Chamber does not by itself show the existence of a general principle of interpretation, it demonstrates that at least within Lebanon, courts have regularly taken account of customary international law.¹¹¹ For example, the Lebanese Court of cassation (Civil Chamber) allowed lower judges to refer to international customary law in commercial matters since at least 1968, when it stated that ‘these customs constitute an unwritten law which the judge is assumed to know in the same way as he knows other laws’.¹¹²

5. Use of customary international law by international criminal courts and tribunals

66. Although the case at hand deals with the application of customary international law within a domestic legal system, namely Lebanon, I find it instructive nonetheless to consider how other international criminal courts and tribunals have used customary international law in their jurisprudence.

67. Customary international law has been widely used by international or hybrid criminal courts and tribunals. The Special Court for Sierra Leone (SCSL) Rules of Procedure and Evidence expressly invoked custom as an independent source of applicable law¹¹³ and the United Nations Secretary-General’s report on the establishment of that court explained that the international crimes enumerated in its Statute ‘are crimes considered to have had the character of customary international law at the time of the alleged commission of the crime.’¹¹⁴ The court relied on custom to identify the recruitment of child soldiers as a crime.¹¹⁵ The governing instruments of the ICTY and ICTR did not contain any reference to custom as a source of law, although the Secretary-General, in establishing the ICTY, stated that the courts would reflect only ‘rules of international

¹¹⁵ *Norman* child recruitment decision, paras 30-53.

humanitarian law that are beyond any doubt part of customary law'.¹¹⁶ Various ICTY and ICTR chambers relied on customary international law to establish criminal norms or principles.¹¹⁷

68. Moreover, the ICC relied on customary international law when it found that 'customary international law creates an exception to Head of State immunity when international courts seek a Head of State's arrest for the commission of international crimes' in *Al Bashir*.¹¹⁸ More recently, the ICC found that if customary law stipulates an additional element of a crime contained in the Rome Statute, 'the Court cannot be precluded from applying it to ensure consistency of the provision with international humanitarian law'.¹¹⁹

69. The international criminal courts and tribunals have also relied on customary international law as an interpretative aid, including citing Article 31 of the Vienna Convention on the Law of Treaties 1969 as setting out customary principles of interpretation.¹²⁰ The Pre-Trial Chamber in *Katanga and Ngudjolo* relied on ICTY and ICTR jurisprudence that had looked to customary international law to interpret the terms 'widespread' and 'systematic',¹²¹ while the Appeals Chamber in *Nyiramasuhuko et al.* similarly looked to customary international law to interpret the terms 'race' and 'ethnicity'.¹²²

¹²² *Nyiramasuhuko and others* Appeal Judgment, 14 December 2015, para. 2137.

70. I agree with the Appeals Chamber's reasoning that customary international law can—if found to have crystallised on the issue at hand—be used by a chamber of the Special Tribunal to interpret provisions of the Lebanese Criminal Code.¹²³ Using customary international law in this manner would not, in my view, infringe the principle of legality—or *nullum crimen sine lege*.

71. In this context, I agree with a set of the Appeals Chamber's findings in relation to treaty law, which I consider to be equally pertinent to customary international law. Looking at the definition of terrorism in the Arab Convention on the Suppression of Terrorism—as a treaty to which Lebanon is a party—the Appeals Chamber appeared to implicitly find that the principle of legality would not be violated where a source of international law does not seek to create a *new* crime within Lebanese law, but rather expands on the definition of a crime which already *exists* within its domestic legal system. It found that it could not apply the definition of terrorism in the Convention *directly*, as an independent source of law. Although this definition could not override the provisions of the Lebanese Criminal Code, it still formed part of the Lebanese domestic system, and could therefore aid the interpretation of the definition of terrorism under Article 314 of the Lebanese Criminal Code. In so doing, the Appeals Chamber invoked the well-known principle of international law, referred to above, of interpreting national law as far as possible in a manner consistent with Lebanon's international obligations.¹²⁴ This appears to me to be consistent with contemporary human rights standards. It accommodates judges carrying out their judicial function of interpreting and developing *existing* law, not *creating* new law.

72. The Appeals Chamber noted that the Convention did not intend to substitute its own definition of terrorism for that of the states parties' domestic legal systems,¹²⁵ but allowed each state to enact its own definition of terrorism. The Appeals Chamber found that the Convention's definition could not be applied directly, and hence the definition was under the Lebanese Criminal Code. The Convention's extraneous definition could therefore be used to aid the interpretation of Article 314, as part of the overall context relevant to its interpretation.¹²⁶ The specific content of that Article and the Convention definition are discussed in section C below.

¹²³ First interlocutory decision on applicable law, para. 114 *et seq.*

¹²⁴ *Ibid.*, paras 78-82.

¹²⁵ *Ibid.*, para. 80.

¹²⁶ *Ibid.*, para. 82.

6. The Appeals Chamber's approach to the interpretation of Articles 2 and 3

73. I will now address an area of divergence between myself and the Majority, which goes to the characterization of the Appeals Chamber's analysis of Articles 2 and 3. On examination of the pronouncements in the Judgment, I believe that the Majority could be found to have mischaracterised the Appeals Chamber's approach. I consider that it is important to clarify this matter in order to avoid misapprehension about the manner in which international law is deployed as an interpretative aid by this Tribunal.

74. The interpretative issue at question stems from a reading of Articles 2 and 3 of the Statute. Article 2 of the Statute, entitled 'Applicable criminal law', provides that 'subject to the provisions of this Statute,' the provisions of the Lebanese Criminal Code shall be applicable 'including the rules regarding the material elements of a crime, criminal participation and conspiracy'.¹²⁷ Article 3 (1) (a) states that a person is responsible for crimes within the Special Tribunal's jurisdiction if the person 'Committed, participated as accomplice, organized or directed others to commit the crime' referred to in Article 2. Article 3 (1) (b) derives directly from Article 25 (3) (d) of the Rome Statute of the ICC.¹²⁸ The indicted charges fall under Article 3 (1) (a) of the Statute.

75. The Majority correctly characterises the interpretative issue arising, as follows:

The issue of statutory interpretation here is the meaning of the words 'subject to the provisions of this Statute' in Article 2 in relation to the modes of liability under which an accused person charged before the Special Tribunal may have committed an offence. The Statute, unfortunately, is unclear and provides no guidance as to its interpretation.¹²⁹

76. I believe that, at this juncture, accepting that the Statute is unclear, there is no necessity to examine the two laws with a view to discovery of which is more favourable and therefore most apt for application. It is a clear matter of interpretation according to the teleological methodology. The Appeals Chamber's characterises the interpretive challenge as an *ambiguity*. The provision is

¹²⁷ Statute, Art. 2(a).

¹²⁸ Adopted on 17 July 1998.

¹²⁹ Judgment, Applicable law, para. 5900.

at the very least *unclear*. I will set out my own interpretation of Article 3 (1) (a) in section D (1) below.

77. However I make the following preliminary statements in the matter: I categorically challenge my Learned colleagues' assertion that the Statute offers no guidance to its interpretation. I find this approach unconvincing, given that Article 2, in its body commences: The following shall be applicable to the prosecution and punishment of crimes referred to in Article 1, *subject to the provisions of this Statute*. We cannot erase these words and their significance from the Statute.

- a. In respect of Article 2 (a) of the statute, the reference to *criminal participation* is taken to refer to criminal modes of liability or forms of individual criminal responsibility.
- b. Article 3 is entitled Individual criminal responsibility and reads as follows:
 1. A person shall be *individually responsible* for crimes within the jurisdiction of the Special Tribunal if that person:
- c. It then lists a number of modes including those in sub article 3 (1) (a), the pertinent article for these purposes.

In my view this imports a connection between articles 2 and 3 and an intention by the legislature to render the modes of liability in Article 3 (1) (a) applicable to modes set out under the Lebanese Criminal Code as referred to in Article 2.

78. The Appeals Chamber and the Majority have different answers to this question. The Appeals Chamber considered there to be a conflict between the two Articles, because 'the matters covered by Article 2 are regulated by Lebanese law, whereas the concepts envisaged in Article 3 are governed by international criminal law.'¹³⁰ The wording of Article 2 makes clear that Lebanese law applies, subject to the provisions of the Statute, and that the applicable Lebanese provisions include ones defining modes of criminal liability. However, in the Appeals Chamber's view, Article 3 'incorporates some norms of international criminal law',¹³¹ specifically, 'principles of international criminal law regarding various modes of criminal liability.'¹³² The Appeals Chamber

¹³⁰ First interlocutory decision on applicable law, para. 207.

¹³¹ *Ibid.*, para. 22.

¹³² *Ibid.*, para. 206.

went on to conclude that this conflict must be resolved ‘in light of the general principles of interpretation outlined above,’¹³³ and compared Lebanese law and international criminal law with reference to the principle of *favor rei*.

79. The Majority disagreed that any reading of these two articles meant that international criminal law should be applied, because of the express wording of Article 2. In reaching this position, the Majority critically engages with the Appeals Chamber’s approach. My learned colleagues reiterate that in certain circumstances international law might remain of relevance: ‘[t]he hypothetical scenario ... of a domestic court upholding a specific treaty obligation illustrates how international law may remain relevant when interpreting domestic criminal law.’¹³⁴ However, Article 3 (1) (a) does not require ‘interpretation in light of Lebanon’s international legal obligations’.¹³⁵ And ‘nothing in the wording of Article 3 (1) (a) suggests, much less mandates, that a chamber should look to international criminal law case law to determine the meaning of any of the ordinary criminal law concepts already recognised in Lebanese law.’¹³⁶

80. It is my view that in respect of these findings, the Judgment does not state with complete clarity the underlying rationale for the Appeals Chamber’s election to apply international law. Indeed, the Majority’s phrasing could lead to a mis-apprehension concerning the Appeals Chamber’s approach to applying international law as an interpretative aid.

81. The Majority implies that the Appeals Chamber was—accepting that Lebanese law applied—seeking to interpret it with reference to international criminal law. This appears to invoke the Appeals Chamber’s conclusion that customary international law could be applied as an external aid to interpret domestic legislation. To the extent that this is the Majority’s position, it is arguably

¹³³ *Ibid.*, para. 210.

¹³⁴ Judgment, Applicable law, para. 6010.

¹³⁵ *Ibid.*, para. 5989.

¹³⁶ Judgment, Applicable law, para. 6014. In considering the circumstances in which the Appeals Chamber considered the Tribunal might depart from domestic case-law, the Majority appears to consider that the Appeals Chamber’s framework is directed only at the conflict between Article 2 and 3. *See*, for example, para. 5989 (‘According to the Appeals Chamber, the Trial Chamber need not do so where a Lebanese judicial interpretation or application of these provisions: appears unreasonable, may result in a manifest injustice, or is inconsistent with international law that is binding on Lebanon. The Trial Chamber generally agrees with this. The Trial Chamber may depart from a Lebanese judicial interpretation that was clearly untenable in law or might result in unfairness if applied. But the Trial Chamber has difficulty in understanding the relevance of the application of non-binding international law principles to the circumstances of the *Ayyash and others* case. This is because the only charges on the amended consolidated indictment are under article 3 (1) (a) of the Statute which does not require interpretation in light of Lebanon’s international legal obligations.’)

incorrect, both as a reflection of the Appeals Chamber's interpretative framework and as a characterisation of its specific application. In fact, the Appeals Chamber did not consider international criminal law on modes of liability as an external aid to interpret domestic legislation.

82. The Appeals Chamber looked at international criminal law in this instance because it considered that as a matter of simple statutory construction, international criminal law was incorporated into Article 3.

83. I pause for a moment, to deal with how I perceive the principle of Legality to operate within contemporary times, given that it originated from ancient times, when it was believed that judicial power and arbitrary decisions and judgments were oppressive and prejudicial to the rights of the populace. In those days, laws were handwritten without modern day amenities such as the computer, telephone, notepad, Internet, Facebook or twitter. In those days the daily news was presented by a town-crier. Now everywhere there is information and high technology. A humble farmer tending his crops in his field at 5 am in the morning in Jamaica may watch breaking news from Japan, Bolivia or Timbuktu. Access to information is rife. On the information highway a wealth of information is available. And so it was in the year 2005. Progressive development of the law beckons so far as accessibility and foreseeability are concerned.

84. I therefore turn to examination of the principle of legality as it exists today and in the process to examine how it has developed and how it affects judicial interpretation and law development, also bearing in mind Professor Cassese's three-pronged criteria in these matters. From a human rights perspective, reference is also made to case law emanating from the European Court of Human Rights (ECHR), involving *civil law* jurisdictions including France. This is not done to fly in the face of Lebanese Judges or to subjugate Lebanon's legal system to extraneous values, so much as to demonstrate how that Court has dealt with Legality provisions which are somewhat more similar to those under the Lebanese Constitution, in respect of other civil law countries. France is referenced as the country to which the Lebanese system is more akin, for historical reasons. In this regard I cite below the pertinent human rights instrument, and provision which figures in these cases, being Article 7 of the European Convention on Human Rights:

Article 7

(1) No one shall be held guilty of any offence on account of any act or omission which did not constitute a criminal offence under national or international law at the time when it was committed. Nor shall a heavier sentence be imposed than the one that was applicable at the time the criminal offence was committed.

(2) This article shall not prejudice the trial and punishment of any person, for any act or omission which at the time when it was committed, was criminal according to the general principles of law recognised via by civilized nations.

85. I now review the jurisprudence of the European Court of Human Rights on the principle of legality as expressed in Article 7 of the European Convention to discover what may be gleaned as to how the *nullum crimen sine lege* principle operates and how its modern version controls the scope of the material judicial functions of interpretation and development of the crime.

86. It has been held that the requirement that the crime *be prescribed by law* encompasses both legislation and case law, and imposes qualitative requirements, notably accessibility and foreseeability.¹³⁷ It also encompasses customary international law,¹³⁸ even though the law may not have been ever formally published in the state in question.¹³⁹ Regarding accessibility, the Court found that the law, including case law, must have been made public.¹⁴⁰ The customary international law (provision, rule or principle) relevant to the definition of the crime in question should also be accessible in the circumstances.¹⁴¹

87. Significantly, regarding foreseeability, the Court found that an accused must be able to know what conduct will render him criminally liable and what the applicable penalty will be from the wording of the legal provision, though if necessary assisted by legal advice and by case law interpreting the provision.¹⁴² This must be assessed from the convicted person's perspective, even after taking necessary legal advice, at the time of the charged offence.¹⁴³ That the class and level of education, or profession of the prospective offender may affect how the court views matters of

¹⁴³ *Del Río Prada v. Spain* [GC], paras 112, 117.

accessibility and *foreseeability*. On the precision or certainty of legal provisions, the Court has held that:

[...] it is a logical consequence of the principle that laws must be of general application that the wording of statutes is not always precise. One of the standard techniques of regulation by rules is to use general categorisations as opposed to exhaustive lists. The need to avoid excessive rigidity and to keep pace with changing circumstances means that many laws are inevitably couched in terms which, to a greater or lesser extent, are vague. The interpretation and application of such enactments depend on practice [...]

When the legislative technique of categorisation is used, there will often be grey areas at the fringes of the definition. This penumbra of doubt in relation to borderline facts does not in itself make a provision incompatible with Article 7 (Art. 7), provided that it proves to be sufficiently clear in the large majority of cases. The role of adjudication vested in the courts is precisely to dissipate such interpretational doubts as remain, taking into account the changes in everyday practice.¹⁴⁴

88. However, the use of overly broad notions and vague criteria in interpreting and applying a provision may render that provision incompatible with requirements of clarity and foreseeability as to its effects.¹⁴⁵ Moreover, ‘the scope of the notion of foreseeability depends to a considerable degree on the content of the particular text in issue, the field it is designed to cover and the number and status of those to whom it is addressed’.¹⁴⁶ Importantly, where the offence in question referred to principles of international law, the Court assessed foreseeability in light of the standards applicable at the material time, including customary international law.¹⁴⁷

89. Regarding judicial interpretation of legal provisions, the Court found that:

However clearly drafted a legal provision may be, in any system of law, including criminal law, there is an inevitable element of judicial interpretation. There will always be a need for elucidation of doubtful points and for adaptation to changing circumstances. Indeed, in the United Kingdom, as in the other Convention States, the progressive development of the criminal law through judicial law-making is a well-entrenched and necessary part of legal

¹⁴⁷ *Vasiliauskas v. Lithuania* [GC], paras 171-175.

tradition. Article 7 (art. 7) of the Convention cannot be read as outlawing the gradual clarification of the rules of criminal liability through judicial interpretation from case to case, provided that the resultant development *is consistent with the essence of the offence and could reasonably be foreseen*.¹⁴⁸ (Emphasis supplied)

90. Consistency with the essence of the offence concerns whether the interpretation fell within the wording of the provision as read in its context, and whether it was reasonable.¹⁴⁹ Consistency with the essence of the offence is also applicable when the domestic court is interpreting a legal provision based on international law.¹⁵⁰ The foreseeability of the judicial interpretation concerns whether it continued a perceptible line of case law development, or whether the court had taken an unforeseeable new approach.¹⁵¹ The lack of comparable precedents or previous instances of interpretation is not decisive.¹⁵² The foreseeability requirement was not met where there was an extensive interpretation to the accused's disadvantage,¹⁵³ or where the legal provision was ambiguous coupled with unforeseeable interpretation by the interpreting judge before whom the matter was heard.¹⁵⁴ This appears to mean that in the case of ambiguity in the law judges must still seek to interpret and bring clarity and meaning to the words and interpret the law in a *foreseeable manner*.

91. The court found that there was a prohibition on the retrospective application of criminal law to an accused's disadvantage.¹⁵⁵ However, it was also found that there was no breach where the acts in question were already punishable under legal provisions in force at the material time, even if not punishable as an independent offence.¹⁵⁶

92. Finally, the Court clarified that the reference to 'general principles of law recognised by civilized nations' in Article 7 (2) represented a mere contextual clarification of the ambit of the

principle of legality, so that the prohibition on retroactivity applied equally when the offence was based on general principles of law.¹⁵⁷

93. I consider this to be the appropriate legal context within which the principle of legality currently operates and operated in February of 2005.

C. The crime of terrorism

1. Introduction: the elements of the crime and my approach to its interpretation

94. I turn now to the crime of terrorism applicable in the Special Tribunal. For convenience, I set out below the text of Article 314 of the Lebanese Criminal Code which provides as follows:

Terrorist acts are all acts intended to cause a state of terror and committed by *means liable to create a public danger* such as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents.¹⁵⁸

As expressed in the Judgment, Article 6 of the Lebanese law of 11 January 1958 deals with penalties for this offence under the Lebanese law, and circumstances that will aggravate the offence, but does not contribute to defining the offence.

95. The elements of this offence under Lebanese law are discussed in paragraphs 6155-6199 of the Judgment. In summary, the following findings are made concerning those elements.

96. Regarding the *actus reus* of the crime, firstly, the term ‘such as’ in Article 314 imports that it is an illustrative rather than a closed list.¹⁵⁹ Secondly, the means listed and the term for ‘means’ in the original (Arabic) version suggest that in that Article, ‘means’ refers to a physical means, not a manner or method of carrying out or execution of an act.¹⁶⁰ Thirdly, the Trial Chamber need not attempt to determine the exact scope of the words ‘means liable to create a public danger’ because the Accused are charged using one of the specified means. Consequently, the Trial Chamber’s summary of its findings concerning the *actus reus*, for the purpose of proceedings in this Tribunal,

¹⁵⁷ *Maktouf and Damjanović v. Bosnia and Herzegovina* [GC], para. 72.

¹⁵⁸ Emphasis added.

¹⁵⁹ Judgment, Applicable law, para. 6157.

¹⁶⁰ *Ibid.*, para. 6156.

is confined to committing a terrorist act by means of an explosive device. In the precise circumstances of the means alleged in this case, to satisfy the ‘means’ test a person must perform an act using an explosive device that is liable to create a public danger.¹⁶¹

97. Fourthly, regarding the *mens rea* of this crime, it is concluded in the Judgment that:

- to fulfil this element a person must intend to cause a state of terror;¹⁶²
- that person must also have some level of knowledge of the means intended or used to commit the crime, so that where the act is alleged to have been committed by means of an explosive device, they must have known that it was to be committed by means of such a device;¹⁶³ and
- responding to a Sabra Defence submission to the contrary—proof of motive is not required.¹⁶⁴

98. For reasons that follow, I agree with each of these findings in substance. However, applying the interpretative principles that I have set out in section B above, I would not have discounted any relevant binding international law, including established principles of customary international law, in interpreting the words of Article 314. While I share my colleagues’ doubt that a customary definition of terrorism as an international crime currently exists, or indeed existed at the material time (that of alleged commission of the offence charged), I consider that the many international and domestic sources that the Appeals Chamber surveyed on this matter may appropriately be used as sources of guidance in interpreting the Lebanese provision. I also consider that the words of Article 314 themselves, interpreted purposively and in their context, admit a broader reading of the ‘means’ element and that this reading, properly, facilitates application of the provision to contemporary forms of terrorism. Consequently, I would go somewhat further than my colleagues in the Majority regarding the *potential* scope of the Article, notwithstanding that in the present case there is no need to address definitively that question because of the nature of the acts charged and proven.

¹⁶¹ *Ibid.*, para. 6199. In light of the charges in this case, the Majority at para. 6171 expressly declined to determine whether Article 314 could also cover the threat of an act, although they did opine that the language of the Article is ‘clear[ly]... to the contrary’. I address the Appeals Chamber’s approach to this question at paras 104-106, 117 below.

¹⁶² *Ibid.*, paras. 6174, 6199.

¹⁶³ *Ibid.*, paras 6186, 6199.

¹⁶⁴ *Ibid.*, paras 6187-6197.

99. Specifically, in this case, the facts that the Prosecutor alleges amounted to a terrorist act contrary to Article 314, and that the Trial Chamber has found to be proven on the evidence or treated as proven based on an agreement between the Parties, indisputably, fall squarely within the terms of Article 314. Whether viewed objectively or subjectively, there was a positive act patently intended to cause a state of terror, the explosion on 14 February 2005, and it was committed by one of the means mentioned in the Article, namely an explosive device. That device thus satisfies the requirement of use of a means liable to create a public danger by the terms of the Article itself; there is no need to look further. So the Judgment finds.¹⁶⁵ Equally, these facts satisfy the extended interpretation of ‘means’ employed by the Appeals Chamber in its first interlocutory decision on the applicable law, which I will describe below.¹⁶⁶

100. My judicial colleagues in the Majority also found, implicitly referring to the *actus reus* of the offence, that the wording of Article 314 is unambiguous and clear.¹⁶⁷ I have a number of reservations about this observation on their part. To commence, clarity or the absence of ambiguity in the terms of a provision does not avoid the necessity to interpret them. Furthermore, the exact scope of the phrase ‘means liable to create a public danger, such as’ in the Article is uncertain. The scope of the phrase could be a pertinent or a live issue in connected cases where the means employed are evidently not expressly stated in Article 314, unlike the means in this case. Additionally, even if the Trial Chamber is not strictly called upon to make this determination within the context of the Ayyash *et al.* case, it fell within the ambit of the questions addressed by the Pre-Trial Judge to the Appeals Chamber in exercise of his discretion under Rule 68 (G) and which that Chamber in turn addressed acting under Rule 176 *bis* (A) as a *preliminary issue*. Those questions were:

- (i) Taking into account the fact that Article 2 of the Statute refers exclusively to the relevant provisions of the Lebanese Criminal Code in order to define the notion of terrorist acts, should the Tribunal also take into account the relevant applicable international law?

¹⁶⁵ Judgment, Legal findings on charged crimes (Counts 2-9), paras 6331-6334; *see also* Applicable law, paras 6169, 6171, 6199.

¹⁶⁶ In subsection 2.

¹⁶⁷ Judgment, Applicable law, paras 6167-6168.

- (ii) Should the question raised in paragraph i) receive a positive response, how, and according to which principles, may the definition of the notion of terrorist acts set out in Article 2 of the Statute be reconciled with international law? In this case, what are the constituent elements, intentional and material, of this offence?
- (iii) Should the question raised in paragraph i) receive a negative response, what are the constituent elements, material and intentional, of the terrorist acts that must be taken into consideration by the Tribunal, in the light of Lebanese law and case law pertaining thereto?¹⁶⁸

101. In the following sections, I will first describe the Appeals Chamber's examination of the crime of terrorism and the view the Majority adopts regarding recourse to international law and other sources on this issue. I will then deal with the question of recourse to customary international law and, finally, my own view as to the proper interpretation of Article 314.

2. The critical features of the Appeal's Chamber's examination

102. The Appeals Chamber's examination of the crime of terrorism accounts for a significant proportion of its first interlocutory decision and refers to a plethora of material which time and circumstance do not permit me to summarise in full. I will, therefore, not attempt an overly exhaustive review in this Opinion, but instead highlight what I suggest are the most critical features of that examination for present purposes.

103. I have already set out, above,¹⁶⁹ my understanding of the Appeals Chamber's general conception of customary international law, its view on the significance of that and other sources of international law within the Lebanese domestic legal system, and its overall conclusion regarding all substantive crimes that come within the jurisdiction of this Tribunal, including terrorism. I understand that conclusion to be that Lebanese law governs the definition of those crimes in this Tribunal and international law definitions of them, if any, do not apply directly by virtue of the Statute, unlike the definitions of modes of responsibility under Article 3 of the Statute.

¹⁶⁸ Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber, questions (i) to (iii) under the heading 'With regard to the notion of terrorist acts', pp 12-13.

¹⁶⁹ Section B, 'The interpretative framework'.

104. For the Appeals Chamber, the result of the application of these conclusions to the crime of terrorism specifically (in order to answer a question from the Pre-Trial Judge concerning which definition or definitions of that crime govern in the Special Tribunal),¹⁷⁰ was a broader definition than that apparent on the face of Article 314 or in Lebanese case law interpreting it. That definition first appears in paragraph 147 of its First Interlocutory decision. It is then repeated in largely the same terms in the Disposition of that decision, paragraph 3. The significance of this definition is such that I repeat below the relevant part of the Disposition in full here, including its footnote:

[Disposition, paragraph 3:]

Article 314 of the Lebanese Criminal Code and Article 6 of the Law of 1958, interpreted in the light of international rules binding upon Lebanon, provided such interpretation does not run counter to the principle of legality, require the following elements for the crime of terrorism (see above paras 47-60, 124-30):

- a. the volitional commission of an act *or the credible threat of an act*;
- b. through means that are likely to pose a public danger; [footnote 432] and
- c. with the special intent to cause a state of terror.

[Footnote] 432. In particular, the Appeals Chamber notes that whether certain means are liable to create a public danger within the meaning of Article 314 should always be assessed on a case-by-case basis, having regard to the non-exhaustive list in Article 314 as well as to the context and the circumstances in which the conduct occurs. This way, Article 314 is more likely to be interpreted in consonance with international obligations binding upon Lebanon.¹⁷¹

105. The definition in the Disposition contains one addition, in the form of the words ‘or the credible threat of an act’ in the first identified element, not present in paragraph 147. Arguably, there are parts of the first interlocutory decision that raise some doubt that the Appeals Chamber intended the *actus reus* of the applicable definition to encompass both acts and threats and, if it did, that it viewed this as a substantial or significant departure from the purely domestic definition. It is not stated explicitly anywhere in the body of the decision until the Disposition that threats are

¹⁷⁰ See para. 100, above.

¹⁷¹ First interlocutory decision on applicable law, disposition, 3, fn. 432, emphasis added.

covered for the purpose of proceedings in the Special Tribunal.¹⁷² In addition, parts of the preceding analysis refer only to acts, not threats, and it is stated outright in paragraph 145 that there are only two ‘significant differences’ between the Lebanese Criminal Code and customary international definition, neither of which refers to the credible threat of as opposed to the commission of the relevant acts. The non-authoritative Headnote to the decision reinforces this impression, by omitting the reference to threats that appears in the Disposition and instead seeming to use the definition from paragraph 147.¹⁷³

106. Yet I am inclined to consider that the definition in the Disposition to that decision is the intended one, not only by reason of its appearance within the confines of the Disposition. It is also because there is no doubt that the Appeals Chamber considered that Article 314 must be interpreted in light of international rules binding upon Lebanon¹⁷⁴ and had earlier identified not only acts but the credible threat of them as forming part of applicable international law.¹⁷⁵ I will, accordingly, assume in the following analysis that the definition in the Disposition is the intended one. However, as will be seen, I am inclined to the view that the ‘credible threat’ element of it should not be applied in matters before this Tribunal.

107. The Appeals Chamber examined two bodies of international law on terrorism to identify the ‘relevant applicable international law’ as an ‘aid’ or ‘guidance’ in interpreting Article 314.¹⁷⁶ Those bodies were conventional, that is, treaty law, and customary international law.¹⁷⁷ Regarding the first body of law, the Chamber noted, ‘The only international treaty *ratified by Lebanon* that provides a general definition of terrorism is the Arab Convention for the Suppression of Terrorism of 22 April 1998’.¹⁷⁸ The Arab Convention’s definition of terrorism is:

¹⁷² As the Majority states in the Judgment. Judgment, Applicable law, para. 6165.

¹⁷³ First interlocutory decision on applicable law, Headnote, section IIB, last paragraph.

¹⁷⁴ *See, especially*, First interlocutory decision on applicable law, disposition, 3, chapeau (which as noted in para. 104 above states, ‘Article 314 of the Lebanese Criminal Code and Article 6 of the Law of 1958, *interpreted in the light of international rules binding upon Lebanon*, provided such interpretation does not run counter to the principle of legality, require the following elements for the crime of terrorism (see above paras 47-60, 124-30)’, emphasis added).

¹⁷⁵ First interlocutory decision on applicable law, paras 65, 85-113, 139-141, 145-147.

¹⁷⁶ *Ibid.*, para. 45. The first quoted phrase adopts the language used in one of the Pre-Trial Judge’s questions to the Appeals Chamber submitted to it under Rules 68 (G) and 176 *bis*.

¹⁷⁷ *See, e.g.*, First interlocutory decision on applicable law, paras 45-46, 61 and the sub-sections of the decision that follow.

¹⁷⁸ First interlocutory decision on applicable law, para. 63, original emphasis.

Any act or threat of violence, whatever its motives or purposes, that occurs in the advancement of an individual or collective criminal agenda and seeking to sow panic among people, causing fear by harming them, or placing their lives, liberty or security in danger, or seeking to cause damage to the environment or to public or private installations or property or to occupying or seizing them, or seeking to jeopardize a national resource.¹⁷⁹

108. The Arab Convention also defines as a ‘terrorist offence’, firstly, any offence or attempted offence in furtherance of a terrorist objective in the territory of any of the States party to the convention, or against their nationals, property or interests, that is punishable by those States’ domestic law. Secondly, specific offences stipulated in six other conventions (to all of which Lebanon is a party), or particular provisions of them, unless those specific offences have been excluded by the State party’s legislation. These conventions and provisions concern such matters as acts upon and against aircraft, hostage-taking and piracy on the high seas.¹⁸⁰

109. The Appeals Chamber further noted that the Arab Convention ‘itself clearly indicates that it does not intend to substitute its own definition of terrorism for those contained in the national law of each contracting party. [...] The purpose of the Arab Convention’s definition of terrorism is to enable prosecution, not to change domestic criminal codes.’¹⁸¹ Consequently, the Appeals Chamber found, the Special Tribunal cannot apply the Convention directly, as an independent source of law. But ‘its definition can nonetheless be used to help identify a persuasive interpretation of the Lebanese Criminal Code as part of the overall context relevant to its interpretation.’¹⁸² It was also stressed that it is an established principle of international law that, as much as possible, national law should be construed so as to make it consistent with a State’s international obligations.¹⁸³

110. Regarding customary international law on terrorism, the Appeals Chamber found that there is currently a crime of terrorism under that body of international law where the conduct in question occurs in peacetime, as opposed to during an armed conflict. In other words, there are not just

¹⁷⁹ League of Arab States, Arab convention for the suppression of terrorism, Adopted 22 April 1998 (‘Arab Convention’), Art. 1 (2).

¹⁸⁰ Arab Convention, Art. 1 (3). The application of the listed conventions, or provisions of them, is also excluded in the case of States that, unlike Lebanon, are not party to them.

¹⁸¹ First interlocutory decision on applicable law, para. 80.

¹⁸² *Ibid.*, paras 81-82.

¹⁸³ *Ibid.*, paras 75, 82.

particular types of terrorist offences defined in the issue-specific conventions previously mentioned, and crimes defined as terrorism in states' own (domestic) laws. There is also an *international* crime entailing the criminal responsibility of any individual, regardless of his or her nationality, whose existence all countries in the world accept. The Appeals Chamber further found that the elements of this international crime were:

- a. the perpetration of a criminal act, *e.g.* murder, or threatening such an act;
- b. the intent to spread fear among the population, which would generally entail creation of public danger, or directly or indirectly coerce a national or international authority to take some action, or to refrain from taking it;
- c. when the act involves a transnational element.¹⁸⁴

111. While the Appeals Chamber admitted that both scholars and legal experts doubted whether a widely accepted definition of customary law principle existed or had evolved in the world society,¹⁸⁵ it nonetheless felt that such a definition had gradually emerged. The Appeals Chamber also acknowledged that the existence of a customary rule outlawing terrorism does not necessarily mean that terrorism is a criminal offence under international law. It cited the test set out by the ICTY in *Tadić*, that for individual criminal responsibility to arise at the international level, it must be shown that violation of the international rule in question entails the individual criminal responsibility of the person breaching that rule.¹⁸⁶ The Appeals Chamber found the requisite state practice and *opinio juris* to be evidenced by a wide range of sources, including the aforementioned treaties, other treaties, resolutions of the United Nations Security Council and national legislation.¹⁸⁷ In other words, a full and extensive review was conducted. Based on the same survey of sources at both the international and national level, it concluded that 'a broader norm that would outlaw terrorist acts *during times of armed conflict* may also be emerging'¹⁸⁸ but does not yet exist—it is 'incipient (*in statu nascendi*)', only.¹⁸⁹

¹⁸⁴ *Ibid.*, para. 85; *see also* paras 111-113.

¹⁸⁵ *Ibid.*, para. 83, fn. 127.

¹⁸⁶ *Ibid.*, para. 103, citing *Tadić* Decision on the Defence motion for Interlocutory Appeal on Jurisdiction, paras 94, 128-137.

¹⁸⁷ *Ibid.*, para. 85 *et seq.*

¹⁸⁸ *Ibid.*, para. 107.

¹⁸⁹ *Ibid.*, para. 109, original emphasis.

112. The Appeals Chamber opined that there is a ‘requirement, in the legislation of a number of common law states and civil law states, as well as in some of the UN Terrorism Conventions and the draft Comprehensive Convention [on terrorism], for a political, religious, racial or ideological purpose’.¹⁹⁰ It concluded, however, that such purpose or motive does not yet form part of the customary definition of the crime.¹⁹¹

113. As to the definition of the Lebanese *domestic* crime of terrorism, the Appeals Chamber found that it was ‘clear from’ Article 314 of the Lebanese Criminal Code and Articles 6 and 7 of the 1958 Law that the crime’s elements were:

- a. an act, whether that act constituted an offence under other provisions of the Lebanese Criminal Code or not;
- b. which is intended to cause a state of terror; and
- c. the use of a means liable to create a public danger.¹⁹²

114. Relevantly, it was further noted, that Lebanese courts appear to have concluded that the provision is confined in its application to ‘those means which *as such* are likely to create a public danger, namely a danger to the general population. It would follow that the definition does not embrace any non-enumerated means referred to in Article 314 [...] unless these means are similar to those enumerated in their effect to creating a public danger *per se*.’ As the Appeals Chamber went on to observe, applying this approach, the definition of a terrorist act under Article 314 would not encompass acts committed using a gun, a semi-automatic or automatic machine gun, a revolver, or a knife and perhaps even a letter-bomb.¹⁹³

115. The Appeals Chamber relied on a number of considerations to determine the proper meaning and scope of the term ‘means liable to create a public danger’, as set out hereunder:

- a. Firstly, it noted as I have just described the highly restrictive approach adopted by Lebanese courts. It next opined this was not the only or more persuasive resolution to interpretation. Further that it believes ‘that a more congruous

¹⁹⁰ *Ibid.*, para. 98; *see also* paras 88, 94-95, 106.

¹⁹¹ *Ibid.*, paras 98, 100, 106.

¹⁹² *Ibid.*, paras 47-49.

¹⁹³ *Ibid.*, para. 52. *See further* paras 53-54, 145.

construction of the expression used by Article 314 is warranted'. It then proceeded to construe the term, with reference to the 314 provision itself. In this regard, in my view, it looked *internally*, within Lebanese law, namely, the provisions of the Lebanese Criminal Code, without reference to or applying *international* law. It also addressed the peculiar circumstances (facts and evidence) within the specific context of each case and its role and value in judicial determination of whether a particular means employed fell within or without the terms of Article 314.¹⁹⁴ The Appeals Chamber confirmed, with which I agree,¹⁹⁵ that the essential controlling element, was whether 'the means' are 'capable' or 'liable to create a public danger'. The concept of 'public danger' within the context of the discharging a means such as a firearm at a political or military leader whether in a public domain or private was also examined.¹⁹⁶ The close link between the aim of the crime (to cause a state of terror) and the result of the terrorist act (to create a public danger) was stated.

- b. Secondly, it concluded that the above wider interpretation, was better suited to address contemporary forms of terrorism, than that employed by some Lebanese courts.¹⁹⁷
- c. Thirdly,¹⁹⁸ it referred to international law, namely conventional law—the Arab Convention—and the 'customary international rule on terrorism' having regard to the fact that neither of those laws envisage a restriction on means. It found that its finding on the means element of this crime was 'warranted by the need to interpret national legislation as much as possible in such a manner as to bring it into line with binding relevant international law'.

¹⁹⁴ *Ibid.*, paras 125-129.

¹⁹⁵ As I will elaborate below, at para. 136.

¹⁹⁶ For example, the Appeals Chamber found that 'regardless of the weapon used', the definition in Article 314 could be satisfied when a terrorist shoots at a person in a public road and thereby imperils a large number of other people simply due to their presence at that location. It could also be satisfied when a prominent political or military leader is killed or wounded, even if this occurs in a closed place with no one else present. In the latter case, 'the danger may consist in other leaders belonging to that same faction or group being assassinated or in causing a violent reaction by other factions'. First interlocutory decision on applicable law, paras 125-129.

¹⁹⁷ First interlocutory decision on applicable law, para. 129.

¹⁹⁸ *Ibid.*, paras 129-130.

116. I consider that a significant result of the above treatment of ‘means liable to create a public danger’ by the Appeals Chamber, is that whether by properly construing the Lebanese provisions of the Lebanese Criminal Code (without reference to international law) or when applying the Arab Convention, or customary international law as the Appeals Chamber described it, the scope of means is broader than that determined by some Lebanese Judges and could also encompass means which are *not* specifically categorised or are not of similar species to those set out in Article 314.

117. The Appeals Chamber considered whether this broadening of one of the objective elements of the crime as applied in Lebanon was permissible in light of the principle of legality,¹⁹⁹ but concluded that it was permissible, it being foreseeable to a Lebanese national or anyone living in Lebanon.²⁰⁰ As discussed above, the Appeals Chamber also appeared, albeit implicitly, to consider it appropriate to expand the objective elements of the crime for the purposes of Special Tribunal proceedings to encompass not only the volitional commission of an act, but also the credible threat of one. Observation is made fairly and respectfully that it did not consider or discuss the legality implications of this expansion.

118. The Appeals Chamber did not adopt the requirement, which forms part of both of the Arab Convention’s definition of terrorism and the customary international definition that it had identified,²⁰¹ that the underlying conduct—in other words the act or threat of the act—should also be a crime. I understand this approach or decision to have derived from its finding that pursuant to Article 2 of the Statute, Article 314 is the principal and governing source of the definition that this Tribunal must apply. That finding is also understood to have prompted the Appeals Chamber’s decision not to import the requirements, from its suggested customary international definition, of a transnational element to the conduct of the accused and a coercive intention on his or her part (as an alternative to the intention to spread fear).

¹⁹⁹ *Ibid.*, paras 130 *et seq.*

²⁰⁰ First interlocutory decision on applicable law, para. 138; *see, further*, its detailed discussion of the issue in paras. 131-144.

²⁰¹ In para. 85 of First interlocutory decision on applicable law, as described in para. 110, above.

3. The Majority view on recourse to international law and other sources on terrorism

119. My colleagues in the Majority reject the notion that if there is a customary international crime corresponding to a crime under the Lebanese Criminal Code provisions specified in Article 2 of the Special Tribunal's Statute, the Chambers of the Tribunal should consider that international crime in interpreting the applicable Lebanese one. The Majority stated that is irrelevant to this Tribunal's function of trying the crime of terrorism specified in Article 2 of the Statute whether there was a customary international law definition of that crime in 2004 and 2005.²⁰² I have set out in section B above my general disagreement with this position.

120. However, all members of the Trial Chamber are of the view that no customary international law definition of the crime of terrorism yet exists.²⁰³ The Trial Chamber considered in this regard, but was not persuaded by, submissions from the Sabra Defence that proffered an alternative customary definition to that identified by the Appeals Chamber.²⁰⁴

121. The Majority of the Trial Chamber also appears, relevantly, to reject that it is necessary to resort to 'foreign and international practice in ... the field of counter-terrorism' to define a crime charged in this forum, at least where—as the Majority considers to be the case here—Lebanese legislation recognises that crime, is not unclear, and is not inconsistently or unreasonably interpreted by the courts of that country.²⁰⁵ The Majority further asserted that to interpret this and the other applicable substantive crimes, it relied only on the Code itself and relevant Lebanese judicial decisions, bearing in mind however that such decisions are not binding, and would in the event of any residual ambiguity after the application of ordinary principles of statutory interpretation, interpret the provision strictly in favour of the Accused without examining 'the law or practice of other States or international institutions'.²⁰⁶

122. This suggests that the Majority would have rejected those aspects of the Appeal Chamber's suggested definition that in their view do not align with the definition apparent in Article 314 itself,

²⁰² Judgment, Applicable law, paras 6016-6017.

²⁰³ *Ibid.*, paras 6192-6193. I further explain my own view in section 4 below.

²⁰⁴ As explained in the Judgment, Applicable law, paras 6196-6197. For the details of this submission, which the Sabra Defence presented as an alternative to its primary position rejecting resort to customary international law, see Judgment, Applicable law, paras 6002-6003, 6187-6190.

²⁰⁵ Judgment, Applicable law, para. 6011.

²⁰⁶ *Ibid.*, paras 6015-6019.

that is, its more expansive interpretation of the ‘means’ element and incorporation of not only acts but credible threats of them. As I have indicated,²⁰⁷ however, the Majority declined to express a final view on either matter, finding that this was unnecessary in light of the charges in this case.

4. Recourse to customary international law

123. In contrast to my colleagues, applying the general principle of interpretation I have accepted above,²⁰⁸ I consider the Trial Chamber would be bound to have interpretative recourse to a binding customary international law definition of the crime of terrorism, if one existed.

124. The Appeals Chamber’s comprehensive review of sources, in its interlocutory decision, to me demonstrates persuasively that by 14 February 2005, a customary definition of an international crime of terrorism in peacetime was in the making, or nascent. Among other notable developments, there was by then a series of widely accepted treaty definitions of terrorism and/or related offences in peacetime. These were applicable at the regional level²⁰⁹ or (as earlier mentioned) in specific contexts, such as civil aviation²¹⁰ and the financing of terrorists and terrorist organisations.²¹¹ By wide acceptance, I mean that a large proportion of States²¹² participate in many²¹³ of the treaties

²⁰⁷ In para. 96 and fn. 161 above.

²⁰⁸ In section B.

²⁰⁹ See the Appeals Chamber’s summary and list of the relevant regional treaties in First interlocutory decision on applicable law, para. 88 and fns 135, 140.

²¹⁰ Convention on Offenses and Certain Other Acts Committed on Board Aircraft, Adopted 14 September 1963 (‘Tokyo Convention’); Convention for the Suppression of Unlawful Seizure of Aircraft, Adopted 16 December 1970 (‘Hague Convention’); Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, Adopted 23 September 1971 (‘Montreal Convention’); Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation, Adopted 24 February 1988 (‘1988 Protocol to the Montreal Convention’). Three more treaties on this issue have since entered into force: the Convention on the Suppression of Unlawful Acts Relating To International Civil Aviation, adopted in Beijing on 10 September 2010 (‘Beijing Convention’) (which, pursuant to Art. 24 of that Convention, between State parties to it prevails over the Montreal Convention and 1988 Protocol); the Protocol to the Hague Convention adopted on the same date (‘2010 Protocol to the Hague Convention’); and the Protocol to the Tokyo Convention adopted on 4 April 2014 (‘2014 Protocol to the Tokyo Convention’).

²¹¹ International Convention for the Suppression of the Financing of Terrorism, Adopted 9 December 1999 (‘Financing Convention’). As the Appeals Chamber noted, other contexts are maritime, nuclear, hostage-taking, the harming of diplomatic representatives and terrorist bombings. The UN Office of Counter-Terrorism also includes plastic explosives in its list of terrorism-related issues that are the subject of universal (as opposed to regional) treaties. See UN Office of Counter-Terrorism, ‘International Legal Instruments’, <https://www.un.org/counterterrorism/international-legal-instruments>; First interlocutory decision on applicable law, para. 89 and accompanying footnotes.

²¹² Or of States entitled to participate, in the case of the regional treaties.

²¹³ At present, in late July 2020, taking just the issue-specific treaties as an example, 189 States are party to the Financing Convention; 188 to the Montreal Convention; 186 to the Tokyo Convention; 185 to the Hague Convention; 180 to the Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, Adopted 14 December 1973 (‘New York Convention’); 176 to the International

in question. While that fact cannot be assumed to signify that those States also recognise corresponding customary obligations,²¹⁴ it may constitute evidence that such obligations exist.²¹⁵ There were also resolutions of the UN General Assembly and Security Council containing a general definition of sorts, notably General Assembly resolution 49/60 of 1994²¹⁶ and its successors²¹⁷ and Security Council resolution 1566 of 2004.²¹⁸

125. Moreover, there was undoubtedly commonality or convergence in various respects between definitions of offences in those treaties, resolutions and other relevant international instruments, including a draft of a UN comprehensive convention on international terrorism;²¹⁹

Convention Against the Taking of Hostages, Adopted 17 December 1979 ('Hostage Convention') and the 1988 Protocol to the Montreal Convention; 170 to the International Convention for the Suppression of Terrorist Bombings, Adopted 15 December 1997 ('Terrorist Bombings Convention'); 166 to the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation, Adopted 10 March 1988 ('SUA Maritime Convention') and 156 to its Protocol for the Suppression of Unlawful Acts Against the Safety of Fixed Platforms Located on the Continental Shelf, Adopted 10 March 1988 ('Fixed Platforms Protocol'); 161 to the Convention on the Physical Protection of Nuclear Material, Adopted 26 October 1979; and 156 to the Convention on the Marking of Plastic Explosives for the Purpose of Detection, Adopted 1 March 1991.

²¹⁷ See the lists in First interlocutory decision on applicable law, fn. 136 and, for resolutions subsequent to the issuing of that decision, on the website of the UN Security Council Counter-Terrorism Committee, 'General Assembly Resolutions relevant to the Global Counter-Terrorism Strategy', <https://www.un.org/sc/ctc/resources/general-assembly/resolutions/>.

²¹⁸ SC Res. 1566, UN Doc. S/RES/1566, 8 October 2004 ('Security Council resolution 1566'), operative para. 3, which states that the Security Council:

Recalls that criminal acts, including against civilians, committed with the intent to cause death or serious bodily injury, or taking of hostages, with the purpose to provoke a state of terror in the general public or in a group of persons or particular persons, intimidate a population or compel a government or an international organization to do or to abstain from doing any act, which constitute offences within the scope of and as defined in the international conventions and protocols relating to terrorism, are under no circumstances justifiable by considerations of a political, philosophical, ideological, racial, ethnic, religious or other similar nature, and *calls upon* all States to prevent such acts and, if not prevented, to ensure that such acts are punished by penalties consistent with their grave nature.

²¹⁹ Proposed in 2002 by the coordinator of the drafting process. This process is ongoing. See 'Text Circulated by the Coordinator for Discussion' in *Report of the Ad Hoc Committee established by General Assembly Resolution 51/210 of 17 December 1996*, UN Doc. A/57/37 (28 January-1 February 2002) Annex IV, p. 18 ('2002 coordinator's proposal'). Although formally no text is yet agreed in the negotiations of this instrument, that proposal is still apparently 'the basis of discussions on the outstanding issues': Amrith Rohan Perera, 'The draft United Nations Comprehensive Convention on International Terrorism' in Ben Saul (ed.), *Research Handbook on International Law*

definitions in domestic penal legislation; and ones set out in domestic jurisprudence. This included a strong trend across each of these definitional sources of *not* limiting the means of carrying out the terrorist act to particular physical means.²²⁰

126. As there was no evidence of Lebanon entering constant and persistent objections to the potentially emerging definition of terrorism under customary international law—and indeed Lebanon engaged with this emerging area of law by becoming a party to relevant treaties including the Arab Convention on the Suppression of Terrorism—it cannot be said that Lebanon would be excluded from the binding nature of any rule of customary international law which may arise in this area.

127. However, full crystallization and maturity are the essential characteristics which any customary international law principle must demonstrate as possessing. After careful consideration, I am not convinced that States’ practice in the area of terrorism was sufficiently consistent, or that their acceptance that they were legally bound to follow the same practice—the *opinio juris*—was sufficiently evident, for a customary definition to have clearly crystallised by that time. For that matter, it does not appear to have crystallised by February 2011 when the Appeals Chamber issued its decision, or since the date of that pronouncement.

128. It is important in this respect to be cognizant of the fact that the relevant inquiry is not whether there are *any* customary international law rules concerning terrorism. It is, as the Appeals Chamber itself acknowledged, whether terrorism ‘is a criminal offence under international law’, entailing individual criminal responsibility.²²¹ Although complete certainty is not required as a matter of law, in my view a relatively high degree of precision and certainty is required as to all elements of the definition, in order to satisfy the principle of legality.²²² Even though many of the source definitions have much in common, my view is that the differences between them, and

and Terrorism (Elgar, 2014) (‘Terrorism Research Handbook’), pp 151-162, p. 161. *See also* UN General Assembly Sixth Committee website, list of periodic reports of the relevant *ad hoc* committee and working group at <https://legal.un.org/committees/terrorism/reports.shtml> and summary of mandate, working methods and progress to date at <https://legal.un.org/committees/terrorism/>.

²²⁰ In contrast to the way in which Lebanese courts have interpreted the definition in Article 314 of the Lebanese Criminal Code, as the Appeals Chamber remarked. First interlocutory decision on applicable law, *e.g.* para. 113. For examples attesting to the trend of non-limitation of physical means, *see* paras 138-140, and their footnotes, below.

²²¹ First interlocutory decision on applicable law, para. 103.

²²² *See, e.g.*, Kai Ambos and Anina Timmermann, ‘Terrorism and Customary International Law’ in *Terrorism Research Handbook*, pp 20-38, p. 22, drawing from the first author’s earlier work, particularly Ambos LJIL 2011. *See further* my analysis of this principle in section B above.

between them and other relevant approaches, could be regarded as too significant for that threshold to be met. This contradicts the notion that States, generally, believe they are bound by the same core definition of the crime—or, adapting the Appeals Chamber’s words, that they share the ‘intention to criminalise’ basically the same thing.²²³

129. The presence of a motive or purpose element in various definitions of the crime, in both domestic law and international instruments, is one illustration of this. The Appeals Chamber considered this to be a discrepancy or minority approach that is not fatal to the existence of a customary definition, emphasising that total uniformity of practice is unnecessary.²²⁴ While I accept this interpretation of the ‘uniformity’ requirement,²²⁵ this particular difference could reasonably have been characterised instead as confirming that there is a lack of international consensus on the definition. Simply put, where is a variety of substantively different approaches to a particular element, this calls into question whether the definition of the crime overall is sufficiently certain.

130. Other substantive differences between relevant definitions around the world, which lead me to question the existence of a customary crime, relate to the scope of the *actus reus*. For example, the criminal law of a number of countries specifies that a terrorist act may be directed at *either* individuals (or ‘the public’) *or* other, non-human targets such as property and the environment. But many other countries’ legislation confines it to the former. Further, it appears to me that under some definitions including that in Article 314 of the Lebanese Criminal Code, no person need be injured or any property damaged for the crime to have been committed. Others require proof of such concrete effects. Some domestic law definitions explicitly extend to threats of particular acts; some, like the Article 314 definition, refer only to the acts themselves.²²⁶ Then there are the crimes defined in the terrorism treaties I have termed ‘issue-specific’. As already stated, many of those crimes are limited to—for instance—particular sorts of targets (human and non-human), locations or physical means of commission.²²⁷

²²³ First interlocutory decision on applicable law, para. 103.

²²⁴ *See, especially*, First interlocutory decision on applicable law, para. 106.

²²⁵ As explained in para. 31 above.

²²⁶ *See, e.g.*, the national laws referred to in First interlocutory decision on applicable law, paras 93-96 and accompanying footnotes.

²²⁷ *See further*, raising these and other issues, Saul LJIL 2011; Saul *amicus curiae* brief 2011; Gillet and Schuster 2011; Ambos LJIL 2011; Ambos *amicus curiae* brief 2011; Kirsch and Oehmichen 2011; Saul 2013; Nidal

131. I acknowledge that the above may seem a perfunctory treatment of a complex subject on which a great deal has been written. I go no further, nonetheless, as my conclusion does not differ from the Majority's on this point. I turn instead to recording how I would have arrived at largely the same definition as the Appeals Chamber's, by a somewhat different interpretative route.

5. Proposed interpretation of Article 314

132. I start by emphasising that I do not consider it is entirely necessary to resort to international law or practice in other states to interpret the 'means' element of a terrorist act more expansively than Lebanese courts may have done. One can instead reach the result that the Appeals Chamber did through a contextual and teleological interpretation of the words of Article 314 of the Lebanese Criminal Code.

133. I acknowledge that one reading of the words 'committed by means liable to create a public danger such as explosive devices, inflammable materials, toxic or corrosive products and infectious or microbial agents' is that only a physical means that is inherently public-endangering will qualify. I am intentionally brief here, as this reading of the provision, including examples of it in Lebanese case law, is elaborated on in both the Appeals Chamber's first interlocutory decision and the Judgment itself.

134. However, part of the immediate context to those words is the intention element or *mens rea* of the provision, (acts) 'intended to cause a state of terror'. I, like the other Trial Chamber Judges, accept that that element and the public-endangering result element of this crime are closely linked,²²⁸ consistent with the Appeals Chamber's statement.²²⁹ The textual context also includes Article 314's location in Chapter I of Book II of the Code, that is, the chapter on 'Offences against State security', and Article 271 which provides that 'An attack *on State security* is made whether the act constituting the offence is complete, abortive or attempted'.²³⁰ This wording and the

Nabil Jurdi, 'The Crime of Terrorism in Lebanese and International Law' in Amal Alamuddin and others (eds), *The Special Tribunal for Lebanon: Law and Practice* (Oxford University Press, 2014), pp 73-87; and, in the Terrorism Research Handbook, the chapters by Marcello Di Filippo; Kai Ambos and Anina Timmermann; Amrith Rohan Perera; Michael Wood; Roberta Arnold (*cf.* her treatment of the customary status of terrorism as a war crime); and Guénaél Mettraux. One counter-example known to me is *R v Gul* [2012] EWCA Crim 280 (UK), paras 32-36, where a domestic court endorsed the Appeals Chamber's conclusion as to the customary definition of the crime, albeit by agreement of the parties to the case.

²²⁸ Judgment, Applicable law, para. 6176.

²²⁹ First interlocutory decision on applicable law, para. 128.

²³⁰ Emphasis added.

position of Article 271 within Chapter I indicate that that Article applies to all offences in that chapter, including the crime of a terrorist act under Article 314.

135. In my view, the object and purpose of the Code overall may reasonably be presumed to be proscribing and punishing conduct that harms individuals or society in a range of ways, both physical and non-physical. I have considered equally that this particular chapter of it therefore focuses on harm *to State security* specifically. Other appropriate descriptions or synonyms for the harm that this chapter targets, I suggest, are *destabilising* the government, country and/or people in it generally—*i.e.* the public, and *rendering less safe* that political institution or entity, that place, and/or those people. ‘Caus[ing] a state of terror’, obviously, has both of those connotations. These connotations are noted in the Judgment.²³¹

136. The ordinary meaning of the words ‘committed by means liable to create a public danger’, taken on their own—without reference to the subsequent words ‘such as’ and the list that follows—appears to me to be, committed by a means that is capable or likely to create a public danger. When one considers, further, the aforementioned context to the words in question and the object and purpose of the Code and relevant chapter in it, I believe that it confirms that this is the better interpretation of the Article. That is, as the Appeals Chamber found, the essential controlling element for deciding whether a means falls under the Article is capacity or liability to create a public danger.²³² Once this interpretation is adopted, committing an act using a means that does not inherently have, for example, widespread or indiscriminate effects, like a gun or a vehicle, would in some circumstances fulfil this element of the crime.

137. Three additional matters that I adverted to earlier, and to which the Appeals Chamber also referred, cement my view that this is the most appropriate interpretation of the ‘means’ element of the crime defined in Article 314. First is that this interpretation better equips the provision to address contemporary forms of terrorism. Acknowledgement is made by me that the *modus* or *modi* of those who wish to sow terror continually evolve, sometimes responding to authorities and governance becoming vigilant to particular methods and means, which has rendered it more difficult to use them. Bringing explosives and edged weapons onto an aircraft are examples of the latter, whereas stabbing or driving a van into members of the public in a crowded public place has

²³¹ Judgment, Legal findings on charged crimes (Counts 2-9), paras 6335-6341.

²³² See para. 115 (a) above.

become more common. I see the extension of the ‘means’ element to such new *modus* or *modi* as an application of the progressive, ‘living instrument’ approach to interpretation that I have described—and embraced—above.²³³

138. Second, this interpretation is consistent with a number of international instruments on terrorism that pre-date the attack on which this case centres and are legally binding upon Lebanon. They include the Arab Convention, whose definition of terrorism generally²³⁴ does not prescribe any particular physical means. Instead ‘[a]ny act or threat’ may qualify as terrorism under that Convention provided that it is violent, occurs in advancement of a criminal agenda, and is done with one of the specified intentions.²³⁵

139. The relevant binding international instruments also include Security Council resolution 1566 of 2004. The definition appearing in the resolution itself is not expressed to be restricted to particular physical means. Instead it suggests that any criminal act, or the taking of hostages, using any such means will qualify if done with the specified intent and one of the specified purposes.²³⁶ It is also explicitly confined in scope to acts that also constitute crimes defined in terrorism treaties,²³⁷ but many of the treaty definitions are, likewise, not restricted in terms of physical means of commission.²³⁸ Lebanon as a UN member State is directly bound by resolution 1566, it being a decision of the Security Council.²³⁹ Moreover, many of the relevant treaties were also legally binding upon Lebanon as a State party to them at the time of the events in question.²⁴⁰

²³³ See especially para. 24.

²³⁴ As opposed to its ‘terrorist offence’ definition, which is tied to, *inter alia*, domestic criminal legislative definitions and thus to the definition in Article 314. See para. 108 above.

²³⁵ Arab Convention, Art. 1 (2), extracted in para. 107 above, emphasis added.

²³⁶ Security Council resolution 1566, operative para. 3, extracted in fn. 218 above.

²³⁷ *Ibid.*, The Appeals Chamber mentioned this feature, in its First interlocutory decision on applicable law, fn. 137.

²³⁸ E.g. the Financing Convention (Art. 2 (1) (b)), Tokyo Convention (Art. 1), Hague Convention (Art. 1), Montreal Convention (Art. 1—some offences there defined must be committed by particular physical means, but not all), New York Convention (Art. 2), Hostage Convention (Art. 1), SUA Maritime Convention and Fixed Platforms Protocol to the SUA Maritime Convention (arts 3 and 2 respectively, each of which restricts the physical means of commission for some but not all offences it defines). One treaty definition that obviously does limit the physical means is that in the Terrorist Bombing Convention, Art. 2.

²³⁹ UN Charter, Art. 25.

²⁴⁰ E.g. the Tokyo Convention, Hague Convention, Montreal Convention, New York Convention, Hostage Convention, SUA Maritime Convention and Fixed Platforms Protocol to the SUA Maritime Convention. Lebanon has since become a party to additional relevant treaties, including the Terrorism Financing Convention.

140. Thirdly, my proposed interpretation of the ‘means’ element of the offence under Article 314 is consistent with a large body of terrorism law and practice that was not binding on Lebanon,²⁴¹ such as definitions in the laws of countries in many different parts of the world,²⁴² and the principal one under consideration for the UN comprehensive convention on terrorism. The latter definition expressly does not limit the physical means of commission, through inclusion of the phrase ‘by any means’.²⁴³

141. I do not share my Trial Chamber colleagues’ seeming view that there must first be lack of clarity, inconsistency or unreasonableness in Lebanese judicial approaches before Judges of the Special Tribunal can look to such sources in interpreting Article 314. As I have shown, what they term ‘foreign and international practice in ... the field of counter-terrorism’²⁴⁴ includes a series of instruments that Lebanon has ratified or are legally binding upon it for other reasons. These instruments therefore form part of the Lebanese domestic legal system, notwithstanding that, as the Appeals Chamber explained, they may not be self-executing or operate in a way that overrides the Lebanese Criminal Code.

142. Further, I consider that even where is no legal obligation to apply a particular principle (even indirectly in the sense referred to above), there is nothing intrinsically wrong in examining and, in some circumstances, adopting approaches found in the international and foreign domestic sphere, when searching for guidance as to interpretation of Article 314. Provided that this occurs within the bounds of the principle of legality, such consideration of external sources may furnish real assistance to the judge or court seeking to interpret a provision applicable in a particular jurisdiction. This may be so where, for example, factual circumstances arise that have not previously been considered in that jurisdiction.

²⁴¹ Cf. the view expressed in First interlocutory decision on applicable law—that there is now a customary and thus universally legally binding definition of the crime—which relied on this law and practice among other sources. As set out above, I am doubtful that this is yet the case.

²⁴² As described by the Appeals Chamber in First interlocutory decision on applicable law, fns 157-161, 167, 169, 182, 185-186, 188 and para. 94, they include Jordan, Iraq, the United Arab Emirates, Egypt, Tunisia, France, the United Kingdom, the United States, the Philippines, Uzbekistan and Saudi Arabia.

²⁴³ 2002 coordinator’s proposal.

²⁴⁴ Judgment, Applicable law, para. 6011.

143. In this instance, consideration of both binding and non-binding legal sources beyond the Lebanese Code and case law has not only reinforced a view of the scope of the Code provision that, as I have explained, I consider arises from the terms of the provision itself, interpreted contextually and teleologically. It also has some significance from the perspective of legality. The fact that acts by means other than those listed in Article 314 or of their genre were widely criminalised in other parts of the world, by 14 February 2005, substantially strengthens the conclusion that a prospective offender in Lebanon at that time must have been on notice that this, too, may constitute terrorism. In my view, the requirements of foreseeability of criminalisation of the conduct and accessibility are satisfied, as the Appeals Chamber rightly found.

144. Respectfully, I consider it my duty to observe that the expansion of the concept of a terrorist act in the Special Tribunal to include credible threats of such acts appears to be substantively different in both respects. This interpretation is not as clearly available from the terms of the Code itself and, taking this factor into account, I have some doubt whether it could be considered to have been sufficiently accessible and foreseeable to a prospective offender at the material time. I am unaware of any Lebanese court judgment or decision applying Article 314 to convict an accused person for making a credible threat that they would commit a terrorist act, rather than committing one (either in an attempted or abortive fashion, or fully realising the act as in the present case).²⁴⁵ On the other hand, on the charges and facts in this case, there was no need for the Parties to draw such case law to the attention of the Trial Chamber nor for us to seek it out. I therefore do not wish to express a final view on the matter. Suffice it to say that I am inclined, from the information presently available to me, to think that this is an instance in which amendment by the Parliament would have been necessary to expand the *actus reus* of the crime, before this Tribunal should accept it to be so expanded.

D. Accomplice liability and Article 222

145. Before proceeding to discussion of Accomplice liability under Article 219 (4) and (5) of the Lebanese Criminal Code and the relative interaction and scope of Article 222 (and its companion, Article 221) having regard to the former Articles, relevant contextual background is in order. The record in this matter discloses that the Accused, Messrs. Oneissi, Sabra and Merhi,

²⁴⁵ Pursuant to Article 271, as set out in para. 134 above, each of these scenarios will suffice for the crime to have been committed.

are charged pursuant to Counts 6-9 of the Amended Consolidated Indictment with being an Accomplice to the felonies of Committing a Terrorist Act by means of an explosive device; Intentional Homicide of Rafik Hariri, with premeditation, by using explosive materials; Intentional Homicide of 21 others with premeditation by using explosive materials and of Attempted Intentional Homicide of 226 other persons, with premeditation by using explosive materials.²⁴⁶ The charges are grounded pursuant to Articles 2 and 3 of the STL Statute and consequently, under the Lebanese Criminal Code, per Article 219 (4) & (5). The provisions of these Articles are set out below. They concern the applicable modes of liability or individual criminal responsibility in respect of crimes (attacks) falling under the jurisdiction of the Tribunal when exercising its primary jurisdiction derived under Article 1.

146. Article 2 of the Statute relevantly makes ‘[t]he provisions of the Lebanese Criminal Code relating to the prosecution and punishment of acts of terrorism, crimes and offences against life and personal integrity, [...] including the rules regarding [...] criminal participation’²⁴⁷ applicable in the Special Tribunal, ‘subject to the provisions of this Statute’.²⁴⁸ Article 3 (1) (a) relevantly provides that ‘[a] person shall be individually responsible for crimes within the jurisdiction of the Special Tribunal if that person: (a) [...] participated as accomplice [...] to commit the crime set forth in Article 2’.

147. Articles 219, 221 and 222 of the Lebanese Criminal Code are as follows.

Article 219

The following shall be deemed to be accomplices to a felony or misdemeanour:

1. Anyone who issues instructions for its commission, even if such instructions did not facilitate the act;
2. Anyone who hardens the perpetrator’s resolve by any means;
3. Anyone who, for material or moral gain, accepts the perpetrator’s proposal to commit the offence;

²⁴⁶ Amended consolidated indictment, Preamble.

²⁴⁷ Statute, Art. 2 (a).

²⁴⁸ Statute, Art. 2, chapeau.

4. Anyone who aids and abets the perpetrator in acts that are preparatory to the offence;
5. Anyone who, having so agreed with the perpetrator or an accomplice before commission of the offence, helped to eliminate the traces, to conceal or dispose of items resulting therefrom, or to shield one or more of the participants from justice;
6. Anyone who, having knowledge of the criminal conduct of offenders responsible for highway robbery or acts of violence against state security, public safety, persons or property, provides them with food, shelter, a refuge or a meeting place.

Article 221

Anyone who, other than in the case provided for in Article 219, paragraph 5, knowingly conceals or disposes of items belonging to a third party that were appropriated, embezzled or obtained by a felony or misdemeanour shall be punishable by a term of imprisonment of three months to two years and by a fine of between 20,000 and 400,000 Lebanese pounds.

However, if the items concealed or disposed of are the product of a misdemeanour, the penalty may not exceed two thirds of the heaviest penalty for the misdemeanour.

Article 222

Anyone who, other than in the cases provided for in Article 219, paragraphs 5 and 6, conceals a person who he knows has committed a felony or who helps such a person to evade justice shall be punishable by a term of imprisonment of three months to two years.

Ascendants or descendants concealing perpetrators, their husbands or wives, including divorcees, and their brothers, sisters and relatives by marriage of the same degree, shall be exempt from any penalty.

148. In its first interlocutory decision on applicable law the Special Tribunal's Appeals Chamber opined, *inter alia* that Article 2 of the Tribunal's Statute requires the Tribunal to apply Lebanese

law regarding ‘criminal participation’ (as a mode of responsibility);²⁴⁹ that Article 3 specifies modes of individual criminal responsibility utilised in international criminal law, including *complicity*;²⁵⁰ and importantly, for these purposes, that Special Tribunal judges could elect, as appropriate, whether to apply either Lebanese law or international law (as contained in Article 3 of the Statute). It proffered a formula whereby Judges who are faced with determination of which of these laws to apply, should:

- a. Evaluate on a case-by-case basis whether there is any conflict between the two laws.
- b. In the event that there is an absence of conflict, apply Lebanese law.
- c. In the event that conflict exists, then apply the body of law more favourable to the accused to the particular mode of liability.²⁵¹

149. The Appeals Chamber noted marked overlapping between the Lebanese notion of the mode of liability and that under international criminal law. Ultimately, however, it concluded that generally speaking the Lebanese concept of complicity is *more protective of the rights of the accused*, including the principle of legality (*nullum crimen sine lege*). This mandated its application in the Special Tribunal.

150. All Trial Chamber Judges agree that the provisions of the Lebanese Criminal Code govern the forms of individual criminal responsibility charged in this case, including participation as an accomplice. Further, all agree that it was not legally necessary to compare Lebanese and international criminal law to reach this result. However, my reasons for these conclusions differ from those of Majority.

151. In my respectful opinion, had the Appeals Chamber and, in turn, my colleagues, applied the principles of statutory interpretation in the manner and order I have described, there would have been no necessity to resort to consideration of which of the two notions, the Lebanese or the international, was more favourable to an accused. The principle mandating such consideration, if rightly employable, is a last, remote stage of judicial determination. The same result to which both

²⁴⁹ First interlocutory decision on applicable law, para. 205.

²⁵⁰ *See, especially*, First interlocutory decision on applicable law, paras 206-207.

²⁵¹ First interlocutory decision on applicable law, paras 210-211, disposition, 13.

the Appeals Chamber and the Majority came, namely that the Lebanese definition controls, may be reached through purposive interpretation.

152. It is also my view that Article 3 (1) (a) incorporates modes of individual criminal responsibility which are general criminal law principles found in the Lebanese criminal order, domestic jurisdictions and in international criminal law, as such. On this basis, reference may be had to commensurate international and domestic law being applied to the provisions of the Lebanese Criminal Code regarding modes of liability.

153. I explain my position on these fundamental, threshold issues of interpretation of the Statute, and in particular Article 3 (1) (a), in section 1 below.

154. Moreover, as is noted in the Judgment,²⁵² the Appeals Chamber did not enter into an in-depth examination of accessorial liability under Lebanese law. Like my colleagues, I consider that further analysis of this subject is useful and necessary for this and other reasons stated in the Judgment.

155. The Judgment analyses Article 219, relevant Lebanese case law, the Appeals Chamber's approach to that Article, and the Parties' submissions on the foregoing in great detail. I take the opportunity to share that in order to assist in the process of analysis, the Trial Chamber made diligent searches for Lebanese decisions and judgments on Article 219 complicity beyond those to which the Appeals Chamber referred or as brought to our attention by the Parties. I am mindful of the great care and effort that was taken by the Trial Chamber not only to discover, but also to painstakingly examine relevant Lebanese case law (and learning), in order to be properly informed and advised, as also to more ably execute judicial function and duties. This proved to be a very large task, given the depth and breadth of Lebanese judicial pronouncement generally and in relation to the issues, which specifically concern the Trial Chamber, and which have confronted us on an ongoing basis. I record my own deep appreciation of the store of jurisprudence produced by the Lebanese judges, at every level of proceedings, judicial opinion and pronouncements on numerous areas of law. These have greatly aided my own understanding, as also the shaping and settling of my ultimate opinions.

²⁵² Judgment, Applicable law, para. 5868.

156. The Trial Chamber's searches and, ultimately, much of the discussion of Article 219 in the Judgment focused on cases concerning Article 219 (4) and 219 (5). The Judgment acknowledges accordingly, the stated reason being that only those two paragraphs of the Article were charged.²⁵³

157. All Trial Chamber Judges agree that in the circumstances it was appropriate and practically sound to concentrate on those two paragraphs of Article 219, as distinct from paragraphs (1)-(3) or (6), however I have considered an additional reason to that identified by my colleagues. In this regard, I am further of the view that the admitted evidence concerning the three alleged accomplices, Mr Merhi, Mr Oneissi and Mr Sabra, does not suggest that any other paragraph of Article 219 applies to the conduct of those three Accused. By comparison, when we examine the case of the Accused, Mr Ayyash, then some acts that he has been found by the Trial Chamber to have carried out, might arguably have fallen under Article 219 (1), concerning complicity by issuing instructions, had they not been found to have reached the threshold of co-perpetration of the crimes charged. However, in light of the determination that he is guilty as charged on all counts, no expression of final opinion is made by me on this matter. I take the opportunity to make brief observations below on the significance of the uncharged paragraphs of Article 219, to the overall scope of the Lebanese concept of complicity.

158. In its first interlocutory decision on applicable law, no discussion was engaged in by the Appeals Chamber concerning the application of Articles 221 and 222 as alternative means of charge and ultimately resulting in a possible conviction under Lebanese law.

159. In the Judgment only brief reference is made to the Lebanese lesser form of criminal participation provided for in Article 222, underlining that no charges have been brought under Article 222 so as to permit trial or conviction for the alternative lesser.²⁵⁴ Though further mention is made in a footnote, to the effect that acts a person performs after a crime is committed to which Article 219 does not apply 'may still constitute one of the less serious forms of criminal liability set out in Articles 221 and 222', and that Lebanese case law acknowledges this.²⁵⁵

²⁵³ *Ibid.*, paras 6021, 6042.

²⁵⁴ *Ibid.*, para. 5888.

²⁵⁵ Judgment, fn. 11134.

160. Yet, on its face, the first paragraph²⁵⁶ of Article 222, set out above, has an obvious relevance to the present case. This, given the fact that the Prosecutor's case against Messrs. Merhi, Oneissi and Sabra rests in part on acts they are alleged to have committed after the principal crimes, whose aim, it is argued, was to help the perpetrators and themselves elude detection by the authorities.

161. I share the underlying rationale for not applying this Article to the specific circumstances of this Ayyash case and in light of the totality of the evidence before the Court. I consider that based on how the Prosecutor and the Defence have marshalled their cases, the Defence for the Accused persons have at no time proceeded on the basis or expectation that a conviction could result under Article 222, in face of charge under Article 219 (5). It would therefore strike at the fairness and integrity of the proceedings for the Trial Chamber to proceed to enter any finding under Article 222.

162. I remain of the view, however, that this issue merits elevation to the text of the Judgment rather than to be placed in a footnote beneath the text. I consider that given the importance of this issue to Prosecutors, the Defence and, certainly, STL Judges, a greater level of discussion is required, certainly at first instance if not at the Appellate level. It will also be pertinent at the charging and pre-trial stage of proceedings.

163. I also consider it pertinent, for its potential importance to future proceedings, to catalogue some specific aspects of the Lebanese concept of complicity, on which my interpretation differs from the Majority's. I will do so in section 2 below. As I will explain, I am inclined to classify the offences defined in Articles 221 and Article 222 as forms of complicity. I will then discuss in section 3 the question of whether a Trial Chamber of this Tribunal may reclassify the facts proven in a case as a lesser offence in the nature of Article 222—finding that in some circumstances, it could properly do so.

164. For avoidance of doubt, I emphasise at the outset that adopting the interpretation of Article 3 (1) (a) of the Statute, and Articles 219, 221 and 222 of the Lebanese Criminal Code, that I propose below would not have resulted in the conviction of any of the three Accused alleged to be accomplices in this case.

²⁵⁶ The remaining paragraph solely concerns relatives of perpetrators, so can be ignored.

1. Interpretation of Article 3 (1) (a) of the Statute

(a) My approach: contextual and teleological interpretation

165. To explain my view of Article 3 (1) (a), applying the interpretative principles stated elsewhere,²⁵⁷ I begin with the ordinary meaning of the terms of Article 3 (1) (a) in their context and in the light of the Statute's object and purpose.

166. Considered in themselves, that is, in the absence of a contextual and teleological reading, the terms of the chapeau paragraph, 3 (1), and the sub-paragraph, (a), are of limited assistance. Together they show only that participation as an accomplice is one of the bases for individual criminal responsibility for crimes within the Special Tribunal's jurisdiction. Since the same word, 'accomplice', is used in Lebanon, in other domestic jurisdictions and in international criminal law, it is not possible to determine from Article 3 (1) (a) alone how a Chamber of the Tribunal should define the concept.

167. However, other provisions of the Statute provide relevant guidance. Crucially, Article 2 (a) explicitly imposes the obligation to apply the provisions of the Lebanese Criminal Code on criminal participation in this Tribunal, subject to other provisions of the Statute. Article 3 (2) and (3) implicitly, by the terminology used and the non-existence of equivalent Lebanese concepts, impose the obligation to apply some modes of such participation developed and defined in the international criminal law sphere.²⁵⁸ Moreover, a number of other provisions of the Statute clearly demonstrate an intention for the Special Tribunal to apply principles of international law on various matters, as well as, on a few matters, general principles of law and other specified concepts or sources other than Lebanese law.²⁵⁹

168. Thus, in my view, the terms of the Statute itself leave open the possibility that participation as accomplice under Article 3 (1) (a) may be interpreted to mean a mode of liability other than the purely Lebanese concept of complicity. Also relevant in this respect are the origins of the Special

²⁵⁷ Section B, 'The interpretative framework', above.

²⁵⁸ See Judgment, Applicable law chapter, paras 5909-5912.

²⁵⁹ See, e.g., Arts 15, 16 (which I further discuss in subsection iii below), 29, 21 (4), 24, 28 (2), 30.

Tribunal, in a request to create a tribunal of an *international* character, and the references to this in both the Security Council resolution adopting the Statute²⁶⁰ and the Statute's Preamble.

169. As mentioned in the Judgment,²⁶¹ the Secretary-General of the United Nations referred to Article 3 (1) (a) in paragraph 26 of his November 2006 report to the Security Council on the establishment of the Special Tribunal. From my searches, it seems that the Secretary-General's November 2006 report is one of only a few public documents setting out the drafting history of the Statute,²⁶² and is the most specific and comprehensive of them. It is therefore the closest equivalent to the official record or records of a treaty's drafting known as preparatory work, or *travaux préparatoires*. Paragraph 26 of the report focuses on individual criminal responsibility.

170. With its title, and the relevant statement highlighted in bold, paragraph 26 reads:

D. Individual criminal responsibility

26. Under article 3, paragraph 1, of the statute, all those who committed, participated as accomplice, organized or directed others to commit the crime, or otherwise contributed to the commission of the crime, shall be individually responsible. **This is a reflection of the Lebanese Criminal Code and general criminal law principles, evidenced, inter alia, by Article 2, paragraph 3, of the International Convention for the Suppression of Terrorist Bombings of 1997 (General Assembly resolution 52/164, annex).** Article 3, paragraph 2, reflects the principle of command responsibility both under international law and national criminal and military codes as more fully articulated in Article 28, subparagraph (b), of the Statute of the International Criminal Court. Under Article 3, paragraph 3, obedience to superior order is no defence, but may be considered in mitigation of punishment.

171. From the words the Secretary-General used and the international convention he referred to, I am compelled to the view that the most likely intended meaning of the phrase 'general criminal law principles' in that paragraph was general principles of criminal law accepted by all States,

²⁶⁰ Security Council Resolution 1757, preambular para. 4, and its Annex, Agreement on the establishment of the Special Tribunal for Lebanon, preambular para. 2.

²⁶¹ Judgment, Applicable law, fn. 10829; *see also* fn. 10828.

²⁶² Another is the account of Nicolas Michel, who led the UN Secretariat team and Organizations' delegation in the negotiations to create the Special Tribunal, in a book on the Tribunal's law and practice. Nicolas Michel, 'The Creation of the Special Tribunal in its Context' in Amal Alamuddin and others (eds), *The Special Tribunal for Lebanon: Law and Practice* (Oxford University Press, 2014), pp 10-31.

common to Lebanese, domestic and the international spheres, not principles of *international criminal law per se*.²⁶³

172. Specifically, he appears to have stated that the modes *commission; participation as accomplice; organization; direction of others; and intentional contribution in any other way to commission by a group acting with a common purpose with the aim of furthering the general criminal activity or purpose of the group or knowledge of the intention of the group to commit the crime* are a reflection of the Lebanese Criminal Code and principles that are found everywhere—in all criminal legal systems including Lebanon’s—of which one demonstration is their appearance in the Terrorist Bombings Convention. I consider that his Report therefore does not support the direct application of the *international criminal law* notion of complicity.

173. On initial reading, the Secretary-General’s explanation might seem to require the Tribunal first to identify, and then to apply, *primarily* a *general criminal law* definition of complicity rather than the Lebanese definition. However, based on the method of interpretation employed by me and the intention clearly evinced by Article 2 of the Statute, my view is that a definition from the Lebanese Criminal Code should take precedence over such a general definition. I mean by taking precedence that its application is mandatory, as the primary definitional source.

174. This is not to say, however, that the Tribunal cannot consider external sources at all in determining the applicable definition of complicity. On the contrary, in principle the applicable modes of liability under the provisions of the Code should be interpreted in light of legal interpretations of the general criminal law modes set out in Article 3, as well as international criminal law definitions where there is a corresponding mode or element or they are otherwise relevant. This appears to me both necessary to give effect to the drafters’ intent, and consistent with the authority that general principles of law hold as a source of international law under Article 38 (1) (c) of the Statute of the International Court of Justice. Provided that interpretation did not create a new unforeseeable element or unforeseeable interpretation, I do not consider that unfairness or inefficiency in the administration of justice would result from this approach.

²⁶³ In this respect, I am aligned with the Majority. Judgment, Applicable law chapter, fn. 10828. *See further*, on the genesis of the words in Article 3 (1) (a), paras 5902, 5908, 6126, 6145.

175. I consider it relevant here that scholars have acknowledged that general principles of law and customary international law principles are very often indistinguishable. In my view this strengthens rather than undermines the application of modes from both, to interpret or develop the Lebanese modes.

176. As it transpired in this case, however, no reference to complicity at general criminal law was made nor, in my view, required to determine the elements. Nor did the employment of any specific concept from international criminal law appear to be warranted.²⁶⁴

(b) Resort to *favor rei*

177. For these reasons I am strongly of the opinion that to make a determination that Lebanese law controls in defining participation as an accomplice in Special Tribunal crimes, it was not legally necessary for the Appeals Chamber in a comparison of international and Lebanese law to discover and resolve which was/is more favourable to an Accused.

178. Some historical background to their determination of the issue is in order. The examination unfolded within the context of the Pre-Trial Judge's question (xiii), pursuant to which the Appeals Chamber dealt with harmonising Articles 2 and 3 of the Statute in respect of the applicable modes of liability within the Special Tribunal's jurisdiction.²⁶⁵ The importance and desirability of resolving, with certainty, the issue of which definitions of modes of liability apply in this Tribunal's proceedings is self-evident.

179. The Appeals Chamber held or opined that a methodology consistent with the provisions of Article 31 of the Vienna Convention on the Law of Treaties should be employed²⁶⁶ on the basis that its rules on interpretation translate into the international realm as general principles of judicial interpretation that form the base of any 'serious attempt' to apply legal norms consistently. It demanded a teleological approach according to the principle of effectiveness, which was stated as requiring an interpretation that allows the Tribunal to 'achieve its goal to administer justice in a

²⁶⁴ The Trial Chamber considered some submissions of the Sabra Defence, on concepts referred to in international criminal case law, including 'specific direction', as set out in the Judgment. *See* Applicable law, paras 6129-6138. Although I accept that the Trial Chamber may properly consider international criminal law in interpreting applicable Lebanese modes of liability, I share the Majority's conclusion that these submissions ultimately did not advance our determination of the elements of complicity to be applied in the Special Tribunal.

²⁶⁵ Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber, p. 15.

²⁶⁶ First interlocutory decision on applicable law, paras 19-26.

fair and efficient manner”. However, where that yardstick does not prove helpful, there was an obligation to employ the interpretation which is more favourable to the rights of the Accused.²⁶⁷ It was clear in its view that the authors of the Statute intended some international criminal law modes of liability to be employed.²⁶⁸

180. Further it opined that the principle of *nullum crimen sine lege* applied (including its retroactivity requirement) and was equally applicable to modes of liability. The Appeals Chamber also expressed that both *favor rei* and *nullum crimen sine lege* principles are general principles of law applicable in both the domestic and the international context with which I concur.

181. In the Appeals Chamber’s treatment of the interplay between Articles 2 and 3 and how to resolve the interpretative challenge I respectfully observe the following. As mentioned in the Introduction to this section, a three- step approach was recommended or dictated, by the Appeals Chamber involving the following processes:

- a. Evaluate on a case by case basis whether there is any conflict between the application of Lebanese law and international criminal law embodied in Article 3.
- b. If there is no conflict apply Lebanese law.
- c. If there is conflict, employ the law most favourable to the Accused.

182. In the comparative process the Appeals Chamber appeared to invoke international criminal law, rather than general criminal law principles according to the intent of the authors of the Special Tribunal’s Statute as evident from the UN Secretary-General’s report, above referred to. Examination of the two sets of laws was made in order to determine which was more favourable to the Accused. Again, respectfully, it appeared to employ *favor rei* as means of resolution of *conflict*, between Lebanese law and *international criminal law* before resort to any other means of interpretation against its own opinion or dictates, elsewhere in the decision that *favor rei* should only be employed in the case of ambiguity, when all other interpretative means have failed.²⁶⁹

²⁶⁷ First interlocutory decision on applicable law, para. 32.

²⁶⁸ *Ibid.*, paras 22, 206.

²⁶⁹ *See, especially*, First interlocutory decision on applicable law, paras 30-32.

183. I concur in the latter opinion: that this principle is only operable after other prior means of interpretation have failed. This is reflected in Rules 3 (A) and (B) of the Rules of Procedure and Evidence of the Special Tribunal, in particular the wording of (B), ‘Any ambiguity that has not been resolved in the manner provided for in paragraph (A) shall be resolved by the adoption of such interpretation as is considered to be the most favourable to any relevant suspect or accused in the circumstances then under consideration.’²⁷⁰

184. I would also add that, applying the definition of this principle that I have set out above,²⁷¹ it is confined to instances of real ambiguity only and does not incorporate other interpretative challenges, such as vagueness, lack of clarity, uncertainty, gaps or even inconsistency. There must be an interpretative condition where the only prospective interpretative resolution is dual in nature: in one instance resulting in an interpretation adverse to him and in the other that favours him. In these circumstances the judicial interpreter is required to interpret the law in the manner which *favours* him.

185. This imports, in my view, that premature resort was had to examination of the two laws and effective employment of the *favor rei* method. In particular whereas the Appeals Chamber proposed an interpretative formula for reconciling *conflict* in the language of a Statute’s provisions, namely a teleological interpretation, according to the principle of effectiveness, requiring an interpretation which best permits the trial to administer justice in a fair and efficient, manner, before resort to *favor rei*, no engagement of that prior method of interpretation was employed.

186. A further reason for the absence of necessity to employ *favor rei*, is that at this stage determination is only being made as to which law is the applicable law. The interpretative resolutions concern whether Lebanese modes of liability are exclusively the applicable modes, on the one hand and on the other, whether the general principles of law modes of liability or forms of individual criminal responsibility including definitions may be directly imported and applied in substitution of the modes of liability under the Lebanese Criminal Code. This issue very clearly

²⁷⁰ Regarding Rule 3 (A) *see further* section C below.

²⁷¹ In section B (2), ‘Principles of interpretation’.

does not require a comparison of the two laws or employment of *favor rei* or certainly not as a preliminary enquiry.

187. Consideration has also been given by me that at the pertinent date, that of the commission of the offence and participation by means of the forms of liability alleged—14 February 2005, then the modes of liability and the principles or definition sought to be applied under Article 3 (1) (a) were in existence in international criminal courts and tribunals, as well as in domestic legal systems, and accessible to Accused persons. Any potential offender at that time would have been imputed with *knowledge* based on issues of foreseeability that these modes were criminalised under both international law and as a general criminal law principle in accordance with Article 7 of the European Convention on Human Rights.

188. On the issue of the application of *nullum crimen sine lege* and the principle of legality, then flowing from the finding that the provisions of the Lebanese Criminal Code should be interpreted in light of Article 3 (1) (a) modes—that is, ones that constitute general criminal law principles—substantively, there is no apparent or potential breach of the principle of legality. When all relevant considerations are brought to bear, it emerges that legality is a general principle of criminal law, and a human rights provision. It is not of *unlimited* application in how it may limit the scope of or control judicial interpretation. In my view therefore, although, at first blush it appears absolute and unyielding in its application, it is a more layered legal criminality concept, when being practically applied in practice rather than purely theoretically, particularly in contemporary times.

189. The state of affairs that exists surrounding the applicable law for modes of liability, is that all members of the Trial Chamber and the Appeals Chamber agree, though for differing reasons that Lebanese law is the applicable law. At that juncture, flowing from that finding, it is for the Trial Chamber, when resolving the issue of the Accused's individual criminal responsibility for the charged modes, to ensure that in interpretation or application of international law definitions to the provisions of the Lebanese Criminal Code there is no contravention of the principle of legality or other unfairness that results in injustice or otherwise threatens the integrity of the proceedings. It is for them to discern, when interpreting the provisions of the Lebanese Criminal Code or other law whether there are instances of ambiguity, and which cannot be resolved by prior methods which inform interpretation, and identify when *favor rei* may be applied with legal

justification. Adopting such a course when the circumstances are unwarranted may equally lead to injustice.

190. Lastly I emphasise that I do not object to utilization of *favor rei* where a genuinely insoluble, residual ambiguity presents itself. In that instance reverting to the stricter of two definitions would not only be permissible, it would be a required course. But had the Appeals Chamber first employed a teleological methodology in harmonising the Articles 2 and 3 on the basis of the interpretation which would allow the Tribunal to achieve justice in a fair and efficient manner—being its own test—there would have been no necessity to compare the two bodies of law, or indeed, to resort to employment of *favor rei*.

191. As that teleological methodology leads to application of the Lebanese concept of complicity, I next make some specific observations on the scope of that concept.

2. Scope of complicity under Lebanese law

(a) *Actus reus* of complicity under Articles 219 (4) and (5)

192. Taking first the charged heads of accomplice liability, that is, those defined in Articles 219 (4) and (5): clearly the former covers a far broader range of conduct than the latter. The seemingly far greater number of Lebanese cases considering Article 219 (4) illustrates this. Article 219 (5) is a discrete, statutorily defined form of complicity, covering three kinds of assistance after the commission of a crime: elimination of its traces, concealing or disposing of items resulting therefrom and shielding participants in the crime from justice. Article 219 (4), by contrast, addresses aiding and abetting, a more general concept that is well-known at the domestic and international levels.²⁷²

193. Indeed, at the international level, ‘aiding and abetting’ is often used synonymously with complicity itself. The Appeals Chamber adopted this practice when summarising the relevant international criminal law mode of responsibility in its first interlocutory decision on the law

²⁷² In this opinion I follow the same approach to this terminology as that of the Majority, using aiding *or* abetting where referring solely to the Lebanese concept as defined in Article 219 (4) of the Lebanese Criminal Code, but aiding *and* abetting for either the corresponding concept in international criminal law, or both.

applicable in the Special Tribunal.²⁷³ So did my colleagues in the Majority, for the purpose of the Judgment.²⁷⁴

194. I accept that the precise terms of Article 219 (5) confine its *actus reus* in the way that the Judgment describes. However, I am not certain that the *actus reus* of Article 219 (4) is as confined in some respects as my two colleagues have found.

195. Like my colleagues, I interpret the Lebanese decisions and judgments examined as confirming that ‘aid or abet’ in Article 219 (4) encompasses any form of assistance²⁷⁵—similar to the international definitions surveyed and distilled in the Judgment²⁷⁶—and that this assistance can be given at any stage before the commission of the crime, with some finding it can also be given during commission.²⁷⁷ As they also recognised,²⁷⁸ the Appeals Chamber implied in its comments on Article 219 (4) that that provision applies to assistance provided ‘during the perpetration of the crime’.²⁷⁹

196. From the words of Article 219 (4), when considered in the context of certain other Articles of the Lebanese Criminal Code, my colleagues concluded instead that in the Special Tribunal, only assistance before commission could be complicity as defined in that provision.²⁸⁰ On the one hand, this is a reasonable—even obvious—interpretation of the words ‘aids or abets the perpetrator in acts that are preparatory to the offence’ in the Tribunal’s official English translation of Article 219. On the other, some French translations of that provision, including that published on the Tribunal’s website, use the words ‘*aidé ou assisté l’auteur dans les faits qui ont préparé ou facilité*

²⁷³ See First interlocutory decision on applicable law, Section II (II), subheading B, ‘Complicity (Aiding and Abetting)’ and paras 225-228. In footnote 340 of that decision, the Appeals Chamber included the mode of liability in Article 25 (3) (c) of the Rome Statute, which covers ‘aid[ing], abet[ting] or otherwise assist[ing] in’ a crime’s commission or attempted commission (emphasis added), but described this too as ‘aiding and abetting’ and did not comment there or elsewhere on the fact that this and some other codified international definitions of the relevant mode of liability either do not use the terms aiding and abetting alone, or do not use them at all. An example of the latter, albeit from an instrument that is rather different in nature, is that in Article III (e) of the Convention on the Prevention and Punishment of the Crime of Genocide, Adopted 9 December 1948. It refers instead to ‘complicity’.

²⁷⁴ See Judgment, Applicable law, subsection B (2) (b), ‘International criminal law principles on aiding and abetting’.

²⁷⁵ Judgment, Applicable law, paras 6087, 6109, 6146.

²⁷⁶ *Ibid.*, paras 6127-6128. See also para. 6140.

²⁷⁷ *Ibid.*, paras 6088-6089, 6097, 6099-6102, 6141.

²⁷⁸ *Ibid.*, para. 6098.

²⁷⁹ First interlocutory decision on applicable law, para. 219.

²⁸⁰ Judgment, Applicable law, paras 6103-6105, 6108, 6146; see also para. 6149.

l'infraction'.²⁸¹ I understand that to mean literally, 'aided or abetted the perpetrator in the acts that prepared or facilitated the offence'.

197. One could perhaps interpret the highlighted words as not adding anything substantive, with 'prepare or facilitate' being a single concept denoting activities before a crime begins that pave the way for it. I presume that my colleagues read it thus; this reading reconciles it with the English version. However, since the phrase uses '*ou*' ('or'), the more plausible interpretation on the face of the French version is that '*ou facilité*' / 'or facilitated' is an alternative, expanding the *actus reus* beyond assistance with strictly pre-crime acts. If that is more faithful to the Arabic original that is applied in Lebanon, it would explain the lack of distinction between aiding and abetting *preparation* and *commission* in much of the case law on Article 219 (4), and in turn, both the Appeals Chamber's and some of the Parties' characterisations of the objective scope of that provision.

198. More investigation, in consultation with language experts, would be needed to confirm which translation best reflects the Arabic original. I have not undertaken this course, being conscious that in this case it would not affect the result with respect to any Accused, and no Party has made submissions on the differing language or been asked to do so. It suffices for present purposes to observe that the Lebanese case law, the Appeals Chamber's interpretation and the French version together suggest that the *actus reus* of Article 219 (4) may be even broader in this respect than the Majority has found.

199. I am also inclined to agree with the Appeals Chamber's position²⁸² that the necessary agreement with the perpetrator, which I examine further in subsection (c) below, constitutes part of the *actus reus* rather than the *mens rea* of this category of complicity. If that is so, then in this second respect, the *actus reus* also differs from that which my colleagues in the Majority described.

²⁸¹ *Code pénal libanais: Extraits, Version française (publiée par la Librairie Antoine, éd. de 2009)* [Lebanese Criminal Code: Extracts, French version (published by Librairie Antoine, 2009 edition)], https://www.stl-tsl.org/sites/default/files/documents/legal-documents/relevant-lebanese-law/CHA_09_0048_1July2010_FR.pdf (last accessed on 21 May 2020).

²⁸² Adopted in First interlocutory decision on applicable law, paras 219, 228.

(b) *Actus reus* of complicity under Article 219 (1), (2), (3) and (6)

200. Next, I turn to Article 219 (1), (2), (3) and (6). The Trial Chamber is unanimous that these describe further categories of complicity, of the six closed categories in Article 219. ‘Closed’ means that under the Code, no conduct not covered by any of the six can be that of an ‘accomplice’ as such.²⁸³ To this and the descriptions of these provisions in the Judgment,²⁸⁴ I add the following brief observations. All are easily deduced from the Article alone and are in themselves, I believe, uncontroversial.

201. These four uncharged paragraphs define either specific, statutory forms of complicity, like Article 219 (5) does (the clearest example being Article 219 (6) complicity), or forms that cover a wider range of acts (for example, complicity by hardening the perpetrator’s resolve by any means, under Article 219 (2)). But even the latter address a more limited range of conduct than Article 219 (4) does. In other words, all of the other specified ways to act as an accessory are discrete in comparison to aiding or abetting—even if that is limited to assistance before the offence as the Majority has found, and all the more so if it covers assisting in the course of the offence as well.

202. Furthermore, if the *actus reus* of Article 219 (4) in fact does not extend that far, none of the other paragraphs of Article 219 can encompass *all* kinds of assistance at the time of an offence. Instead they manifestly either concern only acts done before that point in time (like Article 219 (3), as noted in the Appeals Chamber’s first interlocutory decision)²⁸⁵ or are restricted to particular types of acts. This lends some more weight to the hypothesis that Article 219 (4) is meant to fill the gap, by applying to other facilitating acts that occur during a crime’s commission. However, as explained above, further investigation would be required to confirm this position.

(c) Agreement and *mens rea* of complicity under Article 219 (1) to (6)

203. Concerning the *mens rea* of Article 219 complicity, I agree with my colleagues’ ultimate conclusions in the Judgment, paragraphs 6147 to 6152, which are confined to the two charged paragraphs of the Article. I also agree with their remarks on the *mens rea* requirement for all

²⁸³ See Judgment, Applicable law chapter, paras 6045, 6140. See further my comments on the significance of Articles 221 and 222 in subsection d below.

²⁸⁴ In Applicable law chapter, paras 6045-6052, 6057, 6094, 6104, 6120, 6140.

²⁸⁵ First interlocutory decision on applicable law, para. 219.

paragraphs of the Article, in the preceding analysis of statute and case law, with one qualification. This relates to the requirement of a prior agreement with the perpetrator.

204. As the Trial Chamber notes in paragraph 6054 of the Judgment, some Lebanese judicial decisions implicitly state that an agreement with the perpetrator is necessary for all six categories of accomplice liability listed in Article 219, while a few state this outright. Three decisions are cited in support of each proposition.²⁸⁶ The Appeals Chamber cited one of them and two additional decisions, from 2003, to support its conclusion that the objective elements of complicity under Lebanese law include ‘an understanding (whether immediate or long-standing)’.²⁸⁷

205. Thus, as far as I can ascertain, there is a relatively small body of Lebanese case law clearly suggesting that accomplices generally must, as an objective element of this mode of liability, reach an ‘understanding’ with the perpetrator to commit the crime.²⁸⁸ At first reading, this may appear to support the Majority’s position that this element is *not* always required, for every category of complicity under Article 219 of the Code.

206. However, my view is that once consideration is given to the following factors, that position should be rejected. First, and foremost, the notion that all six modes under Article 219 import agreement with the perpetrator or perpetrators is not unreasonable. It is unlikely that an accomplice would unilaterally insinuate himself or herself into the criminal business of the perpetrator(s) without their specific consent or acceptance. This might be express or tacit, and given directly or through another accomplice on their behalf. It may be that in the instances in Article 219 forms of liability when agreement is not expressed, it is so naturally implicit and part of the fabric of the criminal arrangement that it does not have to be expressly proved on the facts. It is raised and inferred from the facts and the evidence.

207. Further, I am mindful that Lebanese case law, while instructive, is not binding upon this Tribunal nor, technically, even in Lebanon itself. The provisions of the Lebanese Criminal Code

²⁸⁶ The Majority mentions in fn. 10999 a fourth decision after the three that it identifies as stating the requirement ‘outright’ but—correctly—as a contrast (using the signal ‘*compare*’). The Lebanese court in that decision, Cassation decision 8/2000, relevantly found only that an accomplice must *either* have facilitated the means by which the perpetrator would commit the crime based on a prior agreement with the principal perpetrator or other accomplices, *or* known the nature of those means.

²⁸⁷ First interlocutory decision on applicable law, para. 219, fn. 328.

²⁸⁸ *Ibid.*, paras 219, 228.

itself, rendered applicable under Article 2 of the Statute and interpreted in light of the principles I have outlined above, are paramount. Whether or not supported by extensive case law, therefore, it was open to the Appeals Chamber to interpret all heads of liability under Article 219 as incorporating a requirement for agreement or understanding with the perpetrator. As this is also a reasonable interpretation for the reasons given in the preceding paragraph, I am not persuaded that the Trial Chamber should have departed from it.

(d) Relevance of Articles 221 and 222

208. My final point of difference from the Majority's interpretation of the scope of complicity in Lebanese law concerns Articles 221 and 222 of the Lebanese Criminal Code. To explain this point, it is necessary to revisit Chapter IV, Part I, subsection 3 of the Code, entitled 'Accomplices and concealers'.

209. Subsection 3 comprises Articles 219 to 222. As described above and in the Judgment, Article 219 begins, 'The following shall be deemed to be accomplices to a felony or misdemeanour', then sets out six categories, while Article 220 prescribes the penalties for acting as an 'accomplice'. Article 221 prescribes the range of prison terms and fines imposable on '[a]nyone who, other than in the case provided for in Article 219, paragraph 5, knowingly conceals or disposes of items belonging to a third party that were appropriated, embezzled or obtained by a felony or misdemeanour'. Then Article 222 deals with concealing a person who has committed a felony or helping them to evade justice, other than in the cases provided for in Article 219 (5) or (6).

210. I do not deny that in subsection 3, the term 'accomplices' is used only in Articles 219 and 220. This, coupled with the fact that the subsection is captioned 'Accomplices and concealers', could be taken to imply that 'concealers' is the Code's shorthand for those who contravene Article 221 or 222, as distinct from 'accomplices', who are the subject of Articles 219 and 220 alone—even though Article 219 (5) refers to concealment as such and both Article 221 and Article 222 refer to other acts besides that one.

211. In the scheme created by the Code, one of these forms of criminal conduct is also undeniably more serious than the other. Complicity under Article 219 can be a felony or a misdemeanour, depending on what offence the accomplice assisted and how exactly he or she

assisted it. Breaching Article 221 or 222 is, only, a misdemeanour. This difference is revealed by the penalties prescribed in Articles 220 to 222, when read in conjunction with a series of other provisions of the Code defining felonies and misdemeanours with reference to the punishments they attract.²⁸⁹

212. Nevertheless, the conduct that Articles 219, 221 and 222 address obviously has a common, fundamental characteristic: each is a form of knowing assistance to the perpetrator or perpetrators of a crime. A concealer or disposer of property from the crime, contrary to Article 221, supports the perpetrator(s) both by hiding, and possibly by ensuring they profit from, that crime's tangible products. His or her assistance may also encourage the perpetrator's or perpetrators' further appropriation, embezzlement or other criminal obtaining of property in future, knowing a means of its concealment or disposal exists. Similarly, a concealer or helper under Article 222 supports the perpetrators to 'get away with' their original criminal project and potentially to re-offend, by protecting those perpetrators themselves from apprehension.

213. The essential difference from an Article 219 accomplice is that they not only give this assistance after the crime has been committed, but need not have previously 'agreed with the perpetrator or an accomplice' to do that (in the case of 219 (5)), or known 'of the criminal conduct of offenders responsible for highway robbery or acts of violence against state security, public safety, persons or property' (in the case of 219 (6)). That is, Articles 221 and 222 apply to assisting 'after the fact', in the sense that both doing the act and acquiring the knowledge necessary to be criminally liable happen after the principal crime. And since Article 219 (5) and (6) deal with the same sorts of assisting acts, the assister's lack of foreknowledge, rather than any profound difference in the *actus reus*, seems to account for the comparatively less severe punishment he or she may incur.

214. The wording of Articles 221 and 222 leads me to adopt this interpretation. I note in particular the use of the past tense—'items that *were* appropriated, embezzled or obtained by a felony or misdemeanour' in 221, 'a person... who *has* committed a felony' in 222—and the phrase

²⁸⁹ Regarding complicity under Article 219, *see especially* Articles 37, 44, 179, 220. Regarding the offences under Articles 221 and 222, *see especially* Articles 39, 51, 53, 179, and 221 and 222 themselves.

‘other than in the case [/cases] provided for in Article 219, paragraph (5) [paragraphs (5) and (6)]’.²⁹⁰ Lebanese case law also supports this interpretation.²⁹¹

215. Despite the terminological distinction that arguably is drawn in the Lebanese Criminal Code, some Lebanese courts apparently describe not only criminal assistance falling under Article 219, but also that falling under Article 221 or 222, as complicity. For example, the third chamber of the Lebanese Court of Cassation, Criminal Division, commented in a decision issued in 2002:

Whereas it is true that *for a person to be accomplice*, the following conditions and elements stipulated in Articles 219, 221, and 222 of the Criminal Code must be met;

Whereas it is concluded from the aforementioned texts that there are two types of criminal complicity, the first is prior to the occurrence of the crime or during the commission of the crime. The second is the complicity after the commission of the crime.

As it is clearly shown, there are no elements of complicity prior to the occurrence of the crime or during its commission in this case, that is to say the elements set out in Article 219 of the Criminal Code [...]

vertu des dispositions de droit commun [...] soit en vertu des dispositions particulières du même code, ou des lois spéciales.²⁹²

As I interpret it, the quoted French passage observes that even though, logically, there can be no complicity in a crime after the crime has been fully realised, and the law will not punish every act of assistance following a crime, legislation designates some such acts as complicity.

216. I do not say that such comments are decisive, especially since I am relying on translations of the relevant Lebanese decisions. But, equally, the fact that a Lebanese court, and a French law commentary that it has consulted, would call this sort of assistance after the fact ‘complicity’ is not surprising. Another description of it, often encountered in common law jurisdictions, is ‘accessory after the fact’. The modern form of this concept, as defined in those jurisdictions, ‘typically consist[s] of securing the proceeds of a crime or helping the perpetrator to evade criminal prosecution’.²⁹³ Australia’s federal Crimes Act, for example, provides under the heading ‘accessory after the fact’, ‘Any person who receives or assists another person, who has, to his or her knowledge, committed any offence against a law of the Commonwealth, in order to enable him or her to escape punishment or to dispose of the proceeds of the offence commits an offence.’²⁹⁴ The Canadian Criminal Code defines an ‘accessory after the fact to an offence’ as ‘one who, knowing that a person has been a party to the offence, receives, comforts or assists that person for the purpose of enabling that person to escape’.²⁹⁵

217. In my view, the use in many legal systems of the same or similar terms for the pre- and post-crime forms of criminal participation—even where, as in the Lebanese Code, the term ‘accomplice’ may formally have a narrower meaning—is a further illustration that there is a significant common thread between the two. This common thread, alone, makes it arguable that

²⁹² Cassation decision 458/2002, pp 2-3, emphasis added. The same chamber made a briefer statement to the same effect in Cassation decision 457/2002. The Trial Chamber briefly noted both in its Judgment, Applicable law chapter, fn. 11133.

²⁹³ Ines Peterson, ‘Open questions regarding aiding and abetting liability in international criminal law: a case study of ICTY and ICTR jurisprudence’ [2016] *International Criminal Law Review* 565, p. 588.

²⁹⁴ Australia, Crimes Act 1914 (Commonwealth), s. 6

²⁹⁵ Canada, Criminal Code, s. 23 (1). Section 463 provides for the criminal liability of accessories after the fact. A somewhat similar definition appears in the United States Criminal Code: ‘Whoever, knowing that an offense against the United States has been committed, receives, relieves, comforts or assists the offender in order to hinder or prevent his apprehension, trial or punishment, is an accessory after the fact.’ United States, Criminal Code, 18 U.S.C. para. 3.

Articles 219 to 222 together define, in Lebanese law, the mode of criminal responsibility that the Statute terms ‘participat[ing] as an accomplice’.²⁹⁶

218. In Special Tribunal proceedings, I consider that there is an additional reason to take this view. Namely, no other mode of responsibility listed in Article 3 of the Statute seems capable of covering the kind of participation defined in Articles 221 and 222. It would be a curious and artificial result if a relatively common domestic form of criminal participation such as accessory after the fact—which would otherwise unquestionably be covered by the general words ‘the rules regarding... criminal participation’ in Article 2 (a)—were excluded from the Tribunal’s jurisdiction simply because the Lebanese Criminal Code does not clearly employ the word used in Article 3 (1) (a), ‘accomplice’, in defining it.

219. Under international criminal law, there is not an established concept of liability as accessory or accomplice after the fact.²⁹⁷ In other words, unlike liability as an accomplice in the sense described in Article 219 (and especially Article 219 (4), aiding or abetting), there is no direct international criminal law equivalent of the liability under Lebanese law that is incurred by breaching Article 221 or 222. I have given consideration to the thought that this may be because such complicit or accessorial acts performed subsequent to the crime might not satisfy the ‘gravity’ requirements for acts falling under the jurisdiction of the other international criminal courts and tribunals, and the core international crimes.

220. However, in my view, this fact should not prevent the concept from existing at the Special Tribunal. As explained above, unlike other provisions of Article 3 of the Statute, the words ‘participated as accomplice’ and the other words used to describe modes of responsibility in Article 3 (1) (a) do not come from the governing instrument of an international criminal tribunal, but instead from a transnational crime cooperation convention in the counter-terrorism sphere. The provision refers to modes of responsibility that are common not only to Lebanese law, but also domestic legal systems generally and the international criminal law sphere. I consider that there is therefore no presumption that ‘participated as accomplice’ must be ‘read down’ to be as limited,

²⁹⁶ Statute, Art. 3 (1) (a).

²⁹⁷ Complicity after the fact in the sense in which I use the term here is, of course, distinct from complicity by performing assisting acts after the crime’s commission with some prior knowledge. Complicity under international criminal law does encompass this, in principle, as discussed in the Judgment, Applicable law, para. 6140, fn. 11183.

in this respect, as the international criminal law notion, as there might be with a purely international mode of responsibility.

221. It is observed that the Appeals Chamber expressed no opinion on this particular matter, which would have served to further guide and shape my opinion. When defining the Lebanese concept of ‘complicity’ in its 2011 interlocutory decision, the Appeals Chamber referred solely to Articles 219 and 220, and judicial interpretations of those Articles.²⁹⁸ My colleagues in the Majority took the same approach when they compared ‘the Lebanese law of accessorial liability’ and international criminal law principles on aiding and abetting, in section B (2) (b) of chapter XIII of the Judgment.

(e) Conclusions

222. In summary, for the reasons given above, I have reached the following conclusions about the scope of complicity under Lebanese law.

- a. Aiding or abetting under Article 219 (4) covers a very broad range of conduct. The provision has a much wider scope than either Article 219 (5), or any of the other paragraphs of Article 219, under which the Prosecutor has brought no charges in this case. Contrary to the Majority’s view, it may apply to assistance an accomplice provides while a crime is being committed, as the Appeals Chamber suggested.
- b. Unlike my judicial colleagues in the Majority, I also accept and would have adopted the Appeals Chamber’s conclusion that all categories of complicity under Article 219 require an ‘understanding’ with the perpetrator, as an additional, objective element of this mode of liability.
- c. It would be reasonable to define participating in a crime as an accomplice, under the applicable provisions of the Lebanese Criminal Code referred to in Article 2 of the Statute, to include participation after the fact, in the ways specified in Articles 221 and 222 of the Code. In this respect, too, I respectfully diverge

²⁹⁸ In First interlocutory decision on applicable law, paras 218-224, 228.

from the contrary approach, above referred to, of my noble colleagues—albeit their preference for application of Lebanese law did not rely on this factor.

223. If my interpretation rather than the Majority's is correct, and were adopted, how would this affect determination of the liability of a person accused of participating as an accomplice in a crime under the Tribunal's jurisdiction?

224. On the facts of this case, my interpretation of the elements of Article 219 (4) and (5) complicity, had my two colleagues in the Majority adopted it in full, would not have led to a different finding as to whether those provisions were satisfied. That is, the Trial Chamber would still have found that none of Messrs. Merhi, Oneissi or Sabra was liable under either of those provisions. On assistance given 'during' the crime—*i.e.* after the point when preparation must be considered to have ceased and the crime itself begun—the Trial Chamber has in effect already considered this, by examining all alleged acts of these three Accused on the day of the attack, including after it, in order to consider the Article 219 (5) complicity charge. And if an understanding with the perpetrator is accepted to be a further, objective element under both provisions, this could not have altered the outcome, given that the Chamber has determined that the evidence was insufficient to prove the other elements of either form of complicity.

225. My position that the offences under Articles 221 and 222 of the Code may be considered to be forms of complicity, likewise, could not in my view alter the ultimate finding concerning the liability of these three Accused, for different reasons which I set out in section 3 (e) below.

226. I consider it important to have presented this alternative interpretation nonetheless because, if applied in a case with different facts, it has *at least the potential to* lead to a different final determination on the liability of an accused person than would have resulted from the Majority's interpretation. Perhaps all the more so if it is further accepted that a Trial Chamber of this Tribunal could, in principle, convict an accused person for a lesser form of complicity even if only complicity under Article 219 was charged. It is to that issue that I turn now.

3. Could the Trial Chamber convict an Accused for the lesser offence under Article 222?

(a) The relevant pleaded facts, charges and submissions

227. The charges against each of Messrs. Oneissi, Sabra and Merhi rest in part on acts that the Prosecutor alleges they committed after the attack of 14 February 2005. In its overview of their alleged role in the conspiracy to commit the attack, the amended consolidated indictment states that on the same day, ‘immediately following the attack’:²⁹⁹

- a. Mr Oneissi and Mr Sabra participated in disseminating statements falsely attributing responsibility for the attack, ensuring the delivery to Al-Jazeera of the video and attached letter containing the false claim of responsibility, and ensuring the video would be broadcast;³⁰⁰ and
- b. Mr Merhi coordinated those activities of Messrs. Oneissi and Sabra.³⁰¹

228. The amended consolidated indictment then proceeds to specify that those activities began with either Mr Oneissi or Mr Sabra calling Reuters about 75 minutes after the attack. It states further that Mr Merhi was in contact with Mr Sabra, each using his Purple mobile, about eight minutes before that Reuters call, then several more times throughout that afternoon.³⁰² The Judgment provides more detailed descriptions of what the Prosecution alleges each man did in that period, including some ambiguities and alterations over time in these allegations.³⁰³ I accept those descriptions to be accurate and will not repeat them here.

229. While some of the factual allegations have evolved since the filing of the amended consolidated indictment, the Prosecution case has remained that Messrs. Oneissi’s, Sabra’s and Merhi’s acts immediately after the attack constituted ‘help... to shield one or more participants [in

²⁹⁹ Amended consolidated indictment, paras 3 (b), 3 (c), 3 (d).

³⁰⁰ *Ibid.*, paras 3 (b), 3 (c).

³⁰¹ *Ibid.*, paras 3 (d).

³⁰² *Ibid.*, paras 44-45; *see also* para. 19 (d).

³⁰³ I refer particularly—but not only—to the chapter ‘Claim of responsibility for the attack on Rafik Hariri’, paras 4799-4801, 4804-4805, 4834-4836, 4886-4887, 5617-5627 and in the chapter containing the Trial Chamber’s legal findings on the elements of the crimes and individual criminal responsibility, under ‘Conspiracy to commit a terrorist act (Count 1)’, paras 6392, 6407-6408, 6410.

the principal crimes] from justice’, falling within Article 219 (5) of the Lebanese Criminal Code.³⁰⁴ The Prosecutor in the amended consolidated indictment alleges that their acts *before* the attack were acts preparatory to the offences of terrorism, intentional homicide and attempted intentional homicide ‘*and/or*’ acts to shield the co-perpetrators of those offences, and themselves, from justice.³⁰⁵ That is, the Prosecutor relies on Article 219 (4) and (5) cumulatively or alternatively. But the charges in that instrument regarding their conduct *afterwards* relevantly refer only to Article 219 (5), not Article 222 or any other provision of Lebanese law that defines a mode of criminal responsibility. And the Prosecution has not since sought to rely on any in addition or as an alternative to Article 219 (5).³⁰⁶

230. I will not speculate concerning the Prosecution’s reasons for adopting this approach, but note that it has had two natural, and related, consequences. One is that the evidence that the Parties have presented in relation to this aspect of the case focuses on the elements of the form of complicity defined in Article 219 (5). In the event, all Judges of the Trial Chamber agree, that evidence is insufficient to establish those elements in full, concerning any of these three Accused. The other consequence has been that the Parties’ submissions have likewise focused on those elements—arguably most heavily on those of an agreement ‘with the perpetrator or an accomplice *before commission of the offence*’³⁰⁷ and the matters that the Accused must have known, before the attack, to be liable.

231. No Defence Party raised the possible application of Article 222 in either its final trial brief or oral closing arguments. There was just a brief exchange about this between the Trial Chamber and lead counsel for Mr Oneissi, during the hearing of the Oneissi Defence’s application for acquittal at the close of the Prosecution case, under Rule 167. In that exchange, responding to questions from the Chamber, the Oneissi Defence submitted that the Trial Chamber would not be entitled to apply Article 222, due to—counsel implied—the late stage the proceedings had reached,

³⁰⁴ See, especially, Amended consolidated indictment, paras 63 (a), 64 (f) (ii), 65 (a), 66 (f) (ii), 67 (a), 68 (h) (ii), 69 (a), 70 (h) (ii); Prosecution final trial brief, paras 1168, 1174, 1182, 1188.

³⁰⁵ Amended consolidated indictment, paras 63 (a), 64 (f) (i), 65 (a), 66 (f) (i), 67 (a), 68 (h) (i), 69 (a), 70 (h) (i), emphasis added. Cf. Amended consolidated indictment, para. 50.

³⁰⁶ During closing arguments, the Presiding Judge asked the Prosecutor whether there was a possibility of accessory after the fact in this case, but the Prosecutor stated that as far as he could recall, that was not charged. There was no further substantive discussion of the issue with him or any Prosecution counsel. Prosecution closing submissions, T. 13 September 2018, pp 121-122.

³⁰⁷ Lebanese Criminal Code, Art. 219 (5), emphasis added.

the fact that no notice of the alternative characterization had been given, and the Special Tribunal being an 'adversarial system'.³⁰⁸

232. For the following reasons, I consider that the first factor that I described in paragraph 230 above, of the evidence having been intended to prove a different offence, does not, of itself, preclude the Trial Chamber from recharacterising the conduct of these Accused as help in evading justice, contrary to Article 222, and convicting them accordingly. By contrast, the second—the way in which the Parties have marshalled and argued their cases—in combination with other considerations may, and in this case does, preclude our doing so.

(b) The nature of the offence under Article 222: a lesser alternative capable of being included in complicity under Article 219 (5)

233. The misdemeanour proscribed by Article 222 of the Lebanese Criminal Code, when considered in light of Article 219 (5) and (6) of that Code, has some hallmarks of what the laws of

³⁰⁸ Oneissi Defence submissions, T. 21 February 2018, pp 32-34:

JUDGE AKOUM: [...] You focused a lot in your submissions yesterday and today on the provisions of paragraph 5 of Article 219, which talks about complicity.

And you focused a lot on the need for the perpetrator or an accomplice to have had an agreement -- sorry, for -- the need for an accomplice to have had an agreement with the perpetrator before commission of the offence. We are listening to what you are saying today. In light of Article 167 that asks the Chamber to issue a judgement of acquittal, what if one of the accomplices had agreed with the perpetrator after the commission of the offence and not before? Does that allow the Chamber to issue a judgement of acquittal, or does this give mitigating circumstances to the accomplice, pursuant to the Lebanese law?

MR. COURCELLE-LABROUSSE: [Interpretation] For me, Your Honour, there are two provisions which are brought by the Prosecutor regarding being an accomplice. 219, paragraph 4, aiding and assisting. So before and during the commission of the crime. And 219, paragraph 5, which I can read again.

You will agree with me that I'm focusing on characterizations against my client. Well, I mean, obviously if other texts are given from the Lebanese law, but I haven't been notified of the other characterizations for the time being, if any.

[...]

JUDGE AKOUM: [...] in your opinion, let's say that the Chamber agrees with you and with what you have submitted regarding paragraph 5 of Article 219. Let's say that the Chamber considers, for example, that there was a later agreement, that the agreement happened subsequently. Don't you think that the Chamber has the right to change the characterization of the offence and convict the accused pursuant to Article 222?

MR. COURCELLE-LABROUSSE: [Interpretation] No, Your Honour. Let's go back to the procedural aspect, the way the law should be applied.

In this adversarial system, you cannot -- after how many years of trial? When was I notified? Eight years ago, I think. My client has been accused eight years ago. I've prepared my Defence case, and now because some charges are unfounded we're going to allow for a re-characterization at the very end of the proceedings? [In English] If you don't have something to convict, you must acquit. Okay? Thank you.

[...]

JUDGE NOSWORTHY: But the search for truth?

MR. COURCELLE-LABROUSSE: [Interpretation] Ah, Judge Nosworthy, the search for truth. Well, the Prosecutor needs to search for truth.

(Original spelling.)

various common law jurisdictions refer to as a ‘lesser included offence’. I use the term here to mean an offence all of whose elements are included in a more serious offence, such that if proven, the same facts relied on to establish that the more serious offence was committed would also establish the lesser offence.

234. An ICTY Trial Chamber in the *Kupreškić and others* case discussed such offences and reviewed national laws defining them.³⁰⁹ Examples of lesser included offences that the *Kupreškić* Trial Chamber identified include:

- a. manslaughter, where the crime charged was murder;³¹⁰
- b. theft, where the charge was robbery;³¹¹ and
- c. at the international level, the war crime of murder of civilians, where that murder was charged as a crime against humanity or genocide consisting of the killing of members of an ethnic group.³¹²

The chamber in *Kupreškić* saw as distinct lesser included offences as such, and modes of liability different³¹³ to the one charged, although as I shall discuss below,³¹⁴ it concluded that it could adopt substantively the same approach to both.

235. I am not certain that such a formal distinction between crimes and modes is appropriate or necessary, at least where the two being compared fall under the same overarching mode of liability,

³⁰⁹ It did so as part of its analysis of the broader question of when the Prosecutor or a chamber of that tribunal could modify the Prosecutor’s original legal characterization of particular facts. I discuss its response to that question in section d (iii) below.

³¹⁰ ICTY, *Prosecutor v. Kupreškić, Kupreškić, Kupreškić, Josipović and Šantić*, IT-95-16, Trial Judgement, 14 January 2000 (*‘Kupreškić and others Trial Judgment’*), paras 729, 731, referring to the law of England and Wales, the United States, Zambia, Nigeria and South Africa.

³¹¹ *Kupreškić and others Trial Judgment*, para. 729, 731, referring to the law of England and Wales, the United States, Zambia, Nigeria and South Africa.

³¹² *Kupreškić and others Trial Judgment*, para. 742 (c); see also paras 745-746. The ICTY Trial Chamber also cited both this and other examples of lesser included offences at international law earlier in the judgment, when discussing ‘[i]ssues of substantive international criminal law’ concerning multiple offences (in paras 673-719) and procedural principles applicable to charging in the ICTY (in paras 720-727). The other examples included, at para. 679 (b), cruel treatment as a lesser offence included in torture, contrary to common Article 3 of the Geneva Conventions.

³¹³ The Trial Chamber in the *Kupreškić and others Trial Judgment* did not state definitively whether it thought both modes it mentioned as examples of alternatives (to perpetration), aiding and abetting and participating in a common design, were less serious than perpetration, not just different to it and capable of being ‘included’ on the facts. It did, at para. 742 (a), describe aiding and abetting as ‘a modality of participation in the commission of the crime [that] is different from (albeit *perhaps* less serious than) actual perpetration’, emphasis added.

³¹⁴ Section d (iii).

as I have suggested is the case here. But, in any event, there is no doubt either that Article 222 defines a *lesser* offence or that it is an *alternative*, which could apply to the conduct of Mr Oneissi, Mr Sabra or Mr Merhi only if that conduct did not fall under Article 219 (5). Both of these matters are apparent from the words of the Code itself, as earlier discussed. In this instance, specifically, the acts that these Accused are alleged to have performed immediately after the attack could only constitute helping a known felon ‘to evade justice’ contrary to Article 222 if they were neither help ‘to shield one or more of the participants’ in the felony (or felonies) ‘from justice’³¹⁵ ‘provided for’³¹⁶ in Article 219 (5), nor any other ‘case provided for in Article 219, paragraphs 5 and 6’.³¹⁷

236. It can also be inferred from the language of Articles 219 (5) and 222 that if the Accused had not ‘agreed with the perpetrator or an accomplice before commission’ of the terrorist act, intentional homicides and attempted intentional homicides to disseminate the false claim as alleged, or in Mr Merhi’s case coordinate this, but they nonetheless did the acts alleged and knew at the time they did them that the perpetrators had committed a felony, they would contravene Article 222. In other words, facts alleged in this case to prove the elements of Article 219 (5) complicity, while falling short of proving the required prior knowledge and agreement for that offence, could suffice to prove all elements of this lesser form of complicity. It is thus in my view a lesser alternative to Article 219 (5) complicity that, at least in some cases, is *capable of being included* in it.

237. It should be noted that I have not found any Lebanese judgment or decision that concerned acts of assistance after a crime’s commission similar to those alleged in this case. Rather, in the clearest example that I have been able to identify, one of two people convicted under Article 222 drove the perpetrator of an intentional homicide to a hiding place, with the court seemingly finding his conduct contrary to that Article³¹⁸ to be ‘concealing a fugitive criminal’,³¹⁹ specifically by ‘hid[ing the perpetrator] and help[ing] him to go into hiding’.³²⁰ The other person convicted under

³¹⁵ Lebanese Criminal Code, Art. 219 (5).

³¹⁶ Lebanese Criminal Code, Art. 222.

³¹⁷ Lebanese Criminal Code, Art. 222.

³¹⁸ That accused, Miim Khaa, had also hidden a bag containing the murder weapon and agreed to put the victim’s body in acid. Cassation decision 155/2007, p. 6. However the court’s finding that the *actus reus* of Article 222 was fulfilled did not rely on these acts.

³¹⁹ Cassation decision 155/2007, p. 6, concerning the accused Miim Khaa.

³²⁰ Cassation decision 155/2007, p. 6, concerning the accused Miim Khaa.

Article 222 relevantly³²¹ helped that perpetrator ‘to run away’;³²² there are no more details in the published extract of the court’s decision.

238. On diligent enquiry, no Lebanese case law to my knowledge contradicts the interpretation I have put forward—that helping a perpetrator to ‘evade’ justice, satisfying Article 222, is a lesser alternative capable of being established in full by facts originally alleged to amount to helping to ‘shield from’ justice contrary to Article 219 (5).

(c) The absence of direct or specific guidance in the Statute, Rules or decisions of the Special Tribunal

239. The governing instruments of the Special Tribunal do not address the question of whether a Trial Chamber of the Tribunal may change the legal classification of facts from that which the Prosecutor has charged in an indictment—in instances where they would prove a lesser offence, or in any other circumstances. The Statute, of course, relevantly establishes the parameters of the crimes and modes of participation in them that the Prosecutor may charge, and for which a Trial Chamber may convict, particularly in Articles 1 to 3 defining the Tribunal’s jurisdiction and applicable law. Article 16 of the Statute, concerning the minimum guarantees to which the accused is entitled, also appears to me to be particularly relevant to resolution of this question. I shall return to that Article in sub-sections d (i) and e below. However, no provision of the Statute directly or specifically concerns Chambers’ powers of legal classification (or lack thereof).

240. The same is true of the Rules of Procedure and Evidence. They specifically provide only for changes *by the Prosecutor* in the legal classification of the conduct of accused in the course of the trial, permitting the Prosecutor to amend an indictment at this stage, including to add new charges,³²³ with leave if the Trial Chamber is satisfied that there is *prima facie* evidence to support the amendment and it would not result in improper prejudice to the accused.³²⁴

³²¹ That accused too, Alef Baa, had also given other assistance, namely lending the perpetrator his gun and a sound suppressor before the murder. These acts having occurred before the crime, however, they were not the basis for the finding that he had breached Article 222.

³²² Cassation decision 155/2007, p. 6, concerning the accused Alef Baa.

³²³ See, especially, Rule 71 (E), (F).

³²⁴ Rule 71 (A) (iii), (B). The Rules also permit the Prosecutor to withdraw a charge during the trial, by motion. See Rule 72 (A) (iii).

241. Regarding the deliberations phase of a trial, Rule 148 (B) requires the Trial Chamber to ‘vote separately on each charge contained in the indictment’. This rule might be taken to imply that the Trial Chamber can make findings of guilt *only* upon offences charged, not lesser included ones or any others. Some other provisions of the Rules, for instance those on sentencing and appeals, might seem at first look to suggest the same thing.³²⁵ However, in my opinion, these rules cannot be determinative. None of them clearly and specifically prohibits reclassification of proven facts by a chamber. Furthermore, chambers in other international criminal courts³²⁶ and tribunals³²⁷ have been subject to similarly expressed rules, yet considered themselves to have reclassification powers.

242. As yet, there has been no judicial decision in this Tribunal determining this issue, or even directly examining it. In its interlocutory decisions on the applicable law, the Appeals Chamber answered questions submitted to it by the Pre-Trial Judge about whether the Prosecutor could charge particular offences cumulatively or in the alternative.³²⁸ When doing so in the first decision, it touched on the judicial power to reclassify at the conviction stage, but in my view, without deciding whether it may or should exist in the Special Tribunal. I interpret the comments it made simply as leaving open the possibility of an affirmative answer to both questions.

243. Specifically, the Appeals Chamber noted that this power exists in Lebanon³²⁹ and at the ICC under its Regulation 55.³³⁰ It also very briefly addressed the position at the *ad hoc* international criminal tribunals, by acknowledging they have no regulation comparable to ICC Regulation 55,³³¹ and describing their ‘practice’ to date as entering findings of guilt for the first

³²⁵ E.g. Rules 171 (D), requiring the Trial Chamber to impose a sentence in respect of each count in the indictment upon which the accused has been convicted, and 177 (A) (i) and 189 (B), referring to acquittal ‘of all counts in the indictment’ and ‘on all charges’, respectively.

³²⁶ A rule similar to Rule 148 (B), namely ICC Rules of Procedure and Evidence, Rule 142 (2), exists at the International Criminal Court, where chambers have a codified power to reclassify *proprio motu*, as discussed in section d (iii) below.

³²⁷ E.g. ICTY Trial Chambers were subject to the ICTY Rules of Procedure and Evidence, Rules 87 (B) (identical to Rule 148 (B)), 87 (C) (similar to Rule 171 (D)), yet declared themselves able to reclassify facts in certain circumstances, as discussed in section d (iii) below.

³²⁸ Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber, paras 23-25, questions xiv, xv; First interlocutory decision on applicable law, paras 5, 265-301; F0003, Public Redacted Version of the “Order on Preliminary Questions Addressed to the Appeals Chamber Pursuant to Rule 68 (G) of the Rules of Procedure and Evidence” of 11 August 2017, 11 September 2017, question C (d); Second interlocutory decision on applicable law, paras 8 (C) (d), 92-97.

³²⁹ First interlocutory decision on applicable law, para. 281.

³³⁰ First interlocutory decision on applicable law, paras 291-292.

³³¹ First interlocutory decision on applicable law, para. 292.

time on appeal ‘only in instances where the relevant charges have been included in the indictment’.³³² I will deal with each of these jurisdictions in turn in sections (d) (ii) and (iii) below. Finally, as one of the ‘conclusions’ offered in that decision to guide the Pre-Trial Judge on questions of charging,³³³ the Appeals Chamber stated in paragraph 300, ‘we emphasise the evaluative role of the judiciary’, without elaborating.

(d) Relevant considerations

244. In the absence of more specific guidance in Special Tribunal instruments or case law, the following considerations should in my view guide resolution of this question.

i. Reclassification is a procedural matter, necessitating reference to both Lebanese and international sources

245. The reclassification of facts by a judge or chamber in criminal proceedings is ordinarily treated as a procedural matter. This is so in both domestic, and international or hybrid, criminal jurisdictions, and whether the power of reclassification is broad or limited. Illustrating this, the written provisions delimiting it (where they exist) tend to be found in procedural instruments such as codes or rules of procedure, or related regulations, not the statute(s) that articulate principles of substantive criminal law.³³⁴ When considering the position in international criminal tribunals that lack such a provision, judges³³⁵ and external commentators³³⁶ alike have also presented the issue as procedural in nature.

³³² First interlocutory decision on applicable law, fn. 419. As an illustration, it cited there the appeal judgment and a partially dissenting opinion in one ICTY case, *Mrkšić and Šljivančanin*.

³³³ First interlocutory decision on applicable law, para. 297.

³³⁴ Domestic examples of such provisions include those applied in Albania, Austria, Croatia, Italy, Germany, Japan, the Netherlands and Spain, as well as the Lebanese provisions discussed in section d (ii) below. For examples of domestic criminal procedural instruments permitting judicial reclassification at least to a lesser included offence, from common law system countries, see those listed by the ICTY Trial Chamber in the *Kupreškić and others* Trial Judgment, fn. 966, para. 732 and Elinor Fry, ‘Legal Recharacterization and the Materiality of Facts at the International Criminal Court: Which Changes Are Permissible?’ [2016] 29 *Leiden Journal of International Law* 577 (‘Fry 2016’), fn. 42. *Contra*, the provisions cited by the *Kupreškić* Trial Chamber in para. 730 and Fry in fn. 42, which appear in substantive criminal law statutes (English and Canadian) not procedural ones *per se*. For examples from procedural instruments of international and internationalised/hybrid criminal judicial bodies, see section d (iii) below. *Cf.* the provision in Law No. 05/L-053 on the Kosovo Specialist Chambers and Specialist Prosecutor’s Office, 3 August 2015 (‘Kosovo Specialist Chambers Law’) also discussed in that section.

³³⁵ *E.g.* *Kupreškić and others* Trial Judgment, discussed in section d (iii) below.

³³⁶ *E.g.* Cryer and others 2014, who deal with this issue in their chapter entitled ‘Procedures of International Criminal Investigations and Prosecutions’, pp 459-461.

246. I am unaware of any serious challenge to this approach and I adopt it here. I emphasise however that my characterization of this issue as procedural concerns only the specific practice or process of judicial reclassification itself, not all principles that may determine whether it exists or guide its exercise.

247. My reason for raising this characterization point is, of course, the hybrid legal framework of this Tribunal. Accepting that we are in the realm of procedural rather than substantive law means turning, not to Article 2 of the Statute and its relatively clear direction to apply Lebanese law, but to a collection of principles and sources, of which only one is Lebanon's criminal procedure code.

248. Article 28 (2) of the Statute obliged the Judges to be guided by the aim of 'ensuring a fair and expeditious trial', and reference materials reflecting the highest standards of international criminal procedure, not just the Lebanese Code of Criminal Procedure, when they adopted the Rules of Procedure and Evidence. And both Articles 15 and 16 implicitly oblige us to apply the human rights principles that those Articles articulate, rather than Lebanese legislation, if the two conflict. Many of these principles are either wholly or partly procedural. They include, in Article 16 (4) (a) to (c), the right to:

- a. be informed promptly and in detail in a language which the accused understands of the nature and cause of the charge against him or her;
- b. have adequate time and facilities for the preparation of his or her defence; and
- c. be tried without undue delay.

249. Since the adoption of the Rules of Procedure and Evidence, *if interpreting a provision of those Rules*, under Rule 3 we have been obliged to consult first customary international law interpretative principles, then other specified international sources, before that Code:

Rule 3: Interpretation of the Rules

- (A) The Rules shall be interpreted in a manner consonant with the spirit of the Statute and, in order of precedence, (i) the principles of interpretation laid down in customary international law as codified in Articles 31, 32 and 33 of the Vienna Convention on the Law of Treaties (1969), (ii) international standards on human rights, (iii) the general principles of international criminal

law and procedure, and, as appropriate, (iv) the Lebanese Code of Criminal Procedure.

- (B) Any ambiguity that has not been resolved in the manner provided for in paragraph (A) shall be resolved by the adoption of such interpretation as is considered to be the most favourable to any relevant suspect or accused in the circumstances then under consideration.

250. Further, if the question of whether and how chambers of this Tribunal may reclassify the proven facts were an *evidentiary* rather than a procedural one for which the Rules make no provision—as articulated in Rule 149 (A), an instance of a ‘lacuna’ in the ‘rules of evidence’—then under that Rule a chamber would be obliged to apply ‘provisions of the Lebanese Code of Criminal Procedure *consistent with the highest standards of international criminal procedure*’.³³⁷ Article 21 (4) of the Statute, adopted before Rule 149 (A) existed, also addressed ‘rules of evidence’ not provided for in the Rules of Procedure and Evidence. It is expressed rather differently, directing the Chamber to rules ‘that will best favour a fair determination of the matter before it and are consonant with the spirit of the Statute and the general principles of law’. But in any event—under either provision—clearly the specified governing law is again mixed or qualified, not purely Lebanese.

251. There is no express provision akin to Rule 149 (A) or Article 21 (4) on how to determine rules of *procedure* in the event of a lacuna in those, which is the situation at hand. There is however some guidance in the Appeals Chamber’s first interlocutory decision on the applicable law. When faced with another procedural (or at least partly procedural) issue that the Rules did not deal with, concerning cumulative and alternative charging, the Appeals Chamber took broadly the same approach as it had taken to determine the law defining modes of individual criminal responsibility. This was to examine both Lebanese and international criminal law on the issue and determine whether they substantively differed,³³⁸ insisting throughout on the ultimate object of a fair and expeditious trial.³³⁹

³³⁷ Emphasis added.

³³⁸ First interlocutory decision on applicable law, paras 270-301.

³³⁹ See especially First interlocutory decision on applicable law, para. 32, fn. 48, and paras 266, 297. See also, affirming the same principle, second interlocutory decision on applicable law, para. 95.

252. The similarity to the present situation is only partial because on that issue, the Appeals Chamber found, Lebanese and international criminal law were substantially the same, avoiding any need to choose between them.³⁴⁰ On this one, as will be shown below, the two markedly differ.³⁴¹ But the Appeals Chamber's approach remains instructive both for its clear reliance on the object and purpose of the Statute, and its implicit suggestion that in analogous situations, before the applicable rule can be determined, both Lebanese and international procedure warrant consideration.

253. Taking into account this decision, the approaches reflected in the provisions of the Statute and Rules summarised in paragraphs 248-250 above, and the general principles of interpretation that I have identified and applied in the preceding sections of this Opinion, I conclude that:

- a. The rules that apply to judicial reclassification of facts in this Tribunal must be determined with reference to both the Lebanese Code of Criminal Procedure and international criminal procedural law. The latter does not simply displace the former. This would be at odds with the respect accorded to Lebanese procedural law in the Statute, as well as in the only provision of the Rules specifically concerning lacunae, Rule 149 (D), and the Appeals Chamber's implicit position.
- b. Nonetheless, an approach drawn from international criminal law should be preferred if it represents the highest international standards in this area and is the most consistent with the object and purpose of the Statute. The Tribunal should use the same criteria to select between different approaches taken regarding this matter in the international criminal law sphere.

ii. The position in Lebanon

254. Lebanese procedural law permits judges to change the legal classification of facts from that pleaded, at the deliberations stage of a criminal case and without notice to the parties. This is a common approach in civil law legal systems, applying the principle *jura novit curia*,³⁴² which the

³⁴⁰ First interlocutory decision on applicable law, paras 270, 294, disposition, 14.

³⁴¹ See sections d (ii), (iii) and section e below.

³⁴² See, e.g., *Kupreškić and others* Trial Judgment, 14 January 2000, paras 733-737; Fry 2016, p. 584 and the sources there referred to.

Appeals Chamber in its first interlocutory decision described as meaning, ‘it is for the court to apply the law, whereas it is for the Prosecution to submit the facts in support of its allegations’.³⁴³ The Appeals Chamber also considered that Article 370 of Lebanon’s civil procedure code gives *all* judges of that country the power to ‘give the correct legal classification of’ ‘the facts propounded by the parties’.³⁴⁴

255. The Lebanese Code of Criminal Procedure articulates this power in a series of provisions, which address different circumstances and levels of the criminal court system. For example, Article 233 empowers the Criminal Court, a three-Judge body that examines felonies and misdemeanours,³⁴⁵ to ‘amend the legal qualification of the acts described in the indictment’.³⁴⁶ Article 366 provides that the rules that govern proceedings before the Criminal Court also apply to trial proceedings before and judgments of the Judicial Council, also known as the Court of Justice.³⁴⁷ Under Article 176, single judges, too—who hear only cases involving lesser offences—are ‘not bound by the legal qualification of the alleged offence’.³⁴⁸

256. Article 274 specifically permits the scenario with which I am concerned here, of reclassification to a lesser offence. It applies to the Criminal Court and thus, pursuant to Article 366, the Judicial Council as well. Article 274 provides, ‘If [the Criminal Court] ascertains that some elements of the felony attributed to the accused are incomplete and that the act constitutes a

³⁴³ First interlocutory decision on applicable law, fn. 396. In a later decision, then Presiding Judge of the Appeals Chamber, Judge Baragwanath, also defined the principle in a different context, quoting from ICTY case law. That definition was ‘no party has a ‘burden’ in relation to establishing or interpreting legal norms; rather it is for the Chamber to set out and interpret the law’. STL-14-05/PT/PRES, *In the Case against Al Jadeed [Co.] S.A.L./New T.V. S.A.L. (N.T.V.) and Al Khayat*, F0083, Decision on “Defence request to the President for disclosure related to the matter of the personal jurisdiction of the Tribunal”, 13 November 2014, para. 14.

³⁴⁴ First interlocutory decision on applicable law, para. 281.

³⁴⁵ Lebanese Code of Criminal Procedure, Art. 233, first paragraph.

³⁴⁶ *Ibid.*, Art. 233, second paragraph.

³⁴⁷ *Ibid.*, Art. 366, first paragraph. As the Judgment, Applicable law, para. 6029 explains, this is a court whose judgments are not open to review and whose mandate relevantly includes serious, security-related crimes.

³⁴⁸ Lebanese Code of Criminal Procedure, Art. 176, second paragraph; *see also* Art. 204, second paragraph. Where a single judge considers that the offence committed constitutes a felony, he or she must declare their lack of jurisdiction and refers the case file to the Public Prosecution Office: Arts 176, third paragraph, 177, 195, first paragraph. Article 227, first paragraph, imposes a similar obligation on the Court that hears appeals from single judge decisions, the Appeal Court. Art. 195, second paragraph, also mandates referral of the case file where the single judge ‘finds evidence when hearing the case of offences of which he has not been seized’.

misdemeanour, it shall amend the legal qualification contained in the indictment, convict the accused of a misdemeanour, and sentence him accordingly.’³⁴⁹

257. The Code of Criminal Procedure prohibits the Criminal Court from ‘examin[ing] any offence that is not included in the indictment’³⁵⁰ and requires it, in such situations, to return the matter to the Public Prosecution Office.³⁵¹ In light of the other provisions of that Code,³⁵² this must be understood as restricting the Court to considering the facts that the indictment covers, not as preventing it from deciding that those facts establish a different offence to the one the prosecuting authority has alleged.

258. In practice, Lebanese judges regularly exercise their powers of legal reclassification, in circumstances including but not limited to reclassification to a lesser offence. The Lebanese decisions and judgments examined for the purpose of these proceedings contain numerous examples.³⁵³ One is the Lebanese Judicial Council’s judgment in the *Karami* case. In it, as outlined in the Judgment in the present case, the Council reclassified the conduct of two of the 17 accused from complicity, with which they had been charged, to a different form of responsibility that can entail a heavier penalty, co-perpetration.³⁵⁴ It also convicted a third accused, Samir Geagea, of two uncharged forms of responsibility—instigation of Mr Karami’s premeditated intentional homicide, and complicity in terrorism and the attempted premeditated intentional homicide of the helicopter’s other passengers—instead of co-perpetration of each of those crimes, as the prosecution had alleged.³⁵⁵

³⁴⁹ Lebanese Code of Criminal Procedure, Art. 274, second paragraph. As stated in Article 5 of that Code, second paragraph, ‘accused’ is that instrument’s term for ‘a person accused of a committing a felony’. *See also*, reflecting the same power of reclassification from felony to misdemeanour, Article 279 and the second paragraph of Article 290.

³⁵⁰ Lebanese Code of Criminal Procedure, Art. 233, second paragraph.

³⁵¹ *Ibid.*, Art. 276, second and third paragraphs. Art. 195, second paragraph, seems to prescribe an equivalent process for single-judge proceedings.

³⁵² Both those just described, and others, *e.g.* Article 194, sixth paragraph. This prohibits a single judge from referring in his or her judgment to facts that were not invoked.

³⁵³ Besides the *Karami* case discussed below, *see, e.g.*, *Balamand Monastery* Judgment (deciding that terrorism, not the charged crime of conspiracy, was committed); Cassation decision 8/2000 (finding that the accused ‘HZ’ committed not intentional homicide as charged, but the lesser offence of intentional killing under Article 547 of the Lebanese Criminal Code); *Zouk Mikayel Church* Judgment (convictions for complicity instead of perpetration, pp 101-102, 111, and for a felony that was not charged, p. 108).

³⁵⁴ *See* Judgment, Applicable law, paras 6107, 6291 concerning Messrs. Afif Khoury and Khalil Matar.

³⁵⁵ *Karami* Judgment, pp 4, 10-13, 117, 122-124, 138.

259. In the same case, the Council expressly affirmed its broad power of reclassification, stating of one of the three accused mentioned above, ‘the categorization in the bill of indictment is not binding on the Court of Justice, which has a right and an obligation to attribute to the established facts the legal categorization that it deems most applicable thereto’.³⁵⁶ It made similar comments regarding several of the other 14 accused.³⁵⁷ Such assertions appear in the case law of various other Lebanese courts, too, including the Court of Cassation. A chamber of that court noted in the Article 222-related case discussed in paragraph 237 above, ‘according to the law and to the jurisprudence, the criminal court of first instance is not bound by legal qualification of the actions mentioned in the indictment decision; it is however bound by the facts’.³⁵⁸

260. From this brief review, then, it is clear that if the Lebanese Code of Criminal Procedure solely and entirely governed the question, and the evidence presented concerning Mr Merhi, Mr Oneissi and/or Mr Sabra satisfied the elements of complicity under Article 222, the Trial Chamber could proceed to convict that—or those—Accused of that offence even though it is not charged, nor has the Prosecution otherwise raised it.

iii. The divergent approaches in international and hybrid criminal fora

261. There is no uniform or generally accepted international criminal law rule of procedure on the judicial power to reclassify facts proven at trial. Instead there are at least two main positions, exemplified respectively in the approach of the ICC and that of the *ad hoc* international criminal tribunals. They diverge significantly from one another. To different degrees, both also diverge from the Lebanese position, by being more restrictive than it.

³⁵⁶ *Karami* Judgment, p. 127, referring to Khalil Matar.

³⁵⁷ *Ibid.*, pp 133-134, concerning Messrs. Keitel Hayek, Camille Rami and Hassan Ali Ahmad, all of whom the Council found not guilty of any offence, in part due to the expiry of a limitation period. *See also* the Lebanese Judicial Council’s similar statement regarding Samir Geagea in the *Zouk Mikayel Church* Judgment, p. 106.

³⁵⁸ Cassation decision 155/2007, p. 1.

262. In ICC proceedings, Regulation 55 entitled ‘Authority of the Chamber to modify the legal characterization of facts’ gives the Court a broad power, not limited to reclassification to a less serious offence. To summarise this relatively lengthy regulation:

- a. It allows an ICC Trial Chamber in the final trial judgment to modify the legal characterization—both crimes and modes of liability—from that charged, provided this does not ‘[exceed] the facts and circumstances described in the charges’.³⁵⁹
- b. However—diverging from the Lebanese approach—it requires a Trial Chamber to give participants notice as soon as it appears that the legal characterization of facts may be subject to change, and the opportunity to make oral/written submissions.³⁶⁰
- c. Further, the chamber must safeguard the accused’s rights to have adequate time and facilities for the preparation of his defence, as well as to examine witnesses against him, and call witness and present evidence on his behalf.³⁶¹
- d. To that end, the Trial Chamber ‘may suspend the hearing to ensure that the participants have adequate time and facilities for effective preparation’³⁶² and it may give the accused ‘the opportunity to examine again, or have examined again, a previous witness, to call a new witness or to present other evidence’.³⁶³

263. Justifications for the ICC approach include avoiding over-charging in indictments, with its consequent burden on the defence, and in the ICC Appeals Chamber’s own words, ‘clos[ing] accountability gaps’³⁶⁴ that might be occasioned by acquittals on the technicality of an incorrect

³⁵⁹ Regulation 55 (1), ICC Regulations of the Court. This echoes Article 74, Rome Statute. Article 74 sets out requirements for the trial judgment, and in sub-paragraph 2 provides that ‘[t]he decision shall not exceed the facts and circumstances described in the charges and any amendments to the charges.’

³⁶⁰ Regulation 55 (2), ICC Regulations of the Court.

³⁶¹ Regulation 55 (3), ICC Regulations of the Court, making explicit reference to Articles 67 (1) (b) and (e), Rome Statute.

³⁶² Regulation 55 (2), ICC Regulations of the Court.

³⁶³ Regulation 55 (3) (b), ICC Regulations.

³⁶⁴ ICC, *Prosecutor v. Thomas Lubanga Dyilo*, ICC-01/04-01/06, Judgment on the appeals of Mr Lubanga Dyilo and the Prosecutor against the Decision of Trial Chamber I of 14 July 2009 entitled “Decision giving notice to the parties and participants that the legal characterization of the facts may be subject to change in accordance with Regulation 55(2) of the Regulations of the Court”, 8 December 2009 (‘Lubanga Appeal Decision’), para. 77; *see also* ICC, *Prosecutor v. Germain Katanga*, ICC-01/04-01/07, Judgment on the appeal of Mr Germain Katanga against the decision of Trial Chamber II of 21 November 2012 entitled “Decision on the implementation of regulation 55 of the Regulations of the Court and severing the charges against the accused persons”, 27 March 2013 (‘Katanga Appeal Decision’), para. 22.

pre-trial legal qualification.³⁶⁵ Use of Regulation 55 has been controversial nonetheless.³⁶⁶ Contention has centred, first, on whether a proposed change exceeds the facts and circumstances described in the specific indictment and second, whether it would infringe the accused person's fair trial rights. However, the ICC Appeals Chamber in *Katanga* ruled, basing itself on decisions of the European Court of Human Rights, that legal reclassification at the deliberations stage will not necessarily infringe the accused's rights so long as this does not exceed the facts and circumstances described in the indictment, and the Trial Chamber gives full notice to the accused, and implements measures aimed at safeguarding those rights.³⁶⁷ Examination of decisions of the European Court of Human Rights has led other ICC chambers to reach similar conclusions.³⁶⁸

264. There is a codified broad power of judicial reclassification at the Extraordinary Chambers in the Courts of Cambodia as well. The ECCC is best considered not as an international criminal court or tribunal *per se*, but instead as a hybrid or internationalised one whose legal framework, like that of the Special Tribunal, is partly that of a civil law system country. ECCC Internal Rule 98 (2) provides, in relevant part, that the trial 'judgment shall be limited to the facts set out in the Indictment. The Chamber may, however, change the legal characterization of the crime as set out in the Indictment, as long as no new constitutive elements are introduced.' There is also some provision for judicial alteration of the legal classification from one *mode of liability* to another, in the Law regulating the Specialist Chambers for Kosovo—another hybrid international

and domestic (Kosovar, i.e. civil) law mechanism whose operations are, at the time of writing of this Opinion, still at an early stage.³⁶⁹

265. As there is no written rule on this issue at the *ad hoc* international criminal tribunals nor at the Special Court for Sierra Leone,³⁷⁰ their position must be discerned from jurisprudence. Most notably, in 2000, an ICTY Trial Chamber in the above-mentioned *Kupreškić* judgment decided that trial chambers of that tribunal could, at judgment, reclassify proven facts of their own volition and without notice to the Parties, in limited circumstances only. These circumstances, nonetheless, seem to encompass the one at issue here. That is so whether Article 222 complicity is understood as a lesser alternative offence in the same overarching category of liability, as I suggest it should, or a different, lesser mode of liability.

266. Specifically, the chamber in *Kupreškić* found that if an ICTY Trial Chamber concluded that a more serious offence had not been proved, it could convict the accused of a lesser included offence, ‘despite the fact that [that] crime has not been charged in the indictment’ and without needing to order the Prosecutor to amend that indictment.³⁷¹ It could also reclassify without prior notice the proven facts under a different mode of liability:

Similarly, the Trial Chamber may conclude that the facts proven by the Prosecutor do not show that the accused is guilty of having *perpetrated* a war crime; they show instead that he *aided and abetted the commission of* the crime. In this case, the Trial Chamber may classify the offence in a manner different from that suggested by the Prosecutor, without previously notifying the Defence of the change in the *nomen iuris*. For the same reason the Trial Chamber may find that the accused, charged with *perpetrating* a murder as a crime

³⁶⁹ Article 46 (6) of the Kosovo Specialist Chambers Law provides, ‘When the Court of Appeals Panel overturns a Trial Panel’s finding of guilt based on one mode of liability and the Trial Panel has failed to make findings on alternative modes of liability, the Court of Appeals Panel shall consider the evidence contained in the trial record, as well as any other Trial Panel findings, to determine whether to enter convictions under an alternative mode of liability. Alternatively, if the Trial Panel is available and could more efficiently address the matter, the Court of Appeals Panel may return the case to the Trial Panel to review its findings and the evidence to determine whether to enter findings of guilt under an alternative mode of liability.’ There was also a provision on reclassification of facts in the Transitional Rules of Criminal Procedure that applied in the Special Panels for Serious Crimes in East Timor (section 32 (4)).

³⁷⁰ Pursuant to Article 14 of its Statute, the Special Court’s Rules of Procedure and Evidence derived from those of the ICTR, though under Art. 14 (2) they could be and in fact were substantially amended.

³⁷¹ *Kupreškić and others* Trial Judgment, para. 745.

against humanity, is instead guilty of *participating in a common design to commit* murder as a crime against humanity.³⁷²

267. In all other circumstances, such as where the evidence established a more serious uncharged offence, the chamber found that it would not be permitted to proceed straight to conviction.³⁷³ The chamber carefully considered whether the *jura novit curia* principle should apply more extensively in ICTY proceedings, but ruled this out.³⁷⁴

268. This conclusion was due in part to the lack of a uniform domestic approach to the issue (and thus of a general principle of criminal law to follow in this area).³⁷⁵ But the chamber also decided that in international criminal proceedings, adopting the broad, civil law-associated approach to reclassification would be incompatible with the rights of the accused, unacceptably impairing his or her ability to prepare a defence. It highlighted particularly the right of an accused to be informed promptly and in detail of the charges against him or her.³⁷⁶ The requirement to safeguard those rights, in this instance, outweighed the other ‘basic requirement’ upon the chamber. That requirement ‘relat[ed] to the efficient discharge of the Tribunal’s functions in the interest of justice’. It entailed *inter alia* enabling the Prosecutor to exercise all powers necessary to fulfil his or her mission efficiently and in the interests of justice.³⁷⁷ Essentially the same two requirements apply under the Statute of the Special Tribunal.

269. Moreover, despite the clear finding in *Kupreškić*—not since overturned—that conviction for an uncharged lesser without notice to the defence may occur in principle, other and subsequent case law of the *ad hoc* tribunals suggests that in practice, it would be highly exceptional. The majority of the case law in this area focuses on other scenarios, such as the Prosecution having given some notice of its reliance on the alternative but not, or not clearly, pleaded it in the indictment. To provide an extremely concise assessment of a large body of decisions, their findings

³⁷² *Ibid.*, para. 746, emphasis added. *Nomen iuris* (or *nomen juris*) is not defined in that judgment. It means ‘[a] legal name or designation’, as stated in Black’s Law Dictionary, ‘Nomen’.

³⁷³ *Kupreškić and others* Trial Judgment, especially paras 747-748.

³⁷⁴ *Ibid.*, para. 738 *et seq.*

³⁷⁵ *Ibid.*, para. 738.

³⁷⁶ *Ibid.*, paras 739-740.

³⁷⁷ *Ibid.*, paras 739, 741.

are mixed, and suggest that the outcome of the balancing exercise between the two ‘requirements’ will, necessarily, depend a great deal on the facts and procedural circumstances in each case.³⁷⁸

270. The case law of the *ad hoc* international criminal tribunals also, unquestionably, affirms the principle that the Trial Chamber has applied in this case, that amendment of an indictment in the event of a change of case is not always necessary to safeguard adequately the rights of the accused.³⁷⁹ Reflecting this, as part of its guidance on ‘change’ scenarios besides ones that judges might initiate, the *Kupreškić* Trial Chamber found that the ICTY Prosecutor need not seek leave to amend an indictment upon determining that the evidence establishes only a lesser offence to the one charged. He or she need only notify the trial chamber and the defence that this is proposed as a submission. ‘For’—the chamber found—in this scenario ‘the accused has been given the opportunity to contest all the elements of the crime charged’.³⁸⁰

(e) Conclusions

271. Having reviewed both the Lebanese and the relevant international and hybrid bodies’ stances on the matter, I observe first of all that none absolutely prohibits a trial chamber from *in any circumstances* convicting an accused person for a lesser offence of the kind defined in Article 222 of the Lebanese Criminal Code when it was not charged, nor otherwise previously raised. ICC Regulation 55, for instance, would seem to allow this if the chamber took specified action, principally notifying the Parties and inviting submissions from them. In theory, applying *Kupreškić*, this could have occurred at the ICTY without any notice at all. Thus the two key sources of procedural law that, I have found, should be used to determine the rule applicable in this

³⁷⁸ See—as a small sample, and none directly addressing whether a trial chamber may convict for an uncharged mode or crime—*Krnojelac* Appeal Judgment, paras 125, 137-139, 142-145; ICTR, *Prosecutor v. Ntagerura, Bagambiki and Imanishimwe*, ICTR-99-46-T, Judgement and Sentence, 25 February 2004, paras 36-38; ICTR, *Prosecutor v. Karemera and others*, ICTR-18-11-T, Decision on the Prosecutor’s Motion for Leave to Amend the Indictment – Rule 50 of the Rules of Procedure and Evidence, 13 February 2004, para. 47; ICTR, *Prosecutor v. Semanza*, ICTR-97-20-T, Judgment and Sentence, 15 May 2003, paras 14, 59. As the Special Tribunal’s Appeals Chamber noted (*see* para. 243 and *fn.* 332 above), there have been appeal judgments of the *ad hoc* tribunals convicting accused for, e.g., a mode of responsibility not found at first instance, but this was when the Prosecutor had charged the accused with it. In any event, such case law goes to the different, though related, question of the legal classification powers of an *appellate* chamber. Neither the majority appeal judgment nor the partially dissenting opinion in *Mrkšić and Šljivančanić*, which the Appeals Chamber cited as an example, discusses the issue of a trial chamber’s power to reclassify to and convict for an uncharged mode or crime. The jurisprudence of the Special Court for Sierra Leone does not appear to have addressed that issue in its jurisprudence either.

³⁷⁹ See Judgment, chapter II B, ‘Issues arising from the Prosecution’s pleadings’ and the authorities to which that section refers.

³⁸⁰ *Kupreškić and others* Trial Judgment, para. 743.

Tribunal, the Lebanese and the international, align to the extent that all accept this judicial power may exist.

272. It has been shown that there is no ‘standard of international criminal procedure’³⁸¹ on this issue in the sense of a shared procedure, applied ‘across the board’. There are real differences between the approaches taken at different international and hybrid criminal courts and tribunals. However the majority, if not all, of those approaches have two relevant common features. The first is greater restriction on the power of reclassification than that which exists under the Lebanese Code of Criminal Procedure. The second is that they are shaped by two fundamental obligations, with each instance of a potential reclassification of the facts requiring consideration or ‘balancing’ of both. One obligation centres on the fairness of the trial and more particularly the rights of an accused in this respect. The other centres on the efficiency of the proceedings.

273. I suggest that these common features represent the ‘highest standards of international criminal procedure’ in this area. In addition, their requirement to weigh and seek to ensure both efficiency and the fair trial rights of the accused exists, equally, at the Special Tribunal. It is wholly consistent with the Statutory object and purpose—which the Appeals Chamber described and for the reasons earlier stated I accept—of fair and efficient, or expeditious, administration of justice.

274. This leads me to conclude that these standards, rather than those set out in the Lebanese Code of Criminal Procedure, should be applied to determine whether in this instance, the Trial Chamber is free to convict an Accused for the uncharged lesser form of complicity if the evidence supports it. Further, applying those standards, I conclude that it is not. In the circumstances, this course of action would unacceptably prejudice the Defence of those Accused, contrary to the human rights principles enshrined in Article 16 of the Statute and the overarching imperative to ensure a fair trial.

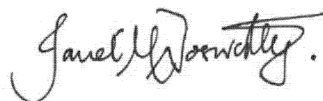

275. Therefore my reservations surround reasons of fairness, the integrity of such a conviction and that of the trial itself *in these specific circumstances*: of a near-total absence of submissions on, or any other signalling of the prospect of conviction under Article 222, before the Trial Chamber withdrew to deliberate. Had the prospect been raised by Prosecution Counsel in the opening statements or brief; had the Defence been alerted to the need to address the issue in

³⁸¹ Statute, Art. 28 (2).

evidential terms, to respond equally with a defence, and to make full submissions on the law and the facts, in those circumstances, I believe that an alternative conviction could have been entered, should the evidence support the lesser offence. The lack of either a charge in the amended consolidated indictment, or a formal further amendment to that instrument to add the charge, would not have been fatal. This in my view would have struck the appropriate balance between the dual objectives of fairness and efficiency in the trial's administration, and be consistent with international criminal practice.

276. I also remain firmly of the view that the principle of legality would not be contravened if a Prosecutor, Judge or Chamber of the Tribunal were to invoke the terms of Article 222 where the factual allegations and evidence advanced support such a course, given that requirements of 'notice' and 'accessibility' at the time of commission would have been satisfied. It is also the same genre of offence as falls under Article 219, but of a lesser degree.

277. In light of my conclusion that the Trial Chamber may not exercise the power of reclassification in this instance, I will not proceed to assess whether the evidence would in fact have established all elements of complicity as defined in Article 222, in respect of any Accused. Had this been raised at trial, to guide such assessment I would have wished to hear more detailed submissions on those elements, and examine a more extensive body of Lebanese case law on the Article, than are presently at my disposal.

Judge Janet Nosworthy

XIX. DISSENTING OPINION OF JUDGE MICHELINE BRAIDY

1. I consider it important to voice my disagreement with the approach taken by the majority in chapter XIV ‘Legal findings on elements of the crimes and Individual criminal responsibility’ of the judgment, specifically in sub-section (B) (3) (f) ‘Whether Mustafa Amine Badreddine had a role in the conspiracy’, in relation to Mr Badreddine’s role in the conspiracy. My disagreement relates to the majority’s decision to *analyse* Mr Badreddine’s role and make *legal* findings, specifically with regard to whether he was a co-conspirator.

2. My disagreement is irrespective of the outcome of that question. In other words, I am not in a position to agree or disagree with the majority’s finding that there is insufficient evidence to conclude beyond a reasonable doubt that Mr Badreddine was a co-conspirator, because I believe that the Trial Chamber should not even have analysed the individual criminal responsibility of someone who is not (anymore) an accused and whose proceedings have been terminated.

3. The Trial Chamber terminated the proceedings in relation to Mr Badreddine on 11 July 2016.¹ From that point onwards, Mr Badreddine was not an accused anymore. At that moment, the Trial Chamber lost its authority to assess his individual criminal responsibility, or—as the SCSL put it—‘from the moment of [the accused’s] death, the Chamber lost its jurisdiction *ratione personae* against [him]’.² Mr Badreddine died with his presumption of innocence. This presumption should not be questioned posthumously.

4. Jurisdiction *ratione personae* is limited to living persons and therefore proceedings cannot continue after an accused’s death.³ The Trial Chamber complied with this principle when it terminated the proceedings in relation to Mr Badreddine. Although a trial chamber may—or must even—undertake a detailed review of all the evidence brought before it and assess it in light of the ‘totality of the evidentiary record’, thus including evidence relating to a deceased former accused,

¹ Order terminating proceedings against Mr Badreddine without prejudice and ordering the filing of an amended consolidated indictment.

² *Norman and others* decision terminating proceedings, para. 13.

³ *Delić* decision on the outcome of proceedings, para. 6; *Kony and others* decision terminating proceedings, p. 4 – Pre-Trial Chamber II held that ‘the purpose of criminal proceedings is to determine individual criminal responsibility and that the Chamber cannot exercise jurisdiction over a person who has deceased’; *Niyitegeka* Appeal Chamber decision dismissing a request, pp 1-2; *Popović and others* Appeal decision terminating proceedings’, para. 5.

it must then confine itself to an assessment of the guilt of any ‘remaining’ accused and not cross the line between factual and legal findings and explicitly or implicitly venture into areas that determine the guilt of the deceased former accused.

5. An ICTR Trial Chamber addressed this scenario in the *Karemera and Ngirumpatse* judgment. Former co-accused Joseph Nziroera had died and the Trial Chamber terminated proceedings in relation to him, with the case against Mr Karemera and Mr Ngirumpatse continuing. The Trial Chamber stated:

Nevertheless, several paragraphs remain in the Indictment, which refer to Joseph Nziroera while alleging facts that would affect the criminal liability of Karemera and Ngirumpatse, if proven. When assessing these paragraphs, the Chamber will not consider Nziroera’s liability for these acts. It will, however, consider evidence of Nziroera’s participation to the extent that it has probative value regarding the potential criminal liability of Karemera and Ngirumpatse.⁴

6. In fact, the Trial Chamber itself held, following the termination of proceedings in relation to Mr Badreddine, that ‘any potential findings concerning Mr Badreddine’s alleged role will be *factual*, limited to the confines of this case and [...] will have no legal impact upon his “interests”’.⁵

7. The majority follows international criminal law precedents on the issue. In particular, at the ICTY, trial chambers have made findings in relation to unindicted and sometimes deceased persons, for example in relation to membership in joint criminal enterprises (JCEs).⁶ I do not dispute that this case law exists or is on point. I just disagree with it.

8. The case law essentially justifies making legal findings in relation to unindicted persons by stating that such findings are only made as necessary as they pertain to the individual criminal responsibility of accused persons, for example in relation to the requirement of a ‘plurality of

⁴ *Karemera and Ngirumpatse* Trial Judgment, para. 115.

⁵ Decision Amending the Consolidated Indictment, 7 September 2016, para. 44 (emphasis added).

⁶ For example, *Mladić* Trial Judgment, Volume IV, para. 4238; *Prlić and others* Trial Judgment, Volume 4, paras 66, 273.

persons' for JCE liability or conspiracy. Further, it underlines that no findings of guilt are entered for such unindicted persons, thereby not affecting their presumption of innocence.⁷

9. I find this distinction too artificial. The presumption of innocence means that everyone is innocent until *proven* guilty—not until *found* guilty. In my view, a chamber making affirmative legal findings on all elements of a crime proves that someone is guilty. There is no extra step before establishing that someone is guilty. Distinguishing such findings from the dispositive finding—usually in the disposition part of a judgment—is artificial and technical. As such, in my view, the presumption of innocence is affected. In other words, making affirmative legal findings on all elements of a crime is tantamount to a finding of guilt.

10. I believe that the Trial Chamber should have stopped short of making any legal findings in relation to Mr Badreddine. It should have limited itself to making factual findings necessary for making legal findings in relation to the Accused.

11. I am not blind to the consequences of the above. There may be a situation where a lone surviving conspirator is charged. There, to analyse the accused's individual criminal responsibility, a legal finding on an unindicted co-conspirator would be necessary. I do not necessarily want to take a principled position on the issue. Perhaps, in a situation as described, relying on the legal fiction of 'a positive finding on all elements of the crime does not equal a finding of guilt' may be permissible. There is, however, no need to consider this scenario because in the instant case, there are more co-conspirators. The Trial Chamber found that Mr Ayyash, together with others yet unidentified—namely subjects 5-9 and the suicide bomber—conspired at some point between 11 November 2004 and 14 February 2005 to commit a terrorist attack by means of an explosive device to assassinate Mr Hariri. There was therefore no need to additionally assess Mr Badreddine's role,

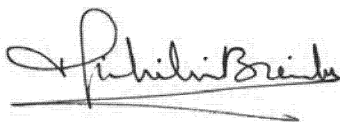

⁷ Specifically, this was set out in *Prlić and others* appeal decision on Croatia's *amicus curiae* application, para. 9. The Appeals Chamber held that the Trial Chamber 'made no explicit findings concerning their participation in the JCE'. It also stated that 'the Trial Chamber's findings regarding the mere existence and membership of the JCE do not – and cannot – constitute findings of criminal responsibility on the part of any persons who were not charged and convicted in this case'. In my view, this is splitting hairs. A JCE can only exist if a plurality of persons with a common purpose, which amounts to or involves the commission of a specified crime, participates in this common purpose. As such, any member of such a JCE by definition must share the purpose and participate in it. If they did not share the purpose or participate, they would not be a JCE member.

if any, in the conspiracy and thereby wade into his presumed innocence, when he is in fact not on trial.⁸

12. Lastly, it may be argued that while making legal findings is not necessary for the determination of the charges against the Accused, it is necessary to provide a reasoned opinion in relation to Mr Badreddine's individual criminal responsibility and because his acts were pleaded in the amended consolidated indictment.

13. In my view, just because 'something' was pleaded in an indictment does not require a trial chamber to address it in the judgment. The Prosecution's pleading obligations are not limited to facts essential to an adjudication of the charges. Further, the requirement of providing a reasoned opinion relates, in my view, to matters 'essential to the adjudication of the charges', not to side issues that require no determination. Moreover, there is no objective threshold for when a judgment is 'reasoned'. In my view, a trial chamber does not need to analyse every possible aspect of a case to comply with that requirement.

14. Mr Badreddine is not on trial anymore after his death. For the above reasons, I therefore disagree with the majority's approach in making legal findings on his membership in the conspiracy.

Judge Micheline Braidy

⁸ I slightly distinguish the situation of the unidentified co-conspirators from that of Mr Badreddine. The former are unidentified, so any stigma of a *de facto* guilty finding cannot attach to any specific person. Furthermore, some may be alive and, if later identified, would at least have the chance of defending themselves, unlike Mr Badreddine.

XX. ANNEXES

A. ANNEX A: Procedural history

1. The trial was legally and evidentially complex. The proceedings were likewise complex. Almost six years passed between the attack and the Prosecutor's submission of an indictment to the Pre-Trial Judge. The case was in pre-trial for another three years. The trial itself took over four years.

2. The procedural history reveals that the case, especially in the indictment and pre-trial phase, was plagued with delays. The most notable procedural aspects are summarised thematically below.

1. Brief background to Special Tribunal's establishment

3. The attack against Mr Rafik Hariri occurred on Monday 14 February 2005. Such was its effect that four days later, on 18 February 2005, the United Nations Secretary-General dispatched a fact-finding mission to Beirut, headed by Mr Peter FitzGerald, to inquire into the causes, circumstances and consequences of the assassination. Mr FitzGerald submitted his report on 24 March 2005.¹ He concluded that:

The review of the investigation indicates that there was a distinct lack of commitment on the part of the Lebanese authorities to investigating the crime effectively, and that this investigation was not carried out in accordance with acceptable international standards. The Mission is also of the view that the Lebanese investigation lacks the confidence of the population necessary for its results to be accepted.²

4. Consequently, on 7 April 2005, the United Nations Security Council, in Resolution 1595, decided 'to establish an international independent investigation Commission ... based in Lebanon to assist the Lebanese authorities in their investigation of all aspects of this terrorist act, including to help identify its perpetrators, sponsors, organizers and accomplices'.³ The Commission worked for almost four years, until 28 February 2009. The three successive United Nations International

¹ Fact-finding mission report.

² Fact-finding mission report, p. 2.

³ Security Council Resolution 1595, para. 1.

Independent Commission (UNIIC) Commissioners, Mr Detlev Mehlis, Mr Serge Brammertz and Mr Daniel Bellemare, prepared 11 reports. The final report was transmitted to the Security Council through the Secretary-General on 2 December 2008.⁴

5. The Special Tribunal was established pursuant to Security Council Resolutions 1664 (2006) and 1757 (2007), acting under Chapter VII of the Charter of the United Nations.⁵ It eventually commenced operation on 1 March 2009, with the newly formed Office of the Prosecutor continuing the UNIIC's investigations. The third and final UNIIC Commissioner, Mr Bellemare, became the Special Tribunal's Prosecutor. Almost two years later, he submitted an indictment for confirmation against one person, Salim Jamil Ayyash.

2. The indictment: submission, confirmation and amendments and challenges to jurisdiction and the form of the indictment

(a) The various indictments

6. The Prosecutor filed at least 11 indictments in the case between January 2011 and September 2016. This encompasses those filed against the initial four Accused and the fifth Accused, Hassan Habib Merhi, and amendments to their various iterations.

7. The first indictment was filed on 17 January 2011, when the Prosecutor, Mr Bellemare, submitted an indictment against Salim Jamil Ayyash to the Pre-Trial Judge for confirmation under Rule 68.⁶

8. On 11 March 2011, he submitted an amended indictment, adding as accused persons Assad Hassan Sabra and Hussein Hassan Oneissi, who was then named as Hassan Hussein 'Issa'.⁷ On 6

⁴ Eleventh UNIIC report.

⁵ United Nations Charter, Chapter VII: Action with Respect to Threats to the Peace, Breaches of the Peace, and Acts of Aggression.

⁶ F0001, Submission of an Indictment for Confirmation (Rule 68) and (1) Motion for an Arrest Warrant and Order for Transfer (Rule 79); (2) Urgent Motion for the Non-disclosure of the Indictment (Rule 74); and (3) Urgent Motion for an Order for Interim Non-disclosure of the Identities of Witnesses Protection Measures (Rules 77 and 115), 17 January 2011.

⁷ F0003, Submission of an Amended Indictment for Confirmation (Rules 68 and 71) and Motion for Arrest Warrants and Orders for Transfer (Rule 79), 11 March 2011.

May 2011, the Prosecutor submitted another amended indictment, this time adding Mustafa Amine Badreddine as an accused.⁸

9. On 10 June 2011, the Prosecutor submitted a further amended indictment against these four Accused.⁹ In this indictment, he charged them with crimes related to the explosion on Monday 14 February 2005 that killed Mr Hariri and 21 others, and injured 231 people.¹⁰ The Pre-Trial Judge confirmed the indictment against the four on 28 June 2011.¹¹ He ordered that the indictment and his decision remain confidential until the indictment could be effectively served on the Accused, or until further notice.¹²

10. In the following year, in February 2012, the outgoing Prosecutor, Mr Bellemare, unsuccessfully attempted to add Mr Merhi's name to the existing indictment. The Pre-Trial Judge rejected this and the indictment against Mr Merhi was eventually confirmed, seventeen months later, on 31 July 2013. This is detailed below.

11. On 17 August 2012, the Prosecutor again sought the Pre-Trial Judge's leave to amend the indictment against the four Accused.¹³ This application was granted two months later, on 25 October 2012.¹⁴ The Prosecutor then filed an amended indictment, on 8 November 2012.¹⁵

12. On 6 February 2013, the Prosecutor sought to amend the indictment filed on 8 November 2012.¹⁶ The Pre-Trial Judge granted the application two months later, on 12 April 2013.¹⁷ The Prosecutor duly filed his (by then) final indictment on 17 April 2013.¹⁸

¹⁶ F0707, Prosecution Request for Leave to Include Further Amendments to its Proposed Amended Indictment, 6 February 2013.

¹⁷ Decision for the filing of an amended indictment.

¹⁸ Indictment of 6 February 2013.

13. In this indictment, he charged the four Accused with participating in a conspiracy aimed at committing a terrorist act. Mr Badreddine and Mr Ayyash were charged as co-perpetrators, and Mr Oneissi and Mr Sabra as accomplices, with committing a terrorist act by means of an explosive device, the intentional homicide of Mr Hariri and 21 others, and the attempted intentional homicide of 226 others.¹⁹ Notably, the indictment extended the duration of the alleged conspiracy to commit a terrorist act, alleging that Mr Ayyash and Mr Badreddine had joined it sometime between 11 November 2004 and 14 February 2005. The Prosecutor also pleaded that Mr Oneissi and Mr Sabra joined the conspiracy sometime between 22 December 2004 and 14 February 2005.²⁰

14. On 31 July 2013, the Pre-Trial Judge granted another Prosecution motion to amend the indictment, making the indictment filed by the Prosecutor on 21 June 2013 the new operative indictment.²¹ The Prosecutor filed a signed version of the indictment on 2 August 2013.²²

15. The indictment against the four Accused was amended twice more. On 7 March 2014, following the joinder of the case against Mr Hassan Habib Merhi, the Prosecutor submitted a consolidated indictment against all five Accused.²³ The Trial Chamber on 4 April 2014 confirmed this ‘consolidated indictment’ as the operative indictment in the case at trial.²⁴

16. The final operative indictment in this case, the ‘amended consolidated indictment’ dated 12 July 2016, was filed following Mr Badreddine’s presumed death and the termination of the proceedings against him.²⁵ It was against Mr Ayyash, Mr Merhi, Mr Oneissi and Mr Sabra, while Mr Badreddine’s name remained on the charging document as an unindicted alleged co-conspirator. The Trial Chamber confirmed the ‘amended consolidated indictment’ as the operative

²⁰ Indictment of 6 February 2013, para. 42.

²¹ Pre-Trial Judge decision granting amendment of the indictment; F0959, Public Redacted Version of “Prosecution Further Request for Leave to Amend the Indictment” dated 21 June 2013, 1 July 2013.

²² F1026, Annex B to “Prosecution’s Filing of the Signed Version of the Amended Indictment in Compliance with the Pre-Trial Judge’s Decision of 31 July 2013 & Request for Amended Arrest Warrants and Orders Requests for Transfer and Detention”, Public Redacted Amended Indictment (dated 21 June 2013), 2 August 2013.

²³ F1444, Prosecution Submission of Consolidated Indictment, Witness and Exhibit Lists, 7 March 2014. The joinder of the proceedings against Mr Merhi and consequent amendment of the indictment is further detailed below in sub-section (11) (c) ‘Joinder of Merhi and Ayyash and others cases’.

²⁴ Decision confirming consolidated indictment.

²⁵ F2640, Annex A to “Prosecution Submission of the Consolidated Amended Indictment Pursuant to the Trial Chamber’s Order of 11 July 2016”, Amended Consolidated Indictment, 12 July 2016. The termination of the proceedings against Mr Badreddine and consequent amendment to the indictment is referred to below in sub-section (12) ‘Mustafa Badreddine’s reported death, termination of the proceedings and amending the consolidated indictment’.

indictment on 7 September 2016, and the Prosecution filed the signed amended consolidated indictment on 15 September 2016.²⁶

(b) Defence challenges to the form of the indictment

17. Rule 90 (A) provides that ‘preliminary motions’ challenging jurisdiction or alleging defects in the form of the indictment shall be filed not later than 30 days after the Prosecutor has disclosed all material and statements, meaning ‘copies of the supporting material that accompanied the indictment when confirmation was sought’. These are filed before the Trial Chamber.

18. The Trial Chamber, on 1 February 2012, as is set out below, ordered the trial to proceed *in absentia*,²⁷ and Defence counsel were immediately assigned to represent the four Accused.²⁸

19. Four months later, on 6 June 2012, the Pre-Trial Judge set a deadline of 25 June 2012 for Defence counsel to file, before the Trial Chamber, any preliminary motions alleging defects in the form of the indictment.²⁹ On 25 June 2012, the Badreddine, Oneissi and Sabra Defence filed preliminary motions before the Trial Chamber.³⁰

20. On 22 January 2013, the Pre-Trial Judge dismissed a Sabra Defence motion seeking further particulars in relation to the charges in the indictment, finding that he lacked jurisdiction to deal with the matter due to its timing and its substantive similarity to preliminary motions that were already before the Trial Chamber.³¹

21. On 18 April 2013, the Trial Chamber declared the Defence motions challenging the earlier indictment to be moot, and gave Defence counsel until 3 May 2013 to file new motions.³² On 2 May 2013, the Sabra Defence filed a consolidated motion challenging the indictment.³³ The next

³¹ Pre-Trial Judge decision on Sabra Defence request for further particulars on charges in indictment.

³² Order authorising the Defence to file preliminary motions challenging defects.

³³ F0877, Consolidated Motion on Form of Indictment, 2 May 2013.

day, the Badreddine and Oneissi Defence filed similar motions.³⁴ The Trial Chamber dismissed the motions on 12 June 2013, finding that the amended indictment was not defective.³⁵

(c) Challenges to jurisdiction—challenging the Special Tribunal’s legality

22. On 4 May 2012, the Ayyash Defence filed a motion before the Trial Chamber challenging the Special Tribunal’s jurisdiction to hear the case on the basis that it lacked legality.³⁶ A week later, counsel for the other three Accused filed their own motions.³⁷ On 6 June 2012, the Legal Representatives of Victims filed their observations and the Prosecution filed a consolidated response.³⁸ The Trial Chamber held a hearing on the issue on 13 and 14 June 2012.³⁹

23. On 27 July 2012, the Trial Chamber dismissed the motions—finding that the Special Tribunal had been legally established by the United Nations Security Council, that this did not violate the sovereignty of Lebanon and that it had been established by law. In addition, the Trial Chamber found that the Defence motions did not challenge the Tribunal’s jurisdiction—but rather its legality—and therefore were not preliminary motions under Rule 90.⁴⁰ On 23 August 2012, the Trial Chamber granted the Badreddine and Oneissi Defence certification to appeal this decision under Rule 126 (C).⁴¹ The Ayyash Defence did not seek certification to appeal.

³⁴ F0882, *Version Publique Expurgée de l’Exception Préjudicielle Formée Contre l’Acte d’Accusation du 6 Février 2013 par la Défense de M. Oneissi en Vertu de l’Article 90(A)(ii) Déposée le 3 mai 2013*, 25 October 2013; F0883, Dual Preliminary Motion presented by the Badreddine Defence against the “Decision relating to the Prosecution Requests of 8 November 2012 and 6 February 2013 for the Filing of an Indictment and “the Amended Indictment”, 3 May 2013.

³⁵ First decision on the form of the amended indictment.

³⁹ Hearing (Rule 90), T. 13 June 2012; Hearing (Rule 90), T. 14 June 2012.

⁴⁰ Decision on the Defence challenges to the jurisdiction and legality of the Tribunal.

⁴¹ Decision certifying for interlocutory appeal the decision on the Special Tribunal’s legality.

24. On 24 August 2012, the Ayyash, Badreddine, and Oneissi Defence appealed the decision.⁴² The Prosecution filed a consolidated response on 14 September 2012.⁴³ On 19 September 2012, the Badreddine Defence replied, and the Legal Representatives of Victims filed their observations.⁴⁴ The Appeals Chamber held a hearing on 1 October 2012.⁴⁵

25. In its decision of 24 October 2012, the Appeals Chamber agreed with the Trial Chamber's finding that the Defence motions did not fall under Rule 90, meaning that interlocutory appeals could not be filed as of right. The Appeals Chamber therefore found the Ayyash Defence's appeal inadmissible for lack of certification to appeal; although finding the other two appeals admissible, it also dismissed the Badreddine Defence and Oneissi Defence's appeals, finding no error on the Trial Chamber's part.⁴⁶

3. Interlocutory decisions on the applicable law

26. In the process of confirming the indictment, the Pre-Trial Judge submitted a number of preliminary questions on applicable law to the Appeals Chamber, under Rule 68 (G).⁴⁷

27. On 21 January 2011, the Pre-Trial Judge submitted 15 preliminary questions to the Appeals Chamber relating to the interpretation of the Statute.⁴⁸ The questions concerned the definitions of terrorism and conspiracy, accomplice liability, and cumulative charging and plurality of offences.

⁴² F0001-AR90.1, Interlocutory Appeal on Behalf of Mr. Ayyash Against the Trial Chamber's "Decision on the Defence Challenges to the Jurisdiction and Legality of the Tribunal" Dated 30 July 2012, 24 August 2012; F0002-AR90.1, Appellate Brief of the Defence for Mr Badreddine Against the "Decision on the Defence Challenges to the Jurisdiction and Legality of the Tribunal", 24 August 2012; F0003-AR90.1, Appeal Brief of the Oneissi Defence Against the Trial Chamber Decision Relating to the Defence Challenges to the Jurisdiction and Legality of the Tribunal, 24 August 2012.

⁴⁴ F0008-AR90.1, Badreddine Defence Reply to "Prosecution Consolidated Response to Ayyash, Badreddine and Oneissi Defence Appeals of the Trial Chamber's 'Decision on the Defence Challenges to the Jurisdiction and Legality of the Tribunal'", 19 September 2012; F0009-AR90.1, Observations of the Legal Representative of Victims on the Interlocutory Appeal Briefs and Responses to the Trial Chamber's Decision on the Defence Challenges to the Jurisdiction and Legality of the Tribunal, 19 September 2012.

⁴⁵ Appeals Hearing, T. 1 October 2012.

⁴⁶ Decision on the Defence Appeals against the Trial Chamber jurisdiction.

⁴⁷ Rule 68 (G) provides that the Pre-Trial Judge 'may submit to the Appeals Chamber any preliminary question, on the interpretation of the Agreement, Statute and Rules regarding the applicable law, that he deems necessary in order to examine and rule on the indictment.'

⁴⁸ Pre-Trial Judge 21 January 2011 order on preliminary questions to the Appeals Chamber.

A few weeks later, on 16 February 2011, the Appeals Chamber rendered a lengthy interlocutory decision on the applicable law.⁴⁹

28. On 2 March 2012, the Pre-Trial Judge submitted another preliminary question to the Appeals Chamber to interpret Lebanese law relating to the crime of criminal association, following another application by the Prosecutor to amend the indictment.⁵⁰ The Appeals Chamber determined that the Pre-Trial Judge's question was inadmissible because, in the intervening period, he had rejected the application.⁵¹

29. On 13 June 2012, counsel for each of the four Accused asked the Appeals Chamber to reconsider its interlocutory decision on the applicable law of 16 January 2011.⁵² On 18 July 2012, the Appeals Chamber dismissed the applications, finding that Defence counsel had failed to demonstrate that the interlocutory decision had caused an injustice to the Accused.⁵³

4. Arrest warrants and decision to hold trial *in absentia*

30. The Prosecutor, on 6 May 2011, asked the Pre-Trial Judge, confidentially and *ex parte*, to issue arrest warrants against the four Accused.⁵⁴ The Pre-Trial Judge did so on 28 June 2011, and ordered that the arrest warrants and the redacted indictment not be made public until the indictment could be served on the Accused, or until further notice.⁵⁵

⁴⁹ First interlocutory decision on applicable law. This is analysed in detail in chapter XIII 'Applicable law'.

⁵⁰ Order on preliminary questions concerning the crime of criminal association.

⁵¹ Appeals Chamber decision refusing request to submit preliminary questions on applicable law after confirmation of indictment.

⁵² F0293, Sabra Motion for Reconsideration of Rule 176 *bis* Decision – "International Terrorism", 13 June 2012; F0294, Request for Reconsideration of the Interlocutory Decision of the Applicable Law Rendered by the Appeals Chamber on 16 February 2011, 13 June 2012; F0295, Defence for Salim Jamil Ayyash's Joinder in the Defence for Mustafa Amine Badreddine's "Requête en réexamen de la décision préjudicielle sur le droit applicable rendue par la Chambre d'appel le 16 février 2011", 13 June 2012; F0296, Corrected Version of the "Request by the Oneissi Defence for Reconsideration of the Interlocutory Decision on the Applicable Law of 16 February 2011" Dated 13 June 2012, 21 June 2012.

⁵³ Appeals Chamber decision on Defence requests for reconsideration of first interlocutory decision on applicable law.

⁵⁴ F0004, Combined Motion of the Prosecutor (1) Submission of an Indictment for Confirmation (Rule 68), (2) Motion for Continuation of Pre-Trial Judge's Order Dated 19 January 2011 Pursuant to rule 96(B), and (3) Motions in the Event of Confirmation of the Indictment Pursuant to Rules 74, 77, and 79, 6 May 2011.

⁵⁵ F0013, Warrant to Arrest Mr Salim Jamil Ayyash Including Transfer and Detention Order, 28 June 2011; F0014, Warrant to Arrest Mr Mustafa Amine Badreddine Including Transfer and Detention Order, 28 June 2011; F0015, Warrant to Arrest Mr Hussein Hassan Oneissi Including Transfer and Detention Order, 28 June 2011; F0016, Warrant to Arrest Mr Assad Hassan Sabra Including Transfer and Detention Order, 28 June 2011.

31. On 8 July 2011, on the Prosecutor's application, the Pre-Trial Judge issued international arrest warrants against the four Accused, and again ordered that these arrest warrants and the redacted indictment not be made public before the indictment had been served on the Accused or until further notice.⁵⁶

32. On 16 August 2011, the Pre-Trial Judge lifted the confidentiality of the indictment, the decision confirming the indictment and the arrest warrants of 8 July against the four Accused.⁵⁷

33. On 18 August 2011, the Special Tribunal's President, having found that the Lebanese authorities' unsuccessful attempts to serve the indictment and arrest warrants on the Accused had been reasonable, ordered the 'authorities of Lebanon' to effect alternative means of service on the Accused. They were to take all reasonable steps to notify the public of the indictment and urge the Accused to surrender to the Tribunal's jurisdiction.⁵⁸

34. On 29 August 2011, the Pre-Trial Judge lifted the confidentiality of the international arrest warrants against the Accused.⁵⁹ Advertisements listing the charges against each of the Accused were published in five different newspapers in Lebanon, and the Special Tribunal's President issued a public service announcement informing the Accused of their right to participate in the proceedings.⁶⁰ The advertisement poster can be seen below:

⁵⁶ F0019, International Warrant to Arrest Mr Salim Jamil Ayyash Including Transfer and Detention Order, 8 July 2011; F0020, International Warrant to Arrest Mr Mustafa Amine Badreddine Including Transfer and Detention Order, 8 July 2011; F0021, International Warrant to Arrest Mr Hussein Hassan Oneissi Including Transfer and Detention Order, 8 July 2011; F0022, International Warrant to Arrest Mr Assad Hassan Sabra Including Transfer and Detention Order, 8 July 2011.

⁵⁷ Order on lifting the confidentiality of the Indictment.

⁵⁸ Order pursuant to Rule 76 (E) 18 August 2011.

⁵⁹ Order relating to the lifting of the confidentiality of the international arrest warrants.

	Special Tribunal for Lebanon (in The Netherlands) +31 (0) 70 800 3410 (24hrs)
UPDATED AS OF: 23 August 2011	

35. On 17 October 2011, the Pre-Trial Judge seized the Trial Chamber under Rule 105 *bis* (A), to determine whether to initiate proceedings *in absentia* against the four Accused.⁶¹

36. On 19 October 2011, the Lebanese Prosecutor-General reported to the Special Tribunal's President on the actions taken to serve the indictment and apprehend the Accused.⁶² On 20 October 2011, the Trial Chamber scheduled a hearing for 11 November 2011 and sought submissions from the Prosecution, the Accused and the Defence Office.⁶³

37. On 23 November 2011, after first holding a hearing on 11 November 2011, the Trial Chamber adjourned its consideration of whether the requirements for a trial *in absentia* under Rule 106 had been met, pending the receipt of responses from the Prosecutor-General of Lebanon to ten

⁶¹ Order to seize the Trial Chamber pursuant to Rule 105 *bis* (A).

⁶² F0058, Report of the Prosecutor General before the Court of Cassation of 19 October 2011, 19 October 2011.

⁶³ Scheduling order in respect of Rule 106.

outstanding Prosecution requests for assistance. The Trial Chamber also instructed the Registrar to take the necessary steps to ensure that the four Accused were notified of the Special Tribunal President's public statement to them—made on 11 August 2011 and essentially urging the Accused to submit to the Tribunal's jurisdiction—and of the modes of participation in a trial set out in Rules 104 and 105.⁶⁴

38. The Trial Chamber decided, on 1 February 2012, under Article 22 of the Statute and Rule 106, to proceed to try the four Accused *in absentia*. The Trial Chamber concluded that they were aware of the charges against them and the possibility of participating in the trial, and had absconded or otherwise could not be found.⁶⁵

39. The Trial Chamber's Presiding Judge granted leave to the Badreddine Defence and Oneissi Defence, on 15 May 2012, and then to the Ayyash Defence and Sabra Defence on 22 May 2012, to seek reconsideration of the decision.⁶⁶ On 22 and 24 May 2012, the Badreddine Defence and Oneissi Defence respectively filed motions to reconsider the Trial Chamber's decision to hold a trial *in absentia*.⁶⁷ The Sabra Defence asked the Trial Chamber on 23 May 2012 to stay the decision to hold a trial *in absentia*, which the Ayyash Defence joined on 24 May 2012.⁶⁸ The Trial Chamber dismissed all four motions on 11 July 2012.⁶⁹

40. On 23 August 2012, the Trial Chamber granted applications filed by counsel for the four Accused for certification to appeal the decision of 11 July 2012 under Rule 126 (C).⁷⁰ The Appeals Chamber unanimously dismissed all four appeals on 1 November 2012.⁷¹

⁶⁴ Interim decision under Rule 106.

⁶⁵ Decision to hold trial *in absentia*.

⁶⁹ Decision on reconsideration of trial *in absentia*.

⁷⁰ Decision certifying for appeal 23 August 2012.

⁷¹ Decision on Defence appeals against reconsideration of trial *in absentia* decision.

5. Assignment of counsel and changes of assignment

41. On 25 October 2011, the Head of Defence Office assigned duty counsel and co-counsel, respectively, to represent the interests of the four Accused. The counsel were: Mr Eugene O'Sullivan and Mr Émile Aoun for Mr Ayyash; Mr Antoine Korkmaz and Mr John Jones for Mr Badreddine; Mr Vincent Courcelle-Labrousse and Mr Yasser Hassan for Mr Oneissi; and Mr David Young and Mr Guénaél Mettraux for Mr Sabra.⁷²

42. The legal basis for an assignment to represent the four Accused was unclear to the Trial Chamber as this was done before the Trial Chamber had made its decision to proceed to trial *in absentia*. The Trial Chamber, on 27 October 2011, asked the Head of Defence Office to clarify his legal basis for doing this.⁷³

43. The following day, the Head of Defence Office submitted that he had made the assignments under Rules 57 (D) (ii) and (iii), to represent the rights of the Accused before the Trial Chamber on the question of the trial *in absentia*. The Head of Defence Office also requested the Trial Chamber's authorisation for duty counsel to make written and oral submissions before it.⁷⁴

44. On 2 November 2011, the Trial Chamber found that the requirements of Rules 57 (D) (ii) and (iii) had not been met at that stage, as a decision had not yet been made to initiate proceedings *in absentia*. Specifically, as there had been no agreement from the Accused to appoint the duty counsel, the Head of Defence Office's competence extended only to identifying suitable counsel. The Trial Chamber, however, authorised these counsel to participate in the proceedings on behalf of the Defence Office, representing the rights of all of the Accused.⁷⁵

45. On 2 February 2012, following the Trial Chamber's decision to try the Accused *in absentia*, the Head of Defence Office appointed these eight counsel to represent the four Accused.⁷⁶

⁷² F0057, Assignment of Duty Counsel Pursuant to Rule 57 (B) (ii) and (iii) of the Rules of Procedure and Evidence, 25 October 2011.

⁷³ Order for clarification from Defence Office.

⁷⁴ F0060, Response to the Trial Chamber's Order of 27 October 2011, 28 October 2011.

⁷⁵ Decision on assignment of duty counsel.

⁷⁶ F0113, Assignment of Counsel for the Proceedings Held *in Absentia* Pursuant to Rule 106 of the Rules, 2 February 2012.

46. On 31 December 2013, the Head of Defence Office—considering it to be in the interest of justice given the nature and complexity of the proceedings—assigned a second co-counsel for the four Accused. They were Mr Thomas Hannis for Mr Ayyash, Mr Geoffrey Roberts for Mr Sabra, Mr Philippe Larochelle for Mr Oneissi, and Mr Iain Edwards for Mr Badreddine.⁷⁷

47. At this point therefore, the Head of Defence Office had appointed twelve male Defence counsel to represent the four Accused facing trial. In the Merhi case, he had just appointed one female co-counsel—out of three counsel—to represent Mr Merhi. Thus, at the commencement of the trial, fourteen of the fifteen assigned Defence counsel were men. Moreover, two of the three Legal Representatives of Victims were male, and the two lead Prosecution senior trial counsel were also men. Thus, the gender balance in the legal representation, comprising the twenty counsel appearing before the Trial Chamber—and in February 2014, it is emphasised—was of 18 men and two women.

48. During the trial some changes occurred to the composition of Defence counsel representing the four, and then five, and then four Accused.

49. On 16 September 2015, after consulting the Trial Chamber, the Head of Defence Office withdrew Mr John Jones' appointment as co-counsel for Mr Badreddine, and on 21 September 2015 assigned Ms Mylène Dimitri as Mr Badreddine's second co-counsel.⁷⁸

50. As of 1 March 2016, after consulting the Trial Chamber, the Head of Defence Office withdrew Mr Philippe Larochelle's assignment as second co-counsel for Mr Oneissi, and appointed Ms Natalie von Wistinghausen in his place.⁷⁹

51. Effective 1 June 2016, after consulting with the Trial Chamber, the Head of Defence Office withdrew Mr Eugene O'Sullivan's appointment as lead counsel for Mr Ayyash, and assigned Mr

⁷⁹ F2423, Withdrawal of the Assignment of Second Co-counsel, Mr Philippe Larochelle, Pursuant to Article 34 (A) of the Directive on the Appointment and Assignment of Defence Counsel, 28 January 2016; F2424, Assignment of Ms Natalie Von Wistinghausen as Second Co-counsel of the Defence Team for Mr Hussein Hassan Oneissi, 28 January 2016.

Emile Aoun in his place.⁸⁰ He appointed Mr Chad Mair as second co-counsel for Mr Ayyash, as of 10 June 2016.⁸¹

52. On 12 July 2016, the Head of Defence Office terminated the mandates of Mr Antoine Korkmaz, Mr Iain Edwards and Ms Mylène Dimitri as counsel for Mr Badreddine, following the Trial Chamber's termination of the proceedings against Mr Badreddine after the Appeals Chamber determined that he was deceased.⁸²

53. As of 3 February 2017, after consulting with the Trial Chamber, the Head of Defence Office withdrew Mr Guénaél Mettraux's assignment as co-counsel for Mr Sabra.⁸³ He assigned Ms Sarah Bafadhel as second co-counsel for Mr Sabra on 22 May 2017.⁸⁴

54. The assignment of co-counsel for Mr Merhi also changed; this is dealt with below.

6. Convening of the Trial Chamber and changes to the bench

55. The Special Tribunal's President convened the Trial Chamber on 8 September 2011. The Trial Chamber was composed of Judge Robert Roth as its Presiding Judge, Judge Micheline Braidy, and Judge David Re, with Judges Janet Nosworthy and Walid Akoum as alternate judges.⁸⁵

⁸⁰ F2602, Withdrawal of the Assignment of Mr Eugene O'Sullivan, Lead Counsel for the Defence of Mr Salim Jamil Ayyash, pursuant to Article 34 (A) of the Directive on the Appointment and Assignment of Defence Counsel, 26 May 2016; F2604, Notice of Appointment of Émile Aoun as Lead Counsel of the Defence Team for Salim Jamil Ayyash, 26 May 2016.

⁸¹ F2603, Assignment of Mr Chad Mair as Second Co-counsel of the Defence Team for Mr Salim Jamil Ayyash, 26 May 2016.

⁸² F2655, Corrected Version of the "Notice of the Termination of Assignment of Mr Antoine Korkmaz, Mr Iain Edwards and Ms Mylène Dimitri, Lead Counsel and Co-Counsel respectively of the Defence team for Mr Mustafa Amine Badreddine" dated 15 July 2016, 18 July 2016; Interlocutory appeal decision on the death of Mr Badreddine and termination of proceedings; Order terminating proceedings against Mr Badreddine without prejudice and ordering the filing of an amended consolidated indictment.

⁸³ F2971, Withdrawal of the Assignment of Mr Guénaél Mettraux, Co-counsel for the Defence team for Mr Assad Hassan Sabra, pursuant to Article 34 (A) of the Directive on the Appointment and Assignment of Defence Counsel, 3 February 2017.

⁸⁴ F3153, Assignment of Ms Sarah Bafadhel as Second Co-counsel in the Defence Team for Mr Assad Hassan Sabra, 22 May 2017.

⁸⁵ Order on composition of the Trial Chamber 8 September 2011. The order may not have been necessary, given that the Statute provides for a trial chamber composed of three judges, to which two alternate judges may be assigned to a trial, upon the request of the Presiding Judge. The order does not mention any consultation with the Presiding Judge on this, thus it appeared to breach the clear terms of Article 8 (3) which provides, 'At the request of the presiding judge of the Trial Chamber, the President of the Special Tribunal may, in the interest of justice, assign the alternate judges to be present at each stage of the trial and to replace a judge if that judge is unable to continue sitting'.

56. On 9 September 2013, Judge Roth resigned. The next day, following a joint letter from the remaining judges, the Special Tribunal's President assigned Judge Nosworthy to replace Judge Roth as a Trial Chamber Judge.⁸⁶ Judge Re was elected as Presiding Judge on 10 September 2013, and subsequently re-elected in March 2015, September 2016, March 2018 and September 2019.

57. On 15 January 2014, the Special Tribunal's President assigned the newly appointed international alternate judge, Judge Nicola Lettieri, to the trial.⁸⁷

7. The pre-trial phase before the Pre-Trial Judge: meetings and conferences, disclosure, pre-trial briefs, and witness and exhibit lists

58. The lengthy indictment and pre-trial phase extended from 11 January 2011 until 25 October 2013. Rule 91 (A) requires the Pre-Trial Judge, at the beginning of the pre-trial proceedings, to establish a 'working plan' with specified dates and obligations. These include the filing of Prosecution and Defence pre-trial briefs, and Prosecution and participating victims' witness and exhibit lists.

(a) Pre-trial status conferences before the Pre-Trial Judge

59. The Pre-Trial Judge held nine status conferences with the Parties in the pre-trial phase. These were on 12 April, 12 June, 26 July, 28 September, 27 November 2012, and 30 January, 10 April, 3 July and 11 September 2013.⁸⁸

60. He also held six working meetings with the Parties and Legal Representatives of Victims: on 5 July, 5 September, 30 October and 19 December 2012, and 5 March and 23 May 2013.⁸⁹

⁸⁶ Order on composition of the Trial Chamber 10 September 2013.

⁸⁷ Order on composition of the Trial Chamber 15 January 2014.

⁸⁸ Order convening status conference on 12 April 2012; Order convening status conference on 12 June 2012; Order convening status conference on 26 July 2012; Order convening status conference on 28 September 2012; Order convening status conference on 27 November 2012; Order convening status conference on 30 January 2013; Order convening status conference on 10 April 2013; Memorandum delaying status conference; Order convening status conference on 3 July 2013; Order convening status conference on 11 September 2013; Status conference, T. 12 April 2012 (partly closed session); Status conference, T. 12 June 2012 (closed session); Status conference, T. 26 July 2012 (closed session); Status conference, T. 28 September 2012 (partly closed session); Status conference, T. 27 November 2012 (closed session); Status conference, T. 30 January 2013; Status conference, T. 10 April 2013 (partly closed session); Status conference, T. 3 July 2013 (partly closed session); Status conference, T. 11 September 2013 (partly closed session).

⁸⁹ Memorandum organising periodic working meetings; Memorandum organising working meeting on 5 September 2012; Memorandum convening working meeting on 30 October 2012; Memorandum convening working meeting on 19 December 2012; Memorandum convening working meeting on 5 March 2013; Memorandum convening working

(b) Prosecution exhibit and witness lists and pre-trial brief

61. On 28 August 2012, the Pre-Trial Judge ordered the Prosecution to file its witness and exhibit lists, and its pre-trial brief by 15 November 2012.⁹⁰

62. On 25 October 2012, the Pre-Trial Judge, after consulting with the Parties, established a working plan under Rule 91 (A).⁹¹ He ordered the Prosecution, among other things, to file its pre-trial brief, and witness and exhibit lists by 15 November 2012, and to file periodic disclosure reports, and to complete disclosure by 30 November 2012.⁹² He also ordered the Legal Representatives of Victims to file lists of witnesses and exhibits by 17 December 2012, and the Defence to file pre-trial briefs by 9 January 2013.⁹³

63. On 15 November 2012, the Prosecution submitted its pre-trial brief, and its witness and exhibit lists.⁹⁴

64. On 13 December 2012, the Legal Representatives of Victims filed lists of witnesses and exhibits that they wished the Trial Chamber to call or admit into evidence on their behalf.⁹⁵

65. The Sabra Defence filed its pre-trial brief on 8 January 2013,⁹⁶ followed the next day by the Ayyash, Badreddine, and Oneissi Defence.⁹⁷

meeting on 23 May 2013; Rule 91 (D) and (E) meeting, T. 5 July 2012 (closed session); Rule 91 (D) and (E) meeting, T. 5 September 2012 (closed session); Rule 91 (D) and (E) meeting, T. 30 October 2012 (closed session); Rule 91 (D) and (E) meeting, T. 19 December 2012 (closed session); Rule 91 (D) and (E) meeting, T. 5 March 2013 (closed session); Rule 91 meeting, T. 23 May 2013 (closed session).

⁹⁰ Order setting a date for filing the Prosecution's Pre-Trial Brief.

⁹¹ Order on a working plan and on the joint Defence motion regarding trial preparation.

⁹² Order on a working plan and on the joint Defence motion regarding trial preparation, pp 15-16. The Prosecutor submitted a total of eight disclosure reports: F0553, Prosecution's Disclosure Report, 23 November 2012; F0603, Prosecution's Second Disclosure Report, 17 December 2012; F0683, Prosecution's Disclosure Report, 28 January 2013; F0759, Redacted Version of the Prosecution's Disclosure Report, Filed 1 March 2013, 4 March 2013; F0838, Prosecution's Disclosure Report, 8 April 2013; F0902, Prosecution's Disclosure Report, 21 May 2013; F0975, Prosecution's Disclosure Report, 1 July 2013; F1098, Prosecution's Disclosure Report, 9 September 2013.

⁹³ Order on a working plan and on the joint Defence motion regarding trial preparation, p. 15.

⁹⁴ F0534, Prosecution's Submission Pursuant to Rule 91, 15 November 2012.

⁹⁵ F0597, List of Witnesses and Exhibits Filed on Behalf of the Participating Victims with Confidential and *Ex Parte* Annexes, 13 December 2012. The presentation of the 'Victims' case' is further considered in chapter V 'Participation of Victims', (E) 'The victims' case'.

Hussein Hassan Oneissi Déposé le 9 Janvier 2013*, 20 February 2013.

66. On 27 February 2013, the Pre-Trial Judge granted a Prosecution motion to amend its witness and exhibit lists, authorised disclosures relating to this, and ordered that it file updated witness and exhibit lists within two working days.⁹⁸ On 1 March 2013, the Prosecution filed an amended witness list, containing 587 witnesses.⁹⁹ On 19 March 2013, the Pre-Trial Judge granted the Prosecution's application to extend the deadline to disclose the material concerned, and authorised the Prosecution to file its updated exhibit list in instalments by 15 April 2013.¹⁰⁰

67. On 21 March 2013, the Pre-Trial Judge granted a Prosecution application to extend the time to disclose some witness statements and to redact certain statements.¹⁰¹

68. The Prosecution filed instalments of its additions to its exhibit list on 15 March, and 11 and 15 April 2013, in total adding 1,351 exhibits to the list.¹⁰²

69. On 24 May 2013, the Pre-Trial Judge partly allowed a Sabra Defence application for disclosure relating to the Prosecution's expert witnesses.¹⁰³

70. On 31 May 2013, the Prosecution filed a consolidated updated witness list containing 587 witnesses and a consolidated updated exhibit list containing 14,737 exhibits.¹⁰⁴

71. On 10 June 2013, the Pre-Trial Judge ordered the Prosecution to inform the Defence of the links between the witnesses on its witness list and the exhibits on its exhibit list.¹⁰⁵ On 18 June 2013, the Pre-Trial Judge made orders on the modalities in which the Prosecution would give Defence counsel access to certain material in electronic format, notably call data records.¹⁰⁶

72. On 5 July 2013, following a Prosecution application for the Pre-Trial Judge to order the Defence to file new pre-trial briefs complying with Rule 91 (I), the Pre-Trial Judge ordered the Prosecution to file an updated pre-trial brief and updated witness and exhibit lists by 15 July 2013;

⁹⁸ Pre-Trial Judge decision granting 21 December 2012 Prosecution request to amend its witness and exhibit lists.

⁹⁹ F0758, Redacted Version of Prosecution Request to File Updated Exhibit List and Notice on Disclosure, 8 March 2013.

the Defence to file updated pre-trial briefs by 15 August 2013, and invited the Legal Representatives of Victims to file updated witness and exhibit lists by 19 July 2013.¹⁰⁷

73. The Prosecution filed its lists on 15 July 2013, containing 590 witnesses and 8,293 exhibits.¹⁰⁸ On 11 July 2013, the Legal Representatives of Victims informed the Pre-Trial Judge that they did not wish to update their witness and exhibit lists.¹⁰⁹

74. On 25 July 2013 and 5 August 2013, the Pre-Trial Judge granted Prosecution applications to amend its witness and exhibit lists.¹¹⁰

75. On 7 August 2013, on a Defence application, the Pre-Trial Judge set new deadlines, ordering the Prosecution to file an updated pre-trial brief and updated witness and exhibit lists by 19 August 2013. He also invited the Legal Representatives of Victims to file updated witness and exhibit lists by 23 August 2013, and ordered the Defence to file updated pre-trial briefs by 2 September 2013.¹¹¹

76. On 16 August 2013, the Pre-Trial Judge granted Prosecution's motion, to file amended or revised material supporting the confirmed indictment. He extended the deadlines for filing the Prosecution's updated pre-trial brief, witness list and exhibit list—to 23 August 2013—the Legal Representatives of Victims' updated lists of witnesses and exhibits—to 29 August 2013—and the Defence updated pre-trial briefs—to 6 September 2013.¹¹²

77. The Prosecution filed its updated pre-trial brief on 23 August 2013.¹¹³ On 29 August 2013, the Legal Representatives of Victims filed updated witness and exhibit lists, containing 60

witnesses and 373 exhibits, respectively.¹¹⁴ The Sabra Defence filed its updated brief on 5 September 2013, and the remaining updated Defence briefs were filed the following day.¹¹⁵

78. On 18 September 2013, the Pre-Trial Judge granted a Prosecution application to amend its witness and exhibit lists, accepting the filing of the updated witness and exhibit lists attached to the Prosecution's motion of 19 August 2013, containing 532 witnesses and 8,642 exhibits.¹¹⁶

79. On 18 October 2013, the Pre-Trial Judge allowed the Prosecution to amend its witness and exhibit lists, but deferred determination in relation to one exhibit. He also accepted the updated witness and exhibit lists attached to the Prosecution motion of 10 September 2013 (containing 540 witnesses and 8,478 exhibits, respectively), save for the deferred exhibit, and ordered the Prosecution to file submissions regarding time estimates for the proposed witnesses.¹¹⁷ On 23 October 2013, the Prosecution filed a witness list containing these estimates.¹¹⁸

80. On 24 October 2013, the Pre-Trial Judge rejected a Prosecution motion claiming that the Defence pre-trial briefs did not conform to the Rules, and that two included improper arguments.¹¹⁹

(c) Disclosure issues

81. The Prosecution has statutory obligations under the Rules to disclose categories of material to the Defence. Some material is exempt from disclosure. During the pre-trial proceedings and the trial, Defence counsel sought relief from both the Pre-Trial Judge and the Trial Chamber for alleged Prosecution disclosure violations. These issues were far from resolved when the Trial Chamber received jurisdiction to try the case on 25 October 2013. The issue of Lebanon's failure to provide material to the Defence is dealt with separately below.

¹¹⁴ F1083, Amended and Updated Lists of Witnesses and Exhibits of the Legal Representative of Victims, 29 August 2013.

¹¹⁵ F1092, Public Redacted Version of "Updated Sabra Pre-Trial Brief", 29 October 2013; F1094, Updated Defence Pre-Trial Brief on Behalf of Mr Ayyash, 6 September 2013; F1095, *Version publique expurgée du second Mémoire d'avant procès pour la Défense de M. Hussein Hassan Oneissi déposé le 6 septembre 2013*, 25 October 2013; F1096, Public Redacted Version of the "Updated Pre-Trial Brief Submitted by the Defence for Mr Mustafa Badreddine Pursuant to Rule 91(I)", 10 September 2013.

¹¹⁸ F1173, Prosecution Submission Pursuant to Rule 91(G)(ii)(f), 23 October 2013.

¹¹⁹ Pre-Trial Judge decision denying Prosecution challenges to Defence pre-trial briefs.

82. On 8 November 2012, the Pre-Trial Judge ruled on six disclosure motions filed by the Sabra Defence, seeking relief for alleged non-disclosure of material, granting the first four in part and dismissing the other two.¹²⁰

83. On 15 November 2012, he dismissed a Defence motion seeking to prevent him from accessing material disclosed by the Prosecution with its pre-trial brief pursuant to the Pre-Trial Judge's order of 25 October 2012.¹²¹ He subsequently dismissed Defence applications to certify for appeal this decision and his decision of 25 October 2012 regarding the working plan.¹²²

84. On 30 November 2012, the Pre-Trial Judge granted a Prosecution application to suspend its disclosure obligations in respect of some materials.¹²³

85. On 17 December 2012, the Pre-Trial Judge partly granted a Prosecution application to extend some deadlines in the working plan regarding disclosure.¹²⁴

86. On 21 December 2012, the Pre-Trial Judge granted in part an outstanding aspect of an earlier Sabra Defence motion for disclosure, on which he had already partly ruled on 8 November 2012.¹²⁵ That same day, he granted three Prosecution applications for extensions of deadlines applicable to its disclosure obligations pursuant to the working plan.¹²⁶

87. On 25 January and 8 February 2013, the Pre-Trial Judge granted a further extension of time for the Prosecution to comply with its disclosure obligations in relation to certain material.¹²⁷

88. On 14 August 2013, the Pre-Trial Judge rejected two further Sabra Defence motions for disclosure, and subsequently certified the decision for appeal.¹²⁸

¹²⁰ Pre-Trial Judge decision on Sabra Defence disclosure motions.

89. On 27 September 2013, the Pre-Trial Judge rejected a Sabra Defence motion concerning the effectiveness of the Prosecution's compliance with its disclosure obligations.¹²⁹

(d) Agreements as to evidence

90. Under Rule 122 'Agreements as to Evidence', the Prosecutor and Defence may agree that an alleged fact is not contested. A Chamber may accept the alleged fact as being proved unless it is not in the interests of justice to do so.

i. Before the Pre-Trial Judge

91. On 24 December 2012, the Pre-Trial Judge set out the process by which the Parties and Legal Representatives of Victims should work to reach agreements on facts that may not be contested at trial.¹³⁰

92. On 19 March 2013, the Prosecutor filed a notice under Rule 122 setting out that the Defence of the four Accused had agreed not to contest nine uncontroversial facts. These included Mr Hariri's date of birth, and the dates of his terms as Prime Minister in Lebanon, the location of the Lebanese Parliament, and that the explosion killed and injured those named in the indictment.¹³¹

ii. Before the Trial Chamber

93. The Trial Chamber recorded the agreement of the Prosecutor and the Ayyash, Badreddine, Oneissi and Sabra Defence as to these nine uncontested facts, on 2 April 2014, and between the Prosecutor and the Merhi Defence on 11 April 2014.¹³²

94. On 16 September and on 6 October 2016 the Trial Chamber recorded, respectively, 18 facts as agreements as to evidence, between the Prosecutor and the Sabra Defence, and seven between the Prosecutor and Merhi Defence, on facts extracted from UNIIC reports.¹³³ On 12 December

¹²⁹ Pre-Trial Judge decision on Prosecution disclosure obligations.

¹³⁰ Pre-Trial Judge order on narrowing contested issues.

¹³² First decision on agreed facts; Second decision on agreed facts (Merhi).

¹³³ First decision on agreed facts in UNIIC reports (Sabra); Second decision on agreed facts in UNIIC reports (Merhi).

2017, it recorded agreements as to evidence between the Prosecutor and Ayyash and Sabra Defence, on 172 facts arising from the case of the participating victims.¹³⁴

95. During the trial, on 7 September 2016, and under Rule 36 (A) the Presiding Judge, after consultation with the Trial Chamber, designated himself as the Judge Rapporteur for reaching agreement between legal and factual matters in dispute between the Parties, including trial scheduling.¹³⁵

(e) Decision on working languages in the case

96. On 16 September 2011, after seeking submissions from the Prosecution, Defence Office and Registry, the Pre-Trial Judge set the working languages in the case under Rule 10 (B). All three of the Tribunal's official languages—Arabic, English and French—could be used in oral proceedings, alongside an accused's own language. Written submissions would be in English or French, or in Arabic if filed by an unrepresented accused. Arabic written submissions would be translated into English; other types of translation would have to be authorised first. Persons other than counsel could file submissions in any language if authorised; these would be translated into English only, unless other translations were authorised. The Pre-Trial Judge also set out the filing languages and translation requirements for pre-trial briefs, witness lists and other material governed by Rule 91, and for the disclosure of materials.¹³⁶

97. The Pre-Trial Judge also stated that it would be advisable for the real time transcript of hearings to be provided in English, with French and Arabic versions being made available within a reasonable time after each hearing.¹³⁷ The Trial Chamber twice modified this decision, as is set out below.

¹³⁴ Decision on agreed facts (participating victims) (Ayyash and Sabra).

¹³⁵ Order designating Judge Rapporteur for legal and factual disputes.

¹³⁶ Pre-Trial Judge decision on languages.

¹³⁷ Pre-Trial Judge decision on languages, p. 19.

8. Other pre-trial matters and submission of the case file to the Trial Chamber

98. During the pre-trial phase, the Pre-Trial Judge referred a number of matters to the Trial Chamber for determination under Rule 89 (E),¹³⁸ before the Trial Chamber became formally seized of the case. For example, the Trial Chamber dealt with a Defence application to strike part of the Prosecution's pre-trial brief, Prosecution notices regarding its proposed expert witnesses, and issues concerning the admissibility impact of proposed written statements' non-compliance with formal requirements under Rule 155.¹³⁹

99. On 25 May 2012, the Trial Chamber also directed the Parties to file within 24 hours—rather than the 14 days provided for in the Rules—any responses to motions seeking to vary time or word limits for filings.¹⁴⁰ This innovation was intended to establish a practice that would expedite the resolution of potentially uncontentious procedural issues.

100. On 12 August 2013, and with a view to expediting proceedings—as he could not comply with the requirements of Rule 95 (A) on the transfer of the case file to the Trial Chamber as of that time—the Pre-Trial Judge transferred to the Trial Chamber part of the case file, namely the approximately 8,250 exhibits filed by the Prosecution under Rule 91.¹⁴¹

101. On 25 October 2013, the Pre-Trial Judge submitted the full case file to the Trial Chamber, as set out in Rule 95 (A), consisting of filings, evidence and other materials relevant to the case, together with a report.¹⁴²

102. Under Rule 95 (B), the Trial Chamber was formally seized of the case on receipt of the case file. This included 12 unresolved motions which had been filed before the Pre-Trial Judge but

¹³⁸ Rule 89 (E) provides that, 'The Pre-Trial Judge shall keep the Trial Chamber informed of all relevant matters. The Pre-Trial Judge may, before the Trial Chamber is seized of the case, refer any matter to the Trial Chamber for adjudication.'

¹³⁹ Pre-Trial Judge referring Badreddine Defence challenges to Prosecution pre-trial brief to Trial Chamber; Pre-Trial Judge referring Sabra Defence request relating to expert witness notices to Trial Chamber; Pre-Trial Judge referring Prosecution Rule 155 motion to Trial Chamber; Decision dismissing Defence challenge to Prosecution pre-trial brief; Decision on expert witnesses notices; Decision dismissing Prosecution request for clarification; Order for submissions on witness statement non-compliance with formal requirements; Rule 155 compliance decision.

¹⁴⁰ Direction shortening time to respond to requests to vary word or time limits.

¹⁴¹ Order on partial transfer of case file to Trial Chamber; *see also* Pre-Trial Judge decision regarding implementation of partial transfer of case file to Trial Chamber.

¹⁴² Pre-Trial Judge Rule 95 (A) transfer of case file to Trial Chamber.

remained outstanding at that time.¹⁴³ For example, the Trial Chamber was seised of a Sabra Defence motion requesting a stay of the proceedings because the Lebanese Government had not provided material necessary for preparing Mr Sabra's defence, as detailed below.

103. In the 12 weeks between the transfer of the case to the Trial Chamber on Friday 25 October 2013, and the commencement of trial on Thursday 16 January 2014, explained in detail below, the Trial Chamber dealt with these outstanding motions referred with the case transfer. These included:

- granting a Prosecution application for redactions under Rule 116;¹⁴⁴
- granting a Prosecution application to add an exhibit to its exhibit list and to redact it;
- a ruling—on remand to the Pre-Trial Judge from the Appeals Chamber—on the scope of the telecommunications data held by the Prosecution that it must provide to the Defence; and
- an application by the Sabra Defence regarding redacted Prosecution disclosure.¹⁴⁵

104. The most substantial matter left unresolved in the pre-trial phase before the Pre-Trial Judge was the Sabra Defence's motion for a stay of the proceedings until the Lebanese authorities responded to its requests for assistance and provided it with the material sought. This is dealt with in more detail in a separate section below which explains how it took more than four years to resolve the issue.

105. In total, between being seised of the case on 25 October 2013 and the start of the trial on 16 January 2014, the Trial Chamber issued 27 written decisions and orders.

¹⁴³ Pre-Trial Judge Rule 95 (A) transfer of case file to Trial Chamber, paras 3-4, annexes D-F. Redacted versions of two of the motions listed in Annex F were also listed in Annex D. The redacted version of one motion listed in Annex D was contained in the same list as the un-redacted version.

¹⁴⁴ Rule 116 allows the Prosecutor not to disclose, with the Trial Chamber's authorisation, material that should ordinarily be disclosed to the Defence, because disclosure may prejudice ongoing investigations, pose a grave security risk to a witness or family member, or is contrary to the public interest or the rights of third parties. Proposed counter-balancing measures are required.

¹⁴⁵ Decision authorising the redaction of three witness statements; Decision granting Prosecution motion to amend exhibit list; Decision on access to call data records and disclosure of results of agreed searches; Order to Prosecution to provide documents to Trial Chamber for review of internal work product categorisation and disclosure.

106. During this pre-trial phase, the Trial Chamber also held pre-trial conferences, under Rule 127, on 29 October and 2 December 2013, and on 9 January 2014.¹⁴⁶ During these hearings, it made 13 oral orders in court, for example on the modes of witness questioning, the modes of victim participation and the filing of replies to responses.¹⁴⁷

107. As a procedural innovation, the Trial Chamber, on 2 December 2013, made a general order in relation to filing replies to responses to the motions filed by the Parties. Rule 8 requires leave of a chamber before doing so. The Trial Chamber in this general order allowed the Parties—without seeking the Trial Chamber’s leave—to file a reply to any response to a motion within five days, on condition that ‘a reply must generally be limited to circumstances where new issues arise out of the respondent’s brief.’¹⁴⁸ This effectively eliminated wasteful procedural litigation over whether a Party could reply to a response to its own motion, and avoided repetition of submissions or arguments already made.

9. The commencement of trial and opening statements

108. On 19 July 2012, acting under Rule 91 (C),¹⁴⁹ the Pre-Trial Judge set 25 March 2013 as the tentative commencement date of the trial.¹⁵⁰ On the Parties’ motion, on 21 February 2013 he postponed the start of the trial, without setting a new date.¹⁵¹ On 2 August 2013, he set another tentative trial commencement date as Monday 13 January 2014.¹⁵²

109. The trial against the four Accused began on Thursday 16 January 2014, after the Trial Chamber itself set a new date, following submissions from the Parties and Legal Representatives

¹⁴⁶ Pre-trial conference, T. 29 October 2013 (open session and closed session); Pre-trial conference, T. 2 December 2013; Pre-trial conference, T. 9 January 2014. The pre-trial conference held following the joinder of the Merhi case, is outlined below.

¹⁴⁷ Order on the mode of questioning witnesses; Order on the modes of victim participation; Order on filing replies.

¹⁴⁸ Order on filing replies, T. 2 December 2013, p. 26.

¹⁴⁹ Rule 91 (C) requires that the Pre-Trial Judge, ‘in consultation with the Parties, the Registrar, the Presiding Judge of the Trial Chamber and, if necessary, the President, shall set a tentative date for the start of trial proceedings at least four months prior to that date’. It is without equivalent in international criminal law proceedings, where, normally the chamber hearing the matter sets the commencement of trial date.

¹⁵⁰ Pre-Trial Judge order on start of trial.

¹⁵¹ Pre-Trial Judge postponement of start of trial.

¹⁵² Pre-Trial Judge order setting tentative start date of trial proceedings. The Trial Chamber was not consulted on this, irrespective of whether the Pre-Trial Judge consulted its then Presiding Judge, the Registrar, or the President, paras 13, 20-22, 54 of the order.

of Victims setting out how Monday 13 January potentially overlapped with a significant Lebanese religious holiday.¹⁵³

110. This same day, after consulting with the participants, the Trial Chamber issued directions on the conduct of the proceedings, under Rule 130 (A).¹⁵⁴ Specifically, it ordered:

1. the filing, each Friday, of a witness schedule for the following two weeks;
2. the disclosing of documents intended to be used during examination-in-chief of a witness—three days in advance, or two weeks in advance for expert witnesses—or showing good cause for seeking the admission of documents not disclosed in this way;
3. the disclosing of documents intended to be used during cross-examination of witness—before the end of the examination-in-chief;
4. the Parties to read into the record the summaries of tendered witness statements, and to disclose this summary one day in advance;
5. the order in which the participants will question a witness, the right to re-examine witnesses on new issues arising in cross-examination, and the Trial Chamber's ability to pose questions at any time;
6. the hearing of submissions on the tendering of evidence through a witness, at the end of questioning;
7. the participants not to communicate with witnesses after they have taken the solemn declaration or commenced testifying, unless allowed by the Trial Chamber, and the prompt disclosure of new exculpatory or material information obtained by the Prosecution or Legal Representatives of Victims when preparing a witness for testimony;
8. the participating victims' ability to call witnesses and tender evidence, through the Trial Chamber, and the Legal Representative of Victim's ability to participate in meetings and conferences, continue to have access to written materials as ordered by the Pre-

¹⁵³ Trial Chamber's trial commencement scheduling order; Pre-trial conference, T. 2 December 2013, pp 5-6.

¹⁵⁴ Directions on the conduct of the proceedings.

Trial Judge, and make written or oral submissions on issues affecting the participating victims' personal interests; and

9. a general daily hearing schedule of 10:00-11:30, 12:00-13:15 and 14:30-16:30.

111. The participants made opening statements as follows: the Prosecution on 16 and 17 January 2014; the Legal Representatives of Victims on 17 January 2014; and the Badreddine Defence and the Oneissi Defence on 20 January 2014.¹⁵⁵ The Ayyash Defence and the Sabra Defence did not make opening submissions.¹⁵⁶

112. The Trial Chamber also invited counsel for Mr Merhi to attend these opening hearings as observers, but instead they elected to sit, robed, in the public gallery. On 20 January 2014, the Head of Defence Office made opening observations on their behalf, with the Trial Chamber's leave.¹⁵⁷

113. Between 16 January and 11 February 2014, when it adjourned the trial, the Trial Chamber received the evidence of 30 witnesses—15 of them testifying live, and 15 of them having their statements admitted into evidence without being required to testify. The Trial Chamber also declared admissible the statements of 33 additional witnesses—meaning that it would receive them as exhibits at a convenient point in the proceedings—and received 214 exhibits into evidence.¹⁵⁸

(a) Further amendment of the Prosecution's witness and exhibit lists

114. On 24 January 2014, the Trial Chamber authorised the Prosecution to amend its witness and exhibit lists, and accepted the updated lists filed by the Prosecution together with its motion of 18 December 2013, containing 459 witnesses and 6,617 exhibits.¹⁵⁹

¹⁵⁵ Prosecutor's opening statement, T. 16 January 2014, pp 9-107, T. 17 January 2014, pp 2-50; Legal Representatives of Victims' opening statement, T. 17 January 2014, pp 53-87; Badreddine Defence opening statement, T. 20 January 2014, pp 13-26; Oneissi Defence opening statement, T. 20 January 2014, pp 26-55.

¹⁵⁸ Procedural matters, T. 18 June 2014, pp 6-7.

¹⁵⁹ Decision authorising the Prosecution to amend its witness and exhibit lists 24 January 2014; F1273, Prosecution Submission Pursuant to Rules 91(G)(ii) and (iii), 18 December 2013.

(b) Case management meetings during the trial

115. The Presiding Judge, often joined by Judges Nosworthy and Braidy, held regular case management meetings throughout the trial. As an example, in 2017 and 2018 they were held on 1 February, 6 July, 12 September, 11 October and 12 December 2017, and on 21 March, 7 May and 25 July 2018.

116. The case management meetings with the Merhi Defence in respect of the joinder and resumption of trial are outlined below.

10. Applications for orders to the Lebanese government on cooperation and non-compliance

117. Rule 16 ‘Request to Lebanon for Information and Cooperation’ governs cooperation between the Special Tribunal and Lebanon. Under Rule 16 (B) and (C) the Prosecutor or Head of Defence Office may request of the Lebanese authorities assistance with measures for questioning witnesses, seizing documents and other investigative measures. These are termed ‘requests for assistance’.

118. Rule 20 ‘Non-compliance by Lebanon with a Tribunal Request or Order’ sets out what may occur. Rule 20 (A) provides that Lebanon must provide the assistance sought without delay and in accordance with the timeframe specified. If this does not occur within 30 days, the Party may seek an order from the Pre-Trial Judge or Chamber for an order to compel the requested assistance, under Rule 20 (A). A failure to comply, under Rule 20 (C) may lead to a judicial finding to this effect. The President then consults with the Lebanese authorities, and if the Pre-Trial Judge or Chamber, after consultation with the President, is of the view that a satisfactory response has still not been provided, the President shall make a judicial finding to that effect and refer it to the Security Council for consideration and further action as deemed appropriate.

119. Prompt compliance with the Special Tribunal’s requests for assistance is essential for the orderly and efficient functioning of its processes. Unfortunately, the process during the pre-trial and trial proceedings was anything but expeditious and efficient.

120. The Trial Chamber had to make two orders to Lebanon to comply, with several additional notifications of encouragement, and it took over four years from the Sabra Defence’s first requests

for assistance, sent in August 2012, until the Trial Chamber was satisfied that the Government of Lebanon—to whom it had directed its orders—had complied with its judicial orders and provided the requested material.

(a) Prosecution

121. The first application under Rule 20 (C) came from the Prosecutor who, on 31 October 2011, asked the Trial Chamber to find that the Lebanese Government had failed to comply with the arrest warrants against the Accused.¹⁶⁰ At that stage of the proceedings, the case was before the Pre-Trial Judge, and the Trial Chamber was seised of the question whether to proceed with the case *in absentia*, as detailed above.

122. On 2 November 2011, the Trial Chamber declined to make the finding sought, deciding that it was not the appropriate chamber to decide the matter at that stage of the proceedings, and declined to stay its determination of the *in absentia* question.¹⁶¹

123. On 15 November 2011, the Prosecution refiled the application before the Pre-Trial Judge.¹⁶² On 22 December 2011, the Pre-Trial Judge rejected the application, finding that it could not be decided at that stage of the proceedings.¹⁶³

124. The Prosecutor did not renew the application either before the Pre-Trial Judge or the Trial Chamber.

(b) Sabra Defence

125. Beginning in March 2012, the Sabra Defence sent some 119 requests for assistance to the Lebanese authorities through the Head of Defence Office, under a Memorandum of Understanding between the Government of the Lebanese Republic and the Defence Office on the Modalities of Their Cooperation signed on 28 July 2010.¹⁶⁴

¹⁶⁰ F0062, Prosecution's Request for a Judicial Finding that the Lebanese Authorities Have Failed to Comply with the Arrest Warrants Pursuant to Rule 20(C), 31 October 2011.

¹⁶¹ Decision on non-compliance motion.

¹⁶² F0077, Prosecution's Request for a Judicial Finding that the Lebanese Authorities Have Failed to Comply with the Arrest Warrants Pursuant to Rule 20(C), 15 November 2011.

¹⁶³ Pre-Trial Judge decision denying Prosecution non-compliance motion.

¹⁶⁴ F0440, Motion Seeking the Cooperation of Lebanon, 27 September 2012, paras 3-4.

126. Between September 2012 and August 2013, the Sabra Defence filed six motions under Rule 20 (A) before the Pre-Trial Judge, arguing that the Lebanese Government had failed to provide most of the requested material, which was essential to its case preparation.¹⁶⁵ It sought to compel the Lebanese Government to provide this material without further delay.

127. On 11 February 2013, the Pre-Trial Judge dealt with the first motion, inviting the Lebanese Government to provide the requested information or its reasons for being unable to do so.¹⁶⁶

128. On 11 October 2013, the Sabra Defence asked the Pre-Trial Judge to conditionally stay the proceedings and to suspend the transfer of the case file to the Trial Chamber pending resolution, including at the appellate stage, of the request for a conditional stay of proceedings. It argued that the fruitless efforts to obtain information from the Lebanese Government—and from other States and the United Nations—had seriously prejudiced its investigations and case preparation.¹⁶⁷

129. The Sabra Defence reiterated its motions and provided additional information on 18 October 2013, and subsequently reiterated its application to stay the proceedings and suspend the trial.¹⁶⁸

130. On 25 October 2013, the Pre-Trial Judge dismissed the Defence application to suspend the transfer of the case file to the Trial Chamber in light of the Lebanese Government's failure to

¹⁶⁵ F0440, Motion Seeking the Cooperation of Lebanon, 27 September 2012; F0702, Second Motion Seeking the Cooperation of Lebanon – Telecommunications Information, 4 February 2013; F0834, Third Motion Seeking the Cooperation of Lebanon – Terrorist Groups, 4 April 2013; F0835, Fourth Motion Seeking the Cooperation of Lebanon – Information on Mr Sabra, 4 April 2013; F1079, Fifth Motion Seeking the Cooperation of Lebanon – [...], 28 August 2013; F1080, Sixth Motion Seeking the Cooperation of Lebanon – [...], 28 August 2013. The first Sabra Defence motion was joined by counsel for the other three Accused, F0441, Ayyash Joinder in "Motion Seeking the Cooperation of Lebanon", 27 September 2012; F0442, Joinder of the Defence for Mr Badreddine to the Sabra Defence Request to Obtain the Cooperation of Lebanon, 27 September 2012; F0443, Joinder of the Defence for Mr Oneissi to the Sabra Defence Request to Obtain the Cooperation of Lebanon, 27 September 2012. The second Sabra Defence motion was joined by the Badreddine Defence, F0718, *Adjonction de la Défense de M. Badreddine à la seconde requête de la Défense de M. Sabra aux fins d'obtenir la coopération du Liban*, 11 February 2013.

¹⁶⁶ Pre-Trial Judge decision granting Sabra Defence cooperation motion.

¹⁶⁷ F1142, Sabra Defence Motion for Stay of Proceedings Due to Lebanon's Failure to Cooperate with the Defence, 11 October 2013. Counsel for the other three Accused joined this motion, F1145, Badreddine Defence Joinder to "Sabra Defence Motion for Stay of Proceedings Due to Lebanon's Failure to Cooperate with the Defence", 11 October 2013; F1149, Ayyash Defence Joinder to "Sabra Defence Motion for Stay of Proceedings Due to Lebanon's Failure to Cooperate with the Defence", 16 October 2013; F1152, The Defence for Hussein Hassan Oneissi Joinder to "Sabra Defence Motion for Stay of Proceedings Due to Lebanon's Failure to Cooperate with the Defence", 16 October 2013.

cooperate with the Defence.¹⁶⁹ The Pre-Trial Judge declined to rule on the related Defence application for a conditional stay of the proceedings based on the same cooperation failures.¹⁷⁰ As detailed above, the Pre-Trial Judge transferred the case file to the Trial Chamber that same day.

131. After being seised of the case and therefore of any unresolved motions, the Trial Chamber, on 20 November 2013, ordered the Sabra Defence to clarify which requested material was still outstanding.¹⁷¹ It reiterated this order on 29 November 2013 after failing to receive the necessary information.¹⁷²

132. On 16 December 2013, the Trial Chamber dismissed in part the Sabra Defence application for orders against the Lebanese Government, ordered the Prosecution to provide certain information to the Sabra Defence and ordered the Sabra Defence to file proposed orders to the Lebanese Government in respect of any outstanding material.¹⁷³

133. On 24 December 2013, the Sabra Defence sought certification to appeal parts of this decision, and sought leave from the Presiding Judge to ask the Trial Chamber to reconsider other parts of the decision.¹⁷⁴ On 17 January 2014, it withdrew the application for reconsideration and instead filed a new motion for a Rule 20 (A) order in respect of the material it sought.¹⁷⁵ On 27 January 2014, the Trial Chamber dismissed the application for certification.¹⁷⁶ On 30 January 2014, the Sabra Defence filed a further application for an order under Rule 20 (A).¹⁷⁷

134. On 31 January 2014, the Trial Chamber ordered the Lebanese Government under Rule 20 (A) to cooperate with the Special Tribunal, by providing some of the information sought by the Sabra Defence and invited further submissions from the Sabra Defence.¹⁷⁸

¹⁶⁹ Pre-Trial Judge decision denying request to suspend transfer of case file to Trial Chamber.

¹⁷⁷ F1372, Further Motion for Order for Cooperation Addressed to the Lebanese Authorities, 30 January 2014.

¹⁷⁸ Decision granting in part Sabra Defence motion for cooperation and orders to cooperate.

135. On 5 February 2014, the Sabra Defence filed additional submissions and reiterated its application for an order under Rule 20 (A) for outstanding material.¹⁷⁹ On 13 March 2014, the Sabra Defence sought a finding of non-compliance against the Lebanese Government under Rule 20 (C), arguing that it had failed to comply in full with the Trial Chamber's order of 31 January 2014 by the specified deadline.¹⁸⁰

136. On 31 March 2014, the Trial Chamber issued additional Rule 20 (A) orders to the Lebanese Government, concerning the remaining material sought by the Sabra Defence.¹⁸¹ On 12 June 2014, the Sabra Defence again sought an order under Rule 20 (C), arguing that the Lebanese Government had failed to comply with the Trial Chamber's orders of 31 March 2014.¹⁸²

137. Following the receipt of some material from the Lebanese Government, the Sabra Defence withdrew this application on 14 April 2014 and filed a consolidated application for a finding of non-compliance in respect of the remaining outstanding material.¹⁸³ On 12 May 2014, the Trial Chamber decided to defer its determination of the application, while continuing to monitor the situation.¹⁸⁴

138. On 23 June 2014, the Trial Chamber clarified the legal basis for its orders of 31 January and 31 March 2014, and granted the Lebanese Government a further 21 days to comply with them.¹⁸⁵ As a result, the Sabra Defence withdrew its second application for a finding of non-compliance under Rule 20 (C).¹⁸⁶

139. However, on 8 January 2015, it renewed its application for a finding of non-compliance, arguing that more than half of the requests for assistance, which had been the subject of Trial Chamber orders, remained outstanding.¹⁸⁷

¹⁸⁷ F1810, Public Redacted Version of "Updated Request for a Finding of Non-Compliance", 8 January 2015.

140. The Trial Chamber, on 27 March 2015, granted the Lebanese Government a further 21 days to respond to any outstanding requests for assistance—attaching annexes categorising the requests in detail with a view to assisting compliance with the order—and ordered the Sabra Defence to file updates on any such responses every two weeks.¹⁸⁸

141. On 23 April 2015, the Registrar filed correspondence he had received from the Lebanese Government concerning the Trial Chamber’s cooperation orders.¹⁸⁹ On 22 May 2015, the Trial Chamber granted the Lebanese Government a further 21 days to respond to the outstanding requests for assistance, and filed annexes reorganising and giving even more detail regarding the Sabra Defence’s requests for assistance, in particular focusing on categorising them according to the specific Lebanese authority to which a request for assistance should be directed.¹⁹⁰

142. The Sabra Defence filed 13 updates between April and November 2015, detailing the progress made by the Lebanese Government in furtherance of the Trial Chamber’s orders.¹⁹¹

143. As part of its ninth update, on 24 August 2015, the Sabra Defence again sought a finding of non-compliance under Rule 20 (C) against the Lebanese Government with regard to 21 of its requests for assistance.¹⁹² On 17 November 2015, the Trial Chamber invited the Lebanese Government to make submissions in this regard and instructed the Sabra Defence to respond to these submissions.¹⁹³

¹⁹³ Invitation to Lebanon for submissions on Sabra Defence non-compliance request.

144. On 9 December 2015, the Trial Chamber granted the Lebanese Government's application for additional time to make its submissions.¹⁹⁴ On 21 January 2016, the Sabra Defence made submissions, noting the lack of submissions from the Lebanese Government and some further responses it had received to its requests for assistance, and renewing its motion for a finding of non-compliance in respect of the 17 still outstanding requests.¹⁹⁵

145. On 31 March, 26 April, 29 June and 17 August 2016, the Sabra Defence informed the Trial Chamber of some additional material received from the Lebanese authorities.¹⁹⁶ On 26 August 2016, the Trial Chamber found that only four requests for assistance remained outstanding, granted the Government of Lebanon a further 21 days to comply, and instructed the Sabra Defence to continue submitting fortnightly updates.¹⁹⁷

146. Finally, on 18 November 2016, the Sabra Defence withdrew its application for a finding of non-compliance, having received material responding to the last four outstanding requests for assistance.¹⁹⁸

147. It took over four years to resolve this issue to the satisfaction of Defence counsel who had first requested material from the Lebanese Government in September 2012. An enormous amount of judicial time was wasted in ensuring Lebanon's compliance with the Rules and judicial orders, and that the Sabra Defence had the material necessary to prepare its defence at trial.

(c) Badreddine Defence

148. On 24 October 2013, the Badreddine Defence asked the Pre-Trial Judge to issue an order under Rule 20 (A) to the Lebanese Government, claiming that it had failed to respond to a request

¹⁹⁴ Order varying time limit for Lebanese Government response.

¹⁹⁷ Decision extending timeline to provide information.

¹⁹⁸ F2841, Update to "Further Decision on Sabra Defence Motion for a Finding of Non-Compliance with the Special Tribunal", 18 November 2016.

for assistance essential to its preparation for trial.¹⁹⁹ After being seised of the case and consequently the Badreddine Defence's application, the Trial Chamber, through its Presiding Judge, ordered the Registrar on 15 November 2013 to request, in writing, for the Lebanese Government's cooperation or for the reasons for non-compliance.²⁰⁰

149. Finding that no substantive response to the request for assistance had been provided, the Trial Chamber issued an order for cooperation on 13 January 2014 directed to the Lebanese Government.²⁰¹

150. On 21 May 2014, the Badreddine Defence sought a further order, in respect of material omitted from the scope of the initial Trial Chamber order.²⁰² The Trial Chamber granted this motion in part.²⁰³ While dealing with a Sabra Defence application on a similar issue, the Trial Chamber, on 27 March 2015, invited the Badreddine Defence to inform the Registrar of any request for assistance which had been the subject of a Trial Chamber decision and to which counsel believed a satisfactory answer had not been given.²⁰⁴

11. The separate proceedings against Hassan Habib Merhi and joinder with the *Ayyash, Badreddine, Oneissi and Sabra* case

151. Alongside the proceedings in the *Ayyash, Badreddine, Oneissi and Sabra* case, the Prosecutor initiated separate proceedings against a fifth Accused, Hassan Habib Merhi, in 2013, two years after the other four were indicted. The Trial Chamber joined the *Merhi* case to that of the other four Accused but, because of the timing of the filing of the indictment against Mr Merhi, this could occur only after the trial had commenced. Notable procedural steps before the joinder are summarised below.

¹⁹⁹ F1177, *Requête de la Défense de M. Badreddine aux fins d'obtenir la coopération du Liban*, 24 October 2013; see also F1300, Observations of the Badreddine Defence relating to the Response of the Lebanese Authorities to the Instructions from the Presiding Judge of the Trial Chamber, 7 January 2014.

²⁰³ Second order to cooperate and provide information sought by Badreddine Defence.

²⁰⁴ Decision extending timeline for the enforcement of orders on outstanding Defence requests for assistance.

(a) Indictment, arrest warrants and decision to hold trial in absentia

152. On 8 February 2012, the outgoing Prosecutor, Mr Bellemare, sought the Pre-Trial Judge's leave to add Mr Merhi as a fifth co-accused on the indictment against Mr Ayyash, Mr Badreddine, Mr Oneissi and Mr Sabra, relating to the attack on 14 February 2005.²⁰⁵

153. The Pre-Trial Judge denied the application, on 13 March 2012, finding that a separate indictment would be required against a new accused person.²⁰⁶ Almost nine months later, on 8 October 2012, the new Prosecutor, Mr Norman Farrell, filed an indictment against Mr Merhi. However, he withdrew it on 7 December 2012 after discussing a number of issues with the Pre-Trial Judge.²⁰⁷

154. Six months later, on 5 June 2013, the Prosecutor submitted another indictment against Mr Merhi for confirmation by the Pre-Trial Judge and asked the Pre-Trial Judge to issue arrest warrants for Mr Merhi.²⁰⁸ He submitted two corrigenda to the indictment, on 20 June 2013 and 25 July 2013.²⁰⁹ On 29 July 2013, the Prosecution applied to present additional material in support of the indictment filed on 5 June 2013.²¹⁰

155. On 31 July 2013, the Pre-Trial Judge authorised the filing of corrigenda to the indictment and of the additional supporting material, and confirmed the indictment against Mr Merhi.²¹¹ The Prosecutor, in the indictment, charged Mr Merhi with participating in a conspiracy aimed at committing a terrorist act, and as being an accomplice to the intentional homicide of Mr Hariri and

²¹¹ Pre-Trial Judge decision on 5 June 2013 indictment.

21 others who were killed in the attack, and the attempted intentional homicide of the 226 injured people.²¹²

156. The Pre-Trial Judge ordered that the indictment remain confidential until it had been effectively served on Mr Merhi.²¹³ On the same day, the Pre-Trial Judge also issued national and international warrants for his arrest.²¹⁴

157. On 3 October 2013, the Lebanese Prosecutor-General informed the Special Tribunal's President of the unsuccessful but continuing measures taken to locate Mr Merhi.²¹⁵

158. On 10 October 2013, the President found that reasonable attempts had been made by the Tribunal and Lebanese authorities to serve the indictment and arrest warrants on Mr Merhi.²¹⁶ He ordered the 'authorities of Lebanon' to effect alternative service on the Accused by public advertisement, namely to take all reasonable steps to inform the public of the indictment and call upon the Accused to surrender to the Special Tribunal.²¹⁷

159. The confidentiality of the indictment was then partially lifted by the Pre-Trial Judge.²¹⁸ Advertisements listing the charges against the Accused were published in five different newspapers in Lebanon,²¹⁹ and on 14 October 2013, the Special Tribunal issued a public service announcement informing the Accused of his rights and encouraging the public to provide information concerning his whereabouts.²²⁰ The advertisement poster is reproduced below:

²¹⁹ Decision to hold trial *in absentia* 20 December 2013.

²²⁰ Public Service Announcement by the Special Tribunal for Lebanon, 14 October 2013; Decision to hold trial *in absentia* 20 December 2013.

160. Given Mr Merhi's failure to appear before the Special Tribunal and the Lebanese Government's inability to apprehend him, on 25 November 2013, the Pre-Trial Judge seised the Trial Chamber under Rule 105 *bis* (A) to determine whether proceedings against him should be initiated *in absentia*.²²¹

161. The Trial Chamber acted rapidly, and sought written submissions from the Prosecution, the Accused and the Defence Office as to the application of Rule 106 (A) in the proceedings against the Accused, by 9 December 2013.²²² Just over three weeks after the Pre-Trial Judge's referral, on 20 December 2013, the Trial Chamber concluded that the Accused had absconded or otherwise

²²¹ Order to seise the Trial Chamber pursuant to Rule 105 *Bis* (A) to determine whether to initiate proceedings *in absentia*.

²²² Rule 106 scheduling order.

could not be found, and issued a reasoned written decision that the trial would proceed *in absentia* under Article 22 of the Statute and Rule 106 (A).²²³

162. While seised of the *in absentia* determination, and in the face of an upcoming trial, the Trial Chamber also issued an interim order on working languages in the *Merhi* case. On 17 December 2013, after receiving submissions from the Registry, Prosecution and Defence Office, the Trial Chamber designated English as the working language for filings made during the pre-trial phase in the *Merhi* case before the Trial Chamber. Filings could be made in French or Arabic if good cause was shown in advance, and translation of filings from English to French or Arabic would be done only with judicial authorisation.²²⁴

163. On 30 January 2014, the Trial Chamber limited the application of its interim order to a limited number of pre-trial filings before it, and stated that in other respects it would apply the working language regime set out in the Pre-Trial Judge's decision of 16 September 2011 in the *Ayyash* case.²²⁵

164. On 10 February 2014—the day before the Trial Chamber joined the two cases after a pre-scheduled hearing on the issue—and in the pre-trial proceeding then before the Pre-Trial Judge, the Pre-Trial Judge ruled that the same working language regime would apply in pre-trial proceedings before him in the pre-trial phase of the *Merhi* case as those set out in his decision of 16 September 2011 in the *Ayyash* case.²²⁶ At that stage there were parallel pre-trial proceedings in both chambers in respect of Mr Merhi's case; the trial in the *Ayyash* case, however, had commenced weeks earlier, on 16 January 2014.

(b) Assignment of counsel and changes of assignment

165. On 20 December 2013, the Head of Defence Office assigned Mr Mohamed Aouini as lead counsel for Mr Merhi.²²⁷ On 30 December 2013, he also assigned Mr Jad Khalil and Ms Dorothée Le Fraper du Hellen as co-counsel for Mr Merhi.²²⁸

²²³ Decision to hold trial *in absentia* 20 December 2013.

²²⁴ Decision on languages in the *Merhi* case.

²²⁵ Second decision on languages in the *Merhi* case.

²²⁶ Pre-Trial Judge decision on languages in the *Merhi* case.

²²⁷ STL-13-04/I/PTJ, *Prosecutor v. Merhi*, F0039, Assignment of a Counsel for the *In Absentia* Proceedings Held Pursuant to Rule 106 of the Rules, 20 December 2013.

²²⁸ STL-13-04/I/PTJ, *Prosecutor v. Merhi*, F0049, Assignment of Co-counsel, 30 December 2013.

166. The mandate of the Special Tribunal's first Head of Defence Office, Mr François Roux, expired on 28 February 2018 and he was not reappointed to the position. On 8 June 2018, the United Nations Secretary-General appointed Ms Le Fraper du Hellen as the Special Tribunal's new Head of Defence Office. On 29 June 2018, her assignment as co-counsel for Mr Merhi was withdrawn, after the Acting Head of Defence Office consulted the Trial Chamber.²²⁹

167. Over the following months, the Trial Chamber exercised its duty to ensure the Accused's right to effective representation by seeking submissions, holding meetings and making practical suggestions on how the new Head of Defence Office could avoid real or perceived conflicts of interest in her current supervisory functions, given her former role as co-counsel for Mr Merhi.²³⁰

(c) Joinder of Merhi and Ayyash and others cases

168. On 18 December 2013, the Prosecution asked the Pre-Trial Judge to refer to the Trial Chamber the possible joinder under Rule 70 (B) of the cases of *Ayyash and others* and that of *Merhi*.²³¹

²²⁹ F3701, Withdrawal of the Assignment of Ms Dorothée Le Fraper du Hellen, Co-counsel of the Defence team for Mr Hassan Habib Merhi, pursuant to Article 34 (A) of the Directive on the Appointment and Assignment of Defence Counsel, 29 June 2018.

²³⁰ On 10 and 28 September 2018, the Presiding Judge of the Trial Chamber placed on the record correspondence dated 29 June, 24 August, 31 August and 5 September 2018, primarily concerning the new Head of Defence Office's decision to delegate some of her supervisory functions—namely concerning Mr Merhi's legal team—to the Deputy Head of Defence Office, Publication of correspondence on Head of Defence Office potential conflict of interest; Addendum to publication of correspondence on Head of Defence Office potential conflict of interest. On 21 September 2018, the Trial Chamber sought submissions from the Parties, Head of Defence Office and Deputy Head of Defence Office on this issue, Order seeking submissions on Head of Defence Office potential conflict of interest. On 5 October 2018, the Trial Chamber instructed the Head of Defence Office to provide details of the alternative supervisory mechanism she mentioned in her submissions, after she revoked the delegation of duties to the Deputy Head of Defence Office, Order seeking explanation of alternative supervision mechanism from Head of Defence Office. On 11 October 2018, the Presiding Judge of the Trial Chamber notified the Parties and the Legal Representatives of Victims of a proposed amendment to Rule 57, Notification of proposed amendment to Rule 57. On 14 February 2019, the Trial Chamber issued an internal memorandum questioning the Head of Defence Office's suggestion of appointing an independent consultant to monitor the effectiveness of the Accused's representation and make recommendations to the Head of Defence Office; instead, the Trial Chamber suggested the appointment of an *amicus curiae*, Internal memorandum to Head of Defence Office on monitoring effective legal representation. On 22 February 2019, the Head of Defence Office informed the Trial Chamber that a consultant had already been appointed in December 2018, and that she would implement any recommendations made by the consultant regarding Mr Merhi's representation; however, she maintained her opposition to delegating the supervision of counsel for the other Accused, F3764, Internal Memorandum – Response to the Internal Memorandum from the Trial Chamber of 14 February 2019, 19 March 2019.

²³¹ STL-13-04/I/PTJ, *Prosecutor v. Merhi*, F0033, Prosecution Request for Rule 89 (E) Referral of the Matter of Joinder, 18 December 2013; F1272, Prosecution Notice of Request for Pre-Trial Judge to Refer the Matter of Joinder of the Merhi Case to the Ayyash et al. case to the Trial Chamber, 18 December 2013.

169. The Merhi Defence responded on 30 December 2013, opposing the referral.²³² On the same day, the Prosecution applied to the Trial Chamber, in the *Ayyash* case, asking it to join the two cases under Rule 70.²³³ The Pre-Trial Judge referred the issue to the Trial Chamber on 2 January 2014.²³⁴

170. In the meantime, on 8 January 2014—eight days before the commencement of the trial of *Prosecutor v. Ayyash, Badreddine, Oneissi and Sabra*—the Prosecution filed its pre-trial brief in the separate case against Mr Merhi.²³⁵

171. The Trial Chamber held a preliminary hearing on the issue on 14 January 2014, and invited counsel for Mr Merhi to participate in the ongoing *Ayyash* proceedings as ‘interested observers’.²³⁶ It set a deadline of 31 January 2014 for submissions by the Merhi Defence on the issue of a joinder.²³⁷

172. The Merhi Defence’s response of 30 January 2014, while not opposing joinder, emphasised the necessity of completing the pre-trial phase in the *Merhi* case, but before the Pre-Trial Judge, to protect Mr Merhi’s rights.²³⁸ On 4 February 2014, the Head of Defence Office filed an observation supporting the Merhi Defence’s application to maintain pre-trial proceedings before the Pre-Trial Judge.²³⁹ The effect of this application, if accepted, would have been separate proceedings before two chambers in respect of the five Accused, but with an adjourned trial against four of them.

173. On 11 February 2014, the Trial Chamber held a joint hearing in the two cases to decide the issue of joinder. The same day, and with substantial written reasons filed on 25 February 2014, the

²³⁹ STL-13-04/PT/TC, *Prosecutor v. Merhi*, F0076, Observations from the Head of Defence Office on Maintaining the Pre-Trial Proceedings in the Merhi Case before the Pre-Trial Judge, 4 February 2014.

Trial Chamber, acting under Rule 70 (A),²⁴⁰ decided that the two cases should be joined and tried on the same indictment, and postponed resumption of the trial until at least early to mid-May 2014.²⁴¹

174. After consultation with the Pre-Trial Judge under Rule 70 (C),²⁴² the Trial Chamber also decided on the division of tasks between itself and the Pre-Trial Judge, in assisting the Parties—particularly the Merhi Defence—to prepare for trial.

175. Specifically, it decided that it would perform all pre-trial functions that were not within the Pre-Trial Judge's exclusive competence. His exclusive competence was confined to questioning anonymous witnesses, hearings on security interests of States and other international entities and submissions on information not subject to disclosure without consent of the provider. In addition, the Trial Chamber would continue to consult with the Pre-Trial Judge on his possibly performing certain functions that he may more appropriately perform, namely unique investigative opportunities, exceptional gathering of evidence, taking depositions and ruling on applications for the status of participating victims.²⁴³

176. On 31 March 2014, the Trial Chamber certified for appeal its decision on the joinder of the two cases.²⁴⁴ On 21 May 2014, the Appeals Chamber unanimously dismissed the Merhi Defence Appeal.²⁴⁵

177. On 12 February 2014, the Trial Chamber ordered the Prosecution to file a consolidated indictment by 7 March 2014; it maintained 14 February 2014 as the date for filing preliminary motions challenging the separate indictment against Mr Merhi.²⁴⁶

²⁴⁰ Rule 70 (A) provides that 'Two or more crimes may be joined in one indictment if the conduct falls within Article 1 of the Statute and the alleged crimes were committed by the same accused.'

²⁴⁴ Certification decision on joinder.

²⁴⁵ Appeal decision on joinder.

²⁴⁶ T. 12 February 2014, pp 26-27, 48.

178. On 14 February 2014, the Merhi Defence filed a preliminary motion on defects in the form of the indictment, arguing that it lacked specificity regarding important points of the charges.²⁴⁷ The Trial Chamber dismissed the motion on 28 March 2014.²⁴⁸

179. On 4 March 2014, the Trial Chamber held a status conference, and issued an oral decision on the timeframe for the Merhi Defence to seek the recall of witnesses.²⁴⁹

180. On 7 March 2014, the Prosecution filed a consolidated indictment, and consolidated witness and exhibit lists, containing 462 witnesses and 6,707 exhibits.²⁵⁰ On 25 April 2014, the Merhi Defence filed a motion alleging defects in the consolidated indictment.²⁵¹ On 22 May 2014, the Trial Chamber dismissed this motion.²⁵²

181. Meanwhile, in an attempt to facilitate the Merhi Defence's preparation for trial, the Presiding Judge held case management meetings with the Merhi Defence, Prosecution, Registry officials and the Defence Office. These meetings occurred on 8 January, and 14 and 21 February 2014. The aim was to ensure that the Merhi Defence would have adequate resources to prepare of trial in the event of a joinder and a resumed joined trial.²⁵³

182. The Merhi Defence, however, complained about this and sought the suspension of these meetings.²⁵⁴ On 1 April 2014, the Trial Chamber dismissed this complaint against holding regular case management meetings outside of court hearings.²⁵⁵

183. On 10 April 2014, the Trial Chamber held another status conference, and issued various oral decisions, for example setting the date for a pre-trial conference and for the Merhi Defence to

submit its pre-trial brief, and extending time limits for the Merhi Defence to file its notices regarding expert witnesses.²⁵⁶

184. On 17 April 2014, at the Prosecution's motion and as a consequence of the trial now proceeding on a 'consolidated indictment', the Trial Chamber issued new domestic and international arrest warrants against all five Accused.²⁵⁷

185. On 12 May 2014, the Trial Chamber held another status conference, during which it ordered that hearings in the *Ayyash and others* trial resume on 18 June 2014,²⁵⁸ and certified this decision for interlocutory appeal.²⁵⁹ The Merhi Defence appealed the decision on 22 May 2014.²⁶⁰ The Appeals Chamber confirmed that the trial could commence on the date set by the Trial Chamber.²⁶¹

186. The Merhi Defence filed its pre-trial brief on 26 May 2014,²⁶² and on 16 June 2014 the Trial Chamber held a pre-trial conference preceding the resumption of trial.²⁶³

187. The trial resumed on 18 June 2014.²⁶⁴ The Trial Chamber noted that, before it joined the two cases, it had received 214 exhibits into evidence, heard the live evidence of 15 witnesses and 15 witness statements were admitted into evidence without the witness being required to give live evidence. It declared admissible the statements of a further 33 witnesses, without requiring them to attend for cross-examination. It noted that the Merhi Defence could ask it to reconsider these decisions and to seek the recall of any of the witnesses for cross-examination.²⁶⁵ The Merhi Defence sought neither the reconsideration nor the recall of any of the witnesses.

188. The Prosecutor and Prosecution counsel made opening statements in the case against Mr Merhi on this day.²⁶⁶ The Merhi Defence made its opening statement the following day.²⁶⁷

12. Mustafa Badreddine's reported death, termination of the proceedings and amending the consolidated indictment

189. On 13 May 2016, Lebanese media reported that 'Haji Mustafa Badreddine' had been killed in an explosion in Syria, while commanding Hezbollah fighters near Damascus.²⁶⁸

190. The Trial Chamber held a hearing on this matter on 31 May 2016 and 1 June 2016, during which the Prosecution and counsel for Mr Badreddine led evidence of his alleged death.²⁶⁹ At the end of the hearings, the Trial Chamber by majority, with Judge Braidy dissenting, held in a decision delivered in court—followed by written reasons—that sufficient evidence had not yet been presented to establish Mr Badreddine's death and therefore terminate the proceedings against him. For this reason the decision was termed an 'interim decision'.²⁷⁰

191. It decided that the trial would continue pending additional material being received in response to the Prosecution's outstanding requests for assistance to the Lebanese Government.²⁷¹ These included a request for a death certificate and firm evidence that he was deceased.

192. On the same day, on 1 June 2016, counsel for Mr Badreddine sought certification, under Rule 126 (C), to appeal the Trial Chamber's decision and sought a stay of proceedings pending the resolution of the appeal.²⁷² The Trial Chamber heard further submissions from Defence counsel the next day, 2 June 2016.²⁷³ It ordered the Badreddine Defence to file any application for certification to appeal the interim decision within 24 hours of the filing of the Trial Chamber's written reasons, and adjourned the proceedings for the remainder of the week.²⁷⁴

²⁷³ Badreddine Defence Submission, T. 2 June 2016, pp 2-33.

²⁷⁴ Order setting a time limit for filing requests for certification.

193. The Trial Chamber's written reasons, and Judge Braidy's written dissent, were issued on 7 and 8 June 2016, respectively.²⁷⁵ The Trial Chamber reiterated that it was premature to conclude that Mr Badreddine was deceased²⁷⁶—particularly when the Prosecution's request for a number of forms of official proof, including a death certificate, from the Government of Lebanon was still outstanding.²⁷⁷ It held that neither counsel for Mr Badreddine nor the other Accused would suffer any prejudice as a result of deferring the determination of the matter, to give the Lebanese Government time to obtain the additional material.²⁷⁸

194. On 8 June 2016, counsel for Mr Badreddine, joined by the Defence of the other four Accused and the Head of Defence Office, filed an application for certification to appeal the decision of 7 June 2016, renewing its application of 1 June 2016.²⁷⁹ The Defence argued that continuing the trial without a final legal determination of the issue of Mr Badreddine's death could result in unfairness because the Trial Chamber may lack personal jurisdiction to continue hearing the case.²⁸⁰ The Prosecution responded on 8 June 2016 and the Legal Representatives of Victims filed their response and observations on 9 June 2016.²⁸¹ On the same day, the Trial Chamber certified the issue for interlocutory appeal.²⁸²

195. The Badreddine Defence filed its interlocutory appeal on 15 June 2016, additionally asking that the proceedings be suspended pending its resolution.²⁸³ It was supported by the Head of

Defence Office and joined by the Ayyash, Merhi and Oneissi Defence.²⁸⁴ The Prosecution and Legal Representatives of Victims opposed the appeal.²⁸⁵ While the Prosecution did not oppose the application to suspend the proceedings, the Legal Representatives of Victims submitted that such a suspension should be ordered only if certain conditions were met.²⁸⁶

196. On 21 June 2016, the Appeals Chamber, with Judges Baragwanath and Nsereko dissenting, granted the suspensive relief.²⁸⁷ The Appeals Chamber's written reasons followed on 23 June 2016.²⁸⁸

197. On 30 June 2016, the Badreddine Defence asked the Appeals Chamber to lift the suspensive effect of its previous decision on the trial proceedings, to allow the Trial Chamber to receive and consider a certified copy of Mr Badreddine's death certificate and a medical report annexed to it.²⁸⁹ This was opposed by the Prosecution.²⁹⁰ On 1 July 2016, the Trial Chamber asked the Appeals Chamber for access to the additional documents, appended confidentially to the Badreddine Defence motion.²⁹¹

²⁸⁷ Decision on Badreddine Defence request for suspensive effect of its interlocutory appeal against the Trial Chamber's decision regarding Mr Badreddine's death.

²⁸⁸ Reasons for decision on Badreddine Defence request for suspensive effect of its interlocutory appeal, with the dissenting opinion of Judge Baragwanath and Judge Nsereko.

²⁸⁹ F0013-AR126.11, Public Redacted Version of Badreddine Request for Lifting of Suspensive Effect in re. Interlocutory Appeal of the Interim Decision on the Death of Mr Mustafa Amine Badreddine, 30 June 2016.

²⁹⁰ F0015-AR126.11, Redacted Version of the Corrected Version of Prosecution Response to the Badreddine Request for Lifting of Suspensive Effect in re Interlocutory Appeal of the Interim Decision on the Death of Mr Mustafa Amine Badreddine, filed 4 July 2016, 6 July 2016.

²⁹¹ F0014-AR126.11, Request to Appeals Chamber for Access to Documents Relating to the Death of Mustafa Amine Badreddine, 1 July 2016.

198. On 11 July 2016, the Appeals Chamber—with Judges Baragwanath and Nsereko dissenting—granted the appeal, finding that Mr Badreddine’s death had been sufficiently proven on the evidence presented.²⁹²

199. It directed the Trial Chamber to terminate the proceedings against Mr Badreddine, without prejudice to resume the proceedings, if evidence that he was alive was adduced in the future.²⁹³ On the same day, the Trial Chamber terminated the proceedings against Mr Badreddine without prejudice, and ordered the Prosecution to file an amended consolidated indictment.²⁹⁴ As noted above, the operative amended consolidated indictment was filed on 12 July 2016.²⁹⁵

13. The trial proceedings, including the Prosecution’s case and motion for a judgment of acquittal

200. The Prosecution called its first witnesses on 22 January 2014.²⁹⁶ It completed the presentation of its evidence on 7 February 2018, after the evidence of 269 witnesses was received, and 2,487 exhibits had been tendered into evidence.²⁹⁷

201. Some relevant procedural matters occurring during the trial are highlighted below.

(a) In-court summaries of evidence admitted under Rules 154, 155 and 156

202. In its directions on the conduct of the proceedings, the Trial Chamber ordered the Parties to read into the record the summaries of tendered witness statements, and to disclose this summary one day in advance.²⁹⁸ During the trial, the Trial Chamber also adopted a practice in which the Parties summarised the content of any documents tendered under Rule 154, and where possible displayed relevant portions of the document for public broadcast. This was also a procedural innovation in international criminal law proceedings. The Trial Chamber explained:

²⁹² Interlocutory appeal decision on the death of Mr Badreddine and termination of proceedings, para. 53, disposition; F0019-AR126.11, Dissenting Opinion of Judge Daniel David Ntanda Nsereko, 11 July 2016; F0020-AR126.11, Dissenting Opinion of Judge Baragwanath on the Appeals Chamber’s “Decision on Badreddine Defence interlocutory appeal of the interim decision regarding Mr Badreddine’s death and termination of proceedings”, 13 July 2016.

²⁹³ Interlocutory appeal decision on the death of Mr Badreddine and termination of proceedings, para. 53, disposition.

²⁹⁴ Order terminating proceedings against Mr Badreddine without prejudice and ordering the filing of an amended consolidated indictment.

²⁹⁵ Amended consolidated indictment.

²⁹⁶ Evidentiary Matters, T. 22 January 2014, p. 5.

²⁹⁷ Procedural matters, T. 7 February 2014, p. 69.

²⁹⁸ Directions on the conduct of the proceedings, para. 8.

The public policy purpose of this, as at the ICTY, is to allow those following the proceedings—such as the public and the media—to better understand the evidence. It also assists the Trial Chamber, the Parties and Legal Representative of Victims in contextualising the evidence, in summarised form, in the transcript.²⁹⁹

203. It also noted the considerable saving of court time by admitting the evidence of numerous witnesses under Rules 155 and 156 and that:

The time taken to read summaries of their statements onto the record is but a tiny percentage of the time that would have been required for oral testimony. It also guarantees the transparency of the proceedings.

The right to a public hearing, unlike other procedural rights, involves more than the interest of the Accused. It also ensures both the public's right to know and the integrity of the judicial process.

The public filings, including the Trial Chamber's decisions, on the admissibility of evidence declared admissible under Rules 154, 155 and 156 do not necessarily of themselves properly inform the public about the content of the written evidence. As their focus is on the relevance and probative value of the evidence proposed for admission, the contents of the relevant statements or documents are not always or sufficiently summarised in those decisions or submissions. Moreover, some evidence is subject to protective measures ordered under Rule 133 and is redacted or not made public. Furthermore—unlike transcripts—evidence admitted under Rules 154, 155 and 156 is not, pursuant to a decision of the Registrar, available on the Special Tribunal's website.³⁰⁰

(b) Amending the directions on the conduct of proceedings to allow mid-trial thematic summaries

204. As another innovation in international criminal law proceedings, the Trial Chamber permitted the Parties and participating victims to present mid-trial thematic summaries.

205. After first hearing from the Parties and Legal Representatives of Victims, the Trial Chamber held that it may require or grant leave to the Parties and Legal Representatives of Victims

²⁹⁹ In-court summaries decision, para. 30.

³⁰⁰ In-court summaries decision, paras 32, 33, 34 (footnote omitted).

to present in-court mid-trial thematic summaries of the evidence. In a decision delivered in court on 4 April 2016—with written reasons filed on 7 April 2016—the Trial Chamber supplemented its Rule 130 (A) directions on the conduct of the proceedings to allow in court mid-trial summaries.³⁰¹

206. After noting the technicality and complexity of the proceedings, the Trial Chamber stated that:

Mid-trial thematic summaries could be very useful to the Trial Chamber. But, like an opening or closing statement, they are not evidence. And, as the Prosecution has submitted with regard to its thousands of pieces of circumstantial evidence, in most instances, ‘the potential relevance of these individual pieces may only be considered in the context of other related pieces of evidence’. Such summaries can therefore aid the Trial Chamber, Parties and participating victims—and the public—in understanding the voluminous evidence and how some pieces of evidence relate to other pieces and to the evidence as a whole. For this reason, they can promote the overall efficiency of the trial.³⁰²

207. The Trial Chamber further reasoned that:

Mid-trial summaries are extremely useful in contextualising a case as complex and technical as this one. They are permissible under Rule 130 (A). There is no prejudice to the rights of the Accused to a fair, impartial and expeditious trial. The Trial Chamber will therefore supplement its guidelines attached to the directions on the conduct of the proceedings to permit intermittent mid-trial thematic summaries of evidence.³⁰³

208. Several mid-trial summaries were made in court, for example by the Prosecution on 4 April 2016, and by the Sabra Defence on 9 September and 9 November 2016.³⁰⁴ The Sabra Defence also filed a written mid-trial thematic summary on 28 April 2017. The Trial Chamber formally authorised this on 29 November 2017.³⁰⁵

³⁰¹ Decision on periodic in-court summaries; In-court summaries decision.

³⁰² In-court summaries decision, para. 15 (footnote omitted).

³⁰³ In-court summaries decision, para. 38.

³⁰⁴ Prosecution submissions, T. 4 April 2016, pp 4-30; Sabra Defence submissions, T. 9 September 2016, pp 31-32, T. 9 November 2016, pp 27-50.

³⁰⁵ F3108, Request for Leave to File Defence Thematic Summary of Information Relevant to the Chamber in Relation to the False Claim of Responsibility, 28 April 2017; Decision allowing Sabra Defence supplement.

(c) Amending the decision on the working languages of the case

209. On 14 July 2016, on the Registrar's motion and after consulting the Parties and Legal Representatives of Victims, the Trial Chamber varied the Pre-Trial Judge's decision on the working language regime, which required that exculpatory material disclosed to the Defence under Rule 113 be in English and Arabic, and its original language, if that language is neither English nor Arabic.

210. This variation removed the costly requirement that all such material be translated into Arabic, and instead allowed the Defence to request translation into Arabic only when necessary.³⁰⁶

211. On 21 March 2018, after running its own technical tests, the Trial Chamber varied the Pre-Trial Judge's decision to allow for the addition of a French real time transcript of hearings, alongside the English one.³⁰⁷

(d) Disclosure issues

212. Issues relating to disclosure of Prosecution material to the Defence, as noted above, were far from resolved when the Trial Chamber, on 25 October 2013, received jurisdiction to try the case. During the trial, Defence counsel brought to the Trial Chamber's attention, and for its adjudication, a number of alleged violations of the Prosecutor's duties to disclose material that was either material to Defence preparations for trial or exculpatory, pursuant to Rules 110 (B) and 113

213. On a number of occasions, the Trial Chamber ordered the Prosecution to provide it with the material, *ex parte*, to allow the Trial Chamber to decide whether the material should be disclosed, or that it was exempt from disclosure, as for example, the internal work product of a Party, pursuant to Rule 111. Several times the Trial Chamber, after inspecting the material or samples of it, ordered its full or partial disclosure to the Defence.³⁰⁸ On other occasions, it ruled that the material had been properly disclosed.³⁰⁹

³⁰⁶ Decision on translating exculpatory material into Arabic.

³⁰⁷ Decision permitting French simultaneous transcription.

³⁰⁸ *For example*, Decision reconsidering decision on Oneissi Defence requests for assistance; Decision on Oneissi Defence request for assistance re mobile 095; Decision on disclosure re Andrew Donaldson's reports.

³⁰⁹ *For example*, Order to Prosecution to provide documents to Trial Chamber for review of internal work product categorisation and disclosure; Decision on Oneissi Defence requests for assistance; Decision denying the Sabra Defence application for disclosure of a UNHCR Internal Memorandum on Mr Wissam Al-Hassan.

(e) Rule 167 motion for acquittal at the end of the Prosecution case

214. At a case management meeting held on 2 February 2018, counsel for Mr Oneissi informed the Trial Chamber that he intended to move the Trial Chamber under Rule 167 to acquit Mr Oneissi.³¹⁰ As the Sabra Defence had left open the possibility that it might make a similar application, it was ordered to inform the Trial Chamber of its intention by 13 February 2018.³¹¹ The Trial Chamber scheduled hearings on the Oneissi Defence's motion to acquit for 20 and 21 February 2018.³¹²

215. The Prosecution's case was formally closed on 7 February 2018.³¹³ The Oneissi Defence confirmed its intention to move for acquittal, whereas counsel for the other Accused informed the Trial Chamber that they would not make submissions under Rule 167.³¹⁴

216. On 8 February 2018, the Trial Chamber ordered the Oneissi Defence to file a skeleton outline of its arguments by 16 February 2018 and the Prosecution to make a similar filing by 19 February 2018,³¹⁵ which they did.³¹⁶

217. The Oneissi Defence made oral submissions in support of its motion to acquit on 20 and 21 February 2018.³¹⁷ The Prosecution responded on 21 and 22 February 2018.³¹⁸ The same day, on 22 February, the Trial Chamber ordered the parties to file written submissions by 27 February 2018.³¹⁹ These were duly filed.³²⁰

³¹⁰ Scheduling Order Regarding Close of Prosecution Case and Defence Submissions under Rule 167, para. 2; Procedural Matters, T. 7 February 2018, pp 70-71.

³¹¹ Scheduling order on the close of the Prosecution case and Rule 167 submissions, paras 2, 5.

³²⁰ F3586, Public Redacted Version of the "Corrected Version of the Additional Submissions from the Oneissi Defence Pursuant to Rule 167 and to the Oral Order of the Trial Chamber dated 22 February 2018 Filed on 27 February 2018",

218. On 23 February 2018—before reaching a decision on the Oneissi Defence motion to acquit—the Trial Chamber ordered counsel for each Accused to state whether they would present a Defence case and file associated documents.³²¹ On 5 March 2018, the Oneissi Defence asked that this be suspended, pending a decision on its Rule 167 motion.³²² The Trial Chamber dismissed the Oneissi Defence application the next day.³²³

219. The Trial Chamber denied the Oneissi Defence motion for a judgment of acquittal in a decision delivered in court on 7 March 2018, finding that the Prosecution had provided sufficient evidence upon which it could convict Mr Oneissi under all counts.³²⁴ The Oneissi Defence reiterated its application for suspension of the Rule 128 order pending the resolution of any appeal against the Rule 167 decision.³²⁵

220. On 14 March 2018, the Oneissi Defence sought certification from the Trial Chamber to appeal its decision of 7 March 2018 and asked for a stay in the proceedings until the appeal was resolved.³²⁶

221. The Legal Representatives of Victims filed observations on 29 March 2018; they submitted that the Trial Chamber should dismiss the certification request and deny the motion for suspension, noting that the victims sought an expeditious conclusion to the trial.³²⁷ The Prosecution replied the same day, also arguing for dismissal of the motion for a stay in proceedings.³²⁸ On 6 April 2018,

the Oneissi Defence replied to the Prosecution and the Legal Representatives of the Victims.³²⁹ The Trial Chamber dismissed the application for certification to appeal on 14 May 2018.³³⁰

14. Representation of victims during the trial and the presentation of the victims' case

(a) Decisions on victims' participation and legal representation

222. On 9 February 2012, the Victims' Participation Unit transmitted to the Pre-Trial Judge the applications of 73 people seeking the status of victim participating in the proceedings.³³¹ The Pre-Trial Judge granted this status to 58, finding *prima facie* evidence that they suffered physical, material or mental harm as a direct result of the attack on 14 February 2005.³³²

223. The Pre-Trial Judge decided that the victims authorised to participate in the proceedings could only do so through a legal representative, and that they formed a single group for the purpose of their legal representation before the Special Tribunal.³³³

224. On 16 May 2012, the Registrar, pursuant to the Pre-Trial Judge's decision, designated Mr Peter Haynes as lead Legal Representative, and Mr Mohammad Mattar and Ms Nada Abdelsater-Abusamra as Co-Legal Representatives, to represent the interests of the participating victims.³³⁴

225. In his second decision on victim participation of 3 September 2012, the Pre-Trial Judge granted a further nine applicants participating victim status.³³⁵ In his third decision on victim participation of 28 November 2012, the Pre-Trial Judge granted another applicant participating victim status.³³⁶ In a fourth decision on 2 May 2013, the Pre-Trial Judge denied four applications

³²⁹ F3618, Reply to the Responses of the Prosecution and of the Legal Representative of Victims to the "Requête de la Defence en certification de la décision de la Chambre en date du 7 mars 2018 rejetant la demande d'acquittement de M. Oneissi déposée en application de l'article 167", 6 April 2018.

³³⁶ Third decision on victim participation, para. 9.

for participating victim status as they had not demonstrated the required nexus between the harm they each claim to have suffered, and a crime pleaded within the indictment against the Accused.³³⁷

226. On 18 July 2014, in his fifth decision, the Pre-Trial Judge granted participating victim status to three new applicants who had applied late—as they had learned of the possibility to participate after the start of the trial, or had reconsidered their previous reluctance.³³⁸ In the decision the Pre-Trial Judge noted that while the Trial Chamber was now seised of the case, he and the Trial Chamber had decided, in consultation, that under Rule 86 the Pre-Trial Judge would continue to consider any new applications for participating victim status.³³⁹

227. On 6 November 2014, the Pre-Trial Judge granted participating victim status to two more applicants who were unaware, before the trial started, that they could participate in the proceedings.³⁴⁰ In his seventh victim participation decision, issued on 5 May 2015, the Pre-Trial Judge found the applications admissible although were overdue, and granted both applicants victim participation status.³⁴¹ In the eighth and final decision on victim participation issued on 13 July 2017, the Pre-Trial Judge granted participating victim status to one applicant unable to apply earlier for medical reasons.³⁴²

228. Over the course of the proceedings, the participating status of six victims was withdrawn either by the Pre-Trial Judge or the Trial Chamber—for four of them at the motion of the Legal Representatives of Victims following their deaths.³⁴³ The number of victims participating in the trial at the time of delivery of judgment was 70.³⁴⁴

³³⁷ Fourth Decision on victim participation.

³⁴⁴ *See also* para. 796.

(b) Decisions on modalities of victims' participation

229. Both the Pre-Trial Judge and the Trial Chamber, after hearing the Parties, issued guidelines governing the modalities of victims' participation in the proceedings, supplementing the existing applicable Rules.³⁴⁵

230. On 1 March 2012, the Registrar asked the Pre-Trial Judge for clarification, under Rule 84 (E), on whether the Legal Representatives of Victims were entitled to receive filings classified as 'confidential'.³⁴⁶ The Pre-Trial Judge invited the Parties to file responses to the Registrar's submission by 9 March 2012,³⁴⁷ which they did.³⁴⁸

231. On 28 March 2012, the Pre-Trial Judge invited the Parties, including the Victims' Participation Unit, to make additional submissions on participating victims' access to disclosure materials by 4 April 2012,³⁴⁹ which were then filed.³⁵⁰ On 18 May 2012, the Pre-Trial Judge granted the Legal Representatives of Victims access to all confidential filings and all material disclosed by the Prosecution, subject to any protective measures.³⁵¹ The Pre-Trial Judge also ruled on the modality of the victims' participation at the pre-trial stage, permitting them to attend and participate in meetings, status conferences and hearings, and to file motions or briefs on issues that affect their interests.³⁵²

232. On 1 November 2013, the Legal Representatives of Victims applied to the Trial Chamber to set out in concrete terms the modalities of victim participation at trial, and asked that the victims

³⁵¹ The Legal Representative were not entitled to receive documents classified as confidential and *ex parte*, or as under seal and *ex parte* with limited distribution; Decision on modalities of victim participation.

³⁵² Decision on modalities of victim participation.

be granted a number of procedural rights.³⁵³ The Prosecution and, in a consolidated submission, the Badreddine, Oneissi and Sabra Defence filed their observations on 18 November 2013.³⁵⁴ On 16 January 2014, as noted above, the Trial Chamber, acting under Rule 130 (A), issued directions on the conduct of the proceedings, including guidelines on the participation of victims in the trial.³⁵⁵

233. Consistent with the applicable Rules and directions, through their Legal Representatives, the participating victims made opening submissions, questioned witnesses, filed motions and observations, filed a final trial brief, presented closing arguments, received documents filed by the Parties and participated in status conferences and trial case management meetings.³⁵⁶

(c) Attendance of participating victims in court

234. On 4 November 2014, the Legal Representatives of Victims asked the Trial Chamber to elaborate on how they should seek permission for future attendance of participating victims, both public and confidential.³⁵⁷ The Trial Chamber issued general directions on the attendance of participating victims in the courtroom and permitted it on a case-by-case basis.³⁵⁸

235. Following applications by the Legal Representatives of Victims, 33 participating victims attended proceedings in the courtroom.³⁵⁹

(d) Presentation of the ‘Victims’ case’

236. On 3 May 2017, the Legal Representatives of Victims sought the Trial Chamber’s permission to call ten live witnesses and present the evidence of 18 other witnesses in written

statements, under Rules 155 or 158.³⁶⁰ On 10 May 2017, they sought leave to amend their witness list.³⁶¹ On 31 July 2017, the Trial Chamber granted the Legal Representatives of Victims' application to present their evidence.³⁶² The evidence was heard and received in August, September and December 2017.

15. Pre-defence conference, disqualification motion and presentation of the Oneissi Defence case

237. On 23 February 2018, as noted above, after the close of the Prosecution's case, the Trial Chamber ordered under Rule 128 that the Defence for each Accused state by 7 March 2018 whether they would present a defence case.³⁶³

238. On 5 March 2018, the Sabra Defence asked the Trial Chamber to call four witnesses under Rule 165; it further asked the Trial Chamber to suspend the Rule 128 scheduling order until the application was resolved.³⁶⁴ On the same day, the Oneissi Defence asked the Trial Chamber to suspend the order until determination of its motion for acquittal under Rule 167.³⁶⁵ On 6 March 2018, the Trial Chamber dismissed both applications and scheduled the pre-defence conference for 8 March 2018.³⁶⁶

239. On 7 March 2018, the Sabra Defence notified the Trial Chamber that it was not yet in a position to elect to present a case as it was awaiting the resolution of pending motions.³⁶⁷ The Merhi Defence stated that it did not intend to offer any evidence.³⁶⁸ The Ayyash Defence was unresponsive to the Rule 128 scheduling order. Only the Oneissi Defence elected to present a case,

³⁶⁰ F3116, Request of the Legal Representative of Victims to Call Witnesses and Tender Other Evidence and for Guidance on Its Disclosure Obligations, in Compliance with the Judge Rapporteur's 11 April 2017 Order, with Confidential Annexes A, B and C, 3 May 2017, paras 2, 33.

³⁶¹ F3132, Request of the Legal Representative of Victims to add four Witnesses to its Witness List, with confidential Annex A, 10 May 2017.

³⁶² Decision on the Legal Representatives' application to call evidence.

³⁶³ Rule 128 scheduling order on presentation of a Defence case.

³⁶⁴ F3591, Sabra Defence Request Pursuant to Rule 165 and for Suspensive Effect of Rule 128 Order, 5 March 2018. The Rule 165 motion is further discussed in sub-section (16) 'One witness called by the Trial Chamber under Rule 165'.

³⁶⁵ F3592, Oneissi Defence Request for Suspension of Rule 128 Scheduling Order, 5 March 2018.

³⁶⁶ Order scheduling a pre-defence conference and dismissing suspension requests.

³⁶⁷ F3597, Notification in Relation to the Trial Chamber's 'Scheduling Order to the Defence under Rule 128', 7 March 2018.

³⁶⁸ F3598, Merhi Defence Submissions Pursuant to Rule 128 of the Rules of Procedure and Evidence, 7 March 2018.

consisting of two witnesses—one expert witness and one witness providing political background evidence.³⁶⁹

240. The Trial Chamber held a pre-defence conference on 8 March 2018.³⁷⁰ At the conference, counsel for Mr Merhi and Mr Oneissi confirmed their positions, and the Ayyash Defence informed the Trial Chamber that it would not present a case.³⁷¹ The Trial Chamber ordered the Sabra Defence to notify it by 9 March 2018 whether it would present a case,³⁷² to which the Sabra Defence responded that it would not present one.³⁷³

241. On 12 April 2018, the Oneissi Defence filed a motion to disqualify the entire Trial Chamber, Judges Re, Nosworthy and Braidy, alleging perceived bias against the Defence since the close of the Prosecution's case.³⁷⁴ The next day, the Special Tribunal's President designated a Panel to rule on the matter, composed of Judges Nsereko, Akoum and Lettieri.³⁷⁵ On 16 April 2018, the Panel invited Judges Re, Nosworthy and Braidy to submit their views on the motion.³⁷⁶

242. On 18 April 2018, Judges Re and Nosworthy asked the President to set aside the designation of Judges Akoum and Lettieri to the Panel and to re-designate the Panel, submitting that the two alternate judges in the main trial have an irreconcilable conflict of interest in participating in the disqualification Panel.³⁷⁷ The following day, the President invited Judges Akoum and Lettieri, and the Oneissi Defence, to submit their views on the application of Judges Re and Nosworthy.³⁷⁸ On 20 April 2018, Judges Akoum and Lettieri stated that while they would have considered the matter in an independent and impartial manner, they nonetheless wished to be

³⁷² Pre-Defence Conference, T. 8 March 2018, p. 52.

³⁷³ Counsel for Mr Sabra confirmed their election not to call a case, and notified to the Trial Chamber via email on 9 March 2018 that the Sabra Defence would not lead evidence, Pre-Defence Conference, T. 22 March 2018, pp 3-4.

³⁷⁴ F3628, Public Redacted Version of Oneissi Defence Rule 25 Motion for the Disqualification and Withdrawal of Presiding Judge David Re, Judge Janet Nosworthy, and Judge Micheline Braidy, 12 April 2018.

³⁷⁵ Order designating a panel under Rule 25 (C).

³⁷⁶ Order inviting Judge's views.

³⁷⁷ F3633, Application by Judges Re and Nosworthy to Set Aside the President's Designation of Alternate Judges Akoum and Lettieri to a Panel Designated Pursuant to Rule 25 (C) on the Oneissi Defence's Application to Disqualify the Three Trial Chamber Judges, 18 April 2018.

³⁷⁸ Order for submissions on request to set aside panel judges, para. 20.

excused from the disqualification Panel.³⁷⁹ The Oneissi Defence filed observations on the submissions of Judges Akoum and Lettieri on 23 April 2018.³⁸⁰

243. On 25 April 2018, the President designated a new Panel consisting of Judges Baragwanath, Chamseddine and Nsereko.³⁸¹ On 26 April 2018, Judges Re, Nosworthy and Braidy were invited to submit their views on the disqualification motion,³⁸² which they did on the same day.³⁸³ The Oneissi Defence, on the same day, filed its observation that the composition of the new Panel effectively nullified its right to impartial appellate review as it was composed of a majority of the Appeals Chamber's judges.³⁸⁴ On 1 May 2018, the Oneissi Defence sought leave to reply, and replied, to the views of Judges Re, Nosworthy and Braidy.³⁸⁵ On 4 May 2018, the Panel dismissed the motion for disqualification in its entirety, finding that the allegations of bias were unfounded.³⁸⁶

244. The two Oneissi Defence witnesses testified in May and June 2018.³⁸⁷ The Trial Chamber granted, in one case in part, two Oneissi Defence applications to amend its witness and exhibit lists.³⁸⁸ The Oneissi Defence updated exhibit list contained 116 exhibits.³⁸⁹

16. One witness called by the Trial Chamber under Rule 165

245. On 5 March 2018, the Sabra Defence moved the Trial Chamber³⁹⁰ to order the attendance of four former Prosecution investigators—involved in investigating the disappearance of

³⁷⁹ F3637, Submissions by Judges Akoum and Lettieri, 20 April 2018.

Mr Ahmad Abu Adass—to testify as Chamber witnesses under Rule 165.³⁹¹ In a decision delivered in court on 8 March 2018, the Trial Chamber mentioned several pending motions by the Sabra Defence, including the Rule 165 motion.³⁹²

246. Acting under the misapprehension that the Trial Chamber had dismissed the motion, the Sabra Defence filed a motion for the Trial Chamber to reconsider its ‘decision’ on the following day.³⁹³ During the pre-defence conference on 22 March 2018, the Trial Chamber clarified that the motion was still pending.³⁹⁴ On 26 March 2018, the Prosecution filed a motion asking that the Trial Chamber dismiss the Sabra motion.³⁹⁵ The Sabra Defence filed a reply to the Prosecution’s response on 6 April 2018.³⁹⁶

247. On 13 April 2018, the Trial Chamber granted the motion in part, and ordered the attendance of Mr Michael Taylor, Chief of Investigations at the Office of the Prosecutor of the Special Tribunal between 2010 and 2015.³⁹⁷ The Prosecution sought reconsideration of the Trial Chamber’s order for Mr Taylor to testify on 29 May 2018.³⁹⁸ The Sabra Defence responded on 7 June 2018,³⁹⁹ and the Prosecution filed a reply on 12 June 2018.⁴⁰⁰ On the same day, the Trial Chamber dismissed the Prosecution’s motion for reconsideration and scheduled the Mr Taylor’s testimony for 25 July 2018.⁴⁰¹ Mr Taylor testified on 25 and 26 June 2018.⁴⁰²

³⁹¹ Rule 165 ‘Power of Chambers to Order Production of Additional Evidence’ provides that, ‘After hearing the Parties, the Trial Chamber may, *proprio motu* or at the request of Party, order either Party or a victim participating in the proceedings to produce additional evidence. It may, after hearing the Parties, *proprio motu* summon witnesses and order their attendance’.

17. Final trial briefs, closing submissions and the end of trial

248. On 11 April 2018, the Trial Chamber extended the word limits for the final trial briefs, allowing 150,000 words for the Prosecution, 60,000 words for Defence of each of the Accused, and 45,000 words for the Legal Representative of Victims.⁴⁰³ On 12 June 2018, the Trial Chamber set final deadlines for filing these briefs.⁴⁰⁴

249. The Prosecution filed its final trial brief, seeking conviction on all counts, on 16 July 2018. The Legal Representatives of Victims also filed their final trial brief on 16 July 2018.⁴⁰⁵ The Prosecution filed a corrected version on 27 July 2018.⁴⁰⁶

250. The Ayyash, Sabra and Oneissi Defence filed their final trial briefs on 13 August 2018.⁴⁰⁷ The Merhi Defence filed its on 18 August 2018.⁴⁰⁸ These were followed by corrected versions filed by the Oneissi Defence on 23 August 2018 and 27 November 2018, and the Merhi Defence on 5 September 2018.⁴⁰⁹

251. The Prosecution made its oral closing submissions on 11, 12, 13 and 14 September 2018.⁴¹⁰ The Legal Representatives of Victims made their closing submissions on 14 September 2018.⁴¹¹ Closing submissions for the Ayyash Defence were made on 17 September 2018;⁴¹² for the Merhi

Defence on 18 and 19 September 2018;⁴¹³ for the Oneissi Defence on 19 and 20 September 2018;⁴¹⁴ and for the Sabra Defence on 21 September 2018.⁴¹⁵

252. The Trial Chamber adjourned for deliberations on 21 September 2018.⁴¹⁶

18. Ensuring the publicity of the proceedings

253. While the Trial Chamber's deliberations were ongoing, it also turned its attention to ensuring the public nature of the proceedings against the Accused.

254. On 23 October 2018, the Trial Chamber emailed the Parties, Legal Representatives of Victims and Defence Office—on behalf of counsel for the former Accused, Mr Badreddine—asking them to assess and seek agreement on the declassification or redaction of confidential exhibits in the case.⁴¹⁷ On 20 September 2019, the Trial Chamber ordered them to conclude these discussions and either reach an agreement or provide reasons for failing to do so.⁴¹⁸

255. The Trial Chamber also ordered the Parties, Legal Representatives of Victims, Registrar and Deputy Head of Defence Office to review their respective confidential filings⁴¹⁹ and either: seek their reclassification to public; file public redacted versions; or provide reasons for continuing confidentiality and or what steps have been taken to have it redacted or reclassified.⁴²⁰ The Trial Chamber issued further orders on the matter on 12 December 2019.⁴²¹

⁴¹⁹ The Registrar was additionally ordered to review filings from anyone external to the proceedings, and the Deputy Head of Defence Office was additionally ordered to review filings from Defence counsel for the former Accused, Mr Badreddine.

⁴²⁰ Decision and orders regarding confidentiality of filings, paras 12-13.

⁴²¹ Orders regarding declassification of exhibits.

B. ANNEX B: Glossary

ABBREVIATION	FULL NAME
Agreed facts	Nine facts recorded as agreed and uncontested between the Prosecution and the Defence, that the Trial Chamber may accept as being proven at trial against the Accused, as listed in Second decision on agreed facts (Merhi)
Art./Arts	Article/Articles
CCTV	Closed-circuit television
CD	Compact Disc
CDR	Call Data Records
Cell dump	Mr Philips explained a cell dump as follows in exhibit P549 (Expert report of John Edward Philips – Cell site analysis introduction), p. 105: ‘The police will then request the identities of all cells, on all networks, providing best server coverage of the salient locations and then request a list of calls using these cells over a particular time period from each network operator.’
CEO	Chief Executive Officer
CPR	Cardiopulmonary resuscitation
CST	Call sequence table
CT	Computerized Tomography
CV	<i>Curriculum Vitae</i>
Witness DHO + number, for example, ‘Witness DHO123’	Witness for the Defence of Hussein Hassan Oneissi (‘Defence Hariri Oneissi’)
DNA	Deoxyribonucleic acid
DVD	Digital Versatile Disc
ECCC	Extraordinary Chambers in the Courts of Cambodia
ECtHR	European Court of Human Rights

EPE	Electronic Presentation of Evidence
ERN	Evidence Registration Number
EUR	Euros
Exhibit 1D + number, for example, 'exhibit 1D123'	Ayyash Defence exhibit
Exhibit 1V + number, for example, 'exhibit 1V123'	Legal Representatives of Victims exhibit
Exhibit 2D + number, for example, 'exhibit 2D123'	Badreddine Defence exhibit
Exhibit 3D + number, for example, 'exhibit 3D123'	Merhi Defence exhibit
Exhibit 4D + number, for example, 'exhibit 4D123'	Oneissi Defence exhibit
Exhibit 5D + number, for example, 'exhibit 5D123'	Sabra Defence exhibit
fn./fns	Footnote/footnotes
GHz	Gigahertz
GPS	Global Positioning System
GSM	Global System for Mobile communication

IATA	International Air Transport Association
IBM	International Business Machines Corporation
ICC	International Criminal Court
ICCPR	International Covenant on Civil and Political Rights
ICJ	International Court of Justice
ICTR	International Criminal Tribunal for Rwanda

ICTY	International Criminal Tribunal for the former Yugoslavia
ID	Identification
IED	Improvised Explosive Device
IMEI	International Mobile Equipment Identity
IMSI	International Mobile Subscriber Identity
INSEAD	<i>Institut Européen d'Administration des Affaires</i>
IRMCT	International Residual Mechanism for Criminal Tribunals
ISF	Lebanese Internal Security Forces
Judicial notice facts	Nine facts judicially noticed by the Trial Chamber as listed in Decision on taking judicial notice
LAU	Lebanese American University
LBP	Lebanese pound
LED	Light-emitting diode
MEA	Middle East Airlines
Merhi Defence – Prosecution agreements	Seven facts as agreed between the Prosecution and the Merhi Defence, that the Trial Chamber may accept as being proven at trial against Mr Merhi, as listed in Second decision on agreed facts in UNIIIC reports (Merhi)
MFI (for example, number + MFI: 'P123 MFI')	A document that was presented and used in court, and identified on the court record through being 'marked for identification' either until its receipt into evidence, or its rejection by the Trial Chamber, as an exhibit.
mg	milligrams
MHz	Megahertz
MP	Member of Parliament
MTC	Mobile Telecommunications Company

N/A	Not applicable
NGO	Non-governmental organisation
no./nos	Number/numbers
Exhibit P + number, for example, 'exhibit P123'	Prosecution exhibit
p./pp	Page/pages
para./paras	Paragraph/paragraphs
PCIJ	Permanent Court of International Justice
PDF	Portable document format
PENT/PETN	Pentaerythritoltetranitrate
Witness PRH + number, for example, 'Witness PRH123'	A witness for the Prosecution ('Prosecution Rafik Hariri')
Prosecution	Office of the Prosecutor
PTSD	Post-Traumatic Stress Disorder
RDX	Research developed explosive (<i>see</i> exhibit P244 (Report of forensic investigations, Ministry of Justice, Netherlands Forensic Institute)) - cyclotrimethylenetrinitramine
RFA	Request for assistance – a formal communication from an international court or tribunal, including from its chambers, registry, prosecutor's office or defence, to an international institution or a government seeking a specified form of assistance
RSCSL	Residual Special Court for Sierra Leone
Rules	Rules of Procedure and Evidence of the Special Tribunal
Sabra Defence – Prosecution agreements	Eighteen facts as agreed between the Prosecution and the Sabra Defence, that the Trial Chamber may accept as being proven at trial against Mr Sabra, as listed in First decision on agreed facts in UNIIIC reports (Sabra) and Second decision on agreed facts in UNIIIC reports (Merhi)
SCSL	Special Court for Sierra Leone

D. ANNEX D: List of victims injured as a result of the attack on 14 February 2005

1. The Trial Chamber has found that 226 people were injured as a result of the explosion on 14 February 2005. Further, it has been satisfied beyond reasonable doubt that an act likely to cause the death of each of these 226 people was committed, which was prevented solely by circumstances beyond the perpetrator's or perpetrators' control. It has found Salim Jamil Ayyash guilty of attempted intentional homicide with premeditation by using explosive materials of these 226 people.

2. The names of 217 victims are listed below. Nine victims were granted confidential status or protective measures by the Pre-Trial Judge or the Trial Chamber, therefore their names are omitted from the list.

- 1) Mariam Mohammed Abbadi
- 2) Nasser Abboud
- 3) Hussam Akram Abdallah
- 4) Souad Fouad Abdel-Al-Karim
- 5) Majdi Rafik Abou-Najem
- 6) Christine Abou-Abdo
- 7) Raymond Maroun Abou-Chaaya
- 8) Hussein Abou-Kharroub
- 9) Nour-El-Hoque Abou-Mouhieddine
- 10) Shukrallah Mikhael Abou-Naqoul
- 11) Majed Abou-Nasr
- 12) Nada Abou-Younes
- 13) Hanna Nakhle Abou-Zeid

- 14) Sharif Issa Absi
- 15) Amer Meteeb Ahmad

E. ANNEX E: Agreements as to evidence and judicial notice of facts

1. Rule 122, ‘Agreements as to Evidence’, permits the Parties to agree that an alleged fact ‘is not contested, and, accordingly, a Chamber may consider such alleged fact as being proved, unless the Chamber is of the opinion that a more complete presentation of the alleged facts is required in the interests of justice, in particular the interests of the victims’. During the trial, the Trial Chamber accepted agreements as to evidence reached between the Prosecution and the Defence of some or all of the Accused. As detailed in the judgment, the Trial Chamber entered these as findings in the case, against one or more Accused persons, as applicable.

2. Under Rule 160 (A), the ‘Trial Chamber shall not require proof of facts of common knowledge but shall take judicial notice thereof’. The Trial Chamber took judicial notice of a number of facts of common knowledge and, unless otherwise stated, treated them as unchallenged and noted them in the judgment. The agreements as to evidence and the facts the subject of judicial notice are listed below.

1. Agreements as to evidence between the Prosecution and the Ayyash, Badreddine, Merhi, Oneissi and Sabra Defence concerning nine general facts

3. The Prosecution and the Ayyash, Badreddine, Merhi, Oneissi and Sabra Defence reached agreements as to evidence regarding the following nine facts:¹

- 1) In addition to killing Mr Rafik Hariri, the explosion killed 21 other persons listed in Schedule A of the Indictment;²
- 2) The explosion injured 226 persons listed in Schedule B of the Indictment;³
- 3) The video of the claim of responsibility was later broadcast on television;⁴
- 4) Mr Rafik Hariri was born on 1 November 1944 in the city of Sidon, Lebanon;⁵

¹ Second decision on agreed facts (Merhi).

² Agreed facts, no. (i). *See also* para. 1452 where the Trial Chamber accepted this agreed fact.

³ Agreed facts, no. (ii). *See also* para. 6835 where the Trial Chamber accepted this agreed fact.

⁴ Agreed facts, no. (iii).

⁵ Agreed facts, no. (iv).

- 5) Mr Rafik Hariri served as Prime Minister of Lebanon in five governments from 31 October 1992 to 4 December 1998, and from 26 October 2000 until his resignation on 26 October 2004;⁶
- 6) Mr Rafik Hariri was a prominent political figure in Lebanon;⁷
- 7) After his resignation, Mr Rafik Hariri started preparing for parliamentary elections which were due to start in late May 2005;⁸
- 8) Parliament is located at *Place de l'Étoile*, Beirut;⁹ and
- 9) In his armoured vehicle, Mr Rafik Hariri was accompanied by the Member of Parliament, Mr Bassel Fuleihan.¹⁰

2. Agreements as to evidence between the Prosecution, the Sabra Defence and, in part, the Merhi Defence, pertaining to 18 extracts from the UN fact-finding mission (FitzGerald) report and six UNIIIC reports to the Security Council

4. The Prosecution and the Sabra Defence reached agreements as to evidence regarding the 18 sets of facts listed below.¹¹ The Prosecution and the Merhi Defence agreed to seven of these, as indicated.¹² These sets of facts have been extracted from the UN fact-finding mission (FitzGerald) report and six UNIIIC reports to the Security Council, namely, the first, third, fourth, ninth, tenth and eleventh reports:

- 1) During 2004, certain voices in Lebanon suggested amending the Constitution in order to extend the term of Mr Lahoud.¹³ The Merhi Defence also agreed to this fact.¹⁴

⁶ Agreed facts, no. (v). *See also* paras 433, 453, 479, 6380 where the Trial Chamber accepted this agreed fact.

⁷ Agreed facts, no. (vi). *See also* paras 433, 6380 where the Trial Chamber accepted this agreed fact.

⁸ Agreed facts, no. (vii). *See also* paras 633, 6380 where the Trial Chamber accepted this agreed fact.

⁹ Agreed facts, no. (viii).

¹⁰ Agreed facts, no. (ix).

¹³ Sabra Defence – Prosecution agreements, no. (i); Fact-finding mission report, p. 5, para. 8.

¹⁴ Merhi Defence – Prosecution agreements, no. (i).

- 2) On 1 October 2004 former Minister Marwan Hamade narrowly escaped death when a bomb exploded next to his car. His guard was killed in the explosion.¹⁵
- 3) Mr Abu Adas, a male of Palestinian origin, was born in Jeddah (Saudi Arabia) on 29 August 1982 and came to Lebanon with his family in 1991. He is the son of Taysir Abu Adas and Nehad Moussa Nafeh.¹⁶ The Merhi Defence also agreed to this fact.¹⁷
- 4) The main lines of investigation of the Commission focused on the crime scene, technical aspects of the crime, analysis of telephone intercepts, the testimony of more than 500 witnesses and sources, as well as the institutional context in which the crime was committed.¹⁸ The Merhi Defence also agreed to this fact.¹⁹
- 5) Shortly after the signing of the memorandum of understanding, the Lebanese authorities transmitted to the Commission an 8,000-page case docket containing all the information and evidence collected since 14 February 2005.²⁰
- 6) The Commission established close links with the Lebanese security and judicial authorities. Regular discussions were held, particularly with the judicial authorities, to exchange updated information and files, share results and plan for the emerging phases of the investigation. Most of the witnesses interviewed by the Commission were summoned through the Lebanese judicial and security authorities.²¹
- 7) The file was handed over to the new Investigative Judge, Judge Abou Arraj. Judge Abou Arraj was Investigative Judge for the investigation from 22 February to 23 March 2005. He was appointed by First Judge Tanios Khoury, at the Supreme

Council, and the file was registered at Abou Arraj's office on 22 February 2005.²²

The Merhi Defence also agreed to this fact.²³

- 8) On 23 March 2005, Judge Abou Arraj stepped down from the post of Investigative Judge.²⁴ The Merhi Defence also agreed to this fact.²⁵
- 9) As in any criminal inquiry of this nature, the investigation has sought a comprehensive understanding of all possible perpetrators, modus operandi and motives. To that end, the Commission is in the process of reviewing a substantial volume of material from Government agencies regarding their surveillance operations; interviewing witnesses to examine more thoroughly the relationships between Mr. Hariri and various significant individuals; continuing the investigation into Mr. Abu Adass; enhancing telephone analysis; and pursuing any leads regarding potential motives or perpetrators.²⁶
- 10) As noted in the previous report, the UNIIIC investigation confirmed that, during the period prior to the assassination, there was growing tension between Mr. Hariri and senior Syrian officials, including Syrian President Bashar Al-Assad.²⁷
- 11) Considerable progress has been made in building a solid organization capable of meeting the significant investigative, analytical, security, translation and interpretation, and other challenges associated with its mandate. Nonetheless, sustaining an undertaking of such complexity over an extended period of time remains a critical focus of the Commission's work. Certainty of mandate and predictability of financial, human and other resources are the backbone of any organizational growth. They constitute the underpinning of the systematic and methodological approach advocated in the Commission's previous report. The Commission thus welcomes the request of the Government of Lebanon to the Secretary-General dated 4 May 2006 to extend its mandate for a further period of

up to one year. Such an extension would provide a sense of continuity and stability, guarantee steady operations and planning, and offer assurances to staff.²⁸

12) In order to assist the investigation, the full and unconditional cooperation of the Syrian Arab Republic with the Commission remains crucial. On the basis of information received, further requests will be formulated and addressed to the Syrian Arab Republic. In all its meetings with Syrian officials, the Commission received assurances of the intention of the Syria Arab Republic to comply fully with all its requests and to support the Commission's pursuit of those who killed former Prime Minister Hariri. Syrian officials have also offered to actively cooperate with and assist the Commission by making available information in their possession which may be relevant to the investigation. The Commission will continue to request full cooperation from Syrian authorities, including in collecting documents, seeking specific information and facilitating the interviews of Syrian citizens.²⁹

13) The internal working procedure sets out the standard operating procedures applicable to the different investigative and managerial aspects of the Commission's work. The investigative matters regulated include the modalities of interviews of witnesses and suspects; the treatment of sensitive sources; and the management of forensic exhibits and evidence. Managerial issues encompass a code of conduct and interpretation and translation standards. In addition, the internal procedure standardizes the relations of the Commission with Member States and their judicial authorities, in particular regarding requests for assistance.³⁰

14) The Commission also maintains a close working relationship with the Lebanese authorities which provide security to the Commission's staff and facilities. The Commission is grateful to the Lebanese Army and to the Internal Security Forces for their unfailing support.³¹

³¹ Sabra Defence – Prosecution agreements, no. (xiv); Ninth UNHIC report, pp 16-17, para. 83.

- 15) Terrorist investigations are by definition complex and difficult. The Commission faces additional challenges, including the magnitude of the attacks, their continuing nature and the fact that the investigations are conducted in an environment dominated by ongoing security concerns. Despite these difficulties, the Commission has continued its methodical approach in assisting the Lebanese authorities to solve the cases, being guided exclusively by the facts and the evidence and exploring all investigative leads.³²
- 16) In the last four months, the Commission witnessed a deteriorating security environment. A number of attacks targeted members of the Lebanese security forces and the international community. The political and economic conditions in the country have also led to a number of street demonstrations that resulted in violent clashes and shootings.³³
- 17) The Commission has accelerated the pace of its operations. Since it last reported, it has more than doubled the number of requests for assistance sent to Lebanon and other States, from 123 to 256.³⁴ The Merhi Defence agreed to this fact.³⁵
- 18) First, the Commission has faced difficulties in obtaining potentially sensitive information for investigative purposes. The Commission also frequently sends formal requests for assistance for specific information to Member States. The Commission is mindful of the burden imposed on States in responding to such requests. While the vast majority of requests are responded to in a timely and comprehensive manner, the Commission notes that late or incomplete responses slow progress in the investigation.³⁶ The Merhi Defence also agreed to this fact.³⁷

3. Agreements as to evidence between the Prosecution and the Ayyash and Sabra Defence pertaining to the participating victims

5. Below are the agreements as to evidence on 53 sets of facts pertaining mostly to the participating victims. The Prosecution and the Ayyash and Sabra Defence agreed to these facts:³⁸

- 1) V001 is Robert Aoun, born on 26 March 1967 in Thoun, Batroun District, Lebanon. V001 is the brother of the deceased Joseph Aoun. V001 identified his brother's body at the *Al Makassed* Hospital on 14 February 2005. Joseph Aoun was born on 12 November 1955. He died in the explosion of 14 February 2005. His body was crushed and disfigured due to the explosion.³⁹
- 2) V002 is Ghina Mneimneh Ghalayini, born on 25 February 1954 in Beirut, Lebanon. She is the widow of Abdul Hamid Ghalayini and mother of V003 and V004. Abdul Hamid Ghalayini was born on 4 November 1946 in Beirut, Lebanon. He died on 14 February 2005, due to the explosion.⁴⁰
- 3) V003 is Rana Ghalayini, born on 1 October 1980 in Beirut, Lebanon. She is the daughter of Abdul Hamid Ghalayini and V002.⁴¹
- 4) V004 is Lama Ghalayini, born on 5 May 1978 in Beirut, Lebanon. She is the daughter of Abdul Hamid Ghalayini and V002. V002-E008 is a press clipping titled 'A sit-in at the Crime Scene Urging Officials to Remove the rubble off of Ghalayini'. V003 and V004 are depicted in the press clipping. The body of Abdul Hamid Ghalayini was found on 2 March 2005. One of his feet was uncovered around 20-30 centimetres under the rubble and his body was discovered upon removal of the rubble. His left leg was totally decomposed, but his facial features were recognisable. A Nokia mobile was found near his body, it was charred. Abdul Hamid's body was taken to the American University of Beirut Medical Center. Abdul Hamid's head was charred and his body was inflated and decomposed. Some

⁴⁰ Victims agreed facts, V002.

⁴¹ Victims agreed facts, V003.

of the bones were broken. V004 was diagnosed with and treated for depression and PTSD.⁴²

- 5) V008 is Raymond Abou-Chaaya, born on 12 June 1971 in Zahle, Lebanon. Due to the 14 February 2005 explosion, V008 sustained scratches, damage to his left eardrum and neck and lower back pain. V008-E014 is an orthopaedic and traumatological surgery report. It provides that Dr Nemeh Mallah examined V008 and noted that V008 suffered from pain in both ears and several bruises on his body due to a powerful explosion.⁴³
- 6) V009 is Maria Al-Kasti, born on 11 January 1966 in Beirut, Lebanon. V009-E002 is a discharge summary from the American University of Beirut Medical Centre. It shows that V009 was admitted on 14 February 2005. V009 was discharged on 17 February 2005. V009 underwent two CT scans of her brain on 15 February 2005. The final diagnosis was 1) head trauma; 2) right frontal concussion; and 3) right frontal small subdural and subarachnoid hematoma. V009-E004 is an American University of Beirut Medical Centre Neurosurgery Note which provided that V009 needs one month of rest at home, starting 17 February 2005. V009-E005 is an American University of Beirut Medical Centre sick leave note for V009, from 2 March to 3 April 2005, due to her head injury. V009-E006 is a forensic report. It provides that the proximity of the haemorrhage to the frontal lobe where the olfactory nerve is located has resulted in a lesion, which is often concurrent with the loss of the sense of taste. After almost one year since her injury, this lesion seems to have become definitive and permanent at a percentage of ten.⁴⁴
- 7) V010 is Sanaa El Sheikh, born on 18 May 1956 in Beirut, Lebanon. V010 was admitted to the emergency unit at the American University of Beirut Medical Centre on 14 February 2005. Due to the explosion, she suffered from laceration on her scalp, face bruises and hypotension. She received 25 sutures on the laceration.⁴⁵

⁴⁴ Victims agreed facts, V009.

⁴⁵ Victims agreed facts, V010.

- 8) On 14 February 2005, V012 was a bodyguard to the former Prime Minister Rafik Hariri and was injured due to the explosion. He was admitted to a hospital on 14 February 2005 and was discharged the next day. He was diagnosed with head trauma, severe headache and loss of consciousness. V012-E002 is a neurology report. V012 was diagnosed with vertigo and headaches in 2005 and 2006, due to the explosion of 14 February 2005. V012-E003 is a neurology report dated 21 November 2011. It states that V012 had dystychiphobia and was treated with Lecital 20 mg and Concor 5. This was a permanent treatment and V012 suffers from PTSD due to the 14 February 2005 explosion.⁴⁶
- 9) On 14 February 2005, V013 was injured due to the explosion. 1V00003 is a medical centre discharge summary. V013 was admitted to hospital on 14 February 2005 due to the explosion. He underwent two CT scans and an X-ray scan. The X-ray scan showed that he suffered from a radial head fracture with scapholunate dissociation, shrapnel in his right forearm (at the distal interphalangeal joint of the fifth finger with a fracture of the distal aspect of the middle phalanx). He was prescribed Keflex 500 mg, Di-Antalvic, Fucidin and artificial tears. He was discharged a day later; V013-E002 is another discharge summary. V013 was admitted to hospital on 3 June 2005 and was discharged on the same day. He was treated for his inability to extend his left distal phalanx of his little finger. 1V00005 is a neurosurgeon report dated 21 November 2011. It shows that V013 was being treated for nervous system energy depletion, anxiety and depression. Since the 14 February 2005 explosion, he was permanently treated with Cipralext 10 mg. V013 suffers from PTSD due to the 14 February 2005 explosion.⁴⁷
- 10) V014 is Wissam Naji, born on 1 January 1971 in Zahle, Lebanon. Due to the explosion of 14 February 2005, V014 was injured and was admitted to the emergency unit at the American University of Beirut Medical Center at 15:34, where he received treatment. He was discharged at 16:30.⁴⁸

⁴⁷ Victims agreed facts, V013. There were some additional agreed facts that are confidential.

⁴⁸ Victims agreed facts, V014.

11) V016 was injured due to the 14 February 2005 explosion in Beirut. On 15 February 2005, V016 was medically examined. Due to the explosion, he suffered from severe headaches, stress, incoherence and severe bruises all over his body. On 10 April 2005, V016 was treated by a urologist. According to the report, since the 14 February 2005 explosion, V016 suffered from insomnia, became edgy and could not tolerate loud noises around him. He also suffered from urinary incontinence and sexual debility due to the explosion. On 25 July 2011, V016 was treated by a urologist. V016 suffered from a state of insomnia and has been hearing sounds of explosions while sleeping since the 14 February 2005 explosion. He also suffered from urinary incontinence and sexual debility due to the explosion. On 29 April 2005, V016 was examined and was diagnosed with spastic colon. He was treated. On 24 June 2005, V016 was examined at a neurophysiology clinic. He was diagnosed with a serious state of stress accompanied by depression and panic attacks for more than four months. Furthermore, he suffered from severe psychological disorder symptoms due to his presence at the explosion site on 14 February 2005. The doctor suggested a follow-up and antidepressant treatment for at least a year. On 25 July 2010, V016 was examined at a neurophysiology clinic. He was diagnosed with PTSD. The doctor advised that V016 needs medication and physiological treatment.⁴⁹

12) V018 is Rachid Hammoud, born on 23 July 1963 in El-Mghayrieh, Lebanon. On 14 February 2005, he was a paramedic for Mr Rafik Hariri and was travelling with the convoy and was injured due to the explosion. V018-E011 is a photo of V018 after the explosion. It shows V018's face, hands and shirt covered in blood. V018 was admitted to the American University of Beirut Medical Center on 14 February 2005 due to injuries sustained from the explosion. His attending physician was Dr Rachid Haidar. V018 lost consciousness and suffered from forearm burns and multiple lacerations over his cheek and left thigh. In addition, he had a fracture in his left leg, second degree burn on his right leg and the vision in his right eye was blurry. A CT scan of V018's brain and skull showed that there was a nasal septal

⁴⁹ Victims agreed facts, V016. There were some additional agreed facts that are confidential.

deviation to the right, foreign bodies noted at the level of soft tissue of the right external ear and in the subcutaneous tissues of the head. There was also diffuse subcutaneous soft tissue swelling, mainly in the right anterior aspect of the neck. V018 was discharged on 8 March 2005. V018 sought medical assistance at the American University of Beirut Medical Center on 9 March 2005. Dr Rachid Haidar reported that V018 was injured in the 14 February 2005 explosion and sustained fractures and burns. He also reported that V018 will need rest for at least two months from the explosion. V018 sought medical assistance at the American University of Beirut Medical Center on 4 April 2005. Dr Rachid Haidar reported that V018 continues to need rest from 18 April to 20 May 2005 because of his fractures and burns. V018 sought medical assistance at the American University of Beirut Medical Center on 20 May 2005. Dr Rachid Haidar reported that V018 continues to need rest for two weeks starting 23 May 2005 because of his fractures. V018 suffers from PTSD due to the 14 February 2005 explosion.⁵⁰

13) V019 is Nabih Mhanna, born on 28 February 1957 in El-Damour, Lebanon. V019 worked as a driver on 14 February 2005. At the time of the explosion, he was in front of the HSBC Bank (*Ain Al-Mreisseh* branch). V019 was admitted to the emergency unit at the American University of Beirut Medical Center on 14 February 2005, at 15:00. His attending physician was Dr Jamali Faek / Dr Karam Salim Karam. Due to the explosion, he suffered from lacerations on his right hand. He was discharged at 16:00. Due to the explosion, V019 was absent from work for around one week. During this period, his daily activities were affected.⁵¹

14) V023 is Saada Hachem Abu Rjeily, born in 1925 in Ain-El-Hor, Lebanon. She is the mother of the deceased Zahi Abou Rjeily and V024. Zahi Abou Rjeily was born on 1 October 1959 in Al Debbieh, Lebanon. He died on 15 February 2005, caused by the blockage of the respiratory tract as a result of the heavy accumulation of debris from the explosion of 14 February 2005.⁵²

⁵⁰ Victims agreed facts, V018.

⁵² Victims agreed facts, V023.

- 15) V024 is Nazih Abu Rjeily, born on 5 November 1950 in Binwaiti, Lebanon. He is the brother of the deceased Zahi Abou Rjeily.⁵³
- 16) V029 is Mahmoud Wazzan, born 3 June 1962 in Beirut, Lebanon. V029 is the owner of Poly Service, a company that offers cleaning services. In February 2005, V029 was the tenant of no. 115, located on the first ground floor of the north block of the STARCO Complex in Beirut. V029 had to vacate the abovementioned premise due to damage caused as a result of the 14 February 2005 explosion.⁵⁴
- 17) V030-E020 contains two photographs of V030 and the injuries he sustained due to the 14 February 2005 explosion. V030-E035 contains four photographs of V030's office interior and exterior after the 14 February 2005 explosion. The following documents show the value of some of the items that were damaged at V030's office, due to the 14 February 2005 explosion: V030-E047 shows that on 27 February 1999, V030 purchased a machine that amounted to LBP 7,930,000.00. V030-E037 shows that on 5 April 1999, V030 purchased office equipment which amounted to EUR 1,963.54. V030-E042 and V030-E044 show that on 28 December 2001, V030 purchased office equipment (including a scanner) which amounted to USD 8,180.00. V030-E036 shows that on 1 February 2005, V030 purchased office equipment which amounted to USD 1,067.00. The following documents show some of the items and equipment that V030 had to purchase for his office due to the damage of the 14 February 2005 explosion: V030-E038 shows that V030 purchased an IBM laptop on 14 July 2005 which amounted to USD 4,970.00; V030-E040 shows an offer dated 27 April 2005, for a new plotter which amounted to USD 8,800.00; V030-E045 shows a quotation dated 16 May 2005, for a printer that amounted to USD 1,320.00; V030-E046 shows a quotation dated 16 May 2005, for a scanner that amounted to USD 7,700.00; and V030-E048 shows that V030 purchased a machine on 16 November 2005 which amounted to USD 6,000.00; V030-E039 contains photographs of computers that were damaged due to the 14 February 2005 explosion. V030-E043 contains one photograph of a damaged

⁵³ Victims agreed facts, V024.

⁵⁴ Victims agreed facts, V029.

scanner; V030-E049 contains two photographs of a damaged office machine; and V030-E052 contains photographs of damaged machines and equipment. Since the February 2005 explosion, V030 had marital problems with his wife. He consulted with a psychologist, in September 2010 and 2011. According to the psychologist, [t]he psychoanalytical sessions revealed several symptoms associated with post-traumatic stress; emotional block, with a sense of detachment from the family circle in general and the spouse in particular, avoidance of emotions, insomnia with disturbed sleep, hypervigilance, flashbacks of the bodies of his dead colleagues which he had to pick up himself, a sense of no future and a strong sense of insecurity. The psychologist reported that these symptoms stemmed from the feeling of being in a threatening situation as V030 lost his friends in the explosion, his savings and his security. V030 received a cheque from the Lebanese Higher Relief Commission.⁵⁵

18) V031 is Liliane Khallouf, born on 30 June 1967 in Chiah, Lebanon. Due to the explosion of 14 February 2005, V031 was admitted to the St Georges Hospital. She suffered from head, facial and nose trauma because she fell flat on her face. Her nasal bone was fractured. She underwent an operation at the hospital on 16 February 2005. The discharge summary stated that V031 will need further operations in the future. V031-E009 is a St Georges Hospital medical note which provided that V031 required sick leave for 12 days, starting from 17 February 2005. V031-E003 is an otorhinolaryngology note dated 7 February 2006. The note provided that V031 suffered from a septal deviation and must be operated in order to correct the nasal obstruction. These are some of the documents showing the amount V031 spent on hospital fees and medication due to the injuries suffered as a result of the 14 February 2005 explosion: V031-E005 is an invoice issued by *Pharmacie Suzanne* on 21 February 2005 which amounted to LBP 202,852; V031-E006 is a medical prescription for V031, issued on 21 February. This amount is included in V031-E005. V031-E008 is a receipt voucher issued by the St Georges

⁵⁵ Victims agreed facts, V030. There were some additional agreed facts that are confidential.

Hospital on 17 February 2005. It indicates that V031 had paid a total of LBP 82,000 to the hospital.⁵⁶

19) Due to the explosion, V033 was injured. V033-E002 is a report by an angiologist-cardiologist, dated 22 November 2011. V033 had been undergoing treatment for thrombosis and thrombophlebitis in both his legs since 21 February 2005. V033 suffers from PTSD due to the 14 February 2005 explosion.⁵⁷

20) V034 is Mehi Eldin Meneimneh, born on 19 April 1977 in Beirut, Lebanon. On 14 February 2005, V034 was an ISF officer and was part of the Hariri convoy. Due to the explosion, V034 was injured. V034 suffers from PTSD due to the 14 February 2005 explosion.⁵⁸

21) Due to the 14 February 2005 explosion, V035 was injured and admitted to a medical centre. He suffered from a head trauma as the ceiling fell on him at the Phoenicia Hotel as a result of the explosion. V035 was hallucinating and unresponsive to commands and to stimuli and was 'moving his neck in a crazy manner'. At the emergency room, he regained his normal consciousness and started moving his left upper extremity and then his right upper extremity distally and minimally. He was unable to move his lower extremities. Furthermore, V035 was complaining of severe pain in his lower extremities when minimal pressure was applied. V035 also suffered from neck pain. He was discharged on 15 February 2005.⁵⁹

22) V040 is Abdel-Qader Darwiche, born on 8 July 1987 in Beirut, Lebanon. He is the brother of the deceased Mohammed Darwiche and the son of V044 and V057. 1V00001 is a Rafik Hariri University Hospital medical report dated 24 October 2011. It provides that V040 had been suffering from chronic functional dyspepsia with epigastric pain and had been receiving treatment for five years. Mohammed Darwiche was born on 1 August 1981 in Beirut, Lebanon. Mohammed Darwiche

was Rafik Hariri's bodyguard and was part of the Hariri convoy on 14 February 2005 and died as a result of the explosion. His body was entirely charred.⁶⁰

23) V041 is Nivine Darwiche, born on 14 March 1978 in Beirut, Lebanon. She is the sister of the deceased Mohammed Darwiche and the daughter of V044 and V057.⁶¹

24) V043 is Hana Diab El-Arab, born on 10 August 1940 in Beirut, Lebanon. V043 is the widow of the deceased Yahya El-Arab. Since her husband's death, V043 suffers from severe depression. V043-E003 shows that V043 still suffered from and was being treated for depression as of 26 October 2011. Yahya El-Arab was born on 22 November 1943 in Beirut, Lebanon. On 14 February 2005, he was Rafik Hariri's personal bodyguard and was part of the Hariri convoy. Yahya El-Arab died due to the impact of the 14 February 2005 explosion.⁶²

25) V044 is Saadeddine Darwiche, born on 20 March 1951 in Beirut, Lebanon. He is the father of the deceased Mohammed Darwiche.⁶³

26) V045 is Clemence Tarraf, born on 10 December 1981 in Beirut. She is the sister of the deceased Ziad Tarraf and of V046. Ziad Tarraf was born on 11 June 1972 in Beirut, Lebanon. On 14 February 2005, he was Rafik Hariri's personal bodyguard and was part of the Hariri convoy. Ziad Tarraf died due to the impact of the 14 February 2005 explosion.⁶⁴

27) V046 is Mamdouh Tarraf, born on 15 April 1975 in Beirut. V046 is the brother of the deceased Ziad Tarraf and V045. V046 identified the body of the deceased at the American University of Beirut Medical Centre.⁶⁵

28) Bakiza Nasser was born on 25 May 1963 in Beirut. She was the sister of the deceased Talal Nasser and the daughter of V053. She passed away on 17 February 2017. She was participating victim V048. Talal Nasser was born on 2 July 1961 in

⁷³ Victims agreed facts, V056.

- 35) V057 is Sahar Kalaoui, born on 1 September 1959 in Damascus, Syria. She is the mother of the deceased Mohammed Darwiche.⁷⁴
- 36) V058-E002 is a medical note issued by a cardiologist. It provides that V058 suffered from and received permanent treatment for high blood pressure.⁷⁵
- 37) V059 is Saadeddine Hariri, born on 18 April 1970 in Riyadh, Saudi Arabia. He is the son of Rafik Hariri. Rafik Hariri was born on 1 November 1944 in Sidon, Lebanon. Rafik Hariri died due to the impact of the 14 February 2005 explosion.⁷⁶
- 38) V062 is Yasma Fuleihan, born on 5 July 1966 in Kuwait. She is the widow of the deceased Basil Fuleihan. Basil Fuleihan was born on 10 September 1962 in Beirut, Lebanon. On 14 February 2005, Basil Fuleihan was seated next to Rafik Hariri when the explosion happened. He was admitted to the American University of Beirut Medical Center. Then, he was transferred and admitted to the Percy Hospital in Paris at 03:15 on 15 February. Basil suffered from deep and severe burns, including third degree burns to the face with disfigurement. His eyelids were everted and his tongue was protruding. There was no bleeding when incisions were made to both hands, and his urine was red. According to the medical report 60013544-60013560, Mr Fuleihan suffered serious burns on more than 95 per cent of his body, in addition to very deep injuries to the hands and face. He was hospitalised from 14 February to 18 April 2005. Despite various surgeries, treatments and constant care, Mr Fuleihan succumbed to his injuries on 18 April 2005.⁷⁷
- 39) V063 is Bassam Osman, born on 15 June 1983 in Majdala, Lebanon. V063, V066, V067, V068, V069, V070 are siblings of the deceased Haitham Osman. They are the children of V071 and V072. Haitham Osman was born on 28 September 1975 in Majdala, Lebanon. On 14 February 2005, Haitham was riding on his motorbike near the St Georges Hotel when the explosion took place. Haitham was admitted to

the American University of Beirut Medical Center, where he succumbed to the injuries suffered as a result of the explosion.⁷⁸

40) V066 is Abdo Osman, born on 14 March 1970 in Ablah, Lebanon.⁷⁹

41) V067 is Laura Osman, born on 7 January 1985 in Aayat, Lebanon.⁸⁰

42) V068 is Hicham Osman, born on 31 January 1978 in Machha, Lebanon.⁸¹

43) V069 is Mohammed Osman, born on 26 April 1972 in Ablah, Lebanon.⁸²

44) V070 is Kamal Osman, born on 2 July 1973 in Ablah, Lebanon.⁸³

45) V071 is Ghazia Hourri, born in 1946 in Baalbek, Lebanon.⁸⁴

46) V072 is Khaled Osman, born on 2 July 1942 in Majdala, Lebanon.⁸⁵

47) V073-E009 is a medical note dated 9 July 2007. It shows that V073 suffered from stable angina.⁸⁶

48) V080 is Rabih Nohra, born on 30 April 1977 in Tannourine El-Tahta, Lebanon. As the medical report dated 26 February 2014 provides, due to the 14 February 2005 explosion, V080 suffered from injuries on his face and around his eye. In addition, the explosion also left permanent scars on his face.⁸⁷

49) V081 is Rima Ghalayini, born on 14 March 1964 in Beirut, Lebanon. She is the sister of the deceased Mohammed Riad Ghalayini. Mohammed Riad Ghalayini was born on 1 January 1975 in Beirut, Lebanon. He died on 14 February 2005 due to the explosion that caused severe burns to his body.⁸⁸

50) V082 is Zeina Chehade Tarraf, born on 12 November 1983 in Beirut, Lebanon. She is the widow of the deceased Ziad Tarraf.⁸⁹

51) V084 is Omar Tarraf, born on 7 January 2001 in Bassum, Germany.⁹⁰

52) V085 is Fatme El Bahi, born in 1935 in Beirut, Lebanon. She is the mother of the deceased Mohammed Riad Ghalayini.⁹¹

53) V086 is Dina Ghalayini, born on 9 March 1961 in Beirut, Lebanon. She is the sister of the deceased Mohammed Riad Ghalayini.⁹²

6. There were also a number of agreements as to evidence on facts relating to victims who were granted protective measures under Rule 133 (A).

4. Facts of common knowledge the subject of judicial notice

7. During the trial, the Sabra Defence asked the Trial Chamber to take judicial notice of the entirety of Mr Peter FitzGerald's UN fact-finding report and eleven UNIIC reports to the UN Security Council.⁹³ In examining the application the Trial Chamber noted that:

Many of the "facts" proposed by the motion relate to matters highly contested between the Parties that are central to the Trial Chamber's determination of the charges against the individual Accused. These include the cause of the blast on 14 February 2005, the alleged role of Mr Ahmad Abu Adass in the attack, the content of UNIIC interviews with witnesses, the role of Syrian intelligence in Lebanon at the time and, possibly in Mr Hariri's death, the role of others the UNIIC suspected may have been involved in planning and carrying out the attack, and the general conclusions—between 2005 and 2008—of the two commissions as to the progress of their investigations, and responsibility for the explosion. The reports even reached conclusions as to culpability.

Taking judicial notice of such contested facts—or the entirety of the reports of these two fact-finding missions—would be absurd. The Trial Chamber is holding a trial to determine whether Accused persons are guilty as charged in the consolidated indictment; it is not

⁹³ Decision on taking judicial notice, para. 3.

reviewing fact-finding reports or conducting a general inquiry. The trial features numerous disputed issues, upon some of which the UNIIIC reached its own conclusions. The conclusions of these fact-finding reports cannot usurp the Trial Chamber's own judicial fact-finding function, which necessarily precedes its verdict of guilt or an acquittal. These sorts of matters are, indisputably, not capable of being "facts of common knowledge".⁹⁴

8. After carefully examining the twelve reports, the Trial Chamber took judicial notice of the following nine sets of facts of common knowledge, extracted the FitzGerald report and the first and seventh UNIIIC reports:

- 1) On 14 February 2005, an explosion in downtown Beirut killed a number of persons among them the former Prime Minister Rafik Hariri. The United Nations Secretary-General dispatched a fact-finding mission to Beirut to inquire into the causes, the circumstances and the consequences of this assassination. Following its arrival in Beirut on 25 February, the mission met with a large number of Lebanese officials and representatives of different political groups, performed a thorough review of the Lebanese investigation and legal proceedings, examined the crime scene and the evidence collected by the local police, collected and analysed samples from the crime scene, and interviewed some witnesses in relation to the crime.⁹⁵
- 2) The Syrian Arab Republic had maintained a military presence in Lebanon since May 1976 with the consent of the Lebanese Government. It also exerted political influence in Lebanese affairs, an influence that has significantly increased since 1990 and was sanctioned in 1991 by a treaty of 'Brotherhood, Cooperation and Coordination'.⁹⁶
- 3) Mr Lahoud's term in office should have ended in 2004, with no possibility of renewal according to the Constitution.⁹⁷

⁹⁴ Decision on taking judicial notice, paras 23-24.

⁹⁵ Decision on taking judicial notice, fact 1, para. 28, disposition, table A, Fact-finding mission report, p. 2, executive summary.

⁹⁶ Decision on taking judicial notice, fact 2, para. 28, disposition, table A; Fact-finding mission report, p. 5, para. 6, *see also* T. 17 November 2014, p. 34 (exhibit P306).

⁹⁷ Decision on taking judicial notice, fact 3, para. 28, disposition, table A; Fact-finding mission report, p. 5, para. 8, *see also* T. 17 November 2014, p. 33 (exhibit P305).

- 4) On 2 September 2004, the Security Council had adopted its resolution 1559 (2004), which, among other provisions, called upon ‘all remaining foreign forces to withdraw from Lebanon’ and declared ‘its support for a free and fair electoral process in Lebanon’s upcoming presidential elections conducted according to Lebanese constitutional rules devised without foreign interference or influence’.⁹⁸
- 5) The Security Council, by its resolution 1595 (2005) of 7 April 2005, decided to establish an International Independent Investigation Commission based in Lebanon to assist the Lebanese authorities in their investigation of all aspects of the terrorist attack which took place on 14 February 2005 in Beirut that killed former Lebanese Prime Minister Rafik Hariri and others, including to help identify its perpetrators, sponsors, organizers and accomplices. The Secretary-General notified the Council that the Commission began its full operations with effect from 16 June 2005. The Commission was granted an extension to the initial period of investigation mandated by the Council, until 26 October 2005. During the course of its investigation, the Commission received extensive support from the Government of Lebanon and benefited from expert inputs from a number of national and international entities.⁹⁹
- 6) The Syrian Arab Republic has long had a powerful influence in Lebanon. During the Ottoman Empire, the area that became Lebanon was part of an overall administrative territory governed from Damascus. When the countries were established in the aftermath of the First World War, Lebanon was created from what many Arab nationalists considered to be rightfully part of Syria. Indeed, since the countries became independent, they have never had formal diplomatic relations.¹⁰⁰
- 7) Syrian troops were invited into Lebanon by Lebanese President Suleiman Franjeh in May 1976 in the early stages of the latter’s civil war. In the Taif Agreement, reached among members of the Lebanese Parliament, that ended the civil war in

⁹⁸ Decision on taking judicial notice, fact 4, para. 28, disposition, table A; Fact-finding mission report, p. 6, para. 11, *see also* T. 19 November 2014, pp 45-47.

⁹⁹ Decision on taking judicial notice, fact 5, para. 28, disposition, table A, First UNIIIC report, p. 5, summary.

¹⁰⁰ Decision on taking judicial notice, fact 6, para. 28, disposition, table A, First UNIIIC report, p. 14, para. 23.

1989, *inter alia*, Lebanon thanked the Syrian Arab Republic for its assistance in deploying its forces in Lebanon. A provision of the agreement called for Lebanon and the Syrian Arab Republic to determine jointly the future redeployment of those forces. A later agreement reached between the two countries in May 1991 regarding cooperation restated that provision. Syrian forces withdrew in May 2005 in compliance with Security Council resolution 1559 (2004).¹⁰¹

- 8) On 14 February 2005, General Ali Al-Hajj was the Head of the Internal Security Forces (ISF). He was promoted to the post in November 2004.¹⁰²
- 9) Negotiations unfolded during that period between Hariri and other individuals, including potential candidates, and intense interest was focused upon the draft electoral law, including the drawing of electoral district boundaries in Lebanon and, in particular, in Beirut.¹⁰³

9. The Trial Chamber also took judicial notice of the following enactment of the United States Congress, namely:

- 10) The Syria Accountability and Lebanese Sovereignty Restoration Act of 2003 is an enactment of the Congress of the United States of America.¹⁰⁴

¹⁰¹ Decision on taking judicial notice, fact 7, para. 28, disposition, table A, First UNIIIC report, pp 14-15, para. 24, *see also* T. 17 November 2014, p. 21 (exhibit P304).

¹⁰² Decision on taking judicial notice, fact 8, para. 28, disposition, table A, First UNIIIC report, p. 24, para. 51.

¹⁰³ Decision on taking judicial notice, fact 9, para. 28, disposition, table A, Seventh UNIIIC report, p. 12, para. 58.

¹⁰⁴ Decision on taking judicial notice (Syria Accountability and Lebanese Sovereignty Restoration Act of 2003), re exhibit P307. This fact was admitted for the limited purpose of showing the position taken by the United States towards Syria and to add context to the allegation that Mr Rafik Hariri had aligned himself with the United States of American in 2003, which may provide some background evidence.
